The chief, indeed the only real historical difficulty in the narrative, is to determine the time of the dedication of the wall, whether in the 32d year of Artaxerxes or before. The expression in Neh. xiii. 1, "On that day," seems to fix the reading of the law to the same day as the dedication (see xii. 43). But if so, the dedication must have been after Nehemiah's return from Babylon (mentioned xiii. 7); for Eliashib's misconduct, which occurred "before" the reading of the law, happened in Nehemiah's absence. But then, if the wall only took 52 days to complete (Neh. vi. 15), and was begun immediately [when] Nehemiah entered upon his government, how came the dedication to be deferred till 12 years afterwards? The answer to this probably is that, in the first place, the 52 days are not to be reckoned from the commencement of the building, seeing that it is incredible that it should be completed in so short a time by so feeble a community and with such frequent hindrances and interruptions; seeing, too, that the narrative itself indicates a much longer time. Such passages as Nehemiah iv. 7, 8, 12, v., and v. 16 in particular, vi. 4, 5, coupled with the indications of temporary cessation from the work which appear at iv. 6, 10, 15, seem quite irreconcilable with the notion of less than two months for the whole. The 52 days, therefore, if the text is sound, may be reckoned from the resumption of the work after iv. 15, and a time exceeding two years may have elapsed from the commencement of the building. But even then it would not be ready for dedication. There were the gates to be hung, perhaps much rubbish to be removed, and the ruined houses in the immediate vicinity of the walls to be repaired. Then, too, as we shall see below, there were repairs to be done to the Temple, and it is likely that the dedication of the walls would not take place till those repairs were completed. Still, even these causes would not be adequate to account for a delay of 12 years. Josephus, who is seldom in harmony with the book of Nehemiah, though he justifies our suspicion that a longer time must have elapsed, by assuming two years and four months to the rebuilding, and

placing the completion in the 28th year of the king's reign whom he calls Xerxes (thus interposing an interval of 8 years between Nehemiah's arrival at Jerusalem as governor and the completion), yet gives us no real help. He does not attempt to account for the length of time, he makes no allusion to the dedication, except as far as his statement that the wall was completed in the ninth month, Chisleu (instead of Elul, the sixth, as Neh. vi. 15), may seem to point to the dedication (1 Macc. iv. 59), and takes not the slightest notice of Nehemiah's return to the king of Persia. We are left, therefore, to inquire for ourselves whether the book itself suggests any further causes of delay. One cause immediately presents itself, namely, that Nehemiah's leave of absence from the Persian court, mentioned ii. 6, may have drawn to a close shortly after the completion of the wall, and before the other above-named works were complete. And this is rendered yet more probable by the circumstance, incidentally brought to light, that, in the 32d year of Artaxerxes, we know he was with the king (xiii. 6).

Other circumstances, too, may have occurred to make it imperative for him to return to Persia without delay. The last words of ch. vi. point to some new effort of Tobiah to interrupt his work, and the expression used seems to indicate that it was the threat of being considered as a rebel by the king. If he could make it appear that Artaxerxes was suspicious of his fidelity, then Nehemiah might feel it matter of necessity to go to the Persian court to clear himself of the charge. And this view both receives a remarkable confirmation from, and throws quite a new light upon the obscure passage in Ezr. iv. 7-23. We have there a detailed account of the opposition made by the Samaritan nations to the building of the WALLS of Jerusalem, in the reign of ARTAXERXES, and a copy of the letter they wrote to the king, accusing the Jews of an intention to rebel as soon as the wall should be finished; by which means they obtained a decree stopping the building till the king's further orders should be received. Now, if we compare Neh. vi. 6, 7, where mention is made of the report "among the heathen" as to the intended rebellion of Nehemiah, with the letter of the heathen nations mentioned in Ezr. iv., and also recollect that the only time when, as far as we know, the WALLS of Jerusalem were attempted to be rebuilt, was when Nehemiah was governor, it is difficult to resist the conclusion that Ezr. iv. 7-23 relates to the time of Nehemiah's government, and explains the otherwise unaccountable circumstance that 12 years elapsed before the dedication of the walls was completed. Nehemiah may have started on his journey on receiving the letters from Persia (if such they were) sent him by Tobiah, leaving his lieutenants to carry on the works, and after his departure Rehum and Shimshai and their companions may have come up to Jerusalem with the king's decree and obliged them to desist. It should seem, however, that at Nehemiah's arrival in Persia, he was able to satisfy the king of his perfect integrity, and that he was permitted to return to his government in Judaea. His leave of absence may again have been of limited duration, and the business of the census, of re-peopleing Jerusalem, setting up the city gates, rebuilding the ruined houses, and repairing the Temple, may have occupied his whole time till his second return to the king. During this second absence another evil arose — the gentiling party

recovered strength, and the intrigues with Tobiah (vi. 17), which had already begun before his first departure, were more actively carried on, and led so far that Eliashib the high-priest actually assigned one of the store-chambers in the Temple to Tobiah's use. This we are not told of till xiii. 4-7, when Nehemiah relates the steps he took on his return. But this very circumstance suggests that Nehemiah does not relate the events which happened in his absence, and would account for his silence in regard to Rehun and Shimshai. We may thus, then, account for 10 or 11 years having elapsed before the dedication of the walls took place. In fact it did not take place till the last year of his government; and this leads to the right interpretation of xiii. 6 and brings it into perfect harmony with v. 14, a passage which obviously imports that Nehemiah's government of Judea lasted only 12 years, namely, from the 20th to the 32d of Artaxerxes. For the literal and grammatical rendering of xiii. 6 is, "And in all this time was not I at Jerusalem: BUT in the two-and-thirtieth year of Artaxerxes king of Babylon, came I unto the king, and after certain days obtained I leave of the king, and I came to Jerusalem" — the force of  $\text{בְּ}$  after a negative being *but* rather than *for* (Ges. *Theol.* p. 680); the meaning of the passage being, therefore, not that he left Jerusalem to go to Persia in the 32d of Artaxerxes, but, on the contrary, that in that year he returned from Persia to Jerusalem. The dedication of the walls and the other reforms named in ch. xiii. were the closing acts of his administration.

It has been already mentioned that Josephus does not follow the authority of the Book of Nehemiah. He detaches Nehem. viii. from its context, and appends the narratives contained in it to the times of Ezra. He makes Ezra die before Nehemiah came to Jerusalem as governor, and consequently ignores any part taken by him in conjunction with Nehemiah. He makes no mention either whatever of Sanballat in the events of Nehemiah's government, but places him in the time of Jaddua and Alexander the Great. He also makes the daughter of Sanballat marry a son, not of Joiada, as Neh. xiii. 28, but of Jonathan, namely, Manasseh the brother of the High-priest Jaddua, thus entirely shifting the age of Sanballat from the reign of Artaxerxes Longimanus, to that of Darius Codomanus, and Alexander the Great. It is scarcely necessary to observe, that as Artaxerxes Longimanus died b. c. 424, and Alexander the Great was not master of Syria and Palestine till b. c. 332, all attempts to reconcile Josephus with Nehemiah must be lost labor. It is equally clear that on every ground the authority of Josephus must yield to that of Nehemiah. The only question therefore is what was the cause of Josephus' variations. Now, as regards the appending the history in Neh. viii. to the times of Ezra, we know that he was guided by the authority of the Apocryphal 1 Esdr. as he had been in the whole story of Zerubbabel and Darius. From the florid additions to his narrative of Nehemiah's first application to Artaxerxes, as well as from the passage below referred to in 2 Macc. i. 23, we may be sure that there were apocryphal versions

of the story of Nehemiah.<sup>a</sup> The account of Jaddua's interview with Alexander the Great savors strongly of the same origin. There can be little doubt, therefore, that in all the points in which Josephus differs from Nehemiah, he followed apocryphal Jewish writings, some of which have since perished. The causes which led to this were various. One doubtless was the mere desire for matter with which to fill up his pages where the narrative of the canonical Scriptures is meagre. In making Nehemiah succeed to the government after Ezra's death, he was probably influenced partly by the wish to give an orderly, dignified appearance to the succession of Jewish governors, approximating as nearly as possible to the old monarchy, and partly by the desire to spin out his matter into a *continuous* history. Then the difficulties of the books of Ezra and Nehemiah, which the compiler of 1 Esdr. had tried to get over by his arrangement of the order of events, coupled with Josephus' gross ignorance of the real order of the Persian kings, and his utter misconception as to what monarchs are spoken of in the books of Ezra, Nehemiah, and Esther, had also a large influence. The writer, however, who makes Darius Codomanus succeed Artaxerxes Longimanus, and confounds this last-named king with Artaxerxes Mnemon; who also thinks that Xerxes reigned above 32 years, and who falsifies his best authority, altering the names, as in the case of the substitution of Xerxes for Artaxerxes throughout the book of Nehemiah, and suppressing the facts, as in the case of the omission of all mention of Ezra, Tobias, and Sanballat during the government of Nehemiah, is not entitled to much deference on our part. What has been said shows clearly how little Josephus' unsupported authority is worth; and how entirely the authenticity and credibility of Nehemiah remains unshaken by his blunders and confusions, and that there is no occasion to resort to the improbable hypothesis of two Sanballats, or to attribute to Nehemiah a patriarchal longevity, in order to bring his narrative into harmony with that of the Jewish historian.

2. As regards the authorship of the book, it is admitted by all critics that it is, as to its main parts, the genuine work of Nehemiah. But it is no less certain that interpolations and additions have been made in it since his time;<sup>b</sup> and there is considerable diversity of opinion as to what are the portions which have been so added. From i. 1 to vii. 6, no doubt or difficulty occurs. The writer speaks throughout in the first person singular, and in his character of governor  $\text{נְהִימְיָהוּ}$ . Again, from xii. 31, to the end of the book (except xii. 44-47), the narrative is continuous, and the use of the first person singular constant (xii. 31, 38, 40, xiii. 6, 7 &c.). It is therefore only in the intermediate chapters, vii. 6 to xii. 26, and xii. 44-47, that we have to inquire into the question of authorship, and this we will do by sections: —

(a.) The first section begins at Neh. vii. 6, and ends in the first half of viii. 1, at the words "one man." It has already been asserted [EZRA, BOOK OF, vol. i. p. 805 *b*] that this section is identical with the paragraph beginning Ezr. ii. 1, and ending iii. 1; and it was there also asserted that the par-

<sup>a</sup> It is worth remarking, that the apocryphal book quoted in 2 Macc. i. 23 seems to have made Nehemiah contemporary with Jonathan, or Johana, the high-priest.

<sup>b</sup> K. F. Keil, in his *Einleitung*, endeavors indeed to vindicate Nehemiah's authorship for the whole book but without success.

graph originally belonged to the book of Nehemiah, and was afterwards inserted in the place it occupies in Ezra.<sup>a</sup> Both these assertions must now be made good; and first as to the identity of the two passages. They are actually identical word for word, and letter for letter, except in two points. One that the numbers repeatedly vary. The other that there is a difference in the account of the offerings made by the governor, the nobles, and the people. But it can be proved that these are merely variations (whether accidental or designed) of the same text. In the first place the two passages are one and the same. The heading, the contents, the narrative about the sons of Barzillai, the fact of the offerings, the dwelling in their cities, the coming of the seventh month, the gathering of all the people to Jerusalem as one man, are in words and in sense the very self-same passage. The idea that the very same words, extending to 70 verses, describe different events, is simply absurd and irrational. The numbers therefore must originally have been the same in both books. But next, when we examine the varying numbers, we see the following particular proofs that the variations are corruptions of the original text. Though the items vary, the sum total, 42,360, is the same (Ezr. ii. 64; Neh. vii. 66). In like manner the totals of the servants, the singing men and women, the horses, mules, and asses are all the same, except that Ezra has two hundred, instead of two hundred and forty-five, singing men and women. The numbers of the Priests and of the Levites are the same in both, except that the singers, the sons of Asaph, are 128 in Ezra against 148 in Nehemiah, and the porters 139 against 138. Then in each particular case when the numbers differ, we see plainly how the difference might arise. In the statement of the number of the sons of Arah (the first case in which the lists differ), Ezr. ii. 5, we read, **שִׁבְעֵימָאוֹר**, “seven hundred five and seventy,” whereas in Neh. vii. 10, we read, **שֵׁשׁ** **מֵאוֹרֹת הַמְּשִׁיִּים הַשָּׁנִים**. But the order of the numerals in Ezr. ii. 5, where the units precede the tens, is the only case in which this order is found. Obviously, therefore, we ought to read **הַמְּשִׁיִּים**, instead of **הַמְּשִׁיִּיהַ**, fifty instead of five. No less obviously **שִׁבְעֵים** may be a corruption of the almost identical **שָׁנִים** and probably caused the preceding change of **הַמְּשִׁיִּיהַ** into **הַמְּשִׁיִּים**.<sup>b</sup> But the tens and units being identical, it is evident that the variation in the hundreds is an error, arising from both *six* and *seven* beginning with the same letter **ש**. The very same interchange of six and seven takes place in the number of Adonikam, and Bigvai, only in the units (Neh. vii. 18, 19; Ezr. ii. 13, 14). In Pahath-Moab, the variation from 2812, Ezr. ii. 6, to 2818, Neh. vii. 11; in Zattu, from 945, Ezr. ii. 8, to 845, Neh. vii. 13; in Binui, from 642 to 648; in Bebai, from 623 to 628;

in Hashum, from 223 to 328; in Senaah, from 3630 to 3930; the same cause has operated, namely that in the numbers two and eight, three and eight, nine and six, the same initial **ש** is found; and the resemblance in these numbers may probably have been greatly increased by abbreviations. In Azgad (1222 and 2322) as in Senaah, the mere circumstance of the tens and units being the same in both passages, while the thousands differ by the mere addition or omission of a final **ס**, is sufficient proof that the variation is a clerical one only. In Adin, Neh. vii. 20, *six* for *four*, in the hundreds, is probably caused by the *six hundred* of the just preceding Adonikams. In the four remaining cases the variations are equally easy of explanation, and the result is to leave not the slightest doubt that the enumeration was identical in the first instance in both passages. It may, however, be added, as completing the proof that these variations do not arise from Ezra giving the census in Zerubbabel's time, and Nehemiah that in his own time (as Ceillier, Pridcaux, and other learned men have thought), that in the cases of Parosh, Pahath-Moab, Elam, Shephatiah, Bebai, Azgad, and Adonikam, of which we are told in Ezr. viii. 3-14, that considerable numbers came up to Judaea in the reign of Artaxerxes—long subsequent therefore to the time of Zerubbabel—the numbers are either *exactly the same* in Ezr. ii. and Neh. vii., or exhibit such variations as have no relation whatever to the numbers of those families respectively who were added to the Jewish residents in Palestine under Artaxerxes.

To turn next to the offerings. The book of Ezra (ii. 68, 69) merely gives the sum total, as follows: 61,000<sup>c</sup> drachms of gold, 5,000 pounds of silver, and 100 priests' garments. The book of Nehemiah gives no sum total, but gives the following items (vii. 72):—

The Tirshatha gave 1000<sup>c</sup> drachms of gold, 50 basons, 530 priests' garments.

The chief of the fathers gave 20,000 drachms of gold, and 2,200 pounds of silver.

The rest of the people gave 20,000 drachms of gold, 2,000 pounds of silver, and 67 priests' garments.

Here then we learn that these offerings were made in three shares, by three distinct parties: the governor, the chief fathers, the people. The sum total of drachms of gold, we learn from Ezra, was 61,000. The shares, we learn from Nehemiah, were 20,000 in two out of the three donors, but 1,000 in the case of the third and chief donor! Is it not quite evident that in the case of Nehemiah the 20 has slipped out of the text (as in 1 Esdr. v. 45, 60,000 has), and that his real contribution was 21,000? his generosity prompting him to give in excess of his fair third. Next, as regards the pounds of silver. The sum total was according to Ezra, 5,000. The shares were, according to Nehemiah, 2,200 pounds from the chiefs, and 2,000 from the people. But the LXX. give 2,300 for the chiefs, and 2,200 for the people, making 4,500 in all, and so leaving a deficiency

<sup>a</sup> So also Grotius (notes on Ezr. ii., Neh. vii.), with his usual clear sense and sound judgment. See especially his note on Ezr. ii. 1, where he says that many Greek copies of Ezra omit ch. ii.

<sup>b</sup> Or if **שִׁבְעֵים** is the right reading in Ezr. ii. 5 <sup>†</sup>—

stead of **שִׁבְעֵים**, then the **שָׁנִים** of Neh. vii. 10 is easily accounted for by the fact that the two preceding numbers of Parosh and Shephatiah both end with the same number *two*.

<sup>c</sup> Observe the odd thousand in both cases

of 500 pounds as compared with Ezra's total of 5,000, and ascribing no silver offering to the Tirshatha. As regards the priests' garments. The sum total as given in both the Hebrew and Greek text of Ezra, and in 1 Esdr., is 100. The items as given in Neh. vii. 70, are  $530 + 67 = 597$ . But the LXX. give  $30 + 67 = 97$ , and that this is nearly correct is apparent from the numbers themselves. For the total being 100, 33 is the nearest whole number to  $\frac{1}{3} \times 100$ , and 67 is the nearest whole number to  $\frac{2}{3} \times 100$ . So that we cannot doubt that the Tirshatha gave 33 priests' garments, and the rest of the people gave 67, probably in two gifts of 34 and 33, making in all 100. But how came the 500 to be added on to the Tirshatha's tale of garments? Clearly it is a fragment of the missing 500 pounds of silver, which, with the 50 bowls, made up the Tirshatha's donation of silver. So that Neh. vii. 70 ought to be read thus, "The Tirshatha gave to the treasure 21,000 drachms of gold, 50 basons, 500 pounds of silver, and 33 priests' garments." The offerings then, as well as the numbers in the lists, were once identical in both books, and we learn from Ezr. ii. 68, what the book of Nehemiah does not expressly tell us (though the *priests' garments* strongly indicate it), what was the purpose of this liberal contribution, namely, "to set up the House of God in his place" (לְהַעֲמִידוֹ עַל מְכוֹנָה). From this phrase occurring in Ezr. ii. just before the account of the building of the Temple by Zerubbabel, it has usually been understood as referring to the rebuilding. But it really means no such thing. The phrase properly implies restoration and preservation, as may be seen in the exactly similar case of the restoration of the Temple by Jehoiada, 2 Chr. xxiv. 13, after the injuries and neglect under Athalia, where we read, וַיַּעֲמִידוּ אֶת-בַּיִת יְהוָה, "they set the House of God in its state" (comp. also 1 K. xv. 4). The fact then was that, when all the rulers and nobles and people were gathered together at Jerusalem to be registered in the seventh month, advantage was taken of the opportunity to collect their contributions to restore the Temple also (2 Macc. i. 18), which had naturally partaken of the general misery and affliction of Jerusalem, but which it would not have been wise to restore till the rebuilding of the wall placed the city in a state of safety. At the same time, and in the same spirit, they formed the resolutions recorded in Neh. x. 32-39, to keep up the Temple ritual.

It already follows, from what has been said, that the section under consideration is in its right place in the book of Nehemiah, and was inserted subsequently in the book of Ezra out of its chronological order. But one or two additional proofs of this must be mentioned. The most convincing and palpable of these is perhaps the mention of the Tirshatha in Ezr. ii. 63; Neh. vii. 65. That the Tirshatha, here and at Neh. vii. 70, means Nehemiah, we are expressly told (Neh. viii. 9, x. 1),<sup>a</sup> and therefore it is perfectly certain that what is related (Ezr. ii. 62; Neh. vii. 64) happened in Nehemiah's time, and not in Zerubbabel's. Consequently the

taking of the census, which gave rise to the incident, belongs to the same time. In other words, the section we are considering is in its original and right place in the book of Nehemiah, and was transferred from thence to the book of Ezra, where it stands out of its chronological order. And this is still further evident from the circumstance that the closing portion of this section is an abbreviation of the same portion as it stands in Nehemiah, proving that the passage existed in Nehemiah before it was inserted in Ezra. Another proof is the mention of Ezra as taking part in that assembly of the people at Jerusalem which is described in Ezr. iii. 1; Neh. viii. 1; for Ezra did not come to Jerusalem till the reign of Artaxerxes (Ezr. vii.). Another is the mention of Nehemiah as one of the leaders under whom the captives enumerated in the census came up, Ezr. ii. 2; Neh. vii. 7: in both which passages the juxtaposition of Nehemiah with Seraiab, when compared with Neh. x. 1, 2, greatly strengthens the conclusion that Nehemiah the Tirshatha is meant. Then again, that Nehemiah should summon all the families of Israel to Jerusalem to take their census, and that, having done so at great cost of time and trouble, he, or whoever was employed by him, should merely transcribe an old census taken nearly 100 years before, instead of recording the result of his own labors, is so improbable that nothing but the plainest necessity could make one believe it. The only difficulty in the way is that the words in Neh. vii. 5, 6, seem to describe the register which follows as "the register of the genealogy of them which came up at the first," and that the expression, "and found written therein," requires that the words which follow should be a quotation from that register (comp. vi. 6). To this difficulty (and it is a difficulty at first sight) it is a sufficient answer to say that the words quoted are only those (in Neh. vii. 6) which contain the title of the register found by Nehemiah. His own new register begins with the words at ver. 7: הַבָּאִים, etc., "The men who came with Zerubbabel," etc., which form the descriptive title of the following catalogue.<sup>b</sup> Nehemiah, or those employed by him to take the new census, doubtless made use of the old register (sanctioned as it had been by Haggai and Zechariah) as an authority by which to decide the genealogies of the present generation. And hence it was that when the sons of Barzillai claimed to be entered into the register of priestly families, but could not produce the entry of their house in that old register, Nehemiah refused to admit them to the priestly office (63-65), but made a note of their claim, that it might be decided whenever a competent authority should arise. From all which it is abundantly clear that the section under consideration belongs properly to the book of Nehemiah. It does not follow, however, that it was written in its present form by Nehemiah himself. Indeed the sudden change to the third person, in speaking of the Tirshatha, in vv. 65, 70 (a change which continues regularly till the section beginning xii. 31), is a strong indication of a change in the writer, as is also the use of the term Tirshatha instead of Pechah, which last is

<sup>a</sup> It is worth noticing that Nehemiah's name is mentioned as the Tirshatha in 1 Esdr. v. 40.

<sup>b</sup> Were it not for the mention of Nehemiah and

Mordecai in ver. 7, one might have thought Nehemiah's register began with the words, "The number of the men," in ver. 7.

the official designation by which Nehemiah speaks of himself and other governors (v. 14, 18, ii. 7, 9, ii. 7). It seems probable, therefore, that ch. vii., from ver. 7, contains the *substance* of what was found in this part of Nehemiah's narrative, but abridged, and in the form of an abstract, which may account for the difficulty of separating Nehemiah's register from Zerubbabel's, and also for the very abrupt mention of the gifts of the Tirshatha and the people at the end of the chapter. This abstract formed a transition from Nehemiah's narrative in the preceding chapters to the entirely new matter inserted in the following sections.

(b.) The next section commences Neh. viii., latter part of ver. 1, and ends Neh. xi. 3. Now throughout this section several things are observable. (1.) Nehemiah does not once speak in the first person (viii. 9, x. 1). (2.) Nehemiah is no longer the principal actor in what is done, but almost disappears from the scene, instead of being, as in the first six chapters, the centre of the whole action. (3.) Ezra for the first time is introduced, and throughout the whole section the most prominent place is assigned either to him personally, or to strictly ecclesiastical affairs. (4.) The prayer in ch. ix. is very different in its construction from Nehemiah's prayer in ch. i., and in its frequent references to the various books of the O. T. singularly suited to the character and acquisitions of Ezra, "the ready scribe in the law of Moses." (5.) The section was written by an eye-witness and actor in the events described. This appears by the minute details, e. g. viii. 4, 5, 6, &c., and the use of the first person plural (x. 30-39). (6.) There is a strong resemblance to the style and manner of Ezra's narrative, and also an identity in the use of particular phrases (comp. Ezr. iv. 18, Neh. viii. 8; Ezr. vi. 22, Neh. viii. 17). This resemblance is admitted by critics of the most opposite opinions (see Keil's *Einleitung*, p. 461). Hence, as Ezra's manner is to speak of himself in the third as well as in the first person, there is great probability in the opinion advocated by Hävernick and Kleinert,<sup>a</sup> that this section is the work of Ezra. The fact, too, that 1 Esdr. ix. 38 sqq. annexes Neh. viii. 1-13 to Ezr. x., in which it is followed by Josephus (*Ant.* xi. 5, § 5), is perhaps an indication that it was known to be the work of Ezra. It is not necessary to suppose that Ezra himself inserted this or any other part of the present book of Nehemiah in the midst of the Tirshatha's history. But if there was extant an account of these transactions by Ezra, it may have been thus incorporated with Nehemiah's history by the last editor of Scripture. Nor is it impossible that the union of Ezra and Nehemiah as one book in the ancient Hebrew arrangement (as Jerome testifies), under the title of the Book of Ezra, may have had its origin in this circumstance.

(c.) The third section consists of ch. xi. 3-36. It contains a list of the families of Judah, Benjamin, and Levi (priests and Levites), who took up their abode at Jerusalem, in accordance with the resolution of the volunteers, and the decision of the lot, mentioned in xi. 1, 2. This list forms a kind of supplement to that in vii. 8-60, as

appears by the allusion in xi. 3 to that previous document. For ver. 3 distinguishes the following list of the "dwellers at Jerusalem" from the foregoing one of "Israel, priests, Levites, Nethuinim, and children of Solomon's servants," who dwelt in the cities of Israel, as set forth in ch. vii. This list is an extract from the official roll preserved in the national archives, only somewhat abbreviated, as appears by a comparison with 1 Chr. ix., where an abstract of the same roll is also preserved in a fuller form, and in the latter part especially with considerable variations and additions: it seems also to be quite out of its place in Chronicles, and its insertion there probably caused the repetition of 1 Chr. viii. 29-40, which is found in duplicate ix. 35-44: in the latter place wholly unconnected with ix. 1-34, but connected with what follows (ch. x. ff.), as well as with what precedes ch. ix. Whence it appears clearly that 1 Chr. ix. 2-34 is a later insertion made after Nehemiah's census,<sup>b</sup> but proving by its very incoherence that the book of Chronicles existed previous to its insertion. But this by the way. The nature of the information in this section, and the parallel passage in 1 Chr., would rather indicate a Levitical hand. It might or might not have been the same which inserted the preceding section. If written later, it is perhaps the work of the same person who inserted xii. 1-30, 44-47. In conjunction with 1 Chr. ix. it gives us minute and interesting information concerning the families residing at Jerusalem,<sup>c</sup> and their genealogies, and especially concerning the provision for the Temple-service. The grant made by Artaxerxes (ver. 23) for the maintenance of the singers is exactly parallel to that made by Darius as set forth in Ezr. vi. 8, 9, 10. The statement in ver. 24 concerning Pethahiah the Zarhite, as "at the king's hand in all matters concerning the people," is somewhat obscure, unless perchance it alludes to the time of Nehemiah's absence in Babylon, when Pethahiah may have been a kind of deputy-governor *ad interim*.

(d.) From xii. 1 to 26 is clearly and certainly an abstract from the official lists made and inserted here long after Nehemiah's time, and after the destruction of the Persian dynasty by Alexander the Great, as is plainly indicated by the expression Darius the Persian, as well as by the mention of Jaddua. The allusion to Jeshua, and to Nehemiah and Ezra, in ver. 26, is also such as would be made long posterior to their lifetime, and contains a remarkable reference to the two censuses taken and written down, the one in Jeshua and Zerubbabel's time, the other in the time of Nehemiah; for it is evidently from these two censuses, the existence of which is borne witness to in Neh. vii. 5, that the writer of xii. 26 drew his information concerning the priestly families at those two epochs (compare also xii. 47).

The juxtaposition of the list of priests in Zerubbabel's time, with that of those who sealed the covenant in Nehemiah's time, as given below, both illustrates the use of proper names above referred to, and also the clerical fluctuations to which proper names are subject.

<sup>a</sup> Kleinert ascribes ch. viii. to an assistant, ix. and 1. to Ezra himself. See De Wette's *Einleitung*, Parter's transl. ii. 332.

<sup>b</sup> Comp. 1 Chr. ix. 2 with Neh. vii. 73.

<sup>c</sup> That these families were objects of especial interest appears from Neh. xi. 2.

(e.) xii. 44-47 is an explanatory interpolation, made in later times, probably by the last reviser of the book, whoever he was. That it is so is evident not only from the sudden change from the first person to the third, and the dropping of the personal narrative (though the matter is one in which Nehemiah necessarily took the lead), but from the fact that it describes the identical transaction described in xiii. 10-13 by Nehemiah himself, where he speaks as we should expect him to speak: "And I made treasurers over the treasuries," etc. The language, too, of ver. 47 is manifestly that of one looking back upon the times of Zerubbabel and those of Nehemiah as alike past. In like manner xii. 27-30 is the account by the same annotator of what Nehemiah himself relates, xiii. 10-12.

Though, however, it is not difficult thus to point out those passages of the book which were not part of Nehemiah's own work, it is not easy, by cutting them out, to restore that work to its integrity. For Neh. xii. 31 does not fit on well to any part of ch. vii., or, in other words, the latter portion of Nehemiah's work does not join on to the former. Had the former part been merely a kind of diary entered day by day, one might have supposed that it was abruptly interrupted and as abruptly resumed. But as Neh. v. 14 distinctly shows that the whole history was either written or revised by the author after he had been governor twelve years, such a supposition cannot stand. It should seem, therefore, that we have only the first and last parts of Nehemiah's work, and that for some reason the intermediate portion has been displaced to make room for the narrative and documents from Neh. vii. 7 to xii. 27.

And we are greatly confirmed in this supposition by observing that in the very chapter where we first notice this abrupt change of person, we have another evidence that we have not the whole of what Nehemiah wrote. For at the close of chap. vii. we have an account of the offerings made by

the governor, the chiefs, and the people, but we are not even told for what purpose these offerings were made. Only we are led to guess that it must have been for the Temple, as the parallel passage in Ezr. ii. tells us it was, by the mention of the priests' garments which formed a part of the offerings. Obviously, therefore, the original work must have contained an account of some transactions connected with repairing or beautifying the Temple, which led to these contributions being made. Now, it so happens that there is a passage in 2 Macc. ii. 13, in which "the writings and commentaries of Nehemiah" are referred to in a way which shows that they contained matter relative to the sacred fire having consumed the sacrifices offered by Nehemiah on some solemn occasion when he repaired and dedicated the Temple, which is not found in the present book of Nehemiah; and if any dependence can be placed upon the account there given, and in i. 18-36, we seem to have exactly the two facts that we want to justify our hypothesis. The one, that Nehemiah's narrative at this part contained some things which were not suited to form part of the Bible;<sup>a</sup> the other, that it formerly contained some account which would be the natural occasion for mentioning the offerings which come in so abruptly at present. If this were so, and the exceptional matter was consequently omitted, and an abridged notice of the offerings retained, we should have exactly the appearance which we actually have in chap. vii.

Nor is such an explanation less suited to connect the latter portion of Nehemiah's narrative with the former. Chap. xii. 31 goes on to describe the dedication of the wall and its ceremonial. How naturally this would be the sequel of that dedication of the restored Temple spoken of by the author of 2 Macc. it is needless to observe. So that if we suppose the missing portions of Nehemiah's history which described the dedication service of the Temple to have followed his description of the census in ch. vii., and to have been followed by the account of the offerings, and then to have been succeeded by the dedication of the wall, we have a perfectly natural and consistent narrative. In erasing what was irrelevant, and inserting the intervening matter, of course no pains were taken, because no desire existed, to disguise the operation, or to make the joints smooth; the object being simply to preserve an authentic record without reference to authorship or literary perfection.

Another circumstance which lends much probability to the statement in 2 Macc. is that the writer closely connects what Nehemiah did with what Solomon had done before him, in this, one may guess, following Nehemiah's narrative. But in the extant portion of our book, Neh. i. 6, we have a distinct allusion to Solomon's prayer (1 K. viii. 28, 29), as also in Neh. xiii. 26, we have to another part of Solomon's life. So that on the whole the passage in 2 Macc. lends considerable support to the theory that the middle portion of Nehemiah's work was cut out, and that there was substituted for it partly an abridged abstract, and partly Ezra's narrative and other appended documents.<sup>b</sup>

<sup>a</sup> It is not necessary to believe that Nehemiah wrote all that is attributed to him in 2 Macc. It is very probable that there was an apocryphal version of his book, with additions and embellishments. Still even the original work may have contained matter either

not strictly authentic, or for some other reason not suited to have a place in the canon.

<sup>b</sup> Ceillier also supposes that part of Nehemiah's work may be now lost.

We may then affirm with tolerable certainty that all the middle part of the book of Nehemiah has been supplied by other hands, and that the first six chapters and part of the seventh, and the last chapter and half, were alone written by him, the intermediate portion being inserted by those who had authority to do so, in order to complete the history of the transactions of those times. The difference of authorship being marked especially by this, that, in the first and last portions, Nehemiah invariably speaks in the first person singular (except in the inserted verses xii. 44-47), but in the middle portion never. It is in this middle portion alone that matter unsuited to Nehemiah's times (as e. g. Neh. xii. 11, 22) is found, that obscurity of connection exists, and that the variety of style (as almost all critics admit) suggests a different authorship. But when it is remembered that the book of Nehemiah is in fact a continuation of the Chronicles,<sup>a</sup> being reckoned by the Hebrews, as Jerome testifies, as one with Ezra, which was confessedly so, and that, as we have seen under EZRA, CHRONICLES, and KINGS, the customary method of composing the national chronicles was to make use of contemporary writings, and work them up according to the requirements of the case, it will cease to surprise us in the least that Nehemiah's diary should have been so used: nor will the admixture of other contemporary documents with it, or the addition of any reflections by the latest editor of it, in any way detract from its authenticity or authority.

As regards the time when the book of Nehemiah was put into its present form, we have only the following data to guide us. The latest high-priest mentioned, Jaddua, was doubtless still alive when his name was added. The descriptive addition to the name of Darius (xii. 22) "the Persian," indicates that the Persian rule had ceased, and the Greek rule had begun. Jaddua's name, therefore, and the clause at the end of ver. 22, were inserted early in the reign of Alexander the Great. But it appears that the registers of the Levites, entered into the Chronicles, did not come down lower than the time of Johanan (ver. 23); and it even seems from the distribution of the conjunction "and" in ver. 22, that the name of Jaddua was not included when the sentence was first written, but stopped at Johanan, and that Jaddua and the clause about the priests were added later. So that the close of the Persian dominion, and the beginning of the Greek, is the time clearly indicated when the latest additions were made. But whether this addition was anything more than the insertion of the documents contained from ch. xi. 3 to xii. 26, or even much less; or whether at the same time, or at an earlier one, the great alteration was made of substituting the abridgment in ch. vii. in the contemporary narratives in ch. viii., ix., x., for what Nehemiah had written, there seems to be no means of deciding.<sup>b</sup> Nor is the decision of much consequence, except that it would be interesting to know exactly when the volume of Holy Scripture definitively assumed its present shape, and who were the persons who put the finishing hand to it.

3. In respect to language and style, this book is very similar to the Chronicles and Ezra. Nehe-

miah has, it is true, quite his own manner, and, as De Wette has observed, certain phrases and modes of expression peculiar to himself. He has also some few words and forms not found elsewhere in Scripture; but the general Hebrew style is exactly that of the books purporting to be of the same age. Some words, as מְצִילֵי תַיִם, "cymbals," occur in Chron., Ezr., and Neh., but nowhere else. אֶת־הַיָּדָבָר occurs frequently in the same three books, but only twice (in Judg. v.) besides. אֲנָרַת or אֲנָרָה, "a letter," is common only to Neh., Esth., Ezr., and Chron. בִּירָה, and its Chaldee equivalent, בִּירָא, whether spoken of the palace at Susa, or of the Temple at Jerusalem, are common only to Neh., Ezr., Esth., Dan., and Chron. שֶׁנֶּקַל to Neh., and Dan. and Ps. xlv. The phrase אֱלֹהֵי הַשָּׁמַיִם, and its Chaldee equivalent, "the God of Heavens," are common to Ezr., Neh., and Dan. מְלֻחָה, "distinctly," is common to Ezr. and Neh. Such words as קָנָן, מְדִינָה, קָנָה, and such Aramaisms as the use of הַבָּל, i. 7, וְיִמְלֹךְ, v. 7, מְבָרָה, v. 4, &c., are also evidences of the age when Nehemiah wrote. As examples of peculiar words or meanings, used in this book alone, the following may be mentioned: שֶׁבֶר בְּ, "to inspect," ii. 13, 15; מְאֹה, in the sense of "interest," v. 11; גִּוְיָה (in Hiph.), "to shut," vii. 3; מוֹעֵל, "a lifting up," viii. 6; הַיְדוּת, "praises," or "choirs," xii. 8; תְּהִלּוּכָה, "a procession," xii. 31; מְהָרָא, in sense of "reading," viii. 8; אֲנָרָה, for אֲנָרָה, xiii. 13, where both form and sense are alike unusual.

The Aramean form, יְהוֹרָה, Hiph. of יָרָה for יוֹרָה, is very rare, only five<sup>c</sup> other analogous examples occurring in the Heb. Scriptures, though it is very common in Biblical Chaldee.

The phrase אִישׁ שֶׁלְּחָו הַמִּים iv. 17 (which is omitted by the LXX.) is incapable of explanation. One would have expected, instead of הַמִּים, בְּיָדוֹ, as in 2 Chr. xxiii. 10.

הַתִּירְשָׁתָה, "the Tirshatha," which only occurs in Ezr. ii. 63; Neh. vii. 65, 70, viii. 9, x. 1, is of uncertain etymology and meaning. It is a term applied only to Nehemiah, and seems to be more likely to mean "cupbearer" than "governor," though the latter interpretation is adopted by Gesenius (*Theo. s. v.*).

The text of Nehemiah is generally pure and free from corruption, except in the proper names, in which there is considerable fluctuation in the orthography, both as compared with other parts of the same book and with the same names in other parts of Scripture: and also in numerals.

<sup>a</sup> So Ewald also.

<sup>b</sup> If we knew the real history of the title Tirshatha, it might assist us in determining the date of the passage where it appears.

<sup>c</sup> Ps. xlv. 18, cxvi. 6; 1 Sam. xvii. 47; Is. lii. 5 Ez. xvi. 22 (*Journ. of Sac Lit.* Jan. 1861, p. 382)

Of the latter we have seen several examples in the parallel passages Ezr. ii. and Neh. vii.; and the same lists will give variations in names of men. So will xii. 1-7, compared with xii. 12, and with x. 1-8.

A comparison of Neh. xi. 3, &c., with 1 Chr. ix. 2, &c., exhibits the following fluctuations: Neh. ix. 4, *Athaiah* of the children of Perez = 1 Chr. ix. 4, *Uthai* of the children of Perez; v. 5, *Mansieih* the son of Shiloni = v. 5, of the Shilonites, *Asaiah*; v. 9, *Judah* the son of Senuah (Heb. Hasenuah) = v. 7, *Hodariah* the son of Hasenuah; v. 10, *Jedaiah* the son of Joiarib, *Jachin* = v. 10, *Jedaiah*, *Jehoiarib*, *Jachin*; v. 13, *Amsai* son of Azareel = v. 12, *Mansai* son of Jahzerah; v. 17, *Micah* the son of *Zobbi* = v. 15, *Micah* the son of *Zichri* (comp. Neh. xii. 35). To which many others might be added.

Many various readings are also indicated by the LXX. version. For example, at ii. 13, for הַדְּרָגִים, "dragon," they read הַתְּאֵבִים, "figs," and render it τῶν συκῶν. At ii. 20, for הַקְּרִיִּים, "we will arise," they read הַקְּלֵיִים, "pure," and render it καθαροί. At iii. 2, for הַבְּנֵי, "they built," they read twice הַבְּנֵי, *vīōn*; and so at ver. 13. At iii. 15, for הַבְּרֵית הַמֶּלֶךְ לְגַן הַמֶּלֶךְ, "the pool of Siloah by the king's garden," they read "הַ לְגֹן הַ הַ בְּ," "the king's fleece," and render it κολυμβήθρας τῶν κωδίων τῆ κουρᾶ τοῦ βασιλέως. *κουρᾶ* being the word by which גֹּן is rendered in Deut. xviii. 4. הַשְּׂפֵלָה is rendered by κωδίων, "sheep-skins," in the Chaldee sense of שְׂפֵלָה or שְׂפֵלָה, a fleece recently stripped from the animal (Castell. *Lex.*). At iii. 16, for הַבְּנֵי, "over against," they read גֶּן, "the garden;" comp. ver. 26; in iii. 34, 35 (iv. 2, 3), they seem to have had a corrupt and unintelligible text. At v. 5, for הַבְּרֵיִים, "others," they read הַחֹרִיִּים, "the nobles:" v. 11, for הַמֵּאֵת, "the hundredth," they read הַמֵּאֵת, "some of," rendering ἀπό: vi. 1, for הַפְּרָצָה, there was left no "breach in it," namely, the wall, they read הַרוּחַ, "spirit in them," namely, Sanballat, etc., rendering ἐν αὐτοῖς *πνοή*. vi. 3, for הַרְּצָה, "I leave it," they read הַרְּפֵאָה, "I complete it," *τελειώσω* which gives a better sense. At vii. 68, ff., the number of asses is 2,700 instead of 6,720; of priests' garments, 30 instead of 530; of pounds of silver, 2,300 and 2,200, instead of 2,200 and 2,000, as has been noticed above; and ver. 70, τῶ *Νεεμίᾳ*, for "the Tirshatha." At xi. 11, for הַרְּבִיב, "ruler," they read הַרְּבִיב, "over against," *ἀπέναντι*. At xii. 8, for הַתְּדוּרָה, "thanksgiving," הַתְּדוּרָה, *ἐπι τῶν χειρῶν*: xii. 25, for הַתְּכֵסִי, "the treasures," הַתְּכֵסִי, "my gathering together," *ἐν τῶ συναγωγῶν με*: and at xii. 44, for הַתְּרֵי, "the fields,"

they read הַתְּרֵי, "the princes," *ἄρχουσι τῶν πόλεων*: with other minor variations. The principal additions are at viii. 8, 15, and ix. 6, where the name of Ezra is introduced, and in the first passage also the words *ἐν ἐπιστήμῃ κυρίου*. The omissions of words and whole verses are numerous: as at iii. 37, 38 (A. V. 5, 6); iv. 17 (23, A. V. and LXX.); vi. 4, 5, 6, 10, 11; vii. 68, 69; viii. 4, 7, 9, 10; ix. 3, 5, 23; xi. 13, 16-21, 23-26, 28-35; xii. 3-7, 9, 25, 28, 29, the whole of 38, 40, 41, and half 42; xiii. 13, 14, 16, 20, 24, 25.

The following discrepancies seem to have their origin in the Greek text itself: viii. 16, *πλατείας τῆς πόλεως*, instead of *πολῆς*, Heb. הַתְּרֵי

הַתְּרֵי: x. 2, ΤΙΟΣ ΑΡΑΙΑ ΚΑΙ ΣΑΡΑΙΑ: xi. 4, *Σαμαρία* for *Ἀμαρία*, the final Σ of the preceding *υἱός* having stuck to the beginning of the name: xii. 31, *ἀνήγγκαν*, instead of *—κα* "I brought up:" xii. 39, *ἰχθυράν*, instead of *ἰχθυηράν*, as in iii. 3. It is also worthy of remark that a number of Hebrew words are left untranslated in the Greek version of the LXX., which probably indicates a want of learning in the translator. The following are the chief instances: Chaps. i. 1, and vii. 2, *ἀβιδά*, and *τῆς βιδά*, for הַבְּיָדָה; ii. 13, *τοῦ γωλληλά* for הַלְּיָלָה; *ib.* 14, *τοῦ ἀίν* for הַעֵיִן; iii. 5, *οἱ Θεοκῶμι* for הַתְּקוּעִים; *ib.* *ἄδωρῖμ* for הַדְּוָרִים; *ib.* 6, *ἰασαναί* for הַשְּׂנָאִים; *ib.* 8, *βωκεῖμ* for הַבְּקָרִים; *ib.* 11, *τῶν θανουρῖμ* for הַתְּנַחֲרִים; iii. 16, *βηθαγγαρίμ* for הַתְּנַחֲרִים; *ib.* 20, 21, *βηθελιασοῦβ* for הַתְּנַחֲרִים; *ib.* 22, *Ἐκχεχάρ* for הַתְּנַחֲרִים; *ib.* 31, *τοῦ σαρεφί* for הַתְּנַחֲרִים; and *βηθὰν* *Ναθινίμ* for הַתְּנַחֲרִים; vii. 34 *Ἡλαμαάρ* for הַתְּנַחֲרִים; *ib.* 65, *ἀθερσασθά*, and x. 1, *ἀρτασασθά*, for הַתְּנַחֲרִים; vii. 70, 72, *χωθωνῶθ* for הַתְּנַחֲרִים; xii. 27, *θωδαθά* for הַתְּנַחֲרִים; xiii. 5, 9, *τῆν μαναά* for הַתְּנַחֲרִים.

4. The book of Nehemiah has always had an undisputed place in the Canon, being included by the Hebrews under the general head of the Book of Ezra, and as Jerome tells us in the *Prolog. Gal.*, by the Greeks and Latins under the name of the Second Book of Ezra. [ESDRAS, FIRST BOOK OF.] There is no quotation from it in the N. T., and it has been comparatively neglected by both the Greek and Latin fathers, perhaps on account of its simple character, and the absence of anything supernatural, prophetic, or mystical in its contents. St. Jerome (*ad Paulinum*) does indeed suggest that the account of the building of the walls, and the return of the people, the description of the Priests, Levites, Israelites, and proselytes, and the division of the labor among the different families, have a hidden meaning; and also hints that Nehemiah's name, which he interprets *consolator a Domino*, points to a mystical sense. But the book does not easily lend itself to such applications, which are so manifestly forced and strained that even Augustine says of the whole book of Ezra that it is simply historical rather than prophetic (*De Civit. Dei*, xviii. 36). Those, how-  
ver

who wish to see St. Jerome's hint elaborately carried out, may refer to the Ven. Bede's *Allegorica Expositio in Librum Nehemias, qui et Ezræ Secundus*, as well as to the preface to his exposition of Ezra; and, in another sense, to Bp. Pilkington's Exposition upon Nehemiah, and John Fox's Preface (*Park. Soc.*). It may be added that Bede describes both Ezra and Nehemiah as *prophets*, which is the head under which Josephus includes them in his description of the sacred books (*C. Ap. i. 8*).

Keil's *Einleitung*; Winer's *Realwört.*; De Wette's *Einleitung*, by Th. Parker; Prideaux's *Connection*; Ceillier's *Auteurs Ecclésiast.*; Wolf, *Bibl. Hebraic*; Ewald, *Geschichte*, i. 225, iv. 144; Thrupp's *Ancient Jerusalem*; Bosanquet's *Times of Ezra and Nehemiah*. A. C. H.

\* The circle of inquiry relating to the authorship, structure, and contents of the book of Nehemiah, coincides very nearly with that of the same topics connected with Ezra. We are not to lay too much stress on the argument against the unity of the book, from the narrator's interchange of the first and third persons in different parts. That conclusion, as Prof. Rawlinson remarks, does not always follow from such premises. Daniel, for instance, uses the third person through his first six chapters and at the opening of the seventh, and then the first to the end of ch. ix. In the first verse of ch. x. he returns to the third person, but in the two remaining chapters employs again the first (*Historical Evidences*, lect. V.). Thucydides furnishes a similar example among Greek writers. Neh. xii. 10-22 appears to be the only part which it is necessary, on account of the subject of discourse, to ascribe to a later hand. As for the rest, Ezra and Nehemiah may have depended on each other, or have used common sources.

Among the commentators on Nehemiah are Jo. Clericus, *Comm. in Libros Historicos V. T.* (1708); Strigelius, *Scholia in Nehem.* (1575); Rambach, *Annotatt. in Libr. Nehem.*; Bertheau, *Ezraet. Handb.* xvii.; Wordsworth, *Holy Bible, with Notes and Introductions*, iii. 325-357. Other important writers are Hävernick, *Handb. der Einl. in das A. T.*, ii. 302-328; Herbst-Welte, *Einl. in das A. Test.*, ii. 231-249; Keil, *Lehrbuch der Einl. in das A. Test.*, pp. 460-468 (3<sup>te</sup> Aufl.); Bleek, *Einl. in das A. Test.*, pp. 373-391; G. Nügelbach, *Ezra u. Nehemia* in Herzog's *Real-Encykl.* iv. 165-174; Wunderlich in Zeller's *Bibl. Wörterb.* ii. 186-188. Davidson's *Hebrew Text of the O. T., revised from Critical Sources*, pp. 206-209, furnishes some material for textual emendation (Lond. 1855). The true orthography of several of the proper names is uncertain. H.

NEHEMIAS (Νεεμίης: *Nehemias*). 1. Nehemiah, the contemporary of Zerubbabel and Jeshua (1 Esdr. v. 8).

2. [Vat. *Naiuias*.] Nehemiah the Tirshatha, son of Hachaliah (1 Esdr. v. 40).

NEHILOTH. The title of Ps. v. in the A. V. is rendered "to the chief musician upon Nehiloth" (נְהִלֹת־בְּנְחִילֹתֶיךָ); LXX., Aquila, Symmachus, and Theodotion translate the last two words *ὕπερ τῆς κληρονομίας*, and the Vulgate, "pro ea quæ hereditatem consequitur," by which Augustine understands the Church. The origin of their error was a mistaken etymology, by which Nehiloth is derived from נְחָל, *náchal*,

to inherit. Other etymologies have been proposed which are equally unsound. In Chaldee נְחִיל, *nêchîl*, signifies "a swarm of bees," and hence Jarchi attributes to Nehiloth the notion of multitude, the Psalm being sung by the whole people of Israel. R. Hai, quoted by Kimchi, adopting the same origin for the word, explains it as an instrument, the sound of which was like the hum of bees, a wind instrument, according to Sonntag (*de tit. Psal.* p. 430), which had a rough tone. Michaelis (*Suppl. ad Lex. Heb.* p. 1629) suggests, with not unreasonable timidity, that the root is to be found in the Arab. نَحَلَ, *nachulu*, to winnow, and hence to separate and select the better part, indicating that the Psalm, in the title of which Nehiloth occurs, was "an ode to be chanted by the purified and better portion of the people." It is most likely, as Gesenius and others explain, that it is derived from the root חָלַל, *châlal*, to bore, perforate, whence חָלִיל, *châlîl*, a flute or pipe (1 Sam. x. 5; 1 K. i. 40), so that Nehiloth is the general term for perforated wind-instruments of all kinds, as Neginoth denotes all manner of stringed instruments. The title of Ps. v. is therefore addressed to the conductor of that portion of the Temple-choir who played upon flutes and the like, and are directly alluded to in Ps. lxxxvii. 7, where (חֲלִילִים, *chôllîm*) "the players upon instruments" who are associated with the singers are properly "pipers" or "flute-players."

W. A. W.

NE'HUM (נְחֻם [comfort First]: *Ναούμ*; [Vat. Alex. FA. *Ναουμ*.] *Nahum*). One of those who returned from Babylon with Zerubbabel (Neh. vii. 7). In Ezr. ii. 2 he is called NEHUM, and in 1 Esdr. v. 8, ROMUS.

NEHUSHTA (נְחֻשְׁתָּא [brass]: *Νέσθα*; Alex. *Ναισθα*: *Nohesta*). The daughter of Elnathan of Jerusalem, wife of Jehoiakim, and mother of Jehoiachin, kings of Judah (2 K. xxiv. 8).

NEHUSHTAN (נְחֻשְׁתָּן [brazen]: *Νεσθθάν*, but [Vat.] Mai's ed. *Νεσθαλεί*; Alex. *Νεσθαν*: *Nohestan*). One of the first acts of Hezekiah, upon coming to the throne of Judah, was to destroy all traces of the idolatrous rites which had gained such a fast hold upon the people during the reign of his father Ahaz. Among other objects of superstitious reverence and worship was the brazen serpent, made by Moses in the wilderness (Num. xxi. 9), which was preserved throughout the wanderings of the Israelites, probably as a memorial of their deliverance, and according to a late tradition was placed in the Temple. The lapse of nearly a thousand years had invested this ancient relic with a mysterious sanctity which easily degenerated into idolatrous reverence, and at the time of Hezekiah's accession it had evidently been long an object of worship, "for unto those days the children of Israel did burn incense to it," or as the Hebrew more fully implies, "had been in the habit of burning incense to it." The expression points to a settled practice. The name by which the brazen serpent was known at this time, and by which it had been worshipped, was Nehushtan (2 K. xviii. 4). It is evident that our translators from their rendering, "and he called it *Nehushtan*," understood with many commentators

that the subject of the sentence is Hezekiah, and that when he destroyed the brazen serpent he gave it the name Nehushtan, "a brazen thing," in token of his utter contempt, and to impress upon the people the idea of its worthlessness. This rendering has the support of the LXX. and Vulgate, Junius and Tremellius, Münster, Clericus, and others; but it is better to understand the Hebrew as referring to the name by which the serpent was generally known, the subject of the verb being indefinite — "and one called it 'Nehushtan.'" Such a construction is common, and instances of it may be found in Gen. xxv. 26, xxxviii. 29, 30, where our translators correctly render "his name was called," and in Gen. xlviii. 1, 2. This was the view taken in the Targ. Jon. and in the Peshito-Syriac, "and they called it Nehushtan," which Buxtorf approves (*Hist. Sersp. An. cap. vi.*). It has the support of Luther, Pfeiffer (*Dub. Vez. cent. 3, loc. 5*), J. D. Michaelis (*Bibel für Ungel.*), and Bunsen (*Bibelwerk*), as well as of Ewald (*Gesch. iii. 622*), Keil, Thenius, and most modern commentators. [SERPENT.] W. A. W.

NEIEL (נְעִיֵל) [perh. = נְעִיָּל, *treasure of God*, Ges.]: נְעִיָּל; Alex. *Ανιηλ*: *Nehiel*, a place which formed one of the landmarks of the boundary of the tribe of Asher (Josh. xix. 27, only). It occurs between JIPHTHAH-EL and CABUL. If the former of these be identified with *Jefûl*, and the latter with *Kabûl*, 8 or 9 miles E. S. E. of *Akka*, then Neiel may possibly be represented by *M'ar*, a village conspicuously placed on a lofty mountain brow, just half-way between the two (Rob. iii. 87, 103; also Van de Velde's *Map*, 1858). The change of N into M, and L into I, is frequent, and *Miar* retains the *Aiu* of Neiel.

G.

NEKEB (נֶכֶב) with the def. article [*the cavern*]: καὶ Ναβόκι; [Vat. *Ναβωκι*]; Alex. *Νακεβ*: *quæ est Necebe*, one of the towns on the boundary of Naphtali (Josh. xix. 33, only). It lay between ADAMI and JABNEEL.

A great number of commentators, from Jonathan the Targumist and Jerome (*Vulgate* as above) to Keil (*Josua*, ad loc.), have taken this name as being connected with the preceding — Adami-han-Nekeb (Junius and Tremellius, "Adamei fossa"); and indeed this is the force of the accentuation of the present Hebrew text. But on the other hand the LXX. give the two as distinct, and in the Talmud the post-biblical names of each are given, that of han-Nekeb being *Tsadaathah* (*Gemara Hieros. Cod. Megilla*, in Ireland, *Pal.* pp. 545, 717, 817; also Schwarz, p. 181).

Of this more modern name Schwarz suggests that a trace is to be found in "*Hazeldhi*," 3 English miles N. from *al-Chatti*.

G.

NEKOD'A (נֶקוֹדָא) [*distinguished*]: *Νεκωδά*; in Ezr. ii. 48, [Vat. *Νεχωδα*]; Alex. *Νεκωδαν*; [in Neh., FA. *Νεκωδαμ*]; *Necoda*. 1. The descendants of Nekoda returned among the Nethinim after the Captivity (Ezr. ii. 48; Neh. vii. 50).

2. [*Νεκωδά*]. The sons of Nekoda were among those who went up after the Captivity from Tel-nehah, Tel-harsa and other places, but were unable to prove their descent from Israel (Ezr. ii. 60; Neh. vii. 62).

NEMUEL (נְמוּעַל) [*day of God*, Ges.]:

## NEPHTOAH, THE WATER OF

*Ναμουήλ*: *Nammuel*. 1. A Reubenite, son of Eliab, and eldest brother of Dathan and Abiram (Num. xxvi. 9).

2. The eldest son of Simeon (Num. xxvi. 12; 1 Chr. iv. 24), from whom were descended the family of the Nemuelites. In Gen. xlvii. 10 he is called JEMUEL.

NEMUELITES, THE (נְמוּעֵלִים) [see above]: δῆμος ὁ Ναμουηλί: Alex. *Ναμουηλει*, and so [Vat.] Mai: *Nammulite*. The descendants of Nemuel the first-born of Simeon (Num. xxvi. 12).

NEPHEG (נֶפֶג) [*sprout*]: *Ναφέκ*: *Nepheg*. 1. One of the sons of Izhar the son of Kohath, and therefore brother of Korah (Ex. vi. 21).

2. [*Ναφέκ*]; in 1 Chr. iii. 7, [Vat. *Ναφαθ*]; Alex. *Ναφεγ*; 1 Chr. xiv. 6, *Ναφάθ*, [Alex. *Ναφαγ*, FA. *Ναφατ*: *Nepheg*, *Nophieg*]. One of David's sons born to him in Jerusalem after he was come from Hebron (2 Sam. v. 15; 1 Chr. iii. 7, xiv. 6).

\* NEPHEW. This term wherever employed in the A. V., is used in the sense of *grandchild* or *descendant* generally. The corresponding Hebrew and Greek words are נֶכֶד, Job xviii. 19, Is. xiv.

22; נֶכֶדִים, Judg. xii. 14; and ξκγονα, 1 Tim. v. 4. For the old English usage of this word, see Richardson's *Eng. Dict.* s. v., and Trench's *Authorized Vers. of the N. T.* p. 446 (ed. 1859). [SISTER'S SON.] D. S. T.

NEPHI (Νεφθαί; Alex. *Νεφθαρ*: *Nephi*). The name by which the NAPHTHIAR of Nehemiah was usually (παρὰ τοῖς πολλοῖς) called (2 Macc. i. 36). The A. V. [after the Bishops' Bible] has here followed the Vulgate.

NEPHIS (Νιφίς; [Vat. *Νειφεῖς*; Alex. *Φιεις*; Ald. *Νηφίς*]; *Liptis*). In the corrupt list of 1 Esdr. v. 21, "the sons of Nephis" apparently correspond with "the children of Nebo" in Ezr. ii. 29, or else the name is a corruption of MAGBISH.

NEPHISH (נֶפִישׁ) [*recreate*: Vat.] *Ναφισαδαιοι*; [Rom.] Alex. *Ναφισαιοι*: *Naphis*. An inaccurate variation (found in 1 Chr. v. 19 only [where the Bishops' Bible reads *Nephis*]) of the name elsewhere correctly given in the A. V. NAPHISH, the form always preserved in the original.

NEPHISH'ESIM (נֶפִישִׁים) [*extractions*, Ges.]; Keri, נֶפִישִׁיִּם: *Νεφωσασ* [Vat. *-σει*]; Alex. *Νεφωσασειμ*; [FA. *Νεφωσασειμ*]; *Nephussim*. The children of Nephishesim were among the Nethinim who returned with Zerubbabel (Neh. vii. 52). The name elsewhere appears as NEPEUSIM and NAPHISI. Gesenius decides that it is a corruption of the former. (*Thes.* p. 899.)

NEPHTHALI ([Rom. *Νεφθαλί*; Vat. Alex. FA.] *Νεφθαλειμ*: *Nephtali*). The Vulgate form of the name NAPHTHALI (Tob. i. 1, 2, 4, 5).

NEPHTHALIM ([*Νεφθαλί*; Vat.] *Νεφθαλει*; [Sin.] Alex. *Νεφθαλειμ*, and so N. T.: *Nephtali*, *Nephtalim*). Another form of the same name as the preceding (Tob. vii. 3; Matt. iv. 13 15; Rev. vii. 6).

NEPHTO'AH, THE WATER OF (נְפֹתֹאֵה)

נְפִיטוֹחַ [waters of opening]: ὕδωρ Ναφθῶ; [Vat. in Josh. xv. 9.] Μαφθω: aqua, and aquae, *Nephtoa*. The spring or source (נְיַ, A. V. "fountain" and "well") of the water or (inaccurately) waters of Nephtoa was one of the landmarks in the boundary-line which separated Judah from Benjamin (Josh. xv. 9, xviii. 15). It was situated between the "head," or the "end," of the mountain which faced the valley of Hinnom on the west, and the cities of Ephron, the next point beyond which was Kirjath-jearim. It lay therefore N. W. of Jerusalem, in which direction it seems to have been satisfactorily identified in *Ain Lifta*, a spring situated a little distance above the village of the same name, in a short valley which runs into the east side of the great *Wady Beit Hanina*, about 2½ miles from Jerusalem and 6 from *Kariel el-Enab* (K.-jearim). The spring — of which a view is given by Dr. Barclay (*City, etc.*, 544) — is very abundant, and the water escapes in a considerable stream into the valley below.

Nephtoa was formerly identified with various springs — the spring of St. Philip (*Ain Hanayah*) in the *Wady el-Werd*; the *Ain Yalo* in the same valley, but nearer Jerusalem; the *Ain Karim*, or Fountain of the Virgin of mediæval times (Doubdan, *Voyage*, 187; see also the citations of Tobler, *Topographie*, 351; and Saudys, lib. iii. p. 184); and even the so-called well of Job at the western end of the *Wady Alya* (*Mislin*, ii. 155); but these, especially the last, are unsuitable in their situation as respects Jerusalem and Kirjath-jearim, and have the additional drawback that the features of the country there are not such as to permit a boundary-line to be traced along it, while the line through *Ain Lifta* would, in Barclay's words, "pursue a course indicated by nature."

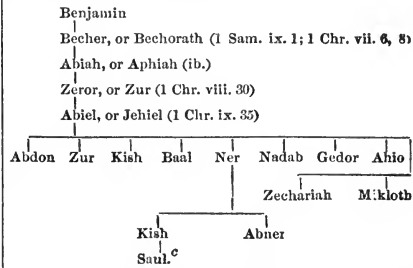

The name of *Lifta* is not less suitable to this identification than its situation, since T and L frequently take the place of each other, and the rest of the word is almost entirely unchanged. The earliest notice of it appears to be by Stewart<sup>b</sup> (*Tent and Khan*, 349), who speaks of it as at that time (Feb. 1854) "recognized." G.

NEPHU'SIM (נְפִיטִים; נְפִיטִים; Keri, נְפִיטִים; Νεφουσίμ; [Vat. Ναφείσωμ;] Alex. Νεφουσειμ: *Nephusim*). The same as NEPHUSIESTIM, of which name according to Gesenius it is the proper form (Ezr. ii. 50).

NER (נֶר [light, lamp]: Νήρ [Vat. in 1 Sam. xiv. 50, Νηρει:] *Ner*), son of Jehiel, according to 1 Chr. viii. 33, father of Kish and Abner, and grandfather of King Saul. Abner was, therefore, uncle to Saul, as expressly stated 1 Sam. xiv. 50. But some confusion has arisen from the statement in 1 Chr. ix. 36, that Kish and Ner were both sons of Jehiel, whence it has been concluded that they were brothers, and consequently that Abner and Saul were first cousins. But, unless there was an elder Kish, uncle of Saul's father, which is not at all probable, it is obvious to explain the insertion of Kish's name (as that of the

numerous names by the side of it) in 1 Chr. ix. 36, by the common practice in the Chronicles of calling all the heads of houses of fathers, sons of the phylarch or demarch from whom they sprung, or under whom they were reckoned in the genealogies, whether they were sons or grandsons, or later descendants, or even descendants of collateral branches. [BECHER.]

The name Ner, combined with that of his son Abner, may be compared with Nadab in ver. 36, and Abinadab ver. 39; with Jesse, 1 Chr. ii. 13, and Abishai, ver. 16; and with Juda, Luke iii. 26, and Abiud, Matt. i. 13. The subjoined table shows Ner's family relations.

The family seat of Ner was Gibeon, where his father Jehiel was probably the first to settle (1 Chr. ix. 35). From the pointed mention of his mother, Maachah, as the wife of Jehiel, she was perhaps the heiress of the estate in Gibeon. This inference receives some confirmation from the fact that "Maachah, Caleb's concubine," is said, in 1 Chr. ii. 59, to have borne "Sheva the father of Machbenah and the father of Gibeon," where, though the text is in ruins, yet a connection of some sort between Maachah (whoever she was) and Gibeon, often called Gibeah of Saul, and the same as Gibeon, 1 Chr. xiv. 16, is apparent. It is a curious circumstance that, while the name (Jehiel) of the "father of Gibeon" is not given in the text of 1 Chr. viii. 29, the same is the case with "the father of Gibeon" in 1 Chr. ii. 49, naturally suggesting, therefore, that in the latter passage the same name *Jehiel* ought to be supplied which is supplied for the former by the duplicate passage 1 Chr. ix. 35. If this inference is correct it would place the time of the settlement of Jehiel at Gibeon — where one would naturally expect to find it — near the time of the settlement of the tribes in their respective inheritances under Joshua. Maachah, his wife, would seem to be a daughter or descendant of Caleb by Ephah his concubine. That she was not "Caleb's concubine" seems pretty certain, both because Ephah is so described in ii. 46 and because the recurrence of the name Ephah in ver. 47, separated from the words פִּיִּלְגָשׁ פְּלִיב only by the name Shaaph,<sup>d</sup> creates a strong presumption that Ephah, and not Maachah is the name to which this description belongs in ver. 47, as in ver. 46. Moreover, *Maachah* cannot be the nom. case to the masculine verb יָלַד. Supposing,

<sup>a</sup> This must arise from a confusion between *Yalo* Ajalon, near which the "well of Job" is situated, and the *Ain Yalo*.

<sup>b</sup> Stewart, while accusing Dr. Robinson of inaccuracy (p. 349), has himself fallen into a curious confu-

sion between Nephtoa and Netophah. Dr. Robinson is in this instance perfectly right.

<sup>c</sup> There are doubtless some links missing in this genealogy, as at all events the head of the family of Matri.

<sup>d</sup> *Shaaph* has nearly the same letters as *Hepha*.

then, Maachah, the ancestress of Saul, to have been thus a daughter or granddaughter of Caleb, we have a curious coincidence in the occurrence of the name SAUL, as one of the Edomitish kings, 1 Chr. i. 48, and as the name of a descendant of the Edomitish Caleb. [CALEB.] The element *Baal* (1 Chr. ix. 36, &c.) in the names *Esh-Baal*, *Meribbaal*, the descendants of Saul the son of Kish, may also, then, be compared with *Baal-Haanan*, the successor of Saul of Rehoboth (1 Chr. i. 49), as also the name *Matved* (ib. 50) with *Matvi* (1 Sam. x. 21). A. C. H.

NEREUS [2 syl.] (Νηρεός: *Nereus*). A Christian at Rome, saluted by St. Paul, Rom. xvi. 15. Origen conjectures that he belonged to the household of Philologus and Julia. Estius suggests that he may be identified with a Nereus, who is said to have been baptized at Rome by St. Peter. A legendary account of him is given in Bolland, *Acta Sanctorum*, 12th May; from which, in the opinion of Tillemont, *H. E.* ii. 139, may be gathered the fact that he was beheaded at Terracina, probably in the reign of Nerva. His ashes are said to be deposited in the ancient church of SS. Nereo ed Archilleo at Rome.

There is a reference to his legendary history in Bp. Jeremy Taylor's Sermon, *The Marriage-ring*, Part i. W. T. B.

NER'GAL (נֶרְגַּל: 'Nergál: *Nergel*), one of the chief Assyrian and Babylonian deities, seems to have corresponded closely to the classical Mars. He was of Babylonian origin, and his name signifies, in the early Cushite dialect of that country, "the great man," or "the great hero." His monumental titles are — "the storm-ruler," "the king of battle," "the champion of the gods," "the male principle" (or "the strong begetter"), "the tutelary god of Babylonia," and "the god of the chase." Of this last he is the god preëminently; another deity, *Nin*, disputing with him the presidency over war and battles. It is conjectured that he may represent the deified Nimrod — "the mighty hunter before the Lord" — from whom the kings both of Babylon and Nineveh were likely to claim descent. The city peculiarly dedicated to his worship is found in the inscriptions to be Cutha or Tiggaba, which is in Arabian tradition the special city of Nimrod. The only express mention of Nergal contained in sacred Scripture is in 2 K. xvii. 30, where "the men of Cutha," placed in the city of Samaria by a king of Assyria (Esar-haddon?), are said to have "made Nergal their god" when transplanted to their new country — a fact in close accordance with the frequent notices in the inscriptions, which mark him as the tutelary god of that city. Nergal's name occurs as the initial element in *Nergal-shar-ezer* (Jer. xxxix. 3 and 13); and is also found, under a contracted form, in the name of a comparatively late king — the *Abennerigus* of Josephus (*Ant.* xx. 2, § 1).

Nergal appears to have been worshipped under the symbol of the "Man-Lion." The Semitic name for the god of Cutha was *Aria*, a word which signifies "lion" both in Hebrew and Syriac. *Nir*, the first element of the god's name, is capable of the same signification. Perhaps the habits of the lion as a hunter of beasts were known, and he was thus regarded as the most fitting symbol of the god who presided over the chase.

It is in connection with their hunting excursions that the Assyrian kings make most frequent men-

tion of this deity. As early as B. C. 1150, Tig-lath-pileser I. speaks of him as furnishing the arrows with which he slaughtered the wild animals *Assur-dani-pal* (Sardanapalus), the son and successor of Esar-haddon, never fails to invoke his aid, and ascribes all his hunting achievements to his influence. Pul sacrificed to him in Cutha, and Sennacherib built him a temple in the city of Tarbisa near Nineveh: but in general he was not much worshipped either by the earlier or the later kings (see the *Essay* of Sir H. Rawlinson in Rawlinson's *Herodotus*, i. 631-634). G. R.

NER'GAL-SHAREZER (נֶרְגַּל-שַׂרְעֶזֶר: [see above]: [Rom. Vat. *Μαργασαδάρ*; F.A. *Μαργανασαδάρ*; Alex.] *Νηργελ-Σασασάρ*: *Neregel, Sereser*, [*Neregel et Sereser*]) occurs only in Jeremiah xxxix. 3 and 13. There appear to have been two persons of the name among the "princes of the king of Babylon," who accompanied Nebuchadnezzar on his last expedition against Jerusalem. One of these is not marked by any additional title; but the other has the honorable distinction of Rab-mag (רַב־מַג), and it is to him alone that any particular interest attaches. In sacred Scripture he appears among the persons, who, by command of Nebuchadnezzar, released Jeremiah from prison; profane history gives us reason to believe that he was a personage of great importance, who not long afterwards mounted the Babylonian throne. This identification depends in part upon the exact resemblance of name, which is found on Babylonian bricks in the form of *Nergal-shar-uzur*; but mainly it rests upon the title of *Rubu-emga*, or Rab-Mag, which this king bears in his inscriptions, and on the improbability of there having been towards the close of the Babylonian period — when the monumental monarch must have lived — two persons of exactly the same name holding this office. [RAB-MAG.]

Assuming on these grounds the identity of the Scriptural "Nergal-sharezer, Rab-Mag," with the monumental "*Nergal-shar-uzur, Rubu-emga*," we may learn something of the history of the prince in question from profane authors. There cannot be a doubt that he was the monarch called Nergilissar or Nergilissoor by Berosus (*Joseph. c. Ap.* i. 20), who murdered Evil-Merodach, the son of Nebuchadnezzar, and succeeded him upon the throne. This prince was married to a daughter of Nebuchadnezzar, and was thus the brother-in-law of his predecessor, whom he put to death. His reign lasted between three and four years. He appears to have died a natural death, and certainly left his crown to a young son, Laborsoarchod, who was murdered after a reign of nine months. In the canon of Ptolemy he appears, under the designation of Nergassolassar, as reigning four years between Ilouardamus (Evil-Merodach) and Nabonadius, his son's reign not obtaining any mention, because it fell short of a year.

A palace, built by Nergilissar, has been discovered at Babylon. It is the only building of any extent on the right bank of the Euphrates. (See plan of BABYLON.) The bricks bear the name of Nergal-shar-uzur, the title of Rab-Mag, and also a statement — which is somewhat surprising — that Nergal-shar-uzur was the son of a certain "Bel-zikkariskun, king of Babylon." The only explanation

which has been offered of this statement is a conjecture (Rawlinson's *Herodotus*, vol. i. p. 518), that Bel-zikkar-iskun may possibly have been the chief Chaldean," who (according to Berosus) kept the royal authority for Nebuchadnezzar during the interval between his father's death and his own arrival at Babylon. [NEBUCHADNEZZAR.] Neriglissar could scarcely have given his father the title of king without some ground; and this is at any rate a possible ground, and one compatible with the non-appearance of the name in any extant list of the later Babylonian monarchs. Neriglissar's office of Rab-Mag will be further considered under that word. It is evident that he was a personage of importance before he mounted the throne. Some (as Larcher) have sought to identify him with Darius the Mede. But this view is quite untenable. There is abundant reason to believe from his name and his office that he was a native Babylonian — a grandee of high rank under Nebuchadnezzar, who regarded him as a fitting match for one of his daughters. He did not, like Darius Medus, gain Babylon by conquest, but acquired his dominion by an internal revolution. His reign preceded that of the Median Darius by 17 years. It lasted from B. C. 559 to B. C. 556, whereas Darius the Mede cannot have ascended the throne till B. C. 538, on the conquest of Babylon by Cyrus. G. R.

NERI (נְרִי [Tisch. נְרִיֵּל with Sin. A B etc.] representing the Heb. נְרִי, which would be a short form for נְרִיָּה, Neriah, "Jehovah is my lamp:" *Neri*),<sup>a</sup> son of Melchi, and father of Salathiel, in the genealogy of Christ, Luke iii. 27. Nothing is known of him, but his name is very important as indicating the principle on which the genealogies of our Lord are framed. He was of the line of Nathan; but his son Salathiel became Solomon's heir on the failure of Solomon's line in king Jeconiah, and was therefore reckoned in the royal genealogy among the sons of Jeconiah; to whose status and prerogatives he succeeded, 1 Chr. iii. 17; Matt. i. 12. The supposition that the son and heir of David and Solomon would be called the son of Neri, an obscure individual, because he had married Neri's daughter, as many pretend, is too absurd to need refutation. The information given us by St. Luke — that Neri, of the line of Nathan, was Salathiel's father — does, in point of fact, clear up and settle the whole question of the genealogies. [GENEALOGY OF JESUS CHRIST.] A. C. H.

NERIAH (נְרִיָּה [and נְרִיָּהוּ, *lamp of Jehovah*]: Νηρίας, but Νηριελας [Alex. Νηριας] in Jer. li. 59; [Vat. also -pe- in xliii. 3:] *Nerius*, but *Neri* in xxiii. 12). The son of Maaseiah, and father of Baruch (Jer. xxxii. 12, xxxvi. 4, xliii. 3, [also xxxii. 16, xxxvi. 8, 14, 32, xliii. 6, xlv. 1]), and Seraiah (Jer. li. 59).

NERIAS (Νηριας: *Nerias*). The father of Baruch and Seriah (Bar. i. 1).

\* NEST. The Greek word κατασκήνωσις, rendered *nest* in Matt. viii. 20 and Luke ix. 58, means strictly the *pitching of a tent* and then a *tent or dwelling, an abode*. Coupled as it is in these passages with the holes of foxes, and contrasted with

our Saviour's want of a home or lodging place, it seems plainly not to have the specific meaning of *nests* but places of resort, lodging places, "haunts." So the corresponding verb in Matt. xiii. 32, Mark iv. 32, and Luke xiii. 19 is rendered *lodge*; in Acts ii. 26, *rest*. "Nest" is undoubtedly meant by "house" in Ps. civ. 17: "As for the stork the fir-trees are her house." This bird "in the East selects ruins wherever they are to be found, more especially or for the most part where there is water or neglected marsh in their neighborhood. But when neither houses nor ruins occur, it selects any trees tall and strong enough to provide a firm platform for its huge nest, and for this purpose none are more convenient than the fir-tree" (Tristram, *Nat. Hist. of the Bible*, p. 248). The eagle's stirring up of her nest, i. e. the young in the nest (Deut. xxxii. 12), refers to the efforts of the eagle to encourage her young ones to fly and coax them to leave their nest (Tristram, p. 176). R. D. C. R.

NET. The various terms applied by the Hebrews to nets had reference either to the construction of the article, or to its use and objects. To the first of these we may assign the following terms: -*Macnôr*,<sup>b</sup> and its cognates, *mimâr*<sup>c</sup> and *mimôrêth*,<sup>d</sup> all of which are derived from a root signifying "to weave;" and, again, *sêbâcâh*<sup>e</sup> and *sêbâc*,<sup>f</sup> derived from another root of similar signification. To the second head we may assign *chêrem*,<sup>g</sup> from a root signifying "to enclose;" *mâtzôd*,<sup>h</sup> with its cognates, *mêtzôdâh*<sup>i</sup> and *mêtziâlâh*,<sup>k</sup> from a root signifying "to lie in wait;" and *resheth*,<sup>l</sup> from a root signifying "to catch." Great uncertainty prevails in the equivalent terms in the A. V.: *mâtzôd* is rendered "snare" in Eccl. vii. 26, and "net" in Job xix. 6 and Prov. xii. 12, in the latter of which passages the true sense is "prey;" *sêbâcâh* is rendered "snare" in Job xviii. 8; *mêtzôdâh*

Egyptian landing-net. (Wilkinson.)

"snare" in Ez. xii. 13, xvii. 20, and "net" in Ps. lxxvi. 11; *mimôrêth*, "drag" or "flue-net" in Hab. i. 15, 16. What distinction there may have been between the various nets described by the Hebrew terms, we are unable to decide. The etymology tells us nothing, and the equivalents in the LXX. vary. In the New Testament we meet with three terms, — *σαγήνη* (from *σάτω*, "to load"), whence our word *seine*, a large hauling or draw-net; it is the term used in the parable of the draw-net (Matt. xiii. 47): *ἀμφίβλαστον* (from *ἀμφίβλαλλω*, "to cast around"), a casting-net (Matt. iv. 18; Mark i. 16): and *δίκτυον* (from *δίκω*, "to throw"), of the same description as the one just mentioned (Matt. iv. 20; John xxi.

<sup>a</sup> See *Geneal. of Our Lord J. C.*, p. 159.

<sup>b</sup> מְכֻמָּר. <sup>c</sup> מְכֻמָּר. <sup>d</sup> מְכֻמָּרֵת.  
<sup>e</sup> שְׂבָכָה. <sup>f</sup> שְׂבָכָה. <sup>g</sup> חֶרֶם.

<sup>h</sup> מַצְוֹד. <sup>i</sup> מַצְוֹדָה. <sup>k</sup> מַצְוֹדָה.  
<sup>l</sup> רֶשֶׁת.

6, *al.*). The net was used for the purposes of fishing and hunting: the mode in which it was used has been already described in the articles on those subjects. [FISHING; HUNTING.] The Egyptians constructed their nets of flax-string: the netting-needle was made of wood, and in shape closely resembled our awn (Wilkinson, ii. 95). The nets varied in form according to their use; the landing-net has been already represented; we here give a sketch of the draw-net from the same source.

Egyptian draw-net (Wilkinson).

As the nets of Egypt were well known to the early Jews (Is. xix. 8), it is not improbable that the material and form was the same in each country. The nets used for birds in Egypt were of two kinds, clap-nets and traps. The latter consisted of network strained over a frame of wood, which was so constructed that the sides would collapse by pulling a string and catch any birds that might have alighted on them while open. The former was made on the same principle, consisting of a double frame with the network strained over it, which might be caused to collapse by pulling a string.<sup>a</sup>

The metaphorical references to the net are very numerous: it was selected as an appropriate image of the subtle devices of the enemies of God on the one hand (*e. g.* Ps. ix. 15, xxv. 15, xxxi. 4), and of the unavertable vengeance of God on the other hand (Lam. i. 13; Ez. xii. 13; Hos. vii. 12).

We must still notice the use of the term *sēdāc*, in an architectural sense, applied to the open ornamental work about the capital of a pillar (1 K. vii. 7), and described in similar terms by Josephus, *ἀκτῶν ἐλάτῃ χαλκείᾳ περιπεπλεγμένον* (*Ant. iii. 3, § 4*). W. L. B.

<sup>a</sup> Prov. i. 17, is accurately as follows: "Surely in the eyes of any bird the net is spread for nothing," as it stands in the *S. V.* it is simply contrary to fact.

### NETHAN'EËL (נֶתְנִיֶּאֱל [given of God]:

*Nathanael*). 1. The son of Zuar, and prince of the tribe of Issachar at the time of the Exodus. With his 54,400 men his post in the camp was on the east next to the camp of Judah, which they followed in the march. The same order was observed in the offerings at the dedication of the Tabernacle, when Nethaneel followed Nahshon the prince of the tribe of Judah (Num. i. 8, ii. 5, vii. 18, 23, x. 15).

2. The fourth son of Jesse and brother of David (1 Chr. ii. 14).

3. A priest in the reign of David who blew the trumpet before the ark, when it was brought from the house of Obed-edom (1 Chr. xv. 24).

4. A Levite, father of Shemaiah the scribe in the reign of David (1 Chr. xxiv. 6).

5. [Vat. Naas Iετηλ.] The fifth son of Obed-edom the doorkeeper of the ark (1 Chr. xxvi. 4).

6. One of the princes of Judah, whom Jehoshaphat in the third year of his reign sent to teach in the cities of his kingdom (2 Chr. xvii. 7).

7. A chief of the Levites in the reign of Josiah, who took part in the solemn passover kept by that king (2 Chr. xxxv. 9).

8. A priest of the family of Pashur, in the time of Ezra, who had married a foreign wife (Ezr. x. 22). He is called NATHANAEL in 1 Esdr. ix. 22.

9. [Vat. Alex. FA.<sup>1</sup> omit.] The representative of the priestly family of Jedaiiah in the time of Joiakim the son of Jeshua (Neh. xii. 21).

10. [Vat. Alex. FA.<sup>1</sup> omit.] A Levite, of the sons of Asaph, who with his brethren played upon the musical instruments of David, in the solemn procession which accompanied the dedication of the wall of Jerusalem under Ezra and Nehemiah (Neh. xii. 36). W. A. W.

### NETHANI'AH (נֶתְנִיָּה [given of Je-

*hovah*): and in the lengthened form נֶתְנִיָּהוּ, Jer. xl. 8, xli. 9: *Nathanias*, exc. 2 K. xxv. 23, where the Alex. MS. has *Μαθθανιας*: *Nathania*). 1. The son of Elishama, and father of Ishmael who murdered Gedaliah (2 K. xxv. 23, 25; Jer. xl. 8, 14, 15, xli. 1, 2, 6, 7, 9, 10, 11, 12, 15, 16, 18). He was of the royal family of Judah.

2. (נֶתְנִיָּהוּ) in 1 Chr. xxv. 12: [*Nathanias*, *Nathan*; Vat. in ver. 12 *Nathanias*.] One of the four sons of Asaph the minstrel, and chief of the 5th of the 24 courses into which the Temple choir was divided (1 Chr. xxv. 2, 12).

3. (נֶתְנִיָּהוּ): [Vat. *Μαθθανιας*.] A Levite in the reign of Jehoshaphat, who with eight others of his tribe and two priests accompanied the princes of Judah who were sent by the king through the country to teach the law of Jehovah (2 Chr. xvii. 8).

4. The father of Jehudi (Jer. xxxvi. 14).

### NETHANIM [A. V. "Nethinims"] (נֶתְנִיִּים)

[see below]: [FA.<sup>3</sup> *Nathanaioi*, Neh. xi. 21, [Rom. Vat. Alex. FA.<sup>1</sup> omit]; *Nathinim* [Vat. *Nathenim*, Alex. *Nathanaioi*, Ezr. ii. 43; [there are many variations in the MSS. in other places:] of *δεδομένοι* [Comp. *Nathineoi*, 1 Chr. ix. 2: *Nathinai*]) As applied specifically to a distinct body of men connected with the services of the Temple, this

This is one of the admirable emendations of the late Mr. Bernard. (See Mason and Bernard's *Hebrew Grammar*.)

name first meets us in the later books of the O. T.; in 1 Chron., Ezra, and Nehemiah. The word, and the ideas embodied in it may, however, be traced to a much earlier period. As derived from the verb נָתַן, *nāthan* (= give, set apart, dedicate), it was applied to those who were specially appointed to the liturgical offices of the Tabernacle.<sup>a</sup> Like many other official titles it appears to have had at first a much higher value than that afterwards assigned to it. We must not forget that the Levites were given to Aaron and his sons, *i. e.* to the priests as an order, and were accordingly the first Nethinim (נְתִינִים, Num. iii. 9, viii. 19). At first they were the only attendants, and their work must have been laborious enough. The first conquests, however, brought them their share of the captive slaves of the Midianites, and 320 were given to them as having charge of the Tabernacle (Num. xxxi. 47), while 32 only were assigned specially to the priests. This disposition to devolve the more laborious offices of their ritual upon slaves of another race showed itself again in the treatment of the Gibeonites. They, too, were "given" (A. V. "made") to be "hewers of wood and drawers of water" for the house of God (Josh. ix. 27), and the addition of so large a number (the population of five cities) must have relieved the Levites from much that had before been burdensome. We know little or nothing as to their treatment. It was a matter of necessity that they should be circumcised (Ex. xii. 48), and conform to the religion of their conquerors, and this might at first seem hard enough. On the other hand it must be remembered that they presented themselves as recognizing the supremacy of Jehovah (Josh. ix. 9), and that for many generations the remembrance of the solemn covenant entered into with them made men look with horror on the shedding of Gibeonite blood (2 Sam. xxi. 9), and protected them from much outrage. No addition to the number thus employed appears to have been made during the period of the Judges, and they continued to be known by their old name as the Gibeonites. The want of a further supply was however felt when the reorganization of worship commenced under David. Either the massacre at Nob had involved the Gibeonites as well as the priests (1 Sam. xxii. 19), or else they had fallen victims to some other outburst of Saul's fury, and, though there were survivors (2 Sam. xxi. 2), the number was likely to be quite inadequate for the greater stateliness of the new worship at Jerusalem. It is to this period accordingly that the origin of the class bearing this name may be traced. The Nethinim were those "whom David and the princes appointed (Heb. *gave*) for the service of the Levites" (Ezr. viii. 20). Analogy would lead us to conclude that, in this as in the former instances, these were either prisoners taken in war, or else some of the remnant of the Canaanites;<sup>b</sup> but the new name in which the old seems to have been merged leaves it uncertain. The foreign character of the names in Ezr. ii. 43-54 is

unmistakable, but was equally natural on either hypothesis.

From this time the Nethinim probably lived within the precincts of the Temple, doing its rougher work, and so enabling the Levites to take a higher position as the religious representatives and instructors of the people. [LEVITES.] They answered in some degree to the male *ἱερέδδουλοι*, who were attached to Greek and Asiatic temples (Josephus, *Ant.* xi. 5, § 1, uses this word of them in his paraphrase of the decree of Darius), to the grave-diggers, gate-keepers, bell-ringers of the Christian Church. Ewald (*Alterthüm.* p. 299) refers to the custom of the more wealthy Arabs dedicating slaves to the special service of the Kaaba at Mecca, or the Sepulchre of the Prophet at Medina.

The example set by David was followed by his successor. In close union with the Nethinim in the statistics of the return from the Captivity, attached like them to the Priests and Levites, we find a body of men described as "Solomon's servants" (Ezr. ii. 55; Neh. vii. 60, xi. 3), and these we may identify, without much risk of error, with some of the "people that were left" of the earlier inhabitants whom he made "to pay tribute of bond-service" (1 K. ix. 20; 2 Chr. viii. 7). The order in which they are placed might even seem to indicate that they stood to the Nethinim in the same relation that the Nethinim did to the Levites. Assuming, as is probable, that the later Rabbinic teaching represents the traditions of an earlier period, the Nethinim appear never to have lost the stigma of their Canaanite origin. They had no *Jus connubii* (Gemar. Babyl. *Jebam.* ii. 4; *Kiddush.* iv. 1, in Carpzov, *App. Crit. de Neth.*), and illicit intercourse with a woman of Israel was punished with scourging (Carpzov, *l. c.*); but their quasi-sacred position raised them in some measure above the level of their race, and in the Jewish order of precedence, while they stood below the Mamzerim (bastards, or children of mixed marriages), they were one step above the Proselytes fresh come from heathenism and emancipated slaves (Gemar. Hieros. *Horajoth*, fol. 482; in Lightfoot, *Hor. Heb. ad Matt.* xxiii. 14). They were thus all along a servile and subject caste. The only period at which they rise into anything like prominence is that of the return from the Captivity. In that return the priests were conspicuous and numerous, but the Levites, for some reason unknown to us, hung back. [LEVITES.] Under Zerubbabel there were but 341 to 4,289 priests (Ezr. ii. 36-42). Under Ezra none came up at all till after a special and solemn call (Ezr. viii. 15). The services of the Nethinim were consequently of more importance (Ezr. viii. 17), but in their case also, the small number of those that joined (392 under Zerubbabel, 220 under Ezra, including "Solomon's servants") indicates that many preferred remaining in the land of their exile to returning to their old service. Those that did come were consequently thought worthy of special mention. The names of their families were registered with as much care as those of the priests

<sup>a</sup> This is the received interpretation. Bochart (*Phaleg*, ii. 1) gives a more active meaning to the words, "Those who have devoted themselves." So Theodorēt (*Qu. in 1 Paralip.*), who explains the name as = δόσος ἰαῶς, *τουτέστι, τῶν ὄντος Θεοῦ*, and looks on them as Israelites of other tribes voluntarily giving themselves to the service of the Sanctuary. This is,

however, without adequate grounds, and at variance with facts. Comp. Pfeiffering *De Nethinæis*, in Ugolini's *Thesaurus*, vol. xiii.

<sup>b</sup> The identity of the Gibeonites and Nethinim, excluding the idea of any addition, is, however, maintained by Pfeiffering.

(Ezr. ii. 43-58). They were admitted, in strict conformity to the letter of the rule of Deut. xxix. 11, to join in the great covenant with which the restored people inaugurated its new life (Neh. x. 28). They, like the Priests and Levites, were exempted from taxation by the Persian Satraps (Ezr. vii. 24). They were under the control of a chief of their own body (Ezr. ii. 43; Neh. vii. 46). They took an active part in the work of rebuilding the city (Neh. iii. 26), and the tower of Ophel, convenient from its proximity to the Temple, was assigned to some of them as a residence (Neh. xi. 21), while others dwelt with the Levites in their cities (Ezr. ii. 70). They took their place in the chronicles of the time as next in order to the Levites (1 Chr. ix. 2).

Neither in the Apocrypha, nor in the N. T., nor yet in the works of the Jewish historian, do we find any additional information about the Nethinim. The latter, however, mentions incidentally a festival, that of the Xylophoria, or wood carrying, of which we may perhaps recognize the beginning in Neh. x. 34, and in which it was the custom for all the people to bring large supplies of firewood for the sacrifices of the year. This may have been designed to relieve them. They were at any rate likely to bear a conspicuous part in it (Joseph. B. J. ii. 17, § 6).

Two hypotheses connected with the Nethinim are mentioned by Pfeffinger in the exhaustive monograph already cited: (1), that of Fürster (*Dict. Hebr.*, Basil, 1864), that the first so called were sons of David, i. e., younger branches of the royal house to whom was given the defense of the city and the sanctuary; (2), that of Boulduc (referred to also by Selden, *De Jure Nat. et Gent.*), connected apparently with (1), that Joseph the husband of the Virgin was one of this class.<sup>a</sup>

E. H. P.

### NETOPHAIH (נְטוֹפַיִם) [*distillation*, Ges.]:

Νετωφά, Ἀτωφά; Alex. Νεφωτά; [Ανετωφά; in 1 Esdr. v. 18, Νετωφάς, Vat. Νετςεβας, Alex. Νετωφαιε:] *Netupha*, [in 1 Esdr. *Neporus*], a town the name of which occurs only in the catalogue of those who returned with Zerubbabel from the Captivity (Ezr. ii. 22; Neh. vii. 26; 1 Esdr. v. 18). But, though not directly mentioned till so late a period, Netophah was really a much older place. Two of David's guard, MAHARAI and HELEB or HELDAI, leaders also of two of the monthly courses (1 Chr. xxvii. 13, 15), were Netophathites, and it was the native place of at least one<sup>b</sup> of the captains who remained under arms near Jerusalem after its destruction by Nebuchadnezzar. The "villages of the Netophathites" were the residence of the Levites (1 Chr. ix. 16), a fact which shows that they did not confine themselves to the places named in the catalogues of Josh. xxi. and 1 Chr. vi. From another notice we learn that the particular Levites who inhabited these villages were singers (Neh. xii. 28).

That Netophah belonged to Judah appears from the fact that the two heroes above mentioned belonged, the one to the Zarhites — that is, the great family of Zerah, one of the chief houses of the tribe — and the other to Othniel, the son-in-law of

Caiah. To judge from Neh. vii. 26 it was in the neighborhood of, or closely connected with, Bethlehem, which is also implied by 1 Chr. li. 54, though the precise force of the latter statement cannot now be made out. The number of Netophathites who returned from Captivity is not exactly ascertainable, but it seems not to have been more than sixty — so that it was probably only a small village, which indeed may account for its having escaped mention in the lists of Joshua.

A remarkable tradition, of which there is no trace in the Bible, but which nevertheless is not improbably authentic, is preserved by the Jewish authors, to the effect that the Netophathites slew the guards which had been placed by Jeroboam on the roads leading to Jerusalem to stop the passage of the first-fruits from the country villages to the Temple (Targum on 1 Chr. ii. 54; on Ruth iv. 20, and Eccl. iii. 11). Jeroboam's obstruction, which is said to have remained in force till the reign of Hoshea (see the notes of Beck to Targum on 1 Chr. ii. 54), was commemorated by a fast on the 23d Sivan, which is still retained in the Jewish calendar (see the calendar given by Basnage, *Hist. des Juifs*, vi. ch. 29).

It is not mentioned by Eusebius and Jerome, and although in the Mishna reference is made to the "oil of Netophah" (*Peah* 7, §§ 1, 2), and to the "valley of Beth Netophah," in which artichokes flourished, whose growth determined the date of some ceremonial observances (*Shevi'ith* 9, § 7), nothing is said as to the situation of the place. The latter may well be the present village of *Beit Nettif*, which stands on the edge of the great valley of the *Wady es-Sumt* (Rob. *Bibl. Res.* ii. 16, 17; Porter, *Handbk.* 248); but can hardly be the Netophah of the Bible, since it is not near Bethlehem, but in quite another direction. The only name in the neighborhood of Bethlehem suggestive of Netophah is that which appears in Van de Velde's map (1858) as *Antúbeh*, and in Tobler (*3te Wand.* 80) as *Om Tuba* (أَم طوبجا), attached to a village about 2 miles N. E. of Bethlehem and a wady which falls therefrom into the *Wady en Nar*, or Kidron.

G.

NETOPHATHI (נְטוֹפַתִּי) [patron. see above]: Vat. [Rom. Alex. FA.] omit; Alex. [rather, FA. 3] *Netupathi*: *Nethupathi*, Neh. xii. 28. The same word which in other passages is accurately rendered "the Netophathite," except that here it is not accompanied by the article.

### NETOPHATHITE, THE (הַנְטוֹפַתִּי), in

Chron. הַנְטוֹפַתִּי [as above]: δ *Εντοφατείτης*, *Νεφθαθείτης*, *Νεθωφατεί*, δ *ἐκ Νετωφάτ*; [these are readings of Vat. M.; Rom. Alex. FA. have many other variations:] *Netophathites*, [*Netuphati*, *Netophathites*, *de Netophati*], 2 Sam. xxiii. 28, 29; 2 K. xxv. 23; 1 Chr. xi. 30, xxvii. 13, 15; Jer. xl. 8. The plural form, THE NETOPHATHITES (the Hebrew word being the same as the above) occurs in 1 Chr. ii. 54, ix. 16.

G.

NETTLE. The representative in the A. V.

<sup>a</sup> The only trace of any tradition corresponding to this theory is the description in the Arabian History of Joseph (c. 2), according to which he is of the city of David and the tribe of Judah, and *rest*, on account

of his wisdom and piety. "sacerdos factus est in Teropio Domini" (Tischendorf, *Evang. Apoc.*, p. 116).

<sup>b</sup> Comp. 2 K. xxv. 23, with Jer. xl. 8

of the Hebrew words *chârûl* and *kinmôsh* or *kimôsh*.

1. *Chârûl* (חָרְוֹל: φρύγανα ἄγρια: *a sentis, urtica, spina*) occurs in Job xxx. 7 — the patriarch complains of the contempt in which he was held by the lowest of the people, who, from poverty, were obliged to live on the wild shrubs of the desert: "Among the tashes they brayed, under the *chârûl* they were gathered together," and in Prov. xxiv. 31, where of "the field of the slothful," it is said, "it was all grown over with thorns (*kinmêshônîm*), and *charullîm* had covered the face thereof;" see also Zeph. ii. 9: the curse of Moab and Ammon is that they shall be "the breeding of *chârûl* and salt-pits."

There is very great uncertainty as to the meaning of the word *chârûl*, and numerous are the plants which commentators have sought to identify with it: brambles, sea-orache, butchers' broom, thistles, have all been proposed (see Celsius, *Hierob.* ii. 165). The generality of critics and some modern versions are in favor of the *nettle*. Some have objected to the nettle as not being of a sufficient size to suit the passage in Job (*l. c.*); but in our own country nettles grow to the height of six or even seven feet when drawn up under trees or hedges; and it is worthy of remark that, in the passage of Job quoted above, bushes and *chârûl* are associated. Not much better founded is Dr. Royle's objection (*Kitto's Cyc. art. Charul*) that both thorny plants and nettles must be excluded, "as no one would voluntarily resort to such a situation;" for the people of whom Job is speaking might readily be supposed to resort to such a shade, as in a sandy desert the thorn-bushes and tall nettles growing by their side would afford; or we may suppose that those who "for want and famine" were driven into the wilderness were gathered together under the nettles for the purpose of gathering them for food, together with the sea-orache and juniper-roots (*Job xxx. 4*). Celsius believes the *chârûl* is identical with the Christ-thorn (*Zizyphus Palustris*)—the *Palustris aculeatus* of modern botanists—but his opinion is by no means well founded. The passage in Proverbs (*l. c.*) appears to forbid us identifying the *chârûl* with the *Palustris aculeatus*; for the context, "I went by, and lo it was all grown over with *kimshôn* and *charullîm*," seems to point to some weed of quicker growth than the plant proposed by Celsius. Dr. Royle has argued in favor of some species of wild mustard, and refers the Hebrew word to one of somewhat similar form in Arabic, namely, *Khardul*, to which he traces the English *charlock* or *kedlock*, the well-known troublesome weed. The Scriptural passages would suit this interpretation, and it is quite possible that wild mustard may be intended by *chârûl*. The etymology<sup>b</sup> too, we may add, is as much in favor of the wild mustard as of

the nettle, one or other of which plants appears to be denoted by the Hebrew word. We are inclined to adopt Dr. Royle's opinion, as the following word probably denotes the *nettle*.

2. *Kimôsh* or *kinôsh* (קִמּוֹשׁ, קִימּוֹשׁ: ἀκάνθια ξύλα, ἄκανθα, ἄλεθρος: *urticeæ*). "Very many interpreters," says Celsius (*Hierob.* ii. 207) "understand the *nettle* by this word. Of the older Jewish doctors, R. Ben Melech, on Prov. xxiv. 31, asserts that *kinmôsh* is a kind of thorn (*spina*), commonly called a nettle." The Vulgate, Arias Montanus, Luther, Deodatus,<sup>c</sup> the Spanish and English versions, are all in favor of the nettle.

The word occurs in Is. xxxiv. 13: of Edom it is said, that "there shall come up nettles and brambles in the fortresses thereof;" and in Hos. ix. 6. Another form of the same word, *kinmêshônîm* <sup>d</sup> ("thorns," A. V.), occurs in Prov. xxiv. 31: the field of the slothful was all grown over with *kinmêshônîm*.<sup>e</sup> Modern commentators are generally agreed upon the signification of this term, which, as it is admirably suited to all the Scriptural passages, may well be understood to denote some species of nettle (*Urtica*). W. H.

NEW MOON (רֵאשִׁית הַחֹדֶשׁ, רֵאשִׁית הַחֹדֶשׁ: νεομηνία, νεομηνία: *calende, neomenii*). The first day of the lunar month was observed as a holy day. In addition to the daily sacrifice there were offered two young bullocks, a ram and seven lambs of the first year as a burnt offering, with the proper meat-offerings and drink-offerings, and a kid as a sin-offering (*Num. xxviii. 11-15*).<sup>e</sup> It was not a day of holy convocation [FESTIVALS], and was not therefore of the same dignity as the Sabbath.<sup>f</sup> But, as on the Sabbath, trade and handicraft-work were stopped (*Am. viii. 5*), the Temple was opened for public worship (*Ez. xlvi. 3; Is. lxvi. 23*), and, in the kingdom of Israel at least, the people seem to have resorted to the prophets for religious instruction.<sup>g</sup> The trumpets were blown at the offering of the special sacrifices for the day, as on the solemn festivals (*Num. x. 10; Ps. lxxxi. 3*). That it was an occasion for state-banquets may be inferred from David's regarding himself as especially bound to sit at the king's table at the new moon (*1 Sam. xx. 5-24*). In later, if not in earlier times, fasting was intermitted at the new moons, as it was on the Sabbaths and the great feasts and their eves (*Jud. viii. 6*). [FASTS.]

The new moons are generally mentioned so as to show that they were regarded as a peculiar class of holy days, to be distinguished from the solemn feasts and the Sabbaths (*Ez. xlv. 17; 1 Chr. xxiii 31; 2 Chr. ii. 4, viii. 13, xxxi. 3; Ezr. iii. 5; Neh x. 33*).

The seventh new moon of the religious year, being that of Tisri, commenced the civil year, and had

<sup>a</sup> φρύγανα (from φρύγω, "to burn," "to roast," with reference to the derivation of the Hebrew word) properly signifies "dry sticks," "fagots."

<sup>b</sup> חָרְוֹל, from חָרַב ("to burn"), "addita terminatio hypochoristica ἄλ." See Fürst, *Heb. Lex.*; cf. *urtica* ab *uro*.

<sup>c</sup> i. e. the Italian version of Diodati. We have often retained the Latin forms of writers, as being familiar to the readers of Celsius and Bochart.

<sup>d</sup> קִימּוֹשׁ, plur. from קִימּוֹשׁ.

<sup>e</sup> The day of the new moon is not mentioned in Exodus, Leviticus, or Deuteronomy.

<sup>f</sup> \* It has been usual to understand "new moon days" as intended in Gal. iv. 10; but the term (μηνάς) may signify "months," i. e. certain of them regarded as specially sacred, in conformity with the stricter sense of the word and an ancient Jewish usage (see Meyer *in loc.*).

H.

<sup>g</sup> 2 K. iv. 23. When the Shunammite is going to the prophet, her husband asks her, "Wherefore wilt thou go to him to-day? It is neither new moon nor sabbath." See the notes of Vatablus, Grotius, and Kell.

significance and rites of its own. It was a day of holy convocation. [TRUMPETS, FEAST OF.]

By what method the commencement of the month was ascertained in the time of Moses is uncertain. The Mishna<sup>a</sup> describes the manner in which it was determined seven times in the year by observing the first appearance of the moon, which, according to Maimonides, derived its origin, by tradition, from Moses, and continued in use as long as the Sanhedrim existed. On the 30th day of the month watchmen were placed on commanding heights round Jerusalem to watch the sky. As soon as each of them detected the moon he hastened to a house in the city, which was kept for the purpose, and was there examined by the president of the Sanhedrim. When the evidence of the appearance was deemed satisfactory, the president rose up and formally announced it, uttering the words, "It is consecrated" (שֶׁנֶקְדָּשׁ). The information was immediately sent throughout the land from the Mount of Olives, by beacon-fires on the tops of the hills. At one period the Samaritans are said to have deceived the Jews by false fires, and swift messengers were afterwards employed. When the moon was not visible on account of clouds, and in the five months when the watchmen were not sent out, the month was considered to commence on the morning of the day which followed the 30th. According to Maimonides the Rabbinites altered their method when the Sanhedrim ceased to exist, and have ever since determined the month by astronomical calculation, while the Caraites have retained the old custom of depending on the appearance of the moon.

The religious observance of the day of the new moon may plainly be regarded as the consecration of a natural division of time. Such a usage would so readily suggest itself to the human mind that it is not wonderful that we find traces of it amongst other nations. There seems to be but little ground for founding on these traces the notion that the Hebrews derived it from the Gentiles, as Spencer and Michaelis have done;<sup>b</sup> and still less for attaching to it any of those symbolical meanings which have been imagined by some other writers (see Carpov, *App. Crit.* p. 425). Ewald thinks that it was at first a simple household festival, and that on this account the law does not take much notice of it. He also considers that there is some reason to suppose that the day of the full moon was similarly observed by the Hebrews in very remote times. (Carpov, *Apparat. Hist. Crit.* p. 423; Spencer, *De Leg. Heb.* lib. iii. dissert. iv.; Selden, *De Ann. Civ. Heb.* iv., xi.; Mishna, *Rosh Hashanah*, vol. ii. p. 338, ed. Surenhus.; Buxtorf, *Synagoga Judaica*, cap. xxii.; Ewald, *Alterthümer*, p. 394; Cudworth on the *Lord's Supper*, c. iii.; Lightfoot, *Temple Service*, cap. xi.)

**NEW TESTAMENT.** The origin, history, and characteristics of the constituent books and of the great versions of the N. T., the mutual relations of the Gospels, and the formation of the Canon, are discussed in other articles. It is proposed now to consider the Text of the N. T. The subject

naturally divides itself into the following heads which will be examined in succession:—

### I. THE HISTORY OF THE WRITTEN TEXT.

§§ 1-11. The earliest history of the text Autographs. Corruptions. The text of Clement and Origen.

§§ 12-15. Theories of recensions of the text

§§ 16-25. External characteristics of MSS

§§ 26-29. Enumeration of MSS. § 28. Uncial. 29. Cursive.

§§ 30-40. Classification of various readings

### II. THE HISTORY OF THE PRINTED TEXT.

§ 1. The great periods.

§§ 2-5. § 2. The Complutensian Polyglott.

§ 3. The editions of Erasmus. § 4. The editions of Stephens. § 5. Beza and Elzevir (English version).

§§ 6-10. § 6. Walton; Curcellæus; Mill.

§ 7. Bentley; § 8. G. v. Maestricht; [Bengel:] Wetstein; § 9. Griesbach, Matthæi. § 10. Scholz.

§§ 11-13. § 11. Lachmann. § 12. Tischendorf. § 13. Tregelles; Alford.

### III. PRINCIPLES OF TEXTUAL CRITICISM.

§§ 1-9. External evidence.

§§ 10-13. Internal evidence.

### IV. THE LANGUAGE OF THE NEW TESTAMENT

#### I. THE HISTORY OF THE WRITTEN TEXT.

1. The early history of the Apostolic writings offers no points of distinguishing literary interest. Externally, as far as it can be traced, it is the same as that of other contemporary books. St. Paul, like Cicero or Pliny, often employed the services of an amanuensis, to whom he dictated his letters, affixing the salutation "with his own hand" (1 Cor. xvi. 21; 2 Thess. iii. 17; Col. iv. 18). In one case the scribe has added a clause in his own name (Rom. xvi. 22). Once, in writing to the Galatians, the Apostle appears to apologize for the rudeness of the autograph which he addressed to them, as if from defective sight (Gal. vi. 11). If we pass onwards one step, it does not appear that any special care was taken in the first age to preserve the books of the N. T. from the various injuries of time, or to insure perfect accuracy of transcription. They were given as a heritage to man, and it was some time before men felt the full value of the gift. The original copies seem to have soon perished; and we may perhaps see in this a providential provision against that spirit of superstition which in earlier times converted the symbols of God's redemption into objects of idolatry (2 K. xviii. 4). It is certainly remarkable that in the controversies at the close of the second century, which often turned upon disputed readings of Scripture, no appeal was made to the Apostolic originals. The few passages in which it has been supposed that they are referred to will not bear examination. Ignatius, so far from appealing to Christian archives, distinctly turns, as

<sup>a</sup> *Rosh Hashanah*, Surenhusius, ii. 338, sq.

<sup>b</sup> The three passages from ancient writers which seem most to the point of those which are quoted, are in Macrobius, Horace, and Tacitus. The first says, "Præcis temporibus pontifici minori hæc provincia delegata fuit, ut novæ lunæ primum observaret aspectum vi-

samque regi sacrificulo nuntiaret" (*Sat.* i. 15). In the second the day is referred to as a social festival (*Od.* iii. 23, 9); and in Tacitus we are informed that the ancient Germans assembled on the days of new and full moon, considering them to be auspicious for new undertakings (*Germ.* c. xl.).

the whole context shows, to the examples of the Jewish Church (τὰ ἀρχαῖα—*ad Phil.* d. 8). Tertullian again, when he speaks of "the authentic epistles" of the Apostles (*De Præscr. Hæc.* xxxvi., "apud quas ipsæ authenticæ litteræ eorum recitantur"), uses the term of the pure Greek text as contrasted with the current Latin version (comp. de *Monog.* xi., "sciamus plane non sic esse in Græco authenticæ" a). The silence of the sub-Apostolic age is made more striking by the legends which were circulated after. It was said that when the grave of Barnabas in Cyprus was opened, in the fifth century, in obedience to a vision, the saint was found holding a (Greek) copy of St. Matthew written with his own hand. The copy was taken to Constantinople, and used as the standard of the sacred text (Credner, *Einkl.* § 39; *Assem. Bibl. Or.* ii. 81). The autograph copy of St. John's Gospel (αὐτὸ τὸ ἰδιόχειρον τοῦ εὐαγγελιστοῦ) was said to be preserved at Ephesus "by the grace of God, and worshipped (προσκυνεῖται) by the faithful there," in the fourth century (?), ([*Petr. Alex.*] p. 518, ed. Migne, quoted from *Chron. Pasch.* p. 5); though according to another account it was found in the ruins of the Temple when Julian attempted to rebuild it (*Philostorg.* vii. 14). A similar belief was current even in the last century. It was said that parts of the (Latin) autograph of St. Mark were preserved at Venice and Prague; but on examination these were shown to be fragments of a MS. of the Vulgate of the sixth century (Dobrowsky, *Fragmentum Pragense Ev. S. Marci*, 1778).

2. In the natural course of things the Apostolic autographs would be likely to perish soon. The material which was commonly used for letters, the papyrus-paper to which St. John incidentally alludes (2 John 12, διὰ χάρτου καὶ μέλανος; comp. 3 John 13, διὰ μέλανος καὶ καλάμου), was singularly fragile, and even the stouter kinds, likely to be used for the historical books, were not fitted to bear constant use. The papyrus fragments which have come down to the present time have been preserved under peculiar circumstances, as at Herculaneum or in Egyptian tombs; and Jerome notices that the library of Pamphilus at Cæsarea was already in part destroyed (*ex parte corruptam*) when, in less than a century after its formation, two presbyters of the Church endeavored to restore the papyrus MSS. (as the context implies) on parchment ("in membranis," Hieron. *Ep.* xxxiv. (141), quoted by Tischdf. in Herzog's *Encykl.*, *Bibeltext des N. T.* p. 159). Parchment (2 Tim. iv. 13, μεμβράνα), which was more durable, was proportionately rarer and more costly. And yet more than this. In the first age the written word of the Apostles occupied no authoritative position above their spoken word, and the vivid memory of their personal teaching. And when the true value of the Apostolic writings was afterwards revealed by the progress of the Church, then collections of "the divine oracles" would be chiefly sought for among Christians. On all accounts it seems reasonable to conclude that the autographs perished during that solemn pause which followed the Apostolic age, in which the idea of a Christian Canon, parallel and supple-

mentary to the Jewish Canon, was first distinctly realized.

3. In the time of the Diocletian persecution (A. D. 303) copies of the Christian Scriptures were sufficiently numerous to furnish a special object for persecutors, and a characteristic name to renegades who saved themselves by surrendering the sacred books (*traditores*, August. *Ep.* lxxvi. 2). Partly, perhaps, owing to the destruction thus caused, but still more from the natural effects of time, no MS. of the N. T. of the first three centuries remains.<sup>b</sup> Some of the oldest extant were certainly copied from others which dated from within this period, but as yet no one can be placed further back than the time of Constantine. It is recorded of this monarch that one of his first acts after the foundation of Constantinople was to order the preparation of fifty MSS. of the Holy Scriptures, required for the use of the Church, "on fair skins (ἐν διφθέραις εὐκατασκευαίσις) by skillful calligraphists" (Euseb. *Vit. Const.* iv. 36); and to the general use of this better material we probably owe our most venerable copies, which are written on vellum of singular excellence and fineness. But though no fragment of the N. T. of the first century still remains, the Italian and Egyptian papyri, which are of that date, give a clear notion of the calligraphy of the period. In these the text is written in columns, rudely divided, in somewhat awkward capital letters (*uncials*), without any punctuation or division of words. The *iota*, which was afterwards *subscribed*, is commonly, but not always, *adscribed*; and there is no trace of accents or breathings. The earliest MSS. of the N. T. bear a general resemblance to this primitive type, and we may reasonably believe that the Apostolic originals were thus written. (Plate i. fig. 1.)

4. In addition to the later MSS., the earliest versions and patristic quotations give very important testimony to the character and history of the ante-Nicene text. Express statements of readings which are found in some of the most ancient Christian writers are, indeed, the first direct evidence which we have, and are consequently of the highest importance. But till the last quarter of the second century this source of information fails us. Not only are the remains of Christian literature up to that time extremely scanty, but the practice of verbal quotation from the N. T. was not yet prevalent. The evangelic citations in the Apostolic Fathers and in Justin Martyr show that the oral tradition was still as widely current as the written Gospels (comp. Westcott's *Canon of the N. T.* pp. 125-195), and there is not in those writers one express verbal citation from the other Apostolic books.<sup>c</sup> This latter phenomenon is in a great measure to be explained by the nature of their writings. As soon as definite controversies arose among Christians, the text of the N. T. assumed its true importance. The earliest monuments of these remain in the works of Irenæus, Hippolytus (Pseudo-Origen), and Tertullian, who quote many of the arguments of the leading adversaries of the Church. Charges of corrupting the sacred text are urged on both sides with great acrimony. Dio-

<sup>a</sup> Griesbach (*Opuscula*, ii. 69-76) endeavors to show that the word simply means *pure, uncorrupted*.

<sup>b</sup> Papyrus fragments of part of St. Matthew, dating from the first century (?), are announced (1861) for publication by Dr. Simonides. [It is hardly necessary to say that these are forgeries. A.]

<sup>c</sup> In the epistle of Polycarp some interesting various readings occur, which are found also in later copies. Acts ii. 24, τοῦ ζῆλου for τοῦ θαλάσσου; 1 Tim. vi. 7, ἀλλὰ οὐδέ for δῆλον ὅτι οὐδέ; 1 John iv. 3, ἐν σαρκεὶ ἐληλυθῆναι. Comp. 1 Pet. i. 8 (Polyc. *ad Phil.* i. 4).

nyaius of Corinth († cir. A. D. 176, ap. Euseb. *H. E.* iv. 23), Irenæus (cir. A. D. 177; iv. G. 1), Tertullian (cir. A. D. 210; *De Carne Christi*, 19, p. 385; *Adv. Marc.* iv., v. *passim*), Clement of Alexandria (cir. A. D. 200; *Strom.* iv. 6, § 41), and at a later time Ambrose (cir. A. D. 375; *De Spir. S.* iii. 10), accuse their opponents of this offense; but with one great exception the instances which are brought forward in support of the accusation generally resolve themselves into various readings, in which the decision cannot always be given in favor of the catholic disputant; and even where the unorthodox reading is certainly wrong it can be shown that it was widely spread among writers of different opinions (e. g. Matt. xi. 27, "nec Filium nisi Pater et cui voluerit Filius revelare:" John i. 13, ὁὶς — ἐγεννήθη). Willful interpolations or changes are extremely rare, if they exist at all (comp. Valent. ap. Iren. i. 4, 5, add. θεότρτες, Col. i. 16), except in the case of Marcion. His mode of dealing with the writings of the N. T., in which he was followed by his school, was, as Tertullian says, to use the knife rather than subtlety of interpretation. There can be no reasonable doubt that he dealt in the most arbitrary manner with whole books, and that he removed from the Gospel of St. Luke many passages which were opposed to his peculiar views. But when these fundamental changes were once made he seems to have adhered scrupulously to the text which he found. In the isolated readings which he is said to have altered, it happens not unfrequently that he has retained the right reading, and that his opponents are in error (Luke v. 14 om. τὸ δῶρον; Gal. ii. 5, οὐδ' οὐδέ; 2 Cor. iv. 5?). In very many cases the alleged corruption is a various reading, more or less supported by other authorities (Luke xii. 38, ἐσπερινῆ; 1 Cor. x. 9, Χριστόν; 1 Thess. ii. 15, add. ἰδιούς). And where the changes seem most arbitrary there is evidence to show that the interpolations were not wholly due to his school: Luke xviii. 19, ὁ πατήρ; xxiii. 2; 1 Cor. x. 19 (28), add. ἰερόθυτον. (Comp. Hahn, *Evangelium Marcionis*; Thilo, *Cod. Apoc.* i. 403-486; Ritschl, *Das Evang. Marc.* 1846; Volkmar, *Das Evang. Marc.*, Leipzig, 1852; but no examination of Marcion's text is completely satisfactory).

5. Several very important conclusions follow from this earliest appearance of textual criticism. It is in the first place evident that various readings existed in the books of the N. T. at a time prior to all extant authorities. History affords no trace of the pure Apostolic originals. Again, from the preservation of the first variations noticed, which are often extremely minute, in one or more of the primary documents still left, we may be certain that no important changes have been made in the sacred text which we cannot now detect. The materials for ascertaining the true reading are found to be complete when tested by the earliest witnesses. And yet further: from the minuteness of some of the variations which are urged in controversy, it is obvious that the words of the N. T. were watched with the most jealous care, and that the least differences of phrase were guarded with scrupulous

and faithful piety, to be used in after-time by that wide-reaching criticism which was foreign to the spirit of the first ages.<sup>a</sup>

6. Passing from these isolated quotations we find the first great witnesses to the Apostolic text in the early Syriac and Latin versions, and in the rich quotations of Clement of Alexandria († cir. A. D. 220) and Origen (A. D. 184-254). The versions will be treated of elsewhere, and with them the Latin quotations of the translator of Irenæus and of Tertullian. The Greek quotations in the remains of the original text of Irenæus and in Hippolytus are of great value, but yield in extent and importance to those of the two Alexandrine fathers. From the extant works of Origen alone no inconsiderable portion of the whole N. T., with the exception of St. James, 2 Peter, 2 and 3 John, and the Apocalypse, might be transcribed, and the recurrence of small variations in long passages proves that the quotations were accurately made and not simply from memory.

7. The evangelic text of Clement is far from pure. Two chief causes contributed especially to corrupt the text of the Gospels, the attempts to harmonize parallel narratives, and the influence of tradition. The former assumed a special importance from the *Diatessaron* of Tatian (cir. A. D. 170. Comp. *Hist. of N. T. Canon*, 358-362; Tischdf. on Matt. xxvii. 49)<sup>b</sup> and the latter, which was, as has been remarked, very great in the time of Justin M., still lingered.<sup>c</sup> The quotations of Clement suffer from both these disturbing forces (Matt. viii. 22, x. 30, xi. 27, xix. 24, xxiii. 27, xxv. 41, x. 26, omitted by Tischdf. [cf. Mark iv. 22 and the reading of Origen, *Opp.* iii. 235] Luke iii. 22), and he seems to have derived from his copies of the Gospels two sayings of the Lord which form no part of the canonical text. (Comp. Tischdf. on Matt. vi. 33; Luke xvi. 11.) Elsewhere his quotations are free, or a confused mixture of two narratives (Matt. v. 45, vi. 26, 32 f., xxii. 37; Mark xii. 43), but in innumerable places he has preserved the true reading (Matt. v. 4, 5, 42, 48, viii. 22, xi. 17, xiii. 25, xxiii. 26; Acts ii. 41, xvii. 26). His quotations from the Epistles are of the very highest value. In these tradition had no prevailing power, though Tatian is said to have altered in parts the language of the Epistles (Euseb. *H. E.* iv. 29); and the text was left comparatively free from corruptions. Against the few false readings which he supports (e. g. 1 Pet. ii. 3, Χριστός; Rom. iii. 26, Ἰησοῦν; viii. 11, διὰ τοῦ ἔνοικ. πν.) may be brought forward a long list of passages in which he combines with a few of the best authorities in upholding the true text (e. g. 1 Pet. ii. 2; Rom. ii. 17, x. 3, xv. 29; 1 Cor. ii. 13, vii. 3, 5, 35, 39, viii. 2, x. 24).

8. But Origen stands as far first of all the ante-Nicene fathers in critical authority as he does in commanding genius, and his writings are an almost inexhaustible storehouse for the history of the text. In many places it seems that the printed text of his works has been modernized; and till a new and thorough collation of the MSS. has been made, a doubt must remain whether his quotations have

<sup>a</sup> Irenæus notices two various readings of importance, in which he maintains the true text, Matt. i. 18, τοῦ δὲ χριστοῦ (ii. 16, 2), Apoc. xiii. 18 (v. 30, 1).

<sup>b</sup> The letter of Ptolemaeus (cir. A. D. 150) to Flora (Epiph. i. 216) contains some important early variations in the evangelic text.

<sup>b</sup> Jerome notices the result of this in his time in strong terms, *Prof. in Evang.*

<sup>c</sup> To what extent tradition might modify the current text is still clearly seen from the *Codex Bezae* and some Latin copies, which probably give a text dating in essence from the close of the 2d century.

not suffered by the hands of scribes, as the MSS. of the N. T. have suffered, though in a less degree. The testimony which Origen bears as to the corruption of the text of the Gospels in his time differs from the general statements which have been already noticed as being the deliberate judgment of a scholar and not the plea of a controversialist. "As the case stands," he says, "it is obvious that the difference between the copies is considerable, partly from the carelessness of individual scribes, partly from the wicked daring of some in correcting what is written, partly also from [the changes made by] those who add or remove what seems good to them in the process of correction" (Orig. *In Matt.* t. xv. § 14). In the case of the LXX., he adds, he removed or at least indicated those corruptions by a comparison of "editions" (ἐκδόσεις), and we may believe that he took equal care to ascertain, at least for his own use, the true text of the N. T., though he did not venture to arouse the prejudice of his contemporaries by openly revising it, as the old translation adds (*In Matt.* xv. *vet. int.* "in exemplaribus autem Novi Testamenti hoc ipsum me posse facere sine periculo non putavi"). Even in the form in which they have come down to us, the writings of Origen, as a whole, contain the noblest early memorial of the apostolic text. And, though there is no evidence that he published any recension of the text, yet it is not unlikely that he wrote out copies of the N. T. with his own hand (Redepenning, *Origenes*, ii. 184), which were spread widely in after time. Thus Jerome appeals to "the copies of Adamantius," i. e. Origen (*In Matt.* xxiv. 36; *Gal.* iii. 1), and the copy of Pamphilus can hardly have been other than a copy of Origen's text (Cod. H<sub>3</sub> Subscription, Inf. § 26). From Pamphilus the text passed to Eusebius and Enthalus, and it is scarcely rash to believe that it can be traced, though imperfectly, in existing MSS. as C L. (Comp. Griesbach, *Symb. Crit.* i. lxxvi. ff.; cxxx. ff.)

9. In thirteen cases (Norton, *Genuineness of the Gospels*, i. 234-236 [Add. Notes, pp. xcvi.-c., 2d Amer. ed.]) Origen has expressly noticed varieties of reading in the Gospels (*Matt.* viii. 28, xvi. 20, xviii. 1, xxi. 5, 9, 15, xxvii. 17; *Mark* iii. 18; *Luke* i. 46, ix. 48, xiv. 19, xxiii. 45; *John* i. 3, 4: 28).<sup>b</sup> In three of these passages the variations which he notices are no longer found in our Greek copies (*Matt.* xxi. 9 or 15, ὄκωφ for *vif*; Tregelles, *ad loc.*; *Mark* iii. 18 (ii. 14), Λεβην τὸν τοῦ Ἰησοῦ; (? [D with some Latin MSS. reads Λεββαῖον]); *Luke* i. 46, Ἐλισάβετ for *Μαριάμ*; so in some Latin copies); in seven our copies are still divided; in two (*Matt.* viii. 28, Γαδάρηων; *John* i. 28, Βηθαβαρά) the reading which was only found in a few MSS. is now widely spread: in the remaining place (*Matt.* xxvii. 17, Ἰησοῦν Βαραββᾶν) a few copies of no great age retain the interpolation which was found in his time "in very ancient copies." It is more remarkable that Origen asserts, in answer to Celsus, that our Lord is nowhere called "the carpenter" in the Gospels circulated in the churches, though this is undoubtedly the true reading in *Mark* vi. 3 (Orig. *c. Cels.* vi. 36).

10. The evangelic quotations of Origen are not wholly free from the admixture of traditional glosses

which have been noticed in Clement, and often present a confusion of parallel passages (*Matt.* v. 44, vi. (33), vii. 21 ff., xiii. 11, xxvi. 27 f.; 1 *Tim.* iv. 1); but there is little difficulty in separating his genuine text from these natural corruptions, and a few references are sufficient to indicate its extreme importance (*Matt.* iv. 10, vi. 13, xv. 8, 35; *Mark* i. 2, x. 29; *Luke* xxi. 19; *John* vii. 39; *Acts* x. 10; *Rom.* viii. 28).

11. In the Epistles Origen once notices a striking variation in *Heb.* ii. 9, χάρις θεοῦ for χάριτι θεοῦ, which is still attested; but, apart from the specific reference to variations, it is evident that he himself used MSS. at different times which varied in many details (Mill, *Prolegg.* § 687). Griesbach, who has investigated this fact with the greatest care (*Meletema* i. appended to *Comm. Crit.* ii. ix.-xl.), seems to have exaggerated the extent of these differences while he establishes their existence satisfactorily. There can be no doubt that in Origen's time the variations in the N. T. MSS., which we have seen to have existed from the earliest attainable date, and which Origen describes as considerable and wide-spread, were beginning to lead to the formation of specific groups of copies.

Though materials for the history of the text during the first three centuries are abundant, nothing has been written in detail on the subject since the time of Mill (*Prolegg.* 240 ff.) and R. Simon (*Histoire Critique*, 1685-93). What is wanted is nothing less than a complete collection at full length, from MS. authority, of all the ante-Nicene Greek quotations. These would form a centre round which the variations of the versions and Latin quotations might be grouped. A first step towards this has been made by Anger in his *Synopsis Evr. Matt. Marc., Luc.*, 1851. The Latin quotations are well given by Sabatier, *Bibliorum Sacrorum Latinae versiones antiquae*, 1751.

12. The most ancient MSS. and versions now extant exhibit the characteristic differences which have been found to exist in different parts of the works of Origen. These cannot have had their source later than the beginning of the third century, and probably were much earlier. In classical texts, where the MSS. are sufficiently numerous, it is generally possible to determine a very few primary sources, standing in definite relations to one another, from which the other copies can be shown to flow; and from these the scholar is able to discover one source of all. In the case of the N. T. the authorities for the text are infinitely more varied and extensive than elsewhere, and the question has been raised whether it may not be possible to distribute them in like manner and divine from later documents the earliest history of the text. Various answers have been made which are quite valueless as far as they profess to rest on historical evidence; and yet are all more or less interesting as explaining the true conditions of the problem. The chief facts, it must be noticed, are derived from later documents, but the question itself belongs to the last half of the second century.

Bengel was the first (1734) who pointed out the affinity of certain groups of MSS., which, as he remarks, must have arisen before the first versions were made (*Apparatus Criticus*, ed. Burk, p. 425).

<sup>a</sup> These words seem to refer to the professional corrector (διορθωτής).

<sup>b</sup> To these Mr. Hort (to whom the writer owes many

suggestions and corrections in this article) adds *Matt.* v. 22, from Cramer, *Cat. in Eph.* iv. 31, where Origen blames the insertion of εἰρή.

Originally he distinguished three families, of which the *Cod. Alex.* (A), the Græco-Latin MSS., and the mass of the more recent MSS. were respectively the types. At a later time (1737) he adopted the simpler division of "two nations," the Asiatic and the African. In the latter he included *Cod. Alex.*, the Græco-Latin MSS., the Æthiopic, Coptic [Memphitic], and Latin versions: the mass of the remaining authorities formed the Asiatic class. So far no attempt was made to trace the history of the groups, but the general agreement of the most ancient witnesses against the more recent, a fact which Bentley announced, was distinctly asserted, though Bengel was not prepared to accept the ancient reading as necessarily true. Semler contributed nothing of value to Bengel's theory, but made it more widely known (*Spicilegium Observationum*, etc., added to his edition of Wetstein's *Libelli ad Criticam atque Int. N. T.* 1766; *Apparatus*, etc., 1767). The honor of carefully determining the relations of critical authorities for the N. T. text belongs to Griesbach. This great scholar gave a summary of his theory in his *Historia Text. Gr. Epist. Paul.* (1777, *Opusc.* ii. 1-135) and in the preface to his first edition of the Greek Test. His earlier essay, *Dissert. Crit. de Codd. quat. Evang. Origenianis* (1771, *Opusc.* i.), is incomplete. According to Griesbach (*Nov. Test. Præf.* pp. lxx. ff.) two distinct recensions of the Gospels existed at the beginning of the third century: the *Alexandrine*, represented by B C L, 1, 13, 33, 69, 106, the Coptic, Æthiopic, Arm., and later Syrian versions, and the quotations of Clem. Alex., Origen, Eusebius, Cyril. Alex., Isid. Pelus.; and the *Western*, represented by D, and in part by 1, 13, 69, the ancient Latin version and Fathers, and sometimes by the Syriac and Arabic versions. *Cod. Alex.* was to be regarded as giving a more recent (Constantinopolitan) text in the Gospels. As to the origin of the variations in the text, Griesbach supposed that copies were at first derived from the separate autographs or imperfect collections of the apostolic books. These were gradually interpolated, especially as they were intended for private use, by glosses of various kinds, till at length authoritative editions of the collection of the Gospels and the letters (*εὐαγγέλιον ὁ ἀπόστολος, τὸ ἀποστολικόν*) were made. These gave in the main a pure text, and thus two classes of MSS. were afterwards current, those derived from the interpolated copies (*Western*), and those derived from the *εὐαγγέλιον* and *ἀποστολικόν* (Alexandrine, *Eastern*; *Opusc.* ii. 77-99; *Meletemata*, xlv.). At a later time Griesbach rejected these historical conjectures (*Nov. Test.* ed. 2, 1796; yet comp. *Meletem.* l. c.), and repeated with greater care and fullness, from his enlarged knowledge of the authorities, the threefold division which he had originally made (*N. T. i. Præf.* lxx-lxxvii. ed. Schulz). At the same time he recognized the existence of mixed and transitional texts; and when he characterized by a happy epigram (*grammaticum egit Alexandrinus censor, interpretem occidentalis*) the difference of the two ancient families, he frankly admitted that no existing document exhibited either "recension" in a pure form. His great merit was independent of the details of

his system: he established the existence of a group of ancient MSS. distinct from those which could be accused of Latinizing (Tregelles, *Horne*, p. 105).

13. The chief object of Griesbach in propounding his theory of recensions was to destroy the weight of mere numbers.<sup>a</sup> The critical result with him had far more interest than the historical process; and, apart from all consideration as to the origin of the variations, the facts which he pointed out are of permanent value. Others carried on the investigation from the point where he left it. Hug endeavored, with much ingenuity, to place the theory on a historical basis (*Einleitung in N. T.* 1st ed. 1808; 3d, 1826). According to him, the text of the N. T. fell into a state of considerable corruption during the second century. To this form he applied the term *κοινή ἔκδοσις* (*common edition*), which had been applied by Alexandrine critics to the unrevised text of Homer, and in later times to the unrevised text of the LXX. (i. 144). In the course of the third century this text, he supposed, underwent a threefold revision, by Hesychius in Egypt, by Lucian at Antioch, and by Origen in Palestine. So that our existing documents represent four classes: (1.) The *unrevised*, D, 1, 13, 69 in the Gospels; D<sub>2</sub> E<sub>2</sub> in the Acts; D<sub>2</sub> F<sub>2</sub> G<sub>2</sub> in the Pauline Epistles: the old Latin and Thebaic, and in part the Peshito Syriac; and the quotations of Clement and Origen. (2.) The Egyptian recension of Hesychius; B C L in Gospels; A B C 17 in the Pauline Epistles; A B C Acts and Catholic Epistles; A C in the Apocalypse: the Memphitic version; and the quotations of Cyril. Alex. and Athanasius. (3.) The Asiatic (Antioch-Constantinople) recension of Lucian; E F G H S V and the recent MSS. generally; the Gothic and Slavonic versions, and the quotations of Theophylact. (4.) The Palestinian recension of Origen (of the Gospels); A K M; the Philoxenian Syriac; the quotations of Theodoret and Chrysostom. But the slender external proof which Hug adduced in support of this system was, in the main, a mere misconception of what Jerome said of the labors of Hesychius and Lucian on the LXX. (*Præf. in Paralip.*; c. Ruff. ii. 27; and Ep. cvi. (135) § 2. The only other passages are *De Viris illustr.* cap. lxxvii. Lucianus, *Præf. in quat. Ev.*); the assumed recension of Origen rests on no historical evidence whatever. Yet the new analysis of the internal character of the documents was not without a valuable result. Hug showed that the line of demarcation between the Alexandrine and Western families of Griesbach was practically an imaginary one. Not only are the extreme types of the two classes connected by a series of intermediate links, but many of the quotations of Clement and Origen belong to the so-called Western text. Griesbach, in examining Hug's hypothesis, explained this phenomenon by showing that at various times Origen used MSS. of different types, and admitted that many Western readings are found in Alexandrine copies (*Meletem.* xlviii. comp. Laurence, *Remarks on the Systematic Classification of MSS.*, 1814).

14. Little remains to be said of later theories Eichhorn accepted the classification of Hug (*Ein-*

<sup>a</sup> This he states distinctly (*Symb. Crit.* i. cxli.). "Præcipuus vero recensionum in criseis sacre exercitio usus hic est, ut eorum auctoritate lectiones bonas, sed in paucis libris superstitibus defendamus adversus juniorum et vulgarium codicum innumerabilem pœne

turbam." Comp. *id.* ii. 624 n. The necessity of destroying this grand source of error was supreme, as may be seen not only from such canons as G. v. Maestricht (l. § 8, n.), but also from Wetstein's Rule xviii. "Lectis plurium codicum cæteris paribus preferendus est."

Leitung 1813-27). Matthæi, the bitter adversary of Griesbach, contented himself with asserting the paramount claims of the later copies against the more ancient, allowing so far their general difference (*Ueber die sog. Recensionen*, 1804; *N. T.* 1782-88). Scholz returning to a simpler arrangement divided the authorities into two classes, Alexandrine and Constantinopolitan (*N. T.* i. p. xv. ff.), and maintained the superior purity of the latter on the ground of their assumed unanimity. In practice he failed to carry out his principles; and the unanimity of the later copies has now been shown to be quite imaginary. Since the time of Scholz theories of recensions have found little favor. Lachmann, who accepted only ancient authorities, simply divided them into Eastern (Alexandrine) and Western. Tischendorf, with some reserve, proposes two great classes, each consisting of two pairs, the Alexandrine and Latin, the Asiatic and Byzantine. Tregelles, discarding all theories of recension as historic facts, insists on the general accordance of ancient authorities as giving an ancient text in contrast with the recent text of the more modern copies. At the same time he points out what we may suppose to be the "genealogy of the text." This he exhibits in the following form:—

D	N B Z	
	C L $\Xi$ 1 33	
	P Q T R	A
	X ( $\Delta$ ) 69	K M H
		E F G S U, etc. <sup>a</sup>

15. The fundamental error of the recension theories is the assumption either of an actual recension or of a pure text of one type, which was variously modified in later times, while the fact seems to be exactly the converse. Groups of copies spring not from the imperfect reproduction of the character of one typical exemplar, but from the multiplication of characteristic variations. They are the results of a tendency, and not of a fact. They advance towards and do not lead from that form of text which we regard as their standard. Individuals, as Origen, may have exercised an important influence at a particular time and place, but the silent and continual influence of circumstances was greater. A pure Alexandrine or Western text is simply a fiction. The tendency at Alexandria or Carthage was in a certain direction, and necessarily influenced the character of the current texts with accumulative force as far as it was unchecked by other influences. This is a general law, and the history of the apostolic books is no exception to it. The history of their text differs from that of other books chiefly in this, that, owing to the great multiplicity of testimony, typical copies are here represented by typical groups of copies, and the intermediate stages are occupied by mixed texts. But if we look beneath this complication general lines of change may be detected. All experience shows that certain types of variation propagate and perpetuate themselves, and existing documents prove that it was so with the copies of the N. T. Many of the links

in the genealogical table of our MSS. may be wanting, but the specific relations between the groups, and their comparative antiquity of origin, are clear. This antiquity is determined, not by the demonstration of the immediate dependence of particular copies upon one another, but by reference to a common standard. The secondary uncials (E S U etc.) are not derived from the earlier (B C A) by direct descent, but rather both are derived by different processes from one original. And here various considerations will assist the judgment of the critic. The accumulation of variations may be more or less rapid in certain directions. A disturbing force may act for a shorter time with greater intensity, or its effects may be slow and protracted. Corruptions may be obvious or subtle, the work of the ignorant copyist or of the rash scholar; they may lie upon the surface or they may penetrate into the fabric of the text. But on such points no general rules can be laid down. Here as elsewhere, there is an instinct or tact which discerns likenesses or relationships and refuses to be measured mechanically. It is enough to insist on the truth that the varieties in our documents are the result of slow and natural growth and not of violent change. They are due to the action of intelligible laws and rarely, if ever, to the caprice or imperfect judgment of individuals. They contain in themselves their history and their explanation.

16. From the consideration of the earliest history of the N. T. text we now pass to the era of MSS. The quotations of DIONYSIUS ALEX. (†A. D. 264), PETRUS ALEX. (†c. A. D. 312), METHIDIUS (†A. D. 311), and EUSEBIUS (†A. D. 340), confirm the prevalence of the ancient type of text; but the public establishment of Christianity in the Roman empire necessarily led to important changes. Not only were more copies of the N. T. required for public use (Comp. § 3), but the nominal or real adherence of the higher ranks to the Christian faith must have largely increased the demand for costly MSS. As a natural consequence the rude Hellenistic forms gave way before the current Greek, and at the same time it is reasonable to believe that smoother and fuller constructions were substituted for the rougher turns of the apostolic language. In this way the foundation of the Byzantine text was laid, and the same influence which thus began to work, continued uninterruptedly till the fall of the Eastern empire. Meanwhile the multiplication of copies in Africa and Syria was checked by Mohammedan conquests. The Greek language ceased to be current in the West. The progress of the Alexandrine and Occidental families of MSS. was thus checked; and the mass of recent copies necessarily represent the accumulated results of one tendency.

17. The appearance of the oldest MSS. has been already described. (§ 3.) The MSS. of the 4th century, of which *Cod. Vatican.* (B) may be taken as a type, present a close resemblance to these. The writing is in elegant continuous (capitals) uncials,<sup>b</sup> in three columns<sup>c</sup> without initial letters or *iota subscript*, or *ascrip.* A small interval serves

<sup>a</sup> "Those codices are placed together which appear to demand such an arrangement; and those which stand below others are such as show still more and more of the intermixture of modernized readings" (Tregelles, *Horne*, [vol. iv.] p. 106).

<sup>b</sup> Jerome describes the false taste of many in his time (c. A. D. 400) with regard to MSS. of the Bible: "Habeant qui volunt veteres libros, vel in membranis

purpureis auro argenteoque descriptos, vel uncialibus, ut vulgo aiunt, litteris onera magis exarata, quam codices: dummodo mihi melique permitat pauperes habere schedulas, et non tam puleros codices quam emendatos" (*Pref. in Joh.*, ix. 1004, ed. Migne).

<sup>c</sup> The Codex Sinaiticus (*Cod. Frid.* Aug.) has four columns; *Cod. Alex.* (A) two. Cf. Scrivener, *Intro-duction*, p. 25, n., for other examples

as a simple punctuation; and there are no accents or breathings by the hand of the first writer, though these have been added subsequently. *Uncial* writing continued in general use till the middle of the 10th century.<sup>a</sup> One uncial MS. (S), the earliest dated copy, bears the date 949; and for service books the same style was retained a century later. From the 11th century downwards *cursive* writing prevailed, but this passed through several forms sufficiently distinct to fix the date of a MS. with tolerable certainty. The earliest cursive Biblical MS. is dated 964 A. D. (Gosp. 14, Scrivener, *Introduction*, p. 36 note), though cursive writing was used a century before (A. D. 888, Scrivener, *l. c.*). The MSS. of the 14th and 15th centuries abound in the contractions which afterwards passed into the early printed books. The material as well as the writing of MSS. underwent successive changes. The oldest MSS. are written on the thinnest and finest vellum: in later copies the parchment is thick and coarse. Sometimes, as in *Cod. Cotton.* (N=J), the vellum is stained. Papyrus was very rarely used after the 9th century. In the 10th century cotton paper (*charta bombycina* or *Damascena*) was generally employed in Europe; and one example at least occurs of its use in the 9th century (*Tischdf. Not. Cod. Sin.* p. 54, quoted by Scrivener, *Introduction*, p. 21). In the 12th century the common linen or rag paper came into use; but paper was "seldom used for Biblical MSS. earlier than the 13th century, and had not entirely displaced parchment at the era of the invention of printing, c. A. D. 1450" (Scrivener, *Introduction*, p. 21). One other kind of material requires notice, redressed parchment (παλιμψηστος, *charta delictia*). Even at a very early period the original text of a parchment MS. was often erased, that the material might be used afresh (*Cic. ad Fam.* vii. 18; *Catull.* xxii.).<sup>b</sup> In lapse of time the original writing frequently reappears in faint lines below the later text, and in this way many precious fragments of Biblical MSS. which had been once obliterated for the transcription of other works have been recovered. Of these palimpsest MSS. the most famous are those noticed below under the letters C R Z Ξ. The earliest Biblical palimpsest is not older than the 5th century (Plate i. fig. 3).

18. In uncial MSS. the contractions are usually limited to a few very common forms (ΘC, IC, XC, KC, TC, ΠHP, ΔΑΔ, etc., *i. e.* θεός, Ἰησοῦς, [χριστός, κύριος, υἱός,] πατήρ, Δαεῖδ;

<sup>a</sup> A full and interesting account of the various changes in the uncial alphabet at different times is given by Scrivener, *Introduction*, pp. 27-36.

<sup>b</sup> This practice was condemned at the Quinisextine Council (A. D. 692), Can. 68; but the Commentary of Balsamon shows that in his time († A. D. 1204) the practice had not ceased: σημειῶσαι ταῦτα διὰ τοὺς βιβλιοκαπηλοὺς τοὺς ἀπαλείφοντας τὰς μεμβράνας τῶν βιβλίων γραφῶν. A Biblical fragment in the British Museum has been erased, and used *twice* afterwards for Syrian writing (*Add.* 17, 136. *Cod. N. Tischdf.*).

<sup>c</sup> As to the use of cursive MSS. in this respect of *ota* *ascrit* or *subscript*, Mr. Scrivener found that "of forty-three MSS. now in England, twelve have no vestige of either fashion, fifteen represent the *ascrit* use, nine the *subscript* exclusively, while the few that remain have both indifferently" (*Introduction*, p. 39). The earliest use of the *subscript* is in a MS. (71) dated 1160 (Scrivener, *l. c.*).

<sup>d</sup> Mr. Scrivener makes an exception in the case of the first four lines of each column of the Book of Gen-

comp. Scrivener, *Introduction*, p. 43). A few more occur in later uncial copies, in which there are also some examples of the *ascrit iota*, which occurs rarely in the *Codex Sinaiticus*.<sup>e</sup> Accents are not found in MSS. older than the 8th century.<sup>d</sup> Breathings and the apostrophus (*Tischdf. Proleg.* cxxxi., occur somewhat earlier. The oldest punctuation after the simple interval, is a stop like the modern Greek colon (in A C D), which is accompanied by an interval, proportioned in some cases to the length of the pause.<sup>e</sup> In E (Gosp.) and B<sup>2</sup> (*Apoc.*), which are MSS. of the 8th century, this point marks a full stop, a colon, or a comma, according as it is placed at the top, the middle, or the base of the letter (Scrivener, p. 42).<sup>f</sup> The present note of interrogation (;) came into use in the 9th century.

19. A very ingenious attempt was made to supply an effectual system of punctuation for public reading, by Euthalius, who published an arrangement of St. Paul's Epistles in clauses (στίχοι) in 458, and another of the Acts and Catholic Epistles in 490. The same arrangement was applied to the Gospels by some unknown hand, and probably at an earlier date. The method of subdivision was doubtless suggested by the mode in which the poetic books of the O. T. were written in the MSS. of the LXX. The great examples of this method of writing are D (Gospels), H<sub>2</sub> (Epp.), D<sub>2</sub> (Epp.). The *Cod. Laud.* (E<sub>2</sub> Acts) is not strictly stichometrical, but the parallel texts seem to be arranged to establish a verbal connection between the Latin and Greek (*Tregelles, Home*, 187). The στίχοι vary considerably in length, and thus the amount of vellum consumed was far more than in an ordinary MS., so that the fashion of writing in "clauses" soon passed away; but the numeration of the στίχοι in the several books was still preserved, and many MSS. (*e. g.* Δ Ep., K Gosp.) bear traces of having been copied from older texts thus arranged.<sup>g</sup>

20. The earliest extant division of the N. T. into sections occurs in *Cod. B.* This division is elsewhere found only in the palimpsest fragment of St. Luke, E. In the Acts and the Epistles there is a double division in B, one of which is by a later hand. The Epistles of St. Paul are treated as one unbroken book divided into 93 sections, in which the Epistle to the Hebrews originally stood between the Epistles to the Galatians and the Ephesians. This appears from the numbering of the sections, which the writer of the MS. preserved, though he

esis" in *Cod. A.* which, he says, is furnished with accents and breathings by the first hand (*Introduction*, p. 40). Dr. Tregelles, to whose kindness I am indebted for several remarks on this article, expressed to me his strong doubts as to the correctness of this assertion: and a very careful examination of the MS. leaves no question but that the accents and breathings were the work of the later scribe who accentuated the whole of the first three columns. There is a perceptible difference in the shade of the red pigment, which is decisively shown in the initial E.

<sup>e</sup> The division in John i. 3, 4, δ γέγονεν ἐν αὐτοῦ ζωῆ ἦν (cf. *Tregelles, ad loc.*), Rom. viii. 20 (Origen), ix. 5, shows the attention given to this question in the earliest times.

<sup>f</sup> Dr. Tregelles, whose acquaintance with ancient MSS. is not inferior to that of any scholar, expresses a doubt "whether this is at all uniformly the case."

<sup>g</sup> *Comp. Tischd. N. T. ed.* 1859, under the subscriptions to the several books. *Wetstein Prolegg.* pp. 100-102.

transposed the book to the place before the pastoral epistles.<sup>a</sup>

21. Two other divisions of the Gospels must be noticed. The first of these was a division into "chapters" (κεφάλαια, τίτλοι, *breves*), which correspond with distinct sections of the narrative, and are on an average a little more than twice as long as the sections in B. This division is found in A, C, R, Z, and must therefore have come into general use some time before the 5th century.<sup>b</sup> The other division was constructed with a view to a harmony of the Gospels. It owes its origin to Ammonius of Alexandria, a scholar of the 3d century, who constructed a Harmony of the Evangelists, taking St. Matthew as the basis round which he grouped the parallel passages from the other Gospels. Eusebius of Cæsarea completed his labor with great ingenuity, and constructed a notation and a series of tables, which indicate at a glance the parallels which exist to any passage in one or more of the other Gospels, and the passages which are peculiar to each. There seems every reason to believe that the sections as they stand at present, as well as the ten "Canons," which give a summary of the Harmony, are due to Eusebius, though the sections sometimes occur in MSS. without the corresponding Canons.<sup>c</sup> The Cod. Alex. (A), and the Coptic fragments (N), are the oldest MSS. which contain both in the original hand. The sections occur in the palimpsests C, R, Z, P, Q, and it is possible that the Canons may have been there originally, for the vermilion (κιννυβαρις, Euseb. *Ep. ad Carp.*), or paint with which they were marked, would entirely disappear in the process of preparing the parchment afresh.<sup>d</sup>

22. The division of the Acts and Epistles into chapters came into use at a later time. It does not occur in A or C, which give the Ammonian sections, and is commonly referred to Euthalius (Comp. § 19), who, however, says that he borrowed the divisions of the Pauline Epistles from an earlier father; and there is reason to believe that the division of the Acts and Catholic Epistles which he published was originally the work of Pamphilus the Martyr (Montfaucon, *Bibl. Coislin.* p. 78). The Apocalypse was divided into sections by Andreas of Cæsarea about A. D. 500. This division consisted of 24 λόγοι, each of which was subdivided into three "chapters" (κεφάλαια).<sup>e</sup>

23. The titles of the sacred books are from their nature additions to the original text. The distinct names of the Gospels imply a collection, and the titles of the Epistles are notes by the possessors and not addresses by the writers (Ἰωάννου α', β', etc.). In their earliest form they are quite simple, according to *Matthew*, etc. (κατὰ Ματθαῖον κ.τ.λ.); *To the Romans*, etc. (πρὸς Ῥωμαίους κ.τ.λ.); *First of Peter*, etc. (Πέτρου α'); *Acts of Apostles*, (πράξεις ἀποστόλων); *Apocalypse*. These headings were gradually amplified till they

assumed such forms as *The holy Gospel according to John*; *The first Catholic Epistle of the holy and all-praiseworthy Peter*; *The Apocalypse of the holy and most glorious Apostle and Evangelist, the beloved virgin who rested on the bosom of Jesus, John the Divine*. In the same way the original subscriptions (ὑπογραφαί), which were merely repetitions of the titles, gave way to vague traditions as to the dates, etc., of the books. Those appended to the Epistles, which have been translated in the A. V., are attributed to Euthalius, and their singular inaccuracy (Paley, *Horæ Paulinæ*, ch. xv.) is a valuable proof of the utter absence of historical criticism at the time when they could find currency.

24. Very few MSS. contain the whole N. T., "twenty-seven in all out of the vast mass of extant documents" (Scrivener, *Introduction*, p. 61). The MSS. of the Apocalypse are rare; and Chrysostom complained that in his time the Acts was very little known. Besides the MSS. of the N. T., or of parts of it, there are also Lectionaries, which contain extracts arranged for the Church-services. These were taken from the Gospels (εὐαγγελιστάρια), or from the Gospels and Acts (πραξιαστόλοι), or rarely from the Gospels and Epistles (ἀποστολοευαγγέλια). The calendars of the lessons (συναξάρια), are appended to very many MSS. of the N. T.; those for the saints'-day lessons, which varied very considerably in different times and places, were called *μυρολόγια* (Scholz, *N. T.* i. 453-493; Scrivener, 68-75).

25. When a MS. was completed it was commonly submitted, at least in early times, to a careful revision. Two terms occur in describing this process, ἁ αντιβάλλον and διορθωτής. It has been suggested that the work of the former answered to that of "the corrector of the press," while that of the latter was more critical (Tregelles, *Horne*, pp. 85, 86). Possibly, however, the words only describe two parts of the same work. Several MSS. still preserve a subscription which attests a revision by comparison with famous copies, though this attestation must have referred to the earlier exemplar (comp. Tischdf. *Jude subscript.*); but the Coislinian fragment (H<sup>3</sup>) may have been itself compared, according to the subscription, "with the copy in the library at Cæsarea, written by the hand of the holy Pamphilus." (Comp. Scrivener, *Introduction*, p. 47.) Besides this official correction at the time of transcription, MSS. were often corrected by different hands in later times. Thus Tischendorf distinguishes the work of two correctors in C, and of three chief correctors in D<sub>1</sub>. In later MSS. the corrections are often much more valuable than the original text, as in 67 (Epp.); and in the *Cod. Sinait.* the readings of one corrector (2 b) are frequently as valuable as those of the original text.<sup>f</sup>

(The work of Montfaucon still remains the classi-

<sup>a</sup> The oldest division is not found in 2 Pet. (ed. Vercell. p. 125). (Mr. Hort.) It is found in Jc. 1e; 2, 3 John.

<sup>b</sup> The κεφάλαια do not begin with the beginning of the books (Griesbach, *Comm. Crit.* ii. 49). This is important in reference to the objections raised against Matt. i.

<sup>c</sup> These very useful canons and sections are printed in the Oxford Text (Lloyd in Tischendorf (1859), and the notation is very easily mastered. A more complete arrangement of the canons, giving the order of the

sections in each Evangelist, originally drawn up by Dr. Tregelles, is found in Dr. Wordsworth's *Gk. Test.* vol. i.

<sup>d</sup> A comparative table of the ancient and modern divisions of the N. T. is given by Scrivener (*Introduction*, p. 58).

<sup>e</sup> For the later division of the Bible into our present chapters and verses, see *BIBLE*, i. 307, 308.

<sup>f</sup> Examples of the attestation and signature of MSS. with a list of the names of scribes, are given by Montfaucon (*Palæographia*, pp. 39-108).

sal authority on Greek Palaeography (*Palaeographia Græca*, Paris, 1708), though much has been discovered since his time which modifies some of his statements. The plates in the magnificent work of Silvestre and Champollion (*Paléographie Universelle*, Paris, 1841, *Eng. Trans.* by Sir F. Madden, London, 1850) give a splendid and fairly accurate series of facsimiles of Greek MSS. (Plates, liv.-xciv.). Tischendorf announces a new work on Palaeography (*N. T. Prof.* exxxiii.), and this, if published, will probably leave nothing to be desired in the Biblical branch of the study.

26.<sup>a</sup> The number of uncial MSS. remaining, though great when compared with the ancient MSS. extant of other writings, is inconsiderable.<sup>b</sup> Tischendorf (*N. T. Prof.* cxxx.) reckons 40 in the Gospels, of which 5 are entire, B K M S U; 3 nearly entire, E L Δ; 10 contain very considerable portions, A C D F G H V X Γ A; of the remainder 14 contain very small fragments, 8 fragments more (I P Q R Z) or less considerable (N T Y). To these must be added Σ (*Cod. Sinait.*), which is entire; Ξ (?) [Π] a new MS. of Tischendorf (*Not. Cod. Sin.* pp. 51, 52), which is nearly entire; and Ζ (*Cod. Zacynth.*), which contains considerable fragments of St. Luke. Tischendorf has likewise obtained 6 [9] additional fragments (*l. c.*). In the Acts there are 9 (10 [12] with Σ [G<sub>2</sub> P<sub>2</sub>]), of which 4 contain the text entire (Σ A B), or nearly (E<sub>2</sub>) so; 4 [5] have large fragments, (C D H<sub>2</sub> G<sub>2</sub> = I<sub>2</sub> [P<sub>2</sub>]); 2 [3] small fragments. In the Catholic Epistles 5 [7] of which 4 [5, Σ] A B K<sub>2</sub> G<sub>2</sub> = I<sub>2</sub> are entire; 1 [2] (C [P<sub>2</sub>]) nearly entire. In the Pauline Epistles there are 14 [18, Σ entire;] 2 [3] nearly entire, D<sub>2</sub> I<sub>2</sub> [P<sub>2</sub>]; 7 have very considerable portions, A B C E<sub>2</sub> F<sub>2</sub> G<sub>2</sub> K<sub>2</sub> (but E<sub>2</sub> should not be reckoned); the remaining 5 [7] some fragments. In the Apocalypse 3 [5], 2 [3] entire ((Σ) A B<sub>2</sub>), 2 nearly entire (C [P<sub>2</sub>]).

27. According to date these MSS. are classed as follows:—

• Fourth century. Σ B.

Fifth century. A C, and some fragments including [I<sup>1</sup>, 2<sup>3</sup>, I<sup>b</sup>] Q [Q<sub>2</sub>] T<sub>a</sub>.

Sixth century. D P R Z, E<sub>2</sub>, D<sub>2</sub> H<sub>2</sub>, and 4 [9] smaller fragments.

Seventh century. Some fragments including Θ, [F<sup>a</sup>, and G<sub>2</sub>].

Eighth century. E L Δ [? 9th cent.] Ξ, B<sub>2</sub> and some fragments.

Ninth century. F K M X [V Γ A Π] Δ, H<sub>2</sub> G<sub>2</sub> = I<sub>2</sub> [P<sub>2</sub>], F<sub>2</sub> G<sub>2</sub> K<sub>2</sub> M<sub>2</sub> and fragments.

Tenth century. G H S U, (E<sub>3</sub>).

28. A complete description of these MSS. is given in the great critical editions of the N. T.: ere those only can be briefly noticed which are of primary importance, the first place being given to

the latest discovered and most complete *Codex Sinaiticus*.

A (i). Primary Uncials of the Gospels.

Σ (*Codex Sinaiticus* = *Cod. Frid. Aug. of LXX.*), at St. Petersburg, obtained by Tischendorf from the convent of St. Catherine, Mount Sinai, in 1859. The fragments of LXX. published as *Cod. Frid. Aug.* (1846), were obtained at the same place by Tischendorf in 1844. The N. T. is entire, and the Epistle of Barnabas and parts of the Shepherd of Hermas are added. The whole MS. is to be published in 1862 by Tischendorf at the expense of the Emperor of Russia. It is probably the oldest of the MSS. of the N. T., and of the 4th century (Tischdf. *Not. Cod. Sin.* 1860).

\* The MS. was published at St. Petersburg in 1862 in magnificent style, in 4 vols. folio, with the title: "*Bibliorum Codex Sinaiticus Petropolitanius . . . editi C. Tischendorf*," the edition being limited to about 300 copies. It was printed with type cast for the purpose so as to resemble the characters of the MS., which it represents line for line with the greatest attainable accuracy. The first vol. contains Prolegomena, notes on the alterations made at different times by many correctors, and 21 pages of facsimiles, the first 19 representing different parts of the MS., and the remaining 2 containing facsimiles of the writing of 36 MSS. of great palaeographical interest, illustrating the changes in the style of writing from the first century (papyri) to the seventh. In 1863 a comparatively cheap edition of the N. T. part of the MS. was published by Tischendorf at Leipsic, in ordinary type, with enlarged Prolegomena and some corrections (*Novum Testamentum Sinaiticum*, etc., 4to). The Rev. F. H. Scrivener published in 1864 *A Full Collation of the Codex Sinaiticus with the Received Text of the N. T.* (rather, Stephens' ed. of 1550), to which is prefixed a *Critical Introduction*; the same collation also appeared in a new edition of Wordsworth's *Greek Testament*, for which it was originally made. In 1865 Tischendorf issued a new edition of the N. T. portion of the MS. (*N. T. Græce ex Sinaitico Codice*, 8vo), noting in the margin the alterations of later correctors, as also the various readings of the Vat. MS. (B) so far as they were then known, and of the Elzevir or Received Text, with a valuable Introduction of 83 pages, in which (pp. xliii. - xlix.) he gives a list of errata in Scrivener's generally accurate collation. A.

A (*Codex Alexandrinus*, Brit. Mus.), a MS. of the entire Greek Bible, with the Epistles of Clement added. It was given by Cyril Lucar, patriarch of Constantinople, to Charles I. in 1628, and is now in the British Museum. It contains the whole of the N. T. with some chasms: Matt. i. - xxv. 6, ἐξέρχου; John vi. 50, ἴνα - viii. 52, λέγει; 2 Cor. iv. 13, ἐπίστευσα - xii. 6, ἐξ ἐμοῦ. It was probably written in the first half of the 5th century. The N. T. has been published by Woide (fol. 1786), and with some corrections by Cowper

<sup>a</sup> \* In supplementing the account of the MSS. in this and the following sections much use has been made of Tischendorf's art. *Bibeltext des N. Testaments in Herzog's Real-Encycl.* xix. pp. 187-195 (1865).

A.

<sup>b</sup> Since the time of Wetstein the uncial MSS. have been marked by capital letters, the cursives by num-

bers (and later by small letters). In consequence of the confusion which arises from applying the same letter to different MSS., I have distinguished the different MSS. by the notation M<sub>1</sub>, M<sub>2</sub>, M<sub>3</sub>, [H, H<sub>2</sub>, H<sub>3</sub> - there is no M<sub>5</sub>], retaining the asterisk (as originally used) to mark the first, etc., hands.

(8vo. 1860).<sup>a</sup> Comp. Wetstein, *Prolegg.* pp. 13-30 (ed. Lotze). (Plate i. fig. 2.)

B (*Codex Vaticanus*, 1209), a MS. of the entire Greek Bible, which seems to have been in the Vatican Library almost from its commencement (c. A. D. 1450). It contains the N. T. entire to Heb. ix. 14, *καθα*: the rest of the Epistle to the Hebrews, the Pastoral Epistles, and the Apocalypse were added in the 15th century. Various collations of the N. T. were made by Bartolucci (1669), by Mico for Bentley (c. 1720), whose collation was in part revised by Rulotta (1726), and by Birch (1788). An edition of the whole MS., on which Mai had been engaged for many years, was published three years after his death, in 1857 (5 voll. 4to, ed. Vercellone; N. T. reprinted Lond. and Leipsic). Mai had himself kept back the edition (printed 1828-1838), being fully conscious of its imperfections, and had prepared another edition of the N. T., which was published also by Vercellone in 1859 (8vo.). The errors in this are less numerous than in the former collation; but the literal text of B is still required by scholars. The MS. is assigned to the 4th century (Tischdf. *N. T.* cxxvii.-cxlx.).

\* In 1867 Tischendorf published at Leipsic *Test. Nov. Vaticanum, post Ang. Maii aliorumque imperfectos Labores, etc.*, 4to, and also *Appendix Codd. Sin. Vat. Alex. cum Imitatione ipsorum antiqua Mamm. Scriptorum*, fol. Though allowed to examine the Vatican MS. but 42 hours, he spent the time so well that he was able to determine the true reading in all cases of discrepancy between different collators, and to correct the text as given by Card. Mai in more than 400 places. In 1868 a splendid edition of the N. T. portion of the Vat. MS. and also of Cod. B of the Apocalypse was published at Rome, by authority of the Pope, under the editorship of Vercellone and Cozza. This is printed with type cast from the same font that was made for the Codex Sinaiticus, and in the style of Tischendorf's edition of that MS.; the Old Testament is to follow in 4 vols., and a volume of Prolegomena and Notes will complete the long desired work. Though not immaculate, it appears to be executed with great care. Since its appearance, Tischendorf has published at Leipsic an *Appendix N. T. Vaticanani*, containing the text of MS. B of the Apocalypse and corrections of his *N. T. Vat.* from the recent Roman edition, together with a criticism on that edition, in which he points out some defects and oversights. A.

Ü (*Codex Ephraemi rescriptus*, Paris, *Bibl. Imp.* 9), a palimpsest MS. which contains fragments of the LXX. and of every part of the N. T. In the 12th century the original writing was effaced

and some Greek writings of Ephraem Syrus were written over it. The MS. was brought to Florence from the East at the beginning of the 16th century, and came thence to Paris with Catherine de Médicis. Wetstein was engaged to collate it for Bentley (1716), but it was first fully examined by Tischendorf, who published the N. T. in 1843: the O. T. fragments in 1845. The only entire books which have perished are 2 Thess. and 2 John, but lacunæ of greater or less extent occur constantly. It is of about the same date as *Cod. Alex.*

D (*Codex Bezae*, Univ. Libr. Cambridge), a Græco-Latin MS. of the Gospels and Acts, with a small fragment of 3 John, presented to the University of Cambridge by Beza in 1581. Some readings from it were obtained in Italy for Stephens' edition; but afterwards Beza found it at the sack of Lyons in 1562 in the monastery of St. Irenæus. The text is very remarkable, and, especially in the Acts, abounds in singular interpolations. The MS. has many lacunæ. It was edited in a splendid form by Kipling (1793, 2 vols. fol.), and no complete collation has been since made; but arrangements have lately been (1861) made for a new edition under the care of the Rev. F. H. Scrivener. The MS. is referred to the 6th century. Cf. Credner, *Beiträge*, i. 452-518; Bornemann, *Acta Apostolorum*, 1848; Schulz, *De Codice D. Cantab.* 1827.<sup>b</sup>

\* Scrivener's edition of the *Codex Bezae* was published at Cambridge in 1864, 4to. It appears to be executed with great care and thoroughness.

L (*Paris. Cod. Imp.* p. 62), one of the most important of the late uncial MSS. It contains the four Gospels, with the exception of Matt. iv. 22-v. 14, xviii. 17-20; Mark x. 16-20, xv. 2-20; John xxi. 15-25. The text agrees in a remarkable manner with B and Origen. It has been published by Tischendorf, *Monumenta Sacra Inedita*, 1846. Cf. Griesbach, *Symb. Crit.* i. pp. lxxvi.-cxl. It is of the 8th century.

R (*Brit. Mus. Add.* 17,211), a very valuable palimpsest, brought to England in 1847 from the convent of St. Mary Deipara in the Nitrian desert. The original text is covered by Syrian writing of the 9th or 10th century. About 585 verses of St. Luke were deciphered by Tregelles in 1854, and by Tischendorf in 1855. The latter has published them in his *Mon. Sacra Inedita, Nova Coll.*, vol. i. 1857. It is assigned to the 6th century. (Plate i. fig. 3.)

X (*Codex Monacensis*), in the University Library at Munich. Collated by Tischendorf and Tregelles. Of the [9th or] 10th century.

Z (*Cod. Dublinensis rescriptus*, in the Library

<sup>a</sup> It is much to be regretted that the editor has followed the bad example of Card. Mai in introducing modern punctuation, breathings, and accents, which are by no means always indifferent (e. g. Luke vii. 12), *αὐτῆ* χίρα is given without note, where probably the MS. represents *αὐτῆ* (or *αὐτῆ*) χίρα. It is scarcely less unfortunate that he has not always given the original punctuation, however absurd it may appear, and the few contractions which occur in the MS. With these drawbacks, the text seems to be given on the whole accurately.

<sup>b</sup> An edition of four great texts of the Gospels A, B, C, D) is at present (1861) in preparation at Oxford by the Rev. E. H. Hansell. The Greek text of D has been influenced in orthography by the Latin; e. g.

Σαμαριτάνων, λέπρωσος, φλαγγελλώσας (Wetstein, *Prolegg.* p. 40): but the charge of more serious alterations from this source cannot be maintained.

\* The work of Mr. Hansell, referred to above, was published at Oxford in 1864, in 3 vols. 8vo., with the title: *Nov. Test. Græce Antiquissimorum Codd. Textus in Ordine parallelo dispositi Accedit Collatio Cod. Sinaitici*. It gives, in such a manner that they can be compared at one view, the readings of A B C D Z, and also those of E<sub>2</sub> in the Acts and D<sub>2</sub> in the Epistles. But the editor does not seem to have been altogether competent for his task (see Tischendorf's *N. T. Gr. ex Sin. Cod.* v. li., note), and the readings of both B and D have since been published far more completely and accurately

of Trin. Coll. Dublin), a palimpsest containing large portions of St. Matthew. It was edited by Barrett (1801); and Tregelles has since (1853) re-examined the MS. and deciphered all that was left undetermined before (*History of Printed Text*, pp. 166-169). It is assigned to the 6th century.

Δ (*Codex Sangallensis*), a MS. of the Gospels, with an interlinear Latin translation, in the Library of St. Gall. It once formed part of the same volume with G<sup>3</sup>. Published in lithographed facsimile by Lettig (Zurich, 1836). [9th cent.]

Ξ (*Codex Zacynthius*), a palimpsest in possession of the Bible Society, London, containing important fragments of St. Luke. It is probably of the 8th century, and is accompanied by a *Catena*. The later writing is a Greek Lectionary of the 13th century. It has been transcribed and published by Tregelles (London, 1861).

The following are important fragments:—

\* Fa (*Cod. Coislin.*, Paris). A few fragments of the Gospels, Acts, and Pauline Epistles. 7th cent. A.

I (Tischendorf), various fragments of the Gospels (Acts, Pauline Epistles), some of great value, published by Tischendorf, *Monum. Sacr. Nova Coll.* vol. i. 1855. [5th, 6th, and 7th cent.]

\* Ib is now used by Tischendorf to denote the MS. described below under Nb. A.

N (*Cod. Cotton.*), (formerly J N), twelve leaves of purple vellum, the writing being in silver. Four leaves are in Brit. Mus. (Cotton. C. xv.). Published by Tischendorf, *Mon. Sacr. ined.*, 1846. Sæc. vi.

\* 33 additional leaves of this MS., containing fragments of the Gospel of Mark, have been recently found at Patmos, and are used in Tischendorf's 8th critical edition of the N. T. A.

Nb (Brit. Mus. *Add.* 17, 136), a palimpsest. Deciphered by Tregelles and Tischendorf, and published by the latter: *Mon. Sacr. ined. Nova Coll.*, vol. ii. Sæc. iv., v. [This MS. is now designated by Tischendorf as Ib. — A.]

\* O denotes fragments of the Gospel of John at Moscow (Matthæi, No. 15). 9th cent. A.

\* Oabedef denote the hymns in Luke i. as found in uncial MSS. of the Psalms in various libraries. O<sup>a</sup>, 6th cent.; O<sup>d</sup>, 7th; O<sup>bef</sup>, 9th. A.

P Q (*Codd. Guelpherbytanii*, Wolfenbüttel), two palimpsests, respectively of the 6th and 5th centuries. Published by Knittel, 1762, and P [Q rather] again, more completely, by Tischendorf, *Mon. Sacr. ined.* iii. 1860, who has Q [P rather] ready for publication.

T (*Cod. Borgianus*, Propaganda at Rome), of the 5th century. The fragments of St. John, edited by Giorgi (1789); those of St. Luke, collated by B. H. Alford (1859). Other fragments were published by Woide. (Tischd. *N. T. Proleg.* clxvii.)

\* T<sup>b</sup> denotes fragments of John, and T<sup>c</sup> of Matthew, similar to the above, the former at St. Petersburg (Imp. Lib.), the latter belonging to the Russian bishop Porfirii. 6th cent. T<sup>d</sup> denotes fragments of Matt., Mark, and John, from Borgian MSS. of the 7th cent. A.

Y (*Cod. Barberini*, 225, Rome). Sæc. viii. Edited by Tischendorf, *Mon. Sacr. ined.* 1846.

Ϟ<sup>a</sup> (*Cod. Tischendorf.* i., Leipzig). Sæc. vii. Edited by Tischendorf in *Mon. Sacr. ined.* 1846.

\* Ϟbdefgh are fragments at St. Petersburg,

ranging from the 6th to the 9th cent. Of these Ϟ<sup>ac</sup> are the most valuable. A.

(ii.) The Secondary Uncials are in the Gospels:—

E (*Baileensis*, K. iv. 35, Basle). Collated by Tischendorf, Mueller, Tregelles. Sæc. viii.

F (*Rheno-Trajectinus*. Utrecht, formerly Bo reeli). Coll. by Heringa, Traj. 1843. Sæc. ix.

G (Brit. Mus. Harl. 5684). Coll. by Tregelles and Tischendorf. Sæc. ix., x.

H (*Hamburgensis*, Seidelii). Coll. by Tregelles, 1850. Sæc. ix. [vel x.].

K (*Cod. Cyprius*, Paris, Bibl. Imp. 63). Coll. by Tregelles and Tischendorf. Sæc. ix.

M (*Cod. Campianus*, Paris, Bibl. Imp. 48). Coll. by Tregelles, and transcribed by Tischendorf. Sæc. x. [ix. Tisch.]

S (*Vaticanus*, 354). Coll. by Birch. Sæc. x.

U (*Cod. Naniusianus*, Venice). Coll. by Tregelles and Tischendorf. Sæc. x.

V (*Mosquensis*). Coll. by Matthæi. Sæc. ix.

\* Wabed denote fragments of the 8th and 9th centuries at Paris, Naples, St. Gall, and the Library of Trinity College, Cambridge, respectively. A.

Γ (*Bodleianus*). Sæc. ix. Cf. Tischd<sup>f</sup>, *N. T.* p. clxxiii. Coll. by Tischendorf and Tregelles. Fresh portions of this MS. have lately been taken by Tischendorf to St. Petersburg.

Α. Cod. Tischendorf iii. (*Bodleian*). Sæc. viii. ix. Coll. by Tischendorf and Tregelles. [9th cent., Tisch.]

[Π, not] Ϟ (St. Petersburg). Sæc. viii. ix. (?) A new MS. as yet uncollated.

\* This MS., containing the Gospels nearly complete, was procured by Tischendorf at Smyrna. Its readings are given in his 8th ed. of the Greek N. T. A.

B (i.). Primary Uncials of the Acts and Catholic Epistles.

Σ A B C D.

E<sub>2</sub> (*Codex Laudianus*, 35), a Græco-Latin MS. of the Acts, probably brought to England by Theodore of Tarsus, 668, and used by Bede. It was given to the University of Oxford by Archbishop Laud in 1636. Published by Hearne, 1715; but a new edition has been lately undertaken (1861) by Scrivener, and is certainly required. [Another edition is promised by Tischendorf.] Sæc. vi., vii.

\* Fa. A few fragments of the Acts, 7th cent. A.

\* I (St. Petersburg). 3 fragments, one, Acts xxviii. 8-17, of the 5th cent.; the others 7th cent. A.

(ii.) The Secondary Uncials are—

G<sub>2</sub>=L<sub>2</sub> (*Cod. Angelicus* (Passionei) Rome). Coll. by Tischd<sup>f</sup> and Treg. Sæc. ix.

\* G<sub>2</sub> is now used by Tischendorf to denote a leaf of the 7th cent. brought by him in 1859 to St. Petersburg, containing Acts ii. 45-iii. 8. A.

H<sub>2</sub> (*Cod. Mutinensis*, Modena), of the Acts. Coll. by Tischd<sup>f</sup> and Treg. Sæc. ix.

K<sub>2</sub> (*Mosquensis*), of the Catholic Epistles. Coll. by Matthæi. Sæc. ix.

\* L<sub>2</sub>. Formerly G<sub>2</sub>; see above. A.

\* P<sub>2</sub>, an important palimpsest of the 9th cent. belonging to the library of the bishop Porfirii Uspenski in St. Petersburg, containing the principal part of the Acts, the Catholic and Pauline Epistles, and the Apocalypse. In the Acts and 1 Peter its

text agrees with that of the later uncials, but in the remainder of the N. T., particularly in the Apocalypse, it is greatly superior to them. It was published in 1865 (Epistles) and 1869 (Acts and Rev.) in vols. v. and vi. of Tischendorf's *Monum. Sacra ined.*, *Nova Collectio*. A.

C (i.). Primary Uncials of the Pauline Epistles:—

N A B C.

D<sub>2</sub> (*Codex Cluvmontanus*, i. e. from Clermont, near Beauvais, Paris, Bibl. Imp. 107), a Græco-Latin MS. of the Pauline Epistles, once (like D) in the possession of Beza. It passed to the Royal Library at Paris in 1707, where it has since remained. Wetstein collated it carefully, and, in 1852, it was published by Tischendorf, who had been engaged on it as early as 1840. The MS. was independently examined by Tregelles, who communicated the results of his collation to Tischendorf, and by their combined labors the original text, which has been altered by numerous correctors, has been completely ascertained. The MS. is entire except Rom. i. 1-7. The passages Rom. i. 27-30 (in Latin, i. 24-27) were added at the close of the 6th century, and 1 Cor. xiv. 13-22 by another ancient hand. The MS. is of the middle of the 6th century. Cf. Griesbach, *Symb. Crit.* ii. 31-77.

F<sub>2</sub> (*Codex Augiensis*, Coll. SS. Trin. Cant. B, 17, 1), a Græco-Latin MS. of St. Paul's Epistles, bought by Bentley from the Monastery of Reichenau (Augia Major) in 1718, and left to Trin. Coll. by his nephew in 1786. This and the *Cod. Boernerianus* (G<sub>3</sub>) were certainly derived from the same Greek original. The Greek of the Ep. to the Hebrews is wanting in both, and they have four common lacunæ in the Greek text: 1 Cor. iii. 8-16, vi. 7-14; Col. ii. 1-8; Philem. 21-25. Both likewise have a vacant space between 2 Tim. ii. 4 and 5. The Latin version is complete from the beginning of the MS. Rom. iii. 19, *μὴ λέγει, dicit*. The MS. has been admirably edited by F. H. Scrivener, Camb. 1859. It is assigned to the 9th century. The Latin version is of singular interest; it is closer to the best Hieronymian text than that in G<sub>3</sub>, especially when the Greek text is wanting (Scrivener, *Cod. Aug.* xxviii.), but has many peculiar readings and many in common with G<sub>3</sub>.

G<sub>3</sub> (*Codex Boernerianus*, Dresden), a Græco-Latin MS., which originally formed a part of the same volume with Δ. It was derived from the same Greek original as F<sub>2</sub>, which was written continuously, but the Latin version in the two MSS. is widely different.<sup>a</sup> Δ and G<sub>2</sub> seem to have been written by an Irish scribe in Switzerland (St. Gall) in the 9th century. The Greek with the *interlinear* Latin version was carefully edited by Matthæi, 1791. Scrivener has given the variations from F<sub>2</sub> in his edition of that MS.

\* P<sub>2</sub>. For this important palimpsest, see above under B (ii.) A.

The following fragments are of great value:—

\* Fa. A few fragments of the 7th cent. A.

\* I (St. Petersburg), 2 leaves, 1 Cor. xv. 53—vi. 9, Tit. i. 1-13, 5th cent. A.

<sup>a</sup> At the end of the lacuna after Philemon 20 G<sub>3</sub> adds,

*ad laudicenses incipit epistola  
προς λαουδακηνσας αρχεται επιστολη;*

but the form of the Greek name shows almost con-

H<sub>3</sub> (*Codex Coislinianus*, Paris, Bibl. Imp. 202), part of a stichometrical MS. of the 6th century, consisting of twelve leaves: two more are at St. Petersburg. Edited by Montfaucon, *Bibl. Coislin.* 251-61; and again transcribed and prepared for the press by Tischendorf. It was compared, according to the subscription (Tischdf. *N. T.* p. clxxxix.), with the autograph of Pamphilus at Cæsarea.

\* Two more leaves at Moscow, marked N<sup>c</sup> by Tischendorf *N. T.* ed. vii., belong to this MS., and there is another in the possession of the Russian bishop Porfiri Uspenski at St. Petersburg. A.

M<sub>2</sub> (Hamburg; London), containing Heb. i. 1-iv. 3; xii. 20-end, and 1 Cor. xv. 52-2 Cor. i. 15; 2 Cor. x. 13-xii. 5, written in bright red ink in the 10th [9th, Tisch.] century. The Hamburg fragments were collated by Tregelles: all were published by Tischendorf, *Anecd. Sacr. et Prof.* 1855 [new ed., with corrections, 1861].

\* O<sub>2</sub> (St. Petersburg). Fragments of the 6th cent., containing 2 Cor. i. 20—ii. 12. A.

\* Q<sub>2</sub> (St. Petersburg, Porfiri). Fragments of a papyrus MS. of the 5th century. A.

(ii.). The Secondary Uncials are:—

K<sub>2</sub>, L<sub>2</sub> [formerly J].

E<sub>2</sub> (*Cod. Sangermanensis*, St. Petersburg), a Græco-Latin MS., of which the Greek text was badly copied from D<sub>2</sub> after it had been thrice corrected, and is of no value. The Latin text is of some slight value, but has not been well examined Griesbach, *Symb. Crit.* ii. 77-85.

\* N<sub>2</sub> (St. Petersburg). Fragments of the 9th cent., from Heb. v., vi., and Gal. v., vi. A.

D (i.) The Primary Uncials of the Apocalypse.

N A C.

(ii.) The Secondary Uncial is—

B<sub>2</sub> (*Codex Vaticanus*) (Basilianus), 2066). Edited (rather imperfectly) by Tischendorf, *Mon. Sacr.* 1846, and by Mai in his edition of B. Tischendorf gives a collation of the differences, *N. T. Præf.* cxlii.-liii. [Tregelles proposes to call this MS. L.]

\* This MS. was accurately published at Rome in 1868 by Vercellone and Cozza in connection with their edition of the N. T. portion of the Vat. MS., and from their edition by Tischendorf in his *Appendix N. T. Vaticani*, 1869. A.

\* P<sub>2</sub>. See above under B (ii.) The text of this palimpsest in the Apocalypse is more valuable than that of B. It has just been published by Tischendorf (1869). A.

29. The number of the cursive MSS. (*minus-cules*) in existence cannot be accurately calculated. Tischendorf catalogues about 500 of the Gospels, 200 of the Acts and Catholic Epistles, 250 of the Pauline Epistles, and a little less than 100 of the Apocalypse (exclusive of lectionaries); but this enumeration can only be accepted as a rough approximation. Many of the MSS. quoted are only known by old references; still more have been "inspected" most cursorily; a few only have been thoroughly collated. In this last work the Rev.

clusively that the Greek words are only a translation of the Latin title which the scribe found in his Latin MS., in which, as in many others, the apocryphal epistle to the Laodiceans was found.

F. H. Scrivener (*Collation of about 20 MSS. of the Holy Gospels*, Camb. 1853; *Cod. Aug.*, etc., Camb. 1859) has labored with the greatest success, and removed many common errors as to the character of the later text.<sup>a</sup> Among the MSS. which are well known and of great value the following are the most important:—

- A. Primary Cursives of the Gospels.
    - 1 (Act. i.; Paul. i.; *Basileensis*, K. iii. 3). Sæc. x. Very valuable in the Gospels. Coll. by Roth and Tregelles.
    - 33 (Act. 13; Paul. 17; Paris, Bibl. Imp. 14). Sæc. xi. Coll. by Tregelles.
    - 59 (Coll. Govn. et Cai. Cambr.). Sæc. xii. Coll. by Scrivener, 1860, but as yet unpublished.
    - 69 (Act. 31; Paul. 37; Apoc. 14; *Cod. Leicestrensis*). Sæc. xiv. The text of the Gospels is especially valuable. Coll. by Treg. 1852, and by Scriv. 1855, who published his collation in *Cod. Aug.* etc., 1859.
    - 118 (Bodleian. Miscell. 13; Marsh i. 24). Sæc. xiii. Coll. by Griesbach, *Symb. Crit.*, p. ccii. ff.
    - 124 (Cæsar. Vindob. Nessel. 188). Sæc. xii. Coll. by Treschow, Alter, Birch.
    - 127 (Cod. Vaticanus, 349). Sæc. xi. Coll. by Birch.
    - 131 (Act. 70; Paul. 77; Apoc. 66; Cod. Vaticanus, 360). Sæc. xi. Formerly belonged to Aldus Manutius, and was probably used by him in his edition. Coll. by Birch.
    - 157 (Cod. Urbino-Vat. 2). Sæc. xii. Coll. by Birch.
    - 218 (Act. 65; Paul. 57; Apoc. 33; Cæsar. Vindob. 23). Sæc. xiii. Coll. by Alter.
    - 238, 259 (Moscow, S. Synod. 42, 45). Sæc. xi. Coll. by Matthæi.
    - 262, 300 (Paris, *Bibl. Imp.* 53, 186). Sæc. x. xi. Coll. (?) by Scholz.
    - 346 (Milan, *Ambros.* 23). Sæc. xii. Coll. (?) by Scholz.
    - 2<sup>pe</sup> (St. Petersburg. *Petropol.* vi. 470). Sæc. ix. Coll. by Muralt. (Transition cursive.)
    - c<sup>scr</sup>, g<sup>scr</sup>, (Lambeth, 1177, 523, Wetstein, 71). Sæc. xii. Coll. by Scrivener.
    - p<sup>scr</sup> (Brit. Mus. Burney 20). Sæc. xiii. Coll. by Scrivener.
    - w<sup>scr</sup> (Cambr. Coll. SS. Trin. B. x. 16). Sæc. xiv. Coll. by Scrivener.
- To these must be added the Evangelistarium (B. M. Burney, 22), marked y<sup>scr</sup>, collated by Scrivener.<sup>b</sup> Plate ii. fig. 4.)

<sup>a</sup> Mr. Scrivener has kindly furnished me with the following summary of his catalogue of N. T. MSS., which is by far the most complete and trustworthy enumeration yet made (*Plain Introduction*, p. 225):—

	Uncial.	Cursive.	Duplicates already deducted.
Gospels . . . . .	34	601	32
Act. Cath. Epp. . . . .	10	229	12
Paul . . . . .	14	283	14
Apoc. . . . .	4	102	..
Evangelistaria . . . . .	58	183	6
Apotolos . . . . .	7	65	..
<b>Total . . . . .</b>	<b>127</b>	<b>1463</b>	<b>64</b>

The following are valuable, but need careful collation:—

- 13 (Paris, Bib. Imp. 50). Coll. 1797. Sæc. xii. (Cf. Griesbach, *Symb. Crit.* i. pp. cliv.-clxvi.)
- 22 (Paris, Bibl. Imp. 72). Sæc. xi.
- 28 (Paris, Bibl. Imp. 379). Coll. Scholz.
- 72 (Brit. Mus. Harl. 5647). Sæc. xi.
- 106 (Cod. Winchelsea). Sæc. x. Coll. Jackson (used by Wetstein), 1748.
- 113, 114 (B. M. Harl. 1810, 5540).
- 126 (Cod. Guelpherbytanus, xvi. 16). Sæc. xi.
- 130 (Cod. Vaticanus, 359). Sæc. xiii.
- 209 (Act. 95; Paul. 138; Apoc. 46; Venice. Bibl. S. Marci 10). Sæc. xv. The text of the Gospels is especially valuable.
- 225 (Vienna, *Bibl. Imp.* Kollar. 9, Forlos. 31). Sæc. xii.
- 372, 382 (Rome, Vatican. 1161, 2070). Sæc. xv., xiii.
- 405, 408, 409 (Venice, S. Marci, i. 10, 14, 15). Sæc. xi., xii.

B. Primary Cursives of the Acts and Catholic Epistles.

- 13 = Gosp. 33, Paul. 17.
- 31 = Gosp. 69 (*Codex Leicestrensis*).
- 65 = Gosp. 218.
- 73 (Paul. 80. Vatican. 367). Sæc. xi. Coll. by Birch.
- 95, 96 (Venet. 10, 11). Sæc. xiv. xi. Coll. by Rinek.
- 180 (Argentor. Bibl. Sem. M.). Coll. by Arendt.
- lo<sup>d</sup> = p<sup>scr</sup> 61 (Tregelles), (Brit. Mus. *Add.* 20,003). Sæc. xi. Coll. by Scrivener.
- a<sup>scr</sup> (Lambeth, 1182). Sæc. xii. Coll. by Scrivener.
- c<sup>scr</sup> (Lambeth, 1184). Coll. Sanderson ap. Scrivener.

The following are valuable, but require more careful collation.

- 5 (Paris, *Bibl. Imp.* 106).
- 25, 27 (Paul. 31, Apoc. 7; Paul. 33. Brit. Mus. Harl. 5537, 5620). Cf. Griesbach, *Symb. Crit.* ii. 184, 185.
- 29 (Paul. 35, Geneva 20). Sæc. xi., xii.
- 36 (*Coll. Nov.* Oxon.).
- 40 (Paul. 46, Apoc. 12, Alex. Vatican. 179). Sæc. xi. Coll. by Zacagni.
- 66 (Paul. 67).
- 68 (Paul. 73, Upsal). Sæc. xii., xi.
- 69 (Paul. 74, Apoc. 30, Guelph. xvi. 7). Sæc. xiv., xiii.
- 81 (Barberini, 377). Sæc. xi.
- 137 (Milan, *Ambros.* 97). Sæc. xi., Coll. by Scholz.
- 142 (Mutinensis, 243). Sæc. xii.<sup>d</sup>

<sup>b</sup> The readings marked 102 (Matt. xxiv.—Mark viii 1) which were taken by Wetstein from the margin of a printed copy, and said to have been derived from a Medicæan MS., cannot have been derived from any other source than an imperfect collation of B. I have noticed 85 places in which it is quoted in St. Mark, and in every one, except ii. 22, it agrees with B. In St. Matthew it is noticed as agreeing with B 70 times, while it differs from it 5 times. These few variations are not difficult of explanation.

<sup>c</sup> It is to be hoped that scholars may combine to accomplish complete collations of the MSS. given in these lists. One or two summer vacations, with proper co-operation, might accomplish the work.

<sup>d</sup> Three other MSS., containing the Catholic Epistles

ΑΡΘΟΚΑΛΟΘΗΝΟΜΕΝ ΔΕ  
 ΠΟΤΟΥΤΗΝ ΝΙΚΟΥΜΕΝ ΗΝ ΥΠΗΚΟ  
 ΟΝ ΑΠΑΣΑΝ ΘΕΙΝΑΙ ΝΟΜΩ ΔΕ ΤΩ  
 ΤΟΥΤΩ ΙΤΡΟΤΩ ΕΖΑΝ ΑΓΚΗΣ ΧΡΚ  
 ΘΑΙΤΗ ΝΕΛΛΑΔΑ ΣΥΝ ΕΛΟΝΤΩ

2. Brit. Mus. — Cod. Alex. — (St. John i. 1-5.)

○ Primary Cursives in the Pauline Epistles.

- 17 = Gosp. 33.
  - 37 = Gosp. 69 (*Cod. Leicesterensis*).
  - 57 = Gosp. 218.
  - 108, 109 = Act. 95, 96.
  - 115, 116 (Act. 100, 101, Mosqu. Matt. d. f.).
  - 137 (Gosp. 263, Act. 117, Paris, Bibl. Imp. 61).
- The following are valuable, but require more careful collation.
- 5 = Act. 5.
  - 23 (Paris, Coislin. 28). Sæc. xi. Descr. by Montfaucon.
  - 31 (Brit. Mus. *Harl.* 5,537) = <sup>1</sup>ser. Apoc. Sæc. xiii.
  - 39 (Act. 33. Oxford, Coll. Lincoln. 2).
  - 46 = Act. 40.
  - 47 (Oxford, Bodleian. Roe 16). Sæc. xi. [Collated by Tregelles for his ed. of the Greek Test. Griesb. *Symb. Crit.* i. 155 ff. A.]
  - 55 (Act. 46. Monacensis).
  - 67 (Act. 66. Vindob. Lambec. 34). The corrections are especially valuable.
  - 70 (Act. 67. Vindob. Lambec. 37)
  - 71 (Vindob. Forlos. 19). Sæc. xii.
  - 73 (Act. 68).
  - 80 (Act. 73. Vatican. 367).
  - 177-8-9 (Mutin.).
- D. Primary Cursives of the Apocalypse.
- 7 = <sup>1</sup>ser (Act. 25. Brit. Mus. *Harl.* 5,537). Sæc. xi. Coll. by Scrivener.
  - 14 = Gosp. 69 (*Cod. Leicesterensis*).
  - 31 = <sup>c</sup>ser (Brit. Mus. *Harl.* 5,678). Sæc. xv. Coll. by Scrivener.

require notice, not from their intrinsic worth, but from their connection with the controversy on 1 John v. 7, 8.

84 (Gosp. 61, Coll. SS. Trin. Dublin, *Codex Montfortianus*). Sæc. xv., xvi. There is no doubt that this was the *Codex Briannicus*, on the authority of which Erasmus, according to his promise, inserted the interpolated words, *ἐν τῷ οὐρανῷ, πατήρ, λόγος καὶ πνεῦμα ἅγιον, καὶ οἱ ὄντες οἱ τ. ἔ. ἔ. καὶ τ. ἔ. οἱ μ. ἐν τ. γ.*; but did not omit, on the same authority (which exactly follows the late Latin MSS.), the last clause of ver. 8, *καὶ οἱ τρ. — εἰς*. The page on which the verse stands is the only glazed page in the volume. A collation of the MS. has been published by Dr. Dobbin, London, 1854.

162 (Paul. 200. Vat. Ottob. 298). Sæc. xv. A Græco-Latin MS. It reads, *ἀπὸ τοῦ οὐρανοῦ, πατήρ, λόγος καὶ πνεῦμα ἅγιον καὶ οἱ τρεῖς εἰς τὸ ἓν εἰσι* (Tregelles, *Horne*, p. 217). Scholz says that the MS. contains "innumerable transpositions," but gives no clear account of its character.

173 (Paul. 211. Naples, Bibl. Borbon.) Sæc. xi. The interpolated words, with the articles, and the last clause of ver. 8, are given by a second hand (Sæc. xvi.).

*Codex Ravianus* (110 Gosp.) is a mere transcript of the N. T. of the Complutensian Polyglot, with variations from Erasmus and Stephens. Comp. Griesbach, *Symb. Crit.* i. clxxxi-clxxxii.

α The accompanying plates will give a good idea of the different forms of Biblical Gk. MSS. For permission to take the tracings, from which the engravings have been admirably made by Mr. Netherclift, my sincere thanks are due to Sir F. Madden, K. II.; and I am also much indebted to the other officers of the MSS. department of the British Museum, for the help which they gave me in making them.

Pl. i. fig. 1. A few lines from the *Λόγος ἐπιτάφιος* of Hyperides (col. 9, l. 4, of the edition of Rev. C. Babington), a papyrus of the first century, or not much later. In Mr. Babington's facsimile the

38 (Vatican. 579). Sæc. xiii. Coll. by B. H. Alford.

47 (Cod. Dresdensis). Sæc. xi. Coll. by Matthæi.

51 (Paris, *Bibl. Imp.*). Coll. by Reiche. <sup>g</sup>ser (Parham, 17). Sæc. xi., xii. Coll. by Scrivener.

<sup>m</sup>ser (Middlehill) = 87. Sæc. xi., xii. Coll. by Scrivener.

The following are valuable, but require more careful collation.

2 (Act. 10. Paul. 12. Paris. Bibl. Imp. 237).

6 (Act. 23. Paul. 28. Bodleian. Barocc. 3). Sæc. xii., xiii.

11 (Act. 39. Paul. 45).

12 = Act. 40.

17, 19 (Ev. 35. Act. 14. Paul. 18; Act. 17 Paul. 21. Paris. Coislin. 199, 205).

28 (Bodleian, Barocc. 48).

36 (Vindob. Forlos. 29). Sæc. xiv.

41 (Alex-Vatican. 68). Sæc. xiv.

46 = Gosp. 209.

82 (Act. 179. Paul. 128. Monac. 211).

30. Having surveyed in outline the history of the transmission of the written text, and the chief characteristics of the MSS.<sup>a</sup> in which it is preserved, we are in a position to consider the extent and nature of the variations which exist in different copies. It is impossible to estimate the number of these exactly, but they cannot be less than 120,000 in all (Scrivener, *Introduction*, 3), though of these a very large proportion consist of differences

*adscript* after *νομος* is omitted wrongly. It is in fact partly hidden under a fibre of the papyrus, but easily seen from the side. Two characteristic transcriptional errors occur in the passage: *τῷ τούτῳ τρόπῳ* for *τῷ τούτου τρόπῳ*, and (by itacism, § 31) *συνελόνται* for *συνελόντι*.

Fig. 2. The opening verses of St. John's Gospel from the *Cod. Alex.* The two first lines are rubricated. The specimen exhibits the common contractions, ΘC, ANΩN, and an example of itacism, *χωρεῖς*. The stop at the end of the fifth line, *οὐδὲ ἐν*, is only visible in a strong light, but certainly exists there, as in C D L, etc.

Fig. 3. A very legible specimen of the Nitrian palimpsest of St. Luke. The Greek letters in the original are less defined, and very variable in tint: the Syriac somewhat heavier than in the engraving, which is on the whole very faithful. The dark lines show where the vellum was folded to form the new book for the writings of Severus of Antioch. The same MSS. contained fragments of the *Iliad*, edited by Dr. Cureton, and a piece of Euclid.

Pl. ii. fig. 1. Part of the first column of the famous Harleian *Evangelistarium*, collated by Scrivener. It is dated A. D. 995 (Scrivener, *Cod. Aug.* p. xviii.). The letters on this page are all in gold. The initial letter is illuminated with red and blue. The MS. is a magnificent example of a service-book.

Fig. 2. From Tischendorf's valuable MS. of the Acts (61 Tregelles). It was written A. D. 1014 (Scrivener, *Cod. Aug.* l. ix.). The specimen contains the itacisms *χρόνον* (*χρόνον*) and *πεντίκορτα*.

Fig. 3. The beginning of St. John, from Cod. 114 of the Gospels (Griesbach, *Symb. Crit.* i. p. exliii.), a MS. of the 13th cent.

Fig. 4. Part of the beginning of St. John, from the very valuable *Evangelistarium* <sup>y</sup>ser (Scrivener, *Collation*, etc., pp. lxi. ff.). The initial letter of the Gospel is a rude illumination. The MS. bears a date 1319; but Mr. Scrivener justly doubts whether this is in the hand of the original scribe.

of spelling and isolated aberrations of scribes,<sup>a</sup> and of the remainder comparatively few alterations are sufficiently well supported to create reasonable doubt as to the final judgment. Probably there are not more than 1600-2000 places in which the true reading is a matter of uncertainty, even if we include in this questions of order, inflexion, and orthography: the doubtful readings by which the sense is in any way affected are very much fewer, and those of dogmatic importance can be easily numbered.

31. Various readings are due to different causes: some arose from accidental, others from intentional alterations of the original text. (1.) Accidental variations or *errata*, are by far the most numerous class, and admit of being referred to several obvious sources. (a) Some are errors of *sound*. The most frequent form of this error is called *Itacism*, a confusion of different varieties of the I-sound, by which (οι, υ) η, ι, ει, ε, etc., are constantly interchanged.<sup>b</sup> Other vowel-changes, as of ο and ω, ου and ω, etc., occur, but less frequently. Very few MSS. are wholly free from mistakes of this kind, but some abound in them. As an illustration the following variants occur in F<sub>2</sub> in Rom. vi. 1-16: 1 ἔρεϋμεν; 2 ὄντινες, εἶτε (ἔτι); 3 ἀργοῦται (-τε); 5 ἐσθ-μαθα; 8 ἀποθάνομεν; 9 ἀποθνήσκει, ἔτει; 11 ὄμεις, λογι(εσθαί); 13 παραστήσεται; 14 ἔσται (-τε); 15 ὄτει; 16 οἰδαται, ὄτει, παρειστάνεται (παριστάνετε), ἔσται, ὄτακούετα. An instance of fair doubt as to the true nature of the reading occurs in ver. 2, where ἔζωομεν may be an error for ζήσομεν, or a real variant.<sup>c</sup> Other examples of disputed readings of considerable interest which involve this consideration of Itacism are found, Rom. xii. 2, συσχηματί(εσθαί) -θε; xvi. 20, συν-τρίψει -αι. James iii. 3, εἰ δέ (ἴδε). Rom. v. 1, ἔχομεν, ἔχομεν (cf. vi. 15). Luke iii. 12, 14; John xiv. 23; Hebr. vi. 3; James iv. 15 (ποιήσομεν -μεν). Matt. xxvii. 60, καινῶ, κενῶ. John xv. 4, μείνη, μένη (cf. 1 John ii. 27). Matt. xi. 16, ἑτέροις, ἐταίροις. Matt. xx. 15, ἦ, εἰ. 2 Cor. xii. 1, δεῖ, δῆ. 1 Tim. v. 21, πρόσκλησιν, πρόσκλησιν. 1 Pet. ii. 3, χρῆστος ὁ κύριος, χριστὸς ὁ κύριος.

To these may be added such variations as Matt. xxvi. 29, &c. γέννημα, γέννημα. 2 Pet. ii. 12, γεγεννημένα, γεννημένα. Matt. i. 18; Luke i. 14, γέννησις, γ'γενσις. Matt. xxvii. 35, βάλλοντες, βαλόντες. 1 Pet. ii. 1, φθόνος, φθόσις.

32. (β) Other variations are due to errors of *sight*. These arise commonly from the confusion of similar letters, or from the repetition or omission of the same letters, or from the recurrence of a similar ending in consecutive clauses which often causes one to be passed over when the eye mechanically returns to the copy (ἁμοιωτέλεωτων). To these may be added the false division of words in transcribing the text from the continuous uncial

writing. The uncial letters Θ, Ο, C, E, are peculiarly liable to confusion, and examples may easily be quoted to show how their similarity led to mistakes; 1 Tim. iii. 18, ΟC. ΘC; 2 Cor. ii. 3, ΕΧΩ CΧΩ; Mark iv. 22, ΕΑΝ, ΟΕΑΝ, ΟCΑΝ.

The repetition or omission of similar letters may be noticed in Matt. xxi. 18, ΕΠΑΝΑΓΑΓΩΝ, ΕΠΑΝΑΓΩΝ. Luke x. 27; Rom. xiii. 9; Tit. ii. 7; James i. 27, CΕΑΤΩΝ, ΕΑΤΩΝ (cf. Tischdf. *ad Rom.* xiii. 9). Luke vii. 21, ΕΧΑΡΙΞΑΤΟ ΒΛΕΠΕΙΝ, ΕΧΑΡΙΞΑΤΟ ΤΟ ΒΛΕΠΕΙΝ. Mark viii. 17, ΣΥΝΙΕΤΕ, ΣΥΝΙΕΤΕ ΕΤΙ. Luke ii. 38, (ΑΤΤΗ) ΑΤΤΗ ΤΗ ΩΡΑ. Matt. i. 23, ΚΑΦΑΡΝΑΟΥΜ ΜΗ, ΚΑΦΑΡΝΑΟΥΜ Η. 1 Thess. ii. 7, ΕΓΕΝΗΘΗΜΕΝ ΗΠΙΟΙ, ΕΓΕΝΗΘΗΜΕΝ ΗΠΙΟΙ. Luke ix. 49, ΕΚΒΑΛΛΟΝΤΑ ΔΑΙΜΟΝΙΑ, ΕΚΒΑΛΛΟΝΤΑ ΤΑ ΔΑΙΜ. Mark xiv. 35, ΠΡΟΕΛΘΩΝ, ΠΡΟΕΛΘΩΝ. 2 Cor. iii. 10, ΟΥ ΔΕΔΟΞΑΣΤΑΙ, ΟΥΔΕ ΔΕΔΟΞΑΣΤΑΙ 1 Pet. iii. 20, ΑΠΑΞ ΕΔΕΧΕΤΟ, ΑΠΕΞ-ΕΔΕΧΕΤΟ [the received text appears to be a mere conjecture of Erasmus. — A.]. Acts x. 36, ΤΟΝ ΛΟΓΟΝ ΑΠΕΣΤΕΙΛΕ, ΤΟΝ ΛΟΓΟΝ ΟΝ ΑΠΕΣΤΕΙΛΕ. Sometimes this cause of error leads to further change: 2 Cor. iii. 15, ΗΝΙΚΑ ΑΝ ΑΝΑΓΙΝΩΣΚΗΤΑΙ, ΗΝΙΚΑ ΑΝΑΓΙΝΩΣΚΕΤΑΙ.<sup>d</sup> Examples of omission from Homoioteleuton occur John vii. 7 (in T); 1 John ii. 23, iv. 3; Apoc. i. 1, 2, xiv. 1; Matt. v. 20 (D). Cf. 1 Cor. xv. 25-27, 54 (F<sub>2</sub>, G<sub>3</sub>); xv. 15 (Origen). And some have sought to explain on this principle the absence from the best authorities of the disputed clause in Matt. x. 23, and the entire verses, Luke xvii. 36, Matt. xxiii. 14.

Instances of false division are found, Mark xv. 6, ὑπερ ἤτοῦτο, ὑν παρῆτοῦτο. Phil. i. 1, συνεπισκόποις, σὺν ἐπισκόποις. Matt. xc. 23, ἄλλοις, ἄλλ' οἷς. Gal. i. 9, προεῖρηκαμεν, προεῖρηκα μὲν. Acts xvii. 25, κατὰ πάντα, καὶ τὰ πάντα. In a more complicated example, *σρα ἰν* (σωτήρα Ἰησοῦν) is changed into *σραν* (σωτηρίαν) in Acts xiii. 23; and the remarkable reading of Latin authorities in 1 Cor. vi. 20 *et portate* arose from confounding *ερα τε* and *ερατε*. In some places the true division of the words is still doubtful. 2 Cor. xii. 19, τὰδε πάντα, τὰ δὲ πάντα. Acts xvii. 26, προστεταγμένους καιροῦς, πρὸς τεταγμένους καιροῦς. In *Cod. Aug.* (F<sub>2</sub>) the false divisions of the original scribe have been carefully corrected by a contemporary hand, and the frequency of their occurrence is an instructive illustration of the corruption to which the text was exposed from this source (*e. g.* in Gal. i. there are 15 such corrections, and four mistakes, vv. 13, 16, 18 are left uncorrected). Errors of breathing, though necessarily more rare, are closely connected with these: Matt. ix. 18, εἰς ἐλθῶν, εἰσελθῶν. John ix. 30, εἰ τούτω, ἐν τούτω. Luke vii. 12; Rom. vii. 10: 1 Cor. vii. 12, αὐτη, αὐτή. Mark xii. 31, αὐτη, αὐτῆ.

<sup>a</sup> The whole amount is considerably less in number than is found in the copies of other texts, if account be taken of the number of the MSS. existing. Comp. Norton. *Genuineness of the Gospels*. i. p. 191 n.

<sup>b</sup> \* The perpetual interchange of *ai* and *ε* (which were pronounced alike) should be particularly noted. "The spelling," says Tregelles, "has no authority at all between *εσται* and *εστε*, *εχετε* and *εχετεαι*, and similar words. Even if every MS. should agree in one spelling, there would be no liberty taken by any who read the other; since these vowels and diphthongs were used indiscriminately." — *Introd. to the Textual Crit. of the N. T.*, p. 51.

<sup>c</sup> The readings are taken from Mr. Scrivener's admirable transcript. In the same volume Mr. Scrivener has given valuable summaries of the frequency of the occurrence of the different forms of itacism in other MSS. which he has collated.

<sup>d</sup> The remarkable reading in Matt. xxvii. 17, Ἰησοῦν Βαραββᾶν, seems to have originated in this way YMINBAPABBAN being written YMININBAPAB BAN, and hence YMININ, *i. e.* ἰμῖν Ἰησοῦν (Tregelles, *ad loc.*).

και ο λογος ημωσ  
 πορ φηθη και θεσ ημ  
 ωσ ουτοσ ημε  
 μαρχη πορ φηθη

There are yet some other various readings which are errors of sight, which do not fall under any of the heads already noticed: *e. g.* 2 Pet. i. 3, ἰδίᾳ δόξῃ, διὰ δόξης. 2 Cor. v. 10, τὰ διὰ τοῦ σώματος, τὰ ἰδία τοῦ σώματος.<sup>a</sup> Rom. xii. 13, χρέαις, μνείαις. Hebr. ii. 9, χάρις, χάριτι (?). And the remarkable substitution of *καρῶν* for *κυρίων* in Rom. xii. 11 seems to have been caused by a false rendering of an unusual contraction. The same explanation may also apply to the variants in 1 Cor. ii. 1, μαρτύριον, μυστήριον. 1 Tim. i. 4, οἰκονομίας, οἰκοδομίας, οἰκοδομήν.

33. Other variations may be described as errors of *impression* or *memory*. The copyist after reading a sentence from the text before him often failed to reproduce it exactly. He transposed the words, or substituted a synonym for some very common term, or gave a direct personal turn to what was objective before. Variations of order are the most frequent, and very commonly the most puzzling questions of textual criticism. Examples occur in every page, almost in every verse of the N. T. The exchange of synonyms is chiefly confined to a few words of constant use, to variations between simple and compound words, or to changes of tense or number: λέγειν, εἰπεῖν, φάσαι, λαλεῖν, Matt. xii. 48, xv. 12, xix. 21; Mark xiv. 31; John xiv. 10, &c.; ἐγείρω, διεγείρω Matt. i. 24; ἐγερθῆναι, ἀναστῆναι, Matt. xvii. 9; Luke ix. 22; ἔλθειν, ἀπελθεῖν, ἐξελθεῖν, Matt. xiv. 25; Luke xxiii. 33; Acts xvi. 39; 'I. X., 'Iησοῦς, Χριστός, ὁ κύριος, Hebr. iii. 1; 1 Pet. v. 10; Col. iii. 17; Acts xvii. 25, xxi. 13; πῶδ, ἀπό, ἐκ, Matt. vii. 4; Mark i. 26, viii. 31; Rom. xiii. 1, &c.; ἔδωκα, δέδωκα, δίδαμι, Luke x. 19; John vii. 19, xii. 49, &c.; *sing.* and *plur.* Matt. iii. 8; 1 Pet. ii. 1; Matt. xxiv. 18. The third form of change to a more personal exhortation is seen constantly in the Epistles in the substitution of the pronoun of the first person (*ἡμεῖς*) for that of the second (*οὗμεις*): 1 Pet. i. 4, 10, 12, &c. To these changes may be added the insertion of pronouns of reference (*αὐτός*, etc.): Matt. vi. 4, xxv. 17, &c.; *μαθηταί*, *μαθητὰ* αὐτοῦ, Matt. xxvi. 36, 45, 56, xxvii. 64, &c.; *πατήρ*, *πατήρ μου*, John vi. 65, viii. 28, &c. And it may be doubtful whether the constant insertion of connecting particles *καί*, *δέ*, *γάρ*, *οὖν*, is not as much due to an unconscious instinct to supply natural links in the narrative or argument, as to an intentional effort to give greater clearness to the text. Sometimes the impression is more purely *mechanical*, as when the copyist repeats a termination incorrectly: Apoc. xi. 9 (C); 1 Thess. v. 4 (?); 2 Pet. iii. 7 (?).<sup>b</sup>

34. (ii.) Of intentional changes some affect the expression, others the substance of the passage. (a.) The intentional changes in language are partly changes of Hellenistic forms for those in common use, and partly modifications of harsh constructions. These may in many cases have been made unconsciously, just as might be the case if any one were to transcribe rapidly one of the original MS. pages of Milton; but more commonly the scribe would correct as mere blunders dialectic peculiarities which were wholly strange to him. Thus the forms *τεσσεράκοντα*, *εραυῶν*, *ἐκαθεσίση*, *λεγιών*, etc., *ἡλαθα*, *ἔπεσα*, etc., and the

irregular constructions of *ἐάν*, *ὄταν*, are removed almost without exception from all but a few MSS. Imperfect constructions are completed in different ways: Mark vii. 2, *αὐτὸν ἐμέμψαντο*, or *κατέγνωσαν*; Rom. i. 32, *αὐτὸν οὐκ ἐνόησαν*, etc.; 2 Cor. viii. 4, *αὐτὸν δέξασθαι*; 1 Cor. x. 24, *αὐτὸν ἕκαστος*. Apparent solecisms are corrected: Matt. v. 28, *αὐτῆς* for *αὐτῆν*; xv. 32, *ἡμέρας* for *ἡμέραι*; Heb. iv. 2, *συγκεκραμένους* for *-μενους*. The Apocalypse has suffered especially from this grammatical revision, owing to the extreme boldness of the rude Hebraizing dialect in which it is written: *e. g.* Apoc. iv. 1, 8, vi. 11, xi. 4, xxi. 14, &c. Variations in the orthography of proper names ought probably to be placed under this head, and in some cases it is perhaps impossible to determine the original form (Ἰσκαριώτης, Ἰσκαριῶθ, Σκαριῶθ; Ναζαρά, -εθ, -αθ, -αρ, -ετ).

35. (β.) The changes introduced into the substance of the text are generally additions, borrowed either from parallel passages or from marginal glosses. The first kind of addition is particularly frequent in the Gospels, where, however, it is often very difficult to determine how far the parallelism of two passages may have been carried in the original text. Instances of unquestionable interpolation occur: Luke iv. 8, xi. 4; Matt. i. 25, v. 44, viii. 13, xxvii. 35 (49); Mark xv. 28; Matt. xix. 17 (compare Acts ix. 5, 6, xxii. 7, xxvi. 14). Similar interpolations occur also in other books: Col. i. 14; 1 Pet. i. 17; Jude 15 (Rom. xvi. 27); Apoc. xx. 2; and this is especially the case in quotations from the LXX., which are constantly brought into exact harmony with the original text: Luke iv. 18, 19, xix. 46; Matt. xii. 44, xv. 8; Heb. ii. 7, xii. 20.

Glosses are of more partial occurrence. Of all Greek MSS. *Cod. Bezae* (D) is the most remarkable for the variety and singularity of the glosses which it contains. Examples of these may be seen: Matt. xx. 28; Luke v. 5, xxii. 26-28; Acts i. 5, xiv. 2. In ten verses of the Acts, taken at random, the following glosses occur: Acts xii. 1, *ἐν τῇ Ἰουδαίᾳ*; 3, *ἡ ἐπιχείρησις ἐπὶ τοὺς πιστοὺς*; 5, *πολλὴ δὲ προσευχὴ ἦν ἐν ἐκτενείᾳ περὶ αὐτοῦ*; 7, *ἐπέστη τῷ Πέτρῳ*; 10, *κατέβησαν τοὺς ζ' βαθμοὺς*. Some simple explanatory glosses have passed into the common text: Matt. vi. 1, *ἐλεημοσύνην* for *δικαιοσύνην*; Mark vii. 5, *ἀνίπτοις* for *κοιναῖς*; Matt. v. 11, *ψευδόμενοι*: comp. John v. 4 (Luke xxii. 43, 44).

36. (γ.) Many of the glosses which were introduced into the text spring from the ecclesiastical use of the N. T., just as in the Gospels of our own Prayer-book introductory clauses have been inserted here and there (*e. g.* 3d and 4th Sundays after Easter: "Jesus said to his disciples"). These additions are commonly notes of person or place: Matt. iv. 12, xii. 25, &c., *ὁ Ἰησοῦς* inserted; John xiv. 1, *καὶ εἶπεν τοῖς μαθηταῖς αὐτοῦ*; Acts iii. 11, xxvii. 1 (cf. Mill, *Prolegg.* 1055-56). Sometimes an emphatic clause is added: Matt. xiii. 23, xxv. 29; Mark vii. 16; Luke viii. 15, xii. 21, *ὁ ἔχων ὅτα κ. τ. λ.*; Luke xiv. 24, *πολλοὶ γὰρ εἰσιν κλητοὶ κ. τ. λ.* But the most remarkable liturgical insertion is the doxology in the Lord's Prayer, Matt. vi. 13; and it is probable that the

<sup>a</sup> By a similar change Athanasius (*De Incarn. Verbi*, 5) and others give in Wisd. ii. 23, *κατ' εἰκόνα τῆς ἰδίας ἀειδιότητος* for the reading *τῆς ἰδίας ἰδιότητος*.

<sup>b</sup> It was apparently by a similar error (Tregelle,

*Horne*, iv. 227) that, in the A. V. of Hebr. x. 23, "the profession of our faith" stands for "the profession of our hope." The former is found in no document whatever.

interpolated verse (Acts viii. 37) is due to a similar cause. An instructive example of the growth of such an addition may be seen in the readings of Luke i. 55, as given in the text of the Gospel and in the collections of ecclesiastical hymns.

37. (δ.) Sometimes, though rarely, various readings noted on the margin are incorporated in the text, though this may be reckoned as the effect of ignorance rather than design. Signal examples of this confusion occur: Matt. xvii. 26, xxvi. 59, 60 (D); Rom. vi. 12. Other instances are found, Matt. v. 19; Rom. xiv. 9; 2 Cor. i. 10; 1 Pet. iii. 8.

38. (ε.) The number of readings which seem to have been altered for distinctly dogmatic reasons is extremely small. In spite of the great revolutions in thought, feeling, and practice through which the Christian Church passed in fifteen centuries, the copyists of the N. T. faithfully preserved, according to their ability, the sacred trust committed to them. There is not any trace of intentional revision designed to give support to current opinions (Matt. xvii. 21; Mark ix. 29; 1 Cor. vii. 5, need scarcely be noticed). The utmost that can be urged is that internal considerations may have decided the choice of readings: Acts xvi. 7, xx. 28; Rom. v. 14; 1 Cor. xv. 51; 2 Co. v. 7; 1 Tim. iii. 16; 1 John v. 7, in Latin copies; (Rom. viii. 11). And in some cases a feeling of reverence may have led to a change in expression, or to the introduction of a modifying clause: Luke ii. 33, Ἰωσήφ for ὁ πατήρ αὐτοῦ; ii. 43, Ἰωσήφ καὶ ἡ μήτηρ αὐτοῦ for οἱ γονεῖς αὐτοῦ; John vii. 39, οὐκ ἔγωγε ἢ πνεῦμα δεδομένον; Acts xix. 2 (D); Gal. ii. 5; Mark xiii. 32, *om.* οὐδὲ ὁ υἱὸς (cf. Matt. xxiv. 36); Matt. v. 22, *add.* εἰρήνη; 1 Cor. xi. 29, *add.* ἀναξίως (Luke xxii. 43, 44, *om.*).

But the general effect of these variations is scarcely appreciable; nor are the corrections of assumed historical and geographical errors much more numerous: Matt. i. 11, viii. 28, Γεργεσηῶν; xxii. 35, *om.* υἱοῦ Βαραχίου; xxvii. 9, *om.* Ἰερεμίου, or Ζαχαρίου; Mark i. 2, ἐν τοῖς προφήταις for ἐν Ἰσρ. τῷ πρ.; ii. 28, *om.* ἐπὶ Ἀβ. ἀρχιερέως; John i. 28, Βηθσαβαῖ; v. 2, ἦν δέ for ἔστι δέ; vii. 8, οὐτα for οὐκ (?); viii. 57, τεσσαράκοντα for πενήκοντα; xix. 14, ὅρα ἦν ὡς τρίτη for ἕκτη; Acts xiii. 33, τῷ δευτέρῳ for τῷ πρώτῳ.

39. It will be obvious from an examination of the instances quoted that the great mass of various readings are simply variations in form. There are, however, one or two greater variations of a different character. The most important of these are John vii. 53-viii. 12; Mark xvi. 9-end; Rom. xvi.

25-27. The first stands quite by itself; and there seems to be little doubt that it contains an authentic narrative, but not by the hand of St. John. The two others, taken in connection with the last chapter of St. John's Gospel, suggest the possibility that the apostolic writings may have undergone in some cases authoritative revision: a supposition which does not in any way affect their canonical claims: but it would be impossible to enter upon the details of such a question here.

40. Manuscripts, it must be remembered, are but one of the three sources of textual criticism. The versions and patristic quotations are scarcely less important in doubtful cases.<sup>a</sup> But the texts of the versions and the Fathers were themselves liable to corruption, and careful revision is necessary before they can be used with confidence. These considerations will sufficiently show how intricate a problem it is to determine the text of the N. T., where "there is a mystery in the very order of the words," and what a vast amount of materials the critic must have at his command before he can offer a satisfactory solution. It remains to inquire next whether the first editors of the printed text had such materials, or were competent to make use of them.

## II. THE HISTORY OF THE PRINTED TEXT.

1. The history of the printed text of the N. T. may be divided into three periods. The first of these extends from the labors of the Complutensian editors to those of Mill: the second from Mill to Scholz; the third from Lachmann to the present time. The criticism of the first period was necessarily tentative and partial: the materials available for the construction of the text were few, and imperfectly known: the relative value of various witnesses was as yet undetermined; and however highly we may rate the scholarship of Erasmus or Beza, this could not supersede the teaching of long experience in the sacred writings any more than in the writings of classical authors. The second period marks a great progress: the evidence of MSS., of versions, of Fathers, was collected with the greatest diligence and success: authorities were compared and classified: principles of observation and judgment were laid down. But the influence of the former period still lingered. The old "received" text was supposed to have some prescriptive right in virtue of its prior publication, and not on the ground of its merits: this was assumed as the copy which was to be corrected only so far as was absolutely necessary. The third period was introduced by the declaration of a new and sounder law. It was laid down that no right of possession

<sup>a</sup> The history and characteristics of the Versions are discussed elsewhere. It may be useful to add a short table of the Fathers whose works are of the greatest importance for the history of the text. Those of the first rank are marked by [small] capitals; the Latin Fathers by *italics*.

<sup>a</sup> Mr. Westcott has here inadvertently confounded Theophylactus Simocatta, whose writings are of no importance in textual criticism, with the celebrated Greek commentator Theophylact, c. 1077.

sion could be pleaded against evidence. The "received" text, as such, was allowed no weight whatever. Its authority, on this view, must depend solely on its critical worth. From first to last, in minute details of order and orthography, as well as in graver questions of substantial alteration, the text must be formed by a free and unfettered judgment. Variety of opinions may exist as to the true method and range of inquiry, as to the relative importance of different forms of testimony; all that is claimed is to rest the letter of the N. T. completely and avowedly on a critical and not on a conventional basis. This principle, which we now, indeed, to be an axiom, can only be called in question by supposing that in the first instance the printed text of the N. T. was guarded from the errors and imperfections which attended the early editions of every classical text; and next that the laws of evidence which hold good everywhere else fail in the very case where they might be expected to find their noblest and most fruitful application—suppositions which are refuted by the whole history of the Bible. Each of these periods will now require to be noticed more in detail.

(i.) *From the Complutensian Polyglott to Mill.*

2. *The Complutensian Polyglott.*—The Latin Vulgate and the Hebrew text of the O. T. had been published some time before any part of the original Greek of the N. T. The Hebrew text was called for by numerous and wealthy Jewish congregations (Sonnino, 1432–88), the Vulgate satisfied ecclesiastical wants; and the few Greek scholars who lived at the close of the 15th century were hardly likely to hasten the printing of the Greek Testament. Yet the critical study of the Greek text had not been wholly neglected. Laurentius Valla, who was second to none of the scholars of his age (comp. Russell's *Life of Bp. Andrewes*, pp. 292–310, quoted by Scrivener), quotes in one place (*Matt.* xxvii. 12) three, and in another (*John* vii. 29), seven Greek MSS. in his commentaries on the N. T., which were published in 1505, nearly half a century after his death (Michaelis, *Introd.* ed. Marsh, ii. 339, 340). J. Faber (1512) made use of five Greek MSS. of St. Paul's Epistles (Michaelis, p. 420). Meanwhile the Greek Psalter had been published several times (first at Milan, 1481?), and the Hymns of Zacharias and the Virgin (*Luke* i. 42–56, 68–80) were appended to a Venetian edition of 1483, as frequently happens in MS. Psalters. This was the first part of the N. T. which was printed in Greek. Eighteen years afterwards (1504), the first six chapters of St. John's Gospel were added to an edition of the poems of Gregory of Nazianzus, published by Aldus (Guericke, *Eintl.* § 41).

a "Testari possumus, Pater sanctissime [i. e. Leo X.], maximam laboris nostri partem in eo præcipue **utisæ** versatam ut . . . castigatissima omni ex parte **vetustissimæque** exemplaria pro archetypis haberemus quorum quidem tam Hebræorum quam Græcorum ac Latinorum multiplicem copiam variis ex locis non sine summo labore acquisivimus. Atque ex ipsis quidem Græca Sanctitati tuæ debemus: qui ex ista Apostolica Bibliotheca antiquissimos tum Veteris tum Novi Testamenti codices perquam humane ad nos misisti; qui nobis in hoc negotio maximo fuerunt adiumento" (*Procl.* iii. a). And again, tom. v. *Præf.*: "Illud lectorem non lateat non quævis exemplaria impressioni huic archetypa fuisse, sed antiquissima emendatissimæque ac tantæ præterea vetustatis ut fidem eis abrogare nefas videatur (προς διακόλιον εἶναι τοιαύταν καὶ **ῥεθῆλον**, sic) quæ sanctissimus in Christo pater et

But the glory of printing the first Greek Testament is due to the princely Cardinal XIMENES. This great prelate as early as 1502 engaged the services of a number of scholars to superintend an edition of the whole Bible in the original Hebrew and Greek, with the addition of the Chaldee Targum of Onkelos, the LXX. version, and the Vulgate. The work was executed at Alcalá (Complutum), where he had founded a university. The volume containing the N. T. was printed first, and was completed on January 10, 1514. The whole work was not finished till July 10, 1517, about four months before the death of the Cardinal. Various obstacles still delayed its publication, and it was not generally circulated till 1522, though Leo X. (to whom it was dedicated) authorized the publication March 22, 1520 (Tregelles, *List. of Printed Text of N. T.*; Mill, *Prolegg.*).

The most celebrated men who were engaged on the N. T., which forms the fifth volume of the entire work, were Lebrixa (Nebriensis) and Stunica. Considerable discussion has been raised as to the MSS. which they used. The editors describe these generally as "copies of the greatest accuracy and antiquity," sent from the Papal Library at Rome; and in the dedication to Leo acknowledgment is made of his generosity in sending MSS. of both "the Old and N. T."<sup>a</sup> Very little time, however, could have been given to the examination of the Roman MSS. of the N. T., as somewhat less than eleven months elapsed between the election of Leo and the completion of the Complutensian Testament; and it is remarkable that while an entry is preserved in the Vatican of the loan and return of two MSS. of parts of the LXX., there is no trace of the transmission of any N. T. MS. to Alcalá (Tischd. *N. T.* 1859, p. lxxii. n.). The whole question, however, is now rather of bibliographical than of critical interest. There can be no doubt that the copies, from whatever source they came, were of late date, and of the common type.<sup>b</sup> The preference which the editors avow for the Vulgate, placing it in the centre column in the O. T. "between the Synagogue and the Eastern Church, tanquam duos hinc et inde latrones," to quote the well-known and startling words of the preface, "medium autem Jesum hunc est, Romanam sive Latinam ecclesiam" (vol. i. f. iii. b.), has subjected them to the charge of altering the Greek text to suit the Vulgate. But except in the famous interpolation and omission in 1 *John* v. 7, 8, and some points of orthography (*Βεελεβεοββ, Βελλα, Tischdf.* p. lxxiii.), the charge is unfounded (Marsh, on Michaelis ii. p. 851, gives the literature of the controversy). The impression was limited to six hundred copies, and as, owing to the delays

dominus noster Leo X. pontifex maximus huic Instituto favere cupiens ex Apostolica Bibliotheca educta misit."

b One MS. is specially appealed to by Stunica in his controversy with Erasmus, the *Cod. Rhodiensis*, but nothing is known of it which can lead to its identification. The famous story of the destruction of MSS. by the fire-work maker, as useless parchments, has been fully and clearly refuted. All the MSS. of Ximenes which were used for the Polyglott are now at Madrid, but there is no MS. of any part of the Gk. Test. among them (Tregelles, *Hist. of Printed Text*, pp. 12–18). The edition has many readings in common with the Laudian MS. numbered 51 *Gosp.*, 32 *Acts*, 38 *Paul* (Mill, *Prolegg.* 1090, 1436–38). Many of the peculiar readings are collected by Mill (*Prolegg.* 1092–1095)

which occurred between the printing and publication of the book, its appearance was forestalled by that of the edition of Erasmus, the Complutensian N. T. exercised comparatively small influence on later texts, except in the Apocalypse (comp. § 3). The chief editions which follow it in the main, are those of Plautin, Antwerp, 1564-1612; Geneva, 1609-1632; Mainz, 1753 (Reuss, *Gesch. d. N. T.* § 401; Le Long, *Biblioth. Sacra*, ed. Masch. i. 191-195); Mill regretted that it was not accepted as the standard text (*Proleg.* 1115); and has given a long list of passages in which it offers, in his opinion, better readings than the Stephanic or Elzevirian texts (*Proleg.* 1098-1114).

3. *The editions of Erasmus.*—The history of the edition of ERASMUS, which was the first published edition of the N. T., is happily free from all obscurity. Erasmus had paid considerable attention to the study of the N. T. when he received an application from Froben, a printer of Basle with whom he was acquainted, to prepare a Greek text for the press. Froben was anxious to anticipate the publication of the Complutensian edition, and the haste with which the work of Erasmus was completed, shows that little consideration was paid to the exigencies of textual criticism. The request was made on April 17, 1515, while Erasmus was in England. The details of the printing were not settled in September in the same year, and the whole work was finished in February, 1516 (Tregelles, *Hist. of Printed Text*, 19, 20). The work, as Erasmus afterwards confessed, was done in reckless haste ("precipitatum verius quam editum." *Comp. Epp.* v. 26; xii. 19), and that too in the midst of other heavy literary labors (*Ep.* i. 7. *Comp. Wetstein, Proleg.* pp. 166-67).<sup>a</sup> The MSS. which formed the basis of his edition are still, with one exception, preserved at Basle; and two which he used for the press contain the corrections of Erasmus and the printer's marks (Michaelis, ii. 220, 221). The one is a MS. of the Gospels of the 16th century of the ordinary late type (marked 2 Gosp. in the catalogues of MSS. since Wetstein); the other a MS. of the Acts and the Epistles (2 Acts, *Epp.*), somewhat older, but of the same general character.<sup>b</sup> Erasmus also made some use of two other Basle MSS. (1 Gosp.; 4 Acts, *Epp.*); the former of these is of great value, but the important variations from

the common text which it offers, made him suspect that it had been altered from the Latin.<sup>c</sup> For the Apocalypse he had only an imperfect MS. which belonged to Reuchlin.<sup>d</sup> The last six verses were wanting, and these he translated from the Latin,<sup>e</sup> a process which he adopted in other places where it was less excusable. The received text contains two memorable instances of this bold interpolation. The one is Acts viii. 37, which Erasmus, as he says, found written in the margin of a Greek MS. though it was wanting in that which he used: the other is Acts ix. 5, 6, *σκληρόν σοι—ἀνάστηθι* for *ἀλλὰ ἀνάστηθι*, which has been found as yet in no Greek MS. whatsoever, though it is still perpetuated on the ground of Erasmus' conjecture. But he did not insert the testimony of the heavenly witnesses (1 John v. 7), an act of critical faithfulness which exposed him to the attacks of enemies. Among these was Stunica—his rival editor—and when argument failed to silence calumny, he promised to insert the words in question on the authority of any one Greek MS. The edition of Erasmus, like the Complutensian, was dedicated to Leo X.; and it is a noble trait of the generosity of Cardinal Ximenes, that when Stunica wished to disparage the work of Erasmus which robbed him of his well-earned honor, he checked him in the words of Moses, "I would that all might thus prophesy," Num. xi. 29 (Tregelles, p. 19). After his first edition was published Erasmus continued his labors on the N. T. (*Ep.* iii. 31); and in March, 1519, a second edition appeared which was altered in about 400 places, of which Mill reckons that 330 were improvements (*Proleg.* § 1134). But his chief labor seems to have been spent upon the Latin version, and in exposing the "solecisms" of the common Vulgate, the value of which he completely misunderstood (comp. Mill, *Proleg.* 1124-1133).<sup>f</sup> These two editions consisted of 3,300 copies, and a third edition was required in 1522, when the Complutensian Polyglott also came into circulation. In this edition 1 John v. 7 was inserted for the first time, according to the promise of Erasmus, on the authority of the "Codex Britannicus" (*i. e.* Cod. Montfortianus), in a form which obviously betrays its origin as a clumsy translation from the Vulgate ("ne cui foret causa calumniandi," *Apol. ad Stunicam*, ad loc.)<sup>g</sup> The text was altered in about 118

<sup>a</sup> A marvelous proof of haste occurs on the title-page, in which he quotes "Vulgarij" among the chief fathers whose authority he followed. The name was formed from the title of the see of Theophylact (Bulgaria), and Theophylact was converted into an epithet. This "Vulgarij" is quoted on Luke xi. 35, and the name remained unchanged in subsequent editions (Wetstein, *Proleg.* 169).

<sup>b</sup> According to Mill (*Proleg.* 1120), Erasmus altered the text in a little more than fifty places in the Acts, and in about two hundred places in the Epistles, of which changes all but about forty were improvements. Specimens of the corrections on the margin of the MS. are given by Wetstein (*Proleg.* p. 56, ed. Lotze). Of these several were simply on the authority of the Vulgate, one of which (Matt. ii. 11, *εἶπον for εἶδον*) has retained its place in the received text.

<sup>c</sup> The reading in the received text, Mark vi. 15, *ἢ ὡς εἰς τῶν προφητῶν*, in place of *ὡς εἰς τῶν προφητῶν*, is a change introduced by Erasmus on the authority of this MS., which has been supported by some slight additional evidence since. Mill (*Proleg.* §§ 1117, 18) states that Erasmus used the uncial Basle MS. of the Gospels (E), "correcting it rightly in about sixty-eight

places, wrongly in about fifty seven." This opinion has been refuted by Wetstein (*Proleg.* p. 50). The MSS. was not then at Basle: "Hicce codex Basileonisi Academiæ dono datus est anno 1559" (Lotze ad Wetstein, *l. c.*).

<sup>d</sup> \* This MS. has been recently discovered by F. Delitzsch and carefully collated with the text of Erasmus, who, it appears, did not use the MS. itself for his edition of the Apocalypse, but only an inaccurate transcript of it. See Delitzsch, *Handschriftliche Funde*, 2 Hefte, Leipzig, 1861-62.

<sup>e</sup> Traces of this unauthorized retranslation remain in the received text: Apoc. xxii. 16, *ὄρθανός*. 17, *ἐλθέ (bis)*; *ἐλθέτω*; *λαμβανέτω τό*. 18. *συμμαρτυρούμαι γάρ, ἐπιτιβή πρός ταῦτα*. 19. *ἀφαρῆ βίβλου, ἀπό βίβλου τ. ζ*. Some of these are obvious blunders in rendering from the Latin, and yet they are consecrated by use.

<sup>f</sup> Luther's German version was made from this text (Reuss, *Gesch. d. H. S.* § 400 [471, 3e Ausg.]) One conjecture of Erasmus 1 Pet. iii. 20, *ἀπᾶς ἐξέβηγερο*, supported by no MS., passed from this edition into the received text.

<sup>g</sup> In the course of the controversy on this passage the *Cod. Vatic. B* was appealed to (1521). Some years

places (Mill, *Prolegg.* 1138). Of these corrections 26 were borrowed from an edition published at Venice in the office of ALDUS, 1518, which was taken in the main from the first edition of Erasmus, even so as to preserve errors of the press, but yet differed from it in about 200 places, partly from error and partly on MS. authority (Mill, § 1122). This edition is further remarkable as giving a few (19) various readings. Three other early editions give a text formed from the second edition of Erasmus and the Aldine, those of [Gerbelius at] Hagenau, 1521, of Cephalæus at Strasburg, 1524, of Bebelius at Basle [1524], 1531. Erasmus at length obtained a copy of the Complutensian text, and in his fourth edition in 1527, gave some various readings from it in addition to those which he had already noted, and used it to correct his own text in the Apocalypse in 90 places, while elsewhere he introduced only 16 changes (Mill, § 1141). His fifth and last edition (1535) differs only in 4 places from the fourth, and the fourth edition afterwards became the basis of the received text. This, it will be seen, rested on scanty and late Greek evidence, without the help of any versions except the Latin, which was itself so deformed in common copies, as not to show its true character and weight.

4. *The editions of Stephens.* — The scene of our history now changes from Basle to Paris. In 1543, Simon de Colines (COLINÆUS) published a Greek text of the N. T., corrected in about 150 places on fresh MS. authority. He was charged by Beza with making changes by conjecture; but of the ten examples quoted by Mill, all but one (Matt. viii. 33, *πάντα* for *πάντα*) are supported by MSS., and four by the Parisian MS. *Reg.* 85 (119 Gossip).<sup>a</sup> The edition of Colinæus does not appear to have obtained any wide influence. Not long after it appeared, R. Estienne (STEPHANUS) published his first edition (1546), which was based on a collation

of MSS. in the Royal Library with the Complutensian text.<sup>b</sup> He gives no detailed description of the MSS. which he used, and their character can only be discovered by the quotation of their readings, which is given in the third edition. According to Mill, the text differs from the Complutensian in 581 places, and in 198 of these it follows the last edition of Erasmus. The former printed texts are abandoned in only 37 places in favor of the MSS., and the Erasmanian reading is often preferred to that supported by all the other Greek authorities with which Stephens is known to have been acquainted: e. g. Matt. vi. 18, viii. 5, ix. 5, &c.<sup>c</sup> A second edition very closely resembling the first both in form and text, having the same preface and the same number of pages and lines, was published in 1549; but the great edition of Stephens is that known as the *Regiæ*, published in 1550.<sup>d</sup> In this a systematic collection of various readings, amounting, it is said, to 2194 (Mill, § 1227), is given for the first time; but still no consistent critical use was made of them. Of the authorities which he quoted most have been since identified. They were the Complutensian text, 10 MSS. of the Gospels, 8 of the Acts, 7 of the Catholic Epistles, 8 of the Pauline Epistles, 2 of the Apocalypse, in all 15 distinct MSS. One of these was the *Codex Bezae* (D). Two have not yet been recognized (comp. Griesbach, N. T. ff. xxiv.-xxxvi.). The collations were made by his son Henry Stephens; but they fail entirely to satisfy the requirements of exact criticism. The various readings of D alone in the Gospels and Acts are more than the whole number given by Stephens; or, to take another example, while only 598 variants of the Complutensian are given, Mill calculates that 700 are omitted (*Prolegg.* § 1226).<sup>e</sup> Nor was the use made of the materials more satisfactory than their quality. Less than thirty changes were made on MS. authority (Mill,

ater (1534) Sepulveda describes the MS. in a letter to Erasmus, giving a general description of its agreement with the Vulgate, and a selection of various readings. In reply to this Erasmus appeals to a supposed *ſædus cum Græcis*, made at the Council of Florence, 1439, in accordance with which Greek copies were to be altered to agree with the Latin; and argues that B may have been so altered. When Sepulveda answers that no such compact was made, Erasmus replies that he had heard from Cuthbert [Tonstall] of Durham that it was agreed that the Greek MSS. should be corrected to harmonize with the Latin, and took the statement for granted. Yet on this simple misunderstanding the credit of the oldest MSS. has been impugned. The influence of the idea in "*ſædus cum Græcis*" has survived all belief in the fact (Tregelles, *Horne*, iv. pp. xv.-xvii.)

<sup>a</sup> An examination of the readings quoted from Colinæus by Mill shows conclusively that he used Cod. 119 of the Gospels, 10 of the Pauline Epistles (8 of the Acts, the MS. marked *α* by Stephens), and probably 83 of the Gospels and 5 of the Catholic Epistles. The readings in 1 Cor. xiv. 2, 1 Pet. v. 2, 2 Pet. iii. 17, seem to be mere errors, and are apparently supported by no authority.

<sup>b</sup> This edition and its counterpart (1549) are known as the "*O mirificam*" edition, from the opening words of the preface: "*O mirificam regis nostri optimi et præstantissimi principis liberalitatem*," in allusion to the new font of small Greek type which the king had ordered to be cut, and which was now used for the first time.

<sup>c</sup> The Complutensian influence on these editions has been over-estimated. In the last verses of the

Apocalypse (§ 3) they follow what Erasmus supplied and not any Greek authority" (Tregelles).

<sup>c</sup> Stephens' own description of his edition cannot be received literally. "*Codices nacti aliquot Ipsa vetustatis specie pene adorandos, quorum copiam nobis bibliotheca regia facile suppeditavit, ex iis ita hunc nostrum recensuimus, ut nullam omnino litteram secus esse pateremur, quam plures iique meliores libri, tanquam testes, comprobarent. Adjuti præterea sumus cum aliis (i. e. Erasmi) tum vero Complutensi editione, quam ad vetustissimos bibliothecæ Leonis X. Pont. codices excudi jusserat Hispan. Card. Fr. Sinenius: quos cum nostris miro consensu sepiissime convenire ex ipsa collatione deprehendimus*" (Pref. edit. 1546-9). In the preface to the third edition, he says that he used the same 16 copies for these editions as for that

<sup>d</sup> "*Novum JESU CHRISTI D. N. Testamentum. Ex Bibliotheca Regia. Lutetiæ. Ex officinâ Roberti Stephani typographi regii, regis typis. MDL.*" In this edition Stephens simply says of his "16 copies," that the first is the Complutensian edition, the second (*Codex Bezae*) "a most ancient copy, collated by friends in Italy; 3-8, 10, 15, copies from the Royal Library; cætera sunt ea quæ undique corrogare licuit" (Pref.).

<sup>e</sup> According to Scrivener (*Introd.* p. 300), the Complutensian differs from Stephens' third edition in more than 2,300 places, in which it is cited correctly only 54 times, falsely 56 times, and in more than 1,690 places (not including itacisms and mere errata) the variation is not noted. Scrivener has given in the same work (pp. 349-368) a full collation of the Complutensian N. T. with the Elzevir edition of 1624. The text of the Complutensian has been carefully reprinted by Gratz, Tübing. 1821, new ed., Mentz, 1827. ▲

1228); and except in the Apocalypse, which follows the Complutensian text most closely, "it hardly ever deserts the last edition of Erasmus" (Tregelles). Numerous instances occur in which Stephens deserts his former text and *all his MSS.* to restore an Erasmusian reading. Mill quotes the following examples among others, which are the most interesting, because they have passed from the Stephanic text into our A. V.: Matt. ii. 11, εἶρον for εἶδον (without the authority of any Greek MS., as far as I know, though Scholz says "*cum codd. multis*"), iii. 8, καρπὸς ἀξίους for καρπὸν ἀξίον. Mark vi. 33 *add.* οἱ ἄχαιοι: xvi. 8 *add.* ταχέ. Luke vii. 31 *add.* εἶπε δὲ ὁ κύριος. John xiv. 30 *add.* τούτου. Acts v. 23 *add.* ἔξω. Rom. ii. 5 *om.* καὶ before δικαιοκρισίας. James v. 9, κατακριθῆτε for κριθῆτε. Prescription as yet occupied the place of evidence; and it was well that the work of the textual critic was reserved for a time when he could command trustworthy and complete collations. Stephens published a fourth edition in 1551 (Geneva), which is only remarkable as giving for the first time the present division into verses.

5. *The editions of Beza and Elzevir.*—Nothing can illustrate more clearly the deficiency among scholars of the first elements of the textual criticism of the N. T. than the annotations of BEZA (1556). This great divine obtained from H. Stephens a copy of the N. T. in which he had noted down various readings from about twenty-five MSS. and from the early editions (Cf. Marsh, on Michaelis, ii. 858-60), but he used the collection rather for exegetical than for critical purposes. Thus he pronounced in favor of the obvious interpolations in Matt. i. 11; John xvii. 13, which have consequently obtained a place in the margin of the A. V., and elsewhere maintained readings which, on crit-

ical grounds, are wholly indefensible: Matt. ii. 17 Mark iii. 16, xvi. 2. The interpolation in Apoc. xi. 11, καὶ ὁ ἄγγελος εἰσπῆκει has passed into the text of the A. V. The Greek text of Beza (dedicated to Queen Elizabeth) was printed by H. Stephens in 1565, and again in 1576; but his chief edition was the third, printed in 1582, which contained readings from the *Codices Bezae and Claromontanus*. The reading followed by the text of A. V. in Rom. vii. 6 (ἀποθανόντες for ἀποθανόντες), which is supported by no Greek MS. or version whatever, is due to this edition. Other editions by Beza appeared in 1588-89, 1598, and his (third) text found a wide currency.<sup>a</sup> Among other editions which were wholly or in part based upon it, those of the ELZEVIRI alone require to be noticed. The first of these editions, famous for the beauty of their execution, was published at Leyden in 1624. It is not known who acted as editor, but the text is mainly that of the third edition of Stephens. Including every minute variation in orthography, it differs from this in 278 places (Scrivener, *N. T.* Cambr. 1860, p. vi.). In these cases it generally agrees with Beza, more rarely it differs from both, either by typographical errors (Matt. vi. 34, xv. 27; Luke x. 6 *add.* δ, xi. 12, xiii. 19; John xiii. 6) or perhaps by manuscript authority (Matt. xxiv. 9, *om.* τῶν; Luke vii. 12, viii. 29; John xii. 17, ἔρι). In the second edition (Leyden, 1633) it was announced that the text was that which was universally received (*textum ergo habes nunc ab omnibus receptum*), and the declaration thus boldly made was practically fulfilled. From this time the Elzevirian text was generally reprinted on the continent, and that of the third edition of Stephens in England, till quite recent times. Yet it has been shown that these texts

<sup>a</sup> The edition of Beza of 1589 and the third of Stephens may be regarded as giving the fundamental Greek text of the A. V. In the following passages in the Gospels the A. V. differs from Stephens, and agrees with Beza:—

- Matt. ix. 33, *om.* ὄτι. Yet this particle might be omitted in translation.  
 "xxi. 7, ἐπεκάθισαν for ἐπεκάθισεν.  
 "xxiii. 13, 14, transposed in Steph.  
 Mark vi. 29, *om.* τῶ.  
 "viii. 24, ὡς δένδρα for ὄτι ὡς δένδρα.  
 "ix. 40, ἡμῶν for ὑμῶν, "against most MSS." as Beza remarks.  
 Luke i. 35, *add.* ἐκ σοῦ (not in the 1st ed.)  
 "ii. 22, αὐτῆς for αὐτῶν.  
 "x. 22, *om.* καὶ στραφεῖς—εἶπε. Yet given in marg., and noticed by Beza.  
 "xv. 26, *om.* αὐτοῦ.  
 "xvii. 36, *add.* verse. The omission noticed in marg. and by Beza.  
 "xx. 31, *add.* καὶ. So Beza 1st ed., but not 3d (by error?)  
 John xiii. 31. ὅτε οὖν ἐξήλαθε. "Against all the old MSS." (Beza).  
 "xviii. 24, *add.* οὖν.

[<sup>1</sup>] Others it agrees with Stephens against Beza:—

- Matt. i. 23, καλέουσι for καλέσεις. The marg. may be intended to give the other reading.  
 "xx. 15, εἰ ἴσῃ.  
 Mark xvi. 20, *add.* Ἀμὴν at the end.  
 John iv. 5, Συχάρ for Συχάρ.  
 John xviii. 20, πάντοτε for πάντοθεν "So in the old MSS." (Beza).

In other parts of the N. T. I have noticed the following passages in which the A. V. agrees with the text of Beza's edition of 1589 against Stephens (Acts

xvii. 25, xxi. 8, xxii. 25, xxiv. 13, 18; Rom. vii. 6 (note), viii. 11 (note), xii. 11, xvi. 20; 1 Cor. v. 11, xv. 31; 2 Cor. iii. 1, vi. 15, vii. 12, 16, x. 10; Col. i. 1 [2?], 24, ii. 10 [13?]; 1 Thess. ii. 15; 2 Thess. ii. 4; Tit. ii. 10; Hebr. ix. 2 (note); James ii. 18 (note), iv. 13, 15, v. 12; 1 Pet. i. 4 (note); 2 Pet. iii. 7; 1 John i. 4, ii. 23 (in italics), iii. 16; 2 John 8; 3 John 7; Jude 24; Apoc. iii. 1, v. 11, vii. 2, 10, 14, xvii. 11, x. 1, 2, xiii. 3, xiv. 18, xvi. 14, xvii. 4. On the other hand the A. V. agrees with Stephens against Beza, Acts iv. 27, xvi. 17, xxv. 6 (note), xxvi. 8; Rom. v. 17; 1 Cor. iii. 3, vii. 29, x. 22, x. 38 (error of press?); 2 Cor. iii. 14; Gal. iv. 17 (note); Phil. i. 23; Tit. ii. 7; Hebr. x. 2; 1 Pet. ii. 21, iii. 21; 2 Pet. ii. 12; Apoc. iv. 10, ix. 5, xii. 14, xiv. 2, xviii. 6, xix. 1. The enumeration given by Scrivener (*A Supplement to the Authorized Version*, pp. 7, 8) differs slightly from this, which includes a few more passages; other passages are doubtful: Acts vii. 26, xv. 32, xix. 27; 2 Cor. xi. 1, xiii. 4; Apoc. iv. 8, xviii. 16. In other places, Matt. ii. 11, x. 10; John [viii. 6, xii. 26, xvi. 25 A. V. ed. 1611.] xviii. 1; Acts xxvii. 29; 2 Pet. i. 1, they follow neither. In James iv. 15, ἴσοςον seems to be a conjecture. [No; A. V. follows "Ed. St. 2. Wechel prob. Erasmo." See Wetstein.—A.] The additional notes on readings, Matt. i. 11, xxvi. 26; Mark ix. 16; Luke ii. 88; John xviii. 13; Acts xxv. 6; Eph. vi. 9; James ii. 18; 2 Pet. ii. 2, 11, 18; 1 John ii. 23; 2 John 8, all come from Beza.

\* In the following passages, Acts xxi. 8; Apoc. vii. 2, 14, xvii. 4; 1 Pet. ii. 21 (ἡμῶν, ἡμῖν), Apoc. ix. 5, xii. 14, xiv. 2, xvii. 6, xix. 1, the statements above do not apply to the text of Beza's edition of 1589-89. In 1 Pet. ii. 21 the A. V. follows Beza's ed. of 1589 against Stephens in adding καὶ, *even*.—Mr. Westcott's enumeration is by no means complete. A.

were substantially formed on late MS. authority, without the help of any complete collations or of any readings (except of D) of a first class MS., without a good text of the Vulgate, and without the assistance of oriental versions. Nothing short of a miracle could have produced a critically pure text from such materials and those treated without any definite system. Yet, to use Bentley's words, which are not too strong, "the text stood as if an apostle were R. Stephens' compositor." Habit hallowed what was commonly used, and the course of textual polemics contributed not a little to preserve without change the common field on which controversialists were prepared to engage.

(ii.) *From Mill to Scholz.*—6. The second period of the history of the printed text may be treated with less detail. It was influenced, more or less, throughout by the *textus receptus*, though the authority of this provisional text was gradually shaken by the increase of critical materials and the bold enunciation of principles of revision. The first important collection of various readings—for that of Stephens was too imperfect to deserve the name—was given by WALTON in the 6th volume of his Polyglott. The Syriac, Arabic, Æthiopic, and Persian versions of the N. T., together with the readings of *Cod. Alex.*, were printed in the 5th volume together with the text of Stephens. To these were added in the 6th the readings collected by Stephens, others from an edition by Wechel at Frankfort (1597), the readings of the *Codices Bezae and Clusomont.*, and of fourteen other MSS. which had been collated under the care of Archbp. Ussher. Some of these collations were extremely imperfect (Scrivener, *Cod. Aug.* p. lxvii.; *Introduction*, p. 149), as appears from later examination, yet it is not easy to overrate the importance of the exhibition of the testimony of the oriental versions side by side with the current Greek text. A few more MS. readings were given by CURCELLÆUS (de Courcelles) in an edition published at Amsterdam, 1658, &c., but the great names of this period continue to be those of Englishmen. The readings of the Coptic and Gothic versions were first given in the edition of (Bp. Fell) Oxford, 1675; ed. Gregory, 1703; but the greatest service which Fell rendered to the criticism of the N. T. was the liberal encouragement which he gave to Mill. The work of Mill (Oxon. 1707; Amstelod. [also Rotterod.] ed. Küster, 1710; other copies have on the title-page 1723, 1746, &c.) marks an epoch in the history of the N. T. text. There is much in it which will not bear the test of historical inquiry, much that is imperfect in the materials, much that is crude and capricious in criticism, but when every drawback has been made, the edition remains a splendid monument of the labors of a life. The work occupied Mill about thirty years, and was finished only a fortnight before his death. One great merit of Mill was that he recognized the importance of each element of critical evidence, the testimony of MSS. versions and citations, as well as internal evidence. In particular he asserted the claims of the Latin version and maintained, against much opposition, even from his patron Bp. Fell, the great value of patristic quotations. He had also a clear view of the necessity of forming a general estimate of the character of each authority, and described in detail those of which he made use. At the same time he gave a careful analysis of the origin and history of previous texts, a labor which, even now, has in many parts not been superseded.

But while he pronounced decided judgments on various readings both in the notes and, without any reference or plan, in the Prolegomena, he did not venture to introduce any changes into the printed text. He repeated the Stephanic text of 1550 without any intentional change, and from his edition this has passed (as Mill's) into general use in England. His caution, however, could not save him from vehement attacks. The charge which was brought against Walton<sup>a</sup> of unsettling the sacred text, was renewed against Mill, and, unhappily, found an advocate in Whitby (*Examen variorum lectionum J. Millii S. T. P.* annexed to his Annotations), a man whose genius was worthy of better things. The 30,000 various readings which he was said to have collected formed a common-place with the assailants of the Bible (Bentley, *Remarks*, iii. 348–358, ed. Dyce). But the work of Mill silently produced fruit both in England and Germany. Men grew familiar with the problems of textual criticism and were thus prepared to meet them fairly.

7. Among those who had known and valued Mill was R. BENTLEY, the greatest of English scholars. In his earliest work (*Epist. ad J. Millium*, ii. 362, ed. Dyce), in 1691, Bentley had expressed generous admiration of the labors of Mill, and afterwards, in 1713, in his *Remarks*, triumphantly refuted the charges of impiety with which they were assailed. But Mill had only "accumulated various readings as a promptuary to the judicious and critical reader;" Bentley would "make use of that promptuary . . . and not leave the reader in doubt and suspense" (*Answer to Remarks*, iii. 503). With this view he announced, in 1716, his intention of publishing an edition of the Greek Testament on the authority of the oldest Greek and Latin MS., "exactly as it was in the best examples at the time of the Council of Nice, so that there shall not be twenty words nor even particles' difference" (iii. 477 to Archbp. Wake). Collations were shortly afterwards undertaken both at Paris (including C) and Rome (B), and Bentley himself spared neither labor nor money. In 1720 he published his *Proposals* and a *Specimen* (Apoc. xxii.). In this notice he announces his design of publishing "a new edition of the Greek and Latin . . . as represented in the most ancient and venerable MSS. in Greek and Roman (?) capital letters." In this way "he believes that he has retrieved (except in a very few places) the true exemplar of Origen . . . and is sure that the Greek and Latin MSS., by their mutual assistance, do so settle the original text to the smallest nicety as cannot be performed now in any *classic* author whatever." He proposed to add all the various readings of the first five centuries, "and what has crept into any copies since is of no value or authority." The proposals were immediately assailed by Middleton. A violent controversy followed, but Bentley continued his labors till 1729 (Dyce, iii. 483). After that time they seemed to have ceased. The troubles in which Bentley was involved render it unnecessary to seek for any other explanation of the suspension of his work. The one chapter which he published shows clearly enough that he was prepared to deal with variations in his copies, and

<sup>a</sup> Especially by the great Puritan Owen in his *Considerations*. Walton replied with severity in *The Considerator contra deum*.

there is no sufficient reason for concluding that the disagreement of his ancient codices caused him to abandon the plan which he had proclaimed with undoubting confidence (Scrivener, *Cod. Aug.* p. xix.). A complete account of Bentley's labors on the N. T. is prepared for publication (1861) by the Rev. A. A. Ellis, under the title *Bentleii Critica Sacra*. [Published in 1862. — A.]

8. The conception of Bentley was in advance both of the spirit of his age and of the materials at his command. Textual criticism was forced to undergo a long discipline before it was prepared to follow out his principles. During this time German scholars hold the first place. Foremost among these was BENGEL (1687-1752), who was led to study the variations of the N. T. from a devout sense of the infinite value of every divine word. His merit in discerning the existence of families of documents has been already noticed (i. § 12); but the evidence before him was not sufficient to show the paramount authority of the most ancient witnesses. His most important rule was, *Proclivi scriptioni prestat ardua*; but except in the Revelation he did not venture to give any reading which had not been already adopted in some edition (*Prodromus N. T. Gr. recte cauteque adnandæ*, 1725; *Nov. Testam.* . . . 1734; *Apparatus criticus*, ed. 2<sup>da</sup> cura P. D. Burk, 1763). But even the partial revision which Bengel had made exposed him to the bitterest attacks; and Wetstein, when at length he published his great edition, reprinted the received text. The labors of WETSTEIN (1693-1754) formed an important epoch in the history of the N. T. While still very young (1716) he was engaged to collate for Bentley, and he afterwards continued the work for himself. In 1733 he was obliged to leave Basle, his native town, from theological differences, and his Greek Testament did not appear till 1751-52 at Amsterdam. A first edition of the *Prolegomena* had been published previously in 1730; but the principles which he then maintained were afterwards much modified by his opposition to Bengel (comp. Preface to *N. T. cura Gerardi de Trajecto*, ed. 2<sup>da</sup>, 1735).<sup>a</sup> The great service which Wetstein rendered to sacred criticism was by the collection of materials. He made nearly as great an advance on Mill as Mill had made on those who preceded him. But in the use of his materials he showed little critical tact; and his strange theory of the *Latinization* of the most ancient MSS. proved for a long time a serious drawback to the sound study of the Greek text (*Prolegomena*, ed. Venier, 1766, ed. Lotze, 1831).

9. It was the work of GRIESBACH (1745-1812) to place the comparative value of existing docu-

ments in a clearer light. The time was now come when the results of collected evidence might be set out; and Griesbach, with singular sagacity, courtesy, and zeal, devoted his life to the work. His first editions (*Synopsis*, 1774; *Nov. Test.* ed. 1, 1777-75) were based for the most part on the critical collections of Wetstein. Not long afterwards MATTHEI published an edition based on the accurate collation of Moscow MSS. (*N. T. ex Codd. Mosquensibus* . . . Riga, 1732-83, 12 vols.; ed. 2<sup>da</sup>, 1803-1807, 3 vols.). These new materials were further increased by the collections of Alter (1786-87), Birch, Adler, and Moldenhawer (1788-1801), as well as by the labors of Griesbach himself. And when Griesbach published his second edition (1796-1806, 3d ed. of vol. i. by D. Schulz, 1827) he made a noble use of the materials thus placed in his hands. His chief error was that he altered the received text instead of constructing the text afresh; but in acuteness, vigor, and candor he stands below no editor of the N. T., and his judgment will always retain a peculiar value. In 1805 he published a manual edition with a selection of readings which he judged to be more or less worthy of notice, and this has been often reprinted (comp. *Symbolæ Criticæ*, 1785-1793; *Opuscula*, ed. Gabler, 1824-25; *Commentarius Criticus*, 1798-1811; White's *Criseos Griesbachianæ* . . . *Synopsis*, 1811).

10. The edition of SCHOLZ contributed more in appearance than reality to the furtherance of criticism (*N. T. ad fidem test. crit.* . . . 1830-1836). This laborious scholar collected a greater mass of various readings than had been brought together before, but his work is very inaccurate, and his own collations singularly superficial. Yet it was of service to call attention to the mass of unused MSS.; and, while depreciating the value of the more ancient MSS., Scholz himself showed the powerful influence of Griesbach's principles by accepting frequently the Alexandrine in preference to the Constantinopolitan reading (i. § 14. *Comp. Biblisch-Kritische Reise* . . . 1823; *Curæ Criticæ* . . . 1820-1845).<sup>b</sup>

(iii.) *From Lachmann to the present time.* — 11. In the year after the publication of the first volume of Scholz's N. T. a small edition appeared in a series of classical texts prepared by LACHMANN († 1851). In this the admitted principles of scholarship were for the first time applied throughout to the construction of the text of the N. T. The prescriptive right of the *textus receptus* was wholly set aside, and the text in every part was regulated by ancient authority. Before publishing his small edition (*N. T. Gr. ex recensione C. Lachmanni*, Berol. 1831) Lachmann had given a short

<sup>a</sup> Gerhard von Maestricht's *N. T.* first appeared in 1711, with a selection of various readings, and a series of canons composed to justify the received text. Some of these canons deserve to be quoted, as an illustration of the bold assertion of the claims of the *printed text*, as such.

CAN. ix "Unus codex non facit variantem lectionem . . . modo recepta lectio sit secundum analogiam fidei" . . .

CAN. x "Neque duo codices faciunt variantem lectionem . . . contra receptam et editam et sam sensu ætione . . . maxime in omitendo" . . .

CAN. xiv "Versiones etiam antiquissimæ ab editis et manuscriptoris differentes . . . ostendunt oscitantiam interpretis

CAN. xvii. "Citationes Patrum textus N. T. non facere debent variantem lectionem."

CAN. xxix. "Efficacior lectio textus recepti."

As examples of Can. ix. we find, Matt. i. 16, *χριστός* for *ἰ. ὁ λέγ. χρ.*; i. 25, *om. τὸν πρωτότοκον*; Rom. i. 31, *om. ἀσπύδους*. On 1 John v. 7, 8, the editor refers to the Complutensian edition, and adds: "Ex hæc editio, quæ ad fidem prestantissimorum MSS. edita est, indicium clarum habemus, quod in plurimis manuscriptoris locus sic inventus et lectus sit" (p. 35).

<sup>b</sup> \* In a pamphlet published in 1845, Scholz says that if he should prepare another edition of the N. T., he should receive into the text *most* of those readings which he had designated in the inner margin of his Greek Testament as Alexandrine. See the quotation in Scrivener's *Introd.* p. 840.

account of his design (*Stud. u. Krit.* 1830, iv.), to which he referred his readers in a brief postscript, but the book itself contained no Apparatus or Prolegomena, and was the subject of great and painful misrepresentations. When, however, the distinct assertion of the primary claims of evidence throughout the N. T. was more fairly appreciated, Lachmann felt himself encouraged to undertake a larger edition, with both Latin and Greek texts. The Greek authorities for this, limited to the primary uncial MSS. (A B C D P Q T Z E<sub>2</sub> G<sub>2</sub> D<sub>2</sub> H<sub>3</sub>), and the quotations of Irenæus and Origen, were arranged by the younger Buttmann. Lachmann himself prepared the Latin evidence (Tregelles, *Hist. of Gr. Text*, p. 101), and revised both texts. The first volume appeared in 1842, the second was printed in 1845, but not published till 1850, owing in a great measure to the opposition which Lachmann found from his friend De Wette (*N. T. ii. Pref.* iv.; Tregelles, p. 111). The text of the new edition did not differ much from that of the former; but while in the former he had used Western (*Latin*) authority only to decide in cases where Eastern (*Greek*) authorities were divided; in the latter he used the two great sources of evidence together. Lachmann delighted to quote Bentley as his great precursor (§ 7); but there was an important difference in their immediate aims. Bentley believed that it would be possible to obtain the true text directly by a comparison of the oldest Greek authorities with the oldest MSS. of the Vulgate. Afterwards very important remains of the earlier Latin versions were discovered, and the whole question was complicated by the collection of fresh documents. Lachmann therefore wished in the first instance only to give the current text of the fourth century, which might then become the basis of further criticism. This at least was a great step towards the truth, though it must not be accepted as a final one. Griesbach had changed the current text of the 15th and 16th centuries in numberless isolated passages, but yet the late text was the foundation of his own; Lachmann admitted the authority of antiquity everywhere, in orthography, in construction, in the whole complexion and arrangement of his text. But Lachmann's edition, great as its merits are as a first appeal to ancient evidence, is not without serious faults. The materials on which it was based were imperfect. The range of patristic citations was limited arbitrarily. The exclusion of the oriental versions, however necessary at the time, left a wide margin for later change (t. i. *Pref.* p. xxiv.). The neglect of primary cursives often necessitated absolute confidence on slender MS. authority. Lachmann was able to use, but little fitted to collect, evidence (t. i. pp. xxv., xxxviii., xxxix.). It was, however, enough for him to have consecrated the highest scholarship by devoting it to the service of the N. T., and to have claimed the Holy Scriptures as a field for reverent and searching criticism. (The best account of Lachmann's plan and editor is in Tregelles, *Hist. of Printed Text*, pp. 97-115. His most important critics are Fritzsche, *De Conformatione N. T. Critica* . . . 1841; Tischendorf, *Prolegg.* pp. cii. - cxii.)

12. The chief defects of Lachmann's edition arise from deficiency of authorities. Another German scholar, TISCHENDORF, has devoted twenty years to enlarging our accurate knowledge of ancient MSS. The first edition of Tischendorf (1841) has now no special claims for notice. In his second (Leipsic) edition (1849) he fully accepted the great principle of Lachmann (though he widened the range of ancient authorities), that the text "must be sought solely from ancient authorities, and not from the so-called received edition" (*Pref.* p. xii), and gave many of the results of his own laborious and valuable collations. The size of this manual edition necessarily excluded a full exhibition of evidence: the editor's own judgment was often arbitrary and inconsistent; but the general influence of the edition was of the very highest value, and the text, as a whole, probably better than any which had preceded it. During the next few years Tischendorf prosecuted his labors on MSS. with unwearied diligence, and in 1855-59 he published his third (seventh<sup>a</sup>) critical edition. In this he has given the authorities for and against each reading in considerable detail, and included the chief results of his later discoveries. The whole critical apparatus is extremely valuable, and absolutely indispensable to the student. The text, except in details of orthography, exhibits generally a retrograde movement from the most ancient testimony. The Prolegomena are copious and full of interest.

\* In Oct. 1864 Tischendorf published the 1st *Lieferung* of his 8th critical edition of the N. T., of which 5 parts have now appeared, extending to John vi. 23, and the 6th part, completing the Gospels, has probably by this time (May, 1869) been issued in Germany. The critical apparatus is greatly enlarged, and in settling the text, Tischendorf attaches more importance to the most ancient authorities, and in particular, to the agreement of the oldest Greek and Latin MSS., than he did in the preceding edition. A.

13. Meanwhile the sound study of sacred criticism had revived in England. In 1844 TREGELLES published an edition of the Apocalypse in Greek and English, and announced an edition of the N. T.<sup>b</sup> From this time he engaged in a systematic examination of all unpublished uncial MSS., going over much of the same ground as Tischendorf, and comparing results with him. In 1854 he gave a detailed account of his labors and principles (*An Account of the Printed Text of the Greek New Testament* . . . London), and again in his new edition of Horne's *Introduction* (1856), [to which "additions" and a "Postscript" were published in 1860. On the remarkable reading *μονογενής θεός*, John i. 18, discussed in this Postscript, there is an article in the *Bibl. Sacra* for Oct. 1861, pp. 840-872. — A.] The first part of his Greek Testament, containing St. Matthew and St. Mark, appeared in 1857; the second, completing the Gospels, has just appeared (1861). [The third, Acts and Cath. Epistles, was published in 1865; the fourth, Romans to 2 Thess., in 1869. — A.] In this he gives at length the evidence of all uncial MSS., and of some peculiarly valuable cursives: of all versions up to the 7th century: of all Fathers to Eusebius inclusive. The

<sup>a</sup> The second and third editions were Græco-Latin editions, published at Paris in 1842, of no critical value. *Prolegg.* xxxiv.-v.). [The 2d edition contained no Latin text. — A.] The fifth was a simple text, with the variations of Elzevir, chiefly a reprint of the

(fourth) edition of 1849. The sixth was a Triglott N. T. 1854-55 (Greek, Latin, German); 1858 (Greek and Latin).

<sup>b</sup> Dr. Tregelles' first specimen was published in 1839 (*Hist. of Printed Text*, p. 163).

latini Vulgate is added, chiefly from the *Cod. Amiatinus* with the readings of the Clementine edition. This edition of Tregelles differs from that of Lachmann by the greater width of its critical foundation; and from that of Tischendorf by a more constant adherence to ancient evidence. Every possible precaution has been taken to insure perfect accuracy in the publication, and the work must be regarded as one of the most important contributions, as it is perhaps the most exact, which has been yet made to the cause of textual criticism. The editions of Knapp (1797, &c.), Vater (1824), Tittmann (1820, &c.), and Hahn (1840, &c.) [also Theile, 1844, &c.] have no peculiar critical value.<sup>a</sup> Meyer (1829, &c.) paid greater attention to the revision of the text which accompanies his great commentary; but his critical notes are often arbitrary and unsatisfactory. In the Greek Testament of Alford, as in that of Meyer, the text is subsidiary to the commentary; but it is impossible not to notice the important advance which has been made by the editor in true principles of criticism during the course of its publication. The fourth edition of the 1st vol. (1859) contains a clear enunciation of the authority of ancient evidence, as supported both by its external and internal claims, and corrects much that was vague and subjective in former editions. Other annotated editions of the Greek Testament, valuable for special merits, may be passed over as having little bearing on the history of the text. One simple text, however, deserves notice (Camb. 1860, [ed. auctior et emend., 1862]), in which, by a peculiar arrangement of type, Scrivener has represented at a glance all the changes which have been made in the text of Stephens (1550), Elzevir (1624), and Beza (1565), by Lachmann, Tischendorf, and Tregelles.

14. Besides the critical editions of the text of the N. T., various collections of readings have been published separately, which cannot be wholly omitted. In addition to those already mentioned (§ 9), the most important are by Rinck, *Lucubratio Critica*, 1830; Reiche, *Codicum MSS. N. T. Gr. aliquot insigniorum in Bibl. Reg. Paris . . . collatio* 1847; Scrivener, *A Collection of about Twenty Greek MSS. of the Holy Gospels . . .* 1853; *A Transcript of the Cod. Aug., with a full Collation of Fifty MSS.* 1859; and E. de Muralt, of Russian MSS. (N. T. 1848). The chief contents of the splendid series of Tischendorf's works (*Codex Ephraemi Rescriptus*, 1843; *Codex Cluromontanus*, 1852; *Monumenta sacra inedita*, 1846-1856; [*Mon. sacra in ed. nova coll.*, vol. i. (1855), ii. (1857), iii. (1860), v. (1865), vi. (1869);] *Anecdota sacra et profana*, 1855, [new ed., enlarged, 1861]; *Notitia Cod. Sinaitici*, 1860; [*Codex Sinaiticus*, 1862, *N. T. Sinaiticum*, 1863, and *N. T. Gr. ex Sin. Cod.* 1865; *Appendix Codd. Sin. Vat. Alex.* 1867; *Nov. Test. Vat.* 1867, and *Appendix Nov. Test. Vaticanæ*, 1869]) are given in his own and other editions of the N. T. [His editions of important Latin MSS., *Evangelium Palatinum* (ante-Hieronymian), 1847, and *Cod. Amiatinus*, 1850, new ed. 1854, may also be mentioned here.—A.] The chief works on the history of the printed text are those of Tregelles, *Hist. of Printed Text*, 1854; Reuss, *Geschichte d. H. Schrift*. §§ 395 ff., where are very complete bibliographical references; and

the Prolegomena of Mill, Wetstein, Griesbach, and Tischendorf. To these must be added the promised (1861) *Introduction* of Mr. Scrivener.

### III. PRINCIPLES OF TEXTUAL CRITICISM.

The work of the critic can never be slayed by definite rules. The formal enunciation of principles is but the first step in the process of revision. Even Lachmann, who proposed to follow the most directly mechanical method, frequently allowed play to his own judgment. It could not, indeed, be otherwise with a true scholar; and if there is need anywhere for the most free and devout exercise of every faculty, it must be in tracing out the very words of the Apostles and of the Lord himself. The justification of a method of revision lies in the result. Canons of criticism are more frequently corollaries than laws of procedure. Yet such canons are not without use in marking the course to be followed, but they are intended only to guide, and not to dispense with the exercise of tact and scholarship. The student will judge for himself how far they are applicable in every particular case; and no exhibition of general principles can supersede the necessity of a careful examination of the characteristics of separate witnesses and of groups of witnesses. The text of Holy Scripture, like the text of all other books, depends on evidence. Rules may classify the evidence and facilitate the decision, but the final appeal must be to the evidence itself. What appears to be the only sound system of criticism will be seen from the rules which follow. The examples which are added can be worked out in any critical edition of the Greek Testament, and will explain better than any lengthened description the application of the rules.

1. *The text must throughout be determined by evidence without allowing any prescriptive right to printed editions.* In the infancy of criticism it was natural that early printed editions should possess a greater value than individual MSS. The language of the Complutensian editors, and of Erasmus and Stephens, was such as to command respect for their texts prior to examination. Comparatively few manuscripts were known, and none thoroughly; but at present the whole state of the question is altered. We are now accurately acquainted with the materials possessed by the two latter editors and with the use which they made of them. If there is as yet no such certainty with regard to the basis of the Complutensian text, it is at least clear that no high value can be assigned to it. On the other hand we have, in addition to the early apparatus, new sources of evidence of infinitely greater variety and value. To claim for the printed text any right of possession is, therefore, to be faithless to the principles of critical truth. The received text may or may not be correct in any particular case, but this must be determined solely by an appeal to the original authorities. Nor is it right even to assume the received text as our basis. The question before us is not *What is to be changed?* but, *What is to be read?* It would be superfluous to insist on this if it were not that a natural infirmity makes every one unjustly conservative in criticism. It seems to be irreverent to disturb an old belief, when real irreverence lies in perpetuating an error, however slight it may appear to be. This holds good universally. In Holy Scripture nothing

<sup>a</sup> • The unwary student should be warned against the editions of Hahn and Buttman (1856, &c.). See

Appendix to Norton's *Statement of Reasons*, 2d ed. p. 443 ff. and *Bibl. Sacra* for Cct. 1857, p. 877 ff. A

can be indifferent; and it is the supreme duty of the critic to apply to details of order and orthography the same care as he bestows on what may be judged weightier points. If, indeed, there were anything in the circumstances of the first publication of the N. T. which might seem to remove it from the ordinary fortunes of books, then it would be impossible not to respect the pious sentiment which accepts the early text as an immediate work of Providence. But the history shows too many marks of human frailty to admit of such a supposition. The text itself contains palpable and admitted errors (Matt. ii. 11, *ἔδρον*; Acts viii. 37, ix. 5, 6; Apoc. v. 14, xxii. 11; not to mention 1 John v. 7), in every way analogous to those which occur in the first classical texts. The conclusion is obvious, and it is superstition rather than reverence which refuses to apply to the service of Scripture the laws which have restored so much of their native beauty to other ancient writings. It may not be possible to fix the reading in every case finally, but it is no less the duty of the scholar to advance as far as he can and mark the extreme range of uncertainty.

2. *Every element of evidence must be taken into account before a decision is made.* Some uncertainty must necessarily remain; for, when it is said that the text must rest upon evidence, it is implied that it must rest on an examination of the whole evidence. But it can never be said that the mines of criticism are exhausted. Yet even here the possible limits of variation are narrow. The available evidence is so full and manifold that it is difficult to conceive that any new authorities could do more than turn the scale in cases which are at present doubtful. But to exclude remote chances of error it is necessary to take account of every testimony. No arbitrary line can be drawn excluding MSS. versions or quotations below a certain date. The true text must (as a rule) explain all variations, and the most recent forms may illustrate the original one. In practice it will be found that certain documents may be neglected after examination, and that the value of others is variously affected by determinable conditions; but still, as no variation is inherently indifferent, no testimony can be absolutely disregarded.

3. *The relative weight of the several classes of evidence is modified by their generic character.* Manuscripts, versions, and citations, the three great classes of external authorities for the text, are obviously open to characteristic errors. The first are peculiarly liable to errors from transcription (comp. i. § 31 ff.). The two last are liable to this cause of corruption and also to others. The genius of the language into which the translation is made may require the introduction of connecting particles or words of reference, as can be seen from the italicised words in the A. V. Some uses of the article and of prepositions cannot be expressed or distinguished with certainty in translation. Glosses or marginal additions are more likely to pass into the text in the process of translation than in that of transcription. Quotations, on the other hand, are often partial or from memory, and long use may give a traditional fixity to a slight confusion or adaptation of passages of Scripture. These grounds of inaccuracy are, however, easily determined, and there is generally little difficulty in deciding whether the rendering of a version or the testimony of a Father can be fairly quoted. Moreover, the most important versions are so close to the Greek text

that they preserve the order of the original with scrupulous accuracy, and even in representing minute shades of expression, observe a constant uniformity which could not have been anticipated (comp. Lachmann, *N. T.* i. p. xlv. ff.). It is a far more serious obstacle to the critical use of these authorities that the texts of the versions and Fathers generally are in a very imperfect state. With the exception of the Latin Version there is not one in which a thoroughly satisfactory text is available; and the editions of Clement and Origen are little qualified to satisfy strict demands of scholarship. As a general rule the evidence of both may be trusted where they differ from the late text of the N. T., but where they agree with this against other early authorities, there is reason to entertain a suspicion of corruption. This is sufficiently clear on comparing the old printed text of Chrysostom with the text of the best MSS. But when full allowance has been made for all these drawbacks, the mutually corrective power of the three kinds of testimony is of the highest value. The evidence of versions may show at once that a MS. reading is a transcriptional error: John i. 14, *ο εἰπών* (B C); Jude 12, *ἀπάταις* (A); 1 John i. 2, *καὶ ὁ ἑοράκαμεν* (B), ii. 8, *σκία for σκοτία* (A), iii. 21, *ἔχει* (B); 2 Pet. ii. 16, *ἐν ἀνθρώποις*; and the absence of their support throws doubt upon readings otherwise of the highest probability: 2 Pet. ii. 4, *σειροῖς*, ii. 6, *ἀσεβέσις*. The testimony of an early Father is again sufficient to give preponderating weight to slight MS. authority: Matt. i. 18, *τοῦ δὲ χριστοῦ ἡ γένεσις*; and since versions and Fathers go back to a time anterior to any existing MSS., they furnish a standard by which we may measure the conformity of any MS. with the most ancient text. On questions of orthography MSS. alone have authority. The earliest Fathers, like our own writers, seem (if we may judge from printed texts) to have adopted the current spelling of their time, and not to have aimed at preserving in this respect the dialectic peculiarities of N. T. Greek. But MSS., again, are not free from special idiosyncrasies (if the phrase may be allowed) both in construction and orthography, and unless account be taken of these a wrong judgment may be made in isolated passages.

4. *The mere preponderance of numbers is in itself of no weight.* If the multiplication of copies of the N. T. had been uniform, it is evident that the number of later copies preserved from the accidents of time would have far exceeded that of the earlier, yet no one would have preferred the fuller testimony of the 13th to the scantier documents of the 4th century. Some changes are necessarily introduced in the most careful copying, and these are rapidly multiplied. A recent MS. may have been copied from one of great antiquity, but this must be a rare occurrence. If all MSS. were derived by successive reproduction from one source, the most ancient, though few, would claim supreme authority over the more recent mass. As it is, the case is still stronger. It has been shown that the body of later copies was made under one influence. They give the testimony of one church only, and not of all. For many generations Byzantine scribes must gradually, even though unconsciously, have assimilated the text to their current form of expression. Meanwhile the propagation of the Syrian and African types of text was left to the casual reproduction of an ancient exemplar. These were necessarily far rarer than later and modified copies, and at the same time likely to

be far less used. Representatives of one class were therefore multiplied rapidly, while those of other classes barely continued to exist. From this it follows that MSS. have no abstract numerical value. Variety of evidence, and not a crowd of witnesses, must decide on each doubtful point; and it happens by no means rarely that one or two MSS. alone support a reading which is unquestionably right (Matt. i. 25, v. 4, 5; Mark ii. 22, &c.).

5. *The more ancient reading is generally preferable.* This principle seems to be almost a truism. It can only be assailed by assuming that the recent reading is itself the representative of an authority still more ancient. But this carries the decision from the domain of evidence to that of conjecture, and the issue must be tried on individual passages.

6. *The more ancient reading is generally the reading of the more ancient MSS.* This proposition is fully established by a comparison of explicit early testimony with the text of the oldest copies. It would be strange, indeed, if it were otherwise. In this respect the discovery of the *Codex Sinaiticus* cannot but have a powerful influence upon Biblical criticism. Whatever may be its individual peculiarities, it preserves the ancient readings in characteristic passages (Luke ii. 14; John i. 4, 18; 1 Tim. iii. 16). If the secondary uncials (E F S U, etc.) are really the direct representatives of a text more ancient than that in **N B C Z**, it is at least remarkable that no unequivocal early authority presents their characteristic readings. This difficulty is greatly increased by internal considerations. The characteristic readings of the most ancient MSS. are those which preserve in their greatest integrity those subtle characteristics of style which are too minute to attract the attention of a transcriber, and yet too marked in their recurrence to be due to anything less than an unconscious law of composition. The laborious investigations of Gersdorf (*Beiträge zur Sprach-Charakteristik d. Schriftsteller d. N. T.* Leipzig, 1816) have placed many of these peculiarities in a clear light, and it seems impossible to study his collections without gaining the assurance that the earliest copies have preserved the truest image of the Apostolic texts. This conclusion from style is convincingly confirmed by the appearance of the genuine dialectic forms of Hellenistic Greek in those MSS., and those only, which preserve characteristic traits of construction and order. As long as it was supposed that these forms were Alexandrine, their occurrence was naturally held to be a mark of the Egyptian origin of the MSS., but now that it is certain that they were characteristic of a class and not of a locality, it is impossible to resist the inference that the documents which have preserved delicate and evanescent traits of apostolic language must have preserved its substance also with the greatest accuracy.

7. *The ancient text is often preserved substantially in recent copies.* But while the most ancient copies, as a whole, give the most ancient text, yet it is by no means confined exclusively to them. The text of D in the Gospels, however much it has been interpolated, preserves in several cases almost alone the true reading. Other MSS. exist of almost every date (8th cent. L E, 9th cent. X Δ F<sub>2</sub> G<sub>3</sub>, 10th cent. 1, 106, 11th cent. 33, 22, &c.), which contain in the main the oldest text, though

in these the orthography is modernized, and other changes appear which indicate a greater or less departure from the original copy. The importance of the best cursives has been most strangely neglected, and it is but recently that their true claims to authority have been known. In many cases where other ancient evidence is defective or divided they are of the highest value, and it seldom happens that any true reading is wholly unsupported by late evidence.

8. *The agreement of ancient MSS., or of MSS. containing an ancient text, with all the earliest versions and citations marks a certain reading.* The final argument in favor of the text of the most ancient copies lies in the combined support which they receive in characteristic passages from the most ancient versions and patristic citations. The reading of the oldest MSS. is, as a general rule, upheld by the true reading of Versions and the certain testimony of the Fathers, where this can be ascertained. The later reading, and this is not less worthy of notice, is with equal constancy repeated in the corrupted text of the Versions, and often in inferior MSS. of Fathers. The force of this combination of testimony can only be apprehended after a continuous examination of passages. A mere selection of texts conveys only a partial impression; and it is most important to observe the errors of the weightiest authorities when isolated, in order to appreciate rightly their independent value when combined. For this purpose the student is urged to note for himself the readings of a few selected authorities (A B C D L X 1, 33, 69, &c., the MSS. of the old Latin *abc ffk*, etc., the best MSS. of the Vulgate, *am. for. hark.*, etc., the great oriental versions) through a few chapters; and it may certainly be predicted that the result will be a perfect confidence in the text, supported by the combined authority of the classes of witnesses, though frequently one or two Greek MSS. are to be followed against all the remainder.

9. *The disagreement of the most ancient authorities often marks the existence of a corruption anterior to them.* But it happens by no means rarely that the most ancient authorities are divided. In this case it is necessary to recognize an alternative reading; and the inconsistency of Tischendorf in his various editions would have been less glaring, if he had followed the example of Griesbach in noticing prominently those readings to which a slight change in the balance of evidence would give the preponderance. Absolute certainty is not in every case attainable, and the peremptory assertion of a critic cannot set aside the doubt which lies on the conflicting testimony of trustworthy witnesses. The differences are often in themselves (as may appear) of little moment, but the work of the scholar is to present clearly in its minutest details the whole result of his materials. Examples of legitimate doubt as to the true reading occur Matt. vii. 14, &c.; Luke x. 42, &c.; John i. 18, ii. 8, &c.; 1 John iii. 1, v. 10, &c.; Rom. iii. 26, iv. 1, &c. In rare cases this diversity appears to indicate a corruption which is earlier than any remaining documents: Matt. xi. 27; Mark i. 27 2 Peter i. 21; James iii. 6, iv. 14; Rom. i. 32 v. 6 (17), xiii. 5, xvi. 25 ff. (the special form of variation in the most valuable authorities requires particular mention. An early difference of order frequently indicates the interpolation of a gloss, and when the best authorities are thus divided.

any ancient though slight evidence for the omission of the transferred clause deserves the greatest consideration: Matt. i. 18, v. 32, 39, xii. 38, &c.; Rom. iv. 1, &c.; Jam. i. 22. And generally serious variations in expression between the primary authorities point to an early corruption by addition: Matt. x. 29; Rom. i. 27, 29, iii. 22, 26.

10. *The argument from internal evidence is always precarious.* If a reading is in accordance with the general style of the writer, it may be said on the one side that this fact is in its favor, and on the other that an acute copyist probably changed the exceptional expression for the more usual one: e. g. Matt. i. 24, ii. 14, vii. 21, &c. If a reading is more emphatic, it may be urged that the sense is improved by its adoption: if less emphatic, that scribes were habitually inclined to prefer stronger terms: e. g. Matt. v. 13, vi. 4, &c. Even in the case of the supposed influence of parallel passages in the synoptic Evangelists, it is by no means easy to resist the weight of ancient testimony when it supports the parallel phrase, in favor of the natural canon which recommends the choice of variety in preference to uniformity: e. g. Matt. iii. 6, iv. 9, viii. 32, ix. 11, &c. But though internal evidence is commonly only of subjective value, there are some general rules which are of very wide, if not of universal application. These have force to decide or to confirm a judgment; but in every instance they must be used only in combination with direct testimony.

11. *The more difficult reading is preferable to the simpler* (proclivi lectioni prestat ardua, Bengel). Except in cases of obvious corruption this canon probably holds good without exception, in questions of language, construction, and sense. Rare or provincial forms, irregular usages of words, rough turns of expression, are universally to be taken in preference to the ordinary and idiomatic phrases. The bold and emphatic agglomeration of clauses, with the fewest connecting particles, is always likely to be nearest to the original text. The usage of the different apostolic writers varies in this respect, but there are very few, if any, instances where the mass of copyists have left out a genuine connection; and on the other hand there is hardly a chapter in St. Paul's Epistles where they have not introduced one. The same rule is true in questions of interpretation. The hardest reading is generally the true one: Matt. vi. 1, xix. 17, xxi. 31 (ὁ ἄσπερος); Rom. viii. 28 (ὁ θεός); 2 Cor. v. 3; unless, indeed, the difficulty lies below the surface: as Rom. xii. 11 (καίρω for κυρίω), xii. 13 (μυέλις for χρέλις). The rule admits yet further of another modified application. The less definite reading is generally preferable to the more definite.

Thus the future is constantly substituted for the pregnant present, Matt. vii. 8; Rom. xv. 18: compound for simple words, Matt. vii. 28, viii. 17, xi. 25; and pronouns of reference are frequently introduced to emphasize the statement, Matt. vi. 4. But caution must be used lest our own imperfect sense of the naturalness of an idiom may lead to the neglect of external evidence (Matt. xxv. 16, ἠποίησεν wrongly for ἐκέρδησεν).

12. *The shorter reading is generally preferable to the longer.* This canon is very often coincident with the former one; but it admits also of a wider application. Except in very rare cases copyists never omitted intentionally, while they constantly introduced into the text marginal glosses and even various readings (comp. § 13), either from igno-

rance or from a natural desire to leave out nothing which seemed to come with a claim to authority. The extent to which this instinct influenced the character of the later text can be seen from an examination of the various readings in a few chapters. Thus in Matt. vi. the following interpolations occur: 4 (αὐτός), ἐν τῷ φανερώ. 5 (ἐν) ὅτι ἄπ. 6 ἐν τῷ φανερώ. 10 ἐπὶ τῆς γ. 13 ὅτι σοῦ. ἄμην. 15 (τὰ παραπτ. αὐτῶν). 16 ὅτι ἄπ. 19 ἐν τῷ φανερώ. The synoptic Gospels were the most exposed to this kind of corruption, but it occurs in all parts of the N. T. Everywhere the fuller, rounder, more complete form of expression is open to the suspicion of change; and the pre-eminence of the ancient authorities is nowhere seen more plainly than in the constancy with which they combine in preserving the plain, vigorous, and abrupt phraseology of the apostolic writings. A few examples taken almost at random will illustrate the various cases to which the rule applies: Matt. ii. 15, iv. 6, xii. 25; James iii. 12; Rom. ii. 1, viii. 23, x. 15, xv. 29 (comp. § 13).

13. *That reading is preferable which explains the origin of the others.* This rule is chiefly of use in cases of great complication, and it would be impossible to find a better example than one which has been brought forward by Tischendorf for a different purpose (N. T. Proleg. pp. xxxiii., xxxiv.). The common reading in Mark ii. 22 is ὁ οἶνος ἐκχεῖται καὶ οἱ ἄσκοι ἀπολούνται, which is perfectly simple in itself, and the undoubted reading in the parallel passage of St. Matthew. But here there are great variations. One important MS. (L) reads ὁ οἶνος ἐκχεῖται καὶ οἱ ἄσκοί: another (D with it.) ὁ οἶνος καὶ ἄσκοι ἀπολούνται: another (B) ὁ οἶνος ἀπόλλυται καὶ οἱ ἄσκοί. Here, if we bear in mind the reading in St. Matthew, it is morally certain that the text of B is correct. This may have been changed into the common text, but cannot have arisen out of it. Compare James iv. 4, 12; Matt. xxiv. 38; Jude 18; Rom. vii. 25; Mark i. 16, 27.

(For the principles of textual criticism compare Griesbach, N. T. Proleg. § 3, pp. lviii. ff.; Tischendorf, N. T. Proleg. pp. xxxii.-xliv.; Tregelles, Printed Text, pp. 132 ff.; (Horne's) Introduction, iv. pp. 342 ff. The Crisis of Wetstein (Proleg pp. 206-240, Lotze) is very unsatisfactory.)

\* On the application of these principles the student will find valuable hints in Griesbach's Commentarius Criticus, 2 pt. 1798-1811, and in T. S. Green's Course of Developed Criticism, etc., Lond. 1856. Reiche's Commentarius Criticus, 3 tom. Gött. 1853-62, 4to, is not very important.

A.

#### IV. THE LANGUAGE OF THE NEW TESTAMENT.

1. The eastern conquests of Alexander opened a new field for the development of the Greek language. It may be reasonably doubted whether a specific Macedonian dialect is not a mere fiction of grammarians; but increased freedom both in form and construction was a necessary consequence of the wide diffusion of Greek. Even in Aristotle there is a great declension from the classical standard of purity, though the Attic formed the basis of his language; and the rise of the common or Grecian dialect (διάλεκτος κοινή, or δὲ Ἑλληνική) is dated from his time. In the writings of educated men who were familiar with ancient models, this "common" dialect always preserved a close resemblance to the normal Attic but in the inter-

course of ordinary life the corruption must have been both great and rapid.

2. At no place could the corruption have been greater or more rapid than at Alexandria, where a motley population, engaged in active commerce, adopted Greek as their common medium of communication. [ALEXANDRIA, i. p. 63.] And it is in Alexandria that we must look for the origin of the language of the New Testament. Two distinct elements were combined in this marvelous dialect which was destined to preserve forever the fullest tidings of the Gospel. On the one side there was Hebrew conception, on the other Greek expression. The thoughts of the East were wedded to the words of the West. This was accomplished by the gradual translation of the Hebrew Scriptures into the vernacular Greek. The Greek had already lost the exquisite symmetry of its first form, so that it could take the clear impress of Hebrew ideas; and at the same time it had gained rather than lost in richness and capacity. In this manner what may be called the theocratic aspect of nature and history was embodied in Greek phrases, and the power and freedom of Greek quickened and defined Eastern speculation. The theories of the "purists" of the 17th century (comp. Winer, *Grammatik*, § 1; Reuss, *Gesch. d. H. S.* § 47) were based on a complete misconception of what we may, without presumption, feel to have been required for a universal Gospel. The message was not for one nation only, but for all; and the language in which it was promulgated — like its most successful preacher — united in one complementary attributes. [HELLENIST, ii. p. 1039 ff.]

3. The Greek of the LXX. — like the English of the A. V. or the German of Luther — naturally determined the Greek dialect of the mass of the Jews. It is quite possible that numerous provincialisms existed among the Greek-speaking Jews of Egypt, Palestine, and Asia Minor, but the dialect of their common Scriptures must have given a general unity to their language. It is, therefore, more correct to call the N. T. dialect Hellenistic than Alexandrine, though the form by which it is characterized may have been peculiarly Alexandrine at first. Its local character was lost when the LXX. was spread among the Greek Dispersion; and that which was originally confined to one city or one work was adopted by a whole nation. At the same time much of the extreme harshness of the LXX. dialect was softened down by intercourse with Greeks or greecising foreigners, and conversely the wide spread of proselytism familiarized the Greeks with Hebrew ideas.

4. The position of Palestine was peculiar. The Aramaic (Syro-Chaldaic), which was the national dialect after the Return, existed side by side with the Greek. Both languages seem to have been generally understood, though, if we may judge from other instances of bilingual countries, the Aramaic would be the chosen language for the common intercourse of Jews (2 Macc. vii. 8, 21, 27). It was in this language, we may believe, that our Lord was accustomed to teach the people; and it appears that He used the same in the more private acts of his life (Mark iii. 17, v. 41, vii. 34; Matt. xxvii. 46; John i. 42; cf. John xx. 16). But the habitual use of the LXX. is a sufficient proof of the familiarity of the Palestinian Jews with the Greek dialect; and the judicial proceedings before Pilate must have been conducted in

Greek. (Comp. Grinfield, *Apology for the LXX.*, pp. 76 ff.) [LANGUAGE OF THE N. T.]

5. The Roman occupation of Syria was not altogether without influence upon the language. A considerable number of Latin words, chiefly referring to acts of government, occur in the N. T. and they are probably only a sample of larger innovations (*κῆνος*, *λεγιών*, *κουστωδία*, *ἄσπριον*, *κοδράντης*, *δηνάριον*, *μίλιον*, *πραιτῶριον*, *φραγελλοῦν*, St. Matt., etc.; *κεντυρίω*, *σπεκουλάτωρ*, *τὸ ἱκανὸν ποιῆσαι*, St. Mark; *λέντιον*, *σουδῶριον*, *τίτλος*, St. John, etc.; *λιβερτίνο*, *κολωνία*, *σιμικίνθιον*, *σικάριος*, St. Luke; *μάκελλον*, *μεμβράνα*, St. Paul). Other words in common use were of Semitic (*ἄραβῶν*, *ζιζάνιον*, *κορβανᾶς*, *ραββελ*), Persian (*ἄγγαρενῶ*, *μάγιον*, *τιάρα*, *παράδεισος*), or Egyptian origin (*βᾶϊον*).

6. The language which was moulded under these various influences presents many peculiarities, both philological and exegetical, which have not yet been placed in a clear light. For a long time it has been most strangely assumed that the linguistic forms preserved in the oldest MSS. are Alexandrine and not in the widest sense Hellenistic, and on the other hand that the Aramaic modifications of the N. T. phraseology remove it from the sphere of strict grammatical analysis. These errors are necessarily fatal to all real advance in the accurate study of the words or sense of the apostolic writings. In the case of St. Paul, no less than in the case of Herodotus, the evidence of the earliest witnesses must be decisive as to dialectic forms. Egyptian scribes preserved the characteristics of other books, and there is no reason to suppose that they altered those of the N. T. Nor is it reasonable to conclude that the later stages of a language are governed by no law or that the introduction of fresh elements destroys the symmetry which in reality it only changes. But if old misconceptions still linger, very much has been done lately to open the way to a sounder understanding both of the form and the substance of the N. T. by Tischendorf (as to the dialect, N. T. [ed. 7] *Prolegg.* pp. xlii. — lxiii.), by Winer (as to the grammatical laws, *Gramm. d. N. T. Sprachid.*, 6th ed., 1855 [7th ed., 1867]; comp. Green's *Grammar of N. T. dialect*, 1842 [2d ed., 1862, and A. Buttman, *Gram. d. neutest. Sprachgebrauchs*, 1859]), and by the later commentators (Fritzsche, Lücke, Bleek, Meyer, Alford, [Ellicott, Lightfoot, Bäumlein]). In detail comparatively little remains to be done, but a philosophical view of the N. T. language as a whole is yet to be desired. For this it would be necessary to take account of the commanding authority of the LXX. over the religious dialect, of the constant and living power of the spoken Aramaic and Greek, of the mutual influence of inflection and syntax, of the inherent vitality of words and forms, of the history of technical terms and of the creative energy of Christian truth. Some of these points may be discussed in other articles; for the present it must be enough to notice a few of the most salient characteristics of the language as to form and expression.

7. The formal differences of the Greek of the N. T. from classical Greek are partly differences of vocabulary and partly differences of construction. Old words are changed in orthography (1) or in inflection (2); new words (3) and rare or novel constructions (4) are introduced. One or two examples of each of these classes may be noticed. But it must be again remarked that the language

of the N. T., both as to its lexicography and as to its grammar, is based on the language of the LXX. The two stages of the dialect cannot be examined satisfactorily apart. The usage of the earlier books often confirms and illustrates the usage of the later; and many characteristics of N. T. Greek have been neglected or set aside from ignorance of the fact that they are undoubtedly found in the LXX. With regard to the forms of words, the similarity between the two is perfect; with regard to construction, it must always be remembered that the LXX. is a translation, executed under the immediate influence of the Hebrew, while the books of the N. T. (with a partial exception in the case of St. Matthew) were written freely in the current Greek.

(1.) Among the most frequent peculiarities of orthography of Hellenistic Greek which are supported by conclusive authority, are—the preservation of the  $\mu$  before  $\psi$  and  $\phi$  in  $\lambda\mu\beta\acute{\alpha}\nu\omega$  and its derivations,  $\lambda\acute{\eta}\mu\psi\epsilon\tau\alpha\iota$ ,  $\alpha\acute{\nu}\tau\iota\lambda\acute{\eta}\mu\psi\epsilon\iota\varsigma$ ; and of  $\nu$  in compounds of  $\sigma\upsilon\nu$  and  $\acute{\epsilon}\nu$ ,  $\sigma\upsilon\nu\zeta\eta\nu$ ,  $\sigma\upsilon\nu\mu\alpha\theta\eta\tau\acute{\eta}\varsigma$ ,  $\acute{\epsilon}\nu\gamma\epsilon\gamma\rho\alpha\mu\mu\acute{\epsilon}\nu\eta$ . Other variations occur in  $\tau\epsilon\sigma\sigma\epsilon\rho\acute{\alpha}\kappa\omicron\nu\tau\alpha$ ,  $\acute{\epsilon}\rho\alpha\nu\acute{\alpha}\nu$ , etc.,  $\acute{\epsilon}\kappa\alpha\theta\epsilon\rho\acute{\iota}\sigma\theta\eta$ , etc. It is more remarkable that the aspirate appears to have been introduced into some words, as  $\acute{\epsilon}\lambda\pi\iota\varsigma$  (Rom. viii. 20; Luke vi. 35). The  $\nu$   $\acute{\epsilon}\phi\lambda\epsilon\upsilon\sigma\tau\iota\kappa\acute{\omicron}\nu$  in verbs (but not in nouns) and the  $s$  of  $\omicron\upsilon\tau\omega\varsigma$  are always preserved before consonants, and the hiatus (with  $\acute{\alpha}\lambda\lambda\acute{\alpha}$  especially) is constantly (perhaps always) disregarded. The forms in  $-\epsilon\iota$ ,  $-\iota$ , are more difficult of determination, and the question is not limited to later Greek.

(2.) Peculiarities of inflection are found in  $\mu\alpha\chi\alpha\rho\eta$ ,  $-\eta\varsigma$ ,  $\chi\epsilon\iota\rho\alpha\nu$  (?),  $\sigma\upsilon\gamma\gamma\acute{\epsilon}\nu\eta\nu$  (?),  $\beta\alpha\theta\acute{\epsilon}\alpha\varsigma$ , etc. These peculiarities are much more common in verbs. The augment is sometimes doubled:  $\acute{\alpha}\pi\epsilon\kappa\alpha\tau\epsilon\sigma\tau\acute{\alpha}\theta\eta$ , sometimes omitted:  $\omicron\iota\kappa\omicron\delta\omicron\mu\eta\sigma\epsilon\nu$ ,  $\kappa\alpha\tau\alpha\iota\sigma\chi\acute{\upsilon}\nu\theta\eta$ . The doubling of  $\beta$  is commonly neglected:  $\acute{\epsilon}\rho\acute{\alpha}\nu\tau\iota\sigma\epsilon\nu$ . Unusual forms of tenses are used:  $\acute{\epsilon}\pi\epsilon\sigma\alpha$ ,  $\acute{\epsilon}\iota\pi\alpha$ , [ $\acute{\eta}\lambda\theta\alpha\nu$ ,] etc.; unusual moods:  $\kappa\alpha\upsilon\theta\acute{\eta}\sigma\omega\mu\alpha\iota$  (1 Cor. xiii. 3?); and unusual conjugations:  $\nu\iota\kappa\omicron\upsilon\acute{\nu}\tau\iota$  for  $\nu\iota\kappa\acute{\omega}\nu\tau\iota$ ,  $\acute{\epsilon}\lambda\lambda\omicron\gamma\alpha$  for  $\acute{\epsilon}\lambda\lambda\omicron\gamma\epsilon\iota$ ,  $\pi\alpha\rho\epsilon\iota\sigma\epsilon\delta\upsilon\eta\sigma\alpha\nu$  for  $\pi\alpha\rho\epsilon\iota\sigma\epsilon\delta\upsilon\sigma\alpha\nu$  (Jude 4).

\* Note also  $\acute{\alpha}\nu\alpha\pi\acute{\alpha}\theta\eta\sigma\omicron\nu\tau\alpha\iota$ , Rev. xiv. 13, 2d fut. pass. of  $\acute{\alpha}\nu\alpha\pi\alpha\theta\omega$ , strangely misunderstood by Robinson, *N. T. Lec.* p. 804 (Addenda); also such forms as  $\acute{\epsilon}\iota\lambda\eta\phi\epsilon\varsigma$ ,  $\kappa\epsilon\kappa\omicron\pi\acute{\iota}\alpha\kappa\epsilon\varsigma$ ;  $\acute{\epsilon}\gamma\nu\kappa\alpha\nu$ ,  $\acute{\epsilon}\iota\rho\kappa\alpha\nu$ ,  $\pi\acute{\epsilon}\tau\omega\kappa\alpha\nu$ ,  $\gamma\acute{\epsilon}\gamma\omicron\nu\alpha\nu$ ;  $\acute{\epsilon}\iota\chi\omicron\sigma\alpha\nu$ ,  $\acute{\epsilon}\delta\acute{\iota}\delta\omicron\sigma\alpha\nu$ ,  $\pi\alpha\rho\epsilon\lambda\acute{\beta}\omicron\sigma\alpha\nu$ . A.

(3.) The new words are generally formed according to old analogy— $\omicron\iota\kappa\omicron\delta\omicron\sigma\omicron\pi\acute{\omicron}\tau\eta\varsigma$ ,  $\acute{\epsilon}\nu\kappa\alpha\iota\rho\acute{\epsilon}\iota\nu$ ,  $\pi\alpha\theta\eta\mu\epsilon\rho\acute{\iota}\nu\omicron\varsigma$ ,  $\acute{\alpha}\pi\omicron\kappa\alpha\rho\alpha\delta\omicron\kappa\acute{\epsilon}\iota\nu$ ; and in this respect the frequency of compound words is particularly worthy of notice. Other words receive new senses:  $\chi\rho\eta\mu\alpha\tau\acute{\iota}\zeta\epsilon\iota\nu$ ,  $\delta\upsilon\acute{\nu}\alpha\mu\iota\varsigma$ ,  $\pi\epsilon\rho\iota\sigma\tau\acute{\alpha}\sigma\theta\alpha\iota$ ,  $\sigma\upsilon\nu\acute{\iota}\sigma\tau\eta\mu\iota$ ; and some are slightly changed in form:  $\acute{\alpha}\nu\alpha\theta\epsilon\mu\alpha$  ( $-\eta\mu\alpha$ ),  $\acute{\epsilon}\xi\acute{\alpha}\pi\iota\alpha$  ( $-\eta\varsigma$ ),  $\beta\alpha\sigma\acute{\iota}\lambda\iota\sigma\sigma\alpha$  (comp. Winer, *Gramm.* § 2).

(4.) The most remarkable construction, which is best attested both in the LXX. and in the N. T., is that of the conjunctions  $\acute{\iota}\nu\alpha$ ,  $\delta\tau\alpha\nu$ , with the present indicative: Gal. vi. 12 (?),  $\acute{\iota}\nu\alpha$   $\delta\acute{\iota}\omega\kappa\omicron\nu\tau\alpha\iota$ , Luke xi. 2,  $\delta\tau\alpha\nu$   $\pi\rho\sigma\epsilon\upsilon\chi\epsilon\sigma\theta\epsilon$ , as well as with the future indicative (comp. Tischd. Mark iii. 2).  $\delta\tau\alpha\nu$  is even found with the imperfect and aor.  $\acute{\alpha}\rho\iota\sigma\tau\omicron$ , Mark iii. 11,  $\delta\tau\alpha\nu$   $\theta\eta\acute{\epsilon}\lambda\omicron\rho\omicron\nu$ ;  $\lambda\gamma\omicron\varsigma$ . viii. 1,  $\tau\alpha\nu$   $\theta\eta\omega\iota\zeta\epsilon\nu$ . Other irregular constructions in the combination of moods (Apoc. iii. 9) and in effective concord (Mark ix. 26) can be paralleled

in classical Greek, though such constructions are more frequent and anomalous in the Apocalypse than elsewhere.

8. The peculiarities of the N. T. language which have been hitherto mentioned have only a rare and remote connection with interpretation. They illustrate more or less the general history of the decay of a language, and offer in some few instances curious problems as to the corresponding changes of modes of conception. Other peculiarities have a more important bearing on the sense. These are in part Hebraisms (Aramaisms) in (1) expression or (2) construction, and in part (3) modifications of language resulting from the substance of the Christian revelation.

(1.) The general characteristic of Hebraic expression is vividness, as simplicity is of Hebraic syntax. Hence there is found constantly in the N. T. a personality of language (if the phrase may be used) which is foreign to classical Greek. At one time this occurs in the substitution of a pregnant metaphor for a simple word:  $\omicron\iota\kappa\omicron\delta\omicron\mu\epsilon\acute{\iota}\nu$  (St. Paul),  $\sigma\pi\lambda\alpha\chi\chi\upsilon\iota\zeta\omicron\mu\alpha\iota$  (Gospels),  $\pi\lambda\alpha\tau\acute{\upsilon}\nu\epsilon\iota\nu$   $\tau\eta\nu$   $\kappa\alpha\rho\delta\acute{\iota}\alpha\nu$  (St. Paul),  $\pi\rho\delta\omega\pi\omicron\nu$   $\lambda\alpha\mu\beta\acute{\alpha}\nu\epsilon\iota\nu$ ,  $\pi\rho\sigma\omega\pi\omicron\lambda\eta\mu\iota\alpha$ ,  $\pi\rho\sigma\omega\pi\omicron\lambda\eta\mu\pi\tau\acute{\epsilon}\iota\nu$ . At another time in the use of prepositions in place of cases:  $\kappa\rho\acute{\alpha}\zeta\epsilon\iota\nu$   $\acute{\epsilon}\nu$   $\mu\epsilon\gamma\acute{\alpha}\lambda\eta$   $\phi\omega\nu\acute{\eta}$ ,  $\acute{\epsilon}\nu$   $\mu\alpha\chi\alpha\acute{\iota}\rho\alpha$   $\acute{\alpha}\pi\omicron\lambda\omicron\sigma\theta\alpha\iota$ ,  $\acute{\alpha}\theta\omega\varsigma$   $\acute{\alpha}\nu\delta$   $\tau\omicron\upsilon$   $\acute{\alpha}\iota\mu\alpha\tau\omicron\varsigma$ . At another in the use of a vivid phrase for a preposition:  $\delta\acute{\iota}\alpha$   $\chi\epsilon\iota\rho\acute{\omega}\nu$   $\tau\iota\nu\omicron\varsigma$   $\gamma\epsilon\upsilon\theta\epsilon\sigma\theta\alpha\iota$ ,  $\acute{\alpha}\pi\omicron\sigma\tau\acute{\epsilon}\lambda\lambda\epsilon\iota\nu$   $\sigma\upsilon\nu$   $\chi\epsilon\iota\rho\acute{\iota}$   $\acute{\alpha}\gamma\gamma\epsilon\lambda\omicron\upsilon$ ,  $\acute{\epsilon}\nu$   $\chi\epsilon\iota\rho\acute{\iota}$   $\mu\epsilon\sigma\acute{\iota}\tau\omicron\upsilon$ ,  $\phi\epsilon\upsilon\gamma\epsilon\iota\nu$   $\acute{\alpha}\pi\delta$   $\pi\rho\sigma\acute{\omega}\pi\omicron\upsilon$   $\tau\iota\nu\omicron\varsigma$ . And sometimes the one personal act is used to describe the whole spirit and temper:  $\pi\omicron\rho\epsilon\upsilon\epsilon\sigma\theta\alpha\iota$   $\omicron\pi\acute{\iota}\sigma\omega$   $\tau\iota\nu\omicron\varsigma$ .

(2.) The chief peculiarities of the syntax of the N. T. lie in the reproduction of Hebrew forms. Two great features by which it is distinguished from classical syntax may be specially singled out. It is markedly deficient in the use of the article and of oblique and participial constructions. Sentences are more frequently coördinated than subordinated. One clause follows another rather in the way of constructive parallelism than by distinct logical sequence. Only the simplest words of connection are used in place of the subtle varieties of expression by which Attic writers exhibit the interdependence of numerous ideas. The repetition of a key-word (John i. 1, v. 31, 32, xi. 33) or of a leading thought (John x. 11 ff., xvii. 14–19) often serves in place of all other conjunctions. The words quoted from another are given in a direct objective shape (John vii. 40, 41). Illustrative details are commonly added in abrupt parenthesis (John iv. 6). Calm emphasis, solemn repetition, grave simplicity, the gradual accumulation of truths, give to the language of Holy Scripture a depth and permanence of effect found nowhere else. It is difficult to single out isolated phrases in illustration of this general statement, since the final impression is more due to the iteration of many small points than to the striking power of a few. Apart from the whole context the influence of details is almost inappreciable. Constructions which are most distinctly Hebraic ( $\pi\lambda\eta\theta\acute{\upsilon}\nu\omega\nu$   $\pi\lambda\eta\theta\acute{\upsilon}\nu\omega\delta$ ,  $\theta\alpha\nu\acute{\alpha}\tau\omega$   $\tau\epsilon\lambda\epsilon\upsilon\tau\acute{\alpha}\nu$ ,  $\acute{\epsilon}\delta\delta\omicron\kappa\acute{\epsilon}\iota\nu$   $\acute{\epsilon}\nu$   $\tau\iota\nu\iota$ ,  $\sigma\alpha\rho\acute{\xi}$   $\acute{\alpha}\mu\alpha\rho\tau\acute{\iota}\alpha\varsigma$ , etc.) are not those which give the deepest Hebrew coloring to the N. T. diction, but rather that pervading monotony of form which, though correct in individual clauses, is wholly foreign to the vigor and elasticity of classical Greek. If the student will carefully analyse a few chapters of St. John, in whom the Hebrew spirit is now

constant and marked, inquiring at each step how a classical writer would have avoided repetition by the use of pronouns and particles, how he would have indicated dependence by the use of absolute cases and the optative, how he would have united the whole by establishing a clear relation between the parts, he will gain a true measure of the Hebraic style more or less pervading the whole N. T. which cannot be obtained from a mere catalogue of phrases. The character of the style lies in its total effect and not in separable elements: it is seen in the spirit which informs the entire text far more vividly than in the separate members (comp. [Westcott's] *Introduction to the Gospels*, pp. 241-252).

(3) The purely Christian element in the N. T. requires the most careful handling. Words and phrases already partially current were transfigured by embodying new truths and forever consecrated to their service. To trace the history of these is a delicate question of lexicography which has not yet been thoroughly examined. There is a danger of confounding the apostolic usage on the one side with earlier Jewish usage, and on the other with later ecclesiastical terminology. The steps by which the one served as a preparation for the apostolic sense and the latter naturally grew out of it require to be diligently observed. Even within the range of the N. T. itself it is possible to notice various phases of fundamental ideas and a consequent modification of terms. Language and thought are both living powers, mutually dependent and illustrative. Examples of words which show this progressive history are abundant and full of instruction. Among others may be quoted, *πίστις, πιστός, πιστεύειν εἰς τινα; δίκαιος, δικαίω; ἅγιος, ἀγιάζω; καλεῖν, κληῖς, κλητός, ἐκλεκτός; ἀγάπη, ἐλπίς, χάρις; εὐαγγέλιον, εὐαγγελίζεσθαι, κηρύσσειν, κήρυγμα; ἀπόστολος, πρεσβύτερος, ἐπίσκοπος, διάκονος; ἄρον κλάσαι, βαπτίζειν, κοινωνία; σάρξ, ψυχή, πνεῦμα; κόσμος, σωτηρία, σώζειν; λυτροῦσθαι, καταλλάσσειν.* Nor is it too much to say that in the history of these and such like words lies the history of Christianity. The perfect truth of the apostolic phraseology, when examined by this most rigorous criticism, contains the fulfillment of earlier anticipations and the germ of later growth.

9. For the language of the N. T. calls for the exercise of the most rigorous criticism. The complexity of the elements which it involves makes the inquiry wider and deeper, but does not set it aside. The overwhelming importance, the manifold expression, the gradual development of the message which it conveys, call for more intense devotion in the use of every faculty trained in other schools, but do not suppress inquiry. The Gospel is for the whole nature of man, and is sufficient to satisfy the reason as well as the spirit. Words and idioms admit of investigation in all stages of a language. Decay itself is subject to law. A mixed and degenerate dialect is not less the living exponent of definite thought, than the most pure and vigorous. Rude and unlettered men may have characteristic modes of thought and speech, but even (naturally speaking) there is no reason to expect that they will be less exact than others in using their own idiom. The literal sense of the apostolic writings must be gained in the same way as the literal sense of any other writings, by the fullest use of every appliance of scholarship, and the most complete confidence in the necessary and absolute connection of words and thoughts. No variation of phrase, no peculiarity

of idiom, no change of tense, no change of order can be neglected. The truth lies in the whole expression, and no one can presume to set aside any part as trivial or indifferent.

10. The importance of investigating most patiently and most faithfully the literal meaning of the sacred text must be felt with tenfold force, when it is remembered that the literal sense is the outward embodiment of a spiritual sense, which lies beneath and quickens every part of Holy Scripture [OLD TESTAMENT]. Something of the same kind of double sense is found in the greatest works of human genius, in the *Oresteia* for example, or *Hamlet*; and the obscurity which hangs over the deepest utterances of a dramatist may teach humility to those who complain of the darkness of a prophet. The special circumstances of the several writers, their individual characteristics reflected in their books, the slightest details which add distinctness or emphasis to a statement, are thus charged with a divine force. A spiritual harmony rises out of an accurate interpretation. And exactly in proportion as the spiritual meaning of the Bible is felt to be truly its primary meaning, will the importance of a sound criticism of the text be recognized as the one necessary and sufficient foundation of the noble superstructure of higher truth which is afterwards found to rest upon it. Faith in words is the beginning, faith in the word is the completion of Biblical interpretation. Impatience may destroy the one and check the other; but the true student will find the simple text of Holy Scripture ever pregnant with lessons for the present and promises for ages to come. The literal meaning is one and fixed: the spiritual meaning is infinite and multiform. The unity of the literal meaning is not disturbed by the variety of the inherent spiritual applications. Truth is essentially infinite. There is thus one sense to the words, but countless relations. There is an absolute fitness in the parables and figures of Scripture, and hence an abiding pertinence. The spiritual meaning is, so to speak, the life of the whole, living on with unchanging power through every change of race and age. To this we can approach only (on the human side) by unwavering trust in the ordinary laws of scholarship, which finds in Scripture its final consecration.

For the study of the language of the N. T., Tischendorf's 7th edition (1859), Grinfield's *Editio Hellenistica* (with the *Scholia*, 1843-48), Bruder's *Concordantia* (1842 [3d ed. 1867]), and Winer's *Grammatik* (6th edition, 1853, translated by Maass, Edinh. 1859), are indispensable. To these may be added Trommius's *Concordantia . . . LXX. interpretum*, 1718, for the usage of the LXX., and Suicer's *Thesaurus*, 1682 [2d ed. 1728], for the later history of some words. The lexicons of Schleusner to the LXX. (1820-21), and N. T. (4th ed. 1819) contain a large mass of materials, but are most uncritical. Those of Wahl (N. T. 1822 [translated by E. Robinson, Andover, 1825; 3d ed. of the original, 1843]; Apocrypha, 1853) are much better in point of accuracy and scholarship. On questions of dialect and grammar there are important collections in Sturz, *De Dialecto Maced. et Alex.* (1786); Thiersch, *De Pent. vers. Alex.* (1841); Lobeck's *Phrynichus* (1820), *Paralipomena Gr. Gr.* (1837), *Pathol. Serm. Gr. Prolegg.* (1843), [*Πηρικῶς. s. Verb. Gr. et Nominum verbal. Technologia*, (1846),] *Pathol. Serm. Gr. Elem.* ([2 pt. 1853-62]). The Indices of Jacobson to the *Patres Apostolici* (1840) are very complete and useful. The

parallels gathered by Ott and Krebs from Josephus, and by Loesner and Kühn from Philo have been fully used by most recent commentators. Further bibliographical references are given by Winer, *Gramm.* pp. 1–31; Reuss, *Gesch. d. Heil. Schriftten*, pp. 28–37; Grinfield's *N. T. Editio Hellenistica*, Præf. xi, xii. [Schirlitz, *Grundzüge d. neutest. Gräcität*, pp. 101–126.] B. F. W.

\* Among the more recent works on the language of the N. T. the following also deserve notice. K. G. Bretschneider, *Lex. man. Gr.-Lat. in Libros N. T.*, 1824, 3d ed., greatly improved, 1840, 4to. E. Robinson, *Gr. and Eng. Lex. of the N. T.*, Bost. 1836, new ed. N. Y. 1850, largely combining the best features of Wahl and Bretschneider. S. T. Bloomfield, *Gr. and Eng. Lex. to the N. T.*, Lond. 1840, 3d ed. 1860. C. G. Wilke, *Clavis N. T. philologica*, Dresd. et Lips. 1840–41, 2d ed. 1850, new ed. mostly rewritten by C. L. W. Grimm, under whose name it also appears with the title *Lex. Gr.-Lat. N. T.*, Lips. 1868 (a translation of this is promised by Professor Thayer of Andover). S. C. Schirlitz, *Griech.-Deutsches Wörterb. zum N. T.*, Giessen, 1851, 3e Aufl. 1868. Herm. Cremer, *Bibl.-theol. Wörterb. der Neutest. Gräcität*, Gotha, 1866, Engl. trans. 1872. *The Glossary of Later and Byzantine Greek* by E. A. Sophocles, forming vol. vii. (New Ser.) of the *Memoirs of the Amer. Academy*, Cambr., 1860, 4to, has been for some time out of print, but a new edition greatly enlarged and improved, is now in press (1869). Of the works named above, those of Bloomfield and Schirlitz are the least important; Bretschneider is rich in illustrations from the LXX., Josephus, Philo, and the Pseudepigrapha of the O. and N. T.; Wahl is particularly full on the particles, and in grammatical references; and the new *Lexicon* of Grimm is characterized by good judgment, competent learning, and the exclusion of useless matter.

On the *synonyms* of the N. T. we have J. A. H. Fittman, *De Syn. in N. T.* lib. I., II., Lips. 1829–32, transl. by E. Craig, 2 vols. Edin. 1833–34; R. C. Trench, *Syn. of the N. T.*, 2 parts, reprinted N. Y. 1855–64, new ed. in 1 vol., Lond. 1865; and the work of Webster, referred to below.

On the *grammar* of the N. T., we may note also the works of Professor Stuart, Andover, 1834, 2d ed. 1841; W. Trollope, Lond. 1842; T. S. Green, *Treatise on the Gram. of the N. T.*, new ed. Lond. 1862 (first ed. 1842), containing some acute observations; Alex. Buttman, *Gram. des neutest. Sprachidioms*, Berl. 1859 (valuable); S. C. Schirlitz, *Grundzüge der neutest. Gräcität*, Giessen, 1861; K. H. A. Lipsius, *Gram. Untersuchungen üb. 1. bibl. Gräcität* (only über die Lesenzeichen), Leipz. 1863; and William Webster, *Syntax and Synonyms of the Gr. Test.*, Lond. 1864, strangely extolling Schirlitz, and disparaging Winer. The 7th edition of Winer, superintended by J. J. Neumann, Leipz. 1867, we have at last, thanks to Professor Thayer, in a really accurate translation (Andover, 1869). In the 3d ed. of Jelf's *Greek Grammar* (Oxf. 1861, 4th ed. 1868) particular attention is paid to the constructions of the Greek Testament. Professor W. W. Goodwin's *Syntax of the Moods and Tenses of the Greek Verb*, 2d ed. Cambr. 1865, though not often referring specially to the N. T., will be found of great value to the philological student. On the Greek article there is the well-known work of Bishop Middleton, Lond. 1808, reprinted N. Y. 1813, new ed. by Rose, Lond. 1855;

comp. Professor Stuart's *Hints and Cautions in the Bibl. Repos.* for April 1834, iv. 277–327, and C. Winstanley, *Vindication of Certain Passages in the Com. Eng. Version of the N. T.*, addressed to Granville Sharp, Esq., reprinted with additions, Cambr. 1819.

See further, on the language and style of the N. T., Planck, *De vera Natura et Indole Orat. Græcæ N. T.*, Gotting. 1810, 4to, transl. by Dr. Robinson in the *Bibl. Repos.* for Oct. 1831, i. 638–691. (In the same vol. of this periodical are other valuable articles bearing on the subject.) Also Klausen (Danish Clausen), *Hermeneutik d. N. T.*, Leipz. 1841, p. 337 ff.; Wilke, *Hermeneutik d. N. T.*, Leipz. 1843–44, and *Neutest. Rhetorik*, ibid. 1843; and Zeeschwitz, *Profangräcität u. biblischer Sprachgeist* (1859).

Works on the style of particular writers of the N. T. might also be mentioned here; see, for example, the addition to JOHN, GOSPEL OF, vol. ii. p. 1439 b. See also J. D. Schulze, *Der schriftstellerische Werth u. Char. des Petrus, Judas u. Jacobus*, Weissenfels, 1802; ditto, *des Evang. Markus*, in Keil and Tzschirner's *Analekten*, Bde ii., iii.; Gersdorf, *Beiträge zur Sprach-Charakteristik der Schriftsteller des N. T.*, Theil i. (Leipz. 1816; no more published); Holtzmann, *Die Synopt. Evangelien* (Leipz. 1863), pp. 271–358; and the various discussions on the genuineness of the Acts of the Apostles, the Pastoral Epistles of Paul, the authorship of the Epistle to the Hebrews, the 2d Epistle of Peter, and the Apocalypse, for which see the articles on the respective books.

The *Critical Greek and English Concordance to the N. T.*, by the late C. F. Hudson, which is announced for speedy publication (Boston, 1869), will be a valuable supplement to Bruder, giving the various readings of Griesbach, Lachmann, Tischendorf, and Tregelles, and at the same time preserving the best features of the *Englishman's Greek Concordance of the N. T.* It will be incomparably superior to Schmoller's recent work, which is very unsatisfactory. A.

#### NEW YEAR. [TRUMPETS, FEAST OF.]

NEZĪ'AH (נִזְיָא) [*famous, Fürst; conquered*, Ges.]: נַזְיָא, [Vat. ΝΑΖΟΥΣ,] Alex. Νεθίε in Exr.: Νῆσια, [Vat. FA. ΑΝΕΙΑ, Alex. Νεῦρεια,] in Neh.: *Nasia*. The descendants of Neziath were among the Nethinim who returned with Zerubbabel (Exr. ii. 54; Neh. vii. 56). The name appears as NASITH in 1 Esdr. v. 32.

NE'ZIB (נִזְיָב) [*garrison, pillar*: Vat.]: Νᾶσειβ; [Rom. ΝΑΖΙΒ;] Alex. Νεσιβ; *Nesib*, a city of Judah (Josh. xv. 43 only), in the district of the *Shefelah* or Lowland, one of the same group with Keilah and Mareshah. To Eusebius and Jerome it was evidently known. They place it on the road between Eleutheropolis and Hebron, 7 or 9 (Euseb.) miles from the former, and there it still stands under the almost identical name of *Beit Nāsib*, or *Chirbeh Nasib*, 2½ hours from *Beit Jibrin*, on a rising ground at the southern end of the *Wady es-Sūr*, and with Keilah and Mareshah within easy distance. It has been visited by Dr. Robinson (ii. 220, 221) and Tobler (*3te Wanderung*, 150). The former mentions the remains of ancient buildings, especially one of apparently remote age, 120 feet long by 30 broad. This, however—with the curious discrepancy which is so remarkable in *Eas-*

tern explorers — is denied by the latter traveller, who states that "but for the ancient name no one would suspect this of being an ancient site."

Nezib<sup>a</sup> adds another to the number of places which, though enumerated as in the Lowland, have been found in the mountains. [JIPHITAH; KEILAH.] G.

NIB'HAZ (נִיבְחָז), and in some MSS. נִיבְחָזִי.

and נִיבְחָזִי [see below]: Νιβχάζ [?] or [Alex.] Ναιβάς; for which there is substituted in some copies an entirely different name, 'Αβασζέρ, Ναβασζέρ, or 'Εβλαζέρ [Rom.], the latter being probably the more correct, answering to the Hebrew

נִבְחָזִי, "grief of the ruler": *Nebahaz*, a deity of the Avites, introduced by them into Samaria in the time of Shalmaneser (2 K. xvi. 31). There is no certain information as to the character of the deity, or the form of the idol so named. The Rabbins derived the name from a Hebrew root *nâbach* (נָבַח), "to bark," and hence assigned to it the figure of a dog, or a dog-headed man. There is no *a priori* improbability in this; the Egyptians worshipped the dog (Plut. *De Is.* 44), and according to the opinion current among the Greeks and Romans they represented Anubis as a dog-headed man, though Wilkinson (*Anc. Egypt.* i. 440, Second Series) asserts that this was a mistake, the head being in reality that of a jackal. Some indications of the worship of the dog have been found in Syria, a colossal figure of a dog having formerly existed between Berytus and Tripolis (Winer, *Realw.* v.). It is still more to the point to observe that on one of the slabs found at Khorsabad and represented by Botta (pl. 141), we have the front of a temple depicted with an animal near the entrance, which can be nothing else than a bitch suckling a puppy, the head of the animal having, however, disappeared. The worship of idols representing the human body surmounted by the head of an animal (as in the well-known case of Nisroch) was common among the Assyrians. According to another equally unsatisfactory theory, Nibhaz is identified with the god of the nether world of the Sabian worship (Ges. *Thesau.* p. 842). W. L. B.

NIB'SHAN (with the definite article,

נִיבְשָׁן) [*the furnace*, Fürst; *soft soil*, Ges.]: Ναφλαζών; Alex. Νεβσαν: *Nebshan*. One of the six cities of Judah (Josh. xv. 62) which were in the district of the Midbar (A. V. "wilderness"), which probably in this one case only designates the depressed region on the immediate shore of the Dead Sea, usually in the Hebrew Scriptures called the *Arabâh*. [Vol. ii. p. 1491 *a.*] Under the name of Nempshan or Nebshan it is mentioned by Eusebius and Jerome in the *Onomasticon*, but with no attempt to fix its position. Nor does any subsequent traveller appear to have either sought for or discovered any traces of the name. G.

NICA'NOR (Νικάνωρ [*conqueror*]: *Nicanor*), the son of Patroclus (2 Macc. viii. 9), a general

who was engaged in the Jewish wars under Antiochus Epiphanes and Demetrius I. He took part in the first expedition of Lysias, B. C. 166 (1 Macc. iii. 38), and was defeated with his fellow-commander at Emmaus (1 Macc. iv.; cf. 2 Macc. viii. 9 ff.). After the death of Antiochus Eupator and Lysias, he stood high in the favor of Demetrius (1 Macc. vii. 26), who appointed him governor of Judea (2 Macc. xiv. 12), a command which he readily undertook as one "who bare deadly hate unto Israel" (1 Macc. vii. 26). At first he seems to have endeavored to win the confidence of Judas, but when his treacherous designs were discovered he had recourse to violence. A battle took place at Capharsalama, which was indecisive in its results; but shortly after Judas met him at Adasa (B. C. 161), and he fell "first in the battle." A general rout followed, and the 13th of Adar, on which the engagement took place, "the day before Mardocheus' day," was ordained to be kept forever as a festival (1 Macc. vii. 49; 2 Macc. xv. 36).

There are some discrepancies between the narratives in the two books of Maccabees as to Nicanor. In 1 Macc. he is represented as acting with deliberate treachery; in 2 Macc. he is said to have been won over to a sincere friendship with Judas, which was only interrupted by the intrigues of Alcimus, who induced Demetrius to repeat his orders for the capture of the Jewish hero (2 Macc. xiv. 23 ff.). Internal evidence is decidedly in favor of 1 Macc. According to Josephus (*Ant.* xii. 10, § 4), who does not, however, appear to have had any other authority than 1 Macc. before him, Judas was defeated at Capharsalama; and though his account is obviously inaccurate (*ἀναγκάζει τὸν Ἰούδαν . . . ἐπὶ τὴν ἄκραν φεύγειν*), the events which followed (1 Macc. vii. 33 ff.; comp. 2 Macc. xiv. 33 ff.) seem at least to indicate that Judas gained no advantage. In 2 Macc. this engagement is not noticed, but another is placed (2 Macc. xiv. 17) before the connection of Nicanor with Judas, while this was after it (1 Macc. vii. 27 ff.), in which "Simon Judas' brother" is said to have been "somewhat discomfited."

2. One of the first seven deacons (Acts vi. 5). According to the Pseudo-Hippolytus he was one of the seventy disciples, and "died at the time of the martyrdom of Stephen" (p. 953, ed. Migne). B. F. W.

NICODEMUS (Νικόδημος [*conqueror of the people*]: *Nicodemus*), a Pharisee, a ruler of the Jews, and <sup>c</sup> teacher of Israel (John iii. 1, 10), whose secret visit to our Lord was the occasion of the discourse recorded by St. John. The name was not uncommon among the Jews (Joseph. *Ant.* xiv. 3, § 2), and was no doubt borrowed from the Greeks. In the Talmud it appears under the form נִקְדִּימִי, and some would derive it from נִקְדִּי, innocent, דָּם, blood (*i. e.* "Sceleris purus");

Westein, *N. T.* i. 150. In the case of Nicodemus Ben Gorion, the name is derived by R. Nathan from a miracle which he is supposed to have performed (Otho, *Lex. Rab.* s. v.).

<sup>a</sup> The word *netšib*, identical with the above name, is several times employed for a garrison or an officer of the Philistines (see 1 Sam. x. 5, xiii. 3, 4; 1 Chr. xi. 16). This suggests the possibility of Nezib having been a Philistine place. But the application of the term *t*: the Philistines, though frequent, is not exclusive.

<sup>b</sup> If originally a Hebrew name, probably from the same root as Bashan — a sandy soil.

<sup>c</sup> The article in John iii. 10 (ὁ διδάσκ.), is probably only generic, although Winer and Bp. Middleton suppose that it implies a rebuke.

Nicodemus is only mentioned by St. John, who narrates his nocturnal visit to Jesus, and the conversation which then took place, at which the Evangelist may himself have been present. The high station of Nicodemus as a member of the Jewish Sanhedrim, and the avowed scorn under which the rulers concealed their inward conviction (John iii. 2) that Jesus was a teacher sent from God, are sufficient to account for the secrecy of the interview. A constitutional timidity is discernible in the character of the inquiring Pharisee, which could not be overcome by his vacillating desire to befriend and acknowledge One whom he knew to be a Prophet, even if he did not at once recognize in him the promised Messiah. Thus the few words which he interposed against the rash injustice of his colleagues are cautiously rested on a general principle (John vii. 50), and betray no indication of his faith in the Galilean whom his sect despised. And even when the power of Christ's love, manifested on the cross, had made the most timid disciples bold, Nicodemus does not come forward with his splendid gifts of affection until the example had been set by one of his own rank, and wealth, and station in society (ix. 39).

In these three notices of Nicodemus a noble candor and a simple love of truth shine out in the midst of hesitation and fear of man. We can therefore easily believe the tradition that after the resurrection (which would supply the last outward impulse necessary to confirm his faith and increase his courage) he became a professed disciple of Christ, and received baptism at the hands of Peter and John. All the rest that is recorded of him is highly uncertain. It is said, however, that the Jews, in revenge for his conversion, deprived him of his office, beat him cruelly, and drove him from Jerusalem; that Gamaliel, who was his kinsman, hospitably sheltered him until his death in a country house, and finally gave him honorable burial near the body of Stephen, where Gamaliel himself was afterwards interred. Finally, the three bodies are said to have been discovered on August 3, A. D. 415, which day was set apart by the Romish Church in honor of the event (Phot. *Biblioth. Col.* 171; Lucian, *De S. Steph. inventione*).

The conversation of Christ with Nicodemus is appointed as the Gospel for Trinity Sunday. The choice at first sight may seem strange. There are in that discourse no mysterious numbers which might shadow forth truths in their simplest relations; no distinct and yet simultaneous actions of the divine persons; no separation of divine attributes. Yet the instinct which dictated this choice was a right one. For it is in this conversation alone that we see how our Lord himself met the difficulties of a thoughtful man; how he checked, without noticing, the self-assumption of a teacher; how he lifted the half-believing mind to the light of nobler truth.

If the Nicodemus of St. John's Gospel be identical with the Nicodemus Ben Gorion of the Talmud, he must have lived till the fall of Jerusalem, which is not impossible, since the term *γέρον*, in John iii. 4, may not be intended to apply to Nicodemus himself. The arguments for their identification are that both are mentioned as Pharisees, wealthy, pious, and members of the Sanhedrim (*Taanith*,

f. 19, &c. See Otho, *Lex. Rab.* s. v.): and that in *Taanith* the original name (altered on the occasion of a miracle performed by Nicodemus in order

to procure rain) is said to have been נִיבְרִי, which is also the name of one of five Rabbinical disciples of Christ mentioned in *Simeon* f. 43, 1 (Otho, s. v. *Christus*). Finally, the family of this Nicodemus are said to have been reduced from great wealth to the most squalid and horrible poverty, which however may as well be accounted for by the fall of Jerusalem, as by the change of fortune resulting from an acceptance of Christianity.

On the Gospel of Nicodemus, see Fabricius, *Cod. Pseudepigr.* i. 213; Thilo, *Cod. Apoc.* i. 478. In some MSS. it is also called "The Acts of Pilate." It is undoubtedly spurious (as the conclusion of it sufficiently proves), and of very little value.

F. W. F.

\* Nicodemus is called a "ruler of the Jews" (*ἄρχων τῶν Ἰουδαίων*) in John iii. 1; and as that title (*ἄρχων*) is given in some passages (John vii. 26; Acts iii. 17, &c.) to members of the Sanhedrim, it has been inferred that he was one of that body. He was probably also a scribe or teacher of the Law (*διδάσκαλος τοῦ Ἰσραήλ*, John iii. 10 = *νομοδιδάσκαλος*); and hence belonged to that branch of the Council which represented the learned class of the nation. Of the three occurrences (see above) in which Nicodemus appears in the Gospel-history, the second occupies an intermediate position between the first and the third as to the phase of character which they severally exhibit; and in this respect, as Tholuck suggests, the narrative is seen to be "psychologically true" (*Evang. Johannis*, p. 205, 6<sup>te</sup> Aufl.). We have no means of deciding whether Nicodemus was present in the Sanhedrim at the time of the Saviour's arraignment and trial before that court. If he was present he may have been too undecided to interpose any remonstrance (none is recorded), or may have deemed it unavailing amid so much violence and passion. Stier would find in *οἰδαμεν* as plural a characteristic shrinking from anything like a direct personal avowal of his own belief (*Reden Jesu*, iv. 11, 4<sup>te</sup> Aufl.); but, more probably, he meant, in this way, to recognize more strongly the ample evidence furnished by Christ's miracles that He was a teacher sent from God. In this confession perhaps he associates with himself some of his own rank who were already known to him as secret believers (see xii. 42; xix. 38).

For a list of writers on the character of Nicodemus and his interview with Christ, see Hase's *Leben Jesu*, § 52 (4<sup>te</sup> Aufl.). On the apocryphal Gospel of Nicodemus see the articles on the Apocryphal Gospels generally by Hofmann in Herzog's *Real-Encyk.* xii. 325-327; by Bishop Elliott in the *Cambridge Essays* for 1856, p. 161 ff.; and by C. E. Stowe, D. D., in the *Bibl. Sacra*, ix. p. 79 f.; and particularly Tischendorf, *Evangelia Apocrypha* (Lips. 1853), pp. liv. ff., 203 ff. H.

NICOLAITANS (*Νικολαῖται*; *Nicolaitæ*). The question how far the sect that is mentioned by this name in Rev. ii. 6, 15, was connected with the Nicolas of Acts vi. 5, and the traditions that have gathered round his name, will be discussed below. [NICOLAS.] It will here be considered how far we can get at any distinct notion of what the sect itself was, and in what relation it stood to the life of the Apostolic age.

It has been suggested as one step towards this

\* The writer is indebted for this remark to a MS. sermon by Mr. Westcott.

result that the name before us was symbolic rather than historical. The Greek *Νικόλαος* is, it has been said, an approximate equivalent to the Hebrew *Balaam*, the lord (Vitringa, deriving it from *בַּלְעַל*): or, according to another derivation, the devourer of the people (so Hengstenberg, as from *בָּלַע*).<sup>a</sup> If we accept this explanation we have to deal with one sect instead of two — we are able to compare with what we find in Rev. ii. the incidental notices of the characteristics of the followers of Balaam in Jude and 2 Peter, and our task is proportionately an easier one. It may be urged indeed that this theory rests upon a false or at least a doubtful etymology (Gesenius, *s. v.* *בָּלַע*), makes it = *pergrivius*, and that the message to the Church of Pergamos (Rev. ii. 14, 15) appears to recognize “those that hold the doctrine of Balaam,” and “those that hold the doctrine of the Nicolaitans,” as two distinct bodies. There is, however, a sufficient answer to both these objections. (1.) The whole analogy of the mode of teaching which lays stress on the significance of names would lead us to look, not for philological accuracy, but for a broad, strongly-marked *paronomasia*, such as men would recognize and accept. It would be enough for those who were to hear the message that they should perceive the meaning of the two words to be identical.<sup>b</sup> (2.) A closer inspection of Rev. ii. 15 would show that the *οὐτως ἔχεις, κ. τ. λ.* imply the resemblance of the teaching of the Nicolaitans with that of the historical Balaam mentioned in the preceding verse, rather than any kind of contrast.

We are now in a position to form a clearer judgment of the characteristics of the sect. It comes before us as presenting the ultimate phase of a great controversy, which threatened at one time to destroy the unity of the Church, and afterwards to taint its purity. The controversy itself was inevitable as soon as the Gentiles were admitted, in any large numbers, into the Church of Christ. Were the new converts to be brought into subjection to the whole Mosaic law? Were they to give up their old habits of life altogether — to withdraw entirely from the social gatherings of their friends and kinsmen? Was there not the risk, if they continued to join in them, of their eating, consciously or unconsciously, of that which had been slain in the sacrifices of a false worship, and of thus sharing in the idolatry? The apostles and elders at Jerusalem met the question calmly and wisely. The burden of the Law was not to be imposed on the Gentile disciples. They were to abstain, among other things, from “meats offered to idols” and from “fornication” (Acts xv. 20, 29), and this decree was welcomed as the great charter of the Church’s freedom. Strange

<sup>a</sup> Cocceius (*Cogitat. in Rev. ii. 6*) has the credit of being the first to suggest this identification of the Nicolaitans with the followers of Balaam. He has been followed by the elder Vitringa (*Dissert. de Argum. Epist. Petri poster. in Hase’s Thesaurus*, ii. 987), Hengstenberg (*in loc.*), Stier (*Words of the Risen Lord*, p. 125, Eng. transl.), and others. Lightfoot (*Hor. Heb. in Act. Apost. vi. 5*) suggests another and more startling *paronomasia*. The word, in his view, was chosen, as identical in sound with *נִכְרַחֵם*, “let us eat,” and as thus marking out the special characteristic of this sect.

as the close union of the moral and the positive commands may seem to us, it did not seem so to the synod at Jerusalem. The two sins were very closely allied, often even in the closest proximity of time and place. The fathomless impurity which overspread the empire made the one almost as inseparable as the other from its daily social life.

The messages to the Churches of Asia and the later Apostolic Epistles (2 Peter and Jude) indicate that the two evils appeared at that period also in close alliance. The teachers of the Church branded them with a name which expressed their true character. The men who did and taught such things were followers of Balaam (2 Pet. ii. 15; Jude 11). They, like the false prophet of Pethor, united brave words with evil deeds. They made their “liberty” a cloak at once for cowardice and licentiousness. In a time of persecution, when the eating or not eating of things sacrificed to idols was more than ever a crucial test of faithfulness, they persuaded men more than ever that it was a thing indifferent (Rev. ii. 13, 14). This was bad enough, but there was a yet worse evil. Mingling themselves in the orgies of idolatrous feasts, they brought the impurities of those feasts into the meetings of the Christian Church. There was the most imminent risk that its Agapæ might become as full of abominations as the Bacchanalia of Italy had been (2 Pet. ii. 12, 13, 18; Jude 7, 8; comp. Liv. xxx. 8–19). Their sins had already brought scandal and discredit on the “way of truth.” And all this was done, it must be remembered, not simply as an indulgence of appetite, but as part of a system, supported by a “doctrine,” accompanied by the boast of a prophetic illumination (2 Pet. ii. 1). The trance of the son of Beor and the sensual debasement into which he led the Israelites were strangely reproduced.

These were the characteristics of the followers of Balaam, and, worthless as most of the traditions about Nicolas may be, they point to the same distinctive evils. Even in the absence of any teacher of that name, it would be natural enough, as has been shown above, that the Hebrew name of ignominy should have its Greek equivalent. If there were such a teacher, whether the proselyte of Antioch or another,<sup>c</sup> the application of the name to his followers would be proportionately more pointed. It confirms the view which has been taken of their character to find that stress is laid in the first instance on the “deeds” of the Nicolaitans. To hate those deeds is a sign of life in a Church that otherwise is weak and faithless (Rev. ii. 6). To tolerate them is well nigh to forfeit the glory of having been faithful under persecution (Rev. ii. 14, 15). (Comp. Neander’s *Apostelgesch.* p. 620; Gieseler’s *Ecl. Hist.* § 29; Hengstenberg and Alford on Rev. ii. 6; Stier, *Words of the Risen Saviour*, x.) E. H. P.

<sup>b</sup> Vitringa (*l. c.*) finds another instance of this indirect expression of feeling in the peculiar form, “Balaam the son of Bosor,” in 2 Pet. ii. 15. The substitution of the latter name for the *Βεῶρ* of the LXX. originated, according to his conjecture, in the wish to point to his antitype in the Christian Church as a true *בְּרִי בְשָׂר*, a *filius carnis*.

<sup>c</sup> It is noticeable (though the documents themselves are not of much weight as evidence) that in two instances the Nicolaitans are said to be “falsely so called” (*ψευδώνυμοι*, Ignat. *ad Trall. xi.* *Crmas Apost. vi. 8*).

**NICOLAS** (Νικόλαος [*conqueror of the people*]; *Nicolaus*), Acts vi<sup>5</sup> A native of Antioch, and a proselyte to the Jewish faith. When the church was still confined to Jerusalem he became a convert; and being a man of honest report, full of the Holy Ghost and of wisdom, he was chosen by the whole multitude of the disciples to be one of the first seven deacons, and he was ordained by the Apostles, A. D. 33.

A sect of Nicolaitans is mentioned in Rev. ii. 6, 15; and it has been questioned whether this Nicolas was connected with them, and if so, how closely.

The Nicolaitans themselves, at least as early as the time of Irenæus (*Contr. Hæc.* i. 26, § 3), claimed him as their founder. Epiphanius, an inaccurate writer, relates (*Adv. Hæc.* i. 2, § 25, p. 76) some details of the life of Nicolas the deacon, and describes him as gradually sinking into the grossest impurity, and becoming the originator of the Nicolaitans and other immoral sects. Stephen Gobar (*Photii Bibl. i. th.* § 232, p. 291, ed. 1824) states — and the statement is corroborated by the recently discovered *Philosophumena*, bk. vii. § 36 — that Hippolytus agreed with Epiphanius in his unfavorable view of Nicolas. The same account is believed, at least to some extent, by Jerome (*Ep.* 147, t. i. p. 1082, ed. Vallars. etc.) and other writers in the 4th century. But it is irreconcilable with the traditionary account of the character of Nicolas, given by Clement of Alexandria (*Strom.* iii. 4, p. 187, Sylb. and *apud Euseb. H. E.* iii. 29; see also Hammond, *Annot.* on Rev. ii. 4), an earlier and more discriminating writer than Epiphanius. He states that Nicolas led a chaste life and brought up his children in purity, that on a certain occasion having been sharply reproved by the Apostles as a jealous husband, he repelled the charge by offering to allow his wife to become the wife of any other person, and that he was in the habit of repeating a saying which is ascribed to the Apostle Matthias also, — that it is our duty to fight against the flesh and to abuse (*παραχρησθαι*) it. His words were perversely interpreted by the Nicolaitans as an authority for their immoral practices. Theodoret (*Hæret. Fab.* iii. 1) in his account of the sect repeats the foregoing statement of Clement; and charges the Nicolaitans with false dealing in borrowing the name of the deacon. Ignatius,<sup>a</sup> who was contemporary with Nicolas, is said by Stephen Gobar to have given the same account as Clement, Eusebius, and Theodoret, touching the personal character of Nicolas. Among modern critics, Cotelerius in a note on *Constit. Apost.* vi. 8, after reciting the various authorities, seems to lean towards the favorable view of the character of Nicolas. Professor Burton (*Lectures on Ecclesiastical History*, Lect. xii. p. 364, ed. 1833) is of opinion that the origin of the term Nicolaitans is uncertain; and that, "though Nicolas the deacon has been mentioned as their founder, the evidence is extremely slight which would convict that person himself of any immoralities." Tillemont (*H. E.* ii. 47), possibly influenced by the fact that no honor is paid to the memory of Nicolas by any branch of the Church, allows perhaps too much weight to the testimony against him; rejects peremptorily Cassian's statement — to which Neander (*Planting of the Church*, bk. v. p. 390, ed. Bohn) gives his adhesion — that some other Nicolas was

the founder of the sect; and concludes that if not the actual founder, he was so unfortunate as to give occasion to the formation of the sect, by his indistinct speaking. Grotius's view, as given in a note on Rev. ii. 6, is substantially the same as that of Tillemont.

The name Balaam is perhaps (but see *Jesen. Thes.* 210) capable of being interpreted as a Hebrew equivalent of the Greek Nicolas. Some commentators think that this is alluded to by St. John in Rev. ii. 14; and C. Vitringa (*Obs. Sacr.* iv. 9) argues forcibly in support of this opinion.

W. T. B.

**NICOPOLIS** (Νικόπολις [*city of victory*]; *Nicopolis*) is mentioned in Tit. iii. 12, as the place where, at the time of writing the epistle, St. Paul was intending to pass the coming winter, and where he wished Titus to meet him. Whether either or both of these purposes were accomplished we cannot tell. Titus was at this time in Crete (Tit. i. 5). The subscription to the epistle assumes that the Apostle was at Nicopolis when he wrote; but we cannot conclude this from the form of expression. We should rather infer that he was elsewhere, possibly at Ephesus or Corinth. He urges that no time should be lost (*σπουδάσον ἐλθεῖν*); hence we conclude that winter was near.

Nothing is to be found in the epistle itself to determine which Nicopolis is here intended. There were cities of this name in Asia, Africa, and Europe. If we were to include all the theories which have been respectably supported, we should be obliged to write at least three articles. One Nicopolis was in Thrace, near the borders of Macedonia. The subscription (which, however, is of no authority) fixes on this place, calling it the Macedonian Nicopolis: and such is the view of Chrysostom and Theodoret. De Wette's objection to this opinion (*Pastoral-Briefe*, p. 21), that the place did not exist till Trajan's reign, appears to be a mistake. Another Nicopolis was in Cilicia; and Schrader (*Der Apostel Paulus*, i. pp. 115-119) pronounces for this; but this opinion is connected with a peculiar theory regarding the Apostle's journeys. We have little doubt that Jerome's view is correct, and that the Pauline Nicopolis was the celebrated city of Epirus ("scribit Apostolus de Nicopoli, quæ in Actiaco littore sita," Hieron. *Proem.* ix. 195). For arrangements of St. Paul's journeys, which will harmonize with this, and with the other facts of the Pastoral Epistles, see Birks, *Howe Apostolice*, pp. 296-304; and Conybeare and Howson, *Life and Epp. of St. Paul* (2d ed.), ii. 564-573. It is very possible, as is observed there, that St. Paul was arrested at Nicopolis and taken thence to Rome for his final trial.

This city (the "City of Victory") was built by Augustus in memory of the battle of Actium, and on the ground which his army occupied before the engagement. It is a curious and interesting circumstance, when we look at the matter from a Biblical point of view, that many of the handsomest parts of the town were built by Herod the Great (*Joseph. Ant.* xvi. 5, § 3). It is likely enough that many Jews lived there. Moreover, it was conveniently situated for apostolic journeys in the eastern parts of Achaia and Macedonia, and also to the northwards, where churches perhaps were founded. St. Paul had long before preached the

<sup>a</sup> Usher conjectures that this reference is to the interpolated copy of the Epistle to the Trallians, ch. x.

(*De Ignatii Epistolis*, § 6, and Coteler. *Patr. Apost.* ii. 195, ed. 1724.)

Gospel, at least on the confines of Illyricum (Rom. xv. 19), and soon after the very period under consideration Titus himself was sent on a mission to Dalmatia (2 Tim. iv. 10).

Nicopolis was on a peninsula to the west of the Bay of Actium, in a low and unhealthy situation, and it is now a very desolate place. The remains have been often described. We may refer to Leake's *Northern Greece*, i. 178, and iii. 491; Bowen's *Athos and Epirus*, 211; Wolfe in *Journ. of R. Geog. Soc.* iii. 92; Merivale's *Rome*, iii. 327, 328; Wordsworth's *Greece*, 229-232. In the last mentioned work, and in the *Dict. of Greek and Roman Geog.* maps of the place will be found.

J. S. H.

**NIGER** (Νίγερ [*black*]: *Niger*) is the additional or distinctive name given to the Symeon (Συμεών), who was one of the teachers and prophets in the Church at Antioch (Acts xiii. 1). He is not known except in that passage. The name was a common one among the Romans; and the conjecture that he was an African proselyte, and was called Niger on account of his complexion, is unnecessary as well as destitute otherwise of any support. His name, Symeon, shows that he was a Jew by birth; and as in other similar cases (e. g. Saul, Paul — Silas, Silvanus) he may be supposed to have taken the other name as more convenient in his intercourse with foreigners. He is mentioned second among the five who officiated at Antioch, and perhaps we may infer that he had some preëminence among them in point of activity and influence. It is impossible to decide (though Meyer makes the attempt) who of the number were prophets (προφῆται), and who were teachers (διδασκαλοι).

H. B. H.

**NIGHT.** The period of darkness, from sunset to sunrise, including the morning and evening twilight, was known to the Hebrews by the term

לַיְלָה, *layil*, or לַיְלָהָה, *layêlâh*. It is opposed to "day," the period of light (Gen. i. 5). Following the oriental sunset is the brief evening twilight (נֶשֶׁפֶה, *nesheph*, Job xxiv. 15, rendered "night" in Is. v. 11, xxi. 4, lix. 10), when the stars appeared (Job iii. 9). This is also called "evening" (עֶרֶב, *'ereb*, Prov. vii. 9, rendered "night" in Gen. xlix. 27, Job vii. 4), but the term which especially denotes the evening twilight is עֶלְטָה, *êlâtâh* (Gen. xv. 17, A. V. "dark;" Ez. xii. 6, 7, 12). *'Ereb* also denotes the time just before sunset (Deut. xxiii. 11; Josh. viii. 29), when the women went to draw water (Gen. xxiv. 11), and the decline of the day is called "the turning of evening" (פְּנֹת עֶרֶב, *pênôth 'ereb*, Gen. xxiv. 63), the time of prayer. This period of the day must also be that which is described as "night" when Boaz winnowed his barley in the evening breeze (Ruth ii. 2), the cool of the day (Gen. iii. 8), when the shadows begin to fall (Jer. vi. 4), and the wolves prowled about (Hab. i. 8; Zeph. iii. 3). The time of midnight (חַצִּי הַלַּיְלָהָה, *châtsi hallayêlâh*, Ruth iii. 8, and חַצֹּת הַלַּיְלָהָה, *châtsôth hallayêlâh*, Ex. xi. 4) or greatest darkness is called in

רוֹץ. vii. 9 "the pupil of night" (לֵישׁוֹן לַיְלָהָה, *ishôn layêlâh*, A. V. "black night"). The period between midnight and the morning twilight was generally selected for attacking an enemy by surprise (Judg. vii. 19.) The morning twilight is denoted by the same term, *nesheph*, as the evening twilight, and is unmistakably intended in 1 Sam. xxxi. 12; Job vii. 4; Ps. cxix. 147; possibly also in Is. v. 11. With sunrise the night ended. In one passage, Job xxvi. 10, חֹשֶׁךְ, *chôshec*, "darkness," is rendered "night" in the A. V., but is correctly given in the margin.

For the artificial divisions of the night see the articles DAY and WATCHES. W. A. W.

**NIGHT-HAWK** (טַחְמָס *tachmâs*: γλαΐξ: *noctua*). Bochart (*Hieroz.* ii. 830) has endeavored to prove that the Hebrew word, which occurs only (Lev. xi. 16; Deut. xiv. 15) amongst the list of unclean birds, denotes the "male ostrich," the preceding term, *bath-gadâh* <sup>a</sup> (*owl*, A. V.), signifying the female bird. The etymology of the word points to some bird of prey, though there is great uncertainty as to the particular species indicated. The LXX., Vulg., and perhaps Onkelos, understand some kind of "owl;" most of the Jewish doctors indefinitely render the word "a rapacious bird;" Gesenius (*Theo. s. v.*) and Rosenmüller (*Schol. ad Lev. xi. 16*) follow Bochart. Bochart's explanation is grounded on an overstrained interpretation of the etymology of the verb *châmâs*, the root of *tachmâs*; he restricts the meaning of the root to the idea of acting "unjustly" or "deceitfully," and thus comes to the conclusion that the "unjust bird" is the male ostrich [OSTRICH]. Without stopping to consider the etymology of the word further than to refer the reader to Gesenius, who gives as the first meaning of *châmâs* "he acted violently," and to the Arabic *chamush*, "to wound with claws,"<sup>b</sup> it is not at all probable that Moses should have specified both the male and female ostrich in a list which was no doubt intended to be as comprehensive as possible. The not unfrequent occurrence of the expression "after their kind" is an argument in favor of this assertion. Michaelis believes some kind of swallow (*Hirundo*) is intended: the word used by the Targum of Jonathan is by Kitto (*Pict. Bib. Lev. xi. 16*) and by Oedmaun (*Vermisch Samm.* i. p. 3, c. iv.) referred to the swallow, though the last-named authority says, "it is uncertain, however, what Jonathan really meant." Buxtorf (*Lez. Rabbin.* s. v. טַחְמָס) translates the word used by Jonathan, "a name of a rapacious bird, *harpaga*." It is not easy to see what claim the swallow can have to represent the *tachmâs*, neither is it at all probable that so small a bird should have been noticed in the Levitical law. The rendering of the A. V. rests on no authority, though from the absurd properties which, from the time of Aristotle, have been ascribed to the night-hawk or goat-sucker, and the superstitions connected with this bird, its claim is not so entirely destitute of every kind of evidence.

As the LXX. and Vulg. are agreed that *tachmus* denotes some kind of owl, we believe it is safer to follow these versions than modern commentators

<sup>b</sup> حَمَشٌ scalpsit, unguibus vulneravit faciem See Freytag s. v.

The Greek γλαύξ is used by Aristotle for some common species of owl in all probability for the *Strix flammea* (white owl), or the *Syrnium striatula* (tawny owl);<sup>a</sup> the Veneto-Greek reads *νυκτι-όραξ*, a synonym of *δρος*, Aristot., i. e. the *Otus vulgaris*, Flem. (long-eared owl): this is the species which Oedmann (see above) identifies with *teclmās*. "The name," he says, "indicates a bird which exercises power, but the force of the power is in the Arabic root *chamash*, 'to tear a face with claws.' Now, it is well known in the East that there is a species of owl of which people believe that it glides into chambers by night and tears the flesh off the faces of sleeping children." Hasselquist (*Trav.* p. 196, Lond. 1766) alludes to this nightly terror, but he calls it the "Oriental owl" (*Strix Orientalis*), and clearly distinguishes it from the *Strix otus*, Lin. The Arabs in Egypt call this infant-killing owl *massasa*, the Syrians *hana*. It is believed to be identical with the *Syrnium striatula*, but what foundation there may be for the belief in its child-killing propensities we know not. It is probable that some common species of owl is denoted by *teclmās*, perhaps the *Strix flammea* or the *Athene meridionalis*, which is extremely common in Palestine and Egypt. [OWL.] W. H.

\* NIGHT-MONSTER, Is. xxxiv. 14, marg. [OWL.]

NILE. 1. *Names of the Nile.* — The Hebrew names of the Nile, excepting one that is of ancient Egyptian origin, all distinguish it from other rivers. With the Hebrews the Euphrates, as the great stream of their primitive home, was always "the river," and even the long sojourn in Egypt could not put the Nile in its place. Most of their geographical terms and ideas are, however, evidently traceable to Canaan, the country of the Hebrew language. Thus the sea, as lying on the west, gave its name to the west water. It was only in such an exceptional case as that of the Euphrates, which had no rival in Palestine, that the Hebrews seem to have retained the ideas of their older country. These circumstances lend no support to the idea that the Shemites and their language came originally from Egypt. The Hebrew names of the Nile are *Shichôr*, "the black," a name perhaps of the same sense as Nile; *Yeôr*, "the river," a word originally Egyptian; "the river of Egypt;" "the Nachal of Egypt" (if this appellation designate the Nile, and Nachal be a proper name); and "the rivers of Cush," or "Ethiopia." It must be observed that the word Nile nowhere occurs in the A. V.

(a.) *Shichôr*, שִׁחֹר, שְׁחֹר, שְׁחָר, "the black," from שָׁחַר, "he or it was or became black." The idea of blackness conveyed by this word has, as we should expect in Hebrew, a wide sense, applying not only to the color of the hair (Lev. xiii. 31, 37), but also to that of a face tanned by the sun (Cant. i. 5, 6), and that of a skin black through disease (Job xxx. 30). It seems, however, to be indicative of a very dark color; for it is said in the Lamentations, as to the wretched Nazarites in the besieged city, "Their

visage is darker than blackness" (iv. 8). That the Nile is meant by *Shihor* is evident from its mention as equivalent to *Yeôr*, "the river," and as a great river, where Isaiah says of Tyre, "And by great waters, the sowing of *Shihor*, the harvest of the river (יָרֵךְ) [is] her revenue" (xxiii. 3); from its being put as the western boundary of the Promised Land (Josh. xiii. 3; 1 Chr. xii. 5), instead of "the river of Egypt" (Gen. xv. 18); and from its being spoken of as the great stream of Egypt, just as the Euphrates was of Assyria (Jer. ii. 18). If, but this is by no means certain, the name Nile, Νεῖλος, be really indicative of the color of the river, it must be compared with the Sanskrit नील, *nīla*, "blue" especially, probably "dark blue," also even "black," as नीलपत्र, *nīlapatra*, "black mud," and must be considered to be the Indo-European equivalent of *Shihor*. The signification "blue" is noteworthy, especially as a great confluent, which most nearly corresponds to the Nile in Egypt, is called the Blue River, or, by Europeans, the Blue Nile.

(b.) *Yeôr*, יְאוֹר, יָאוֹר, is the same as the ancient Egyptian ATUR, AUR, and the Coptic εἰερο, αἰρο, αἰρω (M), ερο (S).

It is important to notice that the second form of the ancient Egyptian name alone is preserved in the later language, the second radical of the first having been lost, as in the Hebrew form; so that, on this double evidence, it is probable that this commoner form was in use among the people from early times. *Yeôr*, in the singular, is used of the Nile alone, excepting in a passage in Daniel (xii. 5, 6, 7), where another river, perhaps the Tigris (comp. x. 4), is intended by it. In the plural, יְאוֹרִים, this name is applied to the branches and canals of the Nile (Ps. lxxviii. 44; Ez. xxix. 3 ff., xxx. 12), and perhaps tributaries also, with, in some places, the addition of the names of the country, Mitsraim, Matsor, יְאוֹרֵי מִצְרַיִם (Is. vii. 18, A. V. "rivers of Egypt"), יְאוֹרֵי מִצְוֹר (xix. 6, "brooks of defence;" xxxvii. 25,<sup>b</sup> "rivers of the besieged places"); but it is also used of streams or channels, in a general sense, when no particular ones are indicated (see Is. xxxiii. 21; Job xxviii. 10). It is thus evident that this name specially designates the Nile; and although properly meaning a river, and even used with that signification, it is probably to be regarded as a proper name when applied to the Egyptian river. The latter inference may perhaps be drawn from the constant mention of the Euphrates as "the river;" but it is to be observed that *Shihor*, or "the river of Egypt," is used when the Nile and the Euphrates are spoken of together, as though *Yeôr* could not be well employed for the former with the ordinary term for river, *nāhâr*, for the latter.<sup>c</sup>

(c.) "The river of Egypt," נְהַר מִצְרַיִם, is mentioned with the Euphrates in the promise of

<sup>a</sup> Not to be confounded with the *Nycticorax* of modern ornithology, which is a genus of *Ardeionæ* (herons).  
<sup>b</sup> In Is. xxxvii. 25 the reference seems to be to an Assyrian conquest of Egypt.  
<sup>c</sup> The Nile was probably mentioned by this name

in the original of Ecclesiasticus xxiv. 27, where the Greek text reads ὡς φῶς. נְהַר, having been misunderstood (Gesenius, *Theo* s. v.)

the extent of the land to be given to Abraham's posterity, the two limits of which were to be "the river of Egypt" and "the great river, the river Euphrates" (Gen. xv. 18).

(*l.*) "The Nachal of Egypt," נַחַל מִצְרַיִם, has generally been understood to mean "the torrent" or "brook of Egypt," and to designate a desert stream at Rhinocorura, now El-Areesh, on the eastern border. Certainly נַחַל usually signifies a stream or torrent, not a river; and when a river, one of small size, and dependent upon mountain-rain or snow; but as it is also used for a

valley, corresponding to the Arabic *wādee* (وَادِي),

which is in like manner employed in both senses, it may apply like it, in the case of the Guadalupe, etc., to great rivers. This name must signify the Nile, for it occurs in cases parallel to those where Shihor is employed (Num. xxxiv. 5; Josh. xv. 4, 47; 1 K. viii. 65; 2 K. xxiv. 7; Is. xvii. 12), both designating the easternmost or Pelusiac branch of the river as the border of the Philistine territory, where the Egyptians equally put the border of their country towards Kanaan or Kanana (Canaan). It remains for us to decide whether the name signify the "brook of Egypt," or whether Nachal be a Hebrew form of Nile. On the one side may be urged the unlikelihood that the middle radical should not be found in the Indo-European equivalents, although it is not one of the most permanent letters; on the other, that it is improbable that *nahar* "river" and *nachal* "brook" would be used for the same stream. If the latter be here a proper name, Νεῖλος must be supposed to be the same word; and the meaning of the Greek as well as the Hebrew name would remain doubtful, for we could not then positively decide on an Indo-European signification. The Hebrew word *nachal* might have been adopted as very similar in sound to an original proper name; and this idea is supported by the forms of various Egyptian words in the Bible, which are susceptible of Hebrew etymologies in consequence of a slight change. It must, however, be remembered that there are traces of a Semitic language, apparently distinct from Hebrew, in geographical names in the east of Lower Egypt, probably dating from the Shepherd-period; and therefore we must not, if we take *nachal* to be here Semitic, restrict its meaning to that which it bears or could bear in Hebrew.

(*c.*) "The rivers of Cush," נְהַרֵי כוּשׁ, are alone mentioned in the extremely difficult prophecy contained in Is. xviii. From the use of the plural, a single stream cannot be meant, and we must suppose "the rivers of Ethiopia" to be the confluents or tributaries of the Nile. Gesenius (*Lex.* s. v. נְהַר) makes them the Nile and the Astaboras. Without attempting to explain this prophecy, it is interesting to remark that the expression, "Whose land the rivers have spoiled" (vv. 2, 7), if it apply to any Ethiopian nation, may refer to the ruin of great part of Ethiopia, for a long distance above the First Cataract, in consequence of the fall of the level of the river. This change has been effected through the breaking down of a barrier at that cataract, or at Sillsila, by which the valley has been placed above the reach of the

fertilizing annual deposit. The Nile is sometimes poetically called a sea, יָם (Is. xviii. 2; Nah. iii. 8 Job. xli. 31; but we cannot agree with Gesenius *Theo. s. v.*, that it is intended in Is. xix. 5); this, however, can scarcely be considered to be one of its names.

It will be instructive to mention the present appellations of the Nile in Arabic, which may illustrate the Scripture terms. By the Arabs it is called Bahr en-Neel, "the river Nile," the word "bahr" being applied to seas and the greatest rivers. The Egyptians call it Bahr, or "the river" alone; and call the inundation En-Neel, or "the Nile." This latter use of what is properly a name of the river resembles the use of the plural of *Yeôr* in the Bible for the various channels or even streams of Nile-water.

With the ancient Egyptians, the river was sacred, and had, besides its ordinary name already given, a sacred name, under which it was worshipped, HAPEE, or HAPEE-MU, "the abyss," or "the abyss of waters," or "the hidden." Corresponding to the two regions of Egypt, the Upper Country and the Lower, the Nile was called HAPEE-RES, "the Southern Nile," and HAPEE-MEHET, "the Northern Nile," the former name applying to the river in Nubia as well as in Upper Egypt. The god Nilus was one of the lesser divinities. He is represented as a stout man having woman's breasts, and is sometimes painted red to denote the river during its rise and inundation, or High Nile, and sometimes blue, to denote it during the rest of the year, or Low Nile. Two figures of HAPEE are frequently represented on each side of the throne of a royal statue, or in the same place in a bas-relief, binding it with water-plants, as though the prosperity of the kingdom depended upon the produce of the river. The name HAPEE, perhaps, in these cases, HEPEE, was also applied to one of the four children of Osiris, called by Egyptologists the genii of AMENT or Hades, and to the bull Apis, the most revered of all the sacred animals. The genius does not seem to have any connection with the river, excepting indeed that Apis was sacred to Osiris. Apis was worshipped with a reference to the inundation, perhaps because the myth of Osiris, the conflict of good and evil, was supposed to be represented by the struggle of the fertilizing river or inundation with the desert and the sea, the first threatening the whole valley, and the second wasting it along the northern coast.

2. *Description of the Nile.* — We cannot as yet determine the length of the Nile, although recent discoveries have narrowed the question. There is scarcely a doubt that its largest confluent is fed by the great lakes on and south of the equator. It has been traced upwards for about 2,700 miles, measured by its course, not in a direct line, and its extent is probably upwards of 1,000 miles more, making it longer than even the Mississippi, and the longest of rivers. In Egypt and Nubia it flows through a bed of silt and slime, resting upon marine or nummulitic limestone, covered by a later formation, over which, without the valley, lie the sand and rocky *débris* of the desert. Beneath the limestone is a sandstone formation, which rises and bounds the valley in its stead in the higher part of the Thebais. Again beneath the sandstone is the breccia verde, which appears above it in the desert eastward of Thebes, and yet lower a group of azob: rocks, gneisses, quartzes, mica schists, and cla-

states, resting upon the red granite and syenite that rise through all the upper strata at the First Cataract.<sup>a</sup> The river's bed is cut through these layers of rock, which often approach it on either side, and sometimes confine it on both sides, and even obstruct its course, forming rapids and cataracts. To trace it downwards we must first go to equatorial Africa, the mysterious half-explored home of the negroes, where animal and vegetable life flourishes around and in the vast swamp-land that waters the chief part of the continent. Here are two great shallow lakes, one nearer to the coast than the other. From the more eastern (the Ukerswe, which is on the equator), a chief tributary of the White Nile probably takes its rise, and the more western (the Ljeeje), may feed another tributary. These lakes are filled, partly by the heavy rains of the equatorial region, partly by the melting of the snows of the lofty mountains discovered by the missionaries Krapf and Rebmann. Whether the lakes supply two tributaries or not, it is certain that from the great region of waters where they lie, several streams fall into the Bahr el-Abyad, or White Nile. Great, however, as is the body of water of this the longer of the two chief confluent, it is the shorter, the Bahr el-Azrak, or Blue River, which brings down the alluvial soil that makes the Nile the great fertilizer of Egypt and Nubia. The Bahr el-Azrak rises in the mountains of Abyssinia, and carries down from them a great quantity of decayed vegetable matter and alluvium. The two streams form a junction at Khartoom, now the seat of government of Soodán, or the Black Country under Egyptian rule. The Bahr el-Azrak is here a narrow river, with high steep mud-banks like those of the Nile in Egypt, and with water of the same color; and the Bahr el-Abyad is broad and shallow, with low banks and clear water. Further to the north another great river, the Atbara, rising, like the Bahr el-Azrak, in Abyssinia, falls into the main stream, which, for the remainder of its course, does not receive one tributary more. Throughout the rest of the valley the Nile does not greatly vary, excepting that in Lower Nubia, through the fall of its level by the giving way of a barrier in ancient times, it does not inundate the valley on either hand. From time to time its course is impeded by cataracts or rapids, sometimes extending many miles, until, at the First Cataract, the boundary of Egypt, it surmounts the last obstacle. After a course of about 550 miles, at a short distance below Cairo and the Pyramids, the river parts into two great branches, which water the Delta, nearly forming its boundaries to the east and west, and flowing into the shallow Mediterranean. The references in the Bible are mainly to the characteristics of the river in Egypt. There, above the Delta, its average breadth may be put at from half a mile to three-quarters, excepting where large islands increase the distance. In the Delta its branches are usually narrower. The water is extremely sweet, especially at the season when it is turbid. It is said by the people that those who have drunk of it and left the country must return to drink of it again.

The great annual phenomenon of the Nile is the

inundation, the failure of which produces a famine for Egypt is virtually without rain (see Zech. xiv 17, 18). The country is therefore devoid of the constant changes which make the husbandmen of other lands look always for the providential care of God. "For the land, whither thou goest in to possess it, [is] not as the land of Egypt, from whence ye came out, where thou sowedst thy seed, and waterdest [it] with thy foot, as a garden of herbs: but the land, whither ye go to possess it, [is] a land of hills and valleys, [and] drinketh water of the rain of heaven: a land which the LORD thy God careth for: the eyes of the LORD thy God [are] always upon it, from the beginning of the year even unto the end of the year" (Deut. xi. 10-12). At Khartoom the increase of the river is observed early in April, but in Egypt the first signs of rising occur about the summer solstice, and generally the regular increase does not begin until some days after, the inundation commencing about two months after the solstice. The river then pours, through canals and cuttings in the banks, which are a little higher than the rest of the soil, over the valley, which it covers with sheets of water. It attains to its greatest height about, or not long after, the autumnal equinox, and then, falling more slowly than it had risen, sinks to its lowest point at the end of nine months, there remaining stationary for a few days before it again begins to rise. The inundations are very various, and when they are but a few feet deficient or excessive cause great damage and distress. The rise during a good inundation is about 40 feet at the First Cataract, about 36 at Thebes, and about 4 at the Rosetta and Damietta mouths. If the river at Cairo attain to no greater height than 18 or 20 feet, the rise is scanty; if only to 2 or 4 more, insufficient; if to 24 feet or more, up to 27, good; if to a greater height, it causes a flood. Sometimes the inundation has failed altogether, as for seven years in the reign of the Fátíme Khaleefeh El-Mustansir billáh, when there was a seven years' famine; and this must have been the case with the great famine of Joseph's time, to which this later one is a remarkable parallel [FAMINE]. Low inundations always cause dearths; excessive inundations produce or foster the plague and murrain, besides doing great injury to the crops. In ancient times, when every square foot of ground must have been cultivated, and a minute system of irrigation maintained, both for the natural inundation and to water the fields during the Low Nile, and when there were many fish-pools as well as canals for their supply, far greater ruin than now must have been caused by excessive inundations. It was probably to them that the priest referred, who told Solon, when he asked if the Egyptians had experienced a flood, that there had been many floods, instead of the one of which he had spoken, and not to the successive past destructions of the world by water, alternating with others by fire, in which some nations of antiquity believed (Plat. *Timæus*, 21 ff.).

The Nile in Egypt is always charged with alluvium, especially during the inundation; but the annual deposit, excepting under extraordinary circumstances, is very small in comparison with what would be conjectured by any one unacquainted with subjects of this nature. Inquiries have come to different results as to the rate, but the discrepancy does not generally exceed an inch in a century. The ordinary average increase of the soil in Egypt

<sup>a</sup> The geology of the Nile-valley is excellently given by Hugh Miller (*Testimony of the Rocks*, p. 409 ff.).

is about four inches and a half in a century. The cultivable soil of Egypt is wholly the deposit of the Nile, but it is obviously impossible to calculate, from its present depth, when the river first began to flow in the rocky bed now so deeply covered with the rich alluvium. An attempt has however been made to use geology as an aid to history, by first endeavoring to ascertain the rate of increase of the soil, then digging for indications of man's existence in the country, and lastly applying to the depth at which any such remains might be discovered the scale previously obtained. In this manner Mr. Horner (*Phil. Transactions*, vol. 148), when his laborers had found, or pretended to find, a piece of pottery at a great depth on the site of Memphis, argued that man must have lived there, and not in the lowest state of barbarism, about 13,000 years ago. He however entirely disregarded various causes by which an object could have been deposited at such a depth, as the existence of canals and wells, from the latter of which water could be anciently as now drawn up in earthen pots from a very low level, and the occurrence of fissures in the earth. He formed his scale on the supposition that the ancient Egyptians placed a great statue before the principal temple of Memphis in such a position that the inundation each year reached its base, whereas we know that they were very careful to put all their stone works where they thought they would be out of the reach of its injurious influence; and, what is still more serious, he laid stress upon the discovery of burnt brick even lower than the piece of pottery, being unaware that there is no evidence that the Egyptians in early times used any but crude brick, a burnt brick being as sure a record of the Roman dominion as an imperial coin. It is important to mention this extraordinary mistake, as it was accepted as a correct result by the late Baron Bunsen, and urged by him and others as a proof of the great antiquity of man in Egypt (*Quarterly Review*, Apr. 1859, No. ccx.; *Modern Egyptians*, 5th ed., note by Ed., p. 593 ff.).

In Upper Egypt the Nile is a very broad stream, flowing rapidly between high, steep mud-banks, which are scarped by the constant rush of the water, which from time to time washes portions away, and stratified by the regular deposit. On either side rise the bare yellow mountains, usually a few hundred feet high, rarely a thousand, looking from the river like cliffs, and often honeycombed with the entrances of the tombs which make Egypt one great city of the dead, so that we can understand the meaning of that murmur of the Israelites to Moses, "Because [there were] no graves in Egypt, hast thou taken us away to die in the wilderness?" (Ex. xiv. 11). Frequently the mountain on either side approaches the river in a rounded promontory, against whose base the restless stream washes, and then retreats and leaves a broad bay-like valley, bounded by a rocky curve. Rarely both mountains confine the river in a narrow bed, rising steeply on either side from a deep rock-cut channel through which the water pours with a rapid current. Perhaps there is a remote allusion to the rocky channels of the Nile, and especially to its primeval bed wholly of bare rock, in that passage of Job where the plural of Yeor is used. "He uttereth out rivers (נַחַלִּים) among the rocks, and his eye seeth every precious thing. He bindeth the floods from overflowing" (xxviii. 10, 11). It

must be recollected that there are allusions to Egypt, and especially to its animals and products in this book, so that the Nile may well be here referred to, if the passage do not distinctly mention it. In Lower Egypt the chief differences are that the view is spread out in one rich plain, only bounded on the east and west by the desert, of which the edge is low and sandy, unlike the mountains above, though essentially the same, and that the two branches of the river are narrower than the undivided stream. On either bank, during Low Nile, extend fields of corn and barley, and near the river-side stretch long groves of palm-trees. The villages rise from the level plain, standing upon mounds, often ancient sites, and surrounded by palm groves, and yet higher dark-brown mounds mark where of old stood towns, with which often "their memorial is perished" (Ps. ix. 6). The villages are connected by dykes, along which pass the chief roads. During the inundation the whole valley and plain is covered with sheets of water, above which rise the villages like islands, only to be reached along the half-ruined dykes. The aspect of the country is as though it were overflowed by a destructive flood, while between its banks, here and there broken through and constantly giving way, rushes a vast turbid stream, against which no boat could make its way, excepting by tacking, were it not for the north wind that blows ceaselessly during the season of the inundation, making the river seem more powerful as it beats it into waves. The prophets more than once allude to this striking condition of the Nile. Jeremiah says of Pharaoh-Necho's army, "Who [is] this [that] cometh up as the Nile [Yeor], whose waters are moved as the rivers? Egypt riseth up like the Nile, and [his] waters are moved like the rivers; and he saith, I will go up, [and] will cover the land; I will destroy the city and the inhabitants thereof" (xli. 7, 8). Again, the prophecy "against the Philistines, before that Pharaoh smote Gaza," commences, "Thus saith the LORD; Behold, waters rise up out of the north, and shall be as an overflowing stream (*nachal*),<sup>a</sup> and shall overflow the land, and all that is therein; the city, and them that dwell therein" (xlvii. 1, 2). Amos, also, a prophet who especially refers to Egypt, uses the inundation of the Nile as a type of the utter desolation of his country. "The LORD hath sworn by the excellency of Jacob, Surely I will never forget any of their works. Shall not the land tremble for this, and every one mourn that dwelleth therein? and it shall rise up wholly as the Nile (נַחַל); and it shall be cast out and drowned, as [by] the Nile (בַּיַּרְדֵּן מִיְּמֵי יֶעֱרוֹ) of Egypt" (viii. 7, 8; see ix. 5).

The banks of the river are enlivened by the women who come down to draw water, and, like Pharaoh's daughter, to bathe, and the herds of kine and buffaloes which are driven down to drink and wash, or to graze on the grass of the swamps, like the good kine that Pharaoh saw in his dream as "he stood by the river," which were "coming up out of the river," and "fed in the meadow-grass" (Gen. xli. 1, 2).

The river itself abounds in fish, which anciently formed a chief means of sustenance to the inhabi-

<sup>a</sup> The use of "*nachal*" here affords a strong argument in favor of the opinion that it is applied to the Nile.

tants of the country. Perhaps, as has been acutely remarked in another article, Jacob, when blessing Ephraim and Manasseh, used for their multiplying the term  $\text{דגים}$  (Gen. xlviii. 16), which is connected with  $\text{דג}$ , a fish, though it does not seem certain which is the primitive: as though he had been struck by the abundance of fish in the Nile or the canals and pools fed by it. [MANASSEH, vol. ii. p. 1769 a.] The Israelites in the desert looked back with regret to the fish of Egypt: "We remember the fish, which we did eat in Egypt freely" (Num. xi. 5). In the Thebais crocodiles are found, and during Low Nile they may be seen basking in the sun upon the sandbanks. The crocodile is constantly spoken of in the Bible as the emblem of Pharaoh, especially in the prophecies of Ezekiel. [EGYPT, vol. i. p. 674 a.]

The great difference between the Nile of Egypt in the present day and in ancient times is caused by the failure of some of its branches, and the ceasing of some of its chief vegetable products; and the chief change in the aspect of the cultivable land, as dependent on the Nile, is the result of the ruin of the fish-pools and their conduits, and the consequent decline of the fisheries. The river was famous for its seven branches, and under the Roman dominion eleven were counted, of which, however, there were but seven principal ones. Herodotus notices that there were seven, of which he says that two, the present Damietta and Rosetta branches, were originally artificial, and he therefore speaks of "the five mouths" (ii. 10). Now, as for a long period past, there are no navigable and unobstructed branches but these two that Herodotus distinguishes as in origin works of man. This change was prophesied by Isaiah: "And the waters shall fail from the sea, and the river shall be wasted and dried up" (ix. 5). Perhaps the same prophet, in yet more precise words, predicts this, where he says, "And the LORD shall utterly destroy the tongue of the Egyptian sea; and with his mighty wind shall he shake his hand over the river, and shall smite it in the [or 'into'] seven streams, and make [men] go over dryshod ['in shoes']" (xi. 15). However, from the context, and a parallel passage in Zechariah (x. 10, 11), it seems probable that the Euphrates is intended in this passage by "the river." Ezekiel also prophesies of Egypt that the Lord would "make the rivers drought" (xxx. 12), here evidently referring to either the branches or canals of the Nile. In exact fulfillment of these prophecies the bed of the highest part of the Gulf of Suez has dried, and all the streams of the Nile, excepting those which Herodotus says were originally artificial, have wasted, so that they can be crossed without fording.

The monuments and the narratives of ancient writers show us in the Nile of Egypt in old times, a stream bordered by flags and reeds, the covert of a undant wild fowl, and bearing on its waters the fragrant flowers of the various colored lotus. Now, in Egypt, scarcely any reeds or water-plants — the famous papyrus being nearly if not quite extinct, and the lotus almost unknown — are to be seen, excepting in the marshes near the Mediterranean. This also was prophesied by Isaiah: "The papyrus-reeds ( $\text{פַּרְוִי} ?$ ) in the river ( $\text{יַרְדֵּן}$ ), on the edge of the river, and everything growing [lit. "sown"] in the river shall be dried up, driven away [by the wind], and [shall] not be" (ix. 7). When it

is recollected that the water-plants of Egypt were so abundant as to be a great source of revenue in the prophet's time, and much later, the exact fulfillment of his predictions is a valuable evidence of the truth of the old opinion as to "the sure word of prophecy." The failure of the fisheries is also foretold by Isaiah (xix. 8, 10), and although this was no doubt a natural result of the wasting of the river and streams, its cause could not have been anticipated by human wisdom. Having once been very productive, and a main source of revenue as well as of sustenance, the fisheries are now scarcely of any moment, excepting about Lake Menzalah, and in some few places elsewhere, chiefly in the north of Egypt.

Of old the great river must have shown a more fair and busy scene than now. Boats of many kinds were ever passing along it, by the painted walls of temples, and the gardens that extended around the light summer pavilions, from the pleasure-galley with one great square sail, white or with variegated pattern, and many oars, to the little papyrus skiff, dancing on the water, and carrying the seekers of pleasure where they could shoot with arrows, or knock down with the throw-stick, the wild-fowl that abounded among the reeds, or engage in the dangerous chase of the hippopotamus or the crocodile. In the Bible the papyrus-boats are mentioned; and they are shown to have been used for their swiftness to carry tidings to Ethiopia (Is. xviii. 2).

The great river is constantly before us in the history of Israel in Egypt. Into it the male children were cast; in it, or rather in some canal or pool, was the ark of Moses put, and found by Pharaoh's daughter when she went down to bathe. When the plagues were sent, the sacred river — a main support of the people — and its waters everywhere, were turned into blood. [PLAGUES OF EGYPT.]

The prophets not only tell us of the future of the Nile: they speak of it as it was in their days. Ezekiel likens Pharaoh to a crocodile, fearing no one in the midst of his river, yet dragged forth with the fish of his rivers, and left to perish in the wilderness (xxix. 1-5; comp. xxxiii. 1-6). Nahum thus speaks of the Nile, when he warns Nineveh by the ruin of Thebes: "Art thou better than No-Amon, that was situate among the rivers, [that had] the waters round about it, whose rampart [was] the sea, [and] her wall [was] from the sea?" (iii. 8). Here the river is spoken of as the rampart, and perhaps as the support of the capital, and the situation, most remarkable in Egypt, of the city on the two banks is indicated [NO-AMON]. But still more striking than this description is the use which we have already noticed of the inundation, as a figure of the Egyptian armies, and also of the coming of utter destruction, probably by an invading force.

In the New Testament there is no mention of the Nile. Tradition says that when Our Lord was brought into Egypt, his mother came to Heliopolis [On]. If so, He may have dwelt in his childhood by the side of the ancient river which witnessed so many events of sacred history, perhaps the coming of Abraham, certainly the rule of Joseph, and the long oppression and deliverance of Israel their posterity.

R. S. P.

\* The problem of the sources of the Nile has been solved by the explorations of Captain J. H. Speke in 1860-63, and of Sir Samuel W. Baker in 1861-64. Already in 1858 Speke had discovered

the *Victoria Nyanza*, a vast sheet of water 3,308 feet above the ocean, lying approximately between 31° 30' and 95° 30' E. long. and lat. 3° S. and the equator. This lake Speke explored only along its western border, from *Muanza*, its extreme southern point, to a corresponding point at the extreme north. Information derived from Arabs who had traversed the country to the east, between the lake and the mountain region of *Kilimanjaro* and *Kenia*, satisfied him that upon that side the *Nyanza* receives no tributaries of any importance, the country being hilly, with salt lakes and salt plains chiefly between the first and second degrees of south latitude, and having only occasional runnels and rivulets along the margin of the lake. This opinion, however, does not coincide with the impressions of the missionaries Krapf and Rebmann, who travelled extensively in the countries of *Usambaru*, *Jagga*, and *Ukambuni*, and heard of rivers running westward from Mount *Kenia*, although from the more southern peak of *Kilimanjaro* the waters flow to the east.

Dr. Krapf penetrated as far as *Kitui*, from which point he distinctly saw the horns of the *Kenia* Mountain, in lat. 2° S., lon. 36° E. He did not attempt to reach the mountain, but he learned from the natives that a river ran from *Kenia* toward the Nile, and also that there was a large salt lake to the northeast of the *Victoria Nyanza*. Upon the western side of the lake the only feeder of any importance is the *Kiangulé* River, a broad, deep stream, — about eighty yards wide at the point where Speke crossed it — that issues from the great "Moon mountain" *Mfunbiru*, and enters the lake at about the first degree of south latitude. Just north of the equator, between 33° and 34° E. long., the White Nile emerges from the *Victoria Nyanza* by the plunge of *Ripon Falls*, a cataract between four and five hundred feet in width, and about twelve feet deep. From *Ripon Falls* to *Urondogani* the river is clear but boisterous: thence to *Karuma* it presents the sluggish appearance of a large pond. Between the head of the lake and *Gondokoro* are three principal cataracts — to *Urondogani* a fall of 507 feet, to *Paira* a second fall of .072 feet, and the third to *Gondokoro*, of 561 feet. After following the course of the Nile from *Ripon Falls* to *Karuma Falls*, Captain Speke there crossed the river, and leaving it upon the west of him, continued his journey by land to *Gondokoro*, and so lost the opportunity of completing his great discovery.

At *Gondokoro* Speke met Baker, who was about starting for *Karuma Falls*, and communicated to him the results of his own explorations, together with a map of his route, and some valuable suggestions touching the westward bend of the Nile, and its probable connection with the *Little Luta Nzige*. Baker had already devoted much time to the exploration of the numerous tributaries of the White Nile. Of these one of the most important is the *Sobat*, coming from the southeast, which he estimated to be 120 yards wide and 25 feet deep. The *Bähr Gazal*, farther to the south, flows so sluggishly that it seems like dead water, and the whole region between *Khartum* and *Gondokoro* abounds in desolate and fever-smitten marshes. The main river now received his attention. Following the course of the stream from the point where Speke had abandoned it, he found that from *Karuma Falls* the Nile runs almost due west; that its whole volume is precipitated through a

granite gap fifty yards wide over a perpendicular fall of 120 feet. To this stupendous cataract the explorer gave the name *Murchison Falls*, in honor of the President of the Royal Geographical Society. After passing these falls, the river enters into a vast lake, the *Albert Nyanza*, which stretches over a distance of 260 geographical miles, — from 2° south lat. to nearly 3° north, and mainly between 29° and 31° E. long. Emerging from this lake near its northern extremity, the Nile pursues its course toward *Gondokoro*. The *Albert Nyanza* lies in a vast rock basin, about 1,500 feet below the general level, and receives the drainage of a region of ten-months' rain. In the volume of water and the area of drainage the *Albert Nyanza* is probably the principal source of the Nile; but the southern extremity of the *Victoria Nyanza* marks the greatest distance yet measured, and gives a total length of 2,300 miles.

While the substantial fruits of the discoveries of Speke and Baker, as given above, cannot be affected by any future exploration, it is necessary for a complete knowledge of the sources of the Nile, that the *Victoria Nyanza* shall be circumnavigated, and the country to the east of it scientifically explored; and also, that the *Albert Nyanza* be followed up to its head, and explored for tributaries along its western shore. J. P. T.

NIM'RAH (נִמְרָה) [*panther*]: [Rom. *Namra*; Vat. *Ναμβρα*; Alex. *Αμβραμ*: *Nemra*, a place mentioned, by this name, in Num. xxxii. 3 only, among those which formed the districts of the "land of Jazer and the land of Gilead," on the east of Jordan, petitioned for by Reuben and Gad. It would appear from this passage to have been near Jazer and Heshbon, and therefore on the upper level of the country. If it is the same as BETH-NIMRAH (ver. 36), it belonged to the tribe of Gad. By Eusebius, however (*Onomast.* Νεβρά), it is cited as a "city of Reuben in Gilead," and said to have been in his day a very large place (κώμη μεγίστη) in Batanæa, bearing the name of Abara. This account is full of difficulties, for Reuben never possessed the country of Gilead, and Batanæa was situated several days' journey to the N. W. of the district of Heshbon, beyond not only the territory of Reuben, but even that of Gad. A wady and a town, both called *Nimreh*, have, however, been met with in *Betheniyeh*, east of the *Lejah*, and five miles N. W. of *Kawwat* (see the maps of Porter, Van de Velde, and Wetzstein). On the other hand the name of *Nimriu* is said to be attached to a watercourse and a site of ruins in the Jordan Valley, a couple of miles east of the river, at the embouchure of the *Wady Shoub*. [BETH-NIMRAH.] But this again is too far from Heshbon in the other direction.

The name *Nimr* ("panther"), appears to be a common one on the east of Jordan, and it must be left to future explorers (when exploration in that region becomes possible) to ascertain which (if either) of the places so named is the *Nimrah* in question. G.

NIMRIM, THE WATERS OF (נִמְרִים) in Is. τδ ἕδωρ τῆς Νεμρηίμ, [Sin. τῆς Νεβρίμ,] Alex. τῆς Νεμρεμ; in Jer. τδ ἕδωρ Νεβρίν, Alex. Νεβρεμ: *Aque Nearim*), a stream.

a The present Greek text has Καταναα; but the correction is obvious.

brook (not improbably a stream with pools) within the country of Moab, which is mentioned in the denunciations of that nation uttered, or quoted, by Isaiah (xv. 6) and Jeremiah (xlviii. 34). From the former of these passages it appears to have been famed for the abundance of its grass.

If the view taken of these denunciations under the head of MOAB (pp. 1984, 1985) be correct, we should look for the site of Nimrim in Moab proper, i. e. on the southeastern shoulder of the Dead Sea, a position which agrees well with the mention of the "brook of the willows" (perhaps *Wady Beni Hammed*) and the "borders of Moab," that is, the range of hills encircling Moab at the lower part of the territory.

A name resembling Nimrim still exists at the southeastern end of the Dead Sea, in the *Wady en-Nemeirah* and *Burj en-Nemeirah*, which are situated on the beach, about half-way between the southern extremity and the promontory of *el-Lissim* (De Sauley, *Voyage*, i. 284, &c.; Seetzen, ii. 354). Eusebius (*Onom. Νεκρυμῖ*) places it N. of Soora, i. e. Zoar. How far the situation of *en-Nemeirah* corresponds with the statement of Eusebius cannot be known until that of Zoar is ascertained. If the *Wady en-Nemeirah* really occupies the place of the waters of Nimrim, Zoar must have been considerably further south than is usually supposed. On the other hand the name <sup>a</sup> is a common one in the transjordanic localities, and other instances of its occurrence may yet be discovered more in accordance with the ancient statements. G.

**NIM'ROD** (נִמְרוֹד) [*firm, strong*, Dietr.: *a hero*, Fürst]: Νεβρωδ, [in 1 Chr., Comp. Νευρωδ: *Nemrod*], a son of Cush and grandson of Ham. The events of his life are recorded in a passage (Gen. x. 8 ff.) which, from the conciseness of its language, is involved in considerable uncertainty. We may notice, in the first place, the terms in ver. 8, 9, rendered in the A. V., "mighty" and "mighty hunter before the Lord." The idea of any moral qualities being conveyed by these expressions may be at once rejected; for, on the one hand, the words "before the Lord" are a mere superlative adjunct (as in the parallel expression in Jon. iii. 3), and contain no notion of Divine approval; and, on the other hand, the ideas of violence and insolence with which tradition invested the character of the hero, as delineated by Josephus <sup>b</sup> (*Ant.* i. 4, § 2), are not necessarily involved in the Hebrew words,

though the term *gibbor* <sup>c</sup> is occasionally taken in a bad sense (e. g. Ps. li. 1). The term may be regarded as betokening personal prowess with the accessory notion of gigantic stature (as in the LXX. γίγας). It is somewhat doubtful whether the prowess of Nimrod rested on his achievements as a hunter or as a conqueror. The literal rendering of the Hebrew words would undoubtedly apply to the former, but they may be regarded as a translation of a proverbial expression originally current in the land of Nimrod, where the terms significant of "hunter" and "hunting" appear to have been applied to the forays of the sovereigns against the surrounding nations.<sup>d</sup> The two phases of prowess, hunting and conquering, may indeed well have been combined in the same person in a rude age, and the Assyrian monuments abound with scenes which exhibit the skill of the sovereigns in the chase. But the context certainly favors the special application of the term to the case of conquest, for otherwise the assertion in ver. 8, "he began to be a mighty one in the earth," is devoid of point — while, taken as introductory to what follows, it seems to indicate Nimrod as the first who, after the flood, established a powerful empire on the earth, the limits of which are afterwards defined. The next point to be noticed is the expression in ver. 10, "The beginning of his kingdom," taken in connection with the commencement of ver. 11, which admits of the double sense: "Out of that land went forth Asshur," as in the text of the A. V., and "out of that land he went forth to Assyria," as in the margin. These two passages mutually react on each other: for if the words "beginning of his kingdom" mean, as we believe to be the case, "his first kingdom," or, as Gesenius (*Theo.* p. 1252) renders it "the territory of which it was at first composed," then the expression implies a subsequent extension of his kingdom, in other words, that "he went forth to Assyria." If, however, the sense of ver. 11 be, "out of that land went forth Asshur," then no other sense can be given to ver. 10 than that "the capital of his kingdom was Babylon," though the expression must be equally applied to the towns subsequently mentioned. This rendering appears untenable in all respects, and the expression may therefore be cited in support of the marginal rendering of ver. 11. With regard to the latter passage, either sense is permissible in point of grammatical construction for the omission of the local affix to the word As-

<sup>a</sup> A racy and characteristic passage, aimed at the *doctrina hereticorum*, and playing on the name as signifying a leopard, will be found in Jerome's Commentary on Is. xv. 6.

<sup>b</sup> The view of Nimrod's character taken by this writer originated partly perhaps in a false etymology of the name, as though it were connected with the Hebrew root *mārad* (מָרַד), "to rebel," and partly from the supposed connection of the hero's history with the building of the tower of Babel. There is no ground for the first of these assumptions: the name is either Cushite or Assyrian. Nor, again, does the Bible connect Nimrod with the building of the tower; for it only states that Babel formed one of his capitals. Indications have, indeed, been noticed by Bunsen (*Bibelwerk*, v. 74) of a connection between the two narratives; they have undoubtedly a common Jewish character; but the point on which he lays most stress (the expression in i. 2, "from the east," or "eastward") is in reality worthless for the purpose. The influence of the view taken by Josephus is curiously developed

in the identification of Nimrod with the constellation Orion, the Hebrew name *cesil* (צֵסִיל), "foolish," being regarded as synonymous with Nimrod, and the giant form of Orion, together with its Arabic name, "the giant," supplying another connecting link. Josephus follows the LXX. in his form of the name, Νεβρωδης. The variation in the LXX. is of no real importance, as it may be paralleled by a similar exchange of β for μ in the case of Σεβλᾶ (1 Chr. i. 47), and, in a measure, by the insertion of the β before the liquids in other cases, such as Μαμβρη (Gen. xiv. 12). The variation hardly deserves the attention it has received in Rawlinson's *Herod.* i. 596.

<sup>c</sup> נִבְרָ.

<sup>d</sup> A English-pleaser I. for instance, is described as he that pursues after" or "hunts the people of Bili-Nipru." So also of other kings (Rawlinson's *Herod.* i. 597)

shur, which forms the chief objection to the marginal rendering, is not peculiar to this passage (comp. 1 K. xi. 17; 2 K. xv. 14), nor is it necessary even to assume a *prolepsis* in the application of the term Asshur to the land of Assyria at the time of Nimrod's invasion, inasmuch as the historical date of this event may be considerably later than the genealogical statement would imply. Authorities both ancient and modern are divided on the subject, but the most weighty names of modern times support the marginal rendering, as it seems best to accord with historical truth. The unity of the passage is moreover supported by its peculiarities both of style and matter. It does not seem to have formed part of the original genealogical statement, but to be an interpolation of a later date; <sup>a</sup> it is the only instance in which personal characteristics are attributed to any of the names mentioned; the proverbial expression which it embodies bespeaks its traditional and fragmentary character, as there is nothing to connect the passage either with what precedes or with what follows it. Such a fragmentary record, though natural in reference to a single mighty hero, would hardly admit of the introduction of references to others. The only subsequent notice of the name Nimrod occurs in Mic. v. 6, where the "land of Nimrod" is a synonym either for Assyria, just before mentioned, or for Babylonia.

The chief events in the life of Nimrod, then, are (1) that he was a Cushite; (2) that he established an empire in Shinar (the classical Babylonia), the chief towns being Babel, Erech, Accad, and Calneh; and (3) that he extended this empire northwards along the course of the Tigris over Assyria, where he founded a second group of capitals, Nineveh, Rehoboth, Calah, and Resen. These events correspond to and may be held to represent the salient historical facts connected with the earliest stages of the great Babylonian empire. 1. In the first place, there is abundant evidence that the race that first held sway in the lower Babylonian plain was of Cushite or Hamitic extraction. Tradition assigned to Belus, the mythical founder of Babylon, an Egyptian origin, inasmuch as it described him as the son of Poseidon and Libya (Diod. Sicul. i. 28; Apollodor. ii. 1, § 4; Pausan. iv. 23, § 5); the astrological system of Babylon (Diod. Sicul. i. 81) and perhaps its religious rites (Hestæus<sup>b</sup> ap. Joseph. *Ant.* i. 4, § 3) were referred to the same quarter; and the legend of Oannes, the great teacher of Babylon, rising out of the Erythraean sea, preserved by Syncellus (*Chronogr.* p. 28), points in the same direction. The name Cush itself was preserved in Babylonia and the adjacent countries under the forms of Cossæi, Cissia, Cut-hah, and Susiana or *Chuzistan*. The earliest written language of Babylonia, as known to us from existing inscriptions, bears a strong resemblance to that of Egypt and Ethiopia, and the same words have been found in each country, as in the case of *Mirikh*, the Merœ of Ethiopia, the Mars of Babylonia (Rawlinson, i. 442). Even the name

Nimrod appears in the list of the Egyptian kings of the 22d dynasty, but there are reasons for thinking that dynasty to have been of Assyrian extraction. Putting the above-mentioned considerations together, they leave no doubt as to the connection between the ancient Babylonians and the Ethiopian or Egyptian stock (respectively the Nimrod and the Cush of the Mosaic table). More than this cannot be fairly inferred from the data, and we must therefore withhold our assent from Bunsen's view (*Babelwerk*, v. 69) that the Cushite origin of Nimrod betokens the westward progress of the Scythian or Turanian races from the countries eastward of Babylonia; for, though branches of the Cushite family (such as the Cossæi) had pressed forward to the east of the Tigris, and though the early language of Babylonia bears in its structure a Scythic or Turanian character, yet both these features are susceptible of explanation in connection with the original eastward progress of the Cushite race.

2. In the second place, the earliest seat of empire was in the south part of the Babylonian plain. The large mounds, which for a vast number of centuries have covered the ruins of ancient cities, have already yielded some evidences of the dates and names of their founders, and we can assign the highest antiquity to the towns represented by the mounds of *Niffer* (perhaps the early Babel, though also identified with Calneh), *Warka* (the Biblical Erech), *Mugheir* (Ur), and *Senkerah* (Ellasar), while the name of Accad is preserved in the title *Kinzi Akkad*, by which the founder or embellisher of those towns was distinguished (Rawlinson, i. 435). The date of their foundation may be placed at about B. C. 2200. We may remark the coincidence between the quadruple groups of capitals noticed in the Bible, and the title *Kiprat* or *Kiprat-arba*, assumed by the early kings of Babylon and supposed to mean "four races" (Rawlinson, i. 428, 447).

3. In the third place, the Babylonian empire extended its sway northwards along the course of the Tigris at a period long anterior to the rise of the Assyrian empire in the 13th century B. C. We have indications of this extension as early as about 1860 when Shamas-Iva, the son of Ismi-dagon king of Babylon, founded a Temple at *Kileshergat* (supposed to be the ancient Asshur). The existence of Nineveh itself can be traced up by the aid of Egyptian monuments to about the middle of the 15th century B. C., and though the historical name of its founder is lost to us, yet tradition mentions a Belus as king of Nineveh at a period anterior to that assigned to Ninus (Layard's *Nineveh*, ii. 231), thus rendering it probable that the dynasty represented by the latter name was preceded by one of Babylonian origin.

Our present information does not permit us to identify Nimrod with any personage known to us either from inscriptions or from classical writers. Ninus and Belus are representative titles rather

<sup>a</sup> The expressions **בְּנֵי חָוִל**, and still more the use of the term **חָוִל**, are regarded as indications of a Jehovistic original, while the genealogy itself is Elohistie. It should be further noticed that there is nothing to mark the connection or distinction between Nimrod and the other sons of Cush.

<sup>b</sup> The passage quoted by Josephus is of so frag-

mentary a character, that its original purport can hardly be guessed. He adduces it apparently to illustrate the name Shinar, but the context favors the supposition that the writer referred to the period subsequent to the flood, in which case we may infer the belief (1) that the population of Babylonia was not autochthonous, but immigrant; (2) that the point from which it immigrated was from the west, Belus being identified with Zeus Enyalios.

han personal names, and are but equivalent terms for "the lord," who was regarded as the founder of the empires of Nineveh and Babylon. We have no reason on this account to doubt the personal existence<sup>a</sup> of Nimrod, for the events with which he is connected fall within the shadows of a remote antiquity. But we may, nevertheless, consistently with this belief, assume that a large portion of the interest with which he was invested was the mere reflection of the sentiments with which the nations of western Asia looked back on the overshadowing greatness of the ancient Babylonian empire, the very monuments of which seemed to tell of days when "there were giants in the earth." The feeling which suggested the coloring of Nimrod as a representative hero still finds place in the land of his achievements, and to him the modern Arabs<sup>b</sup> ascribe all the great works of ancient times, such as the *Birs-Nimrūd* near Babylon, *Tel Nimrūd* near *Baghdād*, the dam of *Suḥr el-Nimrūd* across the Tigris below *Mosul*, and the well-known mound of *Nimrūd* in the same neighborhood.

**NIM'SHI** (נִמְשִׁי) [*drawn out, saved*, Ges.]: *Ναμῆσι*; [Vat. *Ναμῆσει, Ναμῆσει, Ναμῆσειου*; Alex. *Αμῆσει, Ναμῆσει, Ναμῆσιου*; in 2 Chr *Ναμῆσει*, [Alex. *Ναμῆσει*:] *Nimshi*]. The grandfather of Jehu, who is generally called "the son of Nimshi" (1 K. xix. 16; 2 K. ix. 2, 14, 20; 2 Chr. xxii. 7).

\* **NINEVE** [3 syl.] (Apocr. *Νινεῦν, Ninive*; N. T. *Νινεῦν*, Rec. Text, but Lachm. Treg. *Νινεῦν-ραι*, Tisch. 8th ed. -*εῖραι*: *Ninivite*), only Luke xi. 32 in the N. T., but repeatedly in the O. T. Apocrypha (Tob. i. 3, 10, 17, &c.). It is the Greek form, instead of the Hebrew employed elsewhere [NINEVEH]. See Wahl's *Clavis Libr. Vet. Test. Apocr.* s. v.

H.

**NINEVEH** (נִינְוֵה) [see below]: [*Νινεῦν*, in Gen., Rom.] *Ninevū*: *Ninive*], the capital of the ancient kingdom and empire of Assyria; a city of great power, size, and renown, usually included amongst the most ancient cities of the world of which there is any historic record. The name appears to be compounded from that of an Assyrian deity, "Nin," corresponding, it is conjectured, with the Greek Hercules, and occurring in the names of several Assyrian kings, as in "Ninus," the mythic founder, according to Greek tradition, of the city. In the Assyrian inscriptions Nineveh is also supposed to be called "the city of Bel."

Nineveh is first mentioned in the O. T. in connection with the primitive dispersment and migrations of the human race. Asshur, or, according to

the marginal reading, which is generally preferred, Nimrod, is there described (Gen. x. 11) as extending his kingdom from the land of Shinar, or Babylonia, in the south, to Assyria in the north and founding four cities, of which the most famous was Nineveh. Hence Assyria was subsequently known to the Jews as "the land of Nimrod" (cf. Mic. v. 6), and was believed to have been first peopled by a colony from Babylon. The kingdom of Assyria and of the Assyrians is referred to in the O. T. as connected with the Jews at a very early period; as in Num. xxiv. 22, 24, and Ps. lxxxiii. 8: but after the notice of the foundation of Nineveh in Genesis no further mention is made of the city until the time of the book of Jonah, or the 8th century B. C., supposing we accept the earliest date for that narrative [JONAH], which, however, according to some critics, must be brought down 300 years later, or to the 5th century B. C. In this book neither Assyria nor the Assyrians are mentioned, the king to whom the prophet was sent being termed the "king of Nineveh," and his subjects "the people of Nineveh." Assyria is first called a kingdom in the time of Menahem, about B. C. 770. Nahum (? B. C. 645) directs his prophecies against Nineveh; only once against the king of Assyria, ch. iii. 18. In 2 Kings (xix. 36) and Isaiah (xxxvii. 37) the city is first distinctly mentioned as the residence of the monarch. Sennacherib was slain there when worshipping in the temple of Nisroch his god. In 2 Chronicles (xxxiii. 21), where the same event is described, the name of the place where it occurred is omitted. Zephaniah, about B. C. 630, couples the capital and the kingdom together (ii. 13); and this is the last mention of Nineveh as an *existing* city. He probably lived to witness its destruction, an event impending at the time of his prophecies. Although Assyria and the Assyrians are alluded to by Ezekiel and Jeremiah, by the former as a nation in whose miserable ruin prophecy had been fulfilled (xxxi.), yet they do not refer by name to the capital. Jeremiah, when enumerating "all the kingdoms of the world which are upon the face of the earth" (ch. xxv.), omits all mention of the nation and the city. Habakkuk only speaks of the Chaldeans, which may lead to the inference that the date of his prophecies is somewhat later than that usually assigned to them. [HABAKKUK.] From a comparison of these data, it has been generally assumed that the destruction of Nineveh and the extinction of the empire took place between the time of Zephaniah and that of Ezekiel and Jeremiah. The exact period of these events has consequently been fixed, with a certain amount of concurrent evidence derived from classical history, at B. C. 606 (Clinton, *Fasti Hellen.* i. 269). It has been shown that it

<sup>a</sup> We must notice, without however adopting, the views lately propounded by M. D. Chwolson in his pamphlet, *Ueber die Ueberreste der althabylonischen Literatur*. He has discovered the name Nemrod or Nemroda in the manuscript works of an Arabian writer named Ibn-Wa'hschijjah, who professes to give translation of certain original literary works in the abathæan language, one of which, "on Nabathæan agriculture," is in part assigned by him to a writer named Qut'ami. This Qut'ami incidentally mentions that he lived in Babylon under a dynasty of Canaanites, which had been founded by a priest named Nemrod. M. Chwolson assigns Ibn-Wa'hschijjah to the end of the 9th century of our new era, and Qut'ami to the early part of the 13th century B. C. He regards

the term Nabathæan as meaning old Babylonian, and the works of Qut'ami as the remains of a Babylonian literature. He further identifies the Canaanite dynasty with the fifth or Arabian dynasty of Berossus, and adduces the legend of Cepheus, the king of Joppa, who reigned from the Mediterranean to the Erythraean sea, in confirmation of such a Canaanite invasion. It would be beyond our province to discuss the various questions raised by this curious discovery. The result, if established, would be to bring the date of Nimrod down to about B. C. 1500.

<sup>b</sup> The Arabs retain Josephus' view of the impiety of Nimrod, and have a collection of legends respecting his idolatry his enmity against Abraham: see (Jayard's *Nineve*, i. 24, note).

may have occurred 20 years earlier. [ASSYRIA.] The city was then laid waste, its monuments destroyed, and its inhabitants scattered or carried away into captivity. It never rose again from its ruins. This total disappearance of Nineveh is fully confirmed by the records of profane history. There is no mention of it in the Persian cuneiform inscriptions of the Achaemenid dynasty. Herodotus (i. 193) speaks of the Tigris as "the river upon which the town of Nineveh formerly stood." He must have passed, in his journey to Babylon, very near the site of the city — perhaps actually over it. So accurate a recorder of what he saw would scarcely have omitted to mention, if not to describe, any ruins of importance that might have existed there. Not two centuries had then elapsed since the fall of the city. Equally conclusive proof of its condition is afforded by Xenophon, who with the ten thousand Greeks encamped during his retreat on, or very near, its site (B. C. 401). The very name had then been forgotten, or at least he does not appear to have been acquainted with it, for he calls one group of ruins "Larissa," and merely states that a second group was near the deserted town of Mespila (*Anab.* b. iii. 4, § 7). The ruins, as he describes them, correspond in many respects with those which exist at the present day, except that he assigns to the walls near Mespila a circuit of six parasangs, or nearly three times their actual dimensions. Ctesias placed the city on the Euphrates (*Frag.* i. 2), a proof either of his ignorance or of the entire disappearance of the place. He appears to have led Diodorus Siculus into the same error (ii. 27, 28).<sup>a</sup> The historians of Alexander, with the exception of Arrian (*Ind.* pp. 42, 43), do not even allude to the city, over the ruins of which the conqueror must have actually marched. His great victory of Arbela was won almost in sight of them. It is evident that the later Greek and Roman writers, such as Strabo, Ptolemy, and Pliny, could only have derived any independent knowledge they possessed of Nineveh from traditions of no authority. They concur, however, in placing it on the eastern bank of the Tigris. During the Roman period, a small castle or fortified town appears to have stood on some part of the site of the ancient city. It was probably built by the Persians (Ammian. Marcell. xxiii. 22); and subsequently occupied by the Romans, and erected by the Emperor Claudius into a colony. It appears to have borne the ancient traditional name of Nineve, as well as its corrupted form of Ninus and Ninus, and also at one time that of Hierapolis. Tacitus (*Ann.* xii. 13), mentioning its capture by Meherdates, calls it "Ninos;" on coins of Trajan it is "Ninus;" on those of Maximianus "Niniva," in both instances the epithet Claudiopolis being added. Many Roman remains, such as sepulchral vases, bronze and other ornaments, sculptured figures in marble, terra-cottas, and coins, have been discovered in the rubbish covering the Assyrian ruins; besides wells and tombs, constructed long after the destruction of the Assyrian edifices. The Roman settlement appears to have been in its turn abandoned, for there is no mention of it when Heraclius gained the great victory over the Persians in the battle of Nineveh, fought on the very

site of the ancient city, A. D. 627. After the Arab conquest, a fort on the east bank of the Tigris bore the name of "Ninawi" (Rawlinson, *As. Soc. Journal*, vol. xii. p. 418). Benjamin of Tudela, in the 12th century, mentions the site of Nineveh as occupied by numerous inhabited villages and small townships (ed. Asher, i. 91). The name remained attached to the ruins during the Middle Ages; and from them a bishop of the Chaldaean Church derived his title (Assemani, iv. 459); but it is doubtful whether any town or fort was so called. Early English travellers merely allude to the site (Purchas, ii. 1387). Niebuhr is the first modern traveller who speaks of "Nuniyah" as a village standing on one of the ruins which he describes as "a considerable hill" (ii. 353). This may be a corruption of "Nebbi Yunus," the Prophet Jonah, a name still given to a village containing his apocryphal tomb. Mr. Rich, who surveyed the site in 1820, does not mention Nuniyah, and no such place now exists. Tribes of Turcomans and sedentary Arabs, and Chaldaean and Syrian Christians, dwell in small mud-built villages, and cultivate the soil in the country around the ruins; and occasionally a tribe of wandering Kurds, or of Bedouins driven by hunger from the desert, will pitch their tents amongst them. After the Arab conquest of the west of Asia, Mosul, at one time the flourishing capital of an independent kingdom, rose on the opposite or western bank of the Tigris. Some similarity in the names has suggested its identification with the Mespila of Xenophon; but its first actual mention only occurs after the Arab conquest A. D. 16, and A. D. 637). It was sometimes known as Athur, and was united with Nineveh as an Episcopal see of the Chaldaean Church (Assemani, iii. 269). It has lost all its ancient prosperity, and the greater part of the town is now in ruins.

Traditions of the unrivaled size and magnificence of Nineveh were equally familiar to the Greek and Roman writers, and to the Arab geographers. But the city had fallen so completely into decay before the period of authentic history, that no description of it, or even of any of its monuments, is to be found in any ancient author of trust. Diodorus Siculus asserts (ii. 3) that the city formed a quadrangle of 150 stadia by 90, or altogether of 480 stadia (no less than 60 miles), and was surrounded by walls 100 feet high, broad enough for three chariots to drive abreast upon them, and defended by 1,500 towers, each 200 feet in height. According to Strabo (xvi. 737) it was larger than Babylon, which was 385 stadia in circuit. In the O. T. we find only vague allusions to the splendor and wealth of the city, and the very indefinite statement in the book of Jonah that it was "an exceeding great city," or "a great city to God," or "for God" (i. e. in the sight of God), "of three days' journey;" and that it contained "six score thousand persons who could not discern between their right hand and their left hand, and also much cattle" (iv. 11). It is obvious that the accounts of Diodorus are for the most part absurd exaggerations, founded upon fabulous traditions, for which existing remains afford no warrant. It may, however, be remarked that the dimensions he assigns to the area of the city would correspond to the three days' journey of Jonah — the Jewish day's journey being 20 miles — if that expression be applied to the circuit of the walls. "Persons not discerning between their right hand and their left" may either allude

<sup>a</sup> In a fragment from Ctesias, preserved by Nicomachus Damascenus, the city is restored to its true site. Müller, *Frag. Hist. Græc.* iii. 358.)

to children, or to the ignorance of the whole population. If the first be intended, the number of inhabitants, according to the usual calculation, would have amounted to about 600,000. But such expressions are probably mere eastern figures of speech to denote vastness, and far too vague to admit of exact interpretation.

The political history of Nineveh is that of Assyria, of which a sketch has already been given. [ASSYRIA.] It has been observed that the territory included within the boundaries of the kingdom of Assyria proper was comparatively limited in extent, and that almost within the immediate neighborhood of the capital petty kings appear to have ruled over semi-independent states, owing allegiance and paying tribute to the great Lord of the Empire, "the King of Kings," according to his oriental title, who dwelt at Nineveh. (Cf. Is. x. 8: "Are not my princes altogether kings?") These petty kings were in a constant state of rebellion, which usually shewed itself by their refusal to pay the apportioned tribute — the principal link between the sovereign and the dependent states — and repeated expeditions were undertaken against them to enforce this act of obedience. (Cf. 2 K. xvi. 7, xvii. 4, where it is stated that the war made by the Assyrians upon the Jews was for the purpose of enforcing the payment of tribute.) There was, consequently, no bond of sympathy arising out of common interests between the various populations which made up the empire. Its political condition was essentially weak. When an independent monarch was sufficiently powerful to carry on a successful war against the great king, or a dependent prince sufficiently strong to throw off his allegiance, the empire soon came to an end. The fall of the capital was the signal for universal disruption. Each petty state asserted its independence, until reconquered by some warlike chief who could found a new dynasty and a new empire to replace those which had fallen. Thus on the borders of the great rivers of Mesopotamia arose in turn the first Babylonian, the Assyrian, the Median, the second Babylonian, the Persian, and the Seleucid empires. The capital was however invariably changed, and generally transferred to the principal seat of the conquering race. In the East men have rarely rebuilt great cities which have once fallen into decay — never perhaps on exactly the same site. If the position of the old capital was deemed, from political or commercial reasons, more advantageous than any other, the population was settled in its neighborhood, as at Delhi, and not amidst its ruins. But Nineveh, having fallen with the empire, never rose again. It was abandoned at once, and suffered to perish utterly. It is probable that, in conformity with an eastern custom, of which we find such remarkable illustrations in the history of the Jews, the entire population was removed by the conquerors, and settled as colonists in some distant province.

*The Ruins.* — Previous to recent excavations and researches, the ruins which occupied the presumed site of Nineveh seemed to consist of mere shapeless heaps or mounds of earth and rubbish. Unlike the vast masses of brick masonry which mark the site of Babylon, they showed externally no signs of artificial construction, except perhaps here and there the traces of a rude wall of sun-dried bricks. Some of these mounds were of enormous dimensions — looking in the distance rather like natural elevations than the work of men's

hands. Upon and around them, however, were scattered innumerable fragments of pottery — the unerring evidence of former habitations. Some had been chosen by the scattered population of the land as sites for villages, or for small mud-built forts, the mound itself affording means of refuge and defense against the marauding parties of Bedouins and Kurds which for generations have swept over the face of the country. The summits of others were sown with corn or barley. During the spring months they were covered with grass and flowers, bred by the winter rains. The Arabs call these mounds "Tel," the Turcomans and Turks "Teppeh," both words being equally applied to natural hills and elevations, and the first having been used in the same double sense by the most

ancient Semitic races (cf. Hebrew תל, "a hill," "a mound," a heap of rubbish," Ez. iii. 15; Ezr. ii. 59; Neh. vii. 61; 2 K. xix. 12). They are found in vast numbers throughout the whole region watered by the Tigris and Euphrates and their confluents, from the Taurus to the Persian Gulf. They are seen, but are less numerous, in Syria, parts of Asia Minor, and in the plains of Armenia. Wherever they have been examined they appear to have furnished remains which identify the period of their construction with that of the alternate supremacy of the Assyrian, Babylonian, and Persian empires. They differ greatly in form, size, and height. Some are mere conical heaps, varying from 50 to 150 feet high; others have a broad, flat summit, and very precipitous cliff-like sides, furrowed by deep ravines worn by the winter rains. Such mounds are especially numerous in the region to the east of the Tigris, in which Nineveh stood, and some of them must mark the ruins of the Assyrian capital. There is no edifice mentioned by ancient authors as forming part of the city, which we are required, as in the case of Babylon, to identify with any existing remains, except the tomb, according to some, of Ninus, according to others of Sardanapalus, which is recorded to have stood at the entrance of Nineveh (Diod. Sic. ii. 7; Amynt. *Frag.* ed. Müller, p. 136). The only difficulty is to determine which ruins are to be comprised within the actual limits of the ancient city. The northern extremity of the principal collection of mounds on the eastern bank of the Tigris may be fixed at Shereef Khan, and the southern at Nimroud, about  $6\frac{1}{2}$  miles from the junction of that river with the great Zab, the ancient Lycus. Eastward they extend to Khorsabad, about 10 miles N. by E. of Shereef Khan, and to Karamless, about 15 miles N. E. of Nimroud. Within the area of this irregular quadrangle are to be found, in every direction, traces of ancient edifices and of former population. It comprises various separate and distinct groups of ruins, four of which, if not more, are the remains of fortified inclosures or strongholds, defended by walls and ditches, towers and ramparts. The principal are — 1, the group immediately opposite Mosul, including the great mounds of Kouyunjik (also called by the Arabs, Armousheeyah) and Nebbi Yunus; 2, that near the junction of the Tigris and Zab, comprising the mounds of Nimroud and Athur; 3, Khorsabad, about 10 miles to the east of the former river; 4, Shereef Khan, about  $5\frac{1}{2}$  miles to the north of Kouyunjik; and 5, Selamiyah, 3 miles to the north of Nimroud. Other large mounds are Baaskeikah, and Karamless, where the remains of fortified inclosures may perhaps be traced

Bazani, Yarnujeh, and Bellawat. It is scarcely necessary to observe that all these names are comparatively modern, dating from after the Moham-medan conquest. The respective position of these ruins will be seen in the accompanying map. We will describe the most important.

The ruins opposite Mosul consist of a continuous line of mounds, resembling a vast embankment of earth, but marking the remains of a wall, the western face of which is interrupted by the two great mounds of Kouyunjik and Nebbi Yunus (p. 2161). To the east of this in-

Plan of Ruins which comprise ancient Nineveh.

closure are the remains of an extensive line of defenses, consisting of moats and ramparts. The inner wall forms an irregular quadrangle with very unequal sides — the northern being 2,333 yards, the western, or the river-face, 4,333, the eastern (where

the wall is almost the segment of a circle, 5,300 yards, and the southern but little more than 1,000; altogether 13,200 yards, or 7 English miles 4 fur-longs. The present height of this earthen wall is between 40 and 50 feet. Here and there a mound

more lofty than the rest covers the remains of a tower or a gateway. The walls appear to have been originally faced, at least to a certain height, with stone masonry, some remains of which have been discovered. The mound of Kouyunjik is of irregular form, being nearly square at the S. W. corner, and ending almost in a point at the N. E. It is about 1,300 yards in length, by 500 in its greatest width; its greatest height is 96 feet, and its sides are precipitous, with occasional deep ravines or watercourses. The summit is nearly flat, but

falls from the W. to the E. A small village formerly stood upon it, but has of late years been abandoned. The Khosr, a narrow but deep and sluggish stream, sweeps round the southern side of the mound on its way to join the Tigris. Anciently dividing itself into two branches, it completely surrounded Kouyunjik. Nebbi Yunus is considerably smaller than Kouyunjik, being about 530 yards by 430, and occupying an area of about 40 acres. In height it is about the same. It is divided into two nearly equal parts by a depression in the surface. Upon it is a Turcoman village containing the apocryphal tomb of Jonah, and a burial-ground held in great sanctity by Mohammedans from its vicinity to this sacred edifice. Remains of entrances or gateways have been discovered in the N. and E. walls (b). The Tigris formerly ran beneath the W. wall, and at the foot of the two great mounds. It is now about a mile distant from them, but during very high spring floods it sometimes reaches its ancient bed. The W. face of

the inclosure (a) was thus protected by the river. The N. and S. faces (b and d) were strengthened by deep and broad moats. The E. (c) being most accessible to an enemy, was most strongly fortified, and presents the remains of a very elaborate system of defenses. The Khosr, before entering the inclosure, which it divides into two nearly equal

parts, ran for some distance almost parallel to it (f), and supplied the place of an artificial ditch for about half the length of the E. wall. The remainder of the wall was protected by two wide moats (h), fed by the stream, the supply of water being regulated by dams, of which traces still exist. In addition, one or more ramparts of earth were thrown up, and a moat excavated between the inner walls and the Khosr, the eastern bank of which was very considerably raised by artificial means. Below, or to the S. of the stream, a third ditch

Plan of Kouyunjik and Nebbi Yunus.

excavated in the compact conglomerate rock, and about 200 feet broad, extended almost the whole length of the E. face, joining the moat on the S. An enormous outer rampart of earth, still in some places above 80 feet in height (i), completed the defenses on this side. A few mounds outside this rampart probably mark the site of detached towers

The great mound of Nimroud.

or fortified posts. This elaborate system of fortifications was singularly well devised to resist the attacks of an enemy. It is remarkable that within the inclosure, with the exception of Kouyunjik and Nebbi Yunus, no mounds or irregularities in the surface of the soil denote ruins of any size. The

ground is, however, strewn in every direction with fragments of brick, pottery, and the usual signs of ancient population.

Nimroud consists of a similar inclosure of consecutive mounds — the remains of ancient walls. The system of defenses is however very inferior in

importance and completeness to that of Kouyunjik. The indications of towers occur at regular intervals; 108 may still be traced on the N. and E. sides. The area forms an irregular square, about 2,331 yards by 2,095, containing about 1,000 acres. The N. and E. sides were defended by moats, the W. and S. walls by the river, which once flowed immediately beneath them. On the S. W. face is a great mound, 700 yards by 400, and covering about 60 acres, with a cone or pyramid of earth about 140 feet high rising in the N. W. corner of it. At the S. E. angle of the inclosure is a group of lofty mounds called by the Arabs, after Nimroud's lieutenant, Athur (cf. Gen. x. 11). According to the Arab geographers this name at one time applied to all the ruins of Nimroud (Layard, *Nin. and its Rem.* ii. 245, note). Within the inclosure a few slight irregularities in the soil mark the sites of ancient habitations, but there are no indications of ruins of buildings of any size. Fragments of brick and pottery abound. The Tigris is now  $1\frac{1}{2}$  mile distant from the mound, but sometimes reaches them during extraordinary floods.

The inclosure-walls of Khorsabad form a square of about 2,000 yards. They show the remains of towers and gateways. There are apparently no traces of moats or ditches. The mound which gives its name to this group of ruins rises on the N. W. face. It may be divided into two parts or stages, the upper about 650 feet square, and 30 feet high, and the lower adjoining it, about 1,350 by 300. Its summit was formerly occupied by an Arab village. In one corner there is a pyramid or cone, similar to that at Nimroud, but very inferior in height and size. Within the interior are a few mounds marking the sites of propylæa and similar detached monuments, but no traces of considerable buildings. These ruins were known to the early Arab geographers by the name of "Saraoun," probably a traditional corruption of the name of Sargon, the king who founded the palaces discovered there.

Shereef Khan, so called from a small village in the neighborhood, consists of a group of mounds of no great size when compared with other Assyrian ruins, and without traces of an outer-wall. Selamiyah is an inclosure of irregular form, situated upon a high bank overlooking the Tigris, about 5,000 yards in circuit, and containing an area of about 410 acres, apparently once surrounded by a ditch or moat. It contains no mound or ruin, and even the earthen rampart which marks the walls has in many places nearly disappeared. The name is derived from an Arab town once of some importance, but now reduced to a miserable village inhabited by Turcomans.

The greater part of the discoveries which, of late years, have thrown so much light upon the history and condition of the ancient inhabitants of Nineveh were made in the ruins of Nimroud, Kouyunjik, and Khorsabad. The first traveller who carefully examined the supposed site of the city was Mr. Rich, formerly political agent for the East India Company at Baghdad; but his investigations were almost entirely confined to Kouyunjik and the surrounding mounds, of which he made a survey in 1820. From them he obtained a few relics, such as inscribed pottery and bricks, cylinders, and gems. Some time before a bas-relief representing men and animals had been discovered, but had been destroyed by the Mohammedans. He subsequently visited the mound of Nimroud, of which, however, he was unable to make more than a hasty exami-

nation (*Narrative of a Residence in Kurdistan*, ii. 131). Several travellers described the ruins after Mr. Rich, but no attempt was made to explore them systematically until M. Botta was appointed French consul at Mosul in 1843. Whilst excavating in the mound of Khorsabad, to which he had been directed by a peasant, he discovered a row of upright alabaster slabs, forming the paneling or skirting of the lower part of the walls of a chamber. This chamber was found to communicate with others of similar construction, and it soon became evident that the remains of an edifice of considerable size were buried in the mound. The French government having given the necessary funds, the ruins were fully explored. They consisted of the lower part of a number of halls, rooms, and passages, for the most part wainscoted with slabs of coarse gray alabaster, sculptured with figures in relief, the principal entrances being formed by colossal human-headed winged bulls. No remains of exterior architecture of any great importance were discovered. The calcined limestone and the great accumulation of charred wood and charcoal showed that the building had been destroyed by fire. Its upper part had entirely disappeared, and its general plan could only be restored by the remains of the lower story. The collection of Assyrian sculptures in the Louvre came from these ruins.

The excavations subsequently carried on by MM. Place and Fresnel at Khorsabad led to the discovery, in the inclosure below the platform, of propylæa, flanked by colossal human-headed bulls, and of other detached buildings forming the approaches to the palace, and also of some of the gateways in the inclosure-walls, ornamented with similar mythic figures.

M. Botta's discoveries at Khorsabad were followed by those of Mr. Layard at Nimroud and Kouyunjik, made between the years 1845 and 1850. The mound of Nimroud was found to contain the ruins of several distinct edifices, erected at different periods — materials for the construction of the latest having been taken from an earlier building. The most ancient stood at the N. W. corner of the platform, the most recent at the S. E. In general plan and, in construction they resembled the ruins at Khorsabad — consisting of a number of halls, chambers, and galleries, paneled with sculptured and inscribed alabaster slabs, and opening one into the other by doorways generally formed by pairs of colossal human-headed winged bulls or lions. The exterior architecture could not be traced. The lofty cone or pyramid of earth adjoining this edifice covered the ruins of a building the basement of which was a square of 165 feet, and consisted to the height of 20 feet, of a solid mass of sun-dried bricks, faced on the four sides by blocks of stone carefully squared, beveled, and adjusted. This stone facing singularly enough coincides exactly with the height assigned by Xenophon to the stone plinth of the walls (*Anab.* iii. 4), and is surmounted, as he describes the plinth to have been, by a superstructure of bricks, nearly every kiln-burnt brick bearing an inscription. Upon this solid substructure there probably rose, as in the Babylonian temples, a succession of platforms or stages, diminishing in size, the highest having a shrine or altar upon it (BABEL: Layard, *Nin. and Bab.* ch. v.). A vaulted chamber or gallery, 100 feet long, 6 broad, and 12 high, crossed the centre of the mound on a level with the summit of the

stone-masonry. It had evidently been broken into and rifled of its contents at some remote period, and may have been a royal sepulchre — the tomb of Ninus, or Sardanapalus, which stood at the entrance of Nineveh. It is the tower described by Xenophon at Larissa as being 1 plethron (100 feet) broad and 2 plethra high. It appears to have been raised by the son of the king who built the N. W. palace, and whose name in the cuneiform inscriptions is supposed to be identified with that of Sardanapalus. Shalmanubar or Shalmaneser,<sup>a</sup> the builder of this tomb or tower, also erected in the centre of the great mound a second palace, which appears to have been destroyed to furnish materials for later buildings. The black obelisk now in the British Museum was found amongst its ruins. On the W. face of the mound, and adjoining the centre palace, are the remains of a third edifice, built by the grandson of Shalmanubar, whose name is read Iva-Lush, and who is believed to be the Pul of the Hebrew Scriptures. It contained some important inscribed slabs, but no sculptures. **Rasrahaddon** raised (about B. C. 680) at the S. W.

corner of the platform another royal abode of considerable extent, but constructed principally with materials brought from his predecessor's palaces. In the opposite or S. E. corner are the ruins of a still later palace, built by his grandson Ashur-emit-ili, very inferior in size and in splendor to other Assyrian edifices. Its rooms were small; it appears to have had no great halls, and the chambers were paneled with slabs of common stone without sculpture or inscriptions. Some important detached figures, believed to bear the name of the historical Semiramis, were, however, found in its ruins. At the S. W. corner of the mound of Kouyunjik stood a palace built by Sennacherib (about B. C. 700), exceeding in size and in magnificence of decoration all others hitherto explored. It occupied nearly 100 acres. Although much of the building yet remains to be examined, and much has altogether perished, about 60 courts, halls (some nearly 150 feet square), rooms, and passages (one 200 feet long), have been discovered, all paneled with sculptured slabs of alabaster. The entrances to the edifice and to the principal cham-

Khorsabad — View of the Mounds. — Botta's Ninivé.

bers were flanked by groups of winged human-headed lions and bulls of colossal proportions — some nearly 20 feet in height; 27 portals thus formed were excavated by Mr. Layard. A second palace was erected on the same platform by the son of Essarhaddon, the third king of the name of Sardanapalus. In it were discovered sculptures of great interest and beauty, amongst them the series representing the lion-hunt now in the British Museum. Owing to the sanctity attributed by Mohammedans to the supposed tomb of Jonah, great difficulties were experienced in examining the mound upon which it stands. A shaft sunk within the walls of a private house led to the discovery of sculptured slabs; and excavations subsequently carried on by agents of the Turkish Government proved that they formed part of a palace erected by Essarhaddon. Two entrances or gateways in the great inclosure-walls have been excavated — one (at *b* on plan) flanked by colossal

human-headed bulls and human figures. They, as well as the walls, appear, according to the inscriptions, to have been constructed by Sennacherib. No propylæa or detached buildings have as yet been discovered within the inclosure. At Shereeff Khan are the ruins of a temple, but no sculptured slabs have been dug up there. It was founded by Sennacherib, and added to by his grandson. At Selamiyah no remains of buildings nor any fragments of sculpture or inscriptions have been discovered.

The Assyrian edifices were so nearly alike in general plan, construction, and decoration, that one description will suffice for all. They were built upon artificial mounds or platforms, varying in height, but generally from 30 to 50 feet above the level of the surrounding country, and solidly constructed of regular layers of sun-dried bricks, as at Nimroud, or consisting merely of earth and rubbish heaped up, as at Kouyunjik. The mode of raising

<sup>a</sup> It must be observed, once for all, that whilst the Assyrian proper names are given in the text according

to the latest interpretations of the cuneiform inscriptions, they are very doubtful.

the latter kind of mound is represented in a series of bas-reliefs, in which captives and prisoners are seen amongst the workmen (Layard, *Mon. of Nin.* 2d series, pl. 14, 15). This platform was probably

Entrance, Kouyunjik.

faced with stone-masonry, remains of which were discovered at Nimroud, and broad flights of steps (such as were found at Khorsabad) or inclined ways led up to its summit. Although only the

general plan of the ground-floor can now be traced, it is evident that the palaces had several stories built of wood and sun-dried bricks, which, when the building was deserted and allowed to fall to decay, gradually buried the lower chambers with their ruins, and protected the sculptured slabs from the effects of the weather. The depth of soil and rubbish above the alabaster slabs varied from a few inches to about 20 feet. It is to this accumulation of rubbish above them that the bas-reliefs owe their extraordinary preservation. The portions of the edifices still remaining consist of halls, chambers, and galleries, opening for the most part into large uncovered courts. The partition walls vary from 6 to 15 feet in thickness, and are solidly built of sun-dried bricks, against which are placed the paneling or skirting of alabaster slabs. No windows have hitherto been discovered, and it is probable that in most of the smaller chambers light was only admitted through the doors. The wall, above the wainscoting of alabaster, was plastered, and painted with figures and ornaments. The pavement was formed either of inscribed slabs of alabaster, or large, flat, kiln-burnt bricks. It rested upon layers of bitumen and fine sand. Of nearly similar construction are the modern houses of Mosul, the architecture of which has probably been preserved from the earliest times as that best suited to the climate and to the manners and wants of an oriental people. The rooms are grouped in the same manner round open courts or large halls. The same alabaster, usually carved with ornaments, is used for wainscoting the apartments, and the walls are constructed of sun-dried bricks. The upper part and the external architecture of the Assyrian palaces, both of which have entirely disappeared, can only be restored conjecturally, from a comparison of monuments represented in the bas-reliefs, and of edifices built by nations, such as the Persians, who took their arts from the Assyrians. By such means Mr. Fergusson has, with much ingenuity, attempted to reconstruct a palace of Nineveh (*The Palaces of Nineveh and Persepolis restored*). He presumes that the upper stories were built entirely of sun-dried bricks and wood—a supposition warranted by the absence of stone and marble columns, and of remains of stone and burnt-brick masonry in the rubbish and soil which cover and surround the ruins; that the exterior was richly sculptured and painted with figures and ornaments, or decorated with enameled bricks of bright colors, and that light was admitted to the principal chambers on the ground-floor through a kind of gallery which formed the upper part of them, and upon which rested the wooden pillars necessary for the support of the superstructure. The capitals and various details of these pillars, the friezes and architectural ornaments, he restores from the stone columns and other remains at Persepolis. He conjectures that curtains, suspended between the pillars, kept out the glaring light of the sun, and that the ceilings were of wood-work, elaborately painted with patterns similar to those represented in the sculptures, and probably ornamented with gold and ivory. The discovery at Khorsabad of an arched entrance of considerable size and depth, constructed of sun-dried and kiln-burnt bricks, the latter enameled with figures, leads to the inference that some of the smaller chambers may have been vaulted.

The sculptures, with the exception of the human-headed lions and bulls, were for the most part in

low relief. The colossal figures usually represent the king, his attendants, and the gods; the smaller sculptures, which either cover the whole face of the slab, or are divided into two compartments by bands of inscriptions, represent battles, sieges, the chase, single combats with wild beasts, religious ceremonies, etc., etc. All refer to public or national events; the hunting-scenes evidently recording the prowess and personal valor of the king as the head of the people — "the mighty hunter before the Lord." The sculptures appear to have been painted — remains of color having been found on most of them. Thus decorated, without and within, the Assyrian palaces must have displayed a barbaric magnificence, not, however, devoid of a certain grandeur and beauty, which no ancient or modern edifice has probably exceeded. Amongst the small objects, undoubtedly of the Assyrian period, found in the ruins, were copper-vessels (some embossed and incised with figures of men and animals and graceful ornaments), bells, various instruments and tools of copper and iron, arms (such as spear and arrow heads, swords, daggers, shields, helmets, and fragments of chain and plate armor), ivory ornaments, glass bowls and vases, alabaster urns, figures and other objects in terra-cotta, pottery, parts of a throne, inscribed cylinders and seals of agate and other precious materials, and a few detached statues. All these objects show great mechanical skill and a correct and refined taste, indicating considerable advance in civilization.

These great edifices, the depositories of the national records, appear to have been at the same time the abode of the king and the temple of the gods — thus corresponding, as in Egypt, with the character of the monarch, who was both the political and religious chief of the nation, the special favorite of the deities, and the interpreter of their decrees. No building has yet been discovered which possesses any distinguishing features to mark it specially as a temple. They are all precisely similar in general plan and construction. Most probably a part of the palace was set apart for religious worship and ceremonies. Altars of stone, resembling the Greek tripod in form, have been found in some of the chambers — in one instance before a figure of the king himself (Layard, *Nin. and Bab.* p. 351). According to the inscriptions, it would, however, appear that the Assyrian monarchs built temples of great magnificence at Nineveh, and in various parts of the empire, and profusely adorned them with gold, silver, and other precious materials.

*Site of the City.* — Much diversity of opinion exists as to the identification of the ruins which may be properly included within the site of ancient Nineveh. According to Sir H. Rawlinson and those who concur in his interpretation of the cuneiform characters, each group of mounds we have described represents a separate and distinct city. The name applied in the inscriptions to Nimroud is supposed to read "Kalkhu," and the ruins are consequently identified with those of the Calah of Genesis (x. 11); Khorsabad is Sargina, as founded by Sargon, the name having been retained in that of Sarghuu, or Saraoum, by which the ruins were known to the Arab geographers; Shereef Khan is Tarbisi. Selamiyah has not yet been identified, no inscription having been found in the ruins. The name of Nineveh is limited to the mounds opposite Mosul, including Kouyunjik and Nebbi Yunus. Sir H. Rawlinson was at one time inclined to exclude even the former mound from the precincts of the city (*Journ.*

*of As. Soc.* xii. 418). Furthermore, the ancient and primitive capital of Assyria is supposed to have been not Nineveh, but a city named Ashur, whose ruins have been discovered at Kalah Sherghat, a mound on the right or W. bank of the Tigris, about 60 miles S. of Mosul. It need scarcely be observed that this theory rests entirely upon the presumed accuracy of the interpretation of the cuneiform inscriptions, and that it is totally at variance with the accounts and traditions preserved by sacred and classical history of the antiquity, size, and importance of Nineveh. The area of the inclosure of Kouyunjik, about 1,800 acres, is far too small to represent the site of the city, built as it must have been in accordance with eastern customs and manners, even after allowing for every exaggeration on the part of ancient writers. Captain Jones (*Topography of Nineveh, Journ. of R. Asiat. Soc.* xv. p. 324) computes that it would contain 174,000 inhabitants, 50 square yards being given to each person; but the basis of this calculation would scarcely apply to any modern eastern city. If Kouyunjik represents Nineveh, and Nimroud Calah, where are we to place Resen, "a great city" between the two? (Gen. x. 12.) Scarcely at Selamiyah, only three miles from Nimroud, and where no ruins of any importance exist. On the other hand, it has been conjectured that these groups of mounds are not ruins of separate cities, but of fortified royal residences, each combining palaces, temples, propylæa, gardens, and parks, and having its peculiar name; and that they all formed part of one great city built and added to at different periods, and consisting of distinct quarters scattered over a very large area, and frequently very distant one from the other. Nineveh might thus be compared with Damascus, Ispahan, or perhaps more appropriately with Delhi, a city rebuilt at various periods, but never on exactly the same site, and whose ruins consequently cover an area but little inferior to that assigned to the capital of Assyria. The primitive site, the one upon which Nineveh was originally founded, may possibly have been that occupied by the mound of Kouyunjik. It is thus alone that the ancient descriptions of Nineveh, if any value whatever is to be attached to them, can be reconciled with existing remains. The absence of all traces of buildings of any size within the inclosures of Nimroud, Kouyunjik, and Khorsabad, and the existence of propylæa forming part of the approaches to the palace, beneath and at a considerable distance from the great mound at Khorsabad, seem to add weight to this conjecture. Even Sir H. Rawlinson is compelled to admit that all the ruins may have formed part of "that group of cities, which in the time of the prophet Jonah, was known by the common name of Niueveh" (*On the Inscriptions of Babylonia and Assyria, Journ. As. Soc.*). But the existence of fortified palaces is consistent with oriental custom, and with authentic descriptions of ancient eastern cities. Such were the residences of the kings of Babylon, the walls of the largest of which were 60 stadia, or 7 miles in circuit, or little less than those of Kouyunjik, and considerably greater than those of Nimroud [BABYLON]. The Persians, who appear to have closely imitated the Assyrians in most things, constructed similar fortified parks, or paradises — as they were called — which included royal dwelling-places (Quint. Curt. l. 7, c. 8). Indeed, if the interpretation of the cuneiform inscriptions is to be trusted, the Assyrian palaces were of precisely the same character; for

that built by Essarhaddon at Nebbi Yunus is stated to have been so large that horses and other animals were not only kept, but even bred within its walls (Fox Talbot, *Assyr. Texts translated*, p. 17, 18). It is evident that this description cannot apply to a building occupying so confined an area as the summit of this mound, but to a vast inclosed space. This aggregation of strongholds may illustrate the allusion in Nahum (iii. 14), "Draw thee waters for the siege, fortify thy strongholds," and "repair thy fortified places." They were probably surrounded by the dwellings of the mass of the population, either collected in groups, or scattered singly in the midst of fields, orchards, and gardens. There are still sufficient indications in the country around of the sites of such habitations. The fortified inclosures, whilst including the residences of the king, his family or immediate tribe, his principal officers, and probably the chief priests, may also have served as places of refuge for the inhabitants of the city at large in times of danger or attack. According to Diodorus (ii. 9) and Quintus Curtius (v. 1), there was land enough within the precincts of Babylon, besides gardens and orchards, to furnish corn for the wants of the whole population in case of siege; and in the book of Jonah, Nineveh is said to contain, besides its population, "much cattle" (iv. 11). As at Babylon, no great consecutive wall of inclosure comprising all the ruins, such as that described by Diodorus, has been discovered at Nineveh, and no such wall ever existed, otherwise some traces of so vast and massive a structure must have remained to this day. The river Gomel, the modern Ghazir-Su, may have formed the eastern boundary or defense of the city. As to the claims of the mound of Kalah Sherghat to represent the site of the primitive capital of Assyria called Ashur, they must rest entirely on the interpretation of the inscriptions. This city was founded, or added to, they are supposed to declare, by one Shamas Iva, the son and viceroi, or satrap, of Ismi-Dagon, king of Babylon, who reigned, it is conjectured, about b. c. 1840. Assyria and its capital remained subject to Babylonia until b. c. 1273, when an independent Assyrian dynasty was founded, of which fourteen kings, or more, reigned at Kalah Sherghat. About b. c. 930 the seat of government, it is ascertained, was transferred by Sardanapalus (the second of the name, and the Sardanapalus of the Greeks) to the city of Kalkhu or Calah (Nimroud), which had been founded by an earlier monarch named Shalmanubar. There it continued about 250 years, when Sennacherib made Nineveh the capital of the empire [ASSYRIA]. These assumptions seem to rest upon very slender grounds; and Dr. Hincks altogether rejects the theory of the Babylonian character of these early kings, believing them to be Assyrian (*Report to Trustees of Brit. Mus. on Cylinders and Terra-Cottas*). It is believed that on an inscribed terra-cotta cylinder discovered at Kalah Sherghat, the foundation of a temple is attributed to this Shamas-Iva. A royal name similar to that of his father, Ismi-Dagon, is read on a brick from some ruins in southern Babylonia, and the two kings are presumed to be identical, although there is no other evidence of the fact (Rawl. *Herod.* i. v.

456, note 5); indeed the only son of this Babylonian king mentioned in the inscriptions is read Ibil-amu-duina, a name entirely different from that of the presumed viceroi of Asshur. It is by no means an uncommon occurrence that the same names should be found in royal dynasties of very different periods. The Assyrian dynasties furnish more than one example. It may be further observed that no remains of sufficient antiquity and importance have been discovered at Kalah Sherghat to justify the opinion that it was the ancient capital. The only sculpture found in the ruins, the seated figure in black basalt now in the British Museum, belongs to a later period than the monuments from the N. W. palace at Nimroud. Upon the presumed identification above indicated, and upon no other evidence, as far as we can understand, an entirely new system of Assyrian history and chronology has been constructed, of which a sketch has been given under the title ASSYRIA (see also Rawlinson's *Herod.* vol. i. p. 481). It need only be pointed out here that this system is at variance with sacred, classical, and monumental history, and can scarcely be accepted as proven, until the Assyrian ruins have been examined with more completeness than has hitherto been possible, and until the decipherment of the cuneiform inscriptions has made far greater progress. It has been shown how continuously tradition points to Nineveh as the ancient capital of Assyria. There is no allusion to any other city which enjoyed this rank. Its name occurs in the statistical table of Karnak, in conjunction with Naharina or Mesopotamia, and on a fragment recently discovered by M. Mariette, of the time of Thotmas III., or about b. c. 1490 (Birch, *Trans. R. Soc. of Lit.* ii. 345, second series), and no mention has been found on any Egyptian monument of such cities as Asshur and Calah. Sir H. Rawlinson, in a paper read before the R. S. of Lit., has, however, contended that the Naharain, Saenkar, and Assuri of the Egyptian inscriptions are not Mesopotamia, Singar, and Assyria, and that Nin-iu is not Nineveh at all, but refers to a city in the chain of Taurus. But these conclusions are altogether rejected by Egyptian scholars. Further researches may show that Sennacherib's palace at Kouyunjik, and that of Sardanapalus at Nimroud, were built upon the site and above the remains of very much earlier edifices. According to the interpretation of the inscriptions, Sardanapalus himself founded a temple at "Nineveh" (Rawl. *Herod.* i. 462), yet no traces of this building have been discovered at Kouyunjik. Sargon restored the walls of Nineveh, and declares that he erected his palace "near to Nineveh" (*id.* 474), whilst Sennacherib only claims to have rebuilt the palaces, which were "rent and split from extreme old age" (*id.* 475), employing 360,000 men, captives from Chaldea, Syria, Armenia, and Cilicia, in the undertaking, and speaks of Nineveh as founded of old, and governed by his forefathers, "kings of the old time" (Fox Talbot, on Bellino's cylinder, *Journ. of As. Soc.* vol. xviii.). Old palaces, a great tower, and ancient temples dedicated to Ishtar and Bar Muri, also stood there. Hitherto the remains of no other edifices than those attributed to Sennacherib and

<sup>a</sup> To support the theory of the ancient capital of Assyria being Asshur, a further identification is required of two kings whose names are read Tiglath-pilese one found in a rock-cut inscription at Ravian

in the mountains to the E of Mosul, the other occurring on the Kalah Sherghat cylinder. M. Oppert has questioned the identity of the two (Rawl. *Herod.* i. 469 and note.)

his successors have been discovered in the group of ruins opposite Mosul.

*Prophecies relating to Nineveh, and Illustrations of the O. T.* — These are exclusively contained in the books of Nahum and Zephaniah; for although Isaiah foretells the downfall of the Assyrian empire (chs. x. and xiv.), he makes no mention of its capital. Nahum threatens the entire destruction of the city, so that it shall not rise again from its ruins: "With an overrunning flood he will make an utter end of the place thereof." "He will make an utter end; affliction shall not rise up the second time" (i. 8, 9). "Thy people is scattered upon the mountains, and no one gathereth them. There is no healing of thy bruise" (iii. 18, 19). The manner in which the city should be taken seems to be indicated. "The defence shall be prepared" (ii. 5) is rendered in the marginal reading "the covering or coverer shall be prepared," and by Mr. Vance Smith (*Prophecies on Assyria and the Assyrians*, p. 242), "the covering machine," the covered battering-ram or tower supposed to be represented in the bas-reliefs as being used in sieges. Some commentators believe that "the overrunning flood" refers to the agency of water in the destruction of the walls by an extraordinary overflow of

the Tigris, and the consequent exposure of the city to assault through a breach; others, that it applies to a large and devastating army. An allusion to the overflow of the river may be contained in ii. 6, "The gates of the rivers shall be opened, and the palace shall be dissolved," a prophecy supposed to have been fulfilled when the Medo-Babylonian army captured the city. Diodorus (ii. 27) relates of that event, that "there was an old prophecy that Nineveh should not be taken till the river became an enemy to the city; and in the third year of the siege the river being swoln with continued rains, overflowed part of the city, and broke down the wall for twenty stadia; then the king thinking that the oracle was fulfilled and the river become an enemy to the city, built a large funeral pile in the palace, and collecting together all his wealth, and his concubines and eunuchs, burnt himself and the palace with them all; and the enemy entered the breach that the waters had made, and took the city." Most of the edifices discovered had been destroyed by fire, but no part of the walls of either Nimroud or Kouyunjik appears to have been washed away by the river. The Tigris is still subject to very high and dangerous floods during the winter and spring rains, and even now frequently reaches

King feasting. From Kouyunjik.

the ruins. When it flowed in its ancient bed at the foot of the walls a part of the city might have been overwhelmed by an extraordinary inundation. The likening of Nineveh to "a pool of water" (ii. 8) has been conjectured to refer to the moats and dams by which a portion of the country around Nineveh could be flooded. The city was to be partly destroyed by fire, "The fire shall devour thy bars," "then shall the fire devour thee" (iii. 13, 15). The gateway in the northern wall of the Kouyunjik inclosure had been destroyed by fire as well as the palaces. The population was to be surprised when unprepared, "while they are drunk as drunkards they shall be devoured as stubble fully dry" (i. 10). Diodorus states that the last and fatal assault was made when they were overcome with wine. In the bas-reliefs carousing scenes are represented, in which the king, his courtiers, and even the queen, reclining on couches or seated on thrones, and attended by musicians, appear to be pledging each other in bowls of wine (Botta, *Mou. de Nin.* pl. 63-67, 112, 113, and one very interesting slab in the Brit. Mus., figured above). The captivity of the inhabitants, and their removal to distant provinces, are predicted (iii. 18). Their dispersion, which occurred when the

city fell, was in accordance with the barbarous custom of the age. The palace-temples were to be plundered of their idols, "out of the house of thy gods will I cut off the graven image and the molten image" (i. 14), and the city sacked of its wealth: "Take ye the spoil of silver, take the spoil of gold" (ii. 9). For ages the Assyrian edifices have been despoiled of their sacred images; and enormous amounts of gold and silver were, according to tradition, taken to Ecbatana by the conquering Medes (Diod. Sic. ii.). Only one or two fragments of the precious metals were found in the ruins. Nineveh, after its fall, was to be "empty, and void, and waste" (ii. 10); "it shall come to pass, that all they that look upon thee shall flee from thee, and say, Nineveh is laid waste" (iii. 7). These epithets describe the present state of the site of the city. But the fullest and the most vivid and poetical picture of its ruined and deserted condition is that given by Zephaniah, who probably lived to see its fall. "He will make Nineveh a desolation, and dry like a wilderness. And flocks shall lie down in the midst of her, all the beasts of the nations: both the cormorant and the bittern shall lodge in the upper lintels of it! their voice shall sing in

the windows: desolation shall be in the thresholds: for he shall uncover the cedar work . . . how is she become a desolation, a place for beasts to lie down in! every one that passeth by her shall hiss

Winged deity.

and wag his hand' (ii. 13, 14, 15.) The canals which once fertilized the soil are now dry. Except when the earth is green after the periodical rains the site of the city, as well as the surrounding country, is an arid yellow waste. Flocks of sheep and herds of camels may be seen seeking scanty pasture amongst the mounds. From the unwholesome swamp within the ruins of Khorsabad, and from the reedy banks of the little streams that flow by Kouyunjik and Nimroud may be heard the croak of the cormorant and the bitter. The cedar-wood which adorned the ceilings of the pal-

Winged globe

aces has been uncovered by modern explorers (Layard, *Nin. and Bab.* p. 357), and in the deserted halls the hyena, the wolf, the fox, and the jackal, now lie down. Many allusions in the O. T. to the dress, arms, modes of warfare, and customs of the people of Nineveh, as well as of the Jews, are explained by the Nineveh monuments. Thus (Nah. ii. 3), "the shield of his mighty men is made red, the valiant men are in scarlet." The shields and the dresses of the warriors are generally painted red in the sculptures. The magnificent description of the assault upon the city (iii. 1, 2, 3) is illustrated in almost every particular (Layard, *Nin. and its Rem.* li., part ii., ch. v.). The mounds built up against the walls of a besieged town (Is. xxviii. 33; 2 K. ix. 32; Jer. xxxii. 24, &c.), the battering-ram (Ez. iv. 2), the various kinds of armor, helmets, shields, spears, and swords, used in battle and during a siege; the chariots and horses (Nah. iii. 3; CHARIOT), are all seen in various bas-reliefs (Layard, *Nin. and its Rem.* ii., part ii., chaps. iv. and v.). The custom of cutting off the heads of the slain and placing them in heaps (2 K. x. 8) is constantly represented (Layard, ii. 184). The allusion in 2 K. xix. 29, "I will put my hook in thy nose and my bridle in thy lips," is illustrated in a bas-relief from Khorsabad (*id.* 376).

The interior decoration of the Assyrian palaces is described by Ezekiel, himself a captive in Assyria and an eye-witness of their magnificence

(xxiii. 14, 15). "She saw men of sculptured workmanship upon the walls; likenesses of the Chaldeans pictured in red, girded with girdles upon their loins, with colored flowing head-dresses upon their heads, with the aspect of princes all of them" (*Lay. Nin. and its Rem.* ii. 307); a description strikingly illustrated by the sculptured likenesses of the Assyrian kings and warriors (see especially Botta *Mon. de Nin.* pl. 12). The mystic figures seen by the prophet in his vision (ch. i.), uniting the man, the lion, the ox, and the eagle, may have been suggested by the eagle-headed idols, and man-headed bulls and lions (by some identified with the cherubim of the Jews [CHERUB]), and the sacred emblem of the "wheel within wheel" by the winged circle or globe frequently represented in the bas-reliefs (*Lay. Nin. and its Rem.* ii. 465).

*Arts.* — The origin of Assyrian art is a subject at present involved in mystery, and one which offers a wide field for speculation and research. Those who derive the civilization and political system of the Assyrians from Babylonia would trace their arts to the same source. One of the principal features of their architecture, the artificial platform serving as a substructure for their national edifices, may have been taken from a people inhabiting plains perfectly flat, such as those of Shinar, rather than an undulating country in which natural elevations are not uncommon, such as Assyria proper. But it still remains to be proved that there are artificial mounds in Babylonia of an earlier date than mounds on or near the site of Nineveh. Whether other leading features and the details of Assyrian architecture came from the same source, is much more open to doubt. Such Babylonian edifices as have been hitherto explored are of a later date than those of Nineveh, to which they appear to bear but little resemblance. The only features in common seem to be the ascending stages of

the temples or tombs, and the use of enameled bricks. The custom of paneling walls with alabaster or stone must have originated in a country in which such materials abound, as in Assyria, and not in the alluvial plains of southern Mesopotamia, where they cannot be obtained except at great cost or by great labor. The use of sun-dried and kiln-burnt bricks and of wooden columns would be common to both countries, as also such arrangements for the admission of light and exclusion of heat as the climate would naturally suggest.

In none of the arts of the Assyrians have any traces hitherto been found of progressive change. In the architecture of the most ancient known edifice all the characteristics of the style are already fully developed; no new features of any importance seem to have been introduced at a later period. The palace of Sennacherib only excels those of his remote predecessors in the vastness of its proportions, and in the elaborate magnificence of its details. In sculpture, as probably in painting also, if we possessed the means of comparison, the same thing is observable as in the remains of ancient Egypt. The earliest works hitherto discovered show the result of a lengthened period of gradual development, which, judging from the slow progress made by untutored men in the arts, must have extended over a vast number of years. They exhibit the arts of the Assyrians at the highest

marks of excellence they probably ever attained. The only change we can trace, as in Egypt, is one of decline or "decadence." The latest monuments, such as those from the palaces of Essarhaddon and his son, show perhaps a closer imitation of nature, especially in the representation of animals, such as the lion, dog, wild ass, etc., and a more careful and minute execution of details than those from the earlier edifices; but they are wanting in the simplicity yet grandeur of conception, in the invention, and in the variety of treatment displayed in the most ancient sculptures. This will at once be perceived by a comparison of the ornamental details of the two periods. In the older sculptures there occur the most graceful and varied combinations of flowers, beasts, birds, and other natural objects, treated in a conventional and highly artistic manner; in the later there is only a constant and monotonous repetition of rosettes and commonplace forms, without much display of invention or imagination (compare Layard, *Mon. of Nineveh*, 1st series, especially plates 5, 8, 43-48, 50, with 2d series, *passim*; and with Botta, *Momumens de Ninivé*). The same remark applies to animals. The lions of the earlier period are a grand, ideal, and, to a certain extent, conventional representation of the beast — not very different from that of the Greek sculptor in the noblest period of Greek art (Layard, *Mon. of Nin.*, 2d series, pl. 2). In the later bas-reliefs, such as those from the palace of Sardanapalus III., now in the British Museum, the lions are more closely imitated from nature without any conventional elevation; but what is gained in truth is lost in dignity.

The same may be observed in the treatment of the human form, though in its representation the Assyrians, like the Egyptians, would seem to have been, at all times, more or less shackled by religious prejudices or laws. For instance, the face is almost invariably in profile, not because the sculptor was unable to represent the full face, one or two examples of it occurring in the bas-reliefs, but probably because he was bound by a generally received custom, through which he would not break. No new forms or combinations appear to have been introduced into Assyrian art during the four or five centuries, if not longer period, with which we are acquainted with it. We trace throughout the same eagle-headed, lion-headed, and fish-headed figures, the same winged divinities, the same composite forms at the doorways. In the earliest works, an attempt at composition, that is at a pleasing and picturesque grouping of the figures, is perhaps more evident than in the later — as may be illustrated by the Lion-hunt from the N. W. Palace, now in the British Museum (Layard, *Mon. of Nin.*, pl. 10). A parallel may in many respects be drawn between the arts of the Assyrians from their earliest known period to their latest, and those of Greece from Phidias to the Roman epoch, and of Italy from the 15th to the 18th century.

The art of the Nineveh monuments must in the present state of our knowledge be accepted as an original and national art, peculiar, if not to the Assyrians alone, to the races who at various periods possessed the country watered by the Tigris and Euphrates. As it was undoubtedly brought to its highest perfection by the Assyrians, and is especially characteristic of them, it may well and conveniently bear their name. From whence it was originally derived there is nothing as yet to show

If from Babylon, as some have conjectured, there are no remains to prove the fact. Analogies may perhaps be found between it and that of Egypt, but they are not sufficient to convince us that the one was the offspring of the other. These analogies, if not accidental, may have been derived, at some very remote period, from a common source. The two may have been offshoots from some common trunk which perished ages before either Nineveh or Thebes was founded; or the Phœnicians, as it has been suggested, may have introduced into the two countries, between which they were placed, and between which they may have formed a commercial link, the arts peculiar to each of them. Whatever the origin, the development of the arts of the two countries appears to have been affected and directed by very opposite conditions of national character, climate, geographical and geological position, politics, and religion. Thus, Egyptian architecture seems to have been derived from a stone prototype, Assyrian from a wooden one — in accordance with the physical nature of the two countries. Assyrian art is the type of power, vigor, and action; Egyptian that of calm dignity and repose. The one is the expression of an ambitious, conquering, and restless nature; the other of a race which seems to have worked for itself alone and for eternity. At a late period of Assyrian history, at the time of the building of the Khorsabad palace (about the 8th century B. C.), a more intimate intercourse with Egypt through war or dynastic alliances than had previously existed, appears to have led to the introduction of objects of Egyptian manufacture into Assyria, and may have influenced to a limited extent its arts. A precisely similar influence proceeding from Assyria has been remarked at the same period in Egypt, probably arising from the conquest and temporary occupation of the latter country by the Assyrians, under a king whose name is read Asshur-bani-pal, mentioned in the cuneiform inscriptions (Bireh, *Trans. of R. Soc. of Lit.*, new series). To this age belong the ivories, bronzes, and nearly all the small objects of an Egyptian character, though not apparently of Egyptian workmanship, discovered in the Assyrian ruins. It has been asserted, on the authority of an inscription believed to contain the names of certain Hellenic artists from Idalium, Citium, Salamis, Paphos, and other Greek cities, that Greeks were employed by Essarhaddon and his son in executing the sculptured decorations of their palaces (Rawl. *Herod.* i. 483). But, passing over the extreme uncertainty attaching to the decipherment of proper names in the cuneiform character, it must be observed that no remains whatever of Greek art of so early a period are known, which can be compared in knowledge of principles and in beauty of execution and of design with the sculptures of Assyria. Niebuhr has remarked of Hellenic art, that "anything produced before the Persian war was altogether barbarous" (34th Lecture on *Ancient History*). If Greek artists could execute such monuments in Assyria, why, it may be asked, did they not display equal skill in their own country? The influence, indeed, seems to have been entirely in the opposite direction. The discoveries at Nineveh show almost beyond a doubt that the Ionic element in Greek art was derived from Assyria, as the Doric came from Egypt. There is scarcely a leading form or a detail in the Ionic order which cannot be traced to Assyria — the volute of the column, the frieze of griffins, the

honeysuckle-border, the guilloche, the Caryatides, and many other ornaments peculiar to the style.

The arts of the Assyrians, especially their architecture, spread to surrounding nations, as is usually the case when one race is brought into contact with another in a lower state of civilization. They appear to have crossed the Euphrates, and to have had more or less influence on the countries between it and the Mediterranean. Monuments of an Assyrian character have been discovered in various parts of Syria, and further researches would probably disclose many more. The arts of the Phœnicians, judging from the few specimens preserved, show the same influence. In the absence of even the most insignificant remains, and of any implements which may with confidence be attributed to the Jews [ARMS], there are no materials for comparison between Jewish and Assyrian art. It is possible that the bronzes and ivories discovered at Nineveh were of Phœnician manufacture, like the vessels in Solomon's Temple. On the lion-weights, now in the British Museum, are inscriptions both in the cuneiform and Phœnician characters. The Assyrian inscriptions seem to indicate a direct dependence of Judæa upon Assyria from a very early period. From the descriptions of the Temple and "houses" of Solomon (cf. 1 K. vi. vii.; 2 Chr. iii. iv.; Joseph. viii. 2; Fergusson's *Palaces of Ninereh*; and Layard, *Nin. and Bab.* p. 642), it would appear that there was much similarity between them and the palaces of Nineveh, if not in the exterior architecture, certainly in the interior decorations, such as the walls paneled or wainscoted with sawn stones, the sculptures on the slabs representing trees and plants, the remainder of the walls above the skirting painted with various colors and pictures, the figures of the winged cherubim carved "all the house round," and especially on the doorways, the ornaments of open flowers, pomegranates, and lilies (apparently corresponding exactly with the rosettes, pomegranates, and honeysuckle ornaments of the Assyrian bas-reliefs, Botta, *Mon. de Nin.*, and Layard, *Mon. of Nin.*), and the ceiling, roof, and beams of cedar-wood. The Jewish edifices were however very much inferior in size to the Assyrian. Of objects of art (if we may use the term) contained in the Temple we have the description of the pillars, of the brazen sea, and of various bronze or copper vessels. They were the work of Hiram, the son of a Phœnician artist by a Jewish woman of the tribe of Naphtali (1 K. vii. 14), a fact which gives us some insight into Phœnician art, and seems to show that the Jews had no art of their own, as Hiram was fetched from Tyre by Solomon. The Assyrian character of these objects is very remarkable. The two pillars and "chapiters" of brass had ornaments of lilies and pomegranates; the brazen sea was supported on oxen, and its rim was ornamented with flowers of lilies, whilst the bases were graven with lions, oxen, and cherubim on the vorders, and the plates of the ledges with cherubim, lions, and palm-trees. The vail of the Temple, of different colors, had also cherubim wrought upon it. (Cf. Layard, *Nin. and Bab.* woodcut, p. 588, in which a large vessel, probably of bronze or copper, is represented supported upon oxen, and *Mon. of Nin.*, series 2, pl. 60, 65, 68, — in which vessels with embossed rims apparently similar to those in Solomon's Temple are figured. Also series 1, pl. 8, 44, 48, in which embroideries with cherubim occur.)

The influence of Assyria to the eastward was even more considerable, extending far into Asia. The Persians copied their architecture (with such modifications as the climate and the building-materials at hand suggested), their sculpture, probably their painting and their mode of writing from the Assyrians. The ruined palaces of Persepolis show the same general plan of construction as those of Nineveh — the entrances formed by human-headed animals, the skirting of sculptured stone, and the inscribed slabs. The various religious emblems and the ornamentation have the same Assyrian character. In Persia, however, a stone architecture prevailed, and the columns in that material have resisted to this day the ravages of time.

The Persians made an advance in one respect upon Assyrian sculpture, and probably painting likewise, in an attempt at a natural representation of drapery by the introduction of folds, of which there is only the slightest indication on Assyrian monuments. It may have been partly through Persia that the influence of Assyrian art passed into Asia Minor and thence into Greece; but it had probably penetrated far into the former country long before the Persian domination. We find it strongly shown in the earliest monuments, as in those of Lycia and Phrygia, and in the archaic sculptures of Branchida. But the early art of Asia Minor still offers a most interesting field for investigation. Amongst the Assyrians, the arts were principally employed, as amongst all nations in their earlier stages of civilization, for religious and national purposes. The colossal figures at the doorways of the palaces were mythic combinations to denote the attributes of a deity. The "Man-Bull" and the "Man-Lion," are conjectured to be the gods "Nin" and "Nergal," presiding over war and the chase; the eagle-headed and fish-headed figures so constantly repeated in the sculptures, and as ornaments on vessels of metal, or in embroideries — Nisroch and Dagon. The bas-reliefs almost invariably record some deed of the king, as head of the nation, in war, and in combat with wild beasts, or his piety in erecting vast palace-temples to the gods. Hitherto no sculptures specially illustrating the private life of the Assyrians have been discovered, except one or two incidents, such as men baking bread or tending horses, introduced as mere accessories into the historical bas-reliefs. This may be partly owing to the fact that no traces whatever have yet been found of their burial-places, or even of their mode of dealing with the dead. It is chiefly upon the walls of tombs that the domestic life of the Egyptians has been so fully depicted. In the useful arts, as in the fine arts, the Assyrians had made a progress which denotes a very high state of civilization [ASSYRIA]. When the inscriptions have been fully examined and deciphered, it will probably be found that they had made no inconsiderable advance in the sciences, especially in astronomy, mathematics, numeration, and hydraulics. Although the site of Nineveh afforded no special advantages for commerce, and although she owed her greatness rather to her political position as the capital of the empire, yet, situated upon a navigable river communicating with the Euphrates and the Persian Gulf, she must have soon formed one of the great trading stations between that important inland sea, and Syria, and the Mediterranean, and must have become a depôt for the merchandise

applied to a great part of Asia Minor, Armenia, and Persia. Her merchants are described in Ezekiel (xxvii. 24) as trading in blue clothes and broided work (such as is probably represented in the sculptures), and in Nahum (iii. 16) as "multiplied above the stars of heaven." The animals represented on the black obelisk in the British Museum and on other monuments, the rhinoceros, the elephant, the double-humped camel, and various kinds of apes and monkeys, show a communication direct or indirect with the remotest parts of Asia. This intercourse with foreign nations, and the practice of carrying to Assyria as captives the skilled artists and workmen of conquered countries, must have contributed greatly to the improvement of Assyrian manufactures.

*Writing and Language.*—The ruins of Nineveh have furnished a vast collection of inscriptions partly carved on marble or stone slabs, and partly impressed upon bricks, and upon clay cylinders, or six-sided and eight-sided prisms, barrels, and tablets, which, used for the purpose when still moist, were afterwards baked in a furnace or kiln. (Cf. Ezekiel, iv. 1, "Take thee a tile . . . and portray upon it the city, even Jerusalem.") The cylinders are hollow, and appear, from the hole pierced through them, to have been mounted so as to turn round, and to present their several sides to the reader. The character employed was the arrow-headed or cuneiform—so called from each

letter being formed by marks or elements resembling an arrow-head or a wedge. This mode of writing, believed by some to be of Turanian or Scythic origin, prevailed throughout the provinces comprised in the Assyrian, Babylonian, and the eastern portion of the ancient Persian empires, from the earliest times to which any known record belongs, or at least twenty centuries before the Christian era, down to the period of the conquests of Alexander; after which epoch, although occasionally employed, it seems to have gradually fallen into disuse. It never extended into Syria, Arabia, or Asia Minor, although it was adopted in Armenia. A cursive writing resembling the ancient Syrian and Phœnician, and by some believed to be the original form of all other cursive writing used in Western Asia, including the Hebrew, appears to have also been occasionally employed in Assyria, probably for documents written on parchment or papyrus, or perhaps leather skins. The Assyrian cuneiform character was of the same class as the Babylonian, only differing from it in the less complicated nature of its forms. Although the primary elements in the later Persian and so-called Median cuneiform were the same, yet their combination and the value of the letters were quite distinct. The latter, indeed, is but a form of the Assyrian. Herodotus terms all cuneiform writing the "Assyrian writing" (Herod. iv. 87). This character may have been derived from some more ancient form of hieroglyphic writing; but if so, all traces of such origin have disappeared. The Assyrian and Babylonian alphabet (if the term may be applied to above 200 signs) is of the most complicated, imperfect, and arbitrary nature—some characters being phonetic, others syllabic, others ideographic;—the same character being frequently

used indifferently. This constitutes one of the principal difficulties in the process of decipherment. The investigation first commenced by Grotefend (Heeren, *Asiatic Nations*, vol. ii. App. 2) has since been carried on with much success by Sir H. Rawlinson, Dr Hincks, Mr. Norris, and Mr. Fox Talbot, in England, and by M. Oppert in France (see papers by those gentlemen in the *Journals of the Roy. As. Soc.*, in *Transactions of Royal Irish Academy*, in *Journal of Sacred Literature*, and in the *Athenæum*). Although considerable doubt may still reasonably prevail as to the interpretation of details, as to grammatical construction, and especially as to the rendering of proper names, sufficient progress has been made to enable the student to ascertain with some degree of confidence the general meaning and contents of an inscription. The people of Nineveh spoke a Semitic dialect, connected with the Hebrew and with the so-called Chaldee of the Books of Daniel and Ezra. This agrees with the testimony of the O. T. But it is asserted that there existed in Assyria, as well as in Babylonia, a more ancient tongue belonging to a

Specimen of the Arrow-headed or Cuneiform Writing

Turanian or Scythic race, which is supposed to have inhabited the plains watered by the Tigris and Euphrates long before the rise of the Assyrian empire, and from which the Assyrians derived their civilization and the greater part of their mythology. It was retained for sacred purposes by the conquering race, as the Latin was retained after the fall of the Roman Empire in the Catholic Church. In fragments of vocabularies discovered in the record-chamber at Kouyunjik words in the two languages are placed in parallel columns, whilst a centre column contains a monographic or ideographic sign representing both. A large number of Turanian words or roots are further supposed to have existed in the Assyrian tongue, and tablets apparently in that language have been discovered in the ruins. The monumental inscriptions occur on detached stelæ and obelisks, of which there are several specimens in the British Museum from the Assyrian ruins, and one in the Berlin Museum discovered in the island of Cyprus; on the colossal human-headed lions and bulls, upon parts not occupied by sculpture, as between the legs; on the sculptured slabs, generally in bands between two bas-reliefs, to which they seem to refer; and, as in Persia and Armenia, carved on the face of rocks in the hill-country. At Nimrod the same inscription is carved on nearly every slab in the N. W. palace, and generally repeated on the back, and even carried across the sculptured colossal figures. The Assyrian inscriptions usually contain the chronicles of the king who built or restored the edifice in which they are found, records of his wars and expeditions into distant countries, of the amount of tribute and spoil taken from conquered tribes, of the building of temples and palaces, and invocations to the gods of Assyria. Frequently every stone and kiln-burnt brick used in

a building bears the name and titles of the king, and generally those of his father and grandfather are added. These inscribed bricks are of the greatest value in restoring the royal dynasties. The longest inscription on stone, that from the N. W. palace of Nineveh containing the records of Sardanapalus II., has 325 lines, that on the black obelisk has 210. The most important hitherto discovered in connection with Biblical history, is that upon a pair of colossal human-headed bulls from Kouyunjik, now in the British Museum, containing the records of Sennacherib, and describing, amongst other events, his wars with Hezekiah. It is accompanied by a series of bas-reliefs believed to represent the siege and capture of Lachish (LACHISH; Layard, *Nin. and Bab.* pp. 148-153)

Sennacherib on his Throne before Lachish.

Jewish Captives from Lachish (Kouyunjik).

A long list might be given of Biblical names occurring in the Assyrian inscriptions (*id.* 626). Those of three Jewish kings have been read, Jehu son of Khumri (Omri), on the black obelisk (JAHU

Impressions of the Signets of the Kings of Assyria, and Egypt. (Original size.)

Part of Cartouche of Sabaco, enlarged from the impression of his Signet.

Layard, *Nin. and Bab.* p. 613), Menahem on a slab from the S. W. palace, Nimroud, now in the British Museum (*id.* 617), and Hezekiah in the Kouyunjik records. The most important inscribed terracotta cylinders are — those from Kalah Sherghat, with the annals of a king, whose name is believed to read Tiglath Pileser, not the same mentioned in the 2d Book of Kings, but an earlier monarch, who is supposed to have reigned about B. C. 1110 (Rawl. *Herod.* i. 457); those from Khorsabad containing the annals of Sargon; those from Kouyunjik, especially one known as Bellino's cylinder, with the chronicles of Sennacherib; that from Nebbi

Yunus with the records of Essarhaddon, and the fragments of three cylinders with those of his son. The longest inscription on a cylinder is of 820 lines. Such cylinders and inscribed slabs were generally buried beneath the foundations of great public buildings. Many fragments of cylinders and a vast collection of inscribed clay tablets, many in perfect preservation, and some bearing the impressions of seals, were discovered in a chamber at Kouyunjik, and are now deposited in the British Museum. They appear to include historical documents, vocabularies, astronomical and other calculations, directions for the performance of religious ceremonies, lists of the gods, their at

tributes, and the days appointed for their worship, descriptions of countries, lists of animals, graunts of lands, etc., etc. In this chamber was also found the piece of clay bearing the seal of the Egyptian king, So or Sabaco, and that of an Assyrian monarch, either Sennacherib or his son, probably affixed to a treaty between the two, which having been written on parchment or papyrus, had entirely perished (Layard, *Nin. and Bab.* p. 156).

The most important results may be expected when inscriptions so numerous and so varied in character are deciphered. A list of nineteen or twenty kings can already be compiled, and the annals of the greater number of them will probably be restored to the lost history of one of the most powerful empires of the ancient world, and of one which appears to have exercised perhaps greater influence than any other upon the subsequent condition and development of civilized man. [ASSYRIA.]

The only race now found near the ruins of Nineveh or in Assyria which may have any claim to be considered descendants from the ancient inhabitants of the country are the so-called Chaldean or Nestorian tribes, inhabiting the mountains of Kurdistan, the plains round the lake of Ooroomiyah in Persia, and a few villages in the neighborhood of Mosul. They still speak a Semitic dialect, almost identical with the Chaldee of the books of Daniel and Ezra. A resemblance, which may be but fanciful, has been traced between them and the representations of the Assyrians in the bas-reliefs. Their physical characteristics at any rate seem to mark them as of the same race. The inhabitants of this part of Asia have been exposed perhaps more than those of any other country in the world to the devastating inroads of stranger hordes. Conquering tribes of Arabs and of Tartars have more than once well-nigh exterminated the population which they found there, and have occupied their places. The few survivors from these terrible massacres have taken refuge in the mountain fastnesses, where they may still linger. A curse seems to hang over a land naturally rich and fertile, and capable of sustaining a vast number of human beings. Those who now inhabit it are yearly diminishing, and there seems no prospect that for generations to come this once-favored country should remain other than a wilderness.

(Layard's *Nineveh and its Remains*; *Nineveh and Babylon*; and *Monuments of Nineveh*, 1st and 2d series; Botta's *Monumens de Ninive*; Fergusson, *Palaces of Nineveh and Persepolis Restored*; Vaux's *Nineveh and Persepolis*.)

A. H. L.

\* We referred under NAHUM to some of the writers on the history and fall of Nineveh. We add here the names of a few others who treat of this subject, relying in part on Dr. Kleinert's catalogue mentioned under the above head. G. F. Grotefend, *Ueber Anlage u. Zerstörung der Gebäude Ninrud* (1851). J. Brandis, *Ueber den hist. Gewinn aus der Entzifferung der Assyrischen Inschriften* (1853). Gumpach, *Abriß der Assyrisch-babyl. Geschichte*. J. Olshausen, *Prüfung des Characters der in den Assyrischen Inschriften semit. Sprache*. F. A. and O. Strauss, *Länder u. Stätten der heil. Schrift*, § 861, p. 328 (1855). F. Spiegel, "Ninive" in Herzog's *Real-Encyk.* x. 361-381 (1858), and a supplementary article, under the same title, xx. 219-235 (1866). J. Oppert, *Chronologie des Assyriens et Babyloniens*. F.

Fresnel, *Expédition Scientifique en Mésopotamie, publiée par J. Oppert* (1858). Bonomi, *Nineveh and its Palaces* (1852), founded on Botta and Layard. W. K. Loftus, *Travels and Researches in Chulbea and Susiana* (1858). Dr. Pusey on Jonah, *Minor Prophets, with a Commentary*, Part iii. (1861). Dr. Spiegel speaks in his second article in a much stronger tone of confidence with regard to the success of the efforts which have been made to read the Assyrian inscriptions. He declares his belief that the deciphering of the Assyrian alphabet has been pursued hitherto on systematic and scientific principles; that there is good reason to hope that future studies will overcome any still remaining obstacles to a more perfect interpretation, and, in the mean time, that we may confide in the results already gained. It would be premature to expect this view to be universally accepted at present.

The cabinet of Amherst College contains some interesting antiquities from the ruins of Nineveh and Babylon. They are such as several mystic figures of Assyrian deities sculptured on alabaster slabs, taken from the palace of Sardanapalus (one of them eagle-headed, and supposed to be the NISROCH of Scripture, 2 K. xix. 37); a representation of Sardanapalus, armed as a warrior, and in the act of giving thanks for victory, with inscriptions which record his exploits; a winged human-headed lion; Sennacherib at the siege of Lachish (2 Chr. xxxii. 9); a fish-god, the head of the fish forming a mitre above the man; a sphinx, the body that of a lion, the face beardless, surmounted with a highly ornamented cap; a winged horse, the original type of the Greek Pegasus; a gryphon, the body that of a lion, with the wings and head of an eagle; and five bricks bearing inscriptions, among which are the names and titles of three successive kings. "All the slabs bear inscriptions, reading from left to right, which are precisely identical, and refer to the king who built the palace. They are written in the cuneiform character, which was the monumental writing of the Assyrians, while an entirely distinct form was used for private documents" (see *Guide to the Public Rooms and Cabinets of Amherst College*, Amh. 1863). H.

NINEVITES (*Ninevītai*): [Tisch. 8th ed. *Ninevītai*:] *Ninevite*. The inhabitants of Nineveh (Luke xi. 30).

NISAN. [MONTHS.]

NISROCH (נִסְרוֹךְ) [see below]: Μεσοροχ, Mai's ed. Ἐσροάχ; Alex. Εσροαχ [Comp. Μεσοροχ] in 2 K.; Νασαράχ [Alex. Ασαραχ] in Is.: *Nesroch*). The proper name of an idol of Nineveh, in whose temple Sennacherib was slipping when assassinated by his sons, Adrammelech and Sharezer (2 K. xix. 37; Is. xxxvii. 38). Selden confesses his ignorance of the deity denoted by this name (*de Dis Syris*, synt. ii. c. 10); but Beyer, in his *Addimenta* (pp. 323-325) has collected several conjectures. Jarchi, in his note on Is. xxxvii. 38, explains Nisroch as "a beam, or plank, of Noah's ark," from the analysis which is given of the word by Rabbinical expositors: (נִסְרוֹךְ = נִסְרוֹךְ). What the true ety-

a \* See the plate which probably represents this siege of Lachish as depicted on the monuments, vol. II. p. 1579. H

nology may be is extremely doubtful. If the origin of the word be Shemitic, it may be derived, as Gesenius suggests, from the Heb. נִיטְרָה, which is in Arab. *nitr*, "an eagle," with the termination *och* or *ich*, which is intensive in Persian,<sup>a</sup> so that Nisroch would signify "the great eagle" (comp. ΑΙΓΩΧΗ). But it must be confessed that this explanation is far from satisfactory. It is adopted, however, by Mr. Layard, who identifies with Nisroch the eagle-headed human figure, which is one of the most prominent on the earliest Assyrian monuments, and is always represented as contending with and conquering the lion or the bull (*Nineveh*, ii. 458, 459). In another passage he endeavors to reconcile the fact that Asshur was the supreme god of the Assyrians, as far as can be determined from the inscriptions, with the appearance of the name Nisroch as that of the chief god of Nineveh, by supposing that Sennacherib may have been slain in the temple of Asshur, and that the Hebrews, seeing everywhere the eagle-headed figure, "may have believed it to be that of the peculiar god of the Assyrians, to whom they consequently gave a name denoting an eagle" (*Nin. and Bib.* p. 637, note). Other explanations, based upon the same etymology, have been given: such as that suggested by Beyer (*Addit.* p. 324), that Nisroch denotes "Noah's eagle," that is "Noah's bird," that is "Noah's dove," the dove being an object of worship among the Assyrians (Lucian, *de Jov. trag.* c. 42); or that mentioned as more probable by Winer (*Reale.* s. v.), that it was the constellation Aquila, the eagle being in the Persian religion a symbol of Ormuzd. Parkhurst, deriving the word from the Chaldee root נִטְרָה, *serac* (which occurs in Dan. vi. in the form נִטְרָה, *sarcayyâ*, and is rendered in the A. V. "presidents"), conjectures that Nisroch may be the impersonation of the solar fire, and substantially identical with Molech and Mileom, which are both derived from a root similar in meaning to *serac*. Nothing, however, is certain with regard to Nisroch, except that these conjectures, one and all, are very little to be depended on. Sir H. Rawlinson says that Asshur had no temple at Nineveh in which Sennacherib could have been worshipping (Rawlinson, *Herod.* i. p. 590). He conjectures that Nisroch is not a genuine reading. Josephus has a curious variation. He says (*Ant.* x. 1, § 5) that Sennacherib was buried in his own temple called *Ανασσε* (ἐν τῷ ἰδίῳ ναφῷ Ἀράσκη λεγομένῳ).

W. A. W.

**NITRE** (נִיטְרָה, *nether*: ἔλκος, νίτρον: *nitrum*) occurs in Prov. xxv. 20, "As he that taketh away a garment in cold weather, and as vinegar upon *nether*, so is he that singeth songs to a heavy heart;" and in Jer. ii. 22, where it is said of sinful Judah, "though thou wash thee with *nether* and take thee much *borith* [SOAP], yet thine iniquity is marked before me." The substance denoted is not that which we now understand by the term *nitre*, i. e. nitrate of potassa — "saltpetre" — but the *νίτρον* or *λίτρον* of the Greeks, the *nitrum* of the Latins, and the *natron* or native carbonate of soda of modern chemistry. Much has been written on the subject of the nitrum

of the ancients; it will be enough to refer the reader to Beckmann, who (*History of Inventions* ii. 482, Bohn's ed.) has devoted a chapter to this subject, and to the authorities mentioned in the notes. It is uncertain at what time the English term *nitre* first came to be used for *saltpetre*, but our translators no doubt understood thereby the carbonate of soda, for *nitre* is so used by Holland in his translation of Pliny (xxxi. 10) in contradistinction to *salpetre*, which he gives as the marginal explanation of *aphronitrum*.

The latter part of the passage in Proverbs is well explained by Shaw, who says (*Trav.* ii. 387), "the unsuitableness of the singing of songs to a heavy heart is very finely compared to the contrariety there is between vinegar and natron." This is far preferable to the explanation given by Michaelis (*De Nitro Hebræor.* in *Commentat. Societ. Reg. prælect.* i. 166; and *Suppl. Lex. Heb.* p. 1704), that the simile alludes to the unpleasant smell arising from the admixture of the acid and alkali; it points rather to the extreme mental agitation produced by ill-timed mirth, the *grating* against the feelings, to make use of another metaphor. Natron was and is still used by the Egyptians for washing linen; the value of soda in this respect is well known; this explains Jer. l. c., "though thou wash thee with soda," etc. Hasselquist (*Trav.* p. 275) says that natron is dug out of a pit or mine near Mantura in Egypt, and is mixed with limestone and is of a whitish-brown color. The Egyptians use it, (1) to put into bread instead of yeast, (2) instead of soap, (3) as a cure for the toothache, being mixed with vinegar. Compare also Forskål (*Flor. Ægypt. Arab.* p. xlv.) who gives its Arabic names, *atrun* or *natrun*.

Natron is found abundantly in the well-known soda lakes of Egypt described by Pliny (xxxi. 10), and referred to by Strabo (xvii. A 1155, ed. Kramer), which are situated in the barren valley of *Bahr-bel-ma* (the Waterless Sea), about 50 miles W. of Cairo; the natron occurs in whitish or yellowish efflorescent crusts, or in beds three or four feet thick, and very hard (Volney, *Trav.* i. 15), which in the winter are covered with water about two feet deep; during the other nine months of the year the lakes are dry, at which period the natron is procured. (See Andréossi, *Mémoire sur la Vallée des Lacs de Natron*, in *Mém. sur l'Égypte*, ii. 276, &c.; Berthollet, *Observat. sur le Natron*, *ibid.* 310; *Descript. de l'Égypte*, xxi. 205.)

NO. [NO-AMON.]

**NOADIAH** (נְוָדִיָּה) [*whom Jehovah meets*]: *Noadia*: [Vat. *Noadia*: Alex. *Noada*:] *Noadiah*. 1. A Levite, son of Binnui, who with Meremoth, Eleazar, and Jozabad, weighed the vessels of gold and silver belonging to the Temple which were brought back from Babylon (Ezr. viii. 33). In 1 Esdr. viii. 63, he is called "Moeth the son of Sabban."

2. ([*Noadia*: FA. *Noadia*:] *Noadiah*.) The prophetess Noadiah joined Sanballat and Tobiah in their attempt to intimidate Nehemiah while rebuilding the wall of Jerusalem (Neh. vi. 14). She is only mentioned in Nehemiah's denunciation of his enemies, and is not prominent in the narrative.

NO'AH (נֹחַ) [*rest*, Ges.; or, *consolation*

<sup>a</sup> So he says in his *Thesaur.*, but in his *Jesaja* (i. 76) he correctly calls it a diminutive.

**Fürst**]: *Nōe*; Joseph. *Nōeos*: *Νοῦς*), the tenth in descent from Adam, in the line of Seth, was the son of Lamech, and grandson of Methuselah. Of his father Lamech all that we know is comprised in the words that he uttered on the birth of his son, words the more significant when we contrast them with the saying of the other Lamech of the race of Cain, which have also been preserved. The one exults in the discovery of weapons by which he may defend himself in case of need. The other, a tiller of the soil, mourns over the curse which rests on the ground, seeing in it evidently the consequence of sin. It is impossible to mistake the religious feeling which speaks of "the ground which *Jehovah* hath cursed." Not less evident is the bitter sense of weary and fruitless labor, mingled with better hopes for the future. We read that on the birth of a son "he called his name Noah, saying, This shall comfort us, for our work and labor of our hands, because of (or from) the ground which *Jehovah* hath cursed." Nothing can be more exquisitely true and natural than the way in which the old man's saddened heart turns fondly to his son. His own lot had been cast in evil times; "but this," he says, "shall comfort us." One hardly knows whether the sorrow or the hope predominates. Clearly there is an almost prophetic feeling in the name which he gives his son, and hence some Christian writers have seen in the language a prophecy of the Messiah, and have supposed that as Eve was mistaken on the birth of Cain, so Lamech in like manner was deceived in his hope of Noah. But there is no reason to infer from the language of the narrative that the hopes of either were of so definite a nature. The knowledge of a personal Deliverer was not vouchsafed till a much later period.

In the reason which Lamech gives for calling his son Noah, there is a play upon the name which it is impossible to preserve in English. He called his name Noah (נֹחַ, *Noach*, *rest*), saying, "this same shall comfort us" (נַחֲמֵנוּ, *yenachamēnū*). It is quite plain that the name "rest," and the verb "comfort," are of different roots; and we must not try to make a philologist of Lamech, and suppose that he was giving an accurate derivation of the name Noah. He merely plays upon the name, after a fashion common enough in all ages and countries.

Of Noah himself from this time we hear nothing more till he is 500 years old, when it is said he begot three sons, Shem, Ham, and Japhet.<sup>a</sup>

Very remarkable, however, is the glimpse which we get of the state of society in the antediluvian world. The narrative it is true is brief, and on many points obscure: a mystery hangs over it which we cannot penetrate. But some few facts are clear. The wickedness of the world is described

as having reached a desperate pitch, owing, it would seem, in a great measure to the fusion of two races which had hitherto been distinct. And further the marked features of the wickedness of the age were lust and brutal outrage. "They took them wives of all which they chose;" and, "the earth was filled with violence." "The earth was corrupt for all flesh had corrupted his way upon the earth." So far the picture is clear and vivid. But when we come to examine some of its details, we are left greatly at a loss. The narrative stands thus:

"And it came to pass when men (the Adam) began to multiply on the face of the ground and daughters were born unto them; then the sons of God (the Elohim) saw the daughters of men (the Adam) that they were fair, and they took to them wives of all that they chose. And *Jehovah* said, My spirit shall not for ever rule (or be humbled) in men, seeing that they are [or, in their error they are] but flesh, and their days shall be a hundred and twenty years. The Nephilim were in the earth in those days; and also afterwards when the sons of God (the Elohim) came in unto the daughters of men (the Adam), and children were born to them, these were the heroes which were of old, men of renown."

Here a number of perplexing questions present themselves: Who were the sons of God? Who the daughters of men? Who the Nephilim? What is the meaning of "My spirit shall not always rule, or dwell, or be humbled in men;" and of the words which follow, "But their days shall be a hundred and twenty years?"

We will briefly review the principal solutions which have been given of these difficulties.

a. Sons of God and daughters of men.

Three different interpretations have from very early times been given of this most singular passage.

1. The "sons of Elohim" were explained to mean sons of princes, or men of high rank (as in Ps. lxxxii. 6, *b'ne' Elyon*, sons of the Most High) who degraded themselves by contracting marriages with "the daughters of men," i. e. with women of inferior position. This interpretation was defended by Ps. xlix. 2, where "sons of men," *b'ne' adam*, means "men of low degree," as opposed to *b'ne' ish*, "men of high degree." Here, however, the opposition is with *b'ne' hu-Elohim*, and not with *b'ne' ish* and therefore the passages are not parallel. This is the interpretation of the Targum of Onkelos, following the oldest Palestinian Kabbala, of the later Targum, and of the Samaritan Vers. So also Symmachus, Saadia, and the Arabic of Erpenius, Aben Ezra, and R. Sol. Isaaki. In recent times this view has been elaborated and put in the most favorable light by Schiller (*Werke*, x. 401, &c.); but it has been entirely abandoned by every modern commentator of any note.

<sup>a</sup> In marked contrast with the simplicity and soberness of the Biblical narrative, is the wonderful story told of Noah's birth in the Book of Enoch. Lamech's wife, it is said, "brought forth a child, the flesh of which was white as snow and red as a rose. The hair of whose head was white like wool, and long; and whose eyes were beautiful. When he opened them he illuminated all the house like the sun. And when he was taken from the hand of the midwife, opening also his mouth, he spoke to the Lord of righteousness." Lamech is terrified at the prodigy, and goes to his father Mathusala and tells him that he has begotten a

son who is unlike other children. On hearing the story, Mathusala proceeds, at Lamech's entreaty, to consult Enoch, "whose residence is with the angels." Enoch explains that, in the days of his father Jared, "those who were from heaven disregarded the word of the Lord . . . laid aside their class and intermingled with women;" that consequently a deluge was to be sent upon the earth, whereby it should be "washed from all corruption;" that Noah and his children should be saved; and that his posterity should beget on the earth giants, not spiritual, but carnal (*Book of Enoch* ch. cv. p. 161-63).

2. A second interpretation, perhaps not less ancient, understands by the "sons of Elohim," angels. So some MSS. of the LXX., which according to Procopius and Augustine (*De Civit. Dei*, xv. 23), had the reading *ἄγγελοι τοῦ Θεοῦ*, whilst others had *υἱοὶ τοῦ Θεοῦ*, the last having been generally preferred since Cyril and Augustine; so Joseph. *Ant.* i. 3; Philo *De Gigantibus* (perhaps Aquila, who has *υἱοὶ τοῦ Θεοῦ*, of which, however, Jerome says, *Deos intelligens angelos sive sanctos*); the Book of Enoch as quoted by Georgius Syncellus in his *Chronographia*, where they are termed *οἱ ἐγγήγοροι*, "the watchers" (as in Daniel); the Book of Jubilees (translated by Dillmann from the Ethiopic); the later Jewish Hagada, whence we have the story of the fall of Shamehazai and Azazel,<sup>a</sup> given by Jellinek in the *Midrash Abchir*; and most of the older Fathers of the Church, finding probably in their Greek MSS. *ἄγγελοι τοῦ Θεοῦ*, as Justin, Tatian, Athenagoras, Clemens Alex., Tertullian, and Lactantius. This view, however, seemed in later times to be too monstrous to be entertained. R. Sim. b. Jochai anathematized it. Cyril calls it *ἑτοπώτατον*. Theodoret (*Quest. in Gen.*) declares the maintainers of it to have lost their senses, *ἐμβρόντητοι καὶ ὄγαν ἡλίθιοι*; Philastrius numbers it among heresies, Chrysostom among blasphemies. Finally, Calvin says of it, "Vetus illud commentum de angelorum concubitu cum mulieribus sua absurditate abunde refellitur, ac mirum est doctos viros tam crassis et prodigiis delirius fuisse olim fascinosos." Notwithstanding all which, however, many modern German commentators very strenuously assert this view. They rest their argument in favor of it mainly on these two particulars: first, that "sons of God" is every where else in the O. T. a name of the angels; and next, that St. Jude seems to lend the sanction of his authority to this interpretation. With regard to the first of these reasons, it is not even certain that in all other passages of Scripture where "the sons of God" are mentioned angels are meant. It is not absolutely necessary so to understand the designation either in Ps. xxix. 1 or lxxxix. 6, or even in Job i., ii. In any of these passages it might mean holy men. Job xxxviii. 7, and Dan. iii. 25, are the only places in which it certainly means angels. The argument from St. Jude is of more force; for he does compare the sin of the angels to that of Sodom and Gomorrah (*τούτοις* in ver. 7 must refer to the angels mentioned in ver. 6), as if it were of a like unnatural kind. And that this was the meaning of St. Jude is rendered the more probable when we recollect his quotation from the Book of Enoch where the same view is taken. Further, that the angels had the power of assuming a corporeal form seems clear from many parts of the O. T. All that can be urged in support of this view has been said by Delitzsch in his *Die Genesis ausgelegt*, and by Kurtz, *Gesch. des Alten Bundes*, and his treatise, *Die Ehen der Söhne Gottes*. And it must be confessed that their arguments are not without weight. The early existence of such an interpretation seems at any rate to indicate a starting-point for the heathen

<sup>a</sup> In *Eresh. Rab.* in Gen. vi. 2, this Azazel is declared to be the tutelary deity of women's ornaments and paint, and is identified with the Azazel in *Lev.* xvi. 8.

<sup>b</sup> Thomas Aquin. (pars i. qu. 51, art. 3) argues that it was possible for angels to have children by mortal women

mythologies. The fact, too, that from such an intercourse "the mighty men" were born, points in the same direction. The Greek "heroes" were sons of the gods; *οὐκ οἶσθα*, says Plato in the *Cratylus*, *ὅτι ἡμίθεοι οἱ ἥρώες; πάντες δὴπου γεγόνασιν ἐραβέντες ἢ θεῶς θνητῆς ἢ θνητοῦ θεῶς*. Ever Hesiod's account of the birth of the giants, monstrous and fantastic as it is, bears tokens of having originated in the same belief. In like manner it may be remarked that the stories of *incubi* and *succubi*, so commonly believed in the Middle Ages, and which even Heidegger (*Hist. Sacr.* i. 289) does not discredit, had reference to a commerce between demons and mortals of the same kind as that narrated in Genesis.<sup>c</sup>

Two modern poets, Byron (in his drama of *Cain*) and Moore (in his *Loves of the Angels*), have availed themselves of this last interpretation for the purpose of their poems.

3. The interpretation, however, which is now most generally received, is that which understands by "the sons of the Elohim" the family and descendants of Seth, and by "the daughters of man (Adam)," the women of the family of Cain. So the Clementine Recognitions interpret "the sons of the Elohim" as *Homines justi qui angelorum vixerant vitam*. So Ephrem, and the Christian Adam-Book of the East: so also, Theodoret, Chrysostom, Cyril of Alexandria, Jerome, Augustine, and others; and in later times Luther, Melancthon, Calvin, and a whole host of recent commentators. They all suppose that whereas the two lines of descent from Adam—the family of Seth who preserved their faith in God, and the family of Cain who lived only for this world—had hitherto kept distinct, now a mingling of the two races took place which resulted in the thorough corruption of the former, who falling away, plunged into the deepest abyss of wickedness, and that it was this universal corruption which provoked the judgment of the Flood.<sup>c</sup>

4. A fourth interpretation has recently been advanced and maintained with considerable ingenuity, by the author of the *Genesis of the Earth and Man*. He understands by "the sons of the Elohim" the "servants or worshippers of false gods" [taking Elohim to mean not God but gods], whom he supposes to have belonged to a distinct pre-Adamic race. "The daughters of men," he contends, should be rendered "the daughters of Adam, or the Adamites," women, that is, descended from Adam. These last had hitherto remained true in their faith and worship, but were now perverted by the idolaters who intermarried with them. But this hypothesis is opposed to the direct statements in the early chapters of Genesis, which plainly teach the descent of all mankind from one common source.

Whichever of these interpretations we adopt (the third perhaps is the most probable), one thing at least is clear, that the writer intends to describe a fusion of races hitherto distinct, and to connect with this two other facts: the one that the offspring of these mixed marriages were men remarkable for strength and prowess (which is only in accordance with what has often been observed since, namely, the superiority of the mixed race as compared with either of the parent stocks); the other

<sup>c</sup> \* Dr. Conant supports this explanation in a good note on Gen. vi. 2 (*Book of Genesis, with a Revised Version*, N. Y. 1868). H.

that the result of this intercourse was the thorough and hopeless corruption of both families alike.

b. But who were the Nephilim? It should be observed that they are not spoken of (as has sometimes been assumed) as the offspring of the "sons of the Elohim" and "the daughters of men." The sacred writer says, "the Nephilim were on the earth in those days," before he goes on to speak of the children of the mixed marriages. The name, which has been variously explained, only occurs once again in Num. xiii. 33, where the Nephilim are said to have been one of the Canaanitish tribes. They are there spoken of as "men of great stature," and hence probably the rendering *γίγαντες* of the LXX. and "the giants" of our A. V. But there is nothing in the word itself to justify this interpretation. If it is of Hebrew origin (which, however, may be doubted), it must mean either "fallen," i. e. apostate ones; or those who "fall upon" others, violent men, plunderers, freebooters, etc. It is of far more importance to observe that if the Nephilim of Canaan were descendants of the Nephilim in Gen. vi. 4, we have here a very strong argument for the non-universality of the Deluge. [GIANTS.]

c. In consequence of the grievous and hopeless wickedness of the world at this time, God resolves to destroy it. "My spirit," He says, "shall not always dwell" (LXX. Vulg. Saad.), or "bear sway," in man, inasmuch as he is but flesh. The meaning of which seems to be that whilst God had put his Spirit in man, i. e. not only the breath of life, but a spiritual part capable of recognizing, loving, and worshipping Him, man had so much sunk down into the lowest and most debasing of fleshly pleasures, as to have almost extinguished the higher light within him; as one of the Fathers says: *anima victu libidine fit caro*: the soul and spirit became transubstantiated into flesh. Then follows: "But his days shall be a hundred and twenty years," which has been interpreted by some to mean, that still a time of grace shall be given for repentance, namely, 120 years before the Flood shall come; and by others that the duration of human life should in future be limited to this term of years, instead of extending over centuries as before. This last seems the most natural interpretation of the Hebrew words. Of Noah's life during this age of almost universal apostasy we are told but little. It is merely said, that he was a righteous man and perfect in his generations (i. e. amongst his contemporaries), and that he, like Enoch, walked with God. This last expressive phrase is used of none other but these two only. To him God revealed his purpose to destroy the world, commanding him to prepare an ark for the saving of his house. And from that time till the day came for him to enter into the ark, we can hardly doubt that he was engaged in active, but as it proved unavailing efforts to win those about him from their wickedness and unbelief. Hence St. Peter calls him "a preacher of righteousness." Besides this we are merely told that he had three

sons, each of whom had married a wife; that he built the ark in accordance with Divine direction; and that he was 600 years old when the Flood came.

Both about the ark and the Flood so many questions have been raised, that we must consider each of these separately.

*The Ark.* — The precise meaning of the Hebrew word (אֲרוֹן, *tébbáh*) is uncertain. The word only occurs here and in the second chapter of Exodus, where it is used of the little papyrus boat in which the mother of Moses entrusted her child to the Nile. In all probability it is to the old Egyptian that we are to look for its original form.

Bunsen, in his vocabulary,<sup>a</sup> gives *tóv*, "a chest," *tpt*, "a boat," and in the Copt. Vers. of Ex. ii. 3,

5, ΘΗΒΩ is the rendering of *tébbáh*. The LXX. employ two different words. In the narrative of the Flood they use *κιβωτός*, and in that of Moses *θήβης*, or according to some MSS. *θηβή*. The Book of Wisdom has *σχεδία*; Berosus and Nicol. Damasc. quoted in Josephus, *πλοίων* and *λάραξ*. The last is also found in Lucian, *De Deá Syr.* c. 12. In the Sibylline Verses the ark is *δουράτειον δῶμα*, *οἶκος* and *κιβωτός*. The Targum and the Koran have each respectively given the Chaldee and the Arabic form of the Hebrew word.

This "chest," or "boat," was to be made of gopher (i. e. cypress) wood, a kind of timber which both for its lightness and its durability was employed by the Phœnicians for building their vessels. Alexander the Great, Arrian tells us (vii. 19), made use of it for the same purpose. The planks of the ark, after being put together, were to be protected by a coating of pitch, or rather bitumen

(רָפָשׁ, LXX. *ἄσφαλτος*), which was to be laid on both inside and outside, as the most effectual means of making it water-tight, and perhaps also as a protection against the attacks of marine animals. Next to the material, the method of construction is described. The ark was to consist of a number of "nests" (כַּנִּיִּי, or small compartments, with a view no doubt to the convenient distribution of the different animals and their food. These were to be arranged in three tiers, one above another; "with lower, second, and third (stories) shalt thou make it." Means were also to be provided for letting light into the ark. In the A. V. we read, "A window shalt thou make to the ark, and in a cubit shalt thou finish it above:" — words which it must be confessed convey no very intelligible idea. The original, however, is obscure, and has been differently interpreted. What the "window," or "light-hole" (רֶחֶץ, *tsóhar*) was, is very puzzling. It was to be at the top of the ark apparently. If the words "unto a cubit (אֶל-כַּוֵּז) shalt thou finish it above," refer to the window and not to the ark itself, they seem to imply that this aperture, or skylight, extended to the breadth of a cubit the whole length of the roof.<sup>b</sup> But if

<sup>a</sup> *Egypt's Place*, etc., i. 492.

<sup>b</sup> Knobel's explanation is different. By the words, "to a cubit (or within a cubit) shalt thou finish it above," he understands that the window being in the side of the ark, a space of a cubit was to be left between the top of the window and the overhanging roof of the ark which Noah removed after the flood had abated (viii. 13). There is, however, no reason to con-

clude, as he does, that there was only one light. The great objection to supposing that the window was in the side of the ark, is that then a great part of the interior must have been left in darkness. And again we are told (viii. 13), that when the Flood abated Noah removed the covering of the ark, to look about him to see if the earth were dry. This would have been unnecessary if the window had been in the side

so. it could not have been merely an open slit, for that would have admitted the rain. Are we then to suppose that some transparent, or at least translucent, substance was employed? It would almost seem so.<sup>a</sup> A different word is used in Gen. viii. 6, where it is said that Noah opened the window of the ark. There the word is  $\text{חַלּוֹן}$  (*challôn*), which frequently occurs elsewhere in the same sense. Certainly the story as there given does imply a transparent window as Saalschütz (*Archæol.* i. 311) has remarked.<sup>b</sup> For Noah could watch the motions of the birds outside, whilst at the same time he had to open the window in order to take them in. Supposing then the *tsôhar* to be, as we have said, a skylight, or series of skylights running the whole length of the ark (and the fem. form of the noun inclines one to regard it as a collective noun), the *challôn*<sup>c</sup> might very well be a single compartment of the larger window, which could be opened at will. But besides the window there was to be a door. This was to be placed in the side of the ark. "The door must have been of some size to admit the larger animals, for whose ingress it was mainly intended. It was no doubt above the highest draught mark of the ark, and the animals ascended to it probably by a sloping embankment. A door in the side is not more difficult to understand than the port holes in the sides of our vessels."<sup>d</sup>

Of the shape of the ark nothing is said; but its dimensions are given. It was to be 300 cubits in length, 50 in breadth, and 30 in height. Supposing the cubit here to be the cubit of natural measurement, reckoning from the elbow to the top of the middle finger, we may get a rough approximation as to the size of the ark. The cubit, so measured (called in Deut. iii. 11, "the cubit of a man"), must, of course, at first, like all natural measurements, have been inexact and fluctuating. In later times no doubt the Jews had a standard common cubit, as well as the royal cubit and sacred cubit. We shall probably, however, be near enough to the mark if we take the cubit here to be the common cubit, which was reckoned (according to Mich.,

Jahn, Gesen. and others) as equal to six hand breadths, the hand-breadth being  $3\frac{1}{2}$  inches. This therefore gives 21 inches for the cubit.<sup>e</sup> Accordingly the ark would be 525 feet in length, 87 feet 6 inches in breadth, and 52 feet 6 inches in height. This is very considerably larger than the largest British man-of-war. The Great Eastern, however, is both longer and deeper than the ark, being 680 feet in length (691 on deck), 83 in breadth, and 58 in depth. Solomon's Temple, the proportions of which are given in 1 K. vi. 2, was the same height as the ark, but only one-fifth of the length, and less than half the width.

It should be remembered that this huge structure was only intended to float on the water, and was not in the proper sense of the word a ship. It had neither mast, sail, nor rudder; it was in fact nothing but an enormous floating house, or oblong box rather, "as it is very likely," says Sir W. Raleigh, "that the ark had *fundum planum*, a flat bottom, and not rased in form of a ship, with a sharpness forward, to cut the waves for the better speed." The figure which is commonly given to it by painters, there can be no doubt is wrong. Two objects only were aimed at in its construction: the one was that it should have ample stowage, and the other that it should be able to keep steady upon the water. It was never intended to be carried to any great distance from the place where it was originally built. A curious proof of the suitability of the ark for the purpose for which it was intended was given by a Dutch merchant, Peter Jansen, the Meimonite, who in the year 1604 had a ship built at Hoorn of the same proportions (though of course not of the same size) as Noah's ark. It was 120 feet long, 20 broad, and 12 deep. This vessel, unsuitable as it was for quick voyages, was found remarkably well adapted for freightage.<sup>f</sup> It was calculated that it would hold a third more lading than other vessels without requiring more hands to work it. A similar experiment is also said to have been made in Denmark, where, according to Reyher, several vessels called "fluten" or floats were built after the model of the ark.

"Unto a cubit shalt thou finish it above" can hardly mean, as some have supposed, that the roof of the ark was to have this pitch; for, considering that the ark was to be 50 cubits in breadth, a roof of a cubit's pitch would have been almost flat.

<sup>a</sup> Symm. renders the word *διαφανές*. Theodoret has merely *θύραν*; Gr. Venet. *φωταγωγόν*; Vulg. *fenestram*. The LXX. translate, strangely enough, *ἐπισυνάγων ποιήσεις τὴν κιβωτὸν*. The root of the word indicates that the *tsôhar* was something *shining*. Hence probably the Talmudic explanation, that God told Noah to fix precious stones in the ark, that they might give as much light as midday (*Sanh.* 108 b).

<sup>b</sup> The only serious objection to this explanation is the supposed improbability of any substance like glass having been discovered at that early period of the world's history. But we must not forget that even according to the Hebrew chronology the world had been in existence 1556 years at the time of the Flood, and according to the LXX., which is the more probable, 2,262. Vast strides must have been made in knowledge and civilization in such a lapse of time. Arts and sciences may have reached a ripeness, of which the record, from its scantiness, conveys no adequate conception. The destruction caused by the Flood must have obliterated a thousand discoveries, and left men to recover again by slow and patient steps the ground they had lost.

<sup>c</sup> A different word from either of these is used in vii. 11 of the windows of heaven,  $\text{רְבֵּת}$ , 'arubbêth (from  $\text{רָבַב}$ , "to interweave"), lit. "net-works" or "gratings" (*Ges. Thes.* in v.).

<sup>d</sup> Kitto, *Bible Illustrations, Antediluvians*, etc., p. 142. The Jewish notion was that the ark was entered by means of a ladder. On the steps of this ladder, the story goes, Og, king of Bashan, was sitting when the Flood came; and on his pledging himself to Noah and his sons to be their slave forever, he was suffered to remain there, and Noah gave him his food each day out of a hole in the ark (*Pirke R. Eliezer*).

<sup>e</sup> See Winer, *Realw.* "Elle." Sir Walter Raleigh, in his *History of the World*, reckons the cubit at 15 inches. Dr. Kitto calls this a safe way of estimating the cubit in Scripture, but gives it himself as = 21.888 inches. For this inconsistency he is taken to task by Hugh Miller, who adopts the measurement of Sir W. Raleigh.

<sup>f</sup> Augustine (*De Civ. D.* lib. xv.) long ago discovered another excellence in the proportions of the ark; and that is, that they were the same as the proportions of the perfect human figure: the length of which from the sole to the crown is six times the width across the chest, and ten times the depth of the recumbent figure measured in a right line from the ground.

After having given Noah the necessary instructions for the building of the ark, God tells him the purpose for which it was designed. Now for the first time we hear how the threatened destruction was to be accomplished, as well as the provision which was to be made for the re-peopling of the earth with its various tribes of animals. The earth is to be destroyed by water. "And I, behold I do bring the flood (וַיַּבְרִיחַ) — waters upon the earth — to destroy all flesh wherein is the breath of life . . . but I will establish my covenant with thee, etc." (vi. 17, 18). The inmates of the ark are then specified. They are to be Noah and his wife, and his three sons with their wives: whence it is plain that he and his family had not yielded to the prevailing custom of polygamy. Noah is also to take a pair of each kind of animal into the ark with him that he may preserve them alive;

birds, domestic animals (בְּהֵמָה),<sup>a</sup> and creeping things are particularly mentioned. He is to provide for the wants of each of these stores "of every kind of food that is eaten." It is added, "Thus did Noah; according to all that God (Elohim) commanded him, so did he."

A remarkable addition to these directions occurs in the following chapter. The pairs of animals are now limited to one of *unclean* animals, whilst of *clean* animals and birds (ver. 2) Noah is to take to him seven pairs (or as others think, seven individuals, that is three pairs and one supernumerary male for sacrifice).<sup>b</sup> How is this addition to be accounted for? May we not suppose that we have here traces of a separate document interwoven by a later writer with the former history? The passage indeed has not, to all appearance, been incorporated intact, but there is a coloring about it which seems to indicate that Moses, or whoever put the Book of Genesis into its present shape, had here consulted a different narrative. The distinct use of the Divine names in the same phrase, vi. 22, and vii. 5 — in the former Elohim, in the latter Jehovah — suggests that this may have been the case.<sup>c</sup> It does not follow, however, from the mention of clean and unclean animals that this section reflects a Levitical or post-Mosaic mind and handling. There were sacrifices before Moses, and why may there not have been a distinction of clean and unclean animals? It may be true of many other things besides circumcision: Moses gave it you, not

because it was of Moses, but because it was of the fathers.

Are we then to understand that Noah literally conveyed a pair of all the animals of the world into the ark? This question virtually contains in it another, namely, whether the deluge was universal, or only partial? If it was only partial, then of course it was necessary to find room but for a comparatively small number of animals; and the dimensions of the ark are ample enough for the required purpose. The argument on this point has already been so well stated by Hugh Miller in his *Testimony of the Rocks*, that we need do little more than give an abstract of it here. After saying that it had for ages been a sort of stock problem to determine whether all the animals in the world by sevens, and by pairs, with food sufficient to serve them for a twelvemonth could have been accommodated in the given space, he quotes Sir W. Raleigh's calculation on the subject.<sup>d</sup> Sir Walter proposed to allow "for eighty-nine distinct species of beasts, or lest any should be omitted, for a hundred several kinds." He then by a curious sort of estimate, in which he considers "one elephant as equal to four beeves, one lion to two wolves," and so on, reckons that the space occupied by the different animals would be equivalent to the spaces required for 91 (or say 120) beeves, four score sheep, and three score and four wolves. "All these two hundred and eighty beasts" might be kept in one story, or room of the ark, in their several cabins; their meat in a second; the birds and their provision in a third, with space to spare for Noah and his family, and all their necessities." "Such," says Hugh Miller, "was the calculation of the great voyager Raleigh, a man who had a more practical acquaintance with *stowage* than perhaps any of the other writers who have speculated on the capabilities of the ark, and his estimate seems sober and judicious." He then goes on to show how enormously these limits are exceeded by our present knowledge of the extent of the animal kingdom. Buffon doubled Raleigh's number of distinct species. During the last thirty years so astonishing has been the progress of discovery, that of mammals alone there have been ascertained to exist more than eight times the number which Buffon gives. In the first edition of Johnston's *Physical Atlas* (1848), one thousand six hundred and twenty-six different species of

<sup>a</sup> Only tame animals of the larger kinds are expressly mentioned (vi. 20); and if we could be sure that none others were taken, the difficulties connected with the necessary provision, stowage, etc., would be materially lessened. It may, however, be urged that in the first instance "every living thing of all flesh" (vi. 19) was to come into the ark, and that afterwards (vii. 14) "every living thing" is spoken of not as including, but as distinct from the tame cattle, and that consequently the inference is that wild animals were meant.

<sup>b</sup> Calv., Ges., Tuch, Baumg., and Delitzsch, understand seven individuals of each species. Del. argues that, if we take שְׁבָעָה here to mean seven pairs, we must also take the שְׁנַיִם before to mean two pairs (and Origen does so take it, *cont. Cels.* iv. 41). But without arguing, with Knobel, that the repetition of the numeral in this case, and not in the other, may perhaps be designed to denote that here pairs are to be understood, at any rate the addition "male and his female" renders this the more probable interpretation.

<sup>c</sup> It is remarkable, moreover, that whilst in ver. 2 it is said, "Of every clean beast thou shalt take to thee by sevens," in vv. 8, 9, it is said, "Of clean beasts, and of beasts that are not clean," etc., "there went in two and two unto Noah into the ark." This again looks like a compilation from different sources.

<sup>d</sup> The earliest statement on the subject I have met with is in the Pirke R. Eliezer, where it is said that Noah took 32 kinds of birds, and 365 species of beasts, with him into the ark.

<sup>e</sup> Haldigger in like manner (*Hist. Sacr.* i. 518) thinks he is very liberal in allowing 300 kinds of animals to have been taken into the ark, and considers that this would give 50 cubits of solid contents for each kind of animal. He then subjoins the far more elaborate and really very curious computation of Joh. Temerarius in his *Chronol. Demonstr.*, who reckons after Sir W. Raleigh's fashion, but enumerates all the different species of known animals (amongst which he mentions Pegasi, Sphinxes, and Satyrs), the kind and quantity of provision, the method of stowage, &c. See Haldigger, as above, pp. 506, 507, and 518-521

mammals are enumerated; and in the second edition (1856) one thousand six hundred and fifty-eight species. To these we must add the six thousand two hundred and sixty-six birds of Lesson, and the six hundred and fifty-seven or (subtracting the sea-snakes, and perhaps the turtles) the six hundred and forty-two reptiles of Charles Bonaparte.

Take the case of the *clean* animals alone, of which there were to be seven introduced into the ark. Admitting, for argument sake, that only seven individuals, and not seven pairs, were introduced, the number of these alone, as now known, is sufficient to settle the question. Mr. Waterhouse, in the year 1856, estimated the oxen at twenty species; the sheep at twenty-seven species; the goats at twenty; and the deer at fifty-one. "In short, if, excluding the lambs and the musks as doubtfully *clean*, tried by the Mosaic test, we but add to the sheep, goats, deer, and cattle, the forty-eight species of unequivocally *clean* antelopes, and multiply the whole by seven, we shall have as the result a sum total of one thousand one hundred and sixty-two individuals, a number more than four times greater than that for which Raleigh made provision in the ark." It would be curious to ascertain what number of animals could possibly be stowed, together with sufficient food to last for a twelvemonth, on board the Great Eastern.

But it is not only the inadequate size of the ark to contain all, or anything like all, the progenitors of our existing species of animals, which is conclusive against a universal deluge.<sup>a</sup> Another fact points with still greater force, if possible, in the same direction, and that is the manner in which we now find these animals distributed over the earth's surface. "Linneus held, early in the last century, that all creatures which now inhabit the globe had proceeded originally from some such common centre as the ark might have furnished; but no zoologist acquainted with the distribution of species can acquiesce in any such conclusion now. We now know that every great continent has its own peculiar fauna; that the original centres of distribution must have been not one, but many; further, that the areas or circles around these centres must have been occupied by their pristine animals in ages long anterior to that of the Noachian Deluge; nay that in even the latter geologic ages they were preceded in them by animals of the same general type." Thus, for instance, the animals of South America, when the Spaniards first penetrated into it, were found to be totally distinct from those of Europe, Asia, or Africa. The puma, the jaguar, the tapir, the lama, the sloths, the armadillos, the opossums, were animals which had never been seen elsewhere. So again Australia has a whole class of animals, the marsupials, quite unknown to other parts of the world. The various species of kangaroo, phascolumys, dasyurus, and perameles, the flying phalangers, and other no less singular creatures, were the astonishment of naturalists when this continent was first discovered. New Zealand likewise, "though singularly devoid of indigenous mammals and reptiles . . . has a scarcely less remarkable fauna than either of these great continents. It consists almost exclusively of birds, some of them so ill provided

with wings, that, like the *wika* of the natives, they can only run along the ground." And what is very remarkable, this law with regard to the distribution of animals does not date merely from the human period. We find the gigantic forms of those different species which during the later tertiary epochs preceded or accompanied the existing forms, occupying precisely the same habitats. In S. America, for instance, there lived then, side by side, the gigantic sloth (megatherium) to be seen in the British Museum, and the smaller animal of the same species which has survived the extinction of the larger. Australia in like manner had then its gigantic marsupials, the very counterpart in everything but in size of the existing species. And not only are the same mammals found in the same localities, but they are surrounded in every respect by the same circumstances, and exist in company with the same birds, the same insects, the same plants. In fact so stable is this law that, although prior to the pleistocene period we find a different distribution of animals, we still find each separate locality distinguished by its own species both of fauna and of flora, and we find these grouped together in the same manner as in the later periods. It is quite plain, then, that if all the animals of the world were literally gathered together in the ark and so saved from the waters of a universal deluge, this could only have been effected (even supposing there was space for them in the ark) by a most stupendous miracle. The sloth and the armadillo must have been brought across oceans and continents from their South American home, the kangaroo from his Australian forests and prairies, and the polar bear from his icebergs, to that part of Armenia, or the Euphrates Valley, where the ark was built. These and all the other animals must have been brought in perfect subjection to Noah, and many of them must have been taught to forget their native ferocity in order to prevent their attacking one another. They must then further, having been brought by supernatural means from the regions which they occupied, have likewise been carried back to the same spots by supernatural means, care having moreover been taken that no trace of their passage to and fro should be left.

But the narrative does not compel us to adopt so tremendous an hypothesis. We shall see more clearly when we come to consider the language used with regard to the Flood itself, that even that language, strong as it undoubtedly is, does not oblige us to suppose that the Deluge was universal. But neither does the language employed with regard to the animals lead to this conclusion. It is true that Noah is told to take two "of every living thing of all flesh," but that could only mean two of every animal *then known* to him, unless we suppose him to have had supernatural information in zoölogy imparted — a thing quite incredible. In fact, but for some misconceptions as to the meaning of certain expressions, no one would ever have suspected that Noah's knowledge, or the knowledge of the writer of the narrative, could have extended beyond a very limited portion of the globe.

Again, how were the carnivorous animals supplied with food during their twelve months' abode in the ark? This would have been difficult ever

<sup>a</sup> \* This argument against the universality of the Deluge is valid, of course, only against those who deny

the propagation of "existing species" from the genera or types. K.

for the very limited number of wild animals in Noah's immediate neighborhood. For the very large numbers which the theory of a universal Deluge supposes, it would have been quite impossible, unless again we have recourse to miracle, and either maintain that they were miraculously supplied with food, or that for the time being the nature of their teeth and stomach was changed, so that they were able to live on vegetables. But these hypotheses are so extravagant, and so utterly unsupported by the narrative itself, that they may be safely dismissed without further comment.

*The Flood.* — The ark was finished, and all its living freight was gathered into it as in a place of safety. Jehovah shut him in, says the chronicler, speaking of Noah. And then there ensued a solemn pause of seven days before the threatened destruction was let loose. At last the Flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description which in a modern historian or poet would have occupied the largest space. We see nothing of the death-struggle; we hear not the cry of despair; we are not called upon to witness the frantic agony of husband and wife, and parent and child, as they fled in terror before the rising waters. Nor is a word said of the sadness of the one righteous man who, safe himself, looked upon the destruction which he could not avert. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. This is heightened by the contrast and repetition of two ideas. On the one hand we are reminded no less than six times in the narrative in cc. vi., vii., viii., who the tenants of the ark were (vi. 18-21, vii. 1-3, 7-9, 13-16, viii. 16, 17, 18, 19), the favored and rescued few; and on the other hand the total and absolute blotting out of everything else is not less emphatically dwelt upon (vi. 13, 17, vii. 4, 21-23). This evidently designed contrast may especially be traced in ch. vii. First, we read in ver. 6, "And Noah was six hundred years old when the flood came — waters upon the earth." Then follows an account of Noah and his family and the animals entering into the ark. Next, verses 10-12 resume the subject of ver. 7: "And it came to pass after seven days that the waters of the flood were upon the earth. In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month, on the self-same day were all the fountains of the great deep broken up, and the windows (or flood-gates) of heaven were opened. And the rain was upon the earth forty days and forty nights." Again the narrative returns to Noah and his companions and their safety in the ark (vv. 13-16). And then in ver. 17 the words of ver. 12 are resumed, and from thence to the end of the chapter a very simple but very powerful and impressive descrip-

tion is given of the appalling catastrophe: "And the flood was forty days upon the earth; and the waters increased and bare up the ark, and it was lifted up from off the earth. And the waters prevailed and increased exceedingly upon the earth: and the ark went on the face of the waters. And the waters prevailed very exceedingly upon the earth, and all the high mountains which [were] under the whole heaven were covered. Fifteen cubits upwards did the waters prevail, and the mountains were covered. And all flesh died which moveth upon the earth, of fowl, and of cattle, and of wild beasts, and of every creeping thing which creepeth upon the earth, and every man. All in whose nostrils was the breath of life, of all that was in the dry land, died. And every substance which was on the face of the ground was blotted out, as well man as cattle and creeping thing and fowl of the heaven: they were blotted out from the earth, and Noah only was left, and they that were with him in the ark. And the waters prevailed on the earth a hundred and fifty days."

The waters of the Flood increased for a period of 190 days (40+150, comparing vii. 12 and 24). And then "God remembered Noah," and made a wind to pass over the earth, so that the waters were assuaged. The ark rested on the seventeenth day of the seventh month<sup>a</sup> on the mountains of Ararat. After this the waters gradually decreased till the first day of the tenth month, when the tops of the mountains were seen. It was then that Noah sent forth, first, the raven,<sup>b</sup> which flew hither and thither, resting probably on the mountain-tops, but not returning to the ark; and next, after an interval of seven days (cf. viii. 10) the dove, "to see if the waters were abated from the ground" (*i. e.* the lower plain country). "But the dove," it is beautifully said, "found no rest for the sole of her foot, and she returned unto him into the ark." After waiting for another seven days he again sent forth the dove, which returned this time

with a fresh (רִיחֵ) olive-leaf in her mouth, a sign that the waters were still lower.<sup>c</sup> And once more, after another interval of seven days, he sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. No picture in natural history was ever drawn with more exquisite beauty and fidelity than this: it is admirable alike for its poetry and its truth.

On reading this narrative it is difficult, it must be confessed, to reconcile the language employed with the hypothesis of a partial deluge. The difficulty does not lie in the largeness of most of the terms used, but rather in the precision of one single expression. It is natural to suppose that the writer, when he speaks of "all flesh," "all in whose nostrils was the breath of life," refers

<sup>a</sup> It is impossible to say how this reckoning of time was made, and whether a lunar or solar year is meant. Much ingenuity has been expended on this question (see Delitzsch's *Comment.*), but with no satisfactory results.

<sup>b</sup> The raven was supposed to foretell changes in the weather both by its flight and its cry (*Eilian, H. A. vii. 7; Virg. Georg. i. 382, 410*). According to Jewish tradition, the raven was preserved in the ark in order to be the progenitor of the birds which afterwards fed Elijah by the brook Cherith.

<sup>c</sup> The olive-tree is an evergreen, and seems to have the power of living under water, according to Theophrastus (*Hist. Plant. iv. 8*) and Pliny (*H. N. xiii. 50*), who mention olive-trees in the Red Sea. The olive grows in Armenia, but only in the valleys on the south side of Ararat, not on the slopes of the mountain. It will not flourish at an elevation where even the mulberry, walnut, and apricot are found (*Bitter Erdkunde, x. 920*).

only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended. Thus, for instance, it is said that "all countries came into Egypt to Joseph to buy corn;" and that "a decree went out from Caesar Augustus that all the world should be taxed." In these and many similar passages the expressions of the writer are obviously not to be taken in an exactly literal sense. Even the apparently very distinct phrase "all the high hills that were under the whole heaven were covered" may be matched by another precisely similar, where it is said that God would put the fear and the dread of Israel upon every nation under heaven. It requires no effort to see that such language is framed with a kind of poetic breadth. The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the sea [ARARAT], it would have been quite impossible for this to have been covered, the water reaching 15 cubits, i. e. 26 feet above it, unless the whole earth were submerged. The author of the *Genesis of the Earth*, etc., has endeavored to escape this difficulty by shifting the scene of the catastrophe to the low country on the banks of the Tigris and Euphrates (a miraculous overflow of these rivers being sufficient to account for the Deluge), and supposing that the "fifteen cubits upward" are to be reckoned, not from the top of the mountains, but from the surface of the plain. By "the high hills" he thinks may be meant only slight elevations, called "high" because they were the highest parts overflowed. But fifteen cubits is only a little more than twenty-six feet, and it seems absurd to suppose that such trifling elevations are described as "all the high hills under the whole heaven." At this rate the ark itself must have been twice the height of the highest mountain. The plain meaning of the narrative is, that far as the eye could sweep, not a solitary mountain reared its head above the waste of waters. On the other hand, there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain-range, such as the Zagros range for instance, may be intended. And in the absence of all geographical certainty in the matter it is better to adopt some such explanation of the difficulty. Indeed it is out of the question to imagine that the ark rested on the top of a mountain which is covered for 4,000 feet from the summit with perpetual snow, and the descent from which would have been a very serious matter both to men and other animals. The local tradition, according to which fragments of the ark are still believed to remain on the summit, can weigh nothing when balanced against so extreme an improbability. Assuming, then, that the Ararat here mentioned is not the mountain of that name in Armenia, we may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian Gulf, or further. As the

inundation is said to have been caused by the breaking up of the fountains of the great deep, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an irush of the waters of the Persian Gulf, similar to what occurred in the Rynn of Cutch, on the eastern arm of the Indus, in 1819 when the sea flowed in, and in a few hours converted a tract of land, 2,000 square miles in area, into an inland sea or lagoon (see the account of this subsidence of the Delta of the Indus in Lyell's *Principles of Geology*, pp. 460-63).

It has sometimes been asserted that the facts of geology are conclusive against the possibility of a universal deluge. Formerly, indeed, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth of the Scripture narrative. And so troublesome and inconvenient a proof did it seem to Voltaire, that he attempted to account for the existence of fossil shells by arguing that either they were those of fresh-water lakes and rivers evaporated during dry seasons, or of land-snails developed in unusual abundance during wet ones; or that they were shells that had been dropped from the hats of pilgrims on their way from the Holy Land to their own homes; or in the case of the ammonites, that they were petrified reptiles. It speaks ill for the state of science that such arguments could be advanced, on the one side for, and on the other against, the universality of the Deluge. And this is the more extraordinary — and the fact shows how very slowly, where prejudices stand in the way, the soundest reasoning will be listened to — when we remember that so early as the year 1517 an Italian named Fracastoro had demonstrated the untenableness of the vulgar belief which associated these fossil remains with the Mosaic Deluge. "That inundation," he observed, "was too transient; it consisted principally of fluviatile waters; and if it had transported shells to great distances, must have strewn them over the surface, not buried them at vast depths in the interior of mountains. . . . But the clear and philosophical views of Fracastoro were disregarded, and the talent and argumentative powers of the learned were doomed for three centuries to be wasted in the discussion of these two simple and preliminary questions: first, whether fossil remains had ever belonged to living creatures: and secondly, whether, if this be admitted, all the phenomena could not be explained by the Deluge of Noah" Lyell, *Principles of Geology*, p. 20, 9th ed.). Even within the last thirty years geologists, like Cuvier and Buckland, have thought that the *superficial deposits* might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousands of years before the time of Noah, and indeed before the creation of man. Hence the geologic diluvium is to be carefully distinguished from the historic. And although, singularly enough, the latest discoveries give some support to the opinion that man may have been in existence during the formation of the drift,<sup>a</sup> yet even then that formation could not have

<sup>a</sup> In a valuable paper by Mr. Joseph Prestwich recently published in the *Philosophical Transactions*, it is suggested that in all probability the origin of man

will have to be thrown back into a greatly earlier antiquity than that usually assigned to it, but the pleistocene deposits to be brought down to a much more

resulted from a mere temporary submersion like that of the Mosaic Deluge, but must have been the effect of causes in operation for ages. So far then, it is clear, there is no evidence now on the earth's surface in favor of a universal Deluge.

But is there any positive geological evidence against it? Hugh Miller and other geologists have maintained that there is. They appeal to the fact that in various parts of the world, such as Auvergne in France, and along the flanks of *Ætna*, there are cones of loose scoriæ and ashes belonging to long extinct volcanoes, which must be at least triple the antiquity of the Noachian Deluge, and which yet exhibit no traces of abrasion by the action of water. These loose cones, they argue, must have been swept away had the water of the Deluge ever reached them. But this argument is by no means conclusive. The heaps of scoriæ are, we have been assured by careful scientific observers, not of that loose incoherent kind which they suppose. And it would have been quite possible for a gradually advancing inundation to have submerged these, and then gradually to have retired without leaving any mark of its action. Indeed, although there is no proof that the whole world ever was submerged at one time, and although, arguing from the observed facts of the geological cataclysms, we should be disposed to regard such an event as in the highest degree improbable, it cannot, on geological grounds alone, be pronounced impossible. The water of the globe is to the land in the proportion of three-fifths to two-fifths. There already existed therefore, in the different seas and lakes, water sufficient to cover the whole earth. And the whole earth might have been submerged for a twelvemonth, as stated in Genesis, or even for a much longer period, without any trace of such submersion being now discernible.

There is, however, other evidence conclusive against the hypothesis of a universal deluge, miracle apart. "The first effect of the covering of the whole globe with water would be a complete change in its climate, the general tendency being to lower and equalize the temperature of all parts of its surface. *Pari passu* with this process . . . would ensue the destruction of the great majority of marine animals. And this would take place, partly by reason of the entire change in climatal conditions, too sudden and general to be escaped by migration; and, in still greater measure, in consequence of the sudden change in the depth of the water. Great multitudes of marine animals can only live between tide-marks, or at depths less than fifty fathoms; and as by the hypothesis the land had to be depressed many thousands of feet in a few months, and to be raised again with equal celerity, it follows that the animals could not possibly have accommodated themselves to such vast and rapid changes. All the littoral animals, therefore, would have been killed. The race of acorn-shells and periwinkles would have been exterminated, and all the coral-reefs of the Pacific would at once have been converted into dead coral, never to grow again. But so far is this from being the case, that acorn-shells, periwinkles, and coral still survive, and there is good evidence that they have continued to exist and flourish for many thousands of years. On the other hand Noah was not directed to take marine animals of any kind into the ark, nor indeed is it ~~easy~~ to see how they could have been preserved.

recent period, geologically speaking, than geologists have hitherto allowed.

"Again, had the whole globe been submerged, the sea-water covering the land would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind has occurred.

"Lastly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture.

"There are, then, it must be confessed, very strong grounds for believing that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local: suppose, for instance, the valley of the Euphrates to have been submerged; and then the necessity for preserving all the species of animals disappears. For, in the first place, there was nothing to prevent the birds and many of the large mammals from getting away; and in the next, the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insignificant."

All these considerations point with overwhelming force in the same direction, and compel us to believe, unless we suppose that a stupendous miracle was wrought, that the Flood of Noah (like other deluges of which we read) extended only over a limited area of the globe.

It now only remains to notice the later allusions to the catastrophe occurring in the Bible, and the traditions of it preserved in other nations besides the Jewish.

The word specially used to designate the Flood of Noah (הַמַּבּוּל *hummabbûl*) occurs in only one other passage of Scripture, Ps. xxix. 10. The poet there sings of the Majesty of God as seen in the storm. It is not improbable that the heavy rain accompanying the thunder and lightning had been such as to swell the torrents, and perhaps cause a partial inundation. This carried back his thoughts to the Great Flood of which he had often read, and he sang, "Jehovah sat as king at the Flood," and looking up at the clear face of the sky, and on the freshness and glory of nature around him, he added, "and Jehovah remaineth a king for ever." In Is. liv. 9, the Flood is spoken of as "the waters of Noah." God Himself appeals to his promise made after the Flood as a pledge of his faithfulness to Israel: "For this is as the waters of Noah unto Me: for as I have sworn that the waters of Noah should no more go over the earth; so have I sworn that I would not be wroth with thee nor rebuke thee."

In the N. T. our Lord gives the sanction of his own authority to the historical truth of the narrative, Matt. xxiv. 37 (cf. Luke xvii. 26), declaring that the state of the world at his Second Coming shall be such as it was in the days of Noah. St. Peter speaks of the "long suffering of God," which "waited in the days of Noah while the ark was a preparing, wherein few, that is, eight souls were saved by water," and sees in the waters of the Flood by which the ark was borne up a type of Baptism, by which the Church is separated

from the world. And again, in his Second Epistle (ii. 5), he cites it as an instance of the righteous judgment of God who spared not the old world, etc.

The traditions of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, whence they were carried by the different families of men as they wandered east and west, or whether they were of national growth, and embody merely records of catastrophes, such as especially in mountainous countries are of no rare occurrence. In some instances no doubt the resemblances between the heathen and the Jewish stories are so striking as to render it morally certain that the former were borrowed from the latter. We find, indeed, a mythological element, the absence of all moral purpose, and a national and local coloring, but, discernible amongst these, undoubted features of the primitive history. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost amongst these is the Chaldean. It is preserved in a Fragment of Berosus, and is as follows: "After the death of Ardates, his son Xisuthrus reigned eighteen sari. In his time happened a great Deluge: the history of which is thus described. The Deity Kronos appeared to him in a vision, and warned him that on the 15th day of the month Dæsius there would be a flood by which mankind would be destroyed. He therefore enjoined him to write a history of the beginning, course, and end of all things; and to put on board food and drink, together with different animals, birds, and quadrupeds; and as soon as he had made all arrangements, to commit himself to the deep. Having asked the Deity whither he was to sail? he was answered, 'To the gods, after having offered a prayer for the good of mankind.' Whereupon, not being disobedient (to the heavenly vision), he built a vessel five stadia in length, and two in breadth. Into this he put everything which he had prepared, and embarked in it his wife, his children, and his personal friends. After the flood had been upon the earth and was in time abated, Xisuthrus sent out some birds from the vessel, which not finding any food, nor any place where they could rest, returned thither. After an interval of some days Xisuthrus sent out the birds a second time, and now they returned to the ship with mud on their feet. A third time he repeated the experiment and then they returned no more: whence Xisuthrus judged that the earth was visible above the waters; and accordingly he made an opening in the vessel (?), and seeing that it was stranded upon the site of a certain mountain, he quitted it with his wife and daughter, and the pilot. Having then paid his adoration to the earth, and having built an altar and offered sacrifices to the gods, he, together with those who had left the vessel with him, disappeared. Those who had remained behind, when they found that Xisuthrus and his companions did not return, in their turn left the vessel and began to look for him, calling him by his name. Him they saw no more, but a voice came to them from heaven, bidding them lead pious lives, and so join him who was gone to live with the gods; and further informing them that

his wife, his daughter, and the pilot had shared the same honor. It told them, moreover, that they should return to Babylon, and how it was ordained that they should take up the writings that had been buried in Sippara and impart them to mankind, and that the country where they then were was the land of Armenia. The rest having heard these words, offered sacrifices to the gods, and taking a circuit journeyed to Babylon. The vessel being thus stranded in Armenia, some part of it still remains in the mountains of the Corcyreans (or Cordyceans, *i. e.* the Kurds or Kurdistan) in Armenia; and the people scrape off the bitumen from the vessel and make use of it by way of charms. Now, when those of whom we have spoken returned to Babylon, they dug up the writings which had been buried at Sippara; they also founded many cities and built temples, and thus the country of Babylon became inhabited again" (Cory's *Ancient Fragments*,<sup>a</sup> pp. 26-29). Another version abridged, but substantially the same, is given from Abydenus (*Ibid.* pp. 33, 34). The version of Eupolemus (quoted by Eusebius, *Præp. Evang.* x. 9) is curious: "The city of Babylon," he says, "owes its foundation to those who were saved from the Deluge; they were giants, and they built the tower celebrated in history." Other notices of a Flood may be found (a) in the Phœnician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned (see the quotation from Sanehoniathon in Cory, as above, p. 13): (b) in the Sibylline Oracles, partly borrowed no doubt from the Biblical narrative, and partly perhaps from some Babylonian story. In these mention is made of the Deluge, after which Kronos, Titan, and Japetus ruled the world, each taking a separate portion for himself, and remaining at peace till after the death of Noah, when Kronos and Titan engaged in war with one another (*Ib.* p. 52). To these must be added (c) the Phrygian story of king Annakos or Nannakos (Enoch) in Iconium, who reached an age of more than 300 years, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. Very curious, as showing what deep root this tradition must have taken in the country, is the fact that so late as the time of Septimius Severus, a medal was struck at Apamea,

Coin of Apamea in Phrygia, representing the Deluge on which the Flood is commemorated. "The city is known to have been formerly called *Kibôtos* or 'the Ark;' and it is also known that the coins of cities in that age exhibited some leading point in their mythological history. The medal in ques-

<sup>a</sup> We have here and there made an alteration, where the translator seemed to us not quite to have caught the meaning of the original.

son represents a kind of square vessel floating in the water. Through an opening in it are seen two persons, a man and a woman. Upon the top of this chest or ark is perched a bird, whilst another flies toward it carrying a branch between its feet. Before the vessel are represented the same pair as having just quitted it, and got upon the dry land. Singularly enough, too on some specimens of this medal the letters NQ, or NQE, have been found on the vessel, as in the annexed cut. (See Eckhel iii. 132, 133; Wiseman, *Lectures on Science and Revealed Religion*, ii. 128, 129.) This fact is no doubt remarkable, but too much stress must not be laid upon it; for, making full allowance for the local tradition as having occasioned it, we must not forget the influence which the Biblical account would have in modifying the native story.

As belonging to this cycle of tradition, must be reckoned also (1) the Syrian, related by Lucian (*De Deâ Syriâ*, c. 13), and connected with a huge chasm in the earth near Hieropolis into which the waters of the Flood are supposed to have drained; and (2) the Armenian, quoted by Josephus (*Ant.* i. 3) from Nicolaus Damascenus, who flourished about the age of Augustus. He says: "There is above Minyas in the land of Armenia, a great mountain, which is called Baris [*i. e.* a ship], to which it is said that many persons fled at the time of the Deluge, and so were saved; and that one in particular was carried thither upon an ark (*ἐπὶ λάρνακος*), and was landed upon its summit; and that the remains of the vessel's planks and timbers were long preserved upon the mountain. Perhaps this was the same person of whom Moses the Legislator of the Jews wrote an account."

A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian is mixed up with its cosmogony, and hence loses anything like an historical aspect. "The world having been corrupted by Ahriman, it was necessary to bring over it a universal flood of water that all impurity might be washed away. The rain came down in drops as large as the head of a bull; the earth was under water to the height of a man, and the creatures of Ahriman were destroyed."

The Chinese story is, in many respects, singularly like the Biblical, according to the Jesuit M. Martinius, who says that the Chinese computed it to have taken place 4,000 years before the Christian era. Fâh-he, the reputed author of Chinese civilization, is said to have escaped from the waters of the Deluge. He reappears as the first man at the production of a renovated world, attended by seven companions — his wife, his three sons, and three daughters, by whose intermarriage the whole circle of the universe is finally completed (Hardwick, *Christ and other Masters*, iii. 16).<sup>a</sup>

The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the

Mahâbhârata. We are there told that Brahma, having taken the form of a fish, appeared to the pious Manu (Satya, *i. e.* the righteous, as Noah is also called) on the banks of the river Wirini. Thence, at his request, Manu transferred him when he grew bigger to the Ganges, and finally, when he was too large even for the Ganges, to the ocean. Brahma now announces to Manu the approach of the Deluge, and bids him build a ship and put in it all kinds of seeds together with the seven Rishis, or holy beings. The Flood begins and covers the whole earth. Brahma himself appears in the form of a horned fish, and the vessel being made fast to him he draws it for many years, and finally lands on the loftiest summit of Mount Himarat (*i. e.* the Himalaya). Then, by the command of God, the ship is made fast, and in memory of the event the mountain called Naubandhana (*i. e.* *ship-binding*). By the favor of Brahma, Manu, after the Flood, creates the new race of mankind, which are hence termed Manudsha, *i. e.* born of Manu (Bopp, *die Sâmlfuth*). The Purânic or popular version is of much later date, and is, "according to its own admission, colored and disguised by allegorical imagery." Another and perhaps the most ancient version of all is that contained in the Çatapath-Brahmâna. The peculiarity of this is that its locality is manifestly north of the Himalaya range, over which Manu is supposed to have crossed into India. Both versions will be found at length in Hardwick's *Christ and other Masters*, ii. 145-152.

The account of the Flood in the Koran is drawn, apparently, partly from Biblical, and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving (Sale's *Koran*, ch. xi. p. 181). He is said to have tarried among his people one thousand save fifty years (ch. xxix. p. 327). The people scoffed at and derided him; and "thus were they employed until our sentence was put in execution and the oven poured forth water." Different explanations have been given of this oven which may be seen in Sale's note. He suggests (after Hyde, *de Reel. Pers.*) that this idea was borrowed from the Persian Magi, who also fancied that the first waters of the Deluge gushed out of the oven of a certain old woman named Zala Cûfa. But the word *Tannûr* (oven), he observes, may mean only a receptacle in which waters are gathered, or the fissure from which they brake forth.<sup>b</sup> Another peculiarity of this version is, that Noah calls in vain to one of his sons to enter into the ark: he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. The ark, moreover, is said to have rested on the mountain Al Jûdi, which Sale supposes should be written Jordi or Giordi, and connects with the Gordyæi, Cardu, etc., or Kurd Mountains on the borders of Armenia and Mesopotamia (ch. xi. pp. 181-183, and notes).

A third cycle of traditions is to be found among

<sup>a</sup> D. Gutzlaff, in a paper "On Buddhism in China," communicated to the Royal Asiatic Society (*Journal*, xvi. 79), says that he saw in one of the Buddhist temples, "in beautiful stucco, the scene where Kwan-yin the Goddess of Mercy, looks down from heaven upon the lonely Noah in his ark, amidst the raging waves of the deluge, with the dolphins swimming around as his last means of safety, and the dove with an olive-branch in its beak flying toward the vessel. Nothing would have exceeded the beauty of the execution."

\* It is stated, on good authority, that the Chinese attribute the origin of their famous cycle of 60 years to Ta-Nao, *i. e.* Nao the great, or divine Nao (Williams's *Middle Kingdom*, ii. 201, and Pauthier's *China* ii. 28). H.

<sup>b</sup> The road from Salzburg to Bad-Gastein passes by some very singular fissures made in the limestone by the course of the stream, which are known by the name of "Die Ofen," or "The Ovens."

the American nations. These, as might be expected, show occasionally some marks of resemblance to the Asiatic legends. The one in existence among the Cherokees reminds us of the story in the Mahábháratá, only that a dog here renders the same service to his master as the fish does there to Manu. "This dog was very pertinacious in visiting the banks of a river for several days, where he stood gazing at the water and howling piteously. Being sharply spoken to by his master and ordered home, he revealed the coming evil. He concluded his prediction by saying that the escape of his master and family from drowning depended upon their throwing *him* into the water; that to escape drowning himself he must take a boat and put in it all he wished to save: that it would then rain hard a long time, and a great overflowing of the land would take place. By obeying this prediction the man and his family were saved, and from them the earth was again peopled." (Schoolcraft, *Notes on the Iroquois*, pp. 358, 359.)

"Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coxcox, namely, the Aztecs, the Mixtecs, the Zapotecs, the Tlascaltecs, and the Mechoacans. The Noah, Xisuthrus, or Manu of these nations is termed Coxcox, Teo-Teo-Teo, or Tezpi. He saved himself with his wife Xochiquetzal in a bark, or, according to other traditions, on a raft. The painting represents Coxcox in the midst of the water waiting for a bark. The mountain, the summit of which rises above the waters, is the peak of Colhuacan, the Ararat of the Mexicans. At the foot of the mountain are the heads of Coxcox and his wife. The latter is known by two tresses in the form of horns, denoting the female sex. The men born after the Deluge were dumb: the dove from the top of a tree distributed among them tongues, represented under the form of small comas." Of the Mechoacan tradition he writes, "that Coxcox, whom they called Tezpi, embarked in a spacious *acalli* with his wife, his children, several animals, and grain. When the Great Spirit ordered the waters to withdraw, Tezpi sent out from his bark a vulture, the zopilote or *vultur aura*. This bird did not return on account of the carcasses with which the earth was strewed. Tezpi sent out other birds, one of which, the humming-bird, alone returned, holding in its beak a branch clad with leaves. Tezpi, seeing that fresh verdure covered the soil, quitted his bark near the mountain of Colhuacan" (*Vues des Cordillères et Monumens de l'Amérique*, pp. 226, 227). A peculiarity of many of these American Indian traditions must be noted, and that is, that the Flood, according to them, usually took place in the time of the First Man, who, together with his family, escape. But Müller (*Americanische Urreligionen*) goes too far when he draws from this the conclusion that these traditions are consequently cosmogonic and have no historical

value. The fact seems rather to be that all men of the age between the Creation and the Flood had perished, and that hence these two great events were brought into close juxtaposition. This is the less unlikely when we see how very meagre even the Biblical history of that age is.

It may not be amiss, before we go on to speak of the traditions of more cultivated races, to mention the legend still preserved among the inhabitants of the Ffji islands, although not belonging to our last group. They say that, "after the islands had been peopled by the first man and woman, a great rain took place by which they were finally submerged; but before the highest places were covered by the waters, two large double canoes made their appearance. In one of these was Rokora the god of carpenters, in the other Rokola his head workman, who picked up some of the people and kept them on board until the waters had subsided, after which they were again landed on the island. It is reported that in former times canoes were always kept in readiness against another inundation. The persons thus saved, eight in number, were landed at Mbenga, where the highest of their gods is said to have made his first appearance. By virtue of this tradition, the chiefs of Mbenga take rank before all others and have always acted a conspicuous part among the Ffjis. They style themselves *Ngalidwa-ki-laugi* — subject to heaven alone." (Wilkes, *Exploring Expedition*).<sup>a</sup>

One more cycle of traditions we shall notice — that, namely, of the Hellenic races.

Hellas has two versions of a flood, one associated with Ogyges (*Jul. Afric.* as quoted by Euseb. *Præp. Ev.* x. 10), and the other, in a far more elaborate form, with Deucalion. Both, however, are of late origin — they were unknown to Homer and Hesiod. Herodotus, though he mentions Deucalion as one of the first kings of the Hellenes, says not a word about the Flood (i. 56). Pindar is the first writer who mentions it (*Olymp.* ix. 37 ff.). In Apollodorus (*Biblio.* i. 7) and Ovid (*Metam.* i. 260), the story appears in a much more definite shape. Finally, Lucian gives a narrative (*De Deâ Syr.* c. 12, 13), not very different from that of Ovid, except that he makes provision for the safety of the animals, which Ovid does not. He attributes the necessity for the Deluge to the exceeding wickedness of the existing race of men, and declares that the earth opened and sent forth waters to swallow them up, as well as that heavy rain fell upon them. Deucalion, as the one righteous man, escaped with his wives and children and the animals he had put into the chest (*ἀρρακτα*), and landed, after nine days and nine nights, on the top of Parnassus, whilst the chief part of Hellas was under water, and nearly all men perished, except a few who reached the tops of the highest mountains. Plutarch (*de Solert. Anim.* § 13) mentions the dove which Deucalion made use of to ascertain whether the flood was abated.

<sup>a</sup> \* Lücken, as quoted by Auberlen (*Die Göttl. Offenbarung*, i. 144), remarks, respecting these traditions among the American aborigines, that the form in which the natives relate them agrees in such a striking manner with the Bible history that we cannot blame the astonished Spaniards if on their first discovery of that continent, they believed, on account of these and similar traditions, that the Apostle Thomas must have preached Christianity there. Truly we must regard it as a work of Providence that this new world, which,

perhaps for centuries, unknown to the rest of mankind and separated from them, followed their own course of training, when suddenly discovered in the midst of the light of historical times, shows at once an agreement with the traditions of the old world, which must convince even the most incredulous that all mankind must originally have drunk from the same common source of intellectual life (*Die Traditionen des Menschengeschlechts . . . unter den Heiden*). B

Most of these accounts, it must be observed, localize the Flood, and confine it to Greece or some part of Greece. Aristotle speaks of a local inundation near Dodona only (*Meteorol.* i. 14).

It must also be confessed, that the later narrative, the more definite the form it assumes, and the more nearly it resembles the Mosaic account.

It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt. They knew, however, of the flood of Deucalion, but seem to have been in doubt whether it was to be regarded as partial or universal, and they supposed it to have been preceded by several others.<sup>a</sup>

Everybody knows Ovid's story of Deucalion and Pyrrha. It may be mentioned, however, in reference to this as a very singular coincidence that, just as, according to Ovid, the earth was re-peopled by Deucalion and Pyrrha throwing the bones of their mother (*i. e.* stones) behind their backs, so among the Tamanaki, a Carib tribe on the Orinoko, the story goes that a man and his wife escaping from the flood to the top of the high mountain Tapanacu, threw over their heads the fruit of the Mauritia-palm, whence sprung a new race of men and women. This curious coincidence between Hellenic and American traditions seems explicable only on the hypothesis of some common centre of tradition.<sup>b</sup>

After the Flood. — Noah's first act after he left the ark was to build an altar, and to offer sacrifices. This is the first altar of which we read in Scripture, and the first burnt sacrifice. Noah, it is said, took of every clean beast, and of every clean fowl, and offered burnt-offerings on the altar. And then the narrative adds with childlike simplicity: "And Jehovah smelled a smell of rest (or satisfaction), and Jehovah said in his heart, I will not again curse the ground any more for man's sake; for the imagination of man's heart is evil from his youth: neither will I again smite any more every living thing as I have done." Jehovah accepts the sacrifice of Noah as the acknowledgment on the part of man that he desires reconciliation and communion with God; and therefore the renewed earth shall no more be wasted with a plague of waters, but so long as the earth shall last, seed-time and harvest, cold and heat, summer and winter, day and night shall not cease.

<sup>a</sup> \* A friend conversant with the literature of this subject, Rev. E. Burgess, very properly suggests that this statement as to the ignorance of the Egyptians concerning a flood is too unqualified. Some Egyptologists maintain a different opinion. (1.) They allege that the name of Noah himself (*Nh, Nuh, Nou,* etc.) is found on the monuments, represented as "the god of water" (see Osburn's *Monumental Egypt*, i. 239). Osburn cites Champollion and Birch in favor of this interpretation, and has no doubt that the name is that of the patriarch through whom the race was perpetuated after the flood. (2.) The names of the first of the eight great gods of the Egyptians, as given by Wilkinson from the monuments, are believed to be different forms of the name Noah (*Manners and Customs of Ancient Egypt*, second series, . 241). (3.) In the legend of Osiris, the chief primitive divinity of the Egyptians, incidents are stated which seem clearly to identify that deity with Noah of the Hebrew Scriptures (Bryant, *Mythology*, ii. 235 ff. [Lond. 1775]; Kenrick's *Hist. of Egypt*, i. 355; Wilkinson's *Manners and Customs of Ancient Egypt*, i. 254 ff.). (4.) We have perhaps a reminiscence of the three sons of Noah in the occur-

rence of numerous localities in Egypt in which a triad of deities was worshipped. Wilkinson gives a list of a number of such places, among them Thebes, with the names of the deities (Wilkinson as above, i. 239). The knowledge of a flood ascribed by Plato to the Egyptians in the *Timæus* (p. 23 Steph.) is that they knew of several deluges, but affirmed that their country had never been thus visited. Their national egotism may have led them to claim this exemption as the special favorites of heaven. H.

Then follows the blessing of God (Elohim) upon Noah and his sons. They are to be fruitful and multiply: they are to have lordship over the inferior animals; not, however, as at the first by native right, but by terror is their rule to be established. All living creatures are now given to man for food; but express provision is made that the blood (in which is the life) should not be eaten. This does not seem necessarily to imply that animal food was not eaten before the flood, but only that now the use of it was sanctioned by divine permission. The prohibition with regard to blood reappears with fresh force in the Jewish ritual (*Lev.* iii. 17, vii. 26, 27, xvii. 10-14; *Deut.* xii. 16, 22, 24, xv. 23), and seemed to the Apostles so essentially human as well as Jewish that they thought it ought to be enforced upon Gentile converts. In later times the Greek Church urged it as a reproach against the Latin that they did not hesitate to eat things strangled (*suffocata in quibus sanguis tenuatur*).

Next, God makes provision for the security of human life. The blood of man, which is his life, is yet more precious than the blood of beasts. When it has been shed God will require it, whether of beast or of man: and man himself is to be the appointed channel of Divine justice upon the homicide: "Whoso sheddeth man's blood, by man shall his blood be shed; for in the image of God made He man." Hence is laid the first foundation of the civil power. And just as the priesthood is declared to be the privilege of all Israel before it is made representative in certain individuals, so here the civil authority is declared to be a right of human nature itself, before it is delivered over into the hands of a particular executive.

Thus with the beginning of a new world God gives, on the one hand, a promise which secures the stability of the natural order of the universe, and, on the other hand, consecrates human life with a special sanctity as resting upon these two pillars — the brotherhood of men, and man's likeness to God. Of the seven precepts of Noah, as they are called, the observance of which was required of all Jewish proselytes, three only are here expressly mentioned: the abstinence from blood; the prohibition of murder; and the recognition of the civil authority. The remaining four: the prohibition of idolatry, of blasphemy, of incest, and of

rence of numerous localities in Egypt in which a triad of deities was worshipped. Wilkinson gives a list of a number of such places, among them Thebes, with the names of the deities (Wilkinson as above, i. 239). The knowledge of a flood ascribed by Plato to the Egyptians in the *Timæus* (p. 23 Steph.) is that they knew of several deluges, but affirmed that their country had never been thus visited. Their national egotism may have led them to claim this exemption as the special favorites of heaven. H.

<sup>b</sup> \* "These primeval traditions of the human race," says Anberlen, "illustrate as much the historical credibility of the Mosaic writings, even in their minute recitals, as they do their essential purity and elevation, in contrast with the heathen myths. In this latter respect it will be seen especially how Israel only, together with the fact, maintains at the same time the innermost idea of the fact; while the heathen preserve the external forms remarkably enough, but clothe them with fantastic and national costumes. There is a difference here similar to that between the canonical and the apocryphal Gospels" (*Die Göttliche Offenbarung: ein apologetischer Versuch*, i. 147 b). H

theft, rested apparently on the general sense of mankind.

It is in the terms of the blessing and the covenant made with Noah after the Flood that we find the strongest evidence that in the sense of the writer it was universal, *i. e.* that it extended to *all the then known world*. The literal truth of the narrative obliges us to believe that *the whole human race*, except eight persons, perished by the waters of the flood. Noah is clearly the head of a new human family, the representative of the whole race. It is as such that God makes his covenant with him; and hence selects a *natural* phenomenon as the sign of that covenant, just as later in making a *national* covenant with Abraham, He made the seal of it to be an arbitrary sign in the flesh. The bow in the cloud, seen by every nation under heaven, is an unailing witness to the truth of God. Was the rainbow, then, we ask, never seen before the Flood? Was this "sign in the heavens" beheld for the first time by the eight dwellers in the ark when, after their long imprisonment, they stood again upon the green earth, and saw the dark humid clouds spanned by its glorious arch? Such seems the meaning of the narrator. And yet this implies that there was no rain before the flood, and that the laws of nature were changed, at least in that part of the globe, by that event. There is no reason to suppose that in the world at large there has been such change in meteorological phenomena as here implied. That a certain portion of the earth should never have been visited by rain is quite conceivable. Egypt, though not absolutely without rain, very rarely sees it. But the country of Noah and the ark was a mountainous country; and the ordinary atmospherical conditions must have been suspended, or a new law must have come into operation after the Flood, if the rain then first fell, and if the rainbow had consequently never before been painted on the clouds. Hence, many writers have supposed that the meaning of the passage is, not that the rainbow now appeared for the first time, but that it was now for the first time invested with the sanctity of a sign; that not a new phenomenon was visible, but that a new meaning was given to a phenomenon already existing. It must be confessed, however, that this is not the *natural* interpretation of the words: "This is the sign of the covenant which I do set between me and you, and every living thing which is with you for everlasting generations: my bow have I set in the cloud, and it shall be for the sign of a covenant between me and the earth. And it shall come to pass that when I bring a cloud over the earth, then the bow shall be seen in the cloud, and I will remember my covenant which is between me and you and every living thing of all flesh," etc.

Noah now for the rest of his life betook himself to agricultural pursuits, following in this the tradition of his family. It is particularly noticed that he planted a vineyard, and some of the older Jewish writers, with a touch of poetic beauty, tell us that he took the shoots of a vine which had wandered out of paradise wherewith to plant his

<sup>a</sup> Armenia it has been observed, is still favorable to the growth of the vine. Xenophon (*Anab. iv. 4, 9*) speaks of the excellent wines of the country, and his account has been confirmed in more recent times (Ritter, *Et. tk. x. 319, 554, etc.*). The Greek myth referred the discovery and cultivation of the vine to Dionysos, who according to one version brought it from India (Diod.

vineyard.<sup>a</sup> Whether in ignorance of its properties or otherwise, we are not informed, but he drank of the juice of the grape till he became intoxicated and shamefully exposed himself in his own tent. One of his sons, Ham, mocked openly at his father's disgrace. The others, with dutiful care and reverence, endeavored to hide it. Noah was not so drunk as to be unconscious of the indignity which his youngest son had put upon him; and when he recovered from the effects of his intoxication, he declared that in requital for this act of brutal unfeeling mockery, a curse should rest upon the sons of Ham, that *he* who knew not the duty of a child, should see his own son degraded to the condition of a slave. With the curse on his youngest son was joined a blessing on the other two. It ran thus, in the old poetic or rather rhythmical and alliterative form into which the more solemn utterances of antiquity commonly fell. And he said:—

Cursed be Canaan,  
A slave of slaves shall he be to his brethren.

And he said:—

Blessed be Jehovah, God of Shem,  
And let Canaan be their slave!  
May God enlarge Japhet,<sup>b</sup>  
And let him dwell in the tents of Shem,  
And let Canaan be their slave!

Of old, a father's solemn curse or blessing was held to have a mysterious power of fulfilling itself. And in this case the words of the righteous man, though strictly the expression of a wish (Dr. Pye Smith is quite wrong in translating all the verbs as futures; they are optatives), did in fact amount to a prophecy. It has been asked why Noah did not curse Ham, instead of cursing Canaan. It might be sufficient to reply that at such times men are not left to themselves, and that a divine purpose as truly guided Noah's lips then, as it did the hands of Jacob afterwards. But, moreover, it was surely by a righteous retribution that he, who as youngest son had dishonored his father, should see the curse light on the head of his own youngest son. The blow was probably heavier than if it had lighted directly on himself. Thus early in the world's history was the lesson taught practically which the law afterwards expressly enunciated, that God visits the sins of the fathers upon the children. The subsequent history of Canaan shows in the clearest manner possible the fulfillment of the curse. When Israel took possession of his land, he became the slave of Shem: when Tyre fell before the arms of Alexander, and Carthage succumbed to her Roman conquerors, he became the slave of Japhet: and we almost hear the echo of Noah's curse in Hannibal's *Agnosco fortunam Carthaginis*, when the head of Hasdrubal his brother was thrown contemptuously into the Punic lines.<sup>c</sup>

It is uncertain whether in the words, "And let him dwell in the tents of Shem," "God," or "Japhet," is the subject of the verb. At first it seems more natural to suppose that Noah prays

Sic. iii. 32), according to another from Phrygia (Strabo x. 469). Asia at all events is the acknowledged home of the vine.

<sup>b</sup> There is an alliterative play upon words here which cannot be preserved in a translation.

<sup>c</sup> See Delitzsch, *Comm. in loc.*

hat God would dwell there (the root of the verb is the same as that of the noun *Shechinah*). But the blessing of Shem has been spoken already. It is better therefore to take Japhet as the subject. What then is meant by his dwelling in the tents of Shem? Not of course that he should so occupy them as to thrust out the original possessors; nor even that they should melt into one people; but, as it would seem, that Japhet may enjoy the religious privileges of Shem. So Augustine: "Latifocet Deus Japheth et habitat in tentoriis Sem, id est, in Ecclesiis quas filii Prophetarum Apostoli construxerunt." The Talmud sees this blessing fulfilled in the use of the Greek language in sacred things, such as the translation of the Scriptures. Thus Shem is blessed with the knowledge of Jehovah: and Japhet with temporal increase and dominion in the first instance, with the further hope of sharing afterwards in spiritual advantages. After this prophetic blessing we hear no more of the patriarch but the sum of his years. "And Noah lived after the flood three hundred and fifty years. And thus all the days of Noah were nine hundred and fifty years: and he died."

For the literature of this article the various commentaries on Genesis, especially those of modern date, may be consulted. Such are those of Tuch, 1838; of Baumgarten, 1843; Knobel, 1852; Schröder, 1846; Delitzsch, 3d ed. 1860. To the last of these especially the present writer is much indebted. Other works bearing on the subject more or less directly are Lyell's *Principles of Geology*, 1853; Pfaff's *Schöpfungsgeschichte*, 1855; Wiseman's *Lectures on Science and Revealed Religion*; Hugh Miller's *Testimony of the Rocks*; Hardwick's *Christ and Other Masters*, 1857; Müller's *Die Americanischen Urreligionen*; Bunsen's *Bibelwerk*, and Ewald's *Jahrbücher*, have also been consulted. The writer has further to express his obligations both to Professor Owen and to Professor Huxley, and especially to the latter gentleman, for much valuable information on the scientific questions touched upon in this article.

J. J. S. P.

\* See especially Nägelsbach's article on Noah (*Herzog's Real-Encycl.* x. 394-403) for an admirable summary of the historical testimonies to the Mosaic account of the deluge. It is a satisfaction to observe that the author cites at every step the proper authority for his statements. On the question of the universality of the flood, may be mentioned, among American writers, Dr. Edward Hitchcock on the Historical and Geological Deluges in the *Bibl. Repository* (ix. 78 ff., x. 328 ff., and xi. 1 ff.), and his *Religion of Geology*, lect. xii. (Bost. 1861); Prof. C. H. Hitchcock on the Relations of Geology to Theology, *Bibl. Sacra*, xxiv. 463 ff.; and Prof. Taylor Lewis, who inserts an *excursus* on Gen. viii. 1-19, in his translation of Lange's *Commentary on Genesis*, pp. 314-322 (N. Y. 1868). These writers understand that he flood was limited locally, but was coextensive with the part of the earth inhabited at that time.

Dr. Edward Robinson has some good remarks on the philological or etymological proofs of the Biblical deluge under *ΑΡΚ*, in his ed. of Calmet's *Dictionary of the Bible* (Bost. 1832). On the branch of the argument, see especially Philipp Buttmann's *Mythologus oder Die Sagen des Alterthums*, i. 180-234 (Berl. 1828). He finds evidence of the diffusion of the names of the Biblical Shemitic patriarchs, under analogous forms, in the languages of various ancient nations. Rawlinson mentions the Chaldean legends of the flood (*Ancient Monarchies*, i. 184).

NO'AH (נֹחַ) [*motion, commotion*]: *Noud*: *Noa*. One of the five daughters of Zelophehad (Num. xxvi. 33, xxvii. 1, xxxvi. 11; Josh. xvii. 3).

NO-A'MON, NO (נֹחַ אֲמוֹן) [see below]: *μερις Ἀμμών*: *Alexandria (populorum)*, Nah. iii.

8: a נֹחַ: *Διοσπολις*: *Alexandria*, Jer. xvi. 25; Ez. xxx. 14, 15, 16), a city of Egypt, Thebes (Thebes), or Diospolis Magna. The second part of the first form is the name of AMEN, the chief divinity of Thebes, mentioned or alluded to in connection with this place in Jeremiah, "Behold, I will punish Amon [or 'the multitude,' with reference to Amen<sup>6</sup>] in No, and Pharaoh, and Egypt, with their gods, and their kings" (*l. c.*), and perhaps also alluded to in Ezekiel (xxx. 15) [*AMON*.]

The second part of the Egyptian sacred name of the city, HA-AMEN, "the abode of Amen," is the same. There is a difficulty as to the meaning of No. It has been supposed, in accordance with the LXX. rendering of No-Amon by *μερις Ἀμμών*, that the Coptic ΠΟΖ, ΠΟΥΖ, *funis, funiculus*, once *funis mensorius* (Mic. ii. 4), instead of ΠΟΖ ἄρως, might indicate that it signified "portion," so that the name would mean "the portion of Amon." But if so, how are we to explain the use of No alone? It thus occurs not only in Hebrew, but also in the language of the Assyrian inscriptions, in which it is written Ni'a, according to Sir Henry Rawlinson ("Illustrations of Egyptian History and Chronology," etc., *Trans. Roy. Soc. Lit.* 2d Ser. vii. 166).<sup>c</sup> The conjectures that Thebes was called

Π Η Η Δ Δ Δ Δ Δ Δ Δ Δ Δ Δ, "the abode of Amen,"

or, still nearer the Hebrew, Π Δ Δ Δ Δ Δ Δ Δ Δ Δ,

"the [city] of Amen," like Π Δ Η C J, "the

[city] of Isis," or, as Gesenius prefers, Δ Δ Δ Δ Δ Δ Δ Δ Δ Δ,

"the place of Amen" (*Thees. s. v.*)

are all liable to two serious objections, that they neither represent the Egyptian name, nor afford an explanation of the use of No alone. It seems most reasonable to suppose that No is a Semitic name, and that Amon is added in Nabum (*l. c.*) to distinguish Thebes from some other place bearing the same name, or on account of the connection of Amen with that city. Thebes also bears in ancient Egyptian the common name, of doubt-

<sup>a</sup> In Nah. iii. 8, the A. V. has incorrectly "populous No," instead of No-Amon. H.

<sup>b</sup> The former is the more probable reading, as the gods of Egypt are mentioned almost immediately after.

<sup>c</sup> Sir Henry Rawlinson identifies Ni'a with No-Amon. The whole paper (pp. 137 ff.) is of great importance,

as illustrating the reference in Nahum to the capture of Thebes, by showing that Egypt was conquered by both Esarhaddon and Asshur-bani-pal, and that the latter twice took Thebes. If these wars were after the prophet's time, the narrative of them makes it more probable than it before seemed that there was a still earlier conquest of Egypt by the Assyrians.

ful signification, AP-T or T-AP, which the Greeks represented by Thebe. The whole metropolis, on both banks of the river, was called TAM. (See Brugsch, *Geogr. Inschr.* i. 175 ff.)

Jerome supposes No to be either Alexandria or Egypt itself (*In Jesaiam*, lib. v. t. iii. col. 125, ed. Paris, 1704). Champollion takes it to be Diospolis in Lower Egypt (*L'Égypte sous les Pharaons*, ii. 131); but Gesenius (*l. c.*) well observes that it would not then be compared in Nahum to Nineveh. This and the evidence of the Assyrian record leave no doubt that it is Thebes. The description of No-Amon, as "situate among the rivers, the waters round about it" (*Nah. l. c.*), remarkably characterizes Thebes, the only town of ancient Egypt which we know to have been built on both sides of the Nile; and the prophecy that it should "be rent asunder" (*Ez. xxx. 16*) cannot fail to appear remarkably significant to the observer who stands amidst the vast ruins of its chief edifice, the great temple of Amen, which is rent and shattered as if by an earthquake, although it must be held to refer primarily, at least, rather to the breaking up or capture of the city (comp. 2 K. xxv. 4, Jer. lii. 7), than to its destruction. See THEBES.

R. S. P.

NOB (נֹב) [*elevation, height*]: *Νοῦβά*; [*Vat. Νομμα*, 1 Sam. xxii. 11;] *Alex. Νοβα*, exc. *Νοβαθ*, 1 Sam. xxii. 11; [*F.A.*] *Νοβ*, *Neh. xi. 32* [where Rom. *Vat. Alex. F.A. omit*]: *Nobe*, *Nob* in *Neh.*) was a sacerdotal city in the tribe of Benjamin, and situated on some eminence near Jerusalem. That it was on one of the roads which led from the north to the capital, and within sight of it, is certain from the illustrative passage in which Isaiah (x. 28-32) describes the approach of the Assyrian army:—

"He comes to Ai, passes through Migron,  
At Michmash deposits his baggage;  
They cross the pass, Geba is our night-station;  
Terrified is Ramah, Gibeah of Saul flees.  
Shriek with thy voice, daughter of Gallim;  
Listen, O Laish! Ah, poor Anathoth!  
Madmenah escapes, dwellers in Gebim take flight.  
Yet this day he halts at Nob:  
He shakes his hand against the mount, daughter  
of Zion,  
The hill of Jerusalem."

In this spirited sketch the poet sees the enemy pouring down from the north; they reach at length the neighborhood of the devoted city; they take possession of one village after another; while the inhabitants flee at their approach, and fill the country with cries of terror and distress. It is implied here clearly that Nob was the last station in their line of march, whence the invaders could see Jerusalem, and whence they could be seen, as they "shook the hand" in proud derision of their enemies. Lightfoot also mentions a Jewish tradition (*Opp.* ii. 203) that Jerusalem and Nob stood within sight of each other.

Nob was one of the places where the tabernacle, or ark of Jehovah, was kept for a time during the days of its wanderings before a home was provided for it on Mount Zion (2 Sam. vi. 1, &c.). A com-

pany of the Benjamites settled here after the return from the exile (*Neh. xi. 32*). But the event for which Nob was most noted in the Scripture annals, was a frightful massacre which occurred there in the reign of Saul (1 Sam. xxii. 17-19). David had fled thither from the court of the jealous king; and the circumstances under which he had escaped being unknown, Ahimelech, the high-priest at Nob, gave him some of the shew-bread from the golden table, and the sword of Goliath which he had in his charge as a sacred trophy. Doeg, an Edomite, the king's shepherd, who was present, reported the affair to his master. Saul was enraged on hearing that such favor had been shown to a man whom he hated as a rival; and nothing would appease him but the indiscriminate slaughter of all the inhabitants of Nob. The king's executioners having refused to perform the bloody deed (1 Sam. xxii. 17), he said to Doeg, the spy, who had betrayed the unsuspecting Ahimelech, "Turn thou, and fall upon the priests. And Doeg the Edomite turned, and he fell upon the priests, and slew on that day four-score and five persons that did wear a linen ephod. And Nob, the city of the priests, smote he with the edge of the sword, both men and women, children and sucklings, and oxen, and asses, and sheep, with the edge of the sword." Abiathar, a son of Ahimelech, was the only person who survived to recount the sad story.

It would be a long time, naturally, before the doomed city could recover from such a blow. It appears in fact never to have regained its ancient importance. The references in *Is. x. 32* and *Neh. xi. 32* are the only later allusions to Nob which we find in the O. T. All trace of the name has disappeared from the country long ago. Jerome states that nothing remained in his time to indicate where it had been. Geographers are not agreed as to the precise spot with which we are to identify the ancient locality. Some of the conjectures on this point may deserve to be mentioned. "It must have been situated," says Dr. Robinson (*Researches*, vol. i. p. 464), "somewhere upon the ridge of the Mount of Olives, northeast of the city. We sought all along this ridge from the Damascus road to the summit opposite the city, for some traces of an ancient site which might be regarded as the place of Nob; but without the slightest success." Kiepert's map places Nob at *el-Isâwîeh*, not far from *Anâtâ*, about a mile northwest of Jerusalem. Tobler (*Topographie von Jerus.* ii. § 719) describes this village as beautifully situated, and occupying unquestionably an ancient site. But it must be regarded as fatal to this identification that Jerusalem is not to be seen from that point.<sup>b</sup> *EL-Isâwîeh* is in a valley, and the dramatic representation of the prophet would be unsuited to such a place. Mr. Porter (*Handb.* ii. 324) expresses the confident belief that Nob is to be sought on a low peaked tell, a little to the right of the northern road and opposite to *Shâfât*. He found there several cisterns hewn in the rock, large building stones, and various other indications of an ancient town. The top of this hill<sup>c</sup> affords an extensive view, and Mount Zion is distinctly seen, though

<sup>a</sup> "The full idea," says Gesenius (*Handw. s. v.*), "is that they hurry off to conceal their treasures."

<sup>b</sup> Rûetschi takes the same view of this difficulty and declines against the identification (*Herzog's Real-Encycl.* x. 404) *The gestus minantis* (Gesen.) has little

or no significance unless those menaced could see the invaders at the moment. Mr. Grove gives the preference to *el-Isâwîeh* (*Clark's Bible Atlas*, p. 204). H.

<sup>c</sup> \* This hill, says Lieut. Warren (*Rep. rz.* Oct. 1867), is called *Sûmah*. H

Moriah and Olivet are hid by an intervening ridge.

The Nob spoken of above is not to be confounded with another which Jerome mentions in the plain of Sharon, not far from Lydda. (See Von Raumer's *Palästina*, p. 196.) No allusion is made to this latter place in the Bible. The Jews after recovering the ark of Jehovah from the Philistines would be likely to keep it beyond the reach of a similar disaster; and the Nob which was the seat of the sanctuary in the time of Saul, must have been among the mountains. This Nob, or *Nobba* as Jerome writes, now *Beù Nùba*, could not be the village of that name near Jerusalem. The towns with which Isaiah associates the place put that view out of the question. H. B. H.

NO'BAH (נֹבָח) [*barking, a loud cry*]: *Ναβῶθ, Ναβαί*; Alex. *Ναβωθ, Ναβεθ*: *Noba, [Nobe]*. The name conferred by the conqueror of KENATH and the villages in dependence on it on his new acquisition (Num. xxxii. 42). For a certain period after the establishment of the Israelite rule the new name remained, and is used to mark the course taken by Gideon in his chase after Zebah and Zalmunna (Judg. viii. 11). But it is not again heard of, and the original appellation, as is usual in such cases, appears to have recovered its hold, which it has since retained; for in the slightly modified form of *Kunawat* it is the name of the place to the present day (see *Onomasticon*, Nabo).

Ewald (*Gesch.* ii. 268, note 2) identifies the Nobah of Gideon's pursuit with Nophah of Num. xxi. 30, and distinguishes them both from Nobah of Num. xxxii. 42, on the ground of their being mentioned with Dibon, Medeba, and Jogbehah. But if Jogbehah be, as he elsewhere (ii. 504, note 4) suggests, *el-Jebéibeh*, between *Ammân* and *es-Salt*, there is no necessity for the distinction. In truth the lists of Gad and Reuben in Num. xxxii. are so confused that it is difficult to apportion the towns of each in accordance with our present imperfect topographical knowledge of those regions. Ewald also (ii. 392, note) identifies Nobah of Num. xxxii. 42 with *Nauu* or *Nere*, a place 15 or 16 miles east of the north end of the Lake of Gennesaret (Ritter, *Jordan*, p. 356). But if Kenath and Nobah are the same, and *Kunawat* be Kenath, the identification is both unnecessary and untenable.

Eusebius and Jerome, with that curious disregard of probability which is so puzzling in some of the articles in the *Onomasticon*, identify Nobah of Judg. viii. with Nob, "the city of the Priests, afterwards laid waste by Saul" (*Onom.* *Νομβά* and "Nabbe sive Nobba"). G.

NO'BAH (נֹבָח) [*barking, a loud cry*]: *Ναβαῖ*: *Noba*. An Israelite warrior (Num. xxxii. 42 only), probably, like Jair, a Manassite, who during the conquest of the territory on the east of Jordan possessed himself of the town of Kenath and the villages or hamlets dependent upon it (Heb. "daughters"), and gave them his own name. According to the Jewish tradition (*Sefer Olam Rabbá*, ix.) Nobah was born in Egypt, died after the decease of Moses, and was buried during the passage of the Jordan.

It will be observed that the form of the name in the LXX. is the same as that given to Nebo. G.

a \* Matthew, it is true, has ὁ παῖς μου, which signifies "servant" or "child" (viii. 6). Luke has the same

\* NOBLEMAN (*βασιλικός*), the title of a courtier or royal officer of Herod Antipas, who came to Jesus at Cana, to entreat him to heal his son, whom he had left at the point of death at his home, in Capernaum. On his return he found that the cure had been wrought at the very moment when Jesus said, "Thy son liveth" (John iv. 46, 47). Some critics (Ewald, DeWette with some hesitation, Baur) regard this miracle as identical with that of the healing of the centurion's servant (Matt. viii. 5; Luke vii. 1-10). But it is difficult to reconcile the differences in the two accounts with this supposition. Cana was the scene of the miracle related by John, and Capernaum that of the miracle related by Matthew and Luke. One of the men was a Jew (included at least among the Galileans, John iv. 48) in the service of the king or tetrarch, as his designation implies, the other a Roman and a centurion (Luke vii. 2). In one case it was a son of the petitioner who was sick, in the other his servant, and, finally, the nobleman requested Jesus to come to his house, whereas the centurion felt that he was utterly unworthy to receive him under his roof. He is called *βασιλικός* with the same propriety that Herod Antipas is called *βασιλεύς* (Mark vi. 14), though the stricter title of the latter was *τετράρχης* (Matt. xiv. 1). It is a complimentary title rather than official as applied to both. H.

NOD [נֹד], *wandering*: *Ναδῶ*: *profugus*. [CAIN.]

NO'DAB (נֹדָב) [*nobility*]: *Ναδαβαῖοι*: *Nodab*, the name of an Arab tribe mentioned only in 1 Chr. v. 19, in the account of the war of the Reubenites, the Gadites, and the half of the tribe of Manasseh, against the Hagarites (v. 9-22), "and they made war with the Hagarites, with Jetur, and Nephish, and Nodab" (ver. 19). In Gen. xxv. 15 and 1 Chr. i. 31, Jetur, Naphish, and Kedemah are the last three sons of Ishmael, and it has been therefore supposed that Nodab also was one of his sons. But we have no other mention of Nodab, and it is probable, in the absence of additional evidence, that he was a grandson or other descendant of the patriarch, and that the name, in the time of the record, was that of a tribe sprung from such descendant. The Hagarites, and Jetur, Nephish, and Nodab, were pastoral people, for the Reubenites dwelt in their tents throughout all the east [land] of Gilead (1 Chr. v. 10), and in the war a great multitude of cattle — camels, sheep, and asses — were taken. A hundred thousand men were taken prisoners or slain, so that the tribes must have been very numerous and the Israelites "dwelt in their stands until the captivity." If the Hagarites (or Hagarenes) were, as is most probable, the people who afterwards inhabited Hejer [HAGARENES], they were driven southwards, into the northeastern province of Arabia, bordering the mouths of the Euphrates, and the low tracts surrounding them. [JETUR; ITURÆA; NAPHISH.] E. S. P.

NO'É (Νῶε: *Noë*). The patriarch Noah (Tob .r. 12; Matt. xxiv. 37, 38; Luke iii. 36, xvii. 26, 27). [NOAH.]

NO'EBA (Νοεβὰ: *Nachoba*) = ΝΕΚΟΒΑ 1 (1 Esdr. v. 31; comp. Ezr. ii. 48).

(vii. 7); but the latter has also τὸν δοῦλον αὐτοῦ (ver. 8), and this resolves the ambiguity. H

NO'GAH (נוגה) [*dawn, day-break*]: *Nayal, Nayéθ*; [Alex. in 1 Chr. iii. 7, *Nayε, Comp. Nayé*; FA. in xiv. 6, *Nayer*:] *Noge, Noga*). One of the thirteen sons of David who were born to him in Jerusalem (1 Chr. iii. 7, xiv. 6). His name is omitted from the list in 2 Sam. v.

NO'HAH (נוהא) [*rest*]: *Nwad*; [Vat. *Noaa*:] *Nohaa*). The fourth son of Benjamin (1 Chr. viii. 2).

• NOISOME (O. F. *noisir*, "to hurt," Lat. *nocere*) is used in its primitive sense of *noxious, baseful, destructive*, in Ps. xci. 3, Ez. xiv. 21, and Ex. viii. 21, Job xxxi. 40, marg. A.

NON (נון) [in 1 Chr. vii. 27; but elsewhere, נון, *a fish*]: *Nobn*; [Vat. Alex. *Novu*:] *Nun*). NUN, the father of Joshua (1 Chr. vii. 27).

NOPH, MOPH (נפ) [see below]: *Méμφις*: *Memphis*, Is. xix. 13, Jer. ii. 16, Ez. xxx. 13, 16; *Ἡβή*: *Méμφις*: *Memphis*, Hos. ix. 6), a city of Egypt, Memphis. These forms are contracted from the ancient Egyptian common name, MEN-NUPH, or MEN-NEFRU, "the good abode," or perhaps "the abode of the good one:" also contracted in the Coptic forms *μενεψι*, *μεεψι*, *μενεβε*, *μεεβε* (M), *μεεβε* (S); in the Greek *Méμφις*

and in the Arabic *Menf*, *منف*. The Hebrew forms are to be regarded as representing colloquial forms of the name, current with the Shemites, if not with the Egyptians also. As to the meaning of Memphis, Plutarch observes that it was interpreted to signify either the haven of good ones, or the sepulchre of Osiris (*καὶ τὴν μὲν πόλιν οἱ μὲν ὄρον ἀγαθῶν ἐρημνεύουσιν, οἱ δ' [ἰδί] ὡς τάφον Ὀσίριδος. De Iside et Osiride*, 20). It is probable that the epithet "good" refers to Osiris, whose sacred animal Apis was here worshipped, and here had its burial-place, the Serapeum, whence the name of the village Busiris (PA-HESAR? "the [abode?] of Osiris"), now represented in name, if not in exact site, by Aboo-Seer,<sup>a</sup> probably originally a quarter of Memphis. As the great Egyptian city is characterized in Nahum as "situate among the rivers" (iii. 8), so in Hosea the lower Egyptian one is distinguished by its Necropolis, in this passage as to the fugitive Israelites: "Mizraim shall gather them up, Noph shall bury them;" for its burial-ground, stretching for twenty miles along the edge of the Libyan desert, greatly exceeds that of any other Egyptian town. (See Brugsch, *Geogr. Inschr.* i. 234 ff., and MEMPHIS.) R. S. P.

NO'PHAH (נופה) *Nóphach*; the Samar. has the article, *נופה* [*hill, Fürst; Diétr.*]: *ai γυναικες*, Alex. *ai γ. αντων*: *Nophe*), a place mentioned only in Num. xxi. 30, in the remarkable song apparently composed by the Amorites after

their conquest of Heshbon from the Moabites, and therefore of an earlier date than the Israelite invasion. It is named with Dihon and Medeba, and was possibly in the neighborhood of Heshbon. A name very similar to Nophah is Nobah, which is twice mentioned; once as bestowed by the conqueror of the same name on Kenath (a place still existing more than 70 miles distant from the scene of the Amorite conflict), and again in connection with Jogbehah, which latter, from the mode of its occurrence in Num. xxxii. 36, would seem to have been in the neighborhood of Heshbon. Ewald (*Gesch.* ii. 268, note) decides (though without giving his grounds) that Nophah is identical with the latter of these. In this case the difference would be a dialectical one, Nophah being the Moabite or Amorite form. [NOBAH.] G.

NOSE-JEWEL (נוזיה, pl. constr. *נוזיות*; *ἐνώτια*: *inaures*: A. V., Gen. xxiv. 22; Ex. xxxiv.

Arab woman with nose-ring.

22, "earring;" Is. iii. 21; Ez. xvi. 12, "jewel on the forehead:" rendered by Theod. and Symm. *ἐπιρρύμιον*, Ges. p. 870). A ring of metal, sometimes of gold or silver, passed usually through the right nostril, and worn by way of ornament by women in the East. Its diameter is usually 1 in. or 1½ in., but sometimes as much as 3½ in. Upon it are strung beads, coral, or jewels. In Egypt it is now almost confined to the lower classes. It is mentioned in the Mishna, *Shabb.* vi. 1; *Celim*, xi. 8. Layard remarks that no specimen has been found in Assyrian remains. (Burckhardt, *Notes on Bed.* i. 51, 232; Niebuhr, *Descr. de l'Arab.* p. 57; *Voyages*, i. 133, ii. 56; Chardin, *Voy.* viii. 200; Lane, *Mod. Egypt.* i. 78; *App.* iii. 226; Saalschütz, *Hebr. Arch.* i. 3, p. 25; Layard, *Nin. and Bab.* pp. 262, 544.) II. W. P.

\* NOVICE, *νεόφυτος*, "neophyte," that which is newly born, or planted, is used in 1 Tim. iii. 6, figuratively, of one who had just embraced the Christian religion, "a new convert." Such a person was not a fit candidate for the office of bishop or overseer (*ἐπίσκοπος*, ver. 2); for the self-confidence of one who had just entered an untried course of life might lead him far astray. R. D. C. R.

NUMBER.<sup>b</sup> Like most oriental nations, *ν*

<sup>a</sup> This Arabic name affords a curious instance of the use of Semitic names of similar sound but different signification in the place of names of other languages.

<sup>b</sup> 1. *נוזיה*, *ἀριθμός*, properly inquiry, investigation (*Jes* j 515).

2. *נוזיה*, *ἀριθμός*, *numerus*.

3. *נוזיה*, *τύχη*, *Fortuna*, probably a deity (*Gen.* 798); rendered "number," Is. lxxv. 11.

4. *נוזיה*, Chald from same root as 3.

is probable that the Hebrews in their written calculations made use of the letters of the alphabet. That they did so in post-Babylonian times we have conclusive evidence in the Maccabean coins; and it is highly probable that this was the case also in earlier times, both from internal evidence, of which we shall presently speak, and also from the practice of the Greeks, who borrowed it with their earliest alphabet from the Phœnicians, whose alphabet again was, with some slight variations, the same as that of the Samaritans and Jews (Chardin, *Voy.* ii. 421, iv. 238 and foll., Langlès; Thiersch, *Gr. Gr.* §§ xii., lxxiii., pp. 23, 153; Jelf, *Gr. Gr.* i. 3; Müller, *Etrusker*, ii. 317, 321; *Eng. Cycl.* 'Coins,' "Numeral Characters;" Lane, *Mod. Egypt.* i. 91; Donaldson, *New Cratylus*, pp. 146, 151; Winer, *Zahlen*).

But though, on the one hand, it is certain that in all existing MSS. of the Hebrew text of the O. T. the numerical expressions are written at length (Lee, *Hebr. Gram.* §§ 19, 22), yet, on the other, the variations in the several versions between themselves and from the Hebrew text, added to the evident inconsistencies in numerical statement between certain passages of that text itself, seem to prove that some shorter mode of writing was originally in vogue, liable to be misunderstood, and in fact misunderstood by copyists and translators. The following may serve as specimens:—

1. In 2 K. xxiv. 8 Jehoiachin is said to have been 18 years old, but in 2 Chr. xxxiv. 9 the number given is 8.

2. In Is. vii. 8 Vitringa shows that for threescore and five one reading gives sixteen and five, the letter *jod* ך (10) after *shesh* (6) having been mistaken for the Rabbinical abbreviation by omission of the *mem* from the plural *shishim*, which would stand for sixty. Six + 10 was thus converted into sixty + ten.

3. In 1 Sam. vi. 19 we have 50,070, but the Syriac and Arabic versions have 5,070.

4. In 1 K. iv. 26, we read that Solomon had 40,000 stalls for chariot-horses, but 4,000 only in 1 Chr. ix. 25.

5. The letters *vau* (6) and *zayin* (7) appear to have been interchanged in some readings of Gen. ii. 2.

These variations, which are selected from a copious list given by Glass (*De Causis Corruptionis*, i. § 23, vol. ii. p. 188, ed. Dathe), appear to have proceeded from the alphabetic method of writing numbers, in which it is easy to see how, e. g. such letters as *vau* (ו) and *jod* (י), *nun* (נ) and *capf* (כ), may have been confounded and even sometimes omitted. The final letters, also, which were unknown to the early Phœnician or Samaritan alphabet, were used as early as the Alexandrian period to denote hundreds between 500 and 1,000.<sup>a</sup>

But whatever ground these variations may afford for reasonable conjecture, it is certain, from the fact mentioned above, that no positive rectification of them can at present be established, more especially as there is so little variation in the num-

bers quoted from the O. T., both in N. T. and in the Apocrypha, e. g. (1) Num. xxv. 9, quoted 1 Cor. x. 8. (2.) Ex. xii. 40, quoted Gal. iii. 17. (3.) Ex. xvi. 35 and Ps. xv. 10, quoted Acts xiii. 18. (4.) Gen. xvii. 1, quoted Rom. iv. 19. (5.) Num. i. 46, quoted Ecclus. xvi. 10.

Josephus also in the main agrees in his statements of numbers with our existing copies.

There can be little doubt, however, as was remarked by St. Augustine (*Civ. D. x.* 13, § 1), that some at least of the numbers mentioned in Scripture are intended to be representative rather than determinative. Certain numbers, as 7, 10, 40, 100, were regarded as giving the idea of completeness. Without entering into his theory of this usage, we may remark that the notion of representative numbers in certain cases is one extremely common among eastern nations, who have a prejudice against counting their possessions accurately; that it enters largely into many ancient systems of chronology, and that it is found in the philosophical and metaphysical speculations not only of the Pythagorean and other ancient schools of philosophy, both Greek and Roman, but also in those of the later Jewish writers, of the Gnostics, and also of such Christian writers as St. Augustine himself (*August. De Doctr. Christ.* ii. 16, 25; *Civ. D.* xv. 30; Philo, *De Mund. Opif.* i. 21; *De Abrah.* ii. 5; *De Sept. Num.* ii. 281, ed. Mangey; Joseph. *B. J.* vii. 5, § 5; Mishna, *Pirke Aboth*, v. 7, 8; Irenæus, i. 3, ii. 1, v. 29, 30; Hieronym. *Comm. in Is.* i. vol. i. vol. iv. p. 72, ed. Migne; Arist. *Metaphys.* i. 5, 6, xii. 6, 8; Ælian, *V. H.* iv. 17; Varro, *Hebdom.* fragm. i. 255, ed. Bipont.; Niebuhr, *Hist. of Rome*, ii. 72, ed. Hare; Burckhardt, *Trav. in Arabia*, i. 75; Syria, p. 560, comp. with Gen. xiii. 16 and xxii. 17; also see papers on Hindoo Chronology in Sir W. Jones's Works, Suppl. vol. ii. pp. 968, 1017).

We proceed to give some instances of numbers used (a) representatively, and thus probably by design indefinitely, or (b) definitely, but as we may say preferentially, i. e. because some meaning (which we do not in all cases understand) was attached to them.

1. *Seren*, as denoting either plurality or completeness, is so frequent as to make a selection only of instances necessary, e. g. *sevenfold*, Gen. iv. 24; *seven times*, i. e. completely, Lev. xxvi. 24; Ps. xii. 6; *seven* (i. e. many) *ways*, Deut. xxviii. 25. See also 1 Sam. ii. 5; Job v. 19, where six also is used, Prov. vi. 16, ix. 1; Eccl. xi. 2, where eight also is named; Is. i. 1; Jer. xv. 9; Mic. v. 5; also Matt. xii. 45, *seven spirits*; Mark xvi. 9, *seven devils*; Rev. iv. 5, *seven Spirits*, xv. 1, *seven plagues*. Otho, *Lex. Rab.* p. 411, says that Scripture uses seven to denote plurality. See also Christian authorities quoted by Suicer, *The. Eccl.* s. v. ἑβδομος, Hofmann, *Lex.* s. v. "Septem," and the passages quoted above from Varro, Aristotle, and Ælian, in reference to the heathen value for the number 7.

2. *Ten* as a preferential number is exemplified in the Ten Commandments and the law of Tithes. It plays a conspicuous part in the later Jewish ritual code. See Otho, *Lex. Rab.* p. 410.

To number is (1) מִן, ἀριθμῶς, *numero*. (2.)

לֶחֶם, λογίζομαι, i. e. value, account, as in Is. xlii. 17. In Piel, count, or number, which is the primary notion of the word (Ges. p. 531).

א ד denotes 550, ב 600, ג 700, ד 800, ה 900

5. מִסְפָּר.

6. סְפִירוֹת in plur. Ps. lxxi. 15, *πραγματεῖαι*, *literatura*.

7. מִפְקָד.

3. *Seventy*, as compounded of  $7 \times 10$ , appears frequently, e. g. *seventy-fold* (Gen. iv. 24; Matt. xviii. 22). Its definite use appears in the offerings of 70 shekels (Num. vii. 13, 19, and foll.); the 70 elders (xi. 16); 70 years of captivity (Jer. xxiv. 11). To these may be added the 70 descendants of Noah (Gen. x.), and the alleged Rabbinical qualification for election to the office of Judge among the 71 members of the Great Sanhedrim, of the knowledge of 70 languages (*Sanh.* ii. 6; and *Carjzov, App. Bibl.* p. 576). The number of 72 translators may perhaps also be connected with the same idea.

4. *Five* appears in the table of punishments, of legal requirements (Ex. xxii. 1; Lev. v. 16, xxii. 14, xxvii. 15; Num. v. 7, xviii. 16), and in the five empires of Daniel (Dan. ii.).

5. *Four* is used in reference to the 4 winds (Dan. vii. 2), and the so-called 4 corners of the earth; the 4 creatures, each with 4 wings and 4 faces, of Ezekiel (i. 5 and foll.); 4 rivers of Paradise (Gen. ii. 10); 4 beasts (Dan. vii. and Rev. iv. 6); the 4 equal-sided Temple-chamber (Ez. xl. 47).

6. *Three* was regarded, both by the Jews and other nations, as a specially complete and mystic number (Plato, *De Leg.* iv. 715; Dionys. Halic. iii. c. 12). It appears in many instances in Scripture as a definite number, e. g. 3 feasts (Ex. xxiii. 14, 17; Deut. xvi. 16), the triple offering of the Nazarite, and the triple blessing (Num. vi. 14, 24), the triple invocation (Is. vi. 3; Rev. i. 4), Daniel's 3 hours of prayer (Dan. vi. 10, comp. Ps. lv. 17), the third heaven (2 Cor. xii. 2), and the thrice-repeated vision (Acts x. 16).

7. *Twelve* ( $3 \times 4$ ) appears in 12 tribes, 12 stones in the high-priest's breast-plate, 12 Apostles, 12 foundation-stones, and 12 gates (Rev. xxi. 19-21); 12,000 furlongs of the heavenly city (Rev. xxi. 16); 144,000 sealed (Rev. vii. 4).

8. *Forty* appears in many enumerations; 40 days of Moses (Ex. xxiv. 18); 40 years in the wilderness (Num. xiv. 34); 40 days and nights of Elijah (1 K. xix. 8); 40 days of Jonah's warning to Nineveh (Jon. iii. 4); 40 days of temptation (Matt. iv. 2). Add to these the very frequent use of the number 40 in regnal years, and in political or other periods (Judg. iii. 11, xiii. 1; 1 Sam. iv. 18; 2 Sam. v. 4, xv. 7; 1 K. xi. 42; Ez. xxix. 11, 12; Acts xiii. 21).

9. *One hundred*.—100 cubits' length of the Tabernacle-court (Ex. xxvii. 18); 100 men, i. e. a large number (Lev. xxvi. 8); Gideon's 300 men (Judg. vi. 6); the selection of 10 out of every 100, (xx. 10); 100 men (2 K. iv. 43); leader of 100 men (1 Chr. xii. 14); 100 stripes (Prov. xvii. 10); 100 talents (Ecc. viii. 12); 100 children (vi. 3); 100 cubits' measurements in Ezekiel's Temple (Ez. xl., xli., xlii.); 100 sheep (Matt. xviii. 12); 100 pence (Luke xviii. 28); 100 measures of oil or wheat (Matth. xvi. 6, 7).

10. Lastly, the mystic number 666 (Rev. xiii. 18), of which the earliest attempted explanation is the conjecture of Irenæus, who of three words, Euanthas, Lateinos, and Teitan, prefers the last as fulfilling its conditions best. (For various other interpretations see Calmet, Whitby, and Irenæus, *De Antichrist.* v. c. 29, 30.)

It is evident, on the one hand, that whilst the representative, and also the typical character of certain numbers must be maintained (e. g. Matt. xix. 28), there is, on the other, the greatest danger of overstraining any particular theory on the subject, and thus degenerating into that subtle trifling,

from which neither the Gnostics, nor some also of their orthodox opponents were exempt (see Clem. Alex. *Strom.* vi. c. 11, p. 782, ed. Potter, and August. *l. c.*), and of which the Rabbinical writings present such striking instances. [CHRONOLOGY CENSUS.] H. W. P.

### NUMBERING. [CENSUS.]

NUMBERS (יְבִרֹתַי), from the first word; or

יְבִרֹתַי, from the words יְבִרֹתַי, in i. 1: 'Αριθμοί: *Numeri*: called also by the later Jews יְבִרֹתַי, or יְבִרֹתַי, the fourth book of the Law or Pentateuch. It takes its name in the LXX. and Vulg. (whence our "Numbers") from the double numbering or census of the people; the first of which is given in ec. i.-iv., and the second in ch. xxvi.

A. *Contents*.—The book may be said to contain generally the history of the Israelites from the time of their leaving Sinai, in the second year after the Exodus, till their arrival at the borders of the Promised Land in the fortieth year of their journeyings. It consists of the following principal divisions:—

I. The preparations for the departure from Sinai (i. 1-x. 10).

II. The journey from Sinai to the borders of Canaan (x. 11-xiv. 45).

III. A brief notice of laws given, and events which transpired, during the thirty-seven years' wandering in the wilderness (xv. 1-xix. 22).

IV. The history of the last year, from the second arrival of the Israelites in Kadesh till they reach "the plains of Moab by Jordan near Jericho" (xx. 1-xxvi. 13).

I. (a.) The object of the encampment at Sinai has been accomplished. The Covenant has been made, the Law given, the Sanctuary set up, the Priests consecrated, the service of God appointed, and Jehovah dwells in the midst of his chosen people. It is now time to depart in order that the object may be achieved for which Israel has been sanctified. That object is the occupation of the Promised Land. But this is not to be accomplished by peaceable means, but by the forcible expulsion of its present inhabitants; for "the iniquity of the Amorites is full," they are ripe for judgment, and this judgment Israel is to execute. Therefore Israel must be organized as Jehovah's army: and to this end a mustering of all who are capable of bearing arms is necessary. Hence the book opens with the numbering of the people,<sup>a</sup> chapters i.-iv. These contain, first, the census of all the tribes or clans, amounting in all to six hundred and three thousand, five hundred and fifty, with the exception of the Levites, who were not numbered with the rest (ch. i.); secondly, the arrangement of the camp, and the order of march (ch. ii.); thirdly, the special and separate census of the Levites, who are claimed by God instead of all the first-born, the three families of the tribe having their peculiar offices in the Tabernacle appointed them, both when it was at rest and when they were on the march (ec. iii., iv.).

(b.) Chapters v., vi. Certain laws apparently supplementary to the legislation in Leviticus; the removal of the unclean from the camp (v. 1-4); the law of restitution (v. 5-10); the trial of jeal-

<sup>a</sup> See Kurtz, *Gesch. des Alten Bundes*, ii. 823

ousy (v. 11-31); the law of the Nazarites (vi. 1-21); the form of the priestly blessing (vi. 22-27).

(c.) Chapters vii. 1-x. 10. Events occurring at this time, and regulations connected with them. Ch. vii. gives an account of the offerings of the princes of the different tribes at the dedication of the Tabernacle; ch. viii. of the consecration of the Levites (ver. 89 of ch. vii., and vv. 1-4 of ch. viii. seem to be out of place); ch. ix. 1-14, of the second observance of the Passover (the first in the wilderness) on the 14th day of the second month, and of certain provisions made to meet the case of those who by reason of defilement were unable to keep it. Lastly, ch. ix. 15-23 tells how the cloud and the fire regulated the march and the encampment; and x. 1-10, how two silver trumpets were employed to give the signal for public assemblies, for war, and for festal occasions.

II. March from Sinai to the borders of Canaan.

(a.) We have here, first, the order of march described (x. 14-28); the appeal of Moses to his father-in-law, Hobab, to accompany them in their journeys; a request urged probably because, from his desert life, he would be well acquainted with the best spots to encamp in, and also would have influence with the various wandering and predatory tribes who inhabited the peninsula (29-32); and the chant which accompanied the moving and the resting of the ark (vv. 35, 36).

(b.) An account of several of the stations and of the events which happened at them. The first was at Taberah, where, because of their impatient murmurings, several of the people were destroyed by lightning (these belonged chiefly, it would seem, to the motley multitude which came out of Egypt with the Israelites); the loathing of the people for the manna; the complaint of Moses that he cannot bear the burden thus laid upon him, and the appointment in consequence of seventy elders to serve and help him in his office (xi. 10-29); the quails sent, and the judgment following thereon, which gave its name to the next station, Kibroth-hattaavah (the graves of lust), xi. 31-35 (cf. Ps. lxxxviii. 30, 31, cvi. 14, 15); arrival at Hazeroth, where Aaron and Miriam are jealous of Moses, and Miriam is in consequence smitten with leprosy (xii. 1-15); the sending of the spies from the wilderness of Paran (*et-Typh*), their report, the refusal of the people to enter Canaan, their rejection in consequence, and their rash attack upon the Amalekites, which resulted in a defeat (xii. 16-xiv. 45).

III. What follows must be referred apparently to the thirty-seven years of wanderings; but we have no notices of time or place. We have laws respecting the meat and drink offerings, and other sacrifices (xv. 1-31); an account of the punishment of a Sabbath-breaker, perhaps as an example of the presumptuous sins mentioned in vv. 30, 31 (xv. 32-35); the direction to put fringes on their garments as mementos (xv. 37-41); the history of the rebellion of Korah, Dathan, and Abiram, and the murmuring of the people (xvi.); the budding of Aaron's rod as a witness that the tribe of Levi was chosen (xvii.); the direction that Aaron and his sons should bear the iniquity of the people, and the duties of the priests and Levites (xviii.); the law of the water of purification (xix.).

IV. (a.) The narrative returns abruptly to the second encampment of the Israelites in Kadesh. Here Miriam dies, and the people murmur for water, and Moses and Aaron, "speaking unadvisedly," are not allowed to enter the Promised

Land (xx. 1-13). They intended perhaps, as before, to enter Canaan from the south. This, however, was not to be permitted. They therefore desired a passage through the country of Edom. Moses sent a conciliatory message to the king, asking permission to pass through, and promising carefully to abstain from all outrage, and to pay for the provisions which they might find necessary. The jealousy, however, of this fierce and warlike people was aroused. They refused the request, and turned out in arms to defend their border. And as those almost inaccessible mountain passes could have been held by a mere handful of men against a large and well-trained army, the Israelites abandoned the attempt as hopeless and turned southwards, keeping along the western borders of Idumæa till they reached Ezion-geber (xx. 14-21).

On their way southwards they stop at Mount Hor, or rather at Moserah, on the edge of the Edomite territory; and from this spot it would seem that Aaron, accompanied by his brother Moses and his son Eleazar, quitted the camp in order to ascend the mountain. Mount Hor lying itself within the Edomite territory, whilst it might have been perilous for a larger number to attempt to penetrate it, these unarmed wayfarers would not be molested, or might escape detection. Bunsen suggests that Aaron was taken to Mount Hor, in the hope that the fresh air of the mountain might be beneficial to his recovery: but the narrative does not justify such a supposition.

After Aaron's death, the march is continued southward; but when the Israelites approach the head of the Akabah at the southernmost point of the Edomite territory, they again murmur by reason of the roughness of the way, and many perish by the bite of venomous serpents (xx. 22-xxi. 9). The passage (xxi. 1-3) which speaks of the Canaanite king of Arad as coming out against the Israelites is clearly out of place, standing as it does after the mention of Aaron's death on Mount Hor. Arad is in the south of Palestine. The attack therefore must have been made whilst the people were yet in the neighborhood of Kadesh. The mention of Hormah also shows that this must have been the case (comp. xiv. 45). It is on this second occasion that the name of Hormah is said to have been given. Either therefore it is used proleptically in xiv. 45, or there is some confusion in the narrative. What "the way of Atharim" (A. V. "the way of the spies") was, we have no means now of ascertaining.

(b.) There is again a gap in the narrative. We are told nothing of the march along the eastern edge of Edom, but suddenly find ourselves transported to the borders of Moab. Here the Israelites successively encounter and defeat the kings of the Amorites and of Bashan, wresting from the latter territory and permanently occupying it (xxi. 10-35). Their successes alarm the king of Moab, who, distrusting his superiority in the field, sends for a magician to curse his enemies; hence the episode of Balaam (xxiii. 1-xxv. 25). Other artifices are employed by the Moabites to weaken the Israelites, especially through the influence of the Moabitish women (xxv. 1), with whom the Midianites (ver. 6) are also joined; this evil is averted by the zeal of Phinehas (xxv. 7, 8); a second numbering of the Israelites takes place in the plains of Moab preparatory to their crossing the Jordan (xxvi.). A question arises as to the inheritance of daughters, and a decision is given thereon (xxvii. 1-11); Moser

is warned of his death, and Joshua appointed to succeed him (xxvii. 12-23). Certain laws are given concerning the daily sacrifice, and the offerings for sabbaths and festivals (xxviii., xxix.); and the law respecting vows (xxx.). the conquest of the Midianites is narrated (xxxii.); and the partition of the country east of the Jordan among the tribes of Reuben and Gad, and the half-tribe of Manasseh (xxxii.). Then follows a recapitulation, though with some difference, of the various encampments of the Israelites in the desert (xxxiii. 1-49); the command to destroy the Canaanites (xxxiii. 50-56); the boundaries of the Promised Land, and the men appointed to divide it (xxxiv.); the appointment of the cities of the Levites and the cities of refuge (xxxv.); further directions respecting heiresses, with special reference to the case mentioned in ch. xxvii., and conclusion of the book (xxxvi.).

B. *Integrity.*—This, like the other books of the Pentateuch, is supposed by many critics to consist of a compilation from two or three, or more, earlier documents. According to De Wette, the following portions are the work of the Elohist [PENTATEUCH]: Ch. i. 1-x. 28; xiii. 2-16 (in its original, though not in its present form); xv.; xvi. 1, 2-11, 16-23, 24 (?); xvii.; xix.; xx. 1-13, 22-29; xxv.-xxxi. (except perhaps xxvi. 8-11); xxxii. 5, 28-42 (vv. 1-4 uncertain); xxxiii.-xxxvi. The rest of the book is, according to him, by the Jehovist or later editor. Von Lengerke (*Kenann*, s. xxxi.) and Stähelin (§ 23) make a similar division, though they differ as to some verses, and even whole chapters. Vaihinger (in Herzog's *Encyclopädie*, art. "Pentateuch") finds traces of three distinct documents, which he ascribes severally to the pre-Elohist, the Elohist, and the Jehovist. To the first he assigns ch. x. 29-36; xi. 1-12, 16 (in its original form); xx. 14-21; xxi. 1-9, 13-35; xxxii. 33-42; xxxiii. 55, 56. To the Elohist belong ch. i. 1-x. 28; xi. 1-xii. 16; xiii. 1-xx. 13; xx. 22-29; xxi. 10-12; xxii. 1; xxv. 1-xxxii. 54; xxxiii. 1-32; xxxiv. 1-xxxvi. 19. To the Jehovist, xi. 1-xii. 16 (*überarbeitet*); xxii. 2-xxiv. 25; xxxi. 8, &c.

But the grounds on which this distinction of documents rests are in every respect most unsatisfactory. The use of the divine names, which was the starting-point of this criticism, ceases to be a criterion; and certain words and phrases, a particular manner or coloring, the narrative of miracles or prophecies, are supposed to decide whether a passage belongs to the earlier or the later documents. Thus, for instance, Stähelin alleges as reasons for assigning cc. xi., xii. to the Jehovist, the coming down of Jehovah to speak with Moses, xi. 17, 25; the pillar of a cloud, xii. 5; the relation between Joshua and Moses, xi. 28, as in Ex. xxxiii., xxxiv.; the seventy elders, xi. 16, as Ex. xxiv. 1, and so on. So again in the Jehovistic section, xiii., xiv., he finds traces or "the author of the First Legislation" in one passage (xiii. 2-17), because of the use of the word **בְּטֵרֵם**, signifying "a tribe," and **בְּשֵׁי**, as in Num. i. and vii. But **בְּשֵׁי** is used also by the supposed supplementist, as in Ex. xxii. 27, xxxiv. 31; and that **בְּטֵרֵם** is not peculiar to the older documents has been shown by Keil (*Comm. on Joshua*, s. xix.). Von Lengerke goes still further, and cuts off xiii. 2-16 altogether from what follows. He thus makes the story of the spies, as given by the Elohist, strangely maimed. We only hear of

their being sent to Canaan, but nothing of their return and their report. The chief reason for this separation is that in xiii. 27 occurs the Jehovistic phrase, "flowing with milk and honey," and some references to other earlier Jehovistic passages. De Wette again finds a repetition in xiv. 26-38 of xiv. 11-25, and accordingly gives these passages to the Elohist and Jehovist respectively. This has more color of probability about it, but has been answered by Ranke (*Untersuch.* ii. s. 197 ff.). Again, ch. xvi. is supposed to be a combination of two different accounts, the original or Elohist document having contained only the story of the rebellion of Korah and his company, whilst the Jehovist mixed up with it the insurrection of Dathan and Abiram, which was directed rather against the temporal dignity than against the spiritual authority of Moses. But it is against this view, that, in order to justify it, vv. 12, 14, 27, and 32, are treated as interpolations. Besides, the discrepancies which it is alleged have arisen from the fusing of the two narratives disappear when fairly looked at. There is no contradiction, for instance, between xvi. 19, where Korah appears at the tabernacle of the congregation, and ver. 27, where Dathan and Abiram stand at the door of their tents. In the last passage Korah is not mentioned, and, even if we suppose him to be included, the narrative allows time for his having left the Tabernacle and returned to his own tent. Nor again, does the statement, ver. 35, that the 250 men who offered incense were destroyed by fire, and who had, as we learn from ver. 2, joined the leaders of the insurrection, Korah, Dathan, and Abiram, militate against the narrative in ver. 32, according to which Dathan and Abiram and all that appertained unto Korah were swallowed up alive by the opening of the earth. Further, it is clear, as Keil remarks (*Einleit.* p. 94), that the earlier document (*die Grundschrift*) implies that persons belonging to the other tribes were mixed up in Korah's rebellion, because they say to Moses and Aaron (ver. 3), "All the congregation is holy," which justifies the statement in vv. 1, 2, that, besides Korah the Levite, the Reubenites Dathan, Abiram, and On, were leaders of the insurrection.

In ch. xii. we have a remarkable instance of the jealousy with which the authority of Moses was regarded even in his own family. Considering the almost absolute nature of that authority, this is perhaps hardly to be wondered at. On the other hand, as we are expressly reminded, there was everything in his personal character to disarm jealousy. "Now the man Moses was very meek above all the men which were upon the face of the earth," says the historian (ver. 3). The pretext for the outburst of this feeling on the part of Miriam and Aaron was that Moses had married an Ethiopian woman (a woman of Cush). This was probably, as Ewald suggests, a second wife married after the death of Zipporah. But there is no reason for supposing, as he does (*Gesch.* ii. 229, *note*), that we have here a confusion of two accounts. He observes that the words of the brother and sister "Hath the Lord indeed spoken only by Moses, hath He not also spoken by us?" show that the real ground of their jealousy was the apparent superiority of Moses in the prophetic office; whereas, according to the narrative, their dislike was occasioned by his marriage with a foreigner and a person of inferior rank. But nothing surely can be more natural than that the long pent-up

feeling of jealousy should have fastened upon the marriage as a pretext to begin the quarrel, and then have shown itself in its true character in the words recorded by the historian.

It is not perhaps to be wondered at that the episode of Balaam (xxii. 2-xxiv. 25) should have been regarded as a later addition. The language is peculiar, as well as the general cast of the narrative. The prophecies are vivid and the diction of them highly finished: very different from the rugged, vigorous fragments of ancient poetry which meet us in ch. xxi. On these grounds, as well as on the score of the distinctly Messianic character of Balaam's prophecies, Ewald gives this episode to his Fifth Narrator, or the latest editor of the Pentateuch. This writer he supposes to have lived in the former half of the 8th century B. C., and hence he accounts for the reference to Assyria and the Cypriotes (the Kittim); the latter nation about that time probably infesting as pirates the coasts of Syria, whereas Assyria might be joined with Eber, because as yet the Assyrian power, though hostile to the southern nations, was rather friendly than otherwise to Judah. The allusions to Edom and Moab as vanquished enemies have reference, it is said, to the time of David (Ewald, *Gesch.* i. 143 ff., and compare ii. 277 ff.). The prophecies of Balaam, therefore, on this hypothesis, are *vaticinia ex eventu*, put into his mouth by a clever, but not very scrupulous writer of the time of Isaiah, who, finding some mention of Balaam as a prince of Midian in the older records, put the story into shape as we have it now. But this sort of criticism is so purely arbitrary that it scarcely merits a serious refutation, not to mention that it rests entirely on the assumption that in prophecy there is no such thing as prediction. We will only observe that, considering the peculiarity of the man and of the circumstances as given in the history, we might expect to find the narrative itself, and certainly the poetical portions of it, marked by some peculiarities of thought and diction. Even granting that this episode is not by the same writer as the rest of the book of Numbers, there seems no valid reason to doubt its antiquity, or its rightful claim to the place which it at present occupies. Nothing can be more improbable than that, as a later invention, it should have found its way into the Book of the Law.

At any rate, the picture of this great magician is wonderfully in keeping with the circumstances under which he appears and with the prophecies which he utters. This is not the place to enter into all the questions which are suggested by his appearance on the scene. How it was that a heathen became a prophet of Jehovah we are not informed; but such a fact seems to point to some remains of a primitive revelation, not yet extinct, in other nations besides that of Israel. It is evident that his knowledge of God was beyond that of most heathen, and he himself could utter the passionate wish to be found in his death among the true servants of Jehovah; but, because the soothsayer's craft promised to be gainful, and the profession of it gave him an additional importance and influence in the eyes of men like Balak, he sought to combine it with his higher vocation. There is nothing more remarkable in the early history of Israel than Balaam's appearance. Summoned from his home by the Euphrates, he stands by his red altar-fires, weaving his dark and subtle sorceries, or goes to seek for enchantment, hoping, as he looked down

upon the tents of Israel among the acacia-groves of the valley, to wither them with his word, yet constrained to bless, and to foretell their future greatness.

The book of Numbers is rich in fragments of ancient poetry, some of them of great beauty, and all throwing an interesting light on the character of the times in which they were composed. Such, for instance, is the blessing of the high-priest (vi. 24-26):—

"Jehovah bless thee and keep thee:  
Jehovah make his countenance shine upon thee,  
And be gracious unto thee:  
Jehovah lift up his countenance upon thee,  
And give thee peace."

Such too are the chants which were the signal for the ark to move when the people journeyed, and for it to rest when they were about to encamp:—

"Arise, O Jehovah! let thine enemies be scattered;  
Let them also that hate thee flee before thee."

And,—  
"Return, O Jehovah,  
To the ten thousands of the families of Israel."

In ch. xxi. we have a passage cited from a book called the "Book of the Wars of Jehovah." This was probably a collection of ballads and songs composed on different occasions by the watch-fires of the camp, and for the most part, though not perhaps exclusively, in commemoration of the victories of the Israelites over their enemies. The title shows us that these were written by men imbued with a deep sense of religion, and who were therefore foremost to acknowledge that not their own prowess, but Jehovah's right hand, had given them the victory when they went forth to battle. Hence it was called, not "The Book of the Wars of Israel," but "The Book of the Wars of Jehovah." Possibly this is the book referred to in Ex. xvii. 14, especially as we read (ver. 16) that when Moses built the altar which he called Jehovah-Nissi (Jehovah is my banner), he exclaimed "Jehovah will have war with Amalek from generation to generation." This expression may have given the name to the book.

The fragment quoted from this collection is difficult, because the allusions in it are obscure. The Israelites had reached the Arnon, "which," says the historian, "forms the border of Moab, and separates between the Moabites and Amorites." "Wherefore it is said," he continues, "in the Book of the Wars of Jehovah,—

"Vaheb in Suphah and the torrent-beds;  
Arnon and the slope of the torrent-beds  
Which turneth to where Ar lieth,  
And which leaneth upon the border of Moab."

The next is a song which was sung on the digging of a well at a spot where they encamped, and which from this circumstance was called Beër, or "The Well." It runs as follows:—

"Spring up, O well! sing ye to it:  
Well, which the princes dug,  
Which the nobles of the people bored,  
With the sceptre of office, with their staves."

This song, first sung at the digging of the well, was afterwards no doubt commonly used by those who came to draw water. The maidens of Israel chanted it one to another, verse by verse, as they toiled at the bucket, and thus beguiled their labor. "Spring up, O well!" was the burden or refrain

of the song, which would pass from one mouth to another at each fresh coil of the rope, till the full bucket reached the well's mouth. But the peculiar charm of the song lies not only in its antiquity, but in the characteristic touch which so manifestly connects it with the life of the time to which the narrative assigns it. The one point which is dwelt upon is, that the leaders of the people took their part in the work, that they themselves helped to dig the well. In the new generation, who were about to enter the Land of Promise, a strong feeling of sympathy between the people and their rulers had sprung up, which augured well for the future, and which left its stamp even on the ballads and songs of the time. This little carol is fresh and lusty with young life; it sparkles like the water of the well whose springing up first occasioned it; it is the expression, on the part of those who sung it, of lively confidence in the sympathy and coöperation of their leaders, which, manifested in this one instance, might be relied upon in all emergencies (Ewald, *Gesch.* ii. 264, 265).

Immediately following this "Song of the Well," comes a song of victory, composed after a defeat of the Moabites and the occupation of their territory. It is in a taunting, mocking strain; and is commonly considered to have been written by some *Israelitish* bard on the occupation of the Amorite territory. Yet the manner in which it is introduced would rather lead to the belief that we have here the translation of an old Amorite ballad. The history tells us that when Israel approached the country of Sihon they sent messengers to him, demanding permission to pass through his territory. The request was refused. Sihon came out against them, but was defeated in battle. "Israel," it is said, "smote him with the edge of the sword, and took his land in possession, from the Arnon to the Jabbok and as far as the children of Ammon; for the border of the children of Ammon was secure (*i. e.* they made no encroachments upon Ammonitish territory). Israel also took all these cities, and dwelt in all the cities of the Amorites in Heshbon, and all her daughters (*i. e.* lesser towns and villages)." Then follows a little scrap of Amorite history: "For Heshbon is the city of Sihon, king of the Amorites, and he had waged war with the former king of Moab, and had taken from him all his land as far as the Arnon. *Wherefore* the ballad-singers (הַשִּׁירִים) say,—

"Come ye to Heshbon,  
Let the city of Sihon be built and established!  
For fire went forth from Heshbon,

A flame out of the stronghold (צִיּוֹן) of Sihon,  
Which devoured Ar of Moab,  
The lords *a* of the high places of Arnon.  
Woe to thee, Moab!

Thou art undone, O people of Chemosh!  
He (*i. e.* Chemosh thy god) hath given up his sons as fugitives,

And his daughters into captivity,  
To Sihon king of the Amorites.  
Then we cast them down; *b* Heshbon perished even unto Dibon.

And we laid (it) waste unto Nophah, which (reacheth) unto Médebá. "

<sup>a</sup> Or "the possessors of, the men of, the high places," etc.

<sup>b</sup> So in Zuntz's Bible, and this is the simplest ren-

If the song is of Hebrew origin, then the former part of it is a biting taunt, "Come, ye Amorites, into your city of Heshbon, and build it up again. Ye boasted that ye had burnt it with fire and driven out its Moabite inhabitants; but now we are come in our turn and have burnt Heshbon, and driven you out as ye once burnt it and drove out its Moabite possessors."

C. The alleged discrepancies between many statements in this and the other books of the Pentateuch, will be found discussed in other articles, DEUTERONOMY; EXODUS; PENTATEUCH.

T. J. C.

NUMENIUS (Νουμήνιος [*belonging to, or born at the time of, the new moon*]: *Numenius*), son of Antiochus, was sent by Jonathan on an embassy to Rome (1 Macc. xii. 16) and Sparta (xii. 17), to renew the friendly connections between these nations and the Jews, c. B. C. 144. It appears that he had not returned from his mission at the death of Jonathan (1 Macc. xiv. 22, 23). He was again dispatched to Rome by Simon, c. B. C. 141 (1 Macc. xiv. 24), where he was well received and obtained letters in favor of his countrymen, addressed to the various eastern powers dependent on the Republic, B. C. 139 (1 Macc. xv. 15 ff.). [LUCIUS.] B. F. W.

NUN (נֹון, or נֹון, 1 Chr. vii. 27 [*fish*]: *Nunh*: *Nun*). The father of the Jewish captain Joshua (Ex. xxxiii. 11, &c.). His genealogical descent from Ephraim is recorded in 1 Chr. vii. Nothing is known of his life, which was doubtless spent in Egypt. The mode of spelling his name in the LXX. has not been satisfactorily accounted for. Gesenius asserts that it is a very early mistake of transcribers, who wrote NATH for NATN. But Ewald (*Gesch.* ii. 298) gives some good etymological reasons for the more probable opinion that the final N is omitted intentionally. [See also NON.]

W. T. B.

dering. Ewald and Bunsen: "We burned them Others: "We shot at them."

**NURSE.** It is clear, both from Scripture and from Greek and Roman writers, that in ancient times the position of the nurse, wherever one was maintained, was one of much honor and importance. (See Gen. xxiv. 59, xxxv. 8; 2 Sam. iv. 4; 2 K. xi. 2; 3 Mac. i. 20; Hom. *Od.* ii. 361, xix. 15, 251, 466; Eurip. *Ion*, 1357; *Hippol.* 267 and fol.; Virg. *Æn.* vii. 1.) The same term is applied to a foster-father or mother, *e. g.* Num. xi. 12; Ruth iv. 16; Is. xlix. 23. In great families male servants, probably eunuchs in later times, were entrusted with the charge of the boys, 2 K. x. 1, 5. [CHILDREN.] See also *Kūran*, iv. 63, Tegg's ed.; Mrs. Poole, *Englv. in Eg.* iii. 201.

H. W. P.

**NUTS.** The representative in the A. V. of the words *botnim* and *egōz*.

1. *Botnim* (בֹּתִימִים; *τερέβινθος*: *terebinthus*). Among the good things of the land which the sons of Israel were to take as a present to Joseph in Egypt, mention is made of *botnim*. There can scarcely be a doubt that the *botnim* denote the fruit of the Pistachio-tree (*Pistacia vera*), though

*Pistacia vera.*

most modern versions are content with the general term *nuts*. (See Bochart, *Chanaan*, i. 10.) For other attempted explanations of the Hebrew term, comp. Celsius, *Hierob.* i. 24. The LXX. and Vulg. read *terebinth*, the Persian version has *pusteh*, from which it is believed the Arabic *fostak* is derived, whence the Greek *πιστάκια*, and the Latin *pistacia*;

the *Pistacia vera* is in form not unlike the *P. terebinthus*, another species of the same genus of plants; it is probable therefore that the *terebinthus* of the LXX. and Vulg. is used generically, and is here intended to denote the pistachio-tree, for the *terebinth* does not yield edible fruit.<sup>b</sup> Syria and Palestine have been long famous for pistachio-trees; see Dioscorides (i. 177), and Pliny (xiii. 5), who says "Syria has several trees that are peculiar to itself; among the nut-trees there is the well-known pistacia;" in another place (xv. 22) he states that Vitellius introduced this tree into Italy, and that Flaccus Pompeius brought it at the same time into Spain. The district around Aleppo is especially celebrated for the excellence of the pistachio-nuts, see Russell (*Hist. of Alep.* i. 82, 2d ed.) and Gale (*de Fac. Alim.* 2, p. 612), who mentions Berrhœa (Aleppo) as being rich in the production of these trees; the town of Batna in the same district is believed to derive its name from this circumstance. Betonim, a town of the tribe of Gad (Josh. xiii. 26), has in all probability a similar etymology. [BETONIM.] Bochart draws attention to the fact that pistachio-nuts are mentioned together with almonds in Gen. xliii. 11, and observes that Dioscorides, Theophrastus, and others, speak of the pistachio-tree conjointly with the almond-tree. As there is no mention in early writers of the *Pistacia vera* growing in Egypt (see Celsius, *Hierob.* i. 27), it was doubtless not found there in Patriarchal times, wherefore Jacob's present to Joseph would have been most acceptable. There is scarcely any allusion to the occurrence of the *Pistacia vera* in Palestine amongst the writings of modern travellers; Kitto (*Phys. Hist. Pal.* p. 323) says "it is not much cultivated in Palestine, although found there growing wild in some very remarkable positions, as on Mount Tabor, and on the summit of Mount Attarous" (see Burckhardt, *Syria*, p. 334). Dr. Thomson (*Land and Book*, p. 267) says that the *terebinth* trees near *Mais el-Jebel* had been grafted with the pistachio from Aleppo by order of Ibrahim Pasha, but that "the peasants destroyed the grafts, lest their crop of oil from the berries of these trees should be diminished." Dr. Hooker saw only two or three pistachio-trees in Palestine. These were outside the north gate of Jerusalem. But he says the tree is cultivated at Beirut and elsewhere in Syria. The *Pistacia vera* is a small tree varying from 15 to 30 ft. in height; the male and female flowers grow on separate trees; the fruit, which is a green-colored oily kernel, not unlike an almond, is inclosed in a brittle shell. Pistachio-nuts are much esteemed as an article of diet both by Orientals and Europeans; the tree, which belongs to the natural order *Anacardiaceæ*, extends from Syria to Bokhara, and is naturalized over the south of Europe; the nuts are too well known to need minute description.

2. *Egōz* (עֲגֹז; *καρθα*: *nuz*) occurs only in Cant. vi. 11, "I went into the garden of nuts."

a 1. עֲגֹז, *m.*, *τιθρός*, *nutrix*, *nutritius*; עֲגֹזָה, *τῆθρός*, *nutrix*, from עָגַז, to carry (see Is. lx. 4).

2. עֲגֹזָה, part. f. Hiph., from עָגַז, "suck," with עֲגֹזָה, *γυνή* *τροφείουσα* (Ex. ii. 7). Connected with this is the doubtful *v. rōz* עֲגֹזָה, *θάλξω*, *nutrio* (see p. 867).

3. In N. T. *τροφός*, *nutrix* (1 Thess. ii. 7)

b The Arabic *بَطْم* (*butm*) appears to be also used generically. It is more generally applied to the *terebinth*, but may comprehend the pistachio-tree, as Genesis conjectures, and Dr. Royle (*Kitto's Cycl.*) has proved. He says the word is applied in some Arabic works to a tree which has green-colored kernels. This must be the *Pistacia vera*.

The Hebrew word in all probability is here to be understood to refer to the *Walnut-tree*; the Greek *καρύα* is supposed to denote the tree, *κάρυον* the nut (see Soph. *Fr.* 892). Although *κάρυον* and *ναχ* may signify any kind of *nut*, yet the *walnut*, as the nut *καρ' ἐλοχόν*, is more especially that which is denoted by the Greek and Latin terms (see Casaubon *on Athenæus*, ii. 65; Ovid, *Nux Elegia*; Celsius, *Hierob.* i. 28). The Hebrew term is evidently allied to the Arabic *juwez*, which is from a Persian word of very similar form; whence Abul' Fadli (in Celsius) says "the Arabs have borrowed the word *Gjous* from the Persian; in Arabic the term is *Chusf*, which is a tall tree." The *Chusf* or *Chusf*, is translated by Freytag, "an esculent nut, the walnut." The Jewish Rabbis understand the walnut by *Egôz*.

According to Josephus (*B. J.* iii. 10, § 8) the walnut-tree was formerly common, and grew most luxuriantly around the lake of Gennesaret; Schulz, speaking of this same district, says he often saw walnut-trees growing there large enough to shelter four-and-twenty persons. See also Kitto (*Phys. Hist. Pal.* p. 250) and Burckhardt (*Syria*, p. 265). The walnut-tree (*Juglans regia*) belongs to the natural order *Juglandaceæ*; it is too well known to require any description. W. H.

\* The walnut is cultivated very extensively in Syria. At *Jebâ el-Halâmî*, on the side of *Jebel Kishân*, inland about five hours from Sidon, there are large orchards of this tree, and the nuts are very cheap. I have bought them at a dollar and a quarter a thousand, including their transportation to a village two days distant. They are of the best quality. The common name for them in Syria is

جوز, which is undoubtedly the same as the Hebrew (ג'וז).

G. E. P.

**NYPHNAS** (Νυμφᾶς [*spouse, bridegroom*]: *Nymphas*), a wealthy and zealous Christian in Laodicea (Col. iv. 15). His house was used as a place of assembly for the Christians; and hence Grotius, making an extraordinarily high estimate of the probable number of Christians in Laodicea, infers that he must have lived in a rural district.

In the Vatican MS. (B) this name is taken for that of a woman; and the reading appears in some Latin writers, as pseudo-Ambrose, pseudo-Anselm, and it has been adopted in Lachmann's N. T. The common reading, however, is found in the Alexandrian MS. and in that of Ephrem Syrus (A and C), and is the only one known to the Greek Fathers. W. T. B.

O.

**OAK.** The following Hebrew words, which appear to be merely various forms of the same root,<sup>a</sup> occur in the O. T. as the names of some species of oak, namely, *el*, *elâh*, *elôn*, *ûân*, *allâh*, and *allôn*.

1. *El* (אֵל): LXX. Vat. *τερέβινθος*; Alex. *ερέμινθος*; Aq., Sym., Theod., *δρῦς*: *compestris* occurs only in the sing. number in Gen. xiv. 6

<sup>a</sup> From אֵל, אֵל, or אֵל, "to be strong."

("El-paran"). It is uncertain whether *el* should be joined with *Paran* to form a proper name, or whether it is to be taken separately, as the "terebinth," or the "oak," or the "grove" of *Paran*. Onkelos and Saadias follow the Vulg., whence the "plain" of the A. V. (margin). (See Stanley, *S. G. P.* pp. 519, 520, App.) Rosemüller (*Schol.* ad l. c.) follows Jarchi (*Comment. in Pent.* ad Gen. xiv. 6), and is for retaining the proper name. Three plural forms of *el* occur: *elîm*, *elôth*, and *elath*. *Elîm*, the second station where the Israelites halted after they had crossed the Red Sea, in all probability derived its name from the seventy palm-trees there; the name *el*, which more particularly signifies an "oak," being here put for any grove or plantation. Similarly the other plural form, *elôth* or *elôth*, may refer, as Stanley (*S. G. P.* p. 20) conjectures, to the palm-grove at Akaba. The plural *elîm* occurs in Is. i. 29, where probably "oaks" are intended, in Is. lxi. 3, and Ez. xxxi. 14, any strong flourishing trees may be denoted.

2. *Elâh* (אֵלָהּ): *τερέβινθος*, *δρῦς*, *Ἡλᾶ, δένδρον, δένδρον συσκίαζον*, Synm.; *πλάτανος* u. Hos. iv. 13; *δένδρον σύσκιον*: *terebinthus, quercus*. "oak," "elah," "teil-tree" in Is. vi. 13: "elms" in Hos. iv. 13). There is much difficulty in determining the exact meanings of the several varieties of the term mentioned above: the old versions are so inconsistent that they add but little by way of elucidation. Celsius (*Hierob.* i. 34) has endeavored to show that *el*, *elîm*, *elôn*, *elâh*, and *allâh*, all stand for the terebinth-tree (*Pistacia terebinthus*), while *allôn* alone denotes an oak. Royle (in Kitto's *Cyc. art.* "Alah") agrees with Celsius in identifying the *elâh* (אֵלָהּ) with the terebinth, and the *allôn* (אֵלֹן) with the oak.

Hiller (*Hierophyt.* i. 348) restricts the various forms of this word to different species of oak, and says no mention is made of the terebinth in the Hebrew Scriptures. Rosemüller (*Bib. Not.* p. 237) gives the terebinth to *el* and *elâh*, and the oak to *allâh*, *allôn*, and *elôn* (אֵלֹן).

For the various opinions upon the meaning of these kindred terms, see Ges. *Thees.* pp. 47, 51, 103, and Stanley, *S. G. P.* p. 519.

That various species of oak may well have deserved the appellation of mighty trees is clear, from the fact that noble oaks are to this day occasionally seen in Palestine and Lebanon. On this subject we have been favored with some valuable remarks from Dr. Hooker, who says, "The forests have been so completely cleared off all Palestine, that we must not look for existing evidence of what the trees were in Biblical times and antecedently. In Syria proper there are only three common oaks. All form large trees in many countries, but very rarely now in Palestine; though that they do so occasionally is proof enough that they once did." Abraham's oak, near Hebron, is a familiar example of a noble tree of one species. Dr. Robinson (*Bibl. Res.* ii. 81) has given a minute account of it; and "his description," says Dr. Hooker, "is good, and his measurements tally with mine." If we examine the chains of the terebinth to represent the *elâh*, as Celsius and others assert, we shall see that in point of size it cannot compete with some of the oaks of Palestine; and that therefore, if *elâh* ever denotes the terebinth, which

we by no means assert it does not, the term etymologically is applicable to it only in a second degree; for the *Pistacia terebinthus*, although it also occasionally grows to a great size, "spreading its boughs," as Robinson (*Bibl. Res.* ii. 222) observes, "far and wide like a noble oak," yet it does not form so conspicuously a good tree as either the *Quercus pseudo-coccifera* or *Q. agrilops*. Dr. Thomson (*Land and Book*, p. 243) remarks on this point: "There are more mighty oaks here in this immediate vicinity (*Mejdel es-Sheims*) than there are terebinths in all Syria and Palestine together. I have travelled from end to end of these countries, and across them in all directions, and speak with absolute certainty." At p. 600, the same writer remarks, "We have oaks in Lebanon twice the size of this (Abraham's oak), and every way more striking and majestic." Dr. Hooker has no doubt that Thomson is correct in saying there are far finer oaks in Lebanon; "though," he observes, "I did not see any larger, and only one or two at all near it. Cyril Graham told me there were forests of noble oaks in Lebanon north of the

cedar valley." It is evident from these observations that two oaks (*Quercus pseudo-coccifera* and *Q. agrilops*) are well worthy of the name of mighty trees; though it is equally true that over a greater part of the country the oaks of Palestine are at present merely bushes.

3. *Elôn* (עֵלֹן): *ἡ δρῦς ἡ ἰσφηλή, ἡ βάλανος, ἡ ἁλών*: *convallis illustris, quercus*) occurs frequently in the O. T., and denotes, there can be little doubt, some kind of oak. The A. V., following the Targum, translates *elôn* by "plain." (See Stanley, *S. G. P.* p. 520, App.)

4. *Ilân* (אֵילָן): *δένδρον*: *arbor*) is found only in Dan. iv. as the tree which Nebuchadnezzar saw in his dream. The word appears to be used for any "strong tree," the oak having the best claim to the title, to which tree probably indirect allusion may be made.

5. *Allâh* (אֵילָה): *ἡ τέρμινθος*: Aq. and Symw *ἡ δρῦς*: *quercus*) occurs only in Josh. xxiv. 26, and is correctly rendered "oak" by the A. V.

ABRAHAM'S OAK IN THE PLAINS OF MAMRE

6. *Allôn* (אֵילָן): *ἡ βάλανος, δένδρον βαλάνου, δρῦς*: *quercus*) is uniformly rendered "oak" by the A. V., and has always been so understood by commentators. It should be stated that *allôn* occurs in Hos. iv. 13, as distinguished from the other form *elâh*; consequently it is necessary to suppose that two different trees are signified by the terms. We believe, for reasons given above, that the difference is specific, and not generic—that two species of oaks are denoted by the Hebrew terms: *allôn* may stand for an evergreen oak, as the *Quercus pseudo-coccifera*, and *elâh* for one of the deciduous kinds. The *Pistacia vera* could never be mistaken for an oak. If, therefore,

specific allusion was ever made to this tree, we cannot help believing that it would have been under another name than any one of the numerous forms which are used to designate the different species of the genus *Quercus*; perhaps under a Hebrew form allied to the Arabic *butm*, "the terebinth." The oak-woods of Bashan are mentioned in Is. ii. 13; Ez. xxvii. 6; Zech. xi. 2. The oaks of Bashan belong in all probability to the species known as *Quercus agrilops*, the Valonia oak, which is said to be common in Gilead and Bashan. Sacrifices were offered under oaks (Hos. iv. 13; Is. i. 29); of oak-timber the Tyrians manufactured oars (Ez. xxvii. 6), and idolaters their images (Is.

div. 14); under the shade of oak-trees the dead were sometimes interred (Gen. xxxv. 8; see also 1 Sam. xxxi. 13).

*Quercus pseudo-coccifera*.

Another species of oak, besides those named above, is the *Quercus infectoria*, which is common in Galilee and Samaria. It is rather a small tree in Palestine, and seldom grows above 30 ft. high, though in ancient times it might have been a noble tree.

For a description of the oaks of Palestine, see Dr. Hooker's paper read before the Linnean Society, June, 1861, [and Tristram's *Nat. Hist. of the Bibl.*, pp. 367-371.] W. H.

*Quercus agrifolia*.

\* The *Quercus pseudo-coccifera*, the evergreen oak of Syria, is the largest species. It is the one usually found near the Welies or tombs of the prophets.

\* 1 מַלְכָּה, ἀπά, *maledictio, juramentum*, with sanctity α ἱερός, the name of God (Ges. pp. 44, 99).

*Q. agrifolia* does not ordinarily attain as large a size, and, as its leaves are deciduous, it is not a favorite in the neighborhood of tombs. Nevertheless it is often found in groves, rarely by itself, and around grave-yards. The number of forests of this and the preceding species is immense. The common name for *Q. pseudo-coccifera* is

سنديان, *Sindiān*, and of *Q. agrifolia* مَلُول, *Malūl*. There is another common species called

لُك, *Lik*, by the Arabs.

G. E. P.

OATH.<sup>a</sup> I. The principle on which an oath is held to be binding is incidentally laid down in Heb. vi. 16, namely, as an ultimate appeal to divine authority to ratify an assertion (see the principle stated and defended by Philo, *De Leg. Alleg.* iii. 73, i. 128, ed. Mang.). There the Almighty is represented as promising or denouncing with an oath, *i. e.* doing so in the most positive and solemn manner (see such passages as Gen. xxii. 16, xii. 7, compared with xxiv. 7; Ex. xvii. 16 and Lev. xxvi. 14 with Dan. ix. 11; 2 Sam. vii. 12, 13, with Acts ii. 30; Ps. cx. 4 with Heb. vii. 21, 28; Is. xlv. 23; Jer. xxii. 5, xxxii. 22). With this Divine asseveration we may compare the Stygian oath of Greek mythology (*Hom. Il.* xv. 37; *Hes. Theog.* 400, 805; see also the *Laws of Menu*, c. viii. 110; Sir W. Jones, *Works*, iii. 291).

II. On the same principle, that oath has always been held most binding which appealed to the highest authority, both as regards individuals and communities. (a.) Thus believers in Jehovah appealed to him, both judicially and extra-judicially, with such phrases as "The God of Abraham judge;" "As the Lord liveth;" "God do so to me and more also;" "God knoweth," and the like (see Gen. xxi. 23, xxxi. 53; Num. xiv. 2, xxx. 2; 1 Sam. xiv. 39, 44; 1 K. ii. 42; Is. xlvi. 1, lxx. 16; Hos. iv. 15). So also our Lord himself accepted the high-priest's adjuration (*Matt.* xxvi. 63), and St. Paul frequently appeals to God in confirmation of his statements (*Acts* xxvi. 29; *Rom.* i. 9, ix. 1; 2 Cor. i. 23, xi. 31; *Phil.* i. 8; see also *Rev.* x. 6). (b.) Appeals of this kind to authorities recognized respectively by adjuring parties were regarded as bonds of international security, and their infraction as being not only grounds of international complaint, but also offenses against divine justice. So Zedekiah, after swearing fidelity to the king of Babylon, was not only punished by him, but denounced by the prophet as a breaker of his oath (*2 Chr.* xxxvi. 13; *Ez.* xvii. 13, 18). Some, however, have supposed that the Law forbade any intercourse with heathen nations which involved the necessity of appeal by them to their own deities (*Ex.* xxiii. 32; *Selden, De Jur. Not.* ii. 13; see *Liv.* i. 24; *Laws of Menu*, viii. 113; *Dict. of Antiq.* "Jus Jurandum").

III. As a consequence of this principle, (a) appeals to God's name on the one hand, and to heathen deities on the other, are treated in Scripture as tests of allegiance (*Ex.* xxiii. 13, xxxiv. 6; *Deut.* xxix. 12; *Josh.* xxiii. 7, xxiv. 16; 2 Chr. xv. 12 14; *Is.* xix. 18, xlv. 23; *Jer.* xii. 16; *Am.* viii

2. שְׁבִיעָה and שְׁבִיעָה, from שֶׁבַע, "seven," the sacred number (Ges. pp. 1354, 1356), ἑπτα, *heptamentum*.

14, Zeph. i. b). (b) So also the sovereign's name is sometimes used as a form of obligation, as was the case among the Romans with the name of the emperor; and Hofmann quotes a custom by which the kings of France used to appeal to themselves at their coronation (Gen. xlii. 15; 2 Sam. xi. 11, xiv. 19; Martyr. S. Polycarp. c. ix.; Tertull. *Apol.* c. 32; Suet. *Calig.* c. 27; Hofmann, *Lex.* art. "Juramentum"; *Dict. of Antiq.* u. s.; Michaelis, *On Laws of Moses*, art. 256, vol. iv. 102, ed. Smith).

IV. Other forms of oath, serious or frivolous, are mentioned; as, by the "blood of Abel" (Selden, *De Jur. Nat.* v. 8); by the "head;" by "Heaven," the "Temple," etc., some of which are condemned by our Lord (Matt. v. 33, xxiii. 16-22; and see Jam. v. 12). Yet He did not refuse the solemn adjuration of the high-priest (Matt. xxvi. 63, 64; see *Juv. Sat.* vi. 16; Mart. xi. 94; Mishna, *Sanh.* iii. 2, compared with Am. viii. 7; Spencer, *De Leg. Hebr.* ii. 1-4).

As to the subject-matter of oaths the following cases may be mentioned:—

1. Agreement or stipulation for performance of certain acts (Gen. xiv. 22, xxiv. 2, 8, 9; Ruth i. 17; 1 Sam. xiv. 24; 2 Sam. v. 3; *Ezr.* x. 5; Neh. v. 12, x. 29, xiii. 25; Acts xxiii. 21; and see Joseph. *Vit.* c. 53).

2. Allegiance to a sovereign, or obedience from an inferior to a superior (Eccl. viii. 2; 2 Chr. xxxvi. 13; 1 K. xviii. 10). Josephus says the Essenes considered oaths unnecessary for the initiated, though they required them previously to initiation (*B. J.* ii. 8, §§ 6, 7; *Ant.* xv. 10, § 4; Philo, *Quod omnis probus*, I. 12, ii. 458, ed. Mangey-).

3. Promissory oath of a ruler (Josh. vi. 26; 1 Sam. xiv. 24, 28; 2 K. xxv. 24; Matt. xiv. 7). Priests took no oath of office (Heb. vii. 21).

4. Vow made in the form of an oath (Lev. v. 4).

5. Judicial oaths. (a.) A man receiving a pledge from a neighbor was required, in case of injury happening to the pledge, to clear himself by oath of the blame of damage (*Ex.* xxii. 10, 11; 1 K. viii. 31; 2 Chr. vi. 22). A willful breaker of trust, especially if he added perjury to his fraud, was to be severely punished (Lev. vi. 2-5; Deut. xix. 16-18).

(b.) It appears that witnesses were examined on oath, and that a false witness, or one guilty of suppression of the truth, was to be severely punished (Lev. v. 1; Prov. xxix. 24; Michaelis, *l. c.* art. 256, iv. 109; Deut. xix. 16-19; Grotius, in *Crit. Sacr.* on Matt. xxvi. 63; Knobel on Lev. v. 1, in *Kurzy. Fzeg. Hymb.*). (c.) A wife suspected of incontinence was required to clear herself by oath (*Num.* z. 19-22).

It will be observed that a leading feature of Jewish criminal procedure was that the accused person was put upon his oath to clear himself (*Ex.* xxii. 11; *Num.* v. 19-22; 1 K. viii. 31; 2 Chr. vi. 22; Matt. xxvi. 63).

The forms of adjuration mentioned in Scripture are: 1. Lifting up the hand. Witnesses laid their hands on the head of the accused (*Gen.* xiv. 22; *Lev.* xxiv. 14; Deut. xxxii. 40; *Is.* iii. 7; *Ez.* xx. 5, 6; *Sus.* v. 35; *Rev.* x. 5; see *Hom. Il.* xix. 254; *Virg. Æn.* xii. 196; Carpov, *Apparatus*, p. 652).

2. Putting the hand under the thigh of the person to whom the promise was made. As Josephus describes the usage, this ceremony was performed by each of the contracting parties to each other. It has been explained (a) as having reference to the covenant of circumcision (Godwyn, *Moses and*

*Aaron.* vi. 6; Carpov, *l. c.* p. 653); (b) as containing a principle similar to that of phallic symbolism (*Her.* ii. 48; *Plut. Is. et Osir.* vii. 412, ed. Reiske; Knobel on *Gen.* xxiv. 2, in *Kurzy. Fzeg. Hdb.*); (c) as referring to the promised Messiah (*Aug. Qu. in Hept.* 62; *Civ. Dei.* xvi. 33). It seems likely that the two first at least of these explanations may be considered as closely connected, if not identical with each other (*Gen.* xxiv. 2, xvii. 29; Nicolaus, *De Jur.* xi. 6; *Ges.* p. 631, s. v.

פגיוס; Fagius and others in *Crit. Sacr.*; Joseph. *Ant.* i. 16, § 1).

3. Oaths were sometimes taken before the altar, or, as some understand the passage, if the persons were not in Jerusalem, in a position looking towards the Temple (1 K. viii. 31; 2 Chr. vi. 22; Godwyn, *l. c.* vi. 6; Carpov, p. 654; see also *Juv. Sat.* xv. 219; *Hom. Il.* xiv. 272).

4. Dividing a victim and passing between or distributing the pieces (*Gen.* xv. 10, 17; *Jer.* xxxiv. 18). This form was probably used to intensify the imprecation already ratified by sacrifice according to the custom described by classical writers under the phrases *ἄρκια τέμνειν*, *fœdus ferire*, etc. We may perhaps regard in this view the acts recorded *Judg.* xix. 29, 1 Sam. xi. 7, and perhaps *Herod.* vii. 39.

As the sanctity of oaths was carefully inculcated by the Law, so the crime of perjury was strongly condemned; and to a false witness the same punishment was assigned which was due for the crime to which he testified (*Ex.* xx. 7; *Lev.* xix. 12; *Deut.* xix. 16-19; *Ps.* xv. 4; *Jer.* v. 2, vii. 9; *Ez.* xvi. 59; *Hos.* x. 4; *Zech.* viii. 17). Whether the "swearing" mentioned by Jeremiah (xxiii. 10) and by Hosea (iv. 2) was false swearing, or profane abuse of oaths, is not certain. If the latter, the crime is one which had been condemned by the Law (*Lev.* xxiv. 11, 16; *Matt.* xxvi. 74).

From the Law the Jews deduced many special cases of perjury, which are thus classified: 1. *Jus jurandum promissorium*, a rash inconsiderate promise for the future, or false assertion respecting the past (*Lev.* v. 4). 2. *Vanum*, an absurd self-contradictory assertion. 3. *Depositum*, breach of contract denied (*Lev.* xix. 11). 4. *Testimonium*, judicial perjury (*Lev.* v. 1; Nicolaus and Selden, *De Juramentis*, in Ugolini, *Thesaurus*, xxvi.; Lightfoot, *Hor. Hebr.* on *Matt.* v. 33, vol. ii. 292; Mishna, *Sheb.* iii. 7, iv. 1, v. 1, 2; Otho, *Lex. Rabb.*, art. "Juramentum").

Women were forbidden to bear witness on oath, as was inferred from *Deut.* xiv. 17 (*Mishna, Sheb.* iv. 1).

The Christian practice in the matter of oaths was founded in great measure on the Jewish. Thus the oath on the Gospels was an imitation of the Jewish practice of placing the hands on the Book of the Law (P. Fagius, on *Onkel. ad Ex.* xxiii. 1; Justinian, *Nov. c.* viii. Epil.; *Matth.* Paris, *Hist.* p. 916).

Our Lord's prohibition of swearing was clearly always understood by the Christian Church as directed against profane and careless swearing, not against the serious judicial form (Bingham, *Antiq. Eccl.* xvi. 7, §§ 4, 5; *Aug. Ep.* 157, c. v. 40); and thus we find the fourth Council of Carthage (c. 61) reproving clerical persons for swearing by created objects

The most solemn Mohammedan oath is made on the open Koran. Mohammed himself used the form, "By the setting of the stars" (Nardin, *Voy.* vi. 87; Sale's *Koran*, lvi. p. 437).

Bedouin Arabs use various sorts of adjuration, one of which somewhat resembles the oath "by the Temple." The person takes hold of the middle tent-pole, and swears by the life of the tent and its owners (Burekhardt, *Notes on Bed.* i. 127, foll.; see also another case mentioned by Burekhardt, *Syria*, p. 395).

The stringent nature of the Roman military oath, and the penalties attached to infraction of it, are alluded to, more or less certainly, in several places in N. T., e. g. Matt. viii. 9, Acts xii. 19, xvi. 27, xxvii. 42; see also Dionys. Hal. xi. 43, and Aul. Gell. xvi. 4. [PERJURY.] H. W. P.

**OBADIAH** (עֲבַדְיָהוּ [servant of Jehovah]: *Abdia*; [Vat. *Abðeia*:] *Obdia*). The name of Obadiah was probably as common among the Hebrews as Abdallah among the Arabians, both of them having the same meaning and etymology.

1. The sons of Obadiah are enumerated in a corrupt passage of the genealogy of the tribe of Judah (1 Chr. iii. 21). The reading of the LXX. and Vulg. was עֲבַדְיָהוּ, "his son," and of the Peshito Syriac עֲבַדְיָהוּ, "son of," for עֲבַדְיָהוּ, "sons of;" so that according to the two former versions Obadiah was the son of Arnan, and according to the last the son of Jesaiah.

2. (*Abðia*; [Vat. corrupt; Alex. *Obðia*:] *Obdia*.) According to the received text, one of the five sons of Izrahiah, a descendant of Issachar and a chief man of his tribe (1 Chr. vii. 3). Four only, however, are mentioned, and the discrepancy is rectified in four of Kennicott's MSS., which omit the words "and the sons of Izrahiah" thus making Izrahiah brother and not father, of Obadiah, and both sons of Uzzi. The Syriac and Arabic versions follow the received text, but read "four" instead of "five."

3. (*Abðia*; [Vat. Sin. *Abðeia*:] *Obdia*.) One of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).

4. [*Abðia*; Vat. *Abðeia*; Alex. *Obðia*.] A Levite, son of Shemaiah, and descended from Jeduthun (1 Chr. ix. 16). He appears to have been a principal musician in the Temple choir in the time of Nehemiah (Neh. xii. 25). It is evident, from a comparison of the last-quoted passage with 1 Chr. ix. 15-17 and Neh. xi. 17-19, that the first three names "Mattaniah, and Bakbukiah, Obadiah," belong to ver. 24, and the last three, "Meshullam, Talmon, Akkub," were the families of porters. The name is omitted in the Vat. MS. [so in Rom. Alex. FA.<sup>1</sup>] in Neh. xii. 25, where the Codex Frid.-Aug. [FA.<sup>3</sup>] has *Obðias* and the Vulg. *Obedia*. In Neh. xi. 17, "Obadiah the son of Shemaiah, is called "ABDA the son of Shammua."

5. ([Vat. FA. *Abðeia*:] *Obdias*.) The second in order of the lion-faced Gadites, captains of the host, who joined David's standard at Ziklag (1 Chr. xii. 9).

6. [*Abðia*; Vat. *Abia*.] One of the princes of Judah in the reign of Jehoshaphat, who were sent by the king to teach in the cities of Judah (2 Chr. xvii. 7).

7. (*Abðia*: [Vat. *Abia*:] *Obedia*.) The son of Jehiel, of the sons of Joab, who came up in the second caravan with Ezra, accompanied by 18 of his kinsmen (Ezr. viii. 9). [ABADIAS.]

8. (*Abðia*; [Vat. FA. *Abðeia*:] *Obdias*.) A

priest, or family of priests, who sealed the covenant with Nehemiah (Neh. x. 5). W. A. W.

9. (*Obðia*; [Vat. *Obðeia*; Alex. *Abðia*:] (Inscr.) *Abðia*:] *Abdias*.) The prophet Obadiah. We know nothing of him except what we can gather from the short book which bears his name.

The Hebrew tradition adopted by St. Jerome (*In Abd.*), and maintained by Abarbanel and Kimchi, that he is the same person as the Obadiah of Ahab's reign, is as destitute of foundation as another account, also suggested by Abarbanel, which makes him to have been a converted Idumæan, "the hatchet," according to the Hebrew proverb, "returning into the wood out of which it was itself taken" (Abarb. *In Obad. apud Pfeifferi Opera*, p. 1092, Ultraj. 1704). The question of his date must depend upon the interpretation of the 11th verse of his prophecy. He there speaks of the conquest of Jerusalem and the captivity of *יְרוּשָׁלַם*. If he is referring to the well-known captivity by Nebuchadnezzar he must have lived at the time of the Babylonish Captivity, and have prophesied subsequently to the year B. C. 588.

If, further, his prophecy against Edom found its first fulfillment in the conquest of that country by Nebuchadnezzar in the year B. C. 583, we have its date fixed. It must have been uttered at some time in the five years which intervened between those two dates. Jæger argues at length for an earlier date. He admits that the 11th verse refers to a capture of Jerusalem, but maintains that it may apply to its capture by Shishak in the reign of Rehoboam (1 K. xiv. 25; 2 Chr. xii. 2); by the Philistines and Arabians in the reign of Jehoram (2 Chr. xxi. 16); by Joash in the reign of Amaziah (2 Chr. xxv. 23); or by the Chaldeans in the reign of Jehoiakim and of Jehoiachin (2 K. xxiv. 2 and 10). The Idumæans might, he argues, have joined the enemies of Judah on any of these occasions, as their inveterate hostility from an early date is proved by several passages of Scripture, e. g. Joel iii. 19; Am. i. 11. He thinks it probable that the occasion referred to by Obadiah is the capture of Jerusalem by the Ephraimites in the reign of Amaziah (2 Chr. xxv. 23). The utmost force of these statements is to prove a possibility. The only argument of any weight for the early date of Obadiah is his position in the list of the books of the minor prophets. Why should he have been inserted between Amos and Jonah if his date is about B. C. 585? Schnurrer seems to answer this question satisfactorily when he says that the prophecy of Obadiah is an amplification of the last five verses of Amos, and was therefore placed next after the book of Amos. Our conclusion is in favor of the later date assigned to him, agreeing herein with that of Pfeiffer, Schnurrer, Rosenmüller, De Wette, Hendewerk, and Murrer.

The book of Obadiah is a sustained denunciation of the Edomites, melting, as is the wont of the Hebrew prophets (cf. Joel iii., Am. ix.), into a vision of the future glories of Zion, when the arm of the Lord should have wrought her deliverance and have repaid double upon her enemies. Previous to the Captivity, the Edomites were in a similar relation to the Jews to that which the Samaritans afterwards held. They were near neighbors, and they were relatives. The result was that intensified hatred which such conditions are likely to produce, if they do not produce cordiality and good-will. The Edomites are the types of those who ought to be friends and are not -- of those

who ought to be helpers, but in the day of calamity are found "standing on the other side." The prophet first touches on their pride and self-confidence, and then denounces their "violence against their brother Jacob" at the time of the capture of Jerusalem. There is a sad tone of reproach in the form into which he throws his denunciation, which contrasts with the parallel denunciations of Ezekiel (xxv. and xxxv.), Jeremiah (Lam. iv. 21), and the author of the 137th Psalm, which seem to have been uttered on the same occasion and for the same cause. The psalmist's "Remember the children of Edom, O Lord, in the day of Jerusalem, how they said, Down with it, down with it, even to the ground!" coupled with the immediately succeeding imprecation on Babylon, is a sterner utterance, by the side of which the "Thou shouldest not" of Obadiah appears rather as the sad remonstrance of disappointment. He complains that they looked on and rejoiced in the destruction of Jerusalem; that they triumphed over her and plundered her; and that they cut off the fugitives who were probably making their way through Idumæa to Egypt.

The last six verses are the most important part of Obadiah's prophecy. The vision presented to the prophet is that of Zion triumphant over the Idumæans and all her enemies, restored to her ancient possessions, and extending her borders northward and southward and eastward and westward. He sees the house of Jacob and the house of Joseph (here probably denoting the ten tribes and the two) consuming the house of Esau as fire devours stubble (ver. 18). The inhabitants of the city of Jerusalem, now captive at Sepharad, are to return to Jerusalem, and to occupy not only the city itself, but the southern tract of Judæa (ver. 20). Those who had dwelt in the southern tract are to overrun and settle in Idumæa (ver. 19). The former inhabitants of the plain country are also to establish themselves in Philistia (*ib.*). To the north the tribe of Judah is to extend itself as far as the fields of Ephraim and Samaria, while Benjamin, thus displaced, takes possession of Gilead (*ib.*). The captives of the ten tribes are to occupy the northern region from the borders of the enlarged Judah as far as Sarepta near Sidon (ver. 20). What or where Sepharad is no one knows. The LXX., perhaps by an error of a copyist, read 'Εφραθά. St. Jerome's Hebrew tutor told him the Jews held it to be the Bosphorus. St. Jerome himself thinks it is derived from an Assyrian word meaning "bound" or "limit," and understands it as signifying "scattered abroad." So Maurer, who compares οἱ ἐν τῆ διασπορᾷ of Jam. i. 1. Hardt, who has devoted a volume to the consideration of the question, is in favor of Siphpara in Mesopotamia. The modern Jews pronounce for Spain. Schultz is probably right in saying that it is some town or district in Babylon, otherwise unknown.

The question is asked, Have the prophet's denunciations of the Edomites been fulfilled, and has his vision of Zion's glories been realized? Typically, partially, and imperfectly they have been fulfilled, but, as Rosenmüller justly says, they await a fuller accomplishment. The first fulfillment of the denunciation on Edom in all probability took place a few years after its utterance. For we read in Josephus (*Ant.* x. 9, § 7) that five years after the capture of Jerusalem Nebuchad-

after their reduction made an expedition into Egypt. This he could hardly have done without at the same time reducing Idumæa. A more full, but still only partial and typical fulfillment would have taken place in the time of John Hyrcanus, who utterly reduced the Idumæans, and only allowed them to remain in their country on the condition of their being circumcised and accepting the Jewish rites, after which their nationality was lost for ever (*Joseph. Ant.* xiii. 9, § 1). Similarly the return from the Babylonish Captivity would typically and imperfectly fulfill the promise of the restoration of Zion and the extension of her borders. But "magnificentior sane est hæc promissio quam ut ad Sorobabelaica aut Maccabaica tempora referri possit," says Rosenmüller on ver. 21. And "necessitas cogit ut omnia ad predicationem evangelii referamus," says Luther.

The full completion of the prophetic descriptions of the glories of Jerusalem—the future golden age towards which the seers stretched their hands with fond yearnings—is to be looked for in the Christian, not in the Jewish Zion—in the antitype rather than in the type. Just as the fate of Jerusalem and the destruction of the world are interwoven and interpenetrate each other in the prophecy uttered by our Lord on the mount, and his words are in part fulfilled in the one event, but only fully accomplished in the other; so in figure and in type the predictions of Obadiah may have been accomplished by Nebuchadnezzar, Zerubbabel, and Hyrcanus, but their complete fulfillment is reserved for the fortunes of the Christian Church and her adversaries. Whether that fulfillment has already occurred in the spread of the Gospel through the world, or whether it is yet to come (*Rev.* xx. 4), or whether, being conditional, it is not to be expected save in a limited and curtailed degree, is not to be determined here.

The book of Obadiah is a favorite study of the modern Jews. It is here especially that they read the future fate of their own nation and of the Christians. Those unversed in their literature may wonder where the Christians are found in the book of Obadiah. But it is a fixed principle of Rabbinical interpretation that by Edomites is prophetically meant Christians, and that by Edom is meant Rome. Thus Kimchi, on Obadiah, lays it down that "all that the prophets have said about the destruction of Edom in the last times has reference to Rome." So Rabbi Bechai, on Is. lxxvi. 17; and Abaranel has written a commentary on Obadiah resting on this hypothesis as its basis. Other examples are given by Buxtorf (*Lex. Talm.* in voc.

יְדוּמָא, and *Synagoga Judaica*). The reasons of this Rabbinical dictum are as various and as ridiculous as might be imagined. Nachmanides, Bechai, and Abaranel say that Janus, the first king of Latium, was grandson of Esau. Kimchi (on Joel iii. 19) says that Julius Cæsar was an Idumæan. Scaliger (*ad Chron. Euseb.* n. 2152) reports, "The Jews, both those who are comparatively ancient and those who are modern, believe that Titus was an Edomite, and when the prophets denounce Edom they frequently refer it to Titus." Aben Ezra says that there were no Christians except such as were Idumæans until the time of Constantine, and that Constantine having embraced their religion the whole Roman empire became entitled Idumæan. St. Jerome says that some of

the Jews read **וְיִרְאוּ**, Rome, for **וְיִרְאוּ**, Dumah, in Is. xxi. 11. Finally, some of the Rabbis, and with them Abarbanel, maintain that it was the soul of Esau which lived again in Christ.

The color given to the prophecies of Obadiah, when looked at from this point of view, is most curious. The following is a specimen from Abarbanel on ver. 1: "The true explanation, as I have said, is to be found in this: The Idumæans, by which, as I have shown, all the Christians are to be understood (for they took their origin from Rome), will go up to lay waste Jerusalem, which is the seat of holiness, and where the tomb of their God Jesus is, as indeed they have several times gone up already." Again, on ver. 2: "I have several times shown that from Edom proceeded the kings who reigned in Italy, and who built up Rome to be great among the nations and chief among the provinces; and in this way Italy and Greece and all the western provinces became filled with Idumæans. Thus it is that the prophets call the whole of that nation by the name of Edom." On ver. 8: "There shall not be found counsel or wisdom among the Edomite Christians when they go up to that war." On ver. 19: "Those who have gone as exiles into the Edomites', that is, into the Christians' land, and have there suffered affliction, will deserve to have the best part of their country and their metropolis as Mount Seir." On ver. 20: "Sarepta" is "France;" "Sepharad" is "Spain." The "Mount of Esau," in ver. 21, is "the city of Rome," which is to be judged; and the Saviours are to be "the [Jewish] Messiah and his chieftains," who are to be "Judges."

The first nine verses of Obadiah are so similar to Jer. xlix. 7, &c., that it is evident that one of the two prophets must have had the prophecy of the other before him. Which of the two wrote first is doubtful. Those who give an early date to Obadiah thereby settle the question. Those who place him later leave the question open, as he would in that case be a contemporary of Jeremiah. Luther holds that Obadiah followed Jeremiah. Schnurrer makes it more probable that Jeremiah's prophecy is an altered form of Obadiah's. Eichhorn, Schulz, Rosenmüller, and Maurer agree with him.

See Ephrem Syrus, *Expl. in Abd.* v. 269, Rome, 1740; St. Jerome, *Comm. in Abd.* Op. iii. 1455, Paris, 1704; Luther, *Enarr. in Abd.* Op. iii. 538, Jenæ, 1612; Pfeiffer, *Tract. Phil. Antirabbini.* Op. p. 1081, Ultraj. 1704; Schnurrer, *Dissertatio Philologica in Obadiam*, Tubing. 1787; Schulz, *Scholæ in Vet. Test.* Norimb. 1793; Rosenmüller, *Scholæ in Vet. Test.* Lips. 1813; Maurer, *Comm. in Vet. Test.* Lips. 1836; Jaeger, *Ueber das Zeitalter Obadja's*, Tübing. 1837. F. M.

\* For the commentators on the Minor Prophets see AMOS; HABAKKUK; HAGGAI (Amer. ed.). Dr. Pusey's unfinished work (*Minor Prophets, with a Commentary* (1861), and Dr. Paul Kleinert's Pt. xix. of Lange's *Bibelwerk des A. Test.* (1868), contain Obadiah. Other separate writers (see above) are Zeddel (*Annotatt. in Ob.* 1-4, 1830), Hendewerk (*Obadja oraculum in Idumæos* (1836), C. P. Caspari (*Der Prophet Obadja*, 1842, an important work, pp. 1-145), Fr. Delitzsch (*Wann weissagte Obadja?* in *Zeitschrift für lutherische Theologie*, 1851, pp. 91-102), and Nügelbach (*Herz. Real-Encyk.* x. 506 ff.). The epitomized results in

the recent O. T. Introductions (Keil 1859 and Bleek 1860) show how wide a field of criticism this shortest book of the O. T. embraces.

Prof. Stuart (*Old Test. Canon*, p. 403) points out a use of this prophetic fragment which the history of nations shows to be not yet obsolete. "When Edom is held up before my eyes by Obadiah as having rushed upon the Jews, in the day of their humiliation by the power of Babylon; when the embittered enmity, the spirit of vengeance and of rapacity, and the unspeakable meanness of the Edomites, and their consequent punishment, are embodied and made palpable and held up to open view in this way; I am far more affected and even instructed by it, than I am by any abstract precept" which may inculcate the same lesson. H.

10. (**וְיִרְאוּ**): Ἀβδῖαι; [Vat. Ἀβδῖαι; Alex. Ἀβδῖαι, eight times, but Ἀβδῖαι, ver. 9:] *Abdaias*.) An officer of high rank in the court of Ahab, who is described as "over the house," that is, apparently, lord high chamberlain, or mayor of the palace (1 K. xviii. 3). His influence with the king must have been great to enable him to retain his position, though a devout worshipper of Jehovah, during the fierce persecution of the prophets by Jezebel. At the peril of his life he concealed a hundred of them in caves, and fed them there with bread and water. But he himself does not seem to have been suspected (1 K. xviii. 4, 13). The occasion upon which Obadiah appears in the history shows the confidential nature of his office. In the third year of the terrible famine with which Samaria was visited, when the fountains and streams were dried up in consequence of the long-continued drought, and horses and mules were perishing for lack of water, Ahab and Obadiah divided the land between them and set forth, each unattended, to search for whatever remnants of herbage might still be left around the springs and in the fissures of the river beds. Their mission was of such importance that it could only be entrusted to the two principal persons in the kingdom. Obadiah was startled on his solitary journey by the abrupt apparition of Elijah, who had disappeared since the commencement of the famine, and now commanded him to announce to Ahab, "Behold Elijah!" He hesitated, apparently afraid that his long-concealed attachment to the worship of Jehovah should thus be disclosed and his life fall a sacrifice. At the same time he was anxious that the prophet should not doubt his sincerity, and appealed to what he had done in the persecution by Jezebel. But Elijah only asserted the more strongly his intention of encountering Ahab, and Obadiah had no choice but to obey (1 K. xviii. 7-16). The interview and its consequences belong to the history of Elijah [vol. i. p. 527]. According to the Jewish tradition preserved in Ephrem Syrus (Assemani, *Bibl. Or. Clem.* p. 70), Obadiah the chief officer of Ahab was the same with Obadiah the prophet. He was of Shechem in the land of Ephraim, and a disciple of Elijah, and was the third captain of fifty who was sent by Ahaziah (2 K. i. 13). After this he left the king's service, prophesied, died, and was buried with his father. The "certain woman of the wives of the sons of the prophets" who came to Elisha (2 K. iv. 1), was, according to the tradition in Rashi, his widow.

11. (Ἀβδῖαι; [Vat. Ἀβδῖαι.] ) The father of Ishmaiah, who was chief of the tribe of Zebulun in David's reign (1 Chr. xxvii 19).

12. [Ἀβδίας· Vat. Ἀβδεια.] A Merarite Levirite in the reign of Josiah, and one of the overseers of the workmen in the restoration of the Temple (2 Chr. xxxiv. 12). W. A. W.

OBAL (עֹבָל) [*balld, bare*, as said of a country, Diatr.]: Ἐβάλλ: [Comp. Γέβαλλ:] *Ebal*. A son of Joktan, and, like the rest of his family, apparently the founder of an Arab tribe (Gen. x. 28), which has not yet been identified. In 1 Chr. i. 22 the name is written EBAL (עֵבָל): Alex. Γεμιαν: *Hebal*, which Knobel (*Genesis*) compares with the *Gebamitas* of Pliny, a tribe of Southern Arabia. The similarity of the name with that of the *Avallite*, a troglodyte tribe of East Africa, induced Bochart (*Phaleg*, ii. 23) to conjecture that Obal migrated thither and gave his name to the *Sinus Abalites* or *Avallites* of Pliny (vi. 34).

W. A. W.

OBDI'A (Ὀβδία; [Vat. Οββεια:] *Obia*). Probably a corruption of Obala, the form in which the name HABAIAH appears (comp. 1 Esdr. v. 38 with Ezr. ii. 61).

OBED (עֹבֵד) [*he who serves*, sc. Jehovah, Ges., Fürst]: Ὀβήδ; [Ἰωβήδ, Alex. in 1 Chr., and N. T. ed. Lachm. Tisch. Treg.:] *Obed*. 1. Son of Boaz and Ruth the Moabitess (Ruth iv. 17). The circumstances of his birth, which make up all that we know about him, are given with much beauty in the book of Ruth, and form a most interesting specimen of the religious and social life of the Israelites in the days of Eli, which a comparison of the genealogies of David, Samuel, and Abiathar shows to have been about the time of his birth. The famine which led to Elimelech and his sons migrating to the land of Moab may naturally be assigned to the time of the Philistine inroads in Eli's old age. Indeed there is a considerable resemblance between the circumstances described in Hannah's song (1 Sam. ii. 5), "They that were hungry ceased, so that the barren hath borne seven," and those of Obed's birth as pointed at, Ruth i. 6, and in the speech of the women to Naomi: "He shall be unto thee a restorer of thy life, and a nourisher of thine old age; for thy daughter-in-law which loveth thee, which is better to thee than seven sons, hath borne him:" as well as between the prophetic saying (1 Sam. ii. 7), "The Lord maketh poor, and maketh rich: he bringeth low, and lifteth up. He raiseth up the poor out of the dust, and lifteth up the beggar from the dunghill, to set them among princes, and to make them inherit the throne of glory:" and the actual history of the house of Elimelech, whose glory was prayed for by the people, who said, on the marriage of Ruth to Boaz, "The Lord make the woman that is come into thine house like Rachel and like Leah, which two did build the house of Israel, and do thou worthily in Ephratah, and be famous in Bethlehem." The direct mention of the Lord's Christ in 1 Sam. ii. 10, also connects the passage remarkably with the birth of that child who was grandfather to King David, and the lineal ancestor of Jesus Christ.

The name of Obed occurs only in Ruth iv. 17, and in the four genealogies, Ruth iv. 21, 22; 1 Chr.

ii. 12; Matt. i. 5; Luke iii. 32. In all these five passages, and in the first with peculiar emphasis he is said to be the father of Jesse. It is incredible that in David's reign, when this genealogy was compiled, his own grandfather's name should have been forgotten, and therefore there is no escape from the conclusion that Obed was literally Jesse's father and that we have all the generations recorded from Nahshon to David. [JESSE; NAHSHON.]

A. C. H.

2. (Alex. [Ald.] Ἰωβήδ.) A descendant of Jarha, the Egyptian slave of Sheshan in the line of Jerahmeel. He was grandson of Zabad, one of David's mighty (1 Chr. ii. 37, 38).

3. (Ὀβήθ; [Vat. Ἰωβηθ; FA. Ἰωβηλ; Comp. Ἰωβήδ;] Alex. Ἰωβηδ.) One of David's mighty men (1 Chr. xi. 47).

4. (Ὀβήδ; Alex. Ἰωβηδ.) One of the gatekeepers of the Temple: son of Shemaiah the first-born of Obed-edom (1 Chr. xxvi. 7).

5. (Alex. Ἰωβηδ.) Father of Azariah, one of the captains of hundreds who joined with Jehoiada in the revolution by which Athaliah fell (2 Chr. xxiii. 1).

W. A. W.

O'BED-EDOM (עֹבֵד יְדוֹם) [*servant of Edom*]: Ἀβεδδάρ in Sam. [and 1 Chr. xiii. 13, 14], Ἀβεδδού [Vat. FA. Ἀβδδομου] in [1] Chr. [xv. 25]; Alex. Ἀβεδδομου in 2 Sam. vi. 11; [Vat. Ἀβεδδαραμ, FA. -αν, in 1 Chr. xiii. 14:] *Obed-edom*. 1. A Levite, apparently of the family of Kohath. He is described as a Gittite (2 Sam. vi. 10, 11), that is, probably, a native of the Levitical city of Gath-Rimmon in Manasseh,<sup>a</sup> which was assigned to the Kohathites (Josh. xxi. 25), and is thus distinguished from "Obed-edom the son of Jeduthun," who was a Merarite. After the death of Uzzah, the ark, which was being conducted from the house of Abinadab in Gibeah to the city of David, was carried aside into the house of Obed-edom, where it continued three months, and brought with its presence a blessing upon Obed-edom and his household. Hearing this, David, at the head of a large choir of singers and minstrels, clothed in fine linen, and attended by the elders of Israel and the chief captains, "went to bring up the ark of the covenant of Jehovah out of the house of Obed-edom with joy" (1 Chr. xv. 25; 2 Sam. vi. 12).

2. [Ἀβεδδού; Vat. FA. in 1 Chr. xvi. 5, 38, Ἀβδδομου; so Vat. xxvi. 4, 8, 15, and Alex. xvi. 38, xxvi. 4, 8, and 15 once; FA. 1 Chr. xv. 18, Ἀβδδουμου; Vat. 1 2 Chr. xxv. 24, Ἰωβδδουμου; Comp. generally Ὀβήθ Ἐδδού.] "Obed-edom the son of Jeduthun" (1 Chr. xvi. 38), a Merarite Levite, appears to be a different person from the last-mentioned. He was a Levite of the second degree and a gate-keeper for the ark (1 Chr. xv. 18, 24), appointed to sound "with harps on the Sheminith to excel" (1 Chr. xv. 21, xvi. 5). With his family of seven [eight] sons and their children, "mighty men of valor" (1 Chr. xxvi. 4-8), he kept the South Gate (1 Chr. xxvi. 15) and the house of Asumpim. There is one expression, however, which seems to imply that Obed-edom the gate-keeper and Obed-edom the Gittite may have been the same. After enumerating his seven [eight] sons the chronicler

<sup>a</sup> \* Not in Manasseh, says Rüetschi (Herzog's *Real-Encyc.* xx. 243), but in Dan (Josh. xiv. 45: xxi. 24). This writer recognizes only one Obed-edom, though he does not explain why the Levite is appar-

ently called a Kohathite and a son of Jeduthun at the same time. There is no reason except this for supposing two persons of this name to be meant. H.

(1 Chr. xxvi. 5) adds, "for God blessed him," referring apparently to 2 Sam. vi. 11, "the Lord blessed Obed-edom and all his household." The family still remained at a much later time as keepers of the vessels of the Temple in the reign of Amaziah (2 Chr. xxv. 24). W. A. W.

**O'BETH** ('*Ὀβήθ*; [Vat. *Ουβηθ*]: om. in Vulg.). EBED the son of Jonathan is so called in 1 Esdr. viii. 32.

**O'BIL** ('*Ὀβίλ*) [*camel-driver*]: '*Αβίλας*: Alex. [Ald.] *Ὀβίλας*; [Comp. '*Ὀβίλ*]: *Ubil*). An Ishmaelite who was appropriately appointed keeper of the herds of camels in the reign of David (1 Chr. xxvii. 30). Bochart (*Hieroz.* pt. i., ii. 2) conjectures that the name is that of the office, *abdāl* in Arabic denoting "a keeper of camels."

**OBLATION.** [SACRIFICE.]

**O'BOTH** ('*Ὀβόθ*) [*hollow passes*, Fürst]: '*Ὀβώθ*; [Vat. in Num. xxxiii. *Σωβωθ*]: *Oboth*), one of the encampments of the Israelites, east of Moab (Num. xxi. 10, xxxiii. 43). Its exact site is unknown. [WILDERNESS OF THE WANDERING.]

\* **OCCUPY** occurs in the sense of "to use," Exod. xxxviii. 24, Judg. xvi. 11, and especially, "to use in trade," as money, or "to deal in," as merchandise, Ez. xxvii. 9, 2 Esdr. xvi. 42; hence, intransitively, "to trade" or "traffic," Ez. xxvii. 16, "they occupied in thy fairs with emeralds, purple," etc.; so Ez. xxvii. 19, 21, 22; Luke xix. 13. These uses of the word were formerly common. So "the occupiers of thy merchandise," Ez. xxvii. 27, means "the traders in thy merchandise."

A.

\* **OCCURRENT** = "occurrence," 1 K. v. 4. A.

**O'CHIEL** ('*Ὀχιήλος*; Alex.<sup>2</sup> *Οχιηλος*: *Oziel*). The form in which the name JELIEL appears in 1 Esdr. i. 9 (comp. 2 Chr. xxxv. 9). The Geneva version has CHIELUS.

**OCIDE'LUS** ('*Ὀκιδήλος*; [Vat. *Ὀκαιληδος*]; Alex. *Ὀκειδηλος*: *Jussiv*, *Reidus*). This name occupies, in 1 Esdr. ix. 22, the place of Jozabad in Ezr. x. 22, of which it is a manifest corruption. The original name is more clearly traced in the Vulgate.

**OCINA** ([Rom. '*Ὀκινά*; Vat. *Ὀκεινα*, and so Alex.; [Siii. and] Vulg. omit). "Sour and Ocina" are mentioned (Jud. ii. 28) among the places on the sea-coast of Palestine, which were terrified at the approach of Holofernes. The names seem to occur in a regular order from north to south; and as Ocina is mentioned between Sour (Tyre) and Jemnaan (Jabneh), its position agrees with that of the ancient ACCHO, now *Akka*, and in mediæval times sometimes called Acon (Brocardus; William of Tyre, etc.). G.

**OC'RAN** ('*Ὀκράν*) [*troubler or troubled*]: '*Ἐχράν*: *Ochran*). The father of Pagiel, chief of

the tribe of Asher after the Exodus (Num. i. 18 ii. 27, vii. 72, 77, x. 26).

**O'DED** ('*Ὀδέδ*) [*erecting, confirming*]. '*Ὀδῆδ*; Alex. *Αδᾶδ* [and so Rom. Vat. in ver. 8:] *Oded*). 1. The father of Azariah the prophet in the reign of Asa (2 Chr. xv. 1). In 2 Chr. xv. 8, the prophecy in the preceding verses is attributed to him, and not to his son. The Alex. MS. and the Vulgate retain the reading which is probably the true one, "Azariah the son of Oded." These are supported by the Pesh̄ō-Syriac, in which "Azur" is substituted for Oded.

2. [*Ὀδῆδ*]. A prophet of Jehovah in Samaria, at the time of Pekah's invasion of Judah. Josephus (*Ant.* ix. 12, § 2) calls him '*Ὀβηδῆδ*. On the return of the victorious army with the 200,000 captives of Judah and Jerusalem, Oded met them and prevailed upon them to let the captives go free (2 Chr. xxviii. 9). He was supported by the chivalrous feelings of some of the chieftains of Ephraim; and the narrative of the restoration of the prisoners, fed, clothed, and anointed, to Jericho the city of palm-trees, is a pleasant episode of the last days of the northern kingdom. W. A. W.

**ODOLLAM** ('*Ὀδολλᾶμ*: *Odollam*). The Greek form of the name ADULLAM; found in 2 Macc. xii. 38 only. Adullam is stated by Eusebius and Jerome (*Onomast.* "Adollam") to have been in their day a large village, about 10 miles east of Eleutheropolis; and here (if *Beit-jibrin* be Eleutheropolis) a village with the name of *Bet Dula* (Tobler, *Bethlehem*, p. 29; *Dritte Wand.* p. 151) or *Beit Ula* (Robinson, 1st ed. App. p. 117) now stands.

The obstacle to this identification is not that Adullam, a town of the *Shefelah*, should be found in the mountains, for that puzzling circumstance is not unfrequent (comp. KEILAH, etc., ii. 1529 a), so much as that in the catalogue of Joshua xv. it is mentioned with a group of towns (Zoreah, Socoh, etc.) which lay at the N. W. corner of Judah, while *Bet Dula* is found with those (Nezib, Keilah, etc.) of a separate group, farther south.

Further investigation is requisite before we can positively say if there is any cavern in the neighborhood of *Bet Dula* answering to the "cave of Adullam." The cavern at *Khureitun*,<sup>a</sup> 3 miles south of Bethlehem, usually shown to travellers as Adullam, is so far distant as to put it out of the question. It is more probable that this latter is the cavern in the wilderness of Engedi, in which the adventure<sup>b</sup> of Saul and David (1 Sam. xxiv.) occurred. Everything that can be said to identify it with the cave of Adullam has been said by Dr. Bonar (*Land of Promise*, pp. 248-50); but his strong-est argument — an inference, from 1 Sam. xxi. 1, in favor of its proximity to Bethlehem — comes into direct collision with the statement of Jerome quoted above, which it should be observed is equally opposed to Dr. Robinson's proposal to place it at *Deir-Dubbân*. [See ADULLAM, Amer. ed.]

The name of Adullam appears to have been first

<sup>a</sup> Dr. Bonar has suggested to us that the name *Khureitun* represents the ancient Hareth (*Khareth*). This is ingenious, and may be correct; but Tobler (*Umgebungen*, etc., pp. 522, 523) has made out a strong case for the name being that of Chareitôn, or Kreton, a famous Essene hermit of the 3d or 4th century, who founded a Laura in the cavern in question. (See *Acta Sanct.* Sept. 28)

<sup>b</sup> Van de Velde (*Syr. & Pal.* ii. 33) illustrates this

charming narrative more forcibly than is his wont. The cave, he says, has still "the same narrow nature, vaulting at the entrance, the same huge chamber in the rock, probably the place where Saul lay down to rest in the heat of the day; the same side vaults, too where David and his men lay concealed, when, accused to the obscurity of the cavern, they saw Saul enter, while Saul, blinded by the glare of light outside saw nothing of them."

applied to *Khureitun* at the time of the Crusades (Will. of Tyre, xv. 6).

**ODONARKES** (marg. Odomarra; [Rom. Ὀδοαῤῥήν; Sin. Alex. Comp. Ald.] Ὀδομηρά; *Odares*), the chief of a nomad tribe slain by Jonathan (1 Macc. ix. 66). The form in the A. V. does not appear to be supported by any authority. The Geneva version has "Odomeras."

B. F. W.

\* **OFFENCE** occurs in several passages of the A. V. as the rendering of the Heb. מִכְשָׁל, *mischol*, "a stumbling-block," or of the Gr. σκάνδαλον, *prósokomma*, *prósokhē*, and is used in such a way as not to suggest the proper meaning to the common reader. Thus the declaration in Is. viii. 14, "he shall be for a stone of stumbling and a rock of offence ("a rock to strike against," Noyes) to both the houses of Israel," describes the ruinous consequences rather than the fact of the unbelief and disobedience of the Jews; comp. ver. 15, and Jer. vi. 21; Ez. iii. 20. In Matt. xvi. 23, "thou art an offence to me," is literally "thou art my stumbling-block" (so Noyes); "thou wouldst cause me to fall" (Norton). In Matt. xviii. 7, and Luke xvii. 1 "offence" (σκάνδαλον) means an occasion of sin, or a hindrance to the reception of Christ; see the context. To eat "with offence" (διὰ προσκόμματος, Rom. xiv. 20) is so to eat as to be an occasion of sin to the weaker brother. [OFFEND.] A.

\* **OFFEND**, from the Latin *offendo*, "to strike against," like **OFFENCE** (which see) is used in the A. V. in senses which we do not now associate with the word, though they are naturally derived from its primitive meaning. "Great peace have they who love thy law, and nothing shall offend them (Ps. cxix. 165); lit. "there is no stumbling-block to them," i. e. their path shall be smooth, no evil shall befall them. In Matt. v. 29 ("if thy right eye offend thee"), 30, xviii. 6, 8, 9, Mark ix. 42, 43, 45, 47, "to offend" (σκανδαλίσειν) means "to lead into sin," literally, "to be a stumbling-block to," "to cause to fall." Similarly, in Matt. xiii. 21, xxiv. 10, xxvi. 31, 33; Mark iv. 17, xiv. 27, 29; John xvi. 1, "to be offended" does not suggest to the common reader the meaning of σκανδαλίσειν, which would in these passages be better translated "to fall away." In Rom. xiv. 21 and 2 Cor. xi. 29 the rendering of the A. V. is likewise misleading. A.

**OFFERINGS.** [SACRIFICE.]

- α 1. נָעִיב, *Naasib*, Vulg. *super omnia*, from נָעַב, to place."
- 2. From same, נָעִיב, part. plur. in Niph. נִעְבְּרִים, *καθεσταμένοι*, *perfect*, 1 K. iv. 7.
- 3. נָעִיב, Gen. xi. 2, *énoúchos*. [EUNUCH.]
- 4. נִעְבֵּר, Esth. ii. 3, *καμάρχη*; Gen. xli. 33, *νοτάρχης*; Neh. xi. 9, *ἐπίσκοπος*; *propositus*; A. V. "overseer."
- 5. נִעְבֵּר, *προστάτης*, concr. for abstr.; properly, office, like "authority" in Eng. Both of these words (4) and (5) from נָעַב, "visit."
- 6. נָעִיב, *οικονόμος*, *princeps*, Esth. i. 8, joined with נָעִיב, Dan. i. 3.

**OFFICER.**<sup>a</sup> It is obvious that most, if not all, of the Hebrew words rendered "officer," are either of an indefinite character, or are synonymous terms for functionaries known under other and more specific names, as "scribe," "eunuch," etc.

The two words so rendered in the N. T. each bear in ordinary Greek a special sense. In the case of *ὑπηρέτης* this is of no very definite kind, but the word is used to denote an inferior officer of a court of justice, a messenger or bailiff, like the Roman viator or lictor. *πράκτορες* at Athens were officers whose duty it was to register and collect fines imposed by courts of justice; and "deliver to the officer" <sup>b</sup> means, give the name of the debtor to the officer of the court (Demosthenes (or Dinarchus) *c. Theocr.* p. 1218, Reiske; *Dict. of Antiq.* "Practores," "Hyperetes;" Jul. Poll. viii. 114; Demosth. *c. Arist.* p. 778; *Æsch. c. Timarch.* p. 5; Grotius, on Luke xii. 58).<sup>c</sup>

Josephus says, that to each court of justice among the Jews, two Levites <sup>d</sup> were to be attached as clerks or secretaries, *Ant.* iv. 8, § 14. The Mishna also mentions the erier and other officials, but whether these answered to the officers of Josephus and the N. T. cannot be determined. Selden, from Maimonides, mentions the high estimation in which such officials were held. *Sanhedr.* iv. 3, vi. 1; Selden, *de Synedr.* ii. 13, 11. [PUNISHMENTS; SERJEANTS.]

The word "officers" is used to render the phrases *οἱ ἀπὸ* (or *ἐπὶ*) *τῶν χειρῶν*, 1 Macc. x. 41, xiii. 37, in speaking of the revenue officers of Demetrius.

It is also used to render *leitourgoi*, *Ecclus.* x. 2, where the meaning is clearly the subordinates in a general sense to a supreme authority.

H. W. P.

**OG** (עֹג) [*long-necked?*]: *עֹג*: *Og*), an Amoritic king of Bashan, whose rule extended over sixty cities, of which the two chief were Ashtaroth-Karnaim and Edrei (Josh. xiii. 12). He was one of the last representatives of the giant race of Rephaim. According to eastern traditions, he escaped the deluge by wading beside the ark (Sale's *Koran* ch. v. p. 83). He was supposed to be the largest of the sons of Anak, and a descendant of Ad. He is said to have lived no less than 3,000 years, and to have refused the warnings of Jethro (Shoab), who was sent as a prophet to him and his people (D'Herbelot *s. vr.* "Fulastim," "Anak"). Sicuti wrote a long book about him and his race, chiefly taken from Rabbinic traditions, and called

7. עֹג, part. from עָצַר, "cut," or "inscribe," Ex. v. 6, *γραμματεὺς*, *exactor*; Num. xi. 16, *γραμματεὺς*, Deut. xvi. 18, *γραμματοεισαγωγεὺς*, *master*, Josh. i. 10, *princeps*.

8. The word "officer" is also used, Esth. ix. 3, to render *מְלָאכָה*, which is joined with *עֹבְדֵי מַרְג*, marg. "those that did the business," *γραμματεὺς*, *secretaries*.

In N. T. "officer" is used to render, (1) *ὑπηρέτης*, *minister*, (2) *πράκτωρ*, Luke xii. 58, *exactor*.

<sup>b</sup> Παράδουνα τῷ πράκτ.

<sup>c</sup> Πράκτωρ is used in LXX. to render נָעִיב, Is. iii. 12; A. V. "oppressor," one who persecutes by action.

<sup>d</sup> Ὑπηρέται.

*Aug fi Khaber Aoug* (Id. s. v. "Aug"). See, too, the *Journal Asiatique* for 1841, and *Chronique de Tabari trad. du persan par Dubeux*, i. 48, f. (Ewald, *Gesch.* i. 306).

Passing over these idle fables, we find from Scripture that he was, with his children and his people, defeated and exterminated by the Israelites at Edrei, immediately after the conquest of Sihon, who is represented by Josephus as his friend and ally (Joseph. *Ant.* iv. 5, § 3). His sixty proud fenced cities were taken, and his kingdom assigned to the Reubenites, Gadites, and half the tribe of Manasseh (Deut. iii. 1-13; Num. xxxii. 33. Also Deut. i. 4, iv. 47, xxxi. 4; Josh. ii. 10, ix. 10, xiii. 12, 30). The giant stature of Og, and the power and bravery of his people, excited a dread which God himself alleviated by his encouragement to Moses before the battle; and the memory of this victory lingered long in the national memory (Ps. cxxxv. 11, cxxxvi. 20).

The belief in Og's enormous stature is corroborated by an appeal to a relic still existing in the time of the author of Deut. iii. 11. This was an iron bedstead, or bier, preserved in "Rabbath of the children of Ammon." How it got there we are not told; perhaps the Ammonites had taken it in some victory over Og. The verse itself has the air of a later addition (Dathe), although it is of course possible that the Hebrews may have heard of so curious a relic as this long before they conquered the city where it was treasured. Rabbath was first subdued in the reign of David (2 Sam. xii. 26); but it does not therefore follow that Deut. iii. 11 was not written till that time (Hävernick *ad loc.*). Some have supposed that this was one of the common flat beds [BEDS] used sometimes on the housetops of eastern cities, but made of iron instead of palm-branches, which would not have supported the giant's weight. It is more probable that the words

**עֲרֵשׁ בַרְזֶל**, *eres barzel*, mean a "sarcophagus of black basalt," a rendering of which they undoubtedly admit. The Arabs still regard black basalt as iron, because it is a stone "ferrei coloris atque duritie" (Plin. xxxvi. 11), and "contains a large percentage of iron." [IRON.] It is most abundant in the Hauran; and indeed is probably the cause of the name Argob (the stony) given to a part of Og's kingdom. This sarcophagus was 9 cubits long, and 4 cubits broad. It does not of course follow that Og was 15½ feet high. Maimonides (*More Nevochim*, ii. 48) sensibly remarks that a bed (supposing "a bed" to be intended) is usually one third [?] longer than the sleeper; and Sir J. Chardin, as well as other travellers, have observed the ancient tendency to make mummies and tombs far larger than the natural size of men, in order to leave an impression of wonder.

Other legends about Og may be found in Ben-Uzziel on Num. xxi. 33, Midrash Jalkût, fol. 13 (quoted by Ewald), and in Mohammedan writers; as that one of his bones long served for a bridge over a river; that he roasted at the sun a fish freshly

ought, etc. An apocryphal Book of King Og, which probably contained these and other traditions, was condemned by Pope Gelasius (*Decret.* vi. 13, Sixt. Senensis, *Bibl. Sanct.* p. 86). The origin of the name is doubtful: some, but without any probability, would connect it with the Greek Ogyges (Ewald, *Gesch.* i. 306, ii. 269). F. W. F.

\* OFTEN in the expression "often infirmities," 1 Tim. v. 23, is an adjective, and not an improper use of the adverb, as some allege. Its restricted adverbial sense belongs to a later period than king James's time. See Trench, *Authorized Version*, p. 60 (1859). H.

O'HAD (חֲדָה) [*power*]: 'Aôð; [Vat. *λωαδ* and] Alex. *λωαδ*: in Ex.: *Ahad*). One of the six sons of Simeon (Gen. xvi. 10; Ex. vi. 15). His name is omitted from the lists in 1 Chr. iv. 24 and Num. xxvi. 14, though in the former passage the Syriac has **ܫܘܬܐ**, *Oker* as in Gen. and Ex.

O'HEL (הֵל) [*ten*]: 'Oðλ; [Vat. *Οσα*:] *Ohol*). As the text now stands Ohel was one of the seven sons of Zerubbabel, though placed in a group of five who for some cause are separated from the rest (1 Chr. iii. 20). Whether they were by a different mother, or were born after the return from Babylon, can only be conjectured.

OIL.<sup>a</sup> (I.) Of the numerous substances, animal and vegetable, which were known to the ancients as yielding oil, the olive-berry is the one of which most frequent mention is made in the Scriptures. It is well-known that both the quality and the value of olive-oil differ according to the time of gathering the fruit, and the amount of pressure used in the course of preparation. These processes, which do not essentially differ from the modern, are described minutely by the Roman writers on agriculture, and to their descriptions the few notices occurring both in Scripture and the Rabbinical writings, which throw light on the ancient oriental method, nearly correspond. Of these descriptions the following may be taken as an abstract. The best oil is made from fruit gathered about November or December, when it has begun to change color, but before it has become black. The berry in the more advanced state yields more oil, but of an inferior quality. Oil was also made from unripe fruit by a special process as early as September or October, while the harder sorts of fruit were sometimes delayed till February or March (Virg. *Georg.* ii. 519; Palladius, *R.* R. xii. 4; Columella, *R.* R. xii. 47, 50; Cato, *R.* R. 65; Pliny, *N. H.* xv. 1-8; Varro, *R.* R. i. 55; Hor. 2 *Sat.* ii. 46.)

1. *Gathering*.—Great care is necessary in gathering, not to injure either the fruit itself or the boughs of the tree; and with this view it was either gathered by hand or shaken off carefully with a light reed or stick. The "boughing" of Deut. xxiv. 20 (marg.),<sup>b</sup> probably corresponds to the "shaking" <sup>c</sup> of Is. xvii. 6, xxiv. 13, i. e. a subsequent beating for the use of the poor. See Mishna,

<sup>a</sup> 1. **יָהֳלֵךְ**, from **יָהַרַךְ**, "shine" (Ges. pp. 1152-53), **πίστῆς, ἔλαιον, oleum**, clear olive-oil, as distinguished from —

2. **שָׁבֵן**, "pressed juice," **ἔλαιον, oleum**, from **שָׁבַן**, "become fat" (Ges. p. 1437); sometimes joined with **יָהֳלֵךְ, ἔλαιον ἐξ ἔλαιον, oleum de olivæ, distin-**

guishing olive-juice from oil produced from other sources. Also sometimes in A. V. "ointment" (Celsius, *Hierob.* ii. 279).

3. **חֲמֵשׁ**, Chald., **ἔλαιον, oleum**, only in Ex. v. 9, vii. 22.

<sup>b</sup> **שָׁבַן**.

<sup>c</sup> **חָבַן, καθαίρεισθαι**.

*Shebiith*, iv. 2; *Peah*, vii. 2, viii. 3. After gathering and careful cleansing, the fruit was either at once carried to the press, which is recommended as the best course; or, if necessary, laid on tables with hollow trays made sloping, so as to allow the first juice (Amurca) to flow into other receptacles beneath; care being taken not to heap the fruit too much, and so prevent the free escape of the juice, which is injurious to the oil though itself useful in other ways (Colum. *u. s.* xii. 50; Aug. *Civ. Dei*, i. 8, 2).

2. *Pressing*. — In order to make oil, the fruit was either bruised in a mortar, crushed in a press loaded with wood or stones, ground in a mill, or trodden with the feet. Special buildings used for grape-pressing were used also for the purpose of olive-pressing, and contained both the press and the receptacle for the pressed juice. Of these processes, the one least expedient was the last (treading), which perhaps answers to the "canalis et solea," mentioned by Columella, and was probably the one usually adopted by the poor. The "beaten" oil of Ex. xxvii. 20; Lev. xxiv. 2, and Ex. xxix. 40; Num. xxviii. 5, was probably made by bruising in a mortar. These processes, and also the place and the machine for pressing, are mentioned in the Mishna. Oil-mills are often made of stone, and turned by hand. Others consist of cylinders inclosing a beam, which is turned by a camel or other animal. An Egyptian olive-press is described by Niebuhr, in which the pressure exerted on the fruit is given by means of weights of wood and stone placed in a sort of box above. Besides the above cited Scripture references, the following passages mention either the places, the processes, or the machines used in olive-pressing: Mic. vi. 15; Joel ii. 24, iii. 13; Is. lxiii. 3; Lam. i. 15; Hag. ii. 16; *Menach.* viii. 4; *Shebiith*, iv. 9, vii. 6 (see

*Ges.* p. 179, s. v. בַּד); *Terum.* x. 7; *Shabb.* i. 9; *Baba Bathra*, iv. 5; *Ges.* pp. 351, 725, 848, 1096; Vitruvius, x. 1; Cato, *R. R.* 3; Celsius, *Hierob.* ii. 346, 350; Niebuhr, *Voy.* i. 122, pl. xvii.; Arundell, *Asia Minor*, ii. 196; Wellsted, *Trav.* ii. 430. [GETHESEMANE.]

3. *Keeping*. — Both olives and oil were kept in jars carefully cleansed; and oil was drawn out for use in horns or other small vessels (CRUSE). These vessels for keeping oil were stored in cellars or storehouses; special mention of such repositories is made in the inventories of royal property and revenue (1 Sam. x. 1, xvi. 1, 13; 1 K. i. 39, xvii. 16; 2 K. iv. 2, 6, ix. 1, 3; 1 Chr. xxvii. 28; 2 Chr. xi. 11, xxxii. 28; Prov. xxi. 20; *Shebiith*, v. 7; *Celim*, ii. 5, xvii. 12; *Columell.* l. c.).

Oil of Tekoa was reckoned the best (*Menach.* viii. 8). Trade in oil was carried on with the Tyrians, by whom it was probably often reexported to Egypt, whose olives do not for the most part produce good oil. Oil to the amount of 20,000 baths (2 Chr. ii. 10; Joseph. *Ant.* viii. 2, § 9), or 20 measures (*cors*, 1 K. v. 11) was among the supplies furnished by Solomon to Hiram. Direct trade in oil was also carried on between Egypt and Palestine (1 K. v. 11; 2 Chr. ii. 10, 15; Ezr. iii. 7; Is. xxx. 6, lvii. 9; Ez. xxvii. 17; Hos. xii. 1; S. Hieronym. *Com. in Osee*, iii. 12; Joseph. *Ant.* viii. 2, § 9; *B. J.* ii. 21, § 2; Strabo, xvii. p. 809; Pliny, xv. 4, 13; Wilkinson, *Anc. Egypt.* ii. 23, sm. ed.; Hasselquist, *Trav.* pp. 53, 117). [COMMERCE; WEIGHTS AND MEASURES.]

(II.) Besides the use of olives themselves as food

common to all olive-producing countries (Hör. 1 *Od.* xxxi. 15; Martial, xiii. 36; Arvieux, *Trav.* p. 209; *Terumoth*, i. 9, ii. 6), the principal uses of olive-oil may be thus stated.

1. *As food*. — Dried wheat, boiled with either butter or oil, but more commonly the former, is a common dish for all classes in Syria. Hasselquist speaks of bread baked in oil as being particularly sustaining; and Faber, in his Pilgrimage, mentions eggs fried in oil as Saracen and Arabian dishes. It was probably on account of the common use of oil in food that the "meat-offerings" prescribed by the Law were so frequently mixed with oil (Lev. ii. 4, 7, 15, viii. 26, 31; Num. xvii. 19, and foll.; Deut. xii. 17, xxxii. 13; 1 K. xvii. 12, 15; 1 Chr. xii. 40; Ez. xvi. 13, 19; S. Hieronym. *Vit. S. Illarion.* c. 11, vol. ii. p. 32; Ibn Batuta, *Trav.* p. 60, ed. Lee; Volney, *Trav.* i. 362, 406; Russeli, *Aleppo*, i. 80, 119; Harmer, *Obs.* i. 471, 474; Shaw, *Trav.* p. 232; Bertrand of the Brocquiere, *Early Trav.* p. 332; Burchardt, *Trav. in Arab.* i. 54; *Notes on Bed.* i. 59; Arvieux, *l. c.*; Chardin, *Voy.* iv. 84; Niebuhr, *Voy.* ii. 302; Hasselquist, *Trav.* p. 132; Faber, *Evagatorium*, vol. i. p. 197, ii. 152, 415). [FOOD; OFFERING.]

2. *Cosmetic*. — As is the case generally in hot climates, oil was used by the Jews for anointing the body, *e. g.* after the bath, and giving to the skin and hair a smooth and comely appearance, *e. g.* before an entertainment. To be deprived of the use of oil was thus a serious privation, assumed voluntarily in the time of mourning or of calamity. At Egyptian entertainments it was usual for a servant to anoint the head of each guest, as he took his seat [ONTMENT] (Deut. xxviii. 40; 2 Sam. xiv. 2; Ruth iii. 3; 2 Sam. xii. 20; Ps. xxiii. 5, xcii. 10, civ. 15; Dan. x. 3; Is. lxi. 3; Mic. vi. 15; Am. vi. 6; Sus. 17; Luke vii. 46). Strabo mentions the Egyptian use of castor-oil for this purpose, xviii. 824. The Greek and Roman usage will be found mentioned in the following passages: Hom. *Il.* x. 577, xviii. 596, xxiii. 281; *Od.* vii. 107, vi. 96, x. 364; Hör. 3 *Od.* xiii. 6; 1 *Sat.* vi. 123; 2 *Sat.* i. 8; Pliny, xiv. 22; Aristoph. *Wasps*, p. 608, *Clouds*, p. 816; Roberts, pl. 164. Butter, as is noticed by Pliny, is used by the negroes and the lower class of Arabs for the like purposes (Pliny, xi. 41; Burchardt, *Trav.* i. 53; *Nubia*, p. 215; Lightfoot, *Hor. Hebr.* ii. 375; see Deut. xxxiii. 24; Job xxix. 6; Ps. cix. 18).

The use of oil preparatory to athletic exercises, customary among the Greeks and Romans, can scarcely have had place to any extent among the Jews, who in their earlier times had no such contests, though some are mentioned by Josephus with censure as taking place at Jerusalem and Cæsarea under Herod (Hör. 1 *Od.* viii. 8; Pliny, xv. 4; Athenæus, xv. 34, p. 636; Hom. *Od.* vi. 79, 215; Joseph. *Ant.* xv. 8, § 1, xvi. 5, § 1; *Dict. of Antiq.* "Aliptæ").

3. *Funereal*. — The bodies of the dead were anointed with oil by the Greeks and Romans, probably as a partial antiseptic, and a similar custom appears to have prevailed among the Jews (*Il.* xxiv. 587; Virg. *Æn.* vi. 219). [ANJOINT; BURIAL.]

4. *Medicinal*. — As oil is in use in many cases in modern medicine, so it is not surprising, that it should have been much used among the Jews and other nations of antiquity for medicinal purposes. Celsius repeatedly speaks of the use of oil, especially old oil, applied externally with friction in fevers,

and in many other cases. Pliny says that olive-oil is good to warm the body and fortify it against cold, and also to cool heat in the head, and for various other purposes. It was thus used previously to taking cold baths, and also mixed with water for bathing the body. Josephus mentions that among the remedies employed in the case of Herod, he was put into a sort of oil bath. Oil mixed with wine is also mentioned as a remedy used both inwardly and outwardly in the disease with which the soldiers of the army of Ælius Gallus were affected, a circumstance which recalls the use of a similar remedy in the parable of the good Samaritan. The prophet Isaiah alludes to the use of oil as ointment in medical treatment; and it thus furnished a fitting symbol, perhaps also an efficient remedy, when used by our Lord's disciples in the miraculous cures which they were enabled to perform. With a similar intention, no doubt, its use was enjoined by St. James, and, as it appears, practiced by the early Christian Church in general. An instance of cure through the medium of oil is mentioned by Tertullian. The medicinal use of oil is also mentioned in the Mishna, which thus exhibits the Jewish practice of that day. See, for the various instances above named, Is i. 6; Mark vi. 13; Luke x. 34; James v. 14; Josephus, *Ant.* xvii. 6, § 5; *B. J. i.* 33, § 5; *Shabb.* xiii. 4; *Otho, Lex. Rabb.* pp. 11, 526; Mosheim, *Eccle. Hist.* iv. 9; Corn. à Lap. on James v.; Tertull. *ad Scap.* c. 4; Celsus, *De Med.* ii. 14, 17; iii. 6, 9, 18, 22, iv. 2; Hor. 2 *Sat.* i. 7; Pliny, xv. 4, 7, xxiii. 3, 4; Dio Cass. liii. 29; Lightfoot, *II. H.* ii. 304, 444; S. Hieronym. *l. c.*

5. *Oil for light.* — The oil for "the light" was expressly ordered to be olive-oil, beaten, *i. e.* made from olives bruised in a mortar (*Ex.* xxv. 6, xxvii. 20, 21, xxxv. 8; *Lev.* xxiv. 2; 2 *Chr.* xiii. 11; 1 *Sam.* iii. 3; *Zech.* iv. 3, 12; *Mishna, Demai,* i. 3; *Mench.* viii. 4). The quantity required for the longest night is said to have been  $\frac{1}{2}$  log (13.79 cubic in. = .4166 of a pint), *Mench.* ix. 3; *Otho, Lex. Rabb.* p. 159. [CANDLESTICK.] In the same manner the great lamps used at the Feast of Tabernacles were fed (*Succah,* v. 2). Oil was used in general for lamps; it is used in Egypt with cotton wicks twisted round a piece of straw; the receptacle being a glass vessel, into which water is first poured (*Matt.* xxv. 1-8; *Luke* xii. 35; *Lane, Mod. Egypt.* i. 201).

6. *Ritual.* — (a.) Oil was poured on, or mixed with the flour or meal used in offerings.

(i.) The consecration offering of priests (*Ex.* xxix. 2, 23; *Lev.* vi. 15, 21).

(ii.) The offering of "beaten oil" with flour, which accompanied the daily sacrifice (*Ex.* xxix. 40).

(iii.) The leper's purification offering, *Lev.* xv. 10-18, 21, 24, 28, where it is to be observed that the quantity of oil (1 log, = .833 of a pint), was invariable, whilst the other objects varied in quantity according to the means of the person offering. The cleansed leper was also to be touched with oil on various parts of his body (*Lev.* xv. 15-18).

(iv.) The Nazarite, on completion of his vow, was to offer unleavened bread anointed with oil, and cakes of fine bread mingled with oil (*Num.* vi. 15).

(v.) After the erection of the Tabernacle, the offerings of the "princes" included flour mingled with oil (*Num.* vii.).

(vi.) At the consecration of the Levites, fine flour mingled with oil was offered (*Num.* viii. 8).

(vii.) Meat-offerings in general were mingled or anointed with oil (*Lev.* vii. 10, 12).

On the other hand, certain offerings were to be devoid of oil; the sin-offering (*Lev.* v. 11), and the offering of jealousy (*Num.* v. 15).

The principle on which both the presence and the absence of oil were prescribed is clearly, that as oil is indicative of gladness, so its absence denoted sorrow or humiliation (*Is.* lxi. 3; *Joel* ii. 19; *Rev.* vi. 6). It is on this principle that oil is so often used in Scripture as symbolical of nourishment and comfort (*Deut.* xxxii. 13, xxxiii. 24; *Job* xxix. 6; *Ps.* xlv. 7, cix. 18; *Is.* lxi. 3).

(b.) Kings, priests, and prophets, were anointed with oil or ointment. [OINTMENT.]

7. (a.) As so important a necessary of life, the Jew was required to include oil among his first-fruit offerings (*Ex.* xxii. 29, xxiii. 16; *Num.* xviii. 12; *Deut.* xviii. 4; 2 *Chr.* xxxi. 5; *Terum.* xi. 3). In the Mishna various limitations are laid down; but they are of little importance except as illustrating the processes to which the olive-berry was subjected in the production of oil, and the degrees of estimation in which their results were held.

(b.) Tithes of oil were also required (*Deut.* xii. 17; 2 *Chr.* xxxi. 5; *Neh.* x. 37, 39, xiii. 12; *Iz.* xlv. 14).

8. Shields, if covered with hide, were anointed with oil or grease previous to use. [ANOINT.] Shields of metal were perhaps rubbed over in like manner to polish them. See *Thenius* on 2 *Sam.* i. 21; *Virg. Æn.* vii. 625; *Plautus, Mil.* i. 1, 2; and *Ges.* p. 825.

Oil of inferior quality was used in the composition of soap.

Of the substances which yield oil, besides the olive-tree, myrrh is the only one specially mentioned in Scripture. Oil of myrrh is the juice which exudes from the tree *Balsamodendron myrrha*, but olive-oil was an ingredient in many compounds which passed under the general name of oil (*Esth.* ii. 12; *Celsus, u. s.* iii. 10, 18, 19; *Pliny, xii.* 26, xiii. 1, 2, xv. 7; *Wilkinson, Anc. Egypt.* ii. 23; *Balfour, Plants of Bible,* p. 52; *Wiener, Realw.* s. v. Myrrhe. [OINTMENT.]

H. W. P.

#### \* OIL-PRESS. [OIL, 2.]

OIL-TREE (אֵיל זַיִן, *êts shemen*: κυπάρισσος, ξύλα κυπάρισσινα: *lygnum olivæ, frondes ligni pulcherrimi*). The Hebrew words occur in *Neh.* viii. 15; 1 *K.* vi. 23; and in *Is.* xli. 19. In this last passage the A. V. has "oil-tree;" but in Kings it has "olive-tree," and in Nehemiah "pine-branches." From the passage in Nehemiah, where the *êts shemen* is mentioned as distinct from the *zayth* or "olive-tree," writers have sought to identify it with the *Eleagnus angustifolius*, Linn., sometimes called "the wild olive tree," or "narrow-leaved oleaster;" the *zackum*-tree of the Arabs. There is, however, some great mistake in this matter; for the *zackum*-tree cannot be referred to the *eleagnus*, the properties and characteristics of which tree do not accord with what travellers have related of the famed *zackum*-tree of Palestine. We are indebted to Dr. Hooker for the correction of this error. The *zackum* is the *Balanites Ægyptiaca*, a well-known and abundant shrub or small tree in the plain of Jordan. It is found

all the way from the peninsula of India and the Ganges to Syria, Abyssinia, and the Niger. The zackum-oil is held in high repute by the Arabs for its medicinal properties. It is said to be very valuable against wounds and contusions. Comp. Maundrell (*Journ.* p. 86), Robinson (*Bibl. Res.* i. 560): see also BALM. It is quite probable that

*Balanites Aegyptiaca.*

the zackum, or *Balanites Aegyptiaca*, is the *ets shemen*, or oil-tree of Scripture. Celsius (*Hierob.* l. 309) understood by the Hebrew words any "fat or resinous tree;" but the passage in Nehemiah clearly points to some specific tree. W. H.

\* That the שֶׁמֶן עֵץ does not refer to the zackum seems to be evident, inasmuch as in Neh. viii. 15 it is spoken of as growing in the mountain, whereas *Balanites Aegyptiaca* is found only in the plain of Jordan. Then in 1 K. vi. 23 an image ten cubits high is spoken of as made of this tree. Can we suppose that the "shrub or small tree," *Balanites Aegyptiaca*, furnished the wood for this Cherub? Then again, in Is. xli. 19, this tree is spoken of in connection with the cedar, and acacia (*shittah*), and myrtle, as growing in the wilderness, a sign of fertility, and of the blessing of God. Surely it is not such a tree as this, confined to a small district of Palestine, and of limited utility or beauty, which would have been chosen as a sign of the restored favor of God to Israel.

The conditions to be sought for in the determination of this tree are: (1.) A tree with wood of sufficient solidity and size and beauty to be

used in making a carved image ten cubits high, to be placed in the Holy of Holies.

(2.) A tree with branches so thick and leafy that they would be suitable to be associated with those of the olive, palm, myrtle, and other thick trees in the making of booths.

(3.) A tree fit to be associated with the cedar, the acacia, and the myrtle, as an emblem of the favor of God restored to a desolated land.

(4.) An oily, or oil-producing tree, growing in the mountains.

(5.) Not the olive itself, which would be excluded by Neh. viii. 15.

These conditions are not fulfilled in any tree so well as in the genus *Pinus*, of which there are several species in Syria. The *Pinus piner* is the most celebrated of these. It is a tall and beautiful tree usually trimmed close to the trunk below, and allowed to expand in a broad top like a palm. It is one of the most picturesque trees of Syria. It often attains an immense size. Two or three specimens of it may be seen near Beirut, towering above the neighboring groves to a height of over 100 feet. The trunks are several feet in thickness. The wood is highly resinous and "fat," and the branches are commonly used to make booths. The wood is the most sought for for roofing purposes, and is often finely carved.<sup>a</sup> It is of a fine reddish hue in the older trees, and takes a high polish owing to the large amount of the resinous constituent contained in it. It is moreover usually planted, and does not occur in forests far distant from the haunts of men. Its abundance marks seasons of rest from war, and prosperity in the land. The reverse marks the occurrence of war and desolation, which always tend to destroy trees. Among the other species found in the East the *Pinus orientalis* is perhaps next in frequency. It is small, and does not answer the conditions so well as the first mentioned. (A description of these two species, with plates, may be found in Thomson's *Land and Book*, ii. 265-267.) The first named species is called by the Arabs *Sndbar*. The groves outside of Beirut are so dense in the shade which they afford, that, where they are planted thickly, scarce a ray of the powerful Syrian sunshine can penetrate even at noonday. How appropriate that this species should have been chosen for "booths," and how inappropriate that the straggling thorny branches of the *Balanites* should have been imagined to meet this requirement of the text (Neh. viii. 15). Among the other species of Syria may be noted also *Pinus maritimus* and *P. halepensis*, both of which are common.

The תְּדָהָרַת at Is. xli. 19 and lx. 13 is probably not the pine, but the oak. This probability, which if established would exclude the mention of so common a tree as the pine from the Scripture, would of itself lead us to seek for an allusion to the pine under some other name. G. E. P.

OINTMENT.<sup>b</sup> Besides the fact that olive-oil

<sup>a</sup> \* If the olive be the wood intended at 1 K. vi. 23, it is singular that a wood of such hardness should have been chosen for a carving, when that carving was to be covered with gold, and thus the fine grain would be concealed. G. E. P.

<sup>b</sup> 1. *Shemen*. See OIL (2).

2. מְרִיקָה, *μύρον*, *unguentum*, from רִקָּה, "anoint."

2. מְרִיקָה or מְרִיקָה, *μύρον*, *unguentum* (Ex. xxx. 25). Gesenius thinks it may be the vessel in which the ointment was compounded (p. 1309).

4. מְשִׁחָה, *χρίσμα*, *χρίσμα*, *unguentum*, sometimes in A. V. "oil."

5. מְרִיקָה: in A. V. "things for purifying"

is itself a common ingredient in ointments, the purposes to which ointment, as mentioned in Scripture, is applied agree in so many respects with those which belong to oil, that we need not be surprised that the same words, especially 1 and 4, should be applied to both oil and ointment. The following list will point out the Scriptural uses of ointment:—

1. *Cosmetic*.—The Greek and Roman practice of anointing the head and clothes on festive occasions prevailed also among the Egyptians, and appears to have had place among the Jews (Ruth iii. 3; Eccl. vii. 1, ix. 8; Prov. xxvii. 9, 16; Cant. i. 3, iv. 10; Am. vi. 6; Ps. xlv. 7; Is. lvii. 9; Matt. xxvi. 7; Luke vii. 46; Rev. xviii. 13; *Yoma*, viii. 1; *Shabb.* ix. 4; Plato, *Symp.* i. 6, p. 123; see authorities in Hofmann, *Lex.* art. "Engendi ritus"). Oil of myrrh, for like purposes, is mentioned Esth. ii. 12. Strabo says that the inhabitants of Mesopotamia use oil of sesamé, and the Egyptians castor-oil (kiki), both for burning, and the lower classes for anointing the body. Chardin and other travellers confirm this statement as regards the Persians, and show that they made little use of olive-oil, but used other oils, and among them oil of sesamé and castor-oil. Chardin also describes the Indian and Persian custom of presenting perfumes to guests at banquets (Strabo, xvi. 746, xvii. 824; Chardin, *Voy.* iv. 43, 84, 86; Marco Polo, *Trav.* (*Early Trav.*) p. 85; Olearius, *Trav.* p. 305). Egyptian paintings represent servants anointing guests on their arrival at their entertainer's house, and alabaster vases exist which retain the traces of the ointment which they were used to contain. Athenæus speaks of the extravagance of Antiochus Epiphanes in the article of ointments for guests, as well as of ointments of various kinds (Wilkinson, *Anc. Egypt.* i. 78, pl. 89, i. 157; Athenæus, x. 53, xv. 41). [ALABASTER; ANOINT.]

2. *Funereal*.—Ointments as well as oil were used to anoint dead bodies and the clothes in which they were wrapped. Our Lord thus spake of his own body being anointed by anticipation (Matt. xxvi. 12; Mark xiv. 3, 8; Luke xxiii. 56; John xii. 3, 7, xix. 40; see also Plutarch, *Consol.* p. 611, viii. 413, ed. Reiske). [BURIAL.]

3. *Medicinal*.—Ointment formed an important feature in ancient medical treatment (Celsus, *De Med.* iii. 19, v. 27; Plin. xxiv. 10, xxix. 3, 8, 9). The prophet Isaiah alludes to this in a figure of speech; and our Lord, in his cure of a blind man, adopted as the outward sign one which represented the usual method of cure. The mention of balm of Gilead and of eye-salve (*collyrium*) point to the same method (Is. i. 6; John ix. 6; Jer. viii. 22, xvi. 11, li. 8; Rev. iii. 18; Tob. vi. 8, xi. 8, 13; Tertull. *De Idololat.* 11).

4. *Ritual*.—Besides the oil used in many ceremonial observances, a special ointment was appointed to be used in consecration (Ex. xxx. 23, 33, xxix. 7, xxxvii. 29, xl. 9, 15). It was first compounded by Bezaleel, and its ingredients and proportions are precisely specified; namely of pure myrrh and cassia 500 shekels (250 ounces) each; sweet cinnamon and sweet calamus 250 shekels (125 ounces) each;

and of olive-oil 1 hin (about 5 quarts, 330-96 cubic inches). These were to be compounded according to the art of the apothecary <sup>a</sup> into an oil of holy ointment (Ex. xxx. 25). It was to be used for anointing—(1) the tabernacle itself; (2) the table and its vessels; (3) the candlestick and its furniture (4) the altar of incense; (5) the altar of burnt-offering and its vessels; (6) the laver and its foot; (7) Aaron and his sons. Strict prohibition was issued against using this unguent for any secular purpose, or on the person of a foreigner, and against imitating it in any way whatsoever (Ex. xxx. 32, 33).

These ingredients, exclusive of the oil, must have amounted in weight to about 47 lbs. 8 oz. Now olive-oil weighs at the rate of 10 lbs. to the gallon. The weight therefore of the oil in the mixture would be 12 lbs. 8 oz. English. A question arises, in what form were the other ingredients, and what degree of solidity did the whole attain? Myrrh, "pure" (*dēvir*),<sup>b</sup> free-flowing (Ges. p. 355), would seem to imply the juice which flows from the tree at the first incision, perhaps the "odoratc sudantia ligno balsama" (*Georg.* ii. 118), which Pliny says is called "stacte," and is the best (xii. 15; Dioscorides, i. 73, 74, quoted by Celsus, i. 159; and Knobel on Exodus, l. c.).

This juice, which at its first flow is soft and oily, becomes harder on exposure to the air. According to Maimonides, Moses (not Bezaleel), having reduced the solid ingredients to powder, steeped them in water till all the aromatic qualities were drawn forth. He then poured in the oil, and boiled the whole till the water was evaporated. The residuum thus obtained was preserved in a vessel for use (Otho, *Lex. Rab.* "Oleum"). This account is perhaps favored by the expression "powders of the merchant," in reference to myrrh (Cant. iii. 6; Keil, *Arch. Hebr.* p. 173). Another theory supposes all the ingredients to have been in the form of oil or ointment, and the measurement by weight of all, except the oil, seems to imply that they were in some solid form, but whether in an unctuous state or in that of powder cannot be ascertained. A process of making ointment, consisting, in part at least, in boiling, is alluded to in Job xli. 31. The ointment with which Aaron was anointed is said to have flowed down over his garments (Ex. xxix. 21; Ps. cxxxiii. 2: "skirts," in the latter passage, is literally "mouth," i. e. the opening of the robe at the neck; Ex. xxviii. 32).

The charge of preserving the anointing oil, as well as the oil for the light, was given to Eleazar (Num. iv. 16). The quantity of ointment made in the first instance seems to imply that it was intended to last a long time. The Rabbinical writers say that it lasted 900 years, i. e. till the Captivity, because it was said, "ye shall not make any like it" (Ex. xxx. 32); but it seems clear from 1 Chr. ix. 30 that the ointment was renewed from time to time (*Cherith*, i. 1).

Kings, and also in some cases prophets, were, as well as priests, anointed with oil or ointment but Scripture only mentions the fact as actually taking place in the cases of Saul, David, Solomon

<sup>a</sup> Esth. ii. 12; IXX. *σμήγματα*; by Targum rendered "perfumed ointment," from *מָרְרָק*, "rub," "cleanse" Ges. p. 820).

In N. T. and Apocrypha, "ointment" is the A. V. rendering for *μύρον*, *unguentum*.

<sup>a</sup> *מָרְרָק*, *μυρροφόρος*, *unguentarius*, *pigmentarius*

<sup>b</sup> *דְּרִיר*, *ἐκλεκτή*, *electa*

Jehu, and Joash. The Rabbinis say that Saul, Jehu, and Joash were only anointed with common oil, whilst for David and Solomon the holy oil was used (1 Sam. x. 1, xvi. 1, 13; 1 K. i. 39; 2 K. ix. 1, 3, 6, xi. 12; Godwyn, *Moses and Aaron*, i. 4; Carpzov, *Apparatus*, pp. 56, 57; Hofmann, *Lex. art.* "Ungendi ritus"; S. Hieron. *Com. in Osee*, iii. 134). It is evident that the sacred oil was used in the case of Solomon, and probably in the cases of Saul and David. In the case of Saul (1 Sam. x. 1) the article is used, "the oil," as it is also in the case of Jehu (2 K. ix. 1); and it seems unlikely that the anointing of Joash, performed by the high-priest, should have been defective in this respect.

A person whose business it was to compound ointments in general was called an "apothecary" (*Neh.* iii. 8 a; *Eccl.* x. 1; *Ecclus.* xlix. 1). [ΑΡΟΤΗΚΑΡΙΟΥ.] The work was sometimes carried on by women "confectionaries" (1 Sam. viii. 13).

In the Christian Church the ancient usage of anointing the bodies of the dead was long retained, as is noticed by S. Chrysostom and other writers quoted by Suicer, s. v. *ἐλαίου*. The ceremony of chrism or anointing was also added to baptism. See authorities quoted by Suicer, l. c., and under *βάπτισμα* and *Χρῆσμα*. H. W. P.

OLAMUS (Ὀλαμός: *Olimus*). MESHULLAM of the sons of Bani (1 Esdr. ix. 30; comp. *Ezr.* x. 29).

\* OLD AGE. [AGE, OLD.]

OLD TESTAMENT. This article will treat (A) of the Text and (B) of the Interpretation of the Old Testament. Some observations will be subjoined respecting (C) the Quotations from the Old Testament in the New.

A. — TEXT OF THE OLD TESTAMENT.

1. *History of the Text.* — A history of the text of the O. T. should properly commence from the date of the completion of the Canon; from which time we must assume that no additions to any part of it could be legitimately made, the sole object of those who transmitted and watched over it being thenceforth to preserve that which was already written. Of the care, however, with which the text was transmitted we have to judge, almost entirely, by the phenomena which it and the versions derived from it now present, rather than by any recorded facts respecting it. That much scrupulous pains would be bestowed by Ezra, the "ready scribe in the law of Moses," and by his companions, on the correct transmission of those Scriptures which passed through their hands, is indeed antecedently probable. The best evidence of such pains, and of the respect with which the text of the sacred books was consequently regarded, is to be found in the jealous accuracy with which the discrepancies of various parallel passages have been preserved, notwithstanding the temptation which must have existed to assimilate them to each other. Such is the case with Psalms xiv. and liii., two recensions of the same hymn, both proceeding from David, where the reasons of the several variations may on examination be traced. Such also is the case with Psalm xviii. and 2 Sam. xxii. where the variations between the two copies are more than sixty in number, excluding those which merely consist in

the use or absence of the *matres lectionis*; and where, therefore, even though the design of all the variations be not perceived, the hypothesis of their having originated through accident would imply a carelessness in transcribing far beyond what even the rashest critics have in other passages contemplated.

As regards the form in which the sacred writings were preserved, there can be little doubt that the text was ordinarily written on skins, rolled up into volumes, like the modern synagogue-rolls (*Ps.* xl. 7; *Jer.* xxxvi. 14; *Zech.* v. 1; *Ez.* ii. 9). Josephus relates that the copy sent from Jerusalem as present to Ptolemy in Egypt, was written with letters of gold on skins of admirable thinness, the joint of which could not be detected (*Ant.* xii. 2. § 11).

The original character in which the text was expressed is that still preserved to us, with the exception of four letters, on the Maccabæan coins, and having a strong affinity to the Samaritan character, which seems to have been treated by the later Jews as identical with it, being styled by them כְּתָב עֵבְרִי.

At what date this was exchanged for the present Aramaic or square character, כְּתָב

אֲשׁוּרִית, or כְּתָב מַרְבַּע, is still as undetermined as it is at what date the use of the Aramaic language in Palestine superseded that of the Hebrew. The old Jewish tradition, repeated by Origen and Jerome, ascribed the change to Ezra. But the Maccabæan coins supply us with a date at which the older character was still in use; and even though we should allow that both may have been simultaneously employed, the one for sacred, the other for more ordinary purposes, we can hardly suppose that they existed side by side for any lengthened period. Hassencamp and Gesenius are at variance as to whether such errors of the Septuagint as arose from confusion of letters in the original text, are in favor of the Greek interpreters having had the older or the more modern character before them. It is sufficiently clear that the use of the square writing must have been well established before the time of those authors who attributed the introduction of it to Ezra. Nor could the allusion in *Matt.* v. 18 to the *γὰρ* as the smallest letter have well been made except in reference to the more modern character. We forbear here all investigation of the manner in which this character was formed, or of the precise locality whence it was derived. Whatever modification it may have undergone in the hands of the Jewish scribes, it was in the first instance introduced from abroad; and this

its name אֲשׁוּרִית כְּתָב, i. e. Assyrian writing, implies, though it may geographically require to be interpreted with some latitude. (The suggestion of Hupfeld that אֲשׁוּרִית may be an appellative, denoting not *Assyrian*, but *firm*, writing, is improbable.) On the whole we may best suppose, with Ewald, that the adoption of the new character was coeval with the rise of the earliest Targums, which would naturally be written in the Aramaic style. It would thus be shortly anterior to the Christian era; and with this date all the evidence would well accord. It may be right, however, to mention, that while of late years Keil has striven anew to throw back the introduction of the square writing towards the time of Ezra, Bleek, also,

א רָקוּד, pigmentarius.

though not generally imbued with the conservative views of Keil, maintains not only that the use of the square writing for the sacred books owed its origin to Ezra, but also that the later books of the O. T. were never expressed in any other character.

No vowel points were attached to the text: they were, through all the early period of its history, entirely unknown. Convenience had indeed, at the time when the later books of the O. T. were written, suggested a larger use of the *matres lectionis*: it is thus that in those books we find them introduced into many words that had been previously spelt without them: קודש takes the place of

קדש, דוד, דוד, דוד. An elaborate endeavor has been recently made by Dr. Wall to prove that, up to the early part of the second century of the Christian era, the Hebrew text was free from vowel letters as well as from vowels. His theory is that they were then interpolated by the Jews, with a view of altering rather than of perpetuating the former pronunciation of the words: their object being, according to him, to pervert thereby the sense of the prophecies, as also to throw discredit on the Septuagint, and thereby weaken or evade the force of arguments drawn from that version in support of Christian doctrines. Improbable as such a theory is, it is yet more astonishing that its author should never have been deterred from prosecuting it by the palpable objections to it which he himself discerned. Who can believe, with him, that the Samaritans, notwithstanding the mutual hatred existing between them and the Jews, borrowed the interpolation from the Jews, and conspired with them to keep it a secret? Or that among other words to which by this interpolation the Jews ventured to impart a new sound, were some of the best known proper names; e. g. Isaiah, Jeremiah? Or that it was merely through a blunder that in Gen. i. 24, the substantive רִיחַ in

its construct state acquired its final ך, when the same anomaly occurs in no fewer than three passages of the Psalms? Such views and arguments refute themselves; and while the high position occupied by its author commends the book to notice, it can only be lamented that industry, learning, and ingenuity should have been so misspent in the vain attempt to give substance to a shadow.

There is reason to think that in the text of the O. T., as originally written, the words were generally, though not uniformly divided. Of the Phœnician inscriptions, though the majority proceed continuously, some have a point after every word, except when the words are closely connected. The same point is used in the Samaritan manuscripts; and it is observed by Gesenius (a high authority in respect of the Samaritan Pentateuch) that the Samaritan and Jewish divisions of the words generally coincide. The discrepancy between the Hebrew text and the Septuagint in this respect is sufficiently explained by the circumstance that the Jewish scribes did not separate the words which were closely connected: it is in the case of such that the discrepancy is almost exclusively found. The practice of separating words by spaces instead of points probably came in with the square writing. In the synagogue-rolls, which are written in conformity with the ancient rules, the words are regularly divided from each other; and indeed the

Talmud minutely prescribes the space which should be left (Gesenius, *Gesch. der Heb. Sprache*, § 45).

Of ancient date, probably, are also the separations between the lesser Parshioth or sections; whether made, in the case of the more important divisions, by the commencement of a new line, or, in the case of the less important, by a blank space within the line [BIBLE]. The use of the letters ׀ and ׁ, however, to indicate these divisions is of more recent origin: they are not employed in the synagogue-rolls. These lesser and earlier Parshioth, of which there are in the Pentateuch 669, and later not be confounded with the greater and later Parshioth, or Sabbath-lessons, which are first mentioned in the Masorah. The name Parshioth is in the Mishna (*Megill. iv. 4*) applied to the divisions in the Prophets as well as to those in the Pentateuch: e. g. to Isaiah lii. 3-5 (to the greater Parshioth here correspond the Haphtaroth). Even the separate psalms are in the Gemara called also Parshioth (*Berach. Bab. fol. 9, 2; 10, 1*). Some indication of the antiquity of the divisions between the Parshioth may be found in the circumstance that the Gemara holds them as old as Moses (*Berach. fol. 12, 2*). Of their real age we know but little. Hupfeld has found that they do not always coincide with the capitula of Jerome. That they are nevertheless more ancient than his time is shown by the mention of them in the Mishna. In the absence of evidence to the contrary, their disaccordance with the Kazin of the Samaritan Pentateuch, which are 966 in number, seems to indicate that they had a historical origin; and it is possible that they also may date from the period when the O. T. was first transcribed in the square character. Our present chapters, it may be remarked, spring from a Christian source.

Of any logical division, in the written text, of the prose of the O. T. into Pesukim, or verses, we find in the Talmud no mention; and even in the existing synagogue-rolls such division is generally ignored. While, therefore, we may admit the early currency of such a logical division, we must assume, with Hupfeld, that it was merely a traditional observance. It has indeed, on the other hand, been argued that such numerations of the verses as the Talmud records could not well have been made unless the written text distinguished them. But to this we may reply by observing that the verses of the numbering of which the Talmud speaks, could not have thoroughly accorded with those of modern times. Of the former there were in the Pentateuch 5,888 (or as some read, 8,888); it now contains but 5,845: the middle verse was computed to be Lev. xiii. 33; with our present verses it is Lev. viii. 5. Had the verses been distinguished in the written text at the time that the Talmudic enumeration was made, it is not easily explicable how they should since have been so much altered: whereas, were the logical division merely traditional, tradition would naturally preserve a more accurate knowledge of the places of the various logical breaks than of their relative importance, and thus, without any disturbance of the syntax, the number of computed verses would be liable to continual increase or diminution, by separation or aggregation. An uncertainty in the versual division is even now indicated by the double accentuation and consequent vocalization of the Decalogue. In the poetical books, the Pesukim mentioned in the Talmud correspond to the poetical lines, not to our modern verses; and it is probable

both from some expressions of Jerome, and from the analogous practice of other nations, that the poetical text was written stichometrically. It is still so written in our manuscripts in the poetical pieces in the Pentateuch and historical books; and even, generally, in our oldest manuscripts. Its partial discontinuance may be due, first to the desire to save space, and secondly to the diminution of the necessity for it by the introduction of the accents.

Of the documents which directly bear upon the history of the Hebrew text, the two earliest are the Samaritan copy of the Pentateuch, and the Greek translation of the LXX. For the latter we must refer to the article SEPTUAGINT: of the former some account will here be necessary. Mention had been made of the Samaritan Pentateuch, and, incidentally, of some of its peculiarities, by several of the Christian Fathers. Eusebius had taken note of its primeval chronology: Jerome had recorded its insertions in Gen. iv. 6; Deut. xxvii. 26: Procopius of Gaza had referred to its containing, at Num. x. 10 and Ex. xviii. 24, the words afterwards found in Deut. i. 6, v. 9: it had also been spoken of by Cyril of Alexandria, Diodore, and others. When in the 17th century Samaritan MSS. were imported into Europe by P. della Valle and Abp. Ussher, according with the representations that the Fathers had given, the very numerous variations between the Samaritan and the Jewish Pentateuch could not but excite attention; and it became thenceforward a matter of controversy among scholars which copy was entitled to the greater respect. The coordinate authority of both was advocated by Kennicott, who, however, in order to uphold the credit of the former, defended, in the celebrated passage Deut. xxvii. 4, the Samaritan reading Gerizim against the Jewish reading Ebal, charging corruption of the text upon the Jews rather than the Samaritans. A full examination of the readings of the Samaritan Pentateuch was at length made by Gesenius in 1815. His conclusions, fatal to its credit, have obtained general acceptance: nor have they been substantially shaken by the attack of a writer in the *Journal of Sacred Lit.* for July 1853; whose leading principle, that transcribers are more liable to omit than to add, is fundamentally unsound. Gesenius ranges the Samaritan variations from the Jewish Pentateuch under the following heads: grammatical corrections; glosses received into the text; conjectural emendations of difficult passages; corrections derived from parallel passages; larger interpolations derived from parallel passages; alterations made to remove what was offensive to Samaritan feelings; alterations to suit the Samaritan idiom; and alterations to suit the Samaritan theology, interpretation, and worship. It is doubtful whether even the grains of gold which he thought to find amongst the rubbish really exist; and the Samaritan readings which he was disposed to prefer in Gen. iv. 18, xiv. 14, xxii. 13, xlix. 14, will hardly approve themselves generally. The really remarkable feature respecting the Samaritan Pentateuch is its accordance with the Septuagint in more than a thousand places where it differs from the Jewish; being mostly those where either a gloss has been introduced into the text, or a difficult reading corrected

for an easier, or the prefix  $\daleth$  added or removed. On the other hand, there are about as many places where the Septuagint supports the Jewish text

against the Samaritan; and some in which the Septuagint stands alone, the Samaritan either agreeing or disagreeing with the Jewish. Gesenius and others suppose that the Septuagint and the Samaritan text were derived from Jewish MSS. of a different recension to that which afterwards obtained public authority in Palestine, and that the Samaritan copy was itself subsequently further altered and interpolated. It is at least equally probable that both the Greek translators and the Samaritan copyists made use of MSS. with a large number of traditional marginal glosses and annotations, which they embodied in their own texts at discretion. As to the origin of the existence of the Pentateuch among the Samaritans, it was probably introduced thither when Manasse and other Jewish priests passed over into Samaria, and contemporarily with the building of the temple on Mount Gerizim. Hengstenberg contends for this on the ground that the Samaritans were entirely of heathen origin, and that their subsequent religion was derived from Judæa (*Genuineness of Pent.* vol. i.): the same conclusion is reached also, though on very different grounds, by Gesenius, De Wette, and Bleek. To the hypothesis that the Pentateuch was perpetuated to the Samaritans from the Israelites of the kingdom of the ten tribes, and still more to another, that being of Israelitish origin they first became acquainted with it under Josiah, there is the objection, besides what has been urged by Hengstenberg, that no trace appears of the reception among them of the writings of the Israelitish prophets Hosea, Amos, and Jonah, which yet Josiah would so naturally circulate with the Pentateuch, in order to bring the remnant of his northern countrymen to repentance.

While such freedom in dealing with the sacred text was exercised at Samaria and Alexandria, there is every reason to believe that in Palestine the text was both carefully preserved and scrupulously respected. The boast of Josephus (*c. Apion*, i. 8), that through all the ages that had passed none had ventured to add to or to take away from, or to transpose aught of the sacred writings, may well represent the spirit in which in his day his own countrymen acted. In the translations of Aquila and the other Greek interpreters, the fragments of whose works remain to us in the Hexapla, we have evidence of the existence of a text differing but little from our own: so also in the Targums of Onkelos and Jonathan. A few centuries later we have, in the Hexapla, additional evidence to the same effect in Origen's transcriptions of the Hebrew text. And yet more important are the proofs of the firm establishment of the text, and of its substantial identity with our own, supplied by the translation of Jerome, who was instructed by the Palestinian Jews, and mainly relied upon their authority for acquaintance not only with the text itself, but also with the traditional unwritten vocalization of it.

This brings us to the middle of the Talmudic period. The learning of the schools which had been formed in Jerusalem about the time of our Saviour by Hillel and Shammai was preserved, after the destruction of the city, in the academies of Jabneh, Sepphoris, Cæsarea, and Tiberias. The great pillar of the Jewish literature of this period was R. Judah the Holy, to whom is ascribed the compilation of the Mishna, the text of the Talmud, and who died about A. D. 220. After his death there grew into repute the Jewish academies of

Sura, Nahardea, and Pumbeditha, on the Euphrates. The twofold Gemara, or commentary, was now appended to the Mishna, thus completing the Talmud. The Jerusalem Gemara proceeded from the Jews of Tiberias, probably towards the end of the 4th century; the Babylonian from the academies on the Euphrates, perhaps by the end of the 5th. That along with the task of collecting and commenting on their various legal traditions, the Jews of these several academies would occupy themselves with the text of the sacred writings is in every way probable; and is indeed shown by various Talmudic notices.

In these the first thing to be remarked is the entire absence of allusion to any such glosses of interpretation as those which, from having been previously noted on the margins of MSS., had probably been loosely incorporated into the Samaritan Pentateuch and the Septuagint. Interpretation, properly so called, had become the province of the Targumist, not of the transcriber; and the result of the entire divorce of the task of interpretation from that of transcription had been to obtain greater security for the transmission of the text in its purity. In place, however, of such glosses of interpretation had crept in the more childish practice of reading some passages differently to the way in which they were written, in order to obtain a play of words, or to fix them artificially in the memory. Hence the formula **אל הקרא כן**

**אלא כן**, "Read not so, but so." In other cases it was sought by arbitrary modifications of words to embody in them some casuistical rule. Hence the formula **יש אם למקרא**, "There is ground for the traditional, there is ground for the textual reading" (Hupfeld, in *Stud. und Kritiken*, 1830, p. 55 ff.). But these traditional and confessedly apocryphal readings were not allowed to affect the written text. The care of the Talmudic doctors for the text is shown by the pains with which they counted up the number of verses in the different books, and computed which were the middle verses, words, and letters in the Pentateuch and in the Psalms. These last they distinguished by the employment of a larger letter, or by raising the letter above the rest of the text: see Lev. xi. 42; Ps. lxxx. 14 (*Kiddušin*, fol. 30, 1; Buxtorf's *Tiberias*, c. viii.). Such was the origin of these unusual letters: mystical meanings were, however, as we learn from the Talmud itself (*Baba Bathra*, fol. 100, 2), afterwards attached to them. These may have given rise to a multiplication of them, and we cannot therefore be certain that all had in the first instance a critical significance.

Another Talmudic notice relating to the sacred text furnishes the four following remarks (*Nedarim*, fol. 37, 2; Buxt. *Tib.* c. viii.):—

**במקרא סופרים**, "Reading of the scribes;"

referring to the words **ארץ שמים**, **מצרים**.

**עיטור סופרים**, "Rejection of the scribes;"

referring to the omission of a **ל** prefix before the word **אמר** in Gen. xviii. 5, xxiv. 55; Num. xxxi. 2, and before certain other words in Ps. lxxviii. 26, xxxvi. 6. It is worthy of notice that the two passages of Genesis are among those in which the

Septuagint and Samaritan agree in supporting against the authority of the present Hebrew text. In Num. xxxi. 2, the present Hebrew text, the Septuagint, and the Samaritan, all have it.

**קריין ולא כתיבן**, "Read but not written;"

referring to something which ought to be read, although not in the text, in 2 Sam. viii. 3, xvi. 23, Jer. xxxi. 38, l. 29; Ruth ii. 11, iii. 5, 17. The omission is still indicated by the Masoretic notes in every place but Ruth ii. 11; and is supplied by the Septuagint in every place but 2 Sam. xvi. 23.

**כתיבן ולא קריין**, "Written but not read;"

referring to something which ought in reading to be omitted from the text, in 2 K. v. 18; Deut. vi. 1; Jer. li. 3; Ez. xlvi. 16; Ruth iii. 12. The Masoretic notes direct the omission in every place but Deut. vi. 1: the Septuagint preserves the word there, and in 2 K. v. 18, but omits it in the other three passages. In these last, an addition had apparently crept into the text from error of transcription. In Jer. li. 3, the word **יררך**, in Ez. xlvi. 16, the word **חמש** had been accidentally repeated: in Ruth iii. 12, **כי אם** had been repeated from the preceding **כי אמנם**.

Of these four remarks, then, the last two, there seems scarcely room for doubt, point to errors which the Jews had discovered, or believed to have discovered, in their copies of the text, but which they were yet generally unwilling to correct in their future copies, and which accordingly, although stigmatized, have descended to us. A like observation will apply to the Talmudic notices of the readings still indicated by the Masoretic Keris in Job xiii. 15; Hag. i. 8 (*Sotah*, v. 5; *Yoma*, fol. 21, 2). The scrupulousness with which the Talmudists thus noted what they deemed the truer readings, and yet abstained from introducing them into the text, indicates at once both the diligence with which they scrutinized the text, and also the care with which, even while acknowledging its occasional imperfections, they guarded it. Critical procedure is also evinced in a mention of their rejection of manuscripts which were found not to agree with others in their readings (*Taanith Hierosol.* fol. 68, 1); and the rules given with reference to the transcription and adoption of manuscripts attest the care bestowed upon them (*Shabbath*, fol. 103, 2; *Gittin*, fol. 45, 2). The "Rejection of the scribes" mentioned above, may perhaps relate to certain minute rectifications which the scribes had ventured, not necessarily without critical authority, to make in the actual written text. Wähler, however, who is followed by Hävernick and Keil, maintains that it relates to rectifications of the popular manner in which the text was read. And for this there is some ground in the circumstance that the "Reading of the scribes" bears apparently merely upon the vocalization, probably the pausal vocalization, with which the words **ארץ**, etc., were to be pronounced.

The Talmud further makes mention of the euphemic Keris, which are still noted in our Bibles, e. g. at 2 K. vi. 25 (*Megillah*, fol. 25, 2). It also reckons six instances of extraordinary points placed over certain words, e. g. at Gen. xviii. 9 (*Tr Sophar.* vi. 3); and of some of them it furnishes

mystical explanations (Buxtorf, *Tib.* c. xvii.). The Masorah enumerates fifteen. They are noticed by Jerome, *Quest. in Gen.* xviii. 35 [xix. 33]. They seem to have been originally designed as marks of the supposed spuriousness of certain words or letters. But in many cases the ancient versions uphold the genuineness of the words so stigmatized.

It is after the Talmudic period that Hupfeld places the introduction into the text of the two large points (in Hebrew פסוק סוף, *Soph-pasuk*) to mark the end of each verse. They are manifestly of older date than the accents, by which they are, in effect, supplemented (*Stud. und Krit.* 1837, p. 857). Coeval, perhaps, with the use of the *Soph-pasuk* is that of the *Makkeph*, or hyphen, to unite words that are so closely conjoined as to have but one accent between them. It must be older than the accentual marks, the presence or absence of which is determined by it. It doubtless indicates the way in which the text was traditionally read, and therefore embodies traditional authority for the conjunction or separation of words. Internal evidence shows this to be the case in such passages as Ps. xlv. 5, וַעֲנוּה־צִדְקָה. But the use of it cannot be relied on, as it often in the poetical books conflicts with the rhythm; e. g. in Ps. xix. 9, 10 (cf. Mason and Bernard's *Grammar*, ii. 187).

Such modifications of the text as these were the precursors of the new method of dealing with it which constitutes the work of the Masoretic period. It is evident from the notices of the Talmud that a number of oral traditions had been gradually accumulating respecting both the integrity of particular passages of the text itself, and also the manner in which it was to be read. The time at length arrived when it became desirable to secure the permanence of all such traditions by committing them to writing. The very process of collecting them would add greatly to their number; the traditions of various academies would be super-added the one upon the other; and with these would be gradually incorporated the various critical observations of the collectors themselves, and the results of their comparisons of different manuscripts. The vast heterogeneous mass of traditions and criticisms thus compiled and embodied in writing, forms what is known as the *מסרה*, *Masorah*, i. e. Tradition. A similar name had been applied in the Mishna to the oral tradition before it was committed to writing, where it had been described as the hedge or fence, סייג, of the Law (*Pirke Aboth*, iii. 13).

Buxtorf, in his *Tiberias*, which is devoted to an account of the Masorah, ranges its contents under the three heads of observations respecting the verses, words, and letters of the sacred text. In regard of the verses, the Masorets recorded how many there were in each book, and the middle verse in each: also how many verses began with particular letters, or began and ended with the same word, or contained a particular number of words and letters, or particular words a certain number of times, etc. In regard of the words, they recorded the *Keris* and *Chethibs*, where different words were to be read from those contained in the text, or where words were to be omitted or supplied. They noted that certain words were to

be found so many times in the beginning, middle, or end of a verse, or with a particular construction or meaning. They noted also of particular words, and this especially in cases where mistakes in transcription were likely to arise, whether they were to be written *plene* or *defective*, i. e. with or without the *matres lectionis*: also their vocalization and accentuation, and how many times they occurred so vocalized and accented. In regard of the letters, they computed how often each letter of the alphabet occurred in the O. T.: they noted fifteen instances of letters stigmatized with the extraordinary points: they commented also on all the unusual letters, namely, the *muscule*, which they variously computed; the *minuscule*, of which they reckoned thirty-three; the *suspense*, four in number; and the *inversa*, of which, the letter being in each case 2, there are eight or nine.

The compilation of the Masorah did not meet with universal approval among the Jews, of whom some regretted the consequent cessation of oral traditions. Others condemned the frivolous character of many of its remarks. The formation of the written Masorah may have extended from the sixth or seventh to the tenth or eleventh century. It is essentially an incomplete work; and the labors of the Jewish doctors upon the sacred text might have unendingly furnished materials for the enlargement of the older traditions, the preservation of which had been the primary object in view. Nor must it be implicitly relied on. Its computations of the number of letters in the Bible are said to be far from correct; and its observations, as is remarked by Jacob ben Chaim, do not always agree with those of the Talmud, nor yet with each other; though we have no means of distinguishing between its earlier and its later portions.

The most valuable feature of the Masorah is undoubtedly its collection of *Keris*. The first rudiments of this collection meet us in the Talmud. Of those subsequently collected, it is probable that many were derived from the collation of MSS., others from the unsupported judgment of the Masorets themselves. They often rested on plausible but superficial grounds, originating in the desire to substitute an easier for a more difficult reading; and to us it is of little consequence whether it were a transcriber or a Masoretic doctor by whom the substitution was first suggested. It seems clear that the *Keris* in all cases represent the readings which the Masorets themselves approved as correct; but there would be the less hesitation in sanctioning them when it was assumed that they would be always preserved in documents separate from the text, and that the written text itself would remain intact. In effect, however, our MSS. often exhibit the text with the *Keri* readings incorporated. The number of *Keris* is, according to Elias Levita, who spent twenty years in the study of the Masorah, 848; but the Bomberg Bible contains 1,171, the Plantin Bible 793. Two lists of the *Keris* — the one exhibiting the variations of the printed Bibles with respect to them, the other distributing them into classes — are given in the beginning of Walton's Polyglot, vol. vi.

The Masorah furnishes also eighteen instances of *wha. t* calls *תקון כופרים*, "Correction of the scribes." The real import of this is doubtful; but the recent view of Bleek, that it relates to

alterations made in the text by the scribes, because of something there offensive to them, and that therefore the rejected reading is in each case the true reading, is not borne out by the Septuagint, which in all the instances save one (Job vii. 20) confirms the present Masoretic text.

Furthermore the Masorah contains certain סבירין, "Conjectures," which it does not raise to the dignity of Keris, respecting the true reading in difficult passages. Thus at Gen. xix. 23, for שָׂא was conjectured זָאָה, because the word שָׂמָשׁ is usually feminine.

The Masorah was originally preserved in distinct books by itself. A plan then arose of transferring it to the margins of the MSS. of the Bible. For this purpose large curtailments were necessary; and various transcribers inserted in their margins only as much as they had room for, or strove to give it an ornamental character by reducing it into fanciful shapes. R. Jacob ben Chaim, editor of the Bomberg Bible, complains much of the confusion into which it had fallen; and the service which he rendered in bringing it into order is honorably acknowledged by Buxtorf. Further improvements in the arrangement of it were made by Buxtorf himself in his Rabbinical Bible. The Masorah is now distinguished into the *Masora magna* and the *Masora parva*, the latter being an abridgment of the former, and including all the Keris and other compendious observations, and being usually printed in Hebrew Bibles at the foot of the page. The *Masora magna*, when accompanying the Bible, is disposed partly at the side of the text, against the passages to which its several observations refer, partly at the end, where the observations are ranged in alphabetical order: it is thus divided into the *Masora textualis* and the *Masora finalis*.

The Masorah itself was but one of the fruits of the labors of the Jewish doctors in the Masoretic period. A far more important work was the furnishing of the text with vowel-marks, by which the traditional pronunciation of it was imperishably recorded. That the insertion of the Hebrew vowel-points was post-Talmudic is shown by the absence from the Talmud of all reference to them. Jerome also, in recording the true pronunciation of any word, speaks only of the way in which it was read; and occasionally mentions the ambiguity arising from the variety of words represented by the same letter (Hupfeld, *Stud. und Krit.* 1830, p. 549 ff.). The system was gradually elaborated, having been moulded in the first instance in imitation of the Arabian, which was itself the daughter of the Syrian. (So Hupfeld. Ewald maintains the Hebrew system to have been derived immediately from the Syrian.) The history of the Syrian and Arabian vocalization renders it probable that the elaboration of the system commenced not earlier than the seventh or eighth century. The vowel-marks are referred to in the Masorah; and as they are all mentioned by R. Judah Ching, in the beginning of the eleventh century, they must have been perfected before that date. The Spanish Rabbis of the eleventh and twelfth centuries knew nought of their recent origin. That the system of punctuation with which we are familiar was

fashioned in Palestine is shown by its difference from the Assyrian or Persian system displayed in one of the eastern MSS. collated by Pinner at Odessa; of which more hereafter.

Contemporaneous with the written vocalization was the accentuation of the text. The import of the accents was, as Hupfeld has shown, essentially rhythmical (*Stud. und Krit.* 1837): hence they had from the first both a logical and musical significance. In respect of the former they were called טעמים, "senses;" in respect of the latter, נגירות, "tones." Like the vowel-marks, they are mentioned in the Masorah, but not in the Talmud.

The controversies of the sixteenth century respecting the late origin of the vowel-marks and accents are well known. Both are with the Jews the authoritative exponents of the manner in which the text is to be read: "Any interpretation," says Aben Ezra, "which is not in accordance with the arrangement of the accents, thou shalt not consent to it, nor listen to it." If in the books of Job, Psalms, and Proverbs, the accents are held by some Jewish scholars to be irregularly placed, the explanation is probably that in those books the rhythm of the poetry has afforded the means of testing the value of the accentuation, and has consequently disclosed its occasional imperfections. Making allowance for these, we must yet on the whole admire the marvelous correctness, in the Hebrew Bible, of both the vocalization and accentuation. The difficulties which both occasionally present, and which a superficial criticism would, by overriding them, so easily remove, furnish the best evidence that both faithfully embody not the private judgments of the punctuators, but the traditions which had descended to them from previous generations.

Besides the evidences of various readings contained in the Keris of the Masorah, we have two lists of different readings purporting or presumed to be those adopted by the Palestinian and Babylonian Jews respectively. Both are given in Walton's Polyglot, vol. vi.

The first of these was printed by R. Jacob ben Chaim in the Bomberg Bible edited by him, without any mention of the source whence he had derived it. The different readings are 216 in number: all relate to the consonants, except two, which relate to the Mappik in the ׀. They are generally of but little importance: many of the differences are orthographical, many identical with those indicated by the Keris and Chethibs. The list does not extend to the Pentateuch. It is supposed to be ancient, but post-Talmudic.

The other is the result of a collation of MSS. made in the eleventh century by two Jews, R. Aaron ben Asher, a Palestinian, and R. Jacob ben Naphtali, a Babylonian. The differences, 864 in number, relate to the vowels, the accents, the Makkeph, and in one instance (Cant. viii. 6) to the division of one word into two. The list helps to furnish evidence of the date by which the punctuation and accentuation of the text must have been completed. The readings of our MSS. commonly accord with those of Ben Asher.

It is possible that even the separate Jewish academies may in some instances have had their own

<sup>4</sup> Mason and Bernard's *Grammar*, ii. 235. The system of accentuation in these books is peculiar; but it will doubtless repay study no less than that in the

other books. The latest expositions of it are by Birz a Jewish scholar, appended to vol. ii. of *De'itscht Comm. on the Psalter*; and by A. B. Davidson, 1861.

distinctive standard texts. Traces of minor variations between the standards of the two Babylonian academies of Sura and Nahardea are mentioned by De Rossi, *Proleg.* § 35.

From the end, however, of the Masoretic period onward, the Masorah became the great authority by which the text given in all the Jewish MSS. was settled. It may thus be said that all our MSS. are Masoretic: those of older date were either suffered to perish, or, as some think, were intentionally consigned to destruction as incorrect. Various standard copies are mentioned by the Jews, by which, in the subsequent transcriptions, their MSS. were tested and corrected, but of which none are now known. Such were the Codex Hillel in Spain; the Codex Ægyptius, or Hierosolymitanus, of Ben Asher; and the Codex Babylonius of Ben Naphtali. Of the Pentateuch there were the Codex Sinaiticus, of which the authority stood high in regard of its accentuation; and the Codex Hierichuntinus, which was valued in regard of its use of the *matres lectionis*; also the Codex Ezra, or Azarah, at Toledo, ransomed from the Black Prince for a large sum at his capture of the city in 1367, but destroyed in a subsequent siege (Scott Porter, *Princ. of Teat. Crit.* p. 74).

2. *Manuscripts.* — We must now give an account of the O. T. MSS. known to us. They fall into two main classes: Synagogue-rolls and MSS. for private use. Of the latter, some are written in the square, others in the rabbinic or cursive character.

The synagogue-rolls contain, separate from each other, the Pentateuch, the Haphtaroth, or appointed sections of the Prophets, and the so-called Megilloth, namely, Canticles, Ruth, Lamentations, Ecclesiastes, and Esther. The text of the synagogue-rolls is written without vowels, accents, or sophasuks: the greater parshioth are not distinguished, nor yet, strictly, the verses; these last are indeed often slightly separated, but the practice is against the ancient tradition. The prescribed rules respecting both the preparation of the skin or parchment for these rolls, and the ceremonies with which they are to be written, are exceedingly minute; and, though superstitious, have probably greatly contributed to the preservation of the text in its integrity. They are given in the Tract Sopherim, a later appendage to the Babylonian Talmud. The two modifications of the square character in which these rolls are written are distinguished by the Jews as the Tam and the Welsh, *i. e.* probably, the Perfect and the Foreign: the former is the older angular writing of the German and Polish, the latter the more modern round writing of the Spanish MSS. These rolls are not sold; and those in Christian possession are supposed by some to be mainly those rejected from synagogue use as vitiated.

Private MSS. in the square character are in the book-form, either on parchment or on paper, and of various sizes, from folio to 12mo. Some contain the Hebrew text alone; others add the Targum, or an Arabic or other translation, either interspersed with the text or in a separate column, occasionally in the margin. The upper and lower margins are generally occupied by the Masorah, sometimes by rabbinical commentaries, etc.; the outer margin, when not filled with a commentary, is used for corrections, miscellaneous observations, etc.; the inner margin for the Masora parva. The text marks all the distinctions of sections and verses which are wanting in the synagogue-rolls. These copies ordinarily passed through several hands in their prepara-

tion: one wrote the consonants; another supplied the vowels and accents, which are generally in a fainter ink; another revised the copy; another added the Masorah, etc. Even when the same person performed more than one of these tasks, the consonants and vowels were always written separately.

The date of a MS. is ordinarily given in the subscription; but as the subscriptions are often concealed in the Masorah or elsewhere, it is occasionally difficult to find them: occasionally also it is difficult to decipher them. Even when found and deciphered, they cannot always be relied on. Subscriptions were liable to be altered or supplied from the desire to impart to the MS. the value either of antiquity or of newness. For example, the subscription of the MS. Bible in the University Library at Cambridge (Kenn. No. 89), which greatly puzzled Kennicott, has now been shown by Zunz (*Zur Gesch. und Lit.* p. 214) to assign the MS. to the year A. D. 856; yet both Kennicott and Bruns agree that it is not older than the 13th century; and De Rossi too pronounces, from the form of the Masorah, against its antiquity. No satisfactory criteria have been yet established by which the ages of MSS. are to be determined. Those that have been relied on by some are by others deemed of little value. Few existing MSS. are supposed to be older than the 12th century. Kennicott and Bruns assigned one of their collation (No. 590) to the 10th century; De Rossi dates it A. D. 1018; on the other hand, one of his own (No. 634) he adjudges to the 8th century.

It is usual to distinguish in these MS. three modifications of the square character: namely, a Spanish writing, upright and regularly formed; a German, inclined and sharp-pointed; and a French and Italian, intermediate to the two preceding. Yet the character of the writing is not accounted a decisive criterion of the country to which a MS. belongs: nor indeed are the criteria of country much more definitely settled than those of age. One important distinction between the Spanish and German MSS. consists in the difference of order in which the books are generally arranged. The former follow the Masorah, placing the Chronicles before the rest of the Hagiographa; the latter conform to the Talmud, placing Jeremiah and Ezekiel before Isaiah, and Ruth, separate from the other Megilloth, before the Psalms. The other characteristics of Spanish MSS., which are accounted the most valuable, are thus given by Bruns: They are written with paler ink; their pages are seldom divided into three columns; the Psalms are arranged stichometrically; the Targum is not interspersed with the text, but assigned to a separate column; words are not divided between two lines; initial and unusual letters are escheved, so also figures, ornaments, and flourishes; the parshioth are indicated in the margin rather than in the text; books are separated by a space of four lines, but do not end with a פסוק; the letters are dressed to the upper guiding-line rather than the lower; Raphah is employed frequently, Metheg and Mappik seldom.

Private MSS. in the rabbinic character are mostly of paper, and are of comparatively late date. They are written with many abbreviations, and have no vowel-points or Masorah, but are occasionally accompanied by an Arabic version.

In computing the number of known MSS. it must be borne in mind that by far the greater part contain only portions of the Bible. Of the 581

Jewish MSS. collated by Kennicott, with more than 102 give the O. T. complete; with those of De Rossi the case is similar. In Kennicott's volumes the MSS. used for each book are distinctly enumerated at the end of the book. The number collated by Kennicott and De Rossi together were, for the book of Genesis 490; for the Megilloth, collectively, 549; for the Psalms, 495; for Ezra, and Nehemiah, 172; and for the Chronicles, 211. MS. authority is most plenteous for the book of Esther, least so for those of Ezra and Nehemiah.

Since the days of Kennicott and De Rossi modern research has discovered various MSS. beyond the limits of Europe. Of many of these there seems no reason to suppose that they will add much to our knowledge of the Hebrew text. Those found in China are not essentially different in character to the MSS. previously known in Europe: that brought by Buchanan from Malabar is now supposed to be a European roll. It is different with the MSS. examined by Pinner at Odessa, described by him in the *Prospectus der Odessaer Gesellschaft für Gesch. und All. gehörenden ältesten heb. und rabb. MSS.* One of these MSS. (A. No. 1), a Pentateuch roll, unpointed, brought from Derbent in Daghestan, appears by the subscription to have been written previously to the year A. D. 580; and, if so, is the oldest known Biblical Hebrew MS. in existence. It is written in accordance with the rules of the Masorah, but the forms of the letters are remarkable. Another MS. (B. No. 3) containing the Prophets, on parchment, in small folio, although only dating, according to the inscription, from A. D. 916, and furnished with a Masorah, is a yet greater treasure. Its vowels and accents are wholly different from those now in use, both in form and in position, being all above the letters: they have accordingly been the theme of much discussion among Hebrew scholars. The form of the letters is here also remarkable. A fac-simile has been given by Pinner of the book of Habakkuk from this MS. The same peculiarities are wholly or partially repeated in some of the other Odessa MSS. Various readings from the texts of these MSS. are instanced by Pinner: those of B. No. 3 he has set forth at some length, and speaks of as of great importance, and as entitled to considerable attention on account of the correctness of the MS.: little use has however been made of them.

The Samaritan MSS. collated by Kennicott are all in the book-form, though the Samaritans, like the Jews, make use of rolls in their synagogues. They have no vowel-points or accents, and their diacritical signs and marks of division are peculiar to themselves. The unusual letters of the Jewish MSS. are also unknown in them. They are written on vellum or paper, and are not supposed to be of any great antiquity. This is, however, of little importance, as they sufficiently represent the Samaritan text.

3. *Printed Text.*—The history of the printed text of the Hebrew Bible commences with the early Jewish editions of the separate books. First appeared the Psalter, in 1477, probably at Bologna, in 4to, with Kimchi's commentary interspersed among the verses. Only the first four psalms had the vowel-points, and these but clumsily expressed. The text was far from correct, and the *matres lectionis* were inserted or omitted at pleasure. At Bologna there subsequently appeared, in 1482, the Pentateuch, in folio, pointed, with the Targum and the commentary of Jarchi, and the five Megilloth

(Ruth—Esther), in folio, with the commentaries of Jarchi and Aben Ezra. The text of the Pentateuch is reputed highly correct. From Soncino, near Crenona, issued in 1486 the *Prophetae Priores* (Joshua—Kings), folio, unpointed, with Kimchi's commentary: of this the *Prophetae Posteriores* (Isaiah—Malachi), also with Kimchi's commentary, was probably the continuation. The Megilloth were also printed, along with the prayers of the Italian Jews, at the same place and date, in 4to. Next year, 1487, the whole *Itiagiographa*, pointed, but unaccentuated, with rabbinical commentaries, appeared at Naples, in either small fol. or large 4to, 2 vols. Thus every separate portion of the Bible was in print before any complete edition of the whole appeared.

The honor of printing the first entire Hebrew Bible belongs to the above-mentioned town of Soncino. The edition is in folio, pointed and accented. Nine copies only of it are now known, of which one belongs to Exeter College, Oxford. The earlier printed portions were perhaps the basis of the text. This was followed, in 1494, by the 4to or 8vo edition printed by Gersom at Brescia, remarkable as being the edition from which Luther's German translation was made. It has many peculiar readings, and instead of giving the Keris in the margin, incorporates them generally in the text, which is therefore not to be depended upon. The unusual letters also are not distinguished. This edition, along with the preceding, formed the basis of the first edition, with the Masorah, Targums, and rabbinical comments, printed by Bomberg at Venice in 1518, fol., under the editorship of the converted Jew Felix del Prato; though the "*plurimis collatis exemplaribus*" of the editor seems to imply that MSS. were also used in aid. This edition was the first to contain the Masorah magna, and the various readings of Ben Asher and Ben Naphtali. On the Brescian text depended also, in greater or less degree, Bomberg's smaller Bibles, 4to, of 1518, 1521. From the same text, or from the equivalent text of Bomberg's first Rabbinical Bible, was, at a subsequent period, mainly derived that of Seb. Münster, printed by Froben at Basle, 4to, 1534-35: which is valued, however, as containing a list of various readings which must have been collected by a Jewish editor, and, in part, from MSS.

After the Brescian, the next primary edition was that contained in the Complutensian Polyglot, published at Complutum (Alcala) in Spain, at the expense of Cardinal Ximenes, dated 1514-17, but not issued till 1522. The whole work, 6 vols. fol., is said to have cost 50,000 ducats: its original price was 61 ducats, its present value about 40*l.* The Hebrew, Vulgate, and Greek texts of the O. T. (the latter with a Latin translation) appear in three parallel columns: the Targum of Onkelos, with a Latin translation, is in two columns below. The Hebrew is pointed, but unaccentuated: it was taken from seven MSS., which are still preserved in the University Library at Madrid.

To this succeeded an edition which has had more influence than any on the text of later times—the Second Rabbinical Bible, printed by Bomberg at Venice, 4 vols. fol. 1525-56. The editor was the learned Tunisian Jew, R. Jacob ben Chaim; a Latin translation of his preface will be found in Kennicott's Second Dissertation, p. 229 ff. The great feature of his work lay in the correction of the text by the precepts of the Masorah, in which he was

profoundly skilled, and on which, as well as on the text itself, his labors were employed. Bonberg's Third Rabbinical Bible, 4 vols. fol. 1547-49, edited by Adelkind, was in the main a reprint of the preceding. Errors were, however, corrected, and some of the rabbinical commentaries were replaced by others. The same text substantially reappeared in the Rabbinical Bibles of John de Gara, Venice, 4 vols. fol. 1568, and of Bragadini, Venice, 4 vols. fol. 1617-18; also in the later 4to Bibles of Bomberg himself, 1528, 1533, 1544; and in those of R. Stephens, Paris, 4to, 1539-44 (so Opitz and Bleek: others represent this as following the Brescian text); R. Stephens, Paris, 16mo, 1544-46; Justiniani, Venice, 4to, 1551, 18mo, 1552, 4to, 1563, 4to, 1573; De la Rouviere, Geneva, various sizes, 1618; De Gara, Venice, various sizes, 1566, 1568, 1582; Bragadini, Venice, various sizes, 1614, 1615, 1619, 1628; Plantin, Antwerp, various sizes, 1566; Hartmann, Frankfort-on-Oder, various sizes, 1595, 1598; and Crato (Kraft), Wittenberg, 4to, 1586.

The Royal or Antwerp Polyglot, printed by Plantin, 8 vols. fol. 1569-72, at the expense of Philip II. of Spain, and edited by Arias Montanus and others, took the Complutensian as the basis of its Hebrew text, but compared this with one of Bomberg's, so as to produce a mixture of the two. This text was followed both in the Paris Polyglot of Le Jay, 9 vols. fol. 1645, and in Walton's Polyglot, London, 6 vols. fol. 1657. The printing of the text in the Paris Polyglot is said to be very incorrect. The same text appeared also in Plantin's later Bibles, with Latin translations, fol. 1571, 1584; and in various other Hebrew-Latin Bibles: Burgos, fol. 1581; Geneva, fol. 1609, 1618; Leyden, 8vo, 1613; Frankfort-on-Maine (by Knoch), fol. 1681; Vienna, 8vo, 1743; in the quadrilingual Polyglot of Reineccius, Leipsic, 3 vols. fol. 1750-51; and also in the same editor's earlier 8vo Bible, Leipsic, 1725, for which, however, he professes to have compared MSS.

A text compounded of several of the preceding was issued by the Leipsic professor, Elias Hutter, at Hamburg, fol. 1587: it was intended for students, the servile letters being distinguished from the radicals by hollow type. This was reprinted in his uncompleted Polyglot, Nuremberg, fol. 1591, and by Nissel, 8vo, 1662. A special mention is also due to the labors of the elder Buxtorf, who carefully revised the text after the Masorah, publishing it in 8vo at Basle, 1611, and again, after a fresh revision, in his valuable Rabbinical Bible, Basle, 2 vols. fol. 1618-19. This text was also reprinted at Amsterdam, 8vo, 1639, by R. Manasseh ben Israel, who had previously issued, in 1631, 1635, a text of his own with arbitrary grammatical alterations.

Neither the text of Hutter nor that of Buxtorf was without its permanent influence; but the Hebrew Bible which became the standard to subsequent generations was that of Joseph Athias, a learned rabbi and printer at Amsterdam. His text was based on a comparison of the previous editions with two MSS.; one bearing date 1299; the other a Spanish MS., boasting an antiquity of 900 years. It appeared at Amsterdam, 2 vols. 8vo, 1661, with a preface by Leusden, professor at Utrecht; and again, revised afresh, in 1667. These Bibles were much prized for their beauty and correctness; and a gold chain and medal were conferred on Athias. In token of their appreciation of them, by the States General of Holland. The progeny of the

text of Athias was as follows: (a.) That of Clodius, Frankfort-on-Maine, 8vo, 1677, reprinted with alterations, 8vo, 1692, 4to, 1716. (b.) That of Jablonsky, Berlin, large 8vo or 4to, 1699; reprinted, but less correctly, 12mo, 1712. Jablonsky collated all the cardinal editions, together with several MSS., and bestowed particular care on the vowel-points and accents. (c.) That of Van der Hooght, Amsterdam and Utrecht, 2 vols. 8vo, 1705. This edition, of good reputation for its accuracy, but above all for the beauty and distinctness of its type, deserves special attention, as constituting our present *textus receptus*. The text was chiefly formed on that of Athias: no MSS. were used for it, but it has a collection of various readings from printed editions at the end. The Masoretic readings are in the margin. (d.) That of Opitz, Kiel, 4to, 1709, very accurate: the text of Athias was corrected by comparing seventeen printed editions and some MSS. (e.) That of J. H. Michaelis, Halle, 8vo and 4to, 1720. It was based on Jablonsky: twenty-four editions and five Erfurt MSS. were collated for it, but, as has been found, not thoroughly. Still the edition is much esteemed, partly for its correctness, and partly for its notes and parallel references. Davidson pronounces it superior to Van der Hooght's in every respect except legibility and beauty of type.

These editions show that on the whole the text was by this time firmly and permanently established. We may well regard it as a providential circumstance that, having been early conformed by Ben Chaim to the Masorah, the printed text should in the course of the next two hundred years have acquired in this its Masoretic form, a sacredness which the subsequent labors of a more extended criticism could not venture to contemn. Whatever errors, and those by no means unimportant, such wider criticism may lead us to detect in it, the grounds of the corrections which even the most cautious critics would adopt are often too precarious to enable us, in departing from the Masoretic, to obtain any other satisfactory standard: while in practice the mischief that would have ensued from the introduction into the text of the emendations of Houbigant and the critics of his school would have been the occasion of incalculable and irreparable harm. From all such it has been happily preserved free; and while we are far from deeming its authority absolute, we yet value it, because all experience has taught us that, in seeking to remodel it, we should be introducing into it worse imperfections than those which we desire to remove, while we should lose that which is, after all, no light advantage, a definite textual standard universally accepted by Christians and Jews alike. So essentially different is the treatment demanded by the text of the Old Testament and by that of the New.

The modern editions of the Hebrew Bible now in use are all based on Van der Hooght. The earliest of these was that of Simonis, Halle, 1752, and more correctly 1767; reprinted 1822, 1828. In England the most popular edition is the sterling one by Judah D'Allenand, 8vo, of high repute for correctness: there is also the pocket edition of Bagster, on which the same editor was employed. In Germany there are the 8vo edition of Hahn; the 12mo edition, based on the last, with preface by Rosenmüller (said by Keil to contain some conjectural alterations of the text by Landschreiber); and the 8vo edition of Theile.

4. *Critical Labors and Apparatus.* — The *Nis*

tory of the criticism of the text has already been brought down to the period of the labors of the Masorets and their immediate successors. It must be here resumed. In the early part of the 13th century, R. Meir Levita, a native of Burgos and inhabitant of Toledo, known by abbreviation as Haramah, by patronymic as Todrosius, wrote a critical work on the Pentateuch called *The Book of the Masorah the Hedge of the Law*, in which he endeavored, by a collation of MSS., to ascertain the true reading in various passages. This work was of high repute among the Jews, though it long remained in manuscript: it was eventually printed at Florence in 1750; again, incorrectly, at Berlin, 1761. At a later period R. Menahem de Lonzano collated ten MSS., chiefly Spanish, some of them five or six centuries old, with Bomberg's 4to Bible of 1544. The results were given in the work *אור התורה*, "Light of the Law," printed in the *רות*, Venice, 1618, afterwards by itself, but less accurately, Amsterdam, 1659. They relate only to the Pentateuch. A more important work was that of R. Solomon Norzi of Mantua, in the 17th century, *נורר פרץ*, "Repairer of the Breach;" a copious critical commentary on the whole of the O. T., drawn up with the aid of MSS. and editions, of the Masorah, Talmud, and all other Jewish resources within his reach. In the Pentateuch he relied much on Todrosius: with R. Menahem he had had personal intercourse. His work was first printed, 116 years after its completion, by a rich Jewish physician, Raphael Chaim, Mantua, 4 vols. 4to, 1742, under the title *מנחת שׁוׁ*: the emendations on Proverbs and Job alone had appeared in the margin of a Mantuan edition of those books in 1725. The whole was reprinted in a Vienna O. T., 4to, 1813-16.

Meanwhile various causes, such as the controversies awakened by the Samaritan text of the Pentateuch, and the advances which had been made in N. T. criticism, had contributed to direct the attention of Christian scholars to the importance of a more extended criticism of the Hebrew text of the O. T. In 1745 the expectations of the public were raised by the *Prolegomena* of Houbigant, of the Oratory at Paris; and in 1753 his edition appeared, splendidly printed, in 4 vols. fol. The text was that of Van der Hooght, divested of points, and of every vestige of the Masorah, which Houbigant, though he used it, rated at a very low value. In the notes copious emendations were introduced. They were derived—(a) from the Samaritan Pentateuch, which Houbigant preferred in many respects to the Jewish; (b) from twelve Hebrew MSS., which, however, do not appear to have been regularly collated, their readings being chiefly given in those passages where they supported the editor's emendations; (c) from the Septuagint and other ancient versions; and (d) from an extensive appliance of critical conjecture. An accompanying Latin translation embodied all the emendations adopted. The notes were reprinted at Frankfort-on-Maine, 2 vols. 4to, 1777: they constitute the cream of the original volumes, the splendor of which was disproportionate to their value, as they contained no materials besides those on which the editor directly rested. The whole work was indeed too ambitious: its canons of criticism were thoroughly unsound, and its ventures

rash. Yet its merits were also considerable: and the newness of the path which Houbigant was essaying may be pleaded in extenuation of its faults. It effectually broke the Masoretic coat of ice wherewith the Hebrew text had been incrustated; but it afforded also a severe warning of the difficulty of finding any sure standing-ground beneath. In the same year, 1753, appeared at Oxford Kennicott's first Dissertation on the state of the Printed Text: the second followed in 1759. The result of these and of the author's subsequent annual reports was a subscription of nearly £10,000 to defray the expenses of a collation of Hebrew MSS. throughout Europe, which was performed from 1760 to 1769, partly by Kennicott himself, but chiefly, under his direction, by Professor Brunus of Helmstadt and others. The collation extended in all to 581 Jewish and 16 Samaritan MSS., and 40 printed editions, Jewish works, etc.; of which, however, only about half were collated throughout, the rest in select passages. The fruits appeared at Oxford in 2 vols. fol. 1776-80: the text is Van der Hooght's, unpointed; the various readings are given below; comparisons are also made of the Jewish and Samaritan texts of the Pentateuch, and of the parallel passages in Samuel and Chronicles, etc. They much disappointed the expectations that had been raised. It was found that a very large part of the various readings had reference simply to the omission or insertion of the *matres lectionis*; while of the rest many obviously represented no more than the mistakes of separate transcribers. Happily for the permanent interests of criticism this had not been anticipated. Kennicott's own weakness of judgment may also have made him less aware of the smallness of the immediate results to follow from his persevering toil; and thus a Herculean task, which in the present state of critical knowledge could scarcely be undertaken, was providentially, once for all, performed with a thoroughness for which, to the end of time, we may well be thankful.

The labors of Kennicott were supplemented by those of De Rossi, professor at Parma. His plan differed materially from Kennicott's: he confined himself to a specification of the various readings in select passages; but for these he supplied also the critical evidence to be obtained from the ancient versions, and from all the various Jewish authorities. In regard of manuscript resources, he collected in his own library 1,031 MSS., more than Kennicott had collated in all Europe; of these he collated 617, some being those which Kennicott had collated before: he collated also 134 extraneous MSS. that had escaped Kennicott's fellow-laborers; and he recapitulated Kennicott's own various readings. The readings of the various printed editions were also well examined. Thus, for the passages on which it treats, the evidence in De Rossi's work may be regarded as almost complete. It does not contain the text. It was published at Parma, 4 vols. 4to, 1784-88: an additional volume appeared in 1798.

A small Bible, with the text of Reineccius, and a selection of the more important readings of Kennicott and De Rossi, was issued by Dœrlein and Meisner at Leipsic, 8vo, 1793. It is printed (except some copies) on bad paper, and is reputed very incorrect. A better critical edition is that of Jahn, Vienna, 4 vols. 8vo, 1806. The text is Van der Hooght's, corrected in nine or ten places: the more important various readings are subjoined.

with the authorities, and full information is given. But, with injudicious peculiarity, the books are arranged in a new order; those of Chronicles are split up into fragments, for the purpose of comparison with the parallel books; and only the principal accents are retained.

The first attempt to turn the new critical collations to public account was made by Boothroyd, in his unpointed Bible, with various readings and English notes, Pontefract, 4to, 1810-16, at a time when Houbigant's principles were still in the ascendant. This was followed in 1821 by Hamilton's *Codex Criticus*, modeled on the plan of the N. T. of Griesbach, which is, however, hardly adapted to the O. T., in the criticism of the text of which diplomatic evidence is of so much less weight than in the case of the N. T. The most important contribution towards the formation of a revised text that has yet appeared is unquestionably Dr. Davidson's *Hebrew Text of the O. T.*, revised from critical sources, 1855. It presents a convenient epitome of the more important various readings of the MSS. and of the Masorah, with the authorities for them; and in the emendations of the text which he sanctions, when there is any Jewish authority for the emendation, he shows on the whole a fair judgment. But he ventures on few emendations for which there is no direct Jewish authority, and seems to have practically fallen into the error of disparaging the critical aid to be derived from the ancient versions, as much as it had by the critics of the last century been unduly exalted.

It must be confessed that little has yet been done for the systematic criticism of the Hebrew text from the ancient versions, in comparison of what might be accomplished. We have even yet to learn what critical treasures those versions really contain. They have, of course, at the cost of much private labor, been freely used by individual scholars, but the texts implied in them have never yet been fairly exhibited or analyzed, so as to enable the literary world generally to form any just estimate of their real value. The readings involved in their renderings are in Houbigant's volumes only adduced when they support the emendations which he desired to advance. By De Rossi they are treated merely as subsidiary to the MSS., and are therefore only adduced for the passages to which his manuscript collations refer. Nor have Boothroyd's or Davidson's treatment of them any pretensions whatever to completeness. Should it be alleged that they have given all the important version-readings, it may be at once replied that such is not the case, nor indeed does it seem possible to decide *primâ facie* of any version-reading whether it be important or not: many have doubtless been passed over again and again as unimportant, which yet either are genuine readings or contain the elements of them. Were the whole of the Septuagint variations from the Hebrew text lucidly exhibited in Hebrew, they would in all probability serve to suggest the true reading in many passages in which it has not yet been recovered; and no better service could be rendered to the cause of textual criticism by any scholar who would undertake the labor. Skill, scholarship, and patience would be required in deciphering many of the Hebrew readings which the Septuagint represents, and in cases of uncertainty that uncertainty should be noted. For the books of Samuel the task has been grappled with, appar-

ently with care, by Thenius in the *Exegetisches Handbuch*; but the readings are not conveniently exhibited, being given partly in the body of the commentary, partly at the end of the volume. For the Psalms we have Reinke's *Kurze Zusammenstellung aller Abweichungen vom heb. Texte in der Ps. übersetzung der LXX. und Vulg.*, etc.; but the criticism of the Hebrew text was not the author's direct object.

It might be well, too, if along with the version-readings were collected together all, or at least all the more important, conjectural emendations of the Hebrew text proposed by various scholars during the last hundred years, which at present lie buried in their several commentaries and other publications. For of these, also, it is only when they are so exhibited as to invite an extensive and simultaneous criticism that any true general estimate will be formed of their worth, or that the pearls among them, whether few or many, will become of any general service. That by far the greater number of them will be found beside the mark we may at once admit; but obscurity, or an unpopular name, or other cause, has probably withheld attention from many suggestions of real value.

5. *Principles of Criticism.*—The method of procedure required in the criticism of the O. T. is widely different from that practiced in the criticism of the N. T. Our O. T. *textus receptus* is a far more faithful representation of the genuine Scripture, nor could we on any account afford to part with it; but, on the other hand, the means of detecting and correcting the errors contained in it are more precarious, the results are more uncertain, and the ratio borne by the value of the diplomatic evidence of MSS. to that of a good critical judgment and sagacity is greatly diminished.

It is indeed to the direct testimony of the MSS. that, in endeavoring to establish the true text, we must first have recourse. Against the general consent of the MSS. a reading of the *textus receptus*, merely as such, can have no weight. Where the MSS. disagree, it has been laid down as a canon that we ought not to let the mere numerical majority preponderate, but should examine what is the reading of the earliest and best. This is no doubt theoretically correct, but it has not been generally carried out: nor, while so much remains to be done for the ancient versions, must we clamor too loudly for the expenditure, in the sifting of MSS., of the immense labor which the task would involve; for internal evidence can alone decide which MSS. are entitled to greatest authority, and the researches of any single critic into their relative value could not be relied on till checked by the corresponding researches of others, and in such researches few competent persons are likely to engage. While, however, we content ourselves with judging of the testimony of the MSS. to any particular reading by the number sanctioning that reading, we must remember to estimate not the absolute number, but the relative number to the whole number of MSS. collated for that passage. The circumstance that only half of Kennicott's MSS., and none of De Rossi's, were collated throughout, as also that the number of MSS. greatly varies for different books of the O. T., makes attention to this important. Davidson, in his *Revision of the Heb. Text*, has gone by the absolute number, which he should only have done when that number was very small.

The MSS. lead us for the most part only to our

first sure standing-ground, the Masoretic text; in other words, to the average written text of a period later by a thousand or fifteen hundred years than the latest book of the O. T. It is possible, however, that in particular MSS. pre-Masoretic readings may be incidentally preserved. Hence isolated MS. readings may serve to confirm those of the ancient versions.

In ascending upwards from the Masoretic text, our first critical materials are the Masoretic Keri, valuable as witnesses to the preservation of many authentic readings, but on which it is impossible to place any degree of reliance, because we can never be certain, in particular instances, that they represent more than mere unauthorized conjectures. A Keri therefore is not to be received in preference to a Chethib unless confirmed by other sufficient evidence, external or internal; and in reference to the Keri let the rule be borne in mind, "Procliviscriptioni prestat ardua," many of them being but arbitrary softenings down of difficult readings in the genuine text. It is furthermore to be observed, that when the reading of any number of MSS. agrees, as is frequently the case, with a Masoretic Keri, the existence of such a Keri may be a damage rather than otherwise to the weight of the testimony of those MSS., for it may itself be the untrustworthy source whence their reading originated.

The express assertions of the Masorah, as also of the Targum, respecting the true reading in particular passages, are of course important: they indicate the views entertained by the Jews at a period prior to that at which our oldest MSS. were made.

From these we ascend to the version of Jerome, the most thoroughly trustworthy authority on which we have to rely in our endeavors to amend the Masoretic text. Dependent as Jerome was, for his knowledge of the Hebrew text and everything respecting it, on the Palestinian Jews, and accurate as are his renderings, it is not too much to say that a Hebrew reading which can be shown to have been received by Jerome, should, if sanctioned or countenanced by the Targum, be so far preferred to one upheld by the united testimony of all MSS. whatever. And in general we may definitely make out the reading which Jerome followed. There are, no doubt, exceptions. Few would think of placing much reliance on any translation as to the presence or absence of a simple  $\aleph$  copular in the original text. Again in Psalm cxlv. 2, where the authority of Jerome and of other translators is alleged for the reading עַמִּים, "peoples," while the great majority of MSS. give עַמִּי, "my people," we cannot be certain that he did not really read עַמִּי, regarding it, although wrongly, as an apocopated plural. Hence the precaution necessary in bringing the evidence of a version to bear upon the text: when used with such precaution, the version of Jerome will be found of the very greatest service.

Of the other versions, although more ancient, none can on the whole be reckoned, in a critical point of view, so valuable as his. Of the Greek versions of Aquila, Symmachus, and Theodotion, we possess but mere fragments. The Syriac bears the impress of having been made too much under the influence of the Septuagint. The Targums are

too often paraphrastic. For a detailed account of them the reader is referred to the various articles [VERSIONS, etc.]. Still they all furnish most important material for the correction of the Masoretic text; and their cumulative evidence, when they all concur in a reading different to that which it contains, is very strong.

The Septuagint itself, venerable for its antiquity but on various accounts untrustworthy in the readings which it represents, must be treated for critical purposes in the same way as the Masoretic Keri. It doubtless contains many authentic readings of the Hebrew text not otherwise preserved to us; but, on the other hand, the presence of any Hebrew reading in it can pass for little, unless it can be independently shown to be probable that that reading is the true one. It may, however, suggest the true reading, and it may confirm it where supported by other considerations. Such, for example, is the case with the almost certain correction of יהוה  $\aleph$  יוהוה, "shall keep holyday to thee,"

for יהוה  $\aleph$  יוהוה, "thou shalt restrain," in Psalm lxxvi.

10. In the opposite direction of confirming a Masoretic reading against which later testimonies militate, the authority of the Septuagint, on account of its age, necessarily stands high.

Similar remarks would, *a priori*, seem to apply to the critical use of the Samaritan Pentateuch: it is, however, doubtful whether that document be of any real additional value.

In the case of the O. T., unlike that of the N. T., another source of emendations is generally allowed, namely, critical conjecture. Had we any reason for believing that, at the date of the first translation of the O. T. into Greek, the Hebrew text had been preserved immaculate, we might well abstain from venturing on any emendations for which no direct external warrant could be found; but the Septuagint version is nearly two centuries younger than the latest book of the O. T.; and as the history of the Hebrew text seems to show that the care with which its purity has been guarded has been continually on the increase, so we must infer that it is just in the earliest periods that the few corruptions which it has sustained would be most likely to accrue. Few enough they may be; but, if analogy may be trusted, they cannot be altogether imaginary. And thus arises the necessity of admitting, besides the emendations suggested by the MSS. and versions, those also which originate in the simple skill and honest ingenuity of the critic; of whom, however, while according him this license, we demand in return that he shall bear in mind the sole legitimate object of his investigations, and that he shall not obtrude upon us any conjectural reading, the genuineness of which he cannot fairly establish by circumstantial evidence. What that circumstantial evidence shall be it is impossible to define beforehand: it is enough that it be such as shall, when produced, bring some conviction to a reasoning mind.

There are cases in which the Septuagint will supply an indirect warrant for the reception of a reading which it nevertheless does not directly sanction: thus in Ez. xli. 11, where the present text has the meaningless word בַּקֹּרֶם, "place," while the Septuagint inappropriately reads בְּאוֹרֶה, "light," there arises a strong presumption that both readings are equally corruptions of בְּקֹרֶר, "foun-

lain," referring to a water-gallery running along the walls of the Temple exactly in the position described in the Talmud. An indirect testimony of this kind may be even more conclusive than a direct testimony, inasmuch as no suspicion of design can attach to it. In Is. ix. 3, where the text, as emended by Professor Selwyn in his *Horæ Hebraicæ*, runs הרבית הגיל הגדלת השמחה, "Thou hast multiplied the gladness, thou hast increased the joy," one confirmation of the correctness of the proposed reading is well traced by him in the circumstance of the final ל of the second and the initial ה of the third word furnish the לה, "to it," implied in the ה of the Septuagint, and according with the assumed feminine noun הרבית, τὸ πλεῖστον, or with הרבית or מרבית which was substituted for it (see this fully brought out, *Hor. Heb.* pp. 32 ff.).

It is frequently held that much may be drawn from parallel passages towards the correction of portions of the Hebrew text; and it may well be allowed that in the historical books, and especially in catalogues, etc., the texts of two parallel passages throw considerable light the one upon the other. Kennicott commenced his critical dissertations by a detailed comparison of the text of 1 Chr. xi. with that of 2 Sam. v., xxiii.; and the comparison brought to light some corruptions which cannot be gainsaid. On the other hand, in the poetical and prophetic books, and to a certain extent in the whole of the O. T., critical reliance on the texts of parallel passages is attended with much danger. It was the practice of the Hebrew writers, in revising former productions, or in borrowing the language to which others had given utterance, to make comparatively minute alterations, which seem at first sight to be due to mere carelessness, but which nevertheless, when exhibited together, cannot well be attributed to neglect but design. We have a striking instance of this in the two recensions of the same hymn (both probably Davidic) in Ps. xviii. and 2 Sam. xxii. Again, Ps. lxxxvi. 14 is imitated from Ps. liv. 3, with the alteration of זרים, "strangers," into זדים, "proud." A headlong critic would naturally assimilate the two passages, yet the general purport of the two psalms makes it probable that each word is correct in its own place. Similarly Jer. xlvi. 45, is derived from Num. xxi. 28, xxiv. 17; the alterations throughout are curious, but especially at the end, where for וקרקו כל-בני-שר, "and destroy all the children of Sheth," we have בני שר, "and the crown of the head of the children of tumult;" yet no suspicion legitimately attaches to the text of either passage. From such instances, the caution needful in making use of parallels will be at once evident.

The comparative purity of the Hebrew text is probably different in different parts of the O. T. In the revision of Dr. Davidson, who has generally restricted himself to the admission of corrections warranted by MS., Masoretic, or Talmudic authority, those in the book of Genesis do not exceed 11; those in the Psalms are proportionately three times

as numerous: those in the historical books and the Prophets are proportionately more numerous than those in the Psalms. When our criticism takes a wider range, it is especially in the less familiar parts of Scripture that the indications of corruption present themselves before us. In some of these the Septuagint version has been made to render important service; in the genealogies, the errors which have been insisted on are for the most part found in the Septuagint as well as in the Hebrew, and are therefore of older date than the execution of the Septuagint. It has been maintained by Keil, and perhaps with truth (*Apol. Versuch über die Bücher der Chronik*, pp. 185, 235), that many of these are older than the sacred books themselves, and had crept into the documents which the authors incorporated, as they found them, into those books. This remark will not, however, apply to all; nor, as we have already observed, is there any ground for supposing that the period immediately succeeding the production of the last of the canonical writings was one during which those writings would be preserved perfectly immaculate. If Lord A. Hervey be right in his rectification of the genealogy in 1 Chr. iii. 19 ff. (*On the Geneal.* pp. 98-110), the interpolation at the beginning of ver. 22 must be due to some transcriber of the book of Chronicles; and a like observation will apply to the present text of 1 Chr. ii. 6, respecting which see Thrupp's *Intro. to the Psalms*, ii. 98, note.

In all emendations of the text, whether made with the aid of the critical materials which we possess, or by critical conjecture, it is essential that the proposed reading be one from which the existing reading may have been derived; hence the necessity of attention to the means by which corruptions were introduced into the text. One letter was accidentally exchanged by a transcriber for another: thus in Is. xxiv. 15, בארים may perhaps be a corruption for באיים (so Lowth). In the square alphabet the letters ו, ר, ל and י, were especially liable to be confused; there were also similarities between particular letters in the older alphabet. Words, or parts of words, were repeated (cf. the Talmudic detections of this, *supra*; similar is the mistake of "so no now" for "so now" in a modern English Bible); or they were dropped, and this especially when they ended like those that preceded, e. g. וואל after שמואל (1 Chr. vi. 13). A whole passage seems to have dropped out from the same cause in 1 Chr. xi. 13 (cf. Kennicott, *Diss.* i. 123 ff.). Occasionally a letter may have travelled from one word, or a word from one verse, to another; hence in Hos. vi. 5, ומשפטך אור has been supposed by various critics (and so Selwyn, *Hor. Heb.* pp. 154 ff.), and that with the sanction of all the versions except Jerome's, to be a corruption for ומשפטי כאור. This is one of those cases where it is difficult to decide on the true reading; the emendation is highly probable, but at the same time too obvious not to excite suspicion; a scrupulous critic, like Maurer, rejects it. There can be little doubt that we ought to reject the proposed emendations of Ps. xlii. 5, 6, by the transference of אלתי into ver. 5, or by the supply of it in that verse, in order to assimilate it to ver. 11 and to Ps. dliv. 5. Had the verses in so familiar a

psalm been originally alike, it is almost incredible that any transcriber should have rendered them differently. With greater probability in Gen. xxvii. 33, Hitzig (*Begriff der Kritik*, p. 126) takes the final  $\text{ויהי}$ , and, altering it into  $\text{ויהיה}$ , transfers it into ver. 34, making the preceding word the infinitive. That glosses have occasionally found their way into the text we may well believe. The words  $\text{ויהי בידם}$

in Is. x. 5 have much the appearance of being a gloss explanatory of  $\text{בזוהר}$  (Hitzig, *Begr.* pp. 157, 158), though the verse can be well construed without their removal; and that Dent. x. 6, 7, have crept into the text by some illegitimate means, seems, notwithstanding Hengstenberg's defense of them (*Gen. of Pent.* ii.), all but certain.

Willful corruption of the text on polemical grounds has also been occasionally charged upon the Jews; but the allegation has not been proved, and their known reverence for the text militates against it. More trustworthy is the negative bearing of that hostility of the Jews against the Christians, which, even in reference to the Scriptures, has certainly existed; and it may be fairly argued that if Aquila, who was employed by the Jews as a translator on polemical grounds, had ever heard of the modern reading  $\text{כארי}$ , "as a lion," in Ps. xxii. 17 (16), he would have been too glad to follow it, instead of translating  $\text{כארו}$ , "they pierced," by  $\text{ჭოჯუ-ვა}$ .

To the criticism of the vowel-marks the same general principles must be applied, *mutatis mutandis*, as to that of the consonants. Nothing can be more remote from the truth than the notion that we are at liberty to supply vowels to the text at our unfettered discretion. Even Hitzig, who does not generally err on the side of caution, holds that the vowel-marks have in general been rightly fixed by tradition, and that other than the Masoretic vowels are seldom required, except when the consonants have been first changed (*Begr.* p. 119).

In conclusion, let the reader of this or any article on the method of dealing with errors in the text beware of drawing from it the impression of a general corruptness of the text which does not really exist. The works of Biblical scholars have been on the whole more disfigured than adorned by the emendations of the Hebrew text which they have suggested; and the cautions by which the more prudent have endeavored to guard against the abuse of the license of emending, are, even when critically unsound, so far commendable, that they show a healthy respect for the Masoretic text which might with advantage have been more generally felt. It is difficult to reduce to formal rules the treatment which the text of the O. T. should receive, but the general spirit of it might thus be given: Deem the Masoretic text worthy of confidence, but do not refuse any emendations of it which can be fairly established: of such judge by the evidence adduced in their support, when advanced, not by any supposed previous necessity for them, respecting which the most erroneous views have been frequently entertained; and, lastly, remember that the judgment of the many will correct that of the few, the judgment of future generations that of the present, and that permanent neglect generally awaits emendations which approve

themselves by their brilliancy rather than by their soundness. (See generally Walton's *Prolegomena* Kennicott's *Dissertatio Generalis*; De Rossi's *Prolegomena*; Bp. Marsh's *Lectures*; Davidson's *Bib. Criticism*, vol. i.; and the *Introductions* of Horne and Davidson, of De Wette, Hävernick, Keil, and Bleek.)

#### B. — INTERPRETATION OF THE OLD TESTAMENT.

1. *History of the Interpretation.* — We shall here endeavor to present a brief but comprehensive sketch of the treatment which the Scriptures of the O. T. have in different ages received.

At the period of the rise of Christianity two opposite tendencies had manifested themselves in the interpretation of them among the Jews; the one to an extreme literalism, the other to an arbitrary allegorism. The former of these was mainly developed in Palestine, where the Law of Moses was, from the nature of things, most completely observed. The Jewish teachers, acknowledging the obligation of that law in its minutest precepts, but overlooking the moral principles on which those precepts were founded and which they should have unfolded from them, there endeavored to supply by other means the imperfections inherent in every law in its mere literal acceptance. They added to the number of the existing precepts, they defined more minutely the method of their observance; and thus practically further obscured, and in many instances overthrew the inward spirit of the law by new outward traditions of their own (Matt. xv., xxiii.). On the other hand at Alexandria the allegorizing tendency prevailed. Germs of it had appeared in the apocryphal writings, as where in the book of Wisdom (xviii. 24) the priestly vestments of Aaron had been treated as symbolical of the universe. It had been fostered by Aristobulus, the author of the *Ἐξηγήσεις τῆς Μωυσέως γραφῆς*, quoted by Clement and Eusebius: and at length, two centuries later, it culminated in Philo, from whose works we best gather the form which it assumed. For in the general principles of interpretation which Philo adopted, he was but following, as he himself assures us, in the track which had been previously marked out by those, probably the Therapeutæ, under whom he had studied. His expositions have chiefly reference to the writings of Moses, whom he regarded as the arch-prophet, the man initiated above all others into divine mysteries; and in the persons and things mentioned in these writings he traces, without denying the outward reality of the narrative, the mystical designations of different abstract qualities and aspects of the invisible. Thus the three angels who came to Abraham represent with him God in his essential being, in his beneficent power, and in his governing power. Abraham himself, in his dealings with Sarah and Hagar, represents the man who has an admiration for contemplation and knowledge; Sarah, the virtue which is such a man's legitimate partner; Hagar, the encyclical accomplishments of all kinds which serve as the handmaid of virtue, the prerequisites for the attainment of the highest wisdom: her Egyptian origin sets forth that for the acquisition of this varied elementary knowledge the external senses of the body, of which Egypt is the symbol, are necessary. Such are Philo's interpretations. They are marked throughout by two fundamental defects. First, beautiful as are the moral lessons which he often unfolds, he yet shows no more appreciation than the Palestin-

an opponents of our Saviour of the moral teaching involved in the simpler acceptance of Scripture. And, secondly, his exposition is not the result of a legitimate drawing forth of the spiritual import which the Scripture contains, but of an endeavor to engraft the Gentile philosophy upon it. Of a Messiah, to whom the O. T. throughout spiritually pointed, Philo recked but little: the wisdom of Plato he contrives to find in every page. It was in fact his aim so to find it. The Alexandrian interpreters were striving to vindicate for the Hebrew Scriptures a new dignity in the eyes of the Gentile world, by showing that Moses had anticipated all the doctrines of the philosophers of Greece. Hence, with Aristobulus, Moses was an earlier Aristotle, with Philo, an earlier Plato. The Bible was with them a store-house of all the philosophy which they had really derived from other sources; and, in so treating it, they lost sight of the inspired theology, the revelation of God to man, which was its true and peculiar glory.

It must not be supposed that the Palestinian literalism and the Alexandrian allegorism ever remained entirely distinct. On the one hand we find the Alexandrian Philo, in his treatise on the special laws, commending just such an observance of the letter and an infraction of the spirit of the prohibition to take God's name in vain, as our Saviour exposes and condemns in Matt. v. 33-37. On the other hand among the Palestinians, both the high-priest Eleazar (ap. Euseb. *Præp. Ev.* viii. 9), and at a later period the historian Josephus (*Ant. præm.* 4), speak of the allegorical significance of the Mosaic writings in terms which lead us to suspect that their expositions of them, had they come down to us, would have been found to contain much that was arbitrary. And it is probable that traditional allegorical interpretations of the sacred writings were current among the Essenes. In fact the two extremes of literalism and arbitrary allegorism, in their neglect of the direct moral teaching and prophetic import of Scripture, had too much in common not to mingle readily the one with the other.

And thus we may trace the development of the two distinct yet coexistent spheres of Halachah and Hagadah, in which the Jewish interpretation of Scripture, as shown by the later Jewish writings, ranged. The former (הלכה, "repetition," "following") embraced the traditional legal determinations for practical observance: the latter (הגדה, "discourse") the unrestrained interpretation, of no authentic force or immediate practical interest. Holding fast to the position for which, in theory, the Alexandrian allegorists had so strenuously contended, that all the treasures of wisdom and knowledge, including their own speculations, were virtually contained in the Sacred Law, the Jewish doctors proceeded to define the methods by which they were to be elicited from it. The meaning of Scripture was, according to them, either that openly expressed in the words (משמע, *sensus innatus*), or else that deduced from them (דרשה, מדרש, *sensus illatus*) The former was itself either literal, פשוט, or figurative and mystical, סוד. The latter was partly obtained by simple logical inference; but partly also by the arbitrary detection of recondite meanings symbol-

ically indicated in the places, grammatical structure, or orthography of words taken apart from their logical context. This last was the cabalistic interpretation (קבלה, "reception," "received tradition"). Special mention is made of three processes by which it was pursued. By the process Gematria (גימטריה, *gemetria*) a symbolical import was attached to the number of times that a word or letter occurred, or to the number which one or more letters of any word represented.

By the process Notarjekon (נזריקות, *notarikon*) new significant words were formed out of the initial or final words of the text, or else the letters of a word were constituted the initials of a new significant series of words. And in Temurah (המורה, "change") new significant words were obtained from the text either by anagram (e. g. משיח, "Messiah" from ישמח, Ps. xxi. 1), or by the alphabet Atbash, wherein the letters א, ב, etc., were replaced by ת, ש, etc. Of such artifices the sacred writers had possibly for special purposes made occasional use; but that they should have been ever applied by any school to the general exegesis of the O. T. shows only into what trifling even labors on Scripture may occasionally degenerate.

The earliest Christian non-apostolic treatment of the O. T. was necessarily much dependent on that which it had received from the Jews. The Alexandrian allegorism reappears the most fully in the fanciful epistle of Barnabas; but it influenced also the other writings of the sub-apostolic Fathers. Even the Jewish cabalism passed to some extent into the Christian Church, and is said to have been largely employed by the Gnostics (Iren. i. 3, 8, 16, ii. 24). But this was not to last. Irenæus, himself not altogether free from it, raised his voice against it; and Tertullian well laid it down as a canon that the words of Scripture were to be interpreted only in their logical connection, and with reference to the occasion on which they were uttered (*De Præscr. Hæc.* 9). In another respect all was changed. The Christian interpreters by their belief in Christ stood on a vantage-ground for the comprehension of the whole burden of the O. T. to which the Jews had never reached; and thus however they may have erred in the details of their interpretations, they were generally conducted by them to the right conclusions in regard of Christian doctrine. It was through reading the O. T. prophecies that Justin had been converted to Christianity (*Dial. Tryph.* pp. 224, 225). The view held by the Christian Fathers that the whole doctrine of the N. T. had been virtually contained and foreshadowed in the Old, generally induced the search in the O. T. for such Christian doctrine rather than for the old philosophical dogmas. Thus we find Justin asserting his ability to prove by a careful enumeration that all the ordinances of Moses were types, symbols, and disclosures of those things which were to be realized in the Messiah (*Dial. Tryph.* p. 261). Their general convictions were doubtless here more correct than the details which they advanced; and it would be easy to multiply from the writings of either Justin, Tertullian, or Irenæus, typical interpretations that could no longer be defended. Yet even these were no unrestrained speculations: they were all de-

signed to illustrate what was elsewhere unequivocally revealed, and were limited by the necessity of conforming in their results to the Catholic rule of faith, the tradition handed down in the Church from the Apostles (*Tert. De Præser. Her.* 13, 37; *Iren.* iv. 26). It was moreover laid down by Tertullian, that the language of the Prophets, although generally allegorical and figurative, was not always so (*De Res. Carnis*, 19); though we do not find in the early Fathers any canons of interpretation in this respect. A curious combination, as it must seem to us, of literal and spiritual interpretation meets us in Justin's exposition, in which he is not alone, of those prophecies which he explains of millennial blessings; for while he believes that it is the literal Jerusalem which will be restored in all her splendor for God's people to inhabit, he yet contends that it is the spiritual Israel, not the Jews, that will eventually dwell there (*Dial. Tryph.* pp. 306, 352). Both Justin and Irenæus upheld the historical reality of the events related in the O. T. narrative. Both also fell into the error of defending the less commendable proceedings of the patriarchs — as the polygamy of Jacob, and the incest of Lot — on the strength of the typical character assumedly attaching to them (*Just. Dial. Tryph.* pp. 364 ff.; *Iren.* v. 32 ff.).

It was at Alexandria, which through her previous learning had already exerted the deepest influence on the interpretation of the O. T., that definite principles of interpretation were by a new order of men, the most illustrious and influential teachers in the Christian Church, first laid down. Clement here led the way. He held that in the Jewish law a fourfold import was to be traced; literal, symbolical, moral, prophetic (*Strom.* i. c. 28). Of these the second, by which the persons and things mentioned in the law were treated as symbolical of the material and moral universe, was manifestly derived from no Christian source, but was rather the relic of the philosophical element that others had previously engrafted on the Hebrew Scriptures. The new gold had not yet shaken off the old alloy; and in practice it is to the symbolical class that the most objectionable of Clement's interpretations will be found to belong. Such are those which he repeats from the book of Wisdom and from Philo of the high-priest's garment, and of the relation of Sarah to Hagar; or that of the branches of the sacred candlestick, which he supposes to denote the sun and planets. Nor can we commend the proneness to allegorism which Clement everywhere displays, and which he would have defended by the mischievous distinction which he handed down to Origen between *πίστις* and *γνώσις*, and by the doctrine that the literal sense leads only to a mere carnal faith, while for the higher Christian life the allegorical is necessary. Yet in Clement's recognition of a literal, a moral, and a prophetic import in the Law, we have the germs of the aspects in which the O. T. has been regarded by all subsequent ages; and his Christian treatment of the sacred oracles is shown by his acknowledging, equally with Tertullian and Irenæus, the rule of the tradition of the Lord as the key to their true interpretation (*Strom.* vii. c. 17).

Clement was succeeded by his scholar Origen. With him Biblical interpretation showed itself more decidedly Christian; and while the wisdom of the Egyptians, moulded anew, became the permanent inheritance of the Church, the distinctive symbolical meaning which philosophy had placed

upon the O. T. disappeared. Origen's principles of interpretation are fully unfolded by him in the *De Princip.* iv. 11 ff. He recognizes in Scripture, as it were, a body, soul, and spirit, answering to the body, soul, and spirit of man: the first serves for the edification of the simple, the second for that of the more advanced, the third for that of the perfect. The reality and the utility of the first, the letter of Scripture, he proves by the number of those whose faith is nurtured by it. The second, which is in fact the moral sense of Scripture, he illustrates by the interpretation of *Deut.* xxv. 4 in *1 Cor.* ix. 9. The third, however, is that on which he principally dwells, showing how the Jewish Law, spiritually understood, contained a shadow of good things to come; and how the N. T. had recognized such a spiritual meaning not only in the narrative of Moses, and in his account of the tabernacle, but also in the historical narrative of the other books (*1 Cor.* x. 11; *Gal.* iv. 21-31; *Heb.* viii. 5; *Rom.* xi. 4, 5). In regard of what he calls the soul of Scripture, his views are, it must be owned, somewhat uncertain. His practice with reference to it seems to have been less commendable than his principles. It should have been the moral teaching of Scripture arising out of the literal sense applied in accordance with the rules of analogy; but the moral interpretations actually given by Origen are ordinarily little else than a series of allegorisms of moral tendency; and thus he is, unfortunately, more consistent with his own practice when he assigns to the moral exposition not the second but the third place, exalting it above the mystical or spiritual, and so removing it further from the literal (*Hom. in Gen.* ii. 6). Both the spiritual and (to use his own term) the psychical meaning he held to be always present in Scripture; the bodily not always. Alike in the history and the law, he found things inserted or expressions employed which could not be literally understood, and which were intended to direct us to the pursuit of a higher interpretation than the purely literal. Thus the immoral actions of the patriarchs were to him stumbling-blocks which he could only avoid by passing over the literal sense of the narrative, and tracing in it a spiritual sense distinct from the literal; though even here he seems to reject the latter not as untrue, but simply as profitless. For while he held the body of Scripture to be but the garment of its spirit, he yet acknowledged the things in Scripture which were literally true to be far more numerous than those which were not; and occasionally, where he found the latter tend to edifying, as for instance in the moral commandments of the Decalogue as distinguished from the ceremonial and therefore typical law, he deemed it needless to seek any allegorical meaning (*Hom. in Num.* xi. 1). Origen's own expositions of Scripture were, no doubt, less successful than his investigations of the principles on which it ought to be expounded. Yet as the appliances which he brought to the study of Scripture made him the father of Biblical criticism, so of all detailed Christian Scriptural commentaries his were the first; a fact not to be forgotten by those who would estimate aright their several merits and defects.

The labors of one genuine scholar became the inheritance of the next; and the value of Origen's researches was best appreciated, a century later, by Jerome. He adopted and repeated most of Origen's principles; but he exhibited more judgment in the

practical application of them: he devoted more attention to the literal interpretation, the basis of the rest, and he brought also larger stores of learning to bear upon it. With Origen he held that Scripture was to be understood in a threefold manner, literally, tropologically,<sup>a</sup> mystically: the first meaning was the lowest, the last the highest (tom. v. p. 172, Vall.). But elsewhere he gave a new threefold division of Scriptural interpretation; identifying the ethical with the literal or first meaning, making the allegorical or spiritual meaning the second, and maintaining that, thirdly, Scripture was to be understood "secundum futurorum beatitudinem" (tom. vi. p. 270). Interpretation of this last kind, vague and generally untenable as it is, was that denominated by succeeding writers the *anagogical*; a term which had been used by Origen as equivalent to spiritual (cf. *De Princip.* iv. 9), though the contrary has been maintained by writers familiar with the later distinction. Combining these two classifications given by Jerome of the various meanings of Scripture, we obtain the fourfold division which was current through the Middle Ages, and which has been perpetuated in the Romish Church down to recent times:—

"Littera gesta docet; quid credas, Allegoria;  
Moralis quid agas; quo tendas, Anagogia"—

and in which, it will be observed, in conformity with the practice rather than the precept of Origen, the moral or tropological interpretation is raised above the allegorical or spiritual.

The principles laid down by master-minds, notwithstanding the manifold lapses made in the application of them, necessarily exerted the deepest influence on all who were actually engaged in the work of interpretation. The influence of Origen's writings was supreme in the Greek Church for a hundred years after his death. Towards the end of the 4th century Diodore, bishop of Tarsus, previously a presbyter at Antioch, wrote an exposition of the whole of the O. T., attending only to the letter of Scripture, and rejecting the more spiritual interpretation known as *theoplia*, the contemplation of things represented under an outward sign. He also wrote a work on the distinction between this last and allegory. Of the disciples of Diodore, Theodore of Mopsuestia pursued an exclusively grammatical interpretation into a decided rationalism, rejecting the greater part of the prophetic reference of the O. T., and maintaining it to be only applied to our Saviour by way of accommodation. Chrysostom, another disciple of Diodore, followed a sounder course, rejecting neither the literal nor the spiritual interpretation, but bringing out with much force from Scripture its moral lessons. He was followed by Theodore, who interpreted both literally and historically, and also allegorically and prophetically. His commentaries display both diligence and soberness, and are uniformly instructive and pleasing: in some respects one are more valuable. Yet his mind was not of the highest order. He kept the historical and prophetic interpretations too widely apart, instead of making the one lean upon the other. Where historical illustration was abundant, he was content to rest in that, instead of finding in it larger help for pressing onward to the development of the

spiritua. sei.se. So again wherever prophecy was literally fulfilled, he generally rested too much in the mere outward verification, not caring to inquire whether the literal fulfillment was not itself necessarily a type of something beyond. In the Canticles, however, where the language of Scripture is directly allegorical, he severely reprehends Theodore of Mopsuestia for imposing a historical interpretation upon it: even Diodore the literal interpreter, Theodore's master, had judged, as we learn from Theodore, that that book was to be spiritually understood.

In the Western Church the influence of Origen, if not so unqualified at the first, was yet permanently greater than in the Eastern. Hilary of Poitiers is said by Jerome to have drawn largely from Origen in his Commentary on the Psalms. But in truth, as a practical interpreter, he greatly excelled Origen; carefully seeking out not what meaning the Scripture might bear, but what it really intended, and drawing forth the evangelical sense from the literal with cogency, terseness, and elegance. Here, too, Augustine stood somewhat in advance of Origen; carefully preserving in its integrity the literal sense of the historical narrative of Scripture as the substructure of the mystical, lest otherwise the latter should prove to be but a building in the air (*Serm.* 2, c. 6). It seems, therefore, to have been rather as a traditional maxim than as the expression of his own conviction, that he allowed that whatever in Scripture had no proper or literal reference to honesty of manners, or to the truth of the faith, might by that be recognized as figurative (*De Doctr. Chr.* iii. 10). He fully acknowledges, however, that all, or nearly all, in the O. T. is to be taken not only literally but also figuratively (*Ibid.* 22); and bids us earnestly beware of taking literally that which is figuratively spoken (*Ibid.* 5). The fourfold classification of the interpretation of the O. T. which had been handed down to him, literal, etiological, logical, allegorical, is neither so definite nor so logical as Origen's (*De Util. Cred.* 2, 3; *De Gen. ad Lit.* lib. imp. 2); on the other hand neither are the rules of Tichonius, which he rejects, of much value. Still it is not so much by the accuracy of his principles of exposition as by what his expositions contain that he is had in honor. No more spiritually-minded interpreter ever lived. The main source of the blemishes by which his interpretations are disfigured, is his lack of acquaintance with Hebrew; a lack indeed far more painfully evident in the writings of the Latin Fathers than in those of the Greek. It was partly, no doubt, from a consciousness of his own shortcomings in this respect that Augustine urged the importance of such an acquaintance (*De Doctr. Chr.* ii. 11 ff.); rightly judging also that all the external scientific equipments of the interpreter of Scripture were not more important for the discovery of the literal than for that of the mystical meaning.

But whatever advances had been made in the treatment of O. T. Scripture by the Latins since the days of Origen were unhappily not perpetuated. We may see this in the *Morals* of Gregory on the Book of Job; the last great independent work of a Latin Father. Three senses of the sacred text are here recognized and pursued in separate threads;

<sup>a</sup> That is, morally. The term *τροπολογία*, which is used in Justin and Origen denoted the doctrine of *κρως*, was perhaps first applied by Jerome to the

doctrine of manners; in which sense it is also used by later Greek writers, as Andreas.

the historical and literal, the allegorical, and the moral. But the three have hardly any mutual connection: the very idea of such a connection is ignored. The allegorical interpretation is consequently entirely arbitrary; and the moral interpretation is, in conformity with the practice, not with the principles, of Origen, placed after the allegorical, so called, and is itself every whit as allegorical as the former. They differ only in their aims: that of the one is to set forth the history of Christ; that of the other to promote the edification of the Church by a reference of the language to the inward workings of the soul. No effort is made to apprehend the mutual relation of the different parts of the book, or the moral lessons which the course of the argument in that preëminently moral book was intended to bring out. Such was the general character of the interpretation which prevailed through the Middle Ages, during which Gregory's work stood in high repute. The mystical sense of Scripture was entirely divorced from the literal. Some guidance, however, in the paths of even the most arbitrary allegorism was found practically necessary; and this was obtained in the uniformity of the mystical sense attached to the several Scriptural terms. Hence the dictionary of the allegorical meanings — partly genuine, partly conventional — of Scriptural terms compiled in the 9th century by Rabanus Maurus. An exceptional value may attach to some of the mediæval comments on the O. T., as those of Rupert of Deutz († 1135); but in general even those which, like Gregory's *Morals*, are prized for their treasures of religious thought, have little worth as interpretations.

The first impulse to the new investigation of the literal meaning of the text of the O. T. came from the great Jewish commentators, mostly of Spanish origin, of the 11th and following centuries; Jarchi († 1105), Aben Ezra († 1167), Kimchi († 1240), and others. Following in the wake of these, the converted Jew Nicolaus of Lyre, near Evreux, in Normandy († 1341), produced his *Postillæ Perpetuæ* on the Bible, in which, without denying the deeper meanings of Scripture, he justly contended for the literal as that on which they all must rest. Exception was taken to these a century later by Paul of Burgos, also a converted Jew († 1435), who upheld, by the side of the literal, the traditional interpretations, to which he was probably at heart exclusively attached. But the very arguments by which he sought to vindicate them showed that the recognition of the value of the literal interpretation had taken firm root. The Restoration of Letters helped it forward. The Reformation contributed in many ways to unfold its importance; and the position of Luther with regard to it is embodied in his saying "Optimum grammaticum, eum etiam optimum theologum esse." That grammatical scholarship is not indeed the only qualification of a sound theologian, the German commentaries of the last hundred years have abundantly shown: yet where others have sown, the Church eventually reaps; and it would be ungrateful to close any historical sketch of the interpretation of the O. T. without acknowledging the immense service rendered to it by modern Germany, through the labors and learning alike of the disciples of the theologian school, and of those who have again reared aloft the banner of the faith.

In respect of the O. T. types, an important difference has prevailed among Protestant interpreters

between the adherents and opponents of that *sensus* which is usually, from one of the most eminent of its representatives, denominated the *Coceian*, and which practically, though perhaps unconsciously, trod much in the steps of the earlier Fathers, Justin, Irenæus, and Tertullian. Cocecius, professor at Leyden († 1669), justly maintained that a typical meaning ran throughout the whole of the Jewish Scriptures; but his principle that Scripture signifies whatever it can signify (*quicquid potest significare*), as applied by him, opened the door for an almost boundless license of the interpreter's fancy. The arbitrariness of the Coceian interpretations provoked eventually a no less arbitrary reply; and, while the authority of the N. T. as to the existence of Scriptural types could not well be set aside, it became a common principle with the English theologians of the early part of the present century, that only those persons or things were to be admitted as typical which were so expressly interpreted in Scripture — or in the N. T. — itself. With sounder judgment, and not without considerable success, Fairbairn has of late years, in his *Typology of Scripture*, set the example of an investigation of the fundamental principles which govern the typical connection of the Old Testament with the New. See, for further information, J. G. Rosenmüller's contemptuous *Historia Interpretationis ab Apostolorum Ætate ad Literarum Institutionem*, 5 vols. 1795–1814; Meyer's *Gesch. der Schriftklärung seit der Wiederherstellung der Wissenschaften*, 5 vols. 1802–1809; Conybeare's *Bampton Lectures*, 1824; Olshausen's little tract, *Ein Wort über tiefere Schriftsinn*, 1824; Davidson's *Sacred Hermeneutics*, 1843, [and Diestel's *Gesch. d. A. T. in d. christl. Kirche*, 1869.]

2. *Principles of Interpretation.* — From the foregoing sketch it will have appeared that it has been very generally recognized that the interpretation of the O. T. embraces the discovery of its literal, moral, and spiritual meaning. It has given occasion to misrepresentation to speak of the existence in Scripture of more than a single sense: rather, then, let it be said that there are in it three elements, coexisting and coalescing with each other, and generally requiring each other's presence in order that they may be severally manifested. Correspondingly, too, there are three portions of the O. T. in which the respective elements, each in its turn, shine out with peculiar lustre. The literal (and historical) element is most obviously displayed in the historical narrative; the moral is specially honored in the Law, and in the hortatory addresses of the Prophets: the predictions of the Prophets bear emphatic witness to the prophetic or spiritual. Still, generally, in every portion of the O. T. the presence of all three elements may by the student of Scripture be traced. In perusing the story of the journey of the Israelites through the wilderness, he has the historical element in the actual occurrence of the facts narrated; the moral, in the warnings which God's dealings with the people and their own several disobediences convey; and the spiritual in the prefiguration by that journey, in its several features, of the Christian pilgrimage through the wilderness of life. In investigating the several ordinances of the Law relating to sacrifice, he has the historical element in the observances actually enjoined upon the Israelites; the moral in the personal unworthiness and self-surrender to God which those observances were designed to express, and which are themselves of universal interest; and the

spiritual in the prefiguration by those sacrifices of the one true sacrifice of Christ. In bending his eyes on the prophetic picture of the conqueror coming from Edom, with dyed garments from Bozrah, he has the historical element in the relations subsisting between the historical Edom and Israel, supplying the language through which the anticipations of triumph are expressed; the moral element in the assurance to all the persecuted of the condemnation of the unnatural malignity where-with those nearest of kin to themselves may have exulted in their calamities; and the spiritual, in the prophecy of the loneliness of Christ's passion and of the gloriousness of his resurrection, in the strength of which, and with the signal of victory before her, the Church should trample down all spiritual foes beneath her feet. Yet again, in the greater number of the Psalms of David he has the historical element in those events of David's life which the language of the psalm reflects; the moral, in the moral connection between righteous faith and eventual deliverance by which it is pervaded; and the spiritual, in its fore-embodiment of the struggles of Christ, in whom it finds its essential and perfect fulfillment, and by her union with whom the Christian Church still claims and appropriates the psalm as her own. In all these cases it is requisite to the full interpretation of the O. T. that the so-called grammatico-historical, the moral, and the spiritual interpretation should advance hand in hand: the moral interpretation presupposes the grammatico-historical, the spiritual rests on the two preceding. If the question be asked, Are the three several elements in the O. T. mutually coextensive? we reply, They are certainly coextensive in the O. T., taken as a whole, and in the several portions of it, largely viewed; yet not so as that they are all to be traced in each several section. The historical element may occasionally exist alone; for, however full a history may be of deeper meanings, there must also needs be found in it connecting links to hold the significant parts of it together: otherwise it sinks from a history into a mere succession of pictures. Not to cite doubtful instances, the genealogies, the details of the route through the wilderness and of the subsequent partition of the land of Canaan, the account of the war which was to furnish the occasion for God's providential dealings with Abraham and Lot (Gen. xiv. 1-12), are obvious and simple instances of such links. On the other hand there are passages of direct and simple moral exhortation, e. g. a considerable part of the book of Proverbs, into which the historical element hardly enters: the same is the case with Psalm i., which is, as it were, the moral preface to the psalms which follow, designed to call attention to the moral element which pervades them generally. Occasionally also, as in Psalm ii., which is designed to bear witness of the prophetic import running through the Psalms, the prophetic element, though not altogether divorced from the historical and moral, yet completely overshadows them. It is moreover a maxim which cannot be too strongly enforced, that the historical, moral, or prophetic interest of a section of Scripture, or even of an entire book, may lie rather in the general tenor and result of the whole than in any number of separate passages: e. g. the

moral teaching of the book of Job lies preëminently not in the truths which the several speeches may contain, but in the great moral lesson to the unfolding of which they are all gradually working.

That we should use the New Testament as the key to the true meaning of the Old, and should seek to interpret the latter as it was interpreted by our Lord and his Apostles, is in accordance both with the spirit of what the earlier Fathers asserted respecting the value of the tradition received from them, and with the appeals to the N. T. by which Origen defended and fortified the threefold method of interpretation. But here it is the analogy of the N. T. interpretations that we must follow; for it were unreasonable to suppose that the whole of the Old Testament would be found completely interpreted in the New. Nor, provided only a spiritual meaning of the Old Testament be in the New sufficiently recognized, does it seem much more reasonable to expect every separate type to be there indicated or explained, or the fulfillment of every prophecy noted, than it would be to expect that the N. T. should unfold the historical importance or the moral lesson of every separate portion of the O. T. history. Why, indeed, should we assume that a full interpretation in any single respect of the older volume would be given in another of less than a quarter of its bulk, the primary design of which is not expository at all, and that when the use actually made of the former in the latter is in kind so manifold? The Apostles nowhere profess to give a systematic interpretation of the O. T. The nearest approach to any such is to be found in the explanation of the spiritual meaning of the Mosaic ritual in the Epistle to the Hebrews; and even here it is expressly declared that there are many things "of which we cannot now speak particularly" (ix. 5). We may well allow that the substance of all the O. T. shadows is in the N. T. contained, without holding that the several relations between the substance and the shadows are there in each case authoritatively traced.

With these preliminary observations we may glance at the several branches of the interpreter's task.

First, then, Scripture has its outward form or body, all the several details of which he will have to explore and to analyze. He must ascertain the thing outwardly asserted, commanded, foretold, prayed for, or the like; and this with reference, so far as is possible, to the historical occasion and circumstances, the time, the place, the political and social position, the manner of life, the surrounding influences, the distinctive character, and the object in view, alike of the writers, the persons addressed, and the persons who appear upon the scene. Taken in its wide sense, the outward form of Scripture will itself, no doubt, include much that is figurative. How should it indeed be otherwise, when all language is in its structure essentially figurative? Even, however, though we should define the literal sense of words to be that which they signify in their usual acceptation, and the figurative that which they intend in another than their usual acceptation, under some form or figure of speech, still when the terms literal and figurative simply belong (to use the words of Van Mildert) "to the verbal signification, which with respect to the sense may

<sup>a</sup> Convenience has introduced, and still sanctions the use of this somewhat barbarous word. The reader will pardon being reminded that the term *grammatical*

is the equivalent of *literal*; being derived from *γράμμα*, "letter," not from *γραμματική*, "grammar." \* \* \*

be virtually the same, whether or not expressed by trope and figure," and when therefore it is impossible to conceive that by persons of moderate understanding any other than the figurative sense could ever have been deduced from the words employed, we rightfully account the investigation of such sense a necessary part of the most elementary interpretation. To the outward form of Scripture thus belong all metonymies, in which one name is substituted for another, *e. g.* the cause for the effect, the mouth for the word; and metaphors, in which a word is transformed from its proper to a cognate signification, *e. g.* when hardness is predicated of the heart, clothing of the soul; so also all prosopopeias, or personifications; and even all anthropomorphic and anthropopathic descriptions of God, which could never have been understood in a purely literal sense, at least by any of the right-minded among God's people. Nor would even the exclusively grammatico-historical interpreter deem it no part of his task to explain such a continued metaphor as that in Ps. lxxx. 8 ff. or such a parable as that in Is. v. 1-7, or such a fable as that in Judg. ix. 8-15. The historical element in such passages only comes out when their allegorical character is perceived; nor can it be supposed that it was ever unperceived. Still the primary allegorical meaning in such passages may itself be an allegory of something beyond, with which latter the more rudimentary interpretation is not strictly concerned. An unexpectant Jewish reader of Is. v. 1-7 might have traced in the vineyard an image of the land of his inheritance, fenced off by its boundary heights, deserts, and sea from the surrounding territories; might have discerned in the stones the old heathen tribes that had been plucked up from off it, and in the choice vine the Israel that had been planted in their place; might have identified the tower with the city of David, as the symbol of the protecting Davidic sovereignty, and the wine-press with the Temple, where the blood of the sacrifices was poured forth, as the symbol of Israel's worship; and this without inquiring into or recking of the higher blessings of which all these things were but the shadows. Yet it is not to be denied that it is difficult, perhaps impossible, to draw the exact line where the province of spiritual interpretation begins and that of historical ends. On the one hand the spiritual significance of a passage may occasionally, perhaps often, throw light on the historical element involved in it: on the other hand the very large use of figurative language in the O. T., and more especially in the prophecies, prepares us for the recognition of the yet more deeply figurative and essentially allegorical import which runs, as a *ὀμνῶν*, through the whole.

Yet no unhallowed or unworthy task can it ever be to study, even for its own sake, the historical form in which the O. T. comes to us clothed. It was probably to most of us one of the earliest charms of our childhood, developing in us our sense of brotherhood with all that had gone before us, leading us to feel that we were not singular in that which befell us, and therefore, correspondingly, that we could not live for ourselves alone. Even by itself it proclaims to us the historical workings of God, and reveals the care wherewith He has ever watched over the interests of his Church. Above all the history of the O. T. is the indispensable vantage-point to the historical advent of the Son of God in the flesh. We need hardly labor to prove that

the N. T. recognizes the general historical character of what the O. T. records. It is everywhere assumed. The gospel genealogies testify to it: so too our Lord when he spoke of the desires of the prophets and righteous men of old, or of all the righteous blood shed upon the earth which should be visited upon his own generation: so too Stephen and Paul in their speeches in the council-chamber and at Antioch; so, too, again, the latter, when he spoke of the things which "happened" unto the Israelites for ensamples. The testimonies borne by our Lord and his Apostles to the outward reality of particular circumstances could be easily drawn out in array, were it needful. Of course in reference to that which is not related as plain matter of history, there will always remain the question how far the descriptions are to be viewed as definitely historical, how far as drawn, for a specific purpose, from the imagination. Such a question presents itself, for example, in the book of Job. It is one which must plainly be in each case decided according to the particular circumstances. Scenes which could never have any outward reality may, as in the Canticles, be made the vehicle of spiritual allegory; and yet even here the historical element meets us in the historical person of the typical bridegroom, in the various local allusions which the allegorist has introduced into his description, and in the references to the manners and customs of the age. In examining the extent of the historical element in the prophecies, both of the prophets and the psalmists, we must distinguish between those which we either definitely know or may reasonably assume to have been fulfilled at a period not entirely distant from that at which they were uttered, and those which reached far beyond in their prospective reference. The former, once fulfilled, were thenceforth annexed to the domain of history (Is. xvii.; Ps. cvii. 33). It must be observed, however, that the prophet often beheld in a single vision, and therefore delineated as accomplished all at once, what was really, as in the case of the desolation of Babylon, the gradual work of a long period (Is. xiii.); or, as in Ezekiel's prophecy respecting the humiliation of Egypt, uttered his predictions in such ideal language as scarcely admitted of a literal fulfillment (Ez. xxix. 8-12; see Fairbairn *in loco*). With the prophecies of more distant scope the case stood thus. A picture was presented to the prophet's gaze, embodying an outward representation of certain future spiritual struggles, judgments, triumphs, or blessings; a picture suggested in general by the historical circumstances of the present (Zech. vi. 9-15; Ps. v., lxxii.), or of the past (Ez. xx. 35, 36; Is. xi. 15, xlviii. 21; Ps. xcix. 6 ff.), or of the near future, already anticipated and viewed as present (Is. xlix. 7-26; Ps. lvii. 6-11), or of all these, variously combined, altered, and heightened by the imagination. But it does not follow that that picture was ever outwardly brought to pass: the local had been exchanged for the spiritual, the outward type had merged in the inward reality before the fulfillment of the prophecy took effect. In some cases, more especially those in which the prophet had taken his stand upon the nearer future, there was a preliminary and typical fulfillment, or, rather, approach to it; for it seldom, if ever, corresponded to the full extent of the prophecy: the far-reaching import of the prophecy would have been obscured if it had. The measuring-line never outwardly went forth upon Gareb and compassed about to Goath (Jer. xxxi. 39) till the days

of Herod Agrippa, after our Saviour's final doom upon the literal Jerusalem had been actually pronounced; and neither the temple of Zerubbabel nor that of Herod corresponded to that which had been beheld in vision by Ezekiel (xl. ff.). There are, moreover, as it would seem, exceptional cases in which even the outward form of the prophet's predictions was divinely drawn from the unknown future as much as from the historical circumstances with which he was familiar, and in which, consequently, the details of the imagery by means of which he concentrated all his conscious conceptions of the future were literally, or almost literally, verified in the events by which his prediction was fulfilled. Such is the case in Is. liii. The Holy Spirit presented to the prophet the actual death-scene of our Saviour as the form in which his prophecy of that event was to be embodied; and thus we trace in it an approach to a literal history of our Saviour's endurances before they came to pass.

(Respecting the rudiments of interpretation, let the following here suffice: The knowledge of the meanings of Hebrew words is gathered (a) from the context, (b) from parallel passages, (c) from the traditional interpretations preserved in Jewish commentaries and dictionaries, (d) from the ancient versions, (e) from the cognate languages, Chaldee, Syriac, and Arabic. The syntax must be almost wholly gathered from the O. T. itself; and for the special syntax of the poetical books, while the importance of a study of the Hebrew parallelism is now generally recognized, more attention needs to be bestowed than has been bestowed hitherto on the centralism and inversion by which the poetical structure and language is often marked. It may here too be in place to mention, that of the various systematic treatises which have by different generations been put forth on the interpretation of Scripture, the most standard work is the *Philologia Sacra* of Sol. Glassius (Prof. at Jena, † 1656), originally published in 1623, and often reprinted. A new edition of it, "accommodated to their times," and bearing the impress of the theological views of the new editors, was brought out by Dathe and Bauer, 1776-97. It is a vast store-house of materials; but the need of such treatises has been now much superseded by the special labors of more recent scholars in particular departments.)

From the outward form of the O. T. we proceed to its moral element or soul. It was with reference to this that St. Paul declared that all Scripture was given by inspiration of God, and was profitable for doctrine, for reproof, for correction, for instruction in righteousness (2 Tim. iii. 16); and it is in the implicit recognition of the essentially moral character of the whole, that our Lord and his Apostles not only appeal to its direct precepts (e. g. Matt. xv. 4, xix. 17-19), and set forth the fullness of their bearing (e. g. Matt. ix. 13), but also lay bare moral lessons in O. T. passages which lie rather beneath the surface than upon it (Matt. xix. 5, 6, xxii. 32; John x. 34, 35; Acts vii. 48, 49; 1 Cor. ix. 9, 10; 2 Cor. viii. 13-15). With regard more particularly to the Law, our Lord shows in his Sermon on the Mount how deep is the moral teaching implied in its letter; and in his denunciation of the Pharisees upbraids them for their omission of its weightier matters — judgment, mercy, and faith. The history, too, of the O. T. finds frequent reference made in the N. T. to its moral teaching (Luke vi. 3; Rom. iv. ix. 17; 1 Cor. x. 6-11; Heb. iii. 7-11, xi.; 2 Pet. ii. 15-

16; 1 John iii. 12). No doubt it was with reference to the moral instruction to be drawn from them that that history had been made to dwell at greatest length on the events of greatest moral importance. The same reason explains also why it should be to so large an extent biographical. The interpreter of the O. T. will have, among his other tasks, to analyze in the lives set before him the various yet generally mingled workings of the spirit of holiness, and of the spirit of sin. He must not fall into the error of supposing that any of the lives are those of perfect men; Scripture nowhere asserts or implies it, and the sins of even the best testify against it. Nor must he expect to be expressly informed of each recorded action, any more than of each sentiment delivered by the several speakers in the book of Job, whether it were commendable or the contrary; nor must we assume, as some have done, that Scripture identifies itself with every action of a saintly man which, without openly condemning it, records. The moral errors by which the lives of even the greatest O. T. saints were disfigured are related, and that for our instruction, but not generally criticised; e. g. that of Abraham when, already once warned in Egypt, he suffered the king of Gerar to suppose that Sarah was merely his sister; or that of David, when, by feigning himself mad, he practiced deceit upon Achish. The interpreter of Scripture has no warrant for shutting his eyes to such errors; certainly not the warrant of David, who himself virtually confessed them in Ps. xxxiv. (see especially ver. 13). He must acknowledge and commend the holy faith which lay at the root of the earliest recorded deeds of Jacob, a faith rewarded by his becoming the heir of God's promises; but he must no less acknowledge and condemn Jacob's unbrotherly deceit and filial disobedience, offenses punished by the sorrows that attended him from his flight into Mesopotamia to the day of his death. And should he be tempted to desire that in such cases the O. T. had distinguished more directly and authoritatively the good from the evil, he will ask, Would it in that case have spoken as effectually? Are not our thoughts more drawn out, and our affections more engaged, by studying a man's character in the records of his life than in a summary of it ready prepared for us? Is it in a dried and labeled collection of specimens, or in a living garden where the flowers have all their several imperfections, that we best learn to appreciate the true beauties of floral nature? The true glory of the O. T. is here the choice richness of the garden into which it conducts us. It sets before us just those lives — the lives generally of religious men — which will best repay our study, and will most strongly suggest the moral lessons that God would have us learn; and herein it is that, in regard of the moral aspects of the O. T. history, we may most surely trace the overruling influence of the Holy Spirit by which the sacred historians wrote.

But the O. T. has further its spiritual and therefore prophetic element, the result of that organic unity of sacred history by means of which the same God who in his wisdom delayed, till the fullness of time should be come, the advent of his Son into the world, ordained that all the career and worship of his earlier people should outwardly anticipate the glories of the Redeemer and of his spiritually ransomed Church. Our attention is here first attracted to the avowedly predictive parts of the O. T., of the prospective reference of which, at the

time that they were uttered, no question can exist, and the majority of which still awaited their fulfillment when the Redeemer of the world was born. No new covenant had up to that time been inaugurated (Jer. xxxi. 31-40); no temple built corresponding to that which Ezekiel had described (xl. ff.); nor had the new David ere that arisen to be a prince in Israel (*ibid.* xxxiv.). With Christ, then, the new era of the fulfillment of prophecy commenced. In Him were to be fulfilled all things that were written in the Law of Moses, and in the Prophets, and in the Psalms, concerning Him (Lanke xxiv. 44; cf. Matt. xxvi. 54, &c.). A marvellous amount there was in his person of the verification of the very letter of prophecy—partly that it might be seen how definitely all had pointed to Him; partly because his outward mission, up to the time of his death, was but to the lost sheep of the house of Israel, and the letter had not yet been finally superseded by the spirit. Yet it would plainly be impossible to suppose that the significance of such prophecies as Zech. ix. 9 was exhausted by the mere outward verification; and with the delivery of Christ by his own people to the Gentiles, and the doom on the city of Jerusalem for rejecting Him, and the ratification of the new covenant by his death, and the subsequent mission of the Apostles to all nations, all consummated by the final blow which fell within forty years on the once chosen people of God, the outward blessings had merged forever in the spiritual, and the typical Israelitish nation in the Church Universal.

Hence the entire absence from the N. T. of any recognition, by either Christ or his Apostles, of such prospective outward glories as the prophecies, literally interpreted, would still have implied. No hope of outward restoration mingled with the sentence of outward doom which Christ uttered forth on the nation from which He himself had sprung (Matt. xxi. 43, xxiii. 38, xxiv. 2); no old outward deliverances with the spiritual salvation which He and his Apostles declared to be still in store for those of the race of Israel who should believe on Him (Matt. xxiii. 39; Acts iii. 19-21; Rom. xi. 2; 2 Cor. iii. 16). The language of the ancient prophecies is everywhere applied to the gathering together, the privileges, and the triumphs of the universal body of Christ (John x. 16, xi. 52; Acts ii. 39, xv. 15-17; Rom. ix. 25, 26, 32, 33, x. 11, 13, xi. 25, 26, 27; 2 Cor. vi. 16-18; Gal. iv. 27; 1 Pet. ii. 4-6, 10; Rev. iii. 7, 8, xx. 8, 9, xxi., xxii.); above all, in the crowning passage of the apostolic interpretation of O. T. prophecy (Heb. xii. 22), in which the Christian Church is distinctly marked out as the Zion of whose glory all the prophets had spoken. Even apart, however, from the authoritative interpretation thus placed upon them, the prophecies contain within themselves, in sufficient measure, the evidence of their spiritual import. It could not be that the literal Zion should be greatly raised in physical height (Is. ii. 2), or all the Holy Land leveled to a plain (Zech. xiv. 10), or portioned out by straight lines and in rectangles, without regard to its physical conformation (Ez. xlv.); or that the city of Jerusalem should lie to the south of the Temple (*ibid.* xl. 2), and at a distance of five miles from it (*ibid.* xlv. 6), and yet that it should occupy its old place (Jer. lxxi. 38, 39; Zech. xiv. 10), or that holy waters should issue from Jerusalem, increasing in depth as they roll on, not through the accession of any tributary streams, but simply because their source

is beneath the sanctuary (Ez. xlvi.). Nor could it well be that, after a long loss of genealogies and title-deeds, the Jews should be reorganized in their tribes and families (Zech. xii. 12-14; Mal. iii. 3; Ez. xliv. 15, xlviii.), and settled after their old estates (Ez. xxxvi. 11). Nor again, that all the inhabitants of the world should go up to Jerusalem to worship, not only to the festivals (Zech. xiv. 16), but even monthly and weekly (Is. lvi. 23), and yet that while Jerusalem were thus the seat of worship for the whole world, there should also be altars everywhere (Is. xix. 19; Zeph. ii. 11; Mal. i. 11), both being really but different expressions of the same spiritual truth—the extension of God's pure worship to all nations. Nor can we suppose that Jews will ever again outwardly triumph over heathen nations that have long disappeared from the stage of history (Am. ix. 11, 12; Is. xi. 14; Mic. v. 5; Ob. 17-21). Nor will sacrifices be renewed (Ez. xlvi. &c.) when Christ has by one offering perfected for ever them that are sanctified; nor will a special sanctity yet attach to Jerusalem, when the hour is come that "neither in this mountain nor yet at Jerusalem" shall men worship the Father; nor yet to the natural Israel (cf. Joel iii. 4), when in Christ there is neither Jew nor Greek, all believers being now alike the circumcision (Phil. iii. 3) and Abraham's seed (Gal. iii. 29), and the name Israel being frequently used in the N. T. of the whole Christian Church (Matt. xix. 28; Luke xxii. 30; Rom. xi. 26; Gal. vi. 16; cf. Rev. vii. 4, xxi. 12).

The substance, therefore, of these prophecies is the glory of the Redeemer's spiritual kingdom; it is but the form that is derived from the outward circumstances of the career of God's ancient people, which had passed, or all but passed away before the fulfillment of the promised blessings commenced. The one kingdom was indeed to merge into, rather than to be violently replaced by the other; the holy seed of old was to be the stock of the new generation; men of all nations were to take hold of the skirt of the Jew, and Israelitish Apostles were to become the patriarchs of the new Christian community. Nor was even the form in which the announcement of the new blessings had been clothed to be rudely cast aside; the imagery of the prophets is on every account justly dear to us, and from love, no less than from habit, we still speak the language of Canaan. But then arises the question, Must not this language have been divinely designed from the first as the language of God's Church? Is it easily to be supposed that the prophets, whose writings form so large a portion of the Bible, should have so extensively used the history of the old Israel as the garment wherein to enwrap their deliveries of the blessings of the new, and yet that that history should not be in itself essentially an anticipation of what the promised Redeemer was to bring with him? Besides, the typical import of the Israelitish tabernacle and ritual worship is implied in Heb. ix. ("The Holy Ghost thus signifying"), and is almost universally allowed; and it is not easy to tear asunder the events of Israel's history from the ceremonies of Israel's worship; nor yet, again, the events of the preceding history of the patriarchs from those of the history of Israel. The N. T. itself implies the typical import of a large part of the O. T. narrative. The original dominion conferred upon *max* (1 Cor. xv. 27; Heb. ii. 8), the rest of God on the seventh day (Heb. iv. 4), the institution of mar-

age (Eph. v. 31), are in it all invested with a deeper and prospective meaning. So also the offering and martyrdom of Abel (Heb. xi. 4, xii. 24); the preservation of Noah and his family in the ark (1 Pet. iii. 21); the priesthood of Melchizedek (Heb. vii., following Ps. cx. 4); the mutual relation of Sarah and Hagar, and of their children (Gal. iv. 22 ff.); the offering and rescue of Isaac (Rom. viii. 32; Heb. xi. 19); the favor of God to Jacob rather than Esau (Rom. ix. 10-13, following Mal. i. 2, 3); the sojourn of Israel in Egypt (Matt. ii. 15); the passover feast (1 Cor. v. 7, 8); the shepherdship of Moses (Heb. xiii. 20, cf. Is. lxiii. 11, Sept.); his veiling of his face at Sinai (2 Cor. iii. 13); the ratification of the covenant by blood (Heb. ix. 13 ff.); the priestly character of the chosen people (1 Pet. ii. 9); God's outward presence with them (2 Cor. vi. 16); the various events in their pilgrimage through the desert (1 Cor. x.), and specially the eating of manna from heaven (Matt. iv. 4; John vi. 48-51); the lifting up of the brazen serpent (John iii. 14); the promise of the divine presence with Israel after the removal of Moses, their shepherd, from them (Heb. xiii. 5, cf. Deut. xxxi. 6); the kingdom of David (Luke i. 32, 33); and the devouring of Jonah (Matt. xii. 40). If some of these instances be deemed doubtful, let at least the rest be duly weighed, and this not without regard to the cumulative force of the whole. In the O. T. itself we have, and this even in the latest times, events and persons expressly treated as typical: *e. g.* the making the once-rejected stone the headstone of the corner (probably an historical incident in the laying of the foundation of the second Temple (Ps. cxviii. 22)); the arraying of Joshua the high-priest with fair garments (Zech. iii.), and the placing of crowns on his head to symbolize the union of royalty and priesthood (Zech. vi. 9 ff.). A further testimony to the typical character of the history of the Old Testament is furnished by the typical character of the events related even in the New. All our Lord's miracles were essentially typical, and are almost universally so acknowledged: the works of mercy which He wrought outwardly on the body betokening his corresponding operations within man's soul. So, too, the outward fulfilments of prophecy in the Redeemer's life were types of the deeper though less immediately striking fulfilment which it was to continue to receive ideally; and if this deeper and more spiritual significance underlie the literal narrative of the New Testament, how much more that of the Old, which was so essentially designed as a preparation for the good things to come! A remarkable and honorable testimony on this subject was borne in his later years by De Wette. "Long before Christ appeared," he says, "the world was prepared for his appearance; the entire O. T. is a great prophecy, a great type of Him who was to come, and did come. Who can deny that the holy seers of the O. T. saw, in spirit, the advent of Christ long beforehand, and in prophetic anticipations of greater or less clearness had presages of the new doctrine? The typological comparison, too, of the Old Testament with the New was no mere play of fancy; and it is scarcely altogether accidental that the evangelic history, in the most important particulars, runs parallel with the Mosaic" (cited by Tholuck, *The Old Testament in the New*).

It is not unlikely that there is in many quarters an unwillingness to recognize the spiritual element

in the historical parts of the O. T., arising from the fear that the recognition of it may endanger that of the historical truth of the events recorded. Nor is such danger altogether visionary; for one-sided and prejudiced contemplation will be ever so abusing one element of Scripture as thereby to cast a slight upon the rest. But this does not affect its existence; and on the other hand there are certainly cases in which the spiritual element confirms the outward reality of the historical fact. So is it with the devouring of Jonah; which many would consign to the region of parable or myth, not apparently from any result of criticism, which is indeed at a loss to find an origin for the story save in fact, but simply from the unwillingness to give credit to an event the extraordinary character of which must have been patent from the first. But if the divine purpose were to prefigure in a striking and effective manner the passage of our Saviour through the darkness of the tomb, how could any ordinary event, akin to ordinary human experience, adequately represent that of which we have no experience? The utmost perils of the royal psalmist required, in Ps. xviii., to be heightened and compacted together by the aid of extraneous imagery in order that they might typify the horrors of death. Those same horrors were more definitely prefigured by the incarceration of Jonah: it was a marvelous type, but not more marvelous than the antitype which it foreshadowed; it testified by its very wondrousness that there are gloomy terrors beyond any of which this world supplies the experience, but over which Christ should triumph, as Jonah was delivered from the belly of the fish.

Of another danger besetting the path of the spiritual interpreter of the O. T., we have a warning in the unedifying puerilities into which some have fallen. Against such he will guard by foregoing too curious a search for mere external resemblances between the Old Testament and the New, though withal thankfully recognizing them wherever they present themselves. His true task will be rather to investigate the inward ideas involved in the O. T. narratives, institutions, and prophecies themselves, by the aid of the more perfect manifestation of those ideas in the transactions and events of gospel-times. The spiritual interpretation must rest upon both the literal and the moral; and there can be no spiritual analogy between things which have nought morally in common. One consequence of this principle will of course be, that we must never be content to rest in any mere outward fulfillment of prophecy. It can never, for example, be admitted that the ordinance respecting the entireness of the passover-lamb had reference *merely* to the preservation of our Saviour's legs unbroken on the cross, or that the concluding words of Zech. ix. 9, pointed *merely* to the animal on which our Saviour should outwardly ride into Jerusalem, or that the sojourn of Israel in Egypt, in its evangelic reference, had respect *merely* to the temporary sojourn of our Saviour in the same country. However remarkable the outward fulfillment be, it must always guide us to some deeper analogy, in which a moral element is involved. Another consequence of the foregoing principle of interpretation will be that which was forbidden or sinful can, so far as it was sinful, not be regarded as typical of that which is free from sin. We may, for example, reject, as altogether groundless, the view, often propounded, but never proved, that Solomon's marriage with Pharaoh's daughter was a figure of the reception of the

Gentiles into the Church of the Gospel. On the other hand there is no more difficulty in supposing that that which was sinful may have originated the occasion for the exhibition of some striking type, than there is in believing that disobedience brought about the need of redemption. The Israelites sinned in demanding a king; yet the earthly kingdom of David was a type of the kingdom of Christ; and it was in consequence of Jonah's fleeing, like the first Adam, from the presence of the Lord, that he became so signal a type of the second Adam in his three days' removal from the light of heaven. So again that which was tolerated rather than approved may contain within itself the type of something imperfect, in contrast to that which is more perfect. Thus Hagar, as the concubine of Abraham, represented the covenant at Sinai; but it is only the bondage-aspect of that covenant which here comes directly under consideration, and the children of the covenant, symbolized by Ishmael, are those only who cleave to the element of bondage in it.

Yet withal, in laying down rules for the interpretation of the O. T., we must abstain from attempting to define the limits, or to measure the extent of its fullness. That fullness has certainly not yet been, nor will by us be exhausted. Search after truth, and reverence for the native worth of the written Word, authorize us indeed to reject past interpretations of it which cannot be shown to rest on any solid foundation. Still all interpretation is essentially progressive; and in no part of the O. T. can we tell the number of meanings and bearings, beyond those with which we are ourselves familiar, which may one day be brought out, and which then not only may approve themselves by their intrinsic reasonableness, but even may by their mutual harmony and practical interest furnish additional evidence of the divine source of that Scripture which cannot be broken.

#### C. — QUOTATIONS FROM THE OLD TESTAMENT IN THE NEW TESTAMENT.

The New Testament quotations from the Old form one of the outward bonds of connection between the two parts of the Bible. They are manifold in kind. Some of the passages quoted contain prophecies, or involve types of which the N. T. writers designed to indicate the fulfillment. Others are introduced as direct logical supports to the doctrines which they were enforcing. In all cases which can be clearly referred to either of these categories, we are fairly warranted in deeming the use which has been made of the older text authoritative; and from these, and especially from an analysis of the quotations which at first sight present difficulties, we may study the principles on which the sacred appreciation and exegesis of the older Scriptures has proceeded. Let it only be borne in mind that however just the interpretations virtually placed upon the passages quoted, they do not profess to be necessarily complete. The contrary is indeed manifest from the two opposite bearings of the same passage, Ps. xxiv. 1, brought out by St. Paul in the course of a few verses, 1 Cor. x. 26, 28. But in many instances, also, the N. T. writers have quoted the O. T. rather by way of illustration, than with the intention of leaning upon it; variously applying and adapting it, and making its language the vehicle of their own independent thoughts. It could hardly well be otherwise. The thoughts of all who have been deeply educated in the Scriptures

naturally move in Scriptural diction: it would have been strange had the writers of the N. T. formed exceptions to the general rule.

It may not be easy to distribute all the quotations into their distinctive classes. But among those in which a prophetic or typical force is ascribed in the N. T. to the passage quoted, may fairly be reckoned all that are introduced with an intimation that the Scripture was "fulfilled." And it may be observed that the word "fulfill," as applied to the accomplishment of what had been predicted or foreshadowed, is in the N. T. only used by our Lord himself and his companion-apostles: not by St. Mark nor St. Luke, except in their reports of our Lord's and Peter's sayings, nor yet by St. Paul (Mark xv. 28, is not genuine). It had grown familiar to the original Apostles from the continual verification of the O. T. which they had beheld in the events of their Master's career. These had testified to the deep connection between the utterances of the O. T. and the realities of the Gospel; and, through the general connection in turn casting down its radiance on the individual points of contact, the higher term was occasionally applied to express a relation for which, viewed merely in itself, weaker language might have sufficed: Three "fulfillments" of Scripture are traced by St. Matthew in the incidents of our Saviour's infancy (ii. 15, 18, 23). He beheld Him marked out as the true Israel, the beloved of God with high destiny before Him, by the outward correspondence between his and Israel's sojourn in Egypt. The sorrowing of the mothers of Bethlehem for their children was to him a renewal of the grief for the captives at Ramah, which grief Jeremiah had described in language suggested by the record of the patriarchal grief for the loss of Joseph: it was thus a present token (we need account it no more) of the spiritual captivity which all outward captivities recalled, and from which, since it had been declared that there was hope in the end, Christ was to prove the deliverer. And again, Christ's sojourn in despised Nazareth was an outward token of the lowliness of his condition; and if the prophets had rightly spoken, this lowliness was the necessary prelude, and therefore, in part, the pledge of his future glory. In the first and last of these cases the evangelist, in his wonted phrase, expressly declares that the events came to pass that that which was spoken "might be fulfilled:" language which must not be arbitrarily softened down. In the other case the phrase is less definitely strong: "Then was fulfilled," etc. The substitution of this phrase can, however, of itself decide nothing, for it is used of an acknowledged prophecy in xxvii. 9. And should any be disposed on other grounds to view the quotation from Jer. xxxi. 15 merely as an adornment of the narrative, let them first consider whether the evangelist, who was occupied with the history of Christ, would be likely formally to introduce a passage from the O. T. merely as an illustration of maternal grief.

In the quotations of all kinds from the Old Testament in the New, we find a continual variation from the *letter* of the older Scriptures. To this variation three causes may be specified as having contributed.

First, all the N. T. writers quoted from the Septuagint; correcting it indeed more or less by the Hebrew, especially when it was useful for their purpose; occasionally deserting it altogether still abiding by it to so large an extent as to show

that it was the primary source whence their quotations were drawn. Their use of it may be best illustrated by the corresponding use of our liturgical version of the Psalms; a use founded on love as well as on habit, but which nevertheless we forego when it becomes important that we should follow the more accurate rendering. Consequently, when the errors involved in the Septuagint version do not interfere with the purpose which the N. T. writer had in view, they are frequently allowed to remain in his quotation: see Matt. xv. 9 (a record of our Lord's words); Luke iv. 18; Acts xiii. 41, xv. 17; Rom. xv. 10; 2 Cor. iv. 13; Heb. viii. 9, x. 5, xi. 21. The current of apostolic thought, too, is frequently dictated by words of the Septuagint, which differ much from the Hebrew: see Rom. ii. 24; 1 Cor. xv. 55; 2 Cor. ix. 7; Heb. xiii. 15. Or even an absolute interpolation of the Septuagint is quoted, Heb. i. 6 (Deut. xxxii. 43). On the other hand, in Matt. xxi. 5; 1 Cor. iii. 19, the Septuagint is corrected by the Hebrew: so too in Matt. ix. 13; Luke xxii. 37, there is an effort to preserve an expressiveness of the Hebrew which the Septuagint had lost; and in Matt. iv. 15, 16; John xix. 37; 1 Cor. xv. 54, the Septuagint disappears altogether. In Rom. ix. 33, we have a quotation from the Septuagint combined with another from the Hebrew. In Mark xii. 30; Luke x. 27; Rom. xii. 19, the Septuagint and Hebrew are superadded the one upon the other. In the Epistle to the Hebrews, which in this respect stands alone, the Septuagint is uniformly followed; except in the one remarkable quotation, Heb. x. 30, which, according neither with the Hebrew nor the Septuagint, was probably derived from the last-named passage, Rom. xii. 19, wherewith it exactly coincides. The quotation in 1 Cor. ii. 9 seems to have been derived not directly from the O. T., but rather from a Christian liturgy or other document into which the language of Is. lxiv. 4 had been transferred.

Secondly, the N. T. writers must have frequently quoted from memory. The O. T. had been deeply instilled into their minds, ready for service, whenever needed; and the fulfillment of its predictions which they witnessed, made its utterances rise up in life before them: cf. John ii. 17, 22. It was of the very essence of such a living use of O. T. Scripture that their quotations of it should not of necessity be verbally exact.

Thirdly, combined with this there was an alteration of conscious or unconscious design. Sometimes the object of this was to obtain increased force: hence the variation from the original in the form of the divine oath, Rom. xiv. 11; or the result "I quake," substituted for the cause, Heb. xii. 21; or the insertion of rhetorical words to bring out the emphasis, Heb. xii. 26; or the change of person to show that what men perpetrated had its root in God's determinate counsel, Matt. xxvi. 31. Sometimes an O. T. passage is abridged, and in the abridgment so adjusted, by a little alteration, as to present an aspect of completeness, and yet omit what is foreign to the immediate purpose, Acts i. 20; 1 Cor. i. 31. At other times a passage is enlarged by the incorporation of a passage from another source: thus in Luke iv. 18, 19, although the contents are professedly those read by our Lord from Is. lxi., we have the words "to set at liberty them that are bruised," introduced from Is. lviii. 6 (Sept.): similarly in Rom. xi. 8, Deut. xxix. 4 is combined with Is. xxix. 10. In

some cases still greater liberty of alteration is assumed. In Rom. x. 11, the word *πᾶς* is introduced into Is. xxviii. 16, to show that that is uttered of Jew and Gentile alike. In Rom. xi. 26, 27, the "to Zion" of Is. lix. 20 (Sept. *ἐκκεν Σιών*) is replaced by "out of Sion" (suggested by Is. ii. 3): to Zion the Redeemer had already come; from Zion, the Christian Church, his law was to go forth; or even from the literal Jerusalem, cf. Luke xxiv. 47; Rom. xv. 19, for, till she was destroyed, the type was still in a measure kept up. In Matt. viii. 17, the words of Is. liii. 4 are adapted to the divine removal of disease, the outward token and witness of that sin which Christ was eventually to remove by his death, thereby fulfilling the prophecy more completely. For other, though less striking, instances of variation, see 1 Cor. xiv. 21; 1 Pet. iii. 15. In some places again, the actual words of the original are taken up, but employed with a new meaning: thus the *ἐρχόμενος*, which in Hab. ii. 3 merely qualified the verb, is in Heb. x. 37 made the subject of it.

Almost more remarkable than any alteration in the quotation itself, is the circumstance that in Matt. xxvii. 9, Jeremiah should be named as the author of a prophecy really delivered by Zechariah: the reason being, as has been well shown by Hengstenberg in his Christology, that the prophecy is based upon that in Jer. xviii., xix., and that without a reference to this original source the most essential features of the fulfillment of Zechariah's prophecy would be misunderstood.<sup>a</sup> The case is indeed not entirely unique; for in the Greek of Mark i. 2, 3, where Mal. iii. 1 is combined with Is. xl. 3, the name of Isaiah alone is mentioned: it was on his prophecy that that of Malachi partly depended. On the other hand in Matt. ii. 23; John vi. 45, the comprehensive mention of the prophets indicates a reference not only to the passages more particularly contemplated, Is. xi. 1, liv. 13, but also to the general tenor of what had been elsewhere prophetically uttered.

The above examples will sufficiently illustrate the freedom with which the Apostles and Evangelists interwove the older Scriptures into their writings. It could only result in failure were we to attempt any merely mechanical account of variations from the O. T. text which are essentially not mechanical. That which is still replete with life may not be dissected by the anatomist. There is a spiritual meaning in their employment of Scripture, even as there is a spiritual meaning in Scripture itself. And though it would be as idle to treat of their quotations without reference to the Septuagint, as it would be to treat of the inner meaning of the Bible without attending first to the literal interpretation, still it is only when we pay regard to the inner purpose for which each separate quotation was made, and the inner significance to the writer's mind of the passage quoted, that we can arrive at any true solution of the difficulties which the phenomena of these quotations frequently present. (Convenient tables of the quotations, ranged in the order of the N. T. passages, are given in the Introductions of Davidson and Horne. A much fuller table, embracing the informal verbal allusions, and ranged in the contrary order, but with a reverse index, has been compiled by Gough, and published separately, 1855.) J. F. T.

\* OLEANDER. [WILLOWS, Amer. ed.]

OLIVE (אֵילָא): *ἐλαία*. No tree is more closely associated with the history and civilization of man. Our concern with it here is in its sacred relations, and in its connection with Judæa and the Jewish people.

Many of the Scriptural associations of the olive-tree are singularly poetical. It has this remarkable interest, in the first place, that its foliage is the earliest that is mentioned by name, when the waters of the flood began to retire. "Lo! in the dove's mouth was an olive-leaf plucked off: so Noah knew that the waters were abated from off the

Olive (*Olea Europæa*).

earth" (Gen. viii. 11). How far this early incident may have suggested the later emblematic meanings of the leaf, it is impossible to say; but now it is as difficult for us to disconnect the thought of peace from this scene of primitive patriarchal history, as from a multitude of allusions in the Greek and Roman poets. Next, we find it the most prominent tree in the earliest allegory. When the trees invited it to reign over them, its uagacious answer sets it before us in its characteristic relations to Divine worship and domestic life. "Should I leave my fatness, wherewith by me they honor God and man, and go to be promoted over the trees?" (Judg. ix. 8, 9). With David it is the emblem of prosperity and the divine blessing.

He compares himself to "a green olive-tree in the house of God" (1's. lii. 8); and he compares the children of a righteous man to the "olive-branches round about his table" (1's. cxxviii. 3). So with the later prophets it is the symbol of beauty, luxuriance, and strength; and hence the symbol of religious privileges: "His branches shall spread, and his beauty shall be as the olive-tree," are the words in the concluding promise of Hosea (xiv. 6). "The Lord called thy name a green olive-tree, fair, and of goodly fruit," is the expostulation of Jeremiah when he foretells retribution for advantages abused (xi. 16). Here we may compare Eccclus. 1. 10. We must bear in mind, in reading this imagery, that the olive was among the most abundant and characteristic vegetation of Judæa. Thus after the Captivity, when the Israelites kept the Feast of Tabernacles, we find them, among other branches for the booths, bringing "olive-branches" from the "mount" (Neh. viii. 15). "The mount" is doubtless the famous Olivet, or Mount of Olives, the "Olivetum" of the Vulgate. [OLIVES, MOUNT OF.] Here we cannot forget that the trees of this sacred hill witnessed not only the humiliation and sorrow of David in Absalom's rebellion (2 Sam. xv. 30), but also some of the most solemn scenes in the life of David's Lord and Son; the prophecy over Jerusalem, the agony in the garden (GETHESEMANE itself means "a press for olive-oil"), and the ascension to heaven. Turning now to the mystic imagery of Zechariah (iv. 3, 11-14), and of St. John in the Apocalypse (Rev. xi. 3, 4), we find the olive-tree used, in both cases, in a very remarkable way. We cannot enter into any explanation of "the two olive-trees . . . the two olive-branches . . . the two anointed ones that stand by the Lord of the whole earth" (Zech.); or of "the two witnesses . . . the two olive-trees standing before the God of the earth" (Rev.); but we may remark that we have here a very expressive link between the prophecies of the O. T. and the N. T. Finally, in the argumentation of St. Paul concerning the relative positions of the Jews and Gentiles in the counsels of God, this tree supplies the basis of one of his most forcible allegories (Rom. xi. 16-25). The Gentiles are the "wild olive" (*ἀγριέλαιος*), grafted in upon the "good olive" (*καλλιέλαιος*), to which once the Jews belonged, and with which they may again be incorporated. It must occur to any one that the natural process of grafting is here inverted, the custom being to engraft a good branch upon a

bad stock. And it has been contended that in the case of the olive-tree the inverse process is sometimes practiced, a wild twig being engrafted to strengthen the cultivated olive. Thus Mr. Ewbank (*Comm. on Romans*, ii. 112) quotes from Palladius:—

"Fecundat sterilis pingues oleaster olivæ,  
Et quæ non novit munera ferre docet."

But whatever the fact may be, it is unnecessary to have recourse to this supposition: and indeed it confuses the allegory. Nor is it likely that St. Paul would hold himself tied by horticultural law in using such an image as this. Perhaps the very stress of the allegory is in this, that the grafting

is contrary to nature (παρὰ φύσιν ἐνεκεντρίσθης, v. 24).

This discussion of the passage in the Romans leads us naturally to speak of the cultivation of the olive-tree, its industrial applications, and general characteristics. It grows freely almost everywhere on the shores of the Mediterranean; but, as has been said above, it was peculiarly abundant in Palestine. See Deut. vi. 11, vii. 8, xviii. 40. Olive-yards are a matter of course in descriptions of the country, like vineyards and corn-fields (Judg. xv. 5; 1 Sam. viii. 14). The kings had very extensive ones (1 Chr. xxvii. 28). Even now the tree is very abundant in the country. Almost every village has its olive-grove. Certain districts may be specified where at various times this tree has been very luxuriant. Of Asher, on the skirts of the Lebanon, it was prophesied that he should "dip his foot in oil" (Deut. xxxiii. 24). The immediate neighborhood of Jerusalem has already been mentioned. In the article on GAZA we have

alluded to its large and productive olive-woods in the present day; and we may refer to Van de Velde's *Syria* (i. 386) for their extent and beauty in the vale of Shechem. The cultivation of the olive-tree had the closest connection with the domestic life of the Israelites, their trade, and even their public ceremonies and religious worship. A good illustration of the use of olive-oil for food is furnished by 2 Chr. ii. 10, where we are told that Solomon provided Hiram's men with "twenty thousand baths of oil." Compare Ezra iii. 7. Too much of this product was supplied for home consumption: hence we find the country sending it as an export to Tyre (Ez. xxvii. 17), and to Egypt (Hos. xii. 1). This oil was used in coronations, thus it was an emblem of sovereignty (1 Sam. x 1, xii. 3, 5). It was also mixed with the offerings in sacrifice (Lev. ii. 1, 2, 6, 15). Even in the wilderness very strict directions were given that, in the Tabernacle, the Israelites were to have "pure oil olive beaten for the light, to cause the lamp to

Old Olive-trees in the Garden of Gethsemane.

burn always" (Ex. xxvii. 20). For the burning of it in common lamps, see Matt. xxv. 3, 4, 8. The use of it on the hair and skin was customary, and indicative of cheerfulness (Ps. xxiii. 5; Matt. vi. 17). It was also employed medicinally in surgical cases (Luke x. 34).<sup>a</sup> See again Mark vi. 13; Jam. v. 14, for its use in combination with prayer on behalf of the sick. [OIL; ANOINT.] Nor, in enumerating the useful applications of the olive-tree, must we forget the wood, which is hard and solid, with a fine grain, and a pleasing yellowish tint. In Solomon's Temple the cherubim were "of olive-tree" (1 K. vi. 23),<sup>b</sup> as also the doors

(vv. 31, 32) and the posts (ver. 33). As to the berries (Jam. iii. 12; 2 Esdr. xvi. 29), which produce the oil, they were sometimes gathered by shaking the tree (Is. xxiv. 13), sometimes by beating it (Deut. xxiv. 20). Then followed the treading of the fruit (Deut. xxxiii. 24; Mic. vi. 15). Hence the mention of "oil-fats" (Joel ii. 24). Nor must the flower be passed over without notice:—

"Si bene floruerint oleæ, nitidissimus annus."

Ov. *Fast.* v. 265.

The wind was dreaded by the cultivator of the

<sup>a</sup> All these subjects admit of very full illustration from Greek and Roman writers. And if this were not a Biblical article, we should dwell upon other classical associations of the tree which supplied the victor's wreath at the Olympic games, and a twig of which is the familiar mark on the coins of Athens. See *Judith* v. 13.

<sup>b</sup> \* If the olive be the wood intended in 1 K. vi. 23, it is singular that a wood of such hardness should have been used for a carving, when the carving was to be covered with gold, and thus the fine grain would be concealed. Tristram (*Nat. Hist. of the Bible*, p. 371) thinks that the oleaster is meant here. See *OLIVE TREE*. G. E. P.

olive; for the least ruffling of a breeze is apt to cause the flowers to fall:—

"Florebant oleæ: venti nocuere protervi."

*Ov. Fast.* v. 321.

Thus we see the force of the words of Eliphaz the Temanite: "He shall cast off his flower like the olive" (*Job* xv. 33). It is needless to add that the locust was a formidable enemy of the olive (*Amos* iv. 9). It happened not infrequently that hopes were disappointed, and that "the labor of the olive failed" (*Hab.* iii. 17). As to the growth of the tree, it thrives best in warm and sunny situations. It is of a moderate height, with knotty gnarled trunks, and a smooth ash-colored bark. It grows slowly, but it lives to an immense age. Its look is singularly indicative of tenacious vigor: and this is the force of what is said in Scripture of its "greenness," as emblematic of strength and prosperity. The leaves, too, are not deciduous. Those who see olives for the first time are occasionally disappointed by the dusty color of their foliage; but those who are familiar with them find an inexpressible charm in the rippling changes of these slender gray-green leaves. Mr. Ruskin's pages in the *Stones of Venice* (iii. 175-177) are not at all extravagant.

The literature of this subject is very extensive. All who have written on the trees and plants of Scripture have devoted some space to the olive. One especially deserves to be mentioned, namely, Thomson, *Land and Book*, pp. 51-57. But, for Biblical illustration, no later work is so useful as the *Hierobotanicon*, of Celsius, the friend and patron of Linnaeus. J. S. H.

\* The noble olive-yards of Attica, which Paul must have seen whether he went from Athens to Corinth by the way of Megara or Piræus (*Acts* xviii. 1), still preserve their ancient fame. Allusion is made above to the olive-press. Dr. W. M. Thomson found several such presses still well preserved from early Hebrew times, at *Um el-Arouâûr*, not far from Tyre, a little north of *Kânâh*. [KANAH.] "Two columns, about two feet square and eight feet high, stand on a stone base, and have a stone of the same length and size on the top. Sometimes there are two on the top, to make it more firm. These columns are about two feet apart, and in the inner sides, facing each other, are grooves cut from near the top to the bottom, about four inches deep and six wide, in which the plank which pressed on the olives moved up and down. . . . The plank was placed upon them and pressed down by a long beam acting as a lever, by the aid of the great stones on the top of the columns. . . . Close to the press, are two immense stone basins, in which the olives were ground. I measured one which had recently been uncovered. It was seven feet two inches in diameter, a foot deep, with a rim six inches thick; a huge bowl of polished stone, without a flaw or crack in it" (*Bibl. Sacra*, xii. 832 f.). The same writer (*Land and Book*, i. 72-76) explains in a striking manner the various

Scripture allusions to the olive (*Job* xv. 33; *Hab.* iii. 18; *Is.* xvii. 6; *Deut.* xxiv. 20). "The sites," says Mr. Tristram, "of many of the deserted towns of Judah bear witness to the former abundance of the olive, where it now no longer exists, by the oil-presses, with their gutters, troughs, and cisterns hewn out of the solid rock. I have seen many of them far south of Hebron, where not an olive has existed for centuries, and also many among deserted thickets of Carmel" (*Nat. Hist. of the Bible*, p. 376). Most of the passages which refer to the olive might have been written in our own day, so remarkably do the present customs accord with those of the oldest known inhabitants of the land. *Leyrer* (*Herzog's Real-Encyk.* x. 547) quotes Schulz (*Leitungen des Hôchstes*, v. 86) as saying that the wild olive may be and is used in the East for grafting the cultivated olive when the latter becomes unfruitful; but it is generally allowed that Paul does not refer in *Rom.* xi. 17 to any actual process in nature, but assumes the case for the sake of illustration. H.

\* OLIVE-BERRIES (*Jam.* iii. 12). [OLIVE.]

OLIVES, MOUNT OF (הַר הַזַּיְתִּים): *τὸ ὄρος τῶν ἐλαιῶν*: *Mons Oliværum*). The exact expression "the Mount of Olives" occurs in the O. T. in *Zech.* xiv. only; in the other places of the O. T. in which it is referred to, the form employed is the "ascent of<sup>a</sup> the olives" (2 *Sam.* xv. 30; A. V. inaccurately "the ascent of Mount Olivet"), or simply "the mount" (*Neh.* viii. 15), "the mount facing Jerusalem" (1 *K.* xi. 7), or "the mountain which is on the east side of the city" (*Ez.* xi. 23).

In the N. T. three forms of the word occur: (1.) The usual one, "The Mount of Olives" (*τὸ ὄρος τῶν ἐλαιῶν*). (2.) By St. Luke twice (*xix.* 29, *xxi.* 37): "the mount called *Elaiôn*" (*τὸ ὄ. τὸ καλ. ἐλαιῶν*; *Rec. Text*, 'Ελαιῶν, which is followed by the A. V.). (3.) Also by St. Luke (*Acts* i. 12), the "mount called Olivet" (*ὄρ. τὸ καλ. ἐλαιῶνος*).

It is the well-known eminence on the east of Jerusalem, intimately and characteristically connected with some of the gravest and most significant events in the history of the Old Testament, the New Testament, and the intervening times, and one of the firmest links by which the two are united; the scene of the flight of David and the triumphal progress of the Son of David, of the idolatry of Solomon, and the agony and betrayal of Christ.

If anything were wanting to fix the position of the Mount of Olives, it would be amply settled by the account of the first of the events just named, as related in 2 *Sam.* xv., with the elucidations of the LXX. and Josephus (*Ant.* vii. 9). David's object was to place the Jordan between himself and Absalom. He therefore flies by the road called "the road of the wilderness" (*xv.* 23). This leads him across the Kidron, past the well-known olive-tree<sup>b</sup> which marked the path, up the toilsome ascent of

<sup>a</sup> מַעְלֵה הַזַּיְתִּים: ἀνάβασις τῶν ἐλαιῶν: *clivus olivarum*. The names applied to the mount in the Targums are as follows: זַיְתִּים וְטַרְגָּו or זַיְתִּים וְטַרְגָּו (*2 Sam.* xv. 30, 2 *K.* xxiii. 13, *Ex.* xi. 23, *Zech.* xiv. 4), מַעְלֵה הַזַּיְתִּים (Cant. viii. 3; and *Gen.* viii. 11, Pseudo *Job.* only). The latter is the name employed in the

Mishna (*Parah*, c. 3). Its meaning is "oil" or "ointment." The modern Arabic name for the whole ridge seems to be *Jebel es-Zeitân*, i. e. Mount of Olives, or *Jebel Tîr*, the mount of the mount, meaning, the important mount.

<sup>b</sup> The allusion to this tree, which survives in the LXX of *ver.* 18, has vanished from the present Hebrew text.

the mount — elsewhere exactly described as facing Jerusalem on the east (1 K. xi. 7; Ez. xi. 23; Mark xiii. 3) — to the summit,<sup>a</sup> where was a consecrated spot at which he was accustomed to worship God.<sup>b</sup> At this spot he again performed his devotions — it must have seemed for the last time — and took his farewell of the city, “with many tears, as one who had lost his kingdom.” He then turned the summit, and after passing Bahurim, probably about where Bethany now stands, continued the descent through the “dry and thirsty c land” until he arrived “weary” at the bank of the river (Joseph. *Ant.* vii. 9, §§ 2-6; 2 Sam. xvi. 14, xvii. 21, 22).

This, which is the earliest mention<sup>a</sup> of the Mount of Olives, is also a complete introduction to it. It stands forth, with every feature complete, almost as if in a picture. Its nearness to Jerusalem; the ravine at its foot; the olive-tree at its base; the steep road through the trees<sup>c</sup> to the summit; the remarkable view from thence of Zion and the city, spread opposite and almost seeming

to rise towards the spectator; the very “stones and dust”<sup>f</sup> of the rugged and sultry descent, — all are caught, nothing essential is omitted.

The remaining references to it in the Old Testament are but slight. The “high places” which Solomon constructed for the gods of his numerous wives, were in the mount “facing Jerusalem” (1 K. xi. 7) — an expression which applies to the Mount of Olives only, as indeed all commentators apply it. Modern tradition (see below) has, after some hesitation, fixed the site of these sanctuaries on the most southern of the four summits into which the whole range of the mount is divided, and therefore far removed from that principal summit over which David took his way. But there is nothing in the O. T. to countenance this, or to forbid our believing that Solomon adhered to the spot already consecrated in the time of his father. The reverence which in our days attaches to the spot on the very top of the principal summit, is probably only changed in its object from what it was in the time of the kingdom of Judah.

Mount of Olives. (From Bartlett's *Walks about Jerusalem.*)

During the next four hundred years we have only the brief notice of Josiah's iconoclasm at this spot. Ahaz and Manasseh had no doubt maintained and enlarged the original erections of Solomon. These Josiah demolished. He “defiled” the high places, broke to pieces the uncouth and obscene symbols

<sup>a</sup> The mention of the summit marks the road to have been that over the present Mount of the Ascension. The southern road keeps below the summit the whole way

<sup>b</sup> The expression of the text denotes that this was a frequent and frequented spot for devotion. The Talmudists say that it was the place at which the Ark and Tabernacle were first caught sight of in approaching Jerusalem over the Mount. Spots from which a sanctuary is visible are still considered in the East as themselves sacred. (See the citations in Lightfoot on Luke xxiv. 50; and compare Mizpeh, p. 1977 note.) It is worthy of remark that the expression is “where they worshipped God,” not Jehovah; as if it were one of the old sanctuaries of Elohim, like Bethel or Moreh.

<sup>c</sup> Ps. lxxiii. — by its title and by constant tradition.

which deformed them, cut down the images, or possibly the actual groves, of Ashtaroth, and effectually disqualified them for worship by filling up the cavities with human bones (2 K. xxiii. 13, 14). Another two hundred years and we find a further mention of it — this time in a thoroughly different connec-

— is referred to this day. The word rendered “thirsty” in ver. 1 is the same as that rendered “weary” in 2 Sam. xvi. 14 — חָיָא.

<sup>d</sup> The author of the Targum Pseudojonathan introduces it still earlier. According to him, the olive-leaf which the dove brought back to Noah was plucked from it.

<sup>e</sup> It must be remembered that the mount had not yet acquired its now familiar name. All that is said is that David “ascended by the ascent of the olives.”

<sup>f</sup> At Bahurim, while David and his men kept the road, Shimei scrambled along the slope of the overhanging hill above, even with him, and threw stones at him, and covered him with dust (2 Sam. xvi. 13) [in the Hebrew dusted].

tion. It is now the great repository for the vegetation of the district, planted thick with olive, and the bushy myrtle, and the feathery palm. "Go out" of the city "into the mount" — was the command of Ezra for the celebration of the first anniversary of the Feast of Tabernacles after the Return from Babylon — "and fetch olive branches and 'oil-tree' branches and myrtle-boughs, and palm-leaves, and branches of thirtle trees to make booths, as it is written" (Neh. viii. 15).

The cultivated and umbrageous character which is implied in this description, as well as in the name of the mount, it retained till the N. T. times. Caplnatha, Bethphage, Bethany, all names of places on the mount, and all derived from some fruit or vegetation, are probably of late origin, certainly of late mention. True, the "palm-branches" borne by the crowd who flocked out of Jerusalem to welcome the "Prophet of Nazareth," were obtained from the city (John xii. 13) — not impossibly from the gardens of the Temple (Ps. xcii. 12, 13); but the boughs which they strewed on the ground before him, were cut or torn down from the fig or olive trees which shadowed the road round the hill.

At this point in the history it will be convenient to describe the situation and appearance of the Mount of Olives. It is not so much a "mount" as a ridge, of rather more than a mile in length, running in general direction north and south; covering the whole eastern side of the city, and screening it from the bare, waste, uncultivated country — the "wilderness" — which lies beyond it, and fills up the space between the Mount of Olives and the Dead Sea. At its north end the ridge bends round to the west so as to form an inclosure to the city on that side also. But there is this difference, that whereas on the north a space of nearly a mile of tolerably level surface intervenes between the walls of the city and the rising ground, on the east the mount is close to the walls,<sup>a</sup> parted only by that which from the city itself seems no parting at all — the narrow ravine of the Kidron. You descend from the Golden Gateway, or the Gate of St. Stephen, by a sudden and steep declivity, and no sooner is the bed of the valley reached than you again commence the ascent of Olivet. So great is the effect of this proximity, that, partly from that, and partly from the extreme clearness of the air, a spectator from the western part of Jerusalem imagines Olivet to rise immediately from the side of the Haram area (Porter, *Handb.* p. 103 a; also Stanley, *S. & P.* p. 186).

It is this portion which is the real Mount of Olives of the history. The northern part — in all probability Nob,<sup>b</sup> Mizpeh, and Scopus — is, though geologically continuous, a distinct mountain; and the so-called Mount of Evil Counsel, directly south of the Cenaculum, is too distant and too completely isolated by the trench of the Kidron to claim the name. We will therefore confine our-

selves to this portion. In general height it is not very much above the city: 300 feet higher than the Temple mount,<sup>c</sup> hardly more than 100 above the so-called Zion. But this is to some extent made up for by the close proximity which exaggerates its height, especially on the side next to it.

The word "ridge" has been used above as the only one available for an eminence of some length and even height, but that word is hardly accurate. There is nothing "ridge like" in the appearance of the Mount of Olives, or of any other of the limestone hills of this district of Palestine; all is rounded, swelling, and regular in form. At a distance its outline is almost horizontal, gradually sloping away at its southern end; but when approached, and especially when seen from below the eastern wall of Jerusalem, it divides itself into three, or rather perhaps four, independent summits or eminences. Proceeding from N. to S. these occur in the following order: Galilee, or Viri Galilæi; Mount of the Ascension; Prophets, subordinate to the last, and almost a part of it; Mount of Offense.

1. Of these the central one, distinguished by the minaret and domes of the Church of the Ascension, is in every way the most important. The church, and the tiny hamlet of wretched hovels which surround it, — the *Kefer et-Tür*, — are planted slightly on the Jordan side of the actual top, but not so far as to hinder their being seen from all parts of the western environs of the mountain, or, in their turn, commanding the view of the deepest recesses of the Kidron Valley (Porter, *Handb.* p. 103). Three paths lead from the valley to the summit. The first — a continuation of the path which descends from the St. Stephen's Gate to the Tomb of the Virgin — passes under the north wall of the inclosure of Gethsemane, and follows the line of the depression between the centre and the northern hill. The second parts from the first about 50 yards beyond Gethsemane, and striking off to the right up the very breast of the hill, surmounts the projection on which is the traditional spot of the Lamentation over Jerusalem, and thence proceeds directly upwards to the village. This is rather shorter than the former; but, on the other hand, it is much steeper, and the ascent extremely toilsome and difficult. The third leaves the other two at the N. E. corner of Gethsemane, and making a considerable detour to the south, visits the so-called "Tombs of the Prophets," and following a very slight depression which occurs at that part of the mount, arrives in its turn at the village.

Of these three paths the first, from the fact that it follows the natural shape of the ground, is, unquestionably, older than the others, which deviate in pursuit of certain artificial objects. Every consideration is in favor of its being the road taken by David in his flight. It is, with equal probability, that usually taken by our Lord and his disciples in their morning and evening transit between Jeru-

<sup>a</sup> \* This remark may mislead the reader. From some positions the mount may appear to be "close to the walls," but is actually one half or three fourths of a mile distant, even in that part of the valley where Olivet and Moriah approach nearest to each other.

<sup>b</sup> See MIZPEH, p. 1977.

<sup>c</sup> The following are the elevations of the neighborhood (above the Mediterranean), according to Van de Velde (*Memoir*, p. 179): —

Mount of Olives (Church of Ascension) 2,724 ft.

"Zion" (the Cenaculum) . . . . .	2,537 ft.
"Moriah" ( <i>Haram</i> area) . . . . .	2,429 ft.
N. W. corner of city . . . . .	2,610 ft.
Valley of Kidron (Gethsemane) . . . . .	2,251 ft.
Valley of Kidron ( <i>Bir Eyub</i> ) . . . . .	1,896 ft.
Bethany . . . . .	1,808 ft.
Jordan . . . . .	1,209 ft. 1

1 \* Compare the table of elevations by Capt. Wilson, *vo* ii. p. 1278 (Amer. ed.).

Jerusalem and Bethany, and that also by which the Apostles returned to Jerusalem after the Ascension. If the "Tombs of the Prophets" existed before the destruction of Jerusalem (and if they are the Peristèreon of Josephus they did), then the third road is next in antiquity. The second — having probably been made for the convenience of reaching a spot the reputation of which is comparatively modern — must be the most recent.

The central hill, which we are now considering, purports to contain the sites of some of the most sacred and impressive events of Christian history. During the Middle Ages most of these were protected by an edifice of some sort; and to judge from the reports of the early travellers, the mount must at one time have been thickly covered with churches and convents. The following is a complete list of these, as far as the writer has been able to ascertain them.

(1.) Commencing at the western foot, and going gradually up the hill.<sup>a</sup>

\* Tomb of the Virgin: containing also those of Joseph, Joachim, and Anna.

Gethsemane: containing —  
Olive garden.

\* Cavern of Christ's Prayer and Agony.  
(A Church here in the time of Jerome and Willibald.)

Rock on which the 3 disciples slept.

\* Place of the capture of Christ. (A Church in the time of Bernard the Wise.)

Spot from which the Virgin witnessed the stoning of St. Stephen.

Do. at which her girdle dropped during her Assumption.

Do. of our Lord's Lamentation over Jerusalem, Luke xix. 41. (A Church here formerly, called *Dominus flevit*; Surius, in Mislin, ii. 476.)

Do. on which He first said the Lord's Prayer, or wrote it on the stone with his finger (Sæwulf, *Early Trav.* p. 42). A splendid Church here formerly. Maundeville seems to give this as the spot where the Beatitudes were pronounced (*E. Tr.* p. 177).

Do. at which the woman taken in adultery was brought to Him (Bernard the Wise, *E. Tr.* p. 28).

\* Tombs of the Prophets (Matt. xxiii. 29): containing, according to the Jews, those of Haggai and Zechariah.

Cave in which the Apostles composed the Creed: called also Church of St. Mark or of the 12 Apostles.

Spot at which Christ discoursed of the Judgment to come (Matt. xxiv. 3).

Cave of St. Pelagia: according to the Jews, sepulchre of Huldah the Prophetess.

\* Place of the Ascension. (Church, with subsequently a large Augustine convent attached.)

Spot at which the Virgin was warned of her death by an angel. In the valley between

the Ascension and Viri Galilæi (Maundeville, p. 177, and so Doubdan); but Maundrel (*E. Tr.* p. 470) places it close to the cave of Pelagia.

Viri Galilæi. Spot from which the Apostles watched the Ascension: or at which Christ first appeared to the 3 Mariæ after his Resurrection (Tobler, p. 76, *note*).

(2.) On the east side, descending from the Church of the Ascension to Bethany.

The field in which stood the fruitless fig-tree.

Bethphage.

Bethany: House of Lazarus. (A Church there in Jerome's time; *Lib. de Situ*, etc. "Bethania.")

\* Tomb of Lazarus.

\* Stone on which Christ was sitting when Martha and Mary came to Him.

The majority of these sacred spots now command little or no attention; but three still remain, sufficiently sacred — if authentic — to consecrate any place. These are: (1.) Gethsemane, at the foot of the mount. (2.) The place of the Lamentation of our Saviour over Jerusalem, half-way up; and (3.) The spot from which He ascended, on the summit.

(1.) Of these, Gethsemane is the only one which has any claim to be authentic. Its claims, however, are considerable; they are spoken of elsewhere.

(2.) The first person who attached the Ascension of Christ to the Mount of Olives seems to have been the Empress Helena (A. D. 325). Eusebius (*Vit. Const.* iii. § 43) states that she erected as a memorial of that event a sacred house <sup>c</sup> of assembly on the highest part of the mount, where there was a cave which a sure tradition (*λόγος ἀληθής*) testified to be that in which the Saviour had imparted mysteries to his disciples. But neither this account, nor that of the same author (Euseb. *Demonst. Evang.* vi. 18) when the cave is again mentioned, do more than name the Mount of Olives, generally, as the place from which Christ ascended: they fix no definite spot thereon. Nor does the Bordeaux Pilgrim, who arrived shortly after the building of the church (A. D. 333), know anything of the exact spot. He names the Mount of Olives as the place where our Lord used to teach his disciples; mentions that a basilica of Constantine stood there . . . he carefully points out the Mount of Transfiguration in the neighborhood (!) but is silent on the Ascension. From this time to that of Arculf (A. D. 700) we have no information, except the casual reference of Jerome (A. D. 390), cited below. In that immense interval of 370 years, the basilica of Constantine or Helena had given way to the round church of Modestus (Tobler, p. 92, *note*), and the tradition had become firmly established. The church was open to the sky "because of the passage of the Lord's body," and on the ground in the centre were the prints of his feet in the dust (*pulvere*). The cave or spot hallowed by his preaching to his disciples appears to have been moved off to the north of Bethany (*Early Trav.* p. 6).

Since that day many changes in detail have oc-

<sup>a</sup> The above catalogue has been compiled from Juarsmius, Doubdan, and Mislin. The last of these works, with great pretension to accuracy, is very inaccurate. Collateral references to other works are occasionally given.

<sup>b</sup> Plenary Indulgence is accorded by the Church of Rome to those who recite the Lord's Prayer and the Ave Maria at the spots marked thus (\*).

<sup>c</sup> Ἱερὸν οἶκον ἐκκλησίας. This church was surmounted by a conspicuous gilt cross, the glitter of which was visible far and wide. Jerome refers to it several times. See especially *Epitaph. Paulæ*, "crux rutilans," and his comment on *Zeph.* i. 15.

curred the "dust" has given way to stone, in which the print of first one, then two feet, was recognized,<sup>a</sup> one of which by a strange fate is said now to rest in the Mosque of the Aksa.<sup>b</sup> The buildings too have gone through alterations, additions, and finally losses, which has reduced them to their present condition: a mosque with a paved and unroofed court of irregular shape adjoining, round which are ranged the altars of various Christian churches. In the centre is the miraculous stone surmounted by a cupola and screened by a Moslim Kiblah or praying-place,<sup>c</sup> with an altar attached, on which the Christians are permitted once a year to say mass (Williams, *Holy City*, ii. 445). But through all these changes the locality of the Ascension has remained constantly the same.

The tradition no doubt arose from the fact of Helena's having erected her memorial church on the summit of the hill. It has been pointed out that she does not appear to have had any intention of fixing on a precise spot; she desired to erect a memorial of the Ascension, and this she did on the summit of the Mount of Olives, partly no doubt because of its conspicuous situation, but mainly because of the existence there of the sacred cavern in which our Lord had taught.<sup>d</sup> It took nearly three centuries to harden and narrow this general recognition of the connection of the Mount of Olives with Christ, into a lying invention in contradiction of the Gospel narrative of the Ascension. For a contradiction it undoubtedly is. Two accounts of the Ascension exist, both by the same author — the one, Luke xxiv. 50, 51, the other, Acts i. 6-11. The former only of these names the place at which our Lord ascended. That place was not the summit of the mount, but Bethany — "He led them out as far as to Bethany" — on the eastern slopes of the mount nearly a mile beyond the traditional spot.<sup>e</sup> The narrative of the Acts does not name the scene of the occurrence, but it states that after it had taken place the Apostles "returned to Jerusalem from the mount called Olivet, which is from Jerusalem a sabbath day's journey." It was their natural, their only route: but St. Luke is writing for Gentiles ignorant of the localities, and therefore he not only names Olivet, but adds the general information that it — that is, the summit and main part of the mount — was a Sabbath-day's journey from Jerusalem. The specification of the distance no more applies to Bethany on the further

side of the mount than to Gethsemane on the nearer.

And if, leaving the evidence, we consider the relative fitness of the two spots for such an event, — and compare the retired and wooded slopes around Bethany, so intimately connected with the last period of his life and with the friends who relieved the dreadful pressure of that period, and to whom he was attached by such binding ties, with an open public spot visible from every part of the city, and indeed for miles in every direction — we shall have no difficulty in deciding which is the more appropriate scene for the last act in the earthly sojourn of One who always shunned publicity even before his death, and whose communications after his resurrection were confined to his disciples, and marked by a singular privacy and reserve.<sup>f</sup>

(3.) The third of the three traditionary spots mentioned — that of the Lamentation over Jerusalem (Luke xix. 41-44) — is not more happily chosen than that of the Ascension. It is on a mamelon or protuberance which projects from the slope of the breast of the hill, about 300 yards above Gethsemane. The sacred narrative requires a spot on the road from Bethany, at which the city or temple should suddenly come into view: but this is one which can only be reached by a walk of several hundred yards over the breast of the hill, *with the temple and city full in sight the whole time*. It is also pretty evident that the path which now passes the spot, is subsequent in date to the fixing of the spot. As already remarked, the natural road lies up the valley between this hill and that to the north, and no one, unless with the special object of a visit to this spot, would take this very inconvenient path. The inappropriateness of this place has been noticed by many; but Mr. Stanley was the first who gave it its death-blow, by pointing out the true spot to take its place. In a well-known passage of *Sinai and Palestine* (pp. 190-193), he shows that the road of our Lord's "Triumphal entry" must have been, not the short and steep path over the summit used by small parties of pedestrians, but the longer and easier route round the southern shoulder of the southern of the three divisions of the mount, which has the peculiarity of presenting two successive views of Jerusalem; the first its southwest portion — the modern Zion; the second, after an interval, the buildings on the Temple mount, answering to the two points in the nar-

<sup>a</sup> Even the toes were made out by some (Tobler, p. 108, note).

<sup>b</sup> The "Chapel at the foot of Isa" is at the south end of the main aisle of the Aksa, almost under the dome. Attached to its northern side is the Pulpit. At the time of Ali Bey's visit (ii. 218, and plate lxxi.) it was called *Sidna Aisa*, Lord Jesus; but he says nothing of the foot-mark.

<sup>c</sup> See the plan of the edifice, in its present condition, on the margin of Sig. Pierotti's map, 1861. Other plans are given in Quaresnius, ii. 318, and B. Amico, No. 34. Arculf's sketch is in Tobler (*Siloahquelle*, etc.).

<sup>d</sup> Since writing this, the writer has observed that Mr. Stanley has taken the same view, almost in the same words. (See *S. & P.* ch. xiv. p. 454.)

<sup>e</sup> The Mount of Olives seems to be used for Bethany also in Luke xxi. 37, compared with Matt. xxi. 17, xxvi. 6, Mark xiv. 3. The morning walk from Bethany did not at any rate terminate with the day after his arrival at Jerusalem. (See Mark xi. 20.) One mode of reconciling the two narratives — which do not seem reconciling — is to say that the district of Beth-

any extended to the summit of the mount. But "Bethany" in the N. T. is not a district but a village, and it was "as far as" that well-known place that "He led them forth."

<sup>f</sup> "Like the first appearance to the shepherds," says Dr. Howson, "as recorded by St. Luke, like the first miracle as described by St. John, like the whole biography, as given both by them and the other two Evangelists, was the simplicity and seclusion of his departure. At no time did the Kingdom of God 'come with observation.' Jesus never forced himself upon public notice. It was not the men high in station who knew Him best — not the men celebrated for learning — but the lonely sufferers, the penitent, the poor, the degraded, and the despised. The evidence was sufficient, but not irresistible" (*Lectures on the Character of St. Paul*, p. 230).

The passage in which this writer has grouped together the local and historical associations connected with the Mount of Olives, forms one of the most beautiful passages to be found in our English homiletic literature (*Lectures*, pp. 227-232).

native — the Hosanna of the multitude, the weeping of Christ.

2. We have spoken of the central and principal portion of the mount. Next to it on the southern side, separated from it by a slight depression, up which the path mentioned above as the third takes its course, is a hill which appears neither to possess, nor to have possessed, any independent name. It is remarkable only for the fact that it contains the "singular catacomb" known as the "Tombs of the Prophets," probably in allusion to the words of Christ (Matt. xxiii. 29). Of the origin, and even of the history of this cavern, hardly anything is known. It is possible that it is the "rock called Peristereon," named by Josephus (*B. J. v. 12, § 2*) in describing the course of Titus's great wall<sup>a</sup> of circumvallation, though there is not much to be said for that view (see Rob. iii. 254, *note*). To the earlier pilgrims it does not appear to have been known; at least their descriptions hardly apply to its present size or condition. Mr. Stanley (*S. & P. p. 453*) is inclined to identify it with the cave mentioned by Eusebius as that in which our Lord taught his disciples, and also with that which is mentioned by Arculf and Bernard as containing "the four tables" of our Lord (*Err. Tr. pp. 4, 28*). The first is not improbable, but the cave of Arculf and Bernard seems to have been down in the valley not far from the Tomb of the Virgin, and on the spot of the betrayal (*E. Tr. p. 28*), therefore close to Gethsemane.

3. The most southern portion of the Mount of Olives is that usually known as the "Mount of Offense," *Mons Offensionis*, though by the Arabs called *Baten el-Hawa*, "the bag of the wind." It rises next to that last mentioned; and in the hollow between the two, more marked than the depressions between the more northern portions, runs the road from Bethany, which was without doubt the road of Christ's entry to Jerusalem.

The title Mount of Offense,<sup>b</sup> or of Scandal, was bestowed on the supposition that it is the "Mount of Corruption,"<sup>c</sup> on which Solomon erected the high places for the gods of his foreign wives (2 K. xxiii. 13; 1 K. xi. 7). This tradition appears to be of a recent date. It is not mentioned in the Jewish travellers, Benjamin, hap-Parehi, or Petahia, and the first appearance of the name or the tradition as attached to that locality among Christian writers, appears to be in John of Wirtzburg (Tobler, p. 80, *note*) and Brocardus (*Descriptio Terr. S. cap. ix.*), both of the 13th century. At that time the northern summit was believed to have been the site of the altar of Chemosh (Brocardus), the southern one that of Molech only (Thietmar, *Peregr. xi. 2*).

<sup>a</sup> The wall seems to have crossed the Kidron from about the present St. Stephen's Gate to the mount on the opposite side. It then "turned south and encompassed the mount as far as the rock called the Dovecot (*ἀρχὴ τῆς Περιστερώου καλουμένης πέτρας*), and the other hill which lies next it, and is over the Valley of Siloam." Peristereon may be used as a synonym for *columbarium*, a late Latin word for an excavated cemetery; and there is perhaps some analogy between it and the *Wady Hamsnām*, or Valley of Pigeons, in the neighborhood of Tiberias, the rocky sides of which abound in caves and perforations. On it may be one of those half-Hebrew, half-Greek appellations, which here is reason to believe Josephus bestows on some of the localities of Palestine, and which have yet to be

The southern summit is considerably lower than the centre one, and, as already remarked, it is much more definitely separated from the surrounding portions of the mountain than the others are. It is also sterner and more repulsive in its form. On the south it is bounded by the *Wady en-Nar*, the continuation of the Kidron, curving round eastward on its dreary course to S. Saba and the Dead Sea. From this barren ravine the Mount of Offense rears its rugged sides by acclivities barer and steeper than any in the northern portion of the mount, and its top presents a bald and desolate surface, contrasting greatly with the cultivation of the other summits, and which not improbably, as in the case of Mount Ebal, suggested the name which it now bears. On the steep ledges of its western face clings the ill-favored village of *Silwin*, a few dilapidated towers rather than houses, their gray beared walls hardly to be distinguished from the rock to which they adhere, and inhabited by a tribe as mean and repulsive as their habitations. [SILLOAM.]

Crossing to the back or eastern side of this mountain, on a half-isolated promontory or spur which overlooks the road of our Lord's progress from Bethany, are found tanks and foundations and other remains, which are maintained by Dr. Barclay (*City, etc. p. 66*) to be those of Bethphage (see also Stewart, *Tent and Khan, p. 322*).

4. The only one of the four summits remaining to be considered is that on the north of the "Mount of Ascension" — the *Karem es-Seyad*, or Vineyard of the Sportsman; or, as it is called by the modern Latin and Greek Christians, the *Viri Galilæi*. This is a hill of exactly the same character as the Mount of the Ascension, and so nearly its equal in height that few travellers agree as to which is the more lofty. The summits of the two are about 400 yards apart. It stands directly opposite the N. E. corner of Jerusalem, and is approached by the path between it and the Mount of Ascension, which strikes at the top into a cross path leading to *el-Isawiye* and *Anata*. The Arabic name well reflects the fruitful character of the hill, on which there are several vineyards, besides much cultivation of other kinds. The Christian name is due to the singular tradition, that here the two angels addressed the Apostles after our Lord's ascension — "Ye men of Galilee!" This idea, which is so incompatible, on account of the distance, even with the traditional spot of the Ascension, is of late existence and inexplicable origin. The first name by which we encounter this hill is simply "Galilee," ἡ Γαλιλαία (Perdiceas, cir. A. D. 1250, in *Reland, Pal. cap. lii.*). Brocardus (A. D. 1280) describes the moun

investigated. Tischendorf (*Travels in the East, p. 176*) is wrong in saying that Josephus "always calls it the Dovecot." He mentions it only this once.

<sup>b</sup> In German, *Berg des Aergernisses*.

<sup>c</sup> הַר הַפְּסוּחִית. This seems to be connected etymologically in some way with the name by which the mount is occasionally rendered in the Targums — טַרְרַר מְשֻׁחָה (Jonathan, Cant. viii. 9; Pseudojon. Gen. viii. 11). One is probably a play on the other.

Mr. Stanley (*S. & P. p. 188, note*) argues that the Mount of Corruption was the northern hill (*Viri Galilæi*), because the three sanctuaries were *סְדוֹת* of it, and therefore on the other three summits.

tain as the site of Solomon's altar to Chemosh (*Descr.* cap. ix.), but evidently knows of no name for it, and connects it with no Christian event. This name may, as is conjectured (Quaresmius, ii. 319, and Reland. p. 341), have originated in its being the custom of the Apostles, or of the Galileans generally, when they came up to Jerusalem, to take up their quarters there; or it may be the echo or distortion of an ancient name of the spot, possibly the Gellioth of Josh. xviii. 17 — one of the landmarks of the south boundary of Benjamin, which has often puzzled the topographer. But, whatever its origin, it came at last to be considered as the actual Galilee of northern Palestine, the place at which our Lord appointed to meet his disciples after his resurrection (Matt. xxviii. 10), the scene of the miracle of Cana (Reland, p. 338). This transference, at once so extraordinary and so instructive, arose from the same desire, combined with the same astounding want of the critical faculty, which enabled the pilgrims of the Middle Ages to see without perplexity the scene of the Transfiguration (Bordeaux Pilgr.,) of the Beatitudes (Maundeville, *E. Tr.* p. 177), and of the Ascension, all crowded together on the single summit of the central hill of Olivet. It testified to the same feeling which has brought together the scene of Jacob's vision at Bethel, of the sacrifice of Isaac on Moriah, and of David's offering in the threshing-floor of Araunah, on one hill; and which to this day has crowded within the walls of one church of moderate size all the events connected with the death and resurrection of Christ.

In the 8th century the place of the angels was represented by two columns<sup>a</sup> in the Church of the Ascension itself (Willibald, *E. Tr.* p. 19). So it remained with some trifling difference, at the time of Sæwulf's visit (A. D. 1102), but there was then also a chapel in existence — apparently on the northern summit — purporting to stand where Christ made his first appearance after the resurrection, and called "Galilee." So it continued at Maundeville's visit (1322). In 1580 the two pillars were still shown in the Church of the Ascension (Radzivil), but in the 16th century (Tobler, p. 75) the tradition had relinquished its ancient and more appropriate seat, and thenceforth became attached to the northern summit, where Maundrell (A. D. 1697) encountered it (*E. Tr.* p. 471), and where it even now retains some hold, the name *Kalilea* being occasionally applied to it by the Arabs. (See Pococke and Scholz, in Tobler, p. 72.) An ancient tower connected with the tradition was in course of demolition during Maundrell's visit, "a Turk having bought the field in which it stood."

The presence of the crowd of churches and other edifices implied in the foregoing description must have rendered the Mount of Olives, during the early and middle ages of Christianity, entirely unlike what it was in the time of the Jewish kingdom, or of our Lord. Except the high places on the summit the only buildings then to be seen were probably the walls of the vineyards and gardens, and the towers and presses which were their invariable accompaniment. But though the churches are nearly all demolished there must be a consider-

able difference between the aspect of the mountain now and in those days when it received its name from the abundance of its olive-groves. It does not now stand so preëminent in this respect among the hills in the neighborhood of Jerusalem. "It is only in the deeper and more secluded slope leading up to the northernmost summit that these venerable trees spread into anything like a forest." The cedars commemorated by the Talmud (Lightfoot, ii. 305), and the date-palms implied in the name Bethany, have fared still worse: there is not one of either to be found within many miles. This change is no doubt due to natural causes, variations of climate, etc.; but the check was not improbably given by the ravages committed by the army of Titus, who are stated by Josephus to have stripped the country round Jerusalem for miles and miles of every stick or shrub for the banks constructed during the siege. No olive or cedar, however sacred to Jew or Christian, would at such a time escape the axes of the Roman sappers, and, remembering how under similar circumstances every root and fibre of the smallest shrubs were dug up for fuel by the camp-followers of our army at Sebastopol, it would be wrong to deceive ourselves by the belief that any of the trees now existing are likely to be the same or even descendants of those which were standing before that time.

Except at such rare occasions as the passage of the caravan of pilgrims to the Jordan, there must also be a great contrast between the silence and loneliness which now pervades the mount, and the busy scene which it presented in later Jewish times. Bethphage and Bethany are constantly referred to in the Jewish authors as places of much resort for business and pleasure. The two large cedars already mentioned had below them shops for the sale of pigeons and other necessaries for worshippers in the Temple, and appear to have driven an enormous trade (see the citations in Lightfoot, ii. 39, 305). Two religious ceremonies performed there must also have done much to increase the numbers who resorted to the mount. The appearance of the new moon was probably watched for, certainly proclaimed, from the summit — the long torches waving to and fro in the moonless night till answered from the peak of *Kurn Surtabeh*; and an occasion to which the Jews attached so much weight would be sure to attract a concourse. The second ceremony referred to was burning of the Red Heifer.<sup>b</sup> This solemn ceremonial was enacted on the central mount, and in a spot so carefully specified that it would seem not difficult to fix it. It was due east of the sanctuary, and at such an elevation on the mount that the officiating priest, as he slew the animal and sprinkled her blood, could see the façade of the sanctuary through the east gate of the Temple. To this spot a viaduct was constructed across the valley on a double row of arches, so as to raise it far above all possible proximity with graves or other defilements (see citations in Lightfoot, ii. 39). The depth of the valley is such at this place (about 350 feet from the line of the south wall of the present *Havam* area) that this viaduct must have been an important and conspicuous work. It was probably de-

<sup>a</sup> These columns appear to have been seen as late as A. D. 1580 by Radzivil (Williams, *Holy City*, ii. 127, note).

<sup>b</sup> There seems to be some doubt whether this was an annual ceremony. Jerome (*Epitaph. Paula*, § 12)

distinctly says so; but the Rabbis assert that from Moses to the Captivity it was performed but once from the Captivity to the Destruction eight times (Lightfoot, ii. 306).

nolished by the Jews themselves on the approach of Titus, or even earlier, when Pompey led his army by Jericho and over the Mount of Olives. This would account satisfactorily for its not being alluded to by Josephus. During the siege the 10th legion had its fortified camp and batteries on the top of the mount, and the first, and some of the fiercest encounters of the siege took place here.

"The lasting glory of the Mount of Olives," it has been well said, "belongs not to the Old Dispensation, but to the New. Its very barrenness of interest in earlier times sets forth the abundance of those associations which it derives from the closing scenes of the sacred history. Nothing, perhaps, brings before us more strikingly the contrast of Jewish and Christian feeling, the abrupt and inharmonious termination of the Jewish dispensation — if we exclude the culminating point of the Gospel history — than to contrast the blank which Olivet presents to the Jewish pilgrims of the Middle Ages, only dignified by the sacrifice of 'the red heifer;' and the vision too great for words, which it offers to the Christian traveller of all times, as the most detailed and the most authentic abiding place of Jesus Christ. By one of those strange coincidences, whether accidental or borrowed, which occasionally appear in the Rabbinical writings, it is said in the Midrash,<sup>a</sup> that the Shechinah, or Presence of God, after having finally retired from Jerusalem, 'dwelt' three years and a half on the Mount of Olives, to see whether the Jewish people would not repent, calling, 'Return to me, O my sons, and I will return to you;' 'Seek ye the Lord while He may be found, call upon Him while He is near:' and then, when all was in vain, returned to its own place. Whether or not this story has a direct allusion to the ministrations of Christ, it is a true expression of his relation respectively to Jerusalem and to Olivet. It is useless to seek for traces of his presence in the streets of the since ten times captured city. It is impossible not to find them in the free space of the Mount of Olives" (Stanley, *S. & P.* p. 189).

A monograph on the Mount of Olives, exhausting every source of information, and giving the fullest references, will be found in Tobler's *Silvahquelle und der Oelberg*, St. Gallen, 1852. The ecclesiastical traditions are in Quaresimus, *Flucidatio Terræ Sanctæ*, ii. 277-340, &c. Doubdan's account (*Le Voyage de la Terre Sainte*, Paris, 1657) is excellent, and his plates very correct. The passages relating to the mount in Mr. Stanley's *Sinai and Palestine* (pp. 185-195, 452-454) are full of instruction and beauty, and in fixing the spot of our Lord's lamentation over Jerusalem he has certainly made one of the most important discoveries ever made in relation to this interesting locality. G.

OLIVET (2 Sam. xv. 30; Acts i. 12), probably derived from the Vulgate, *mons qui vocatur Oliveti* in the latter of these two passages. [See OLIVES, MOUNT OF.]

\* OLIVE-YARD. [OLIVE.]

\* OLOFERNES. [HOLOFERNES.]

OLYMPAS (Ὀλυμπᾶς; *Olympias*), a Christian at Rome (Rom. xvi. 15), perhaps of the house-

hold of Philologus. It is stated by Pseudo-Hippolytus that he was one of the seven disciples, and underwent martyrdom at Rome: and Baronius ventures to give A. D. 69 as the date of his death.

W. T. B.

OLYMPIUS (Ὀλύμπιος; *Olympius*). One of the chief epithets of the Greek deity Zeus, so called from Mount Olympus in Thessaly, the abode of the gods (2 Macc. vi. 2). [See JUPITER, vol. ii. p. 1518 b.]

OMAE'ERUS (Ἰσμαήρος; [Vat. *Manros*; Ald. *Ἰωμάρος*]; *Abramus*). AMRAM of the sons of Bani (1 Esdr. ix. 34; comp. Ezr. x. 34). The Syriac seems to have read "Ishmael."

O'MAR (אֲמָר) [perh. *eloquent, fluent*]: 'Omar: Alex. *Ωμαν* in Gen. xxxvi. 11: *Omar*. Son of Eliphaz the first-born of Esau, and "duke" or phylarch of Edom (Gen. xxxvi. 11, 15; 1 Chr. i. 36). The name is supposed to survive in that of the tribe of *Amir* Arabs east of the Jordan. Bunsen asserts that Omar was the ancestor of the *Bne 'Hammer* in northern Edom (*Bibelwerk*, Gen. xxxvi. 11), but the names are essentially different.

O'MEGA (Ω). The last letter of the Greek alphabet, as Alpha is the first. It is used metaphorically to denote the end of anything: "I am Alpha and Omega, the beginning and the ending . . . the first and the last" (Rev. i. 8, 11 [Rec. Text]). The symbol אֲמָר, which contains the first and last letters of the Hebrew alphabet, is, according to Buxtorf (*Lex. Talm.* p. 244), "among the Cabalists often put mystically for the beginning and end, like A and Ω in the Apocalypse." Schoettgen (*Hor. Heb.* p. 1086) quotes from the *Jalkut Rubeni* on Gen. i. 1, to the effect that in אֲמָר are comprehended all letters, and that it is the name of the Shechinah. [ALPHA.]

OMER. [WEIGHTS AND MEASURES.]

OM'RI (אֲמֹרִי, i. e. אֲמֹרִי אֲמֹרִי, probably "servant of Jehovah" (Gesenius): *Ἀμβρι*, [ex. Mic. vi. 16, *Ζαμβρι*; Vat. *Ζαμβρει*, exc. 2 K. viii. 26 (Vat.), 2 Chr. xxii. 2, *Αμβρει*; Alex. *Ζαμβρι*, exc. 2 K. viii. 26, *Αμβρι*]; *Ἀμαρῖος*, Joseph. *Ant.* viii. 12, § 5: *Amri*). 1. Originally "captain of the host" to ELAH, was afterwards himself king of Israel, and founder of the third dynasty. When Elah was murdered by Zimri at Tirzah, then capital of the northern kingdom, Omri was engaged in the siege of Gibbethon, situated in the tribe of Dan, which had been occupied by the Philistines, who had retained it, in spite of the efforts to take it made by Nadab, Jeroboam's son and successor. As soon as the army heard of Elah's death, they proclaimed Omri king. Thereupon he broke up the siege of Gibbethon, and attacked Tirzah, where Zimri was holding his court as king of Israel. The city was taken, and Zimri perished in the flames of the palace, after a reign of seven days. [ZIMRI.] Omri, however, was not allowed to establish his dynasty without a struggle against Tibni, whom "half the people" (1 K. xvi. 21) desired to raise to the throne, and who was bravely

<sup>a</sup> Rabbi Janna, in the *Midrash Tehillim*, quoted by Lightfoot, ii. 39. Can this statement have originated in the mysterious passage, Ez. xi. 23, in which the

glory of Jehovah is said to have left Jerusalem and taken its stand on the Mount of Olives — the mountain on the east side of the city?

assisted by his brother Joram.<sup>a</sup> The civil war lasted four years (cf. 1 K. xvi. 15, with 23). After the defeat and death of Tibni and Joram, Omri reigned for six years in Tirzah, although the palace there was destroyed; but at the end of that time, in spite of the proverbial beauty of the site (Cant. vi. 4), he transferred his residence, probably from the proved inability of Tirzah to stand a siege, to the mountain Shomron, better known by its Greek name Samaria, which he bought for two talents of silver from a rich man, otherwise unknown, called Shemer.<sup>b</sup> It is situated about six miles from Shechem, the most ancient of Hebrew capitals; and its position, according to Prof. Stanley (S. of P. p. 240), "combined, in a union not elsewhere found in Palestine, strength, fertility, and beauty." Bethel, however, remained the religious metropolis of the kingdom, and the calf worship of Jeroboam was maintained with increased determination and disregard of God's law (1 K. xvi. 26). At Samaria Omri reigned for six years more. He seems to have been a vigorous and unscrupulous ruler, anxious to strengthen his dynasty by intercourse and alliances with foreign states. Thus he made a treaty with Benhadad I., king of Damascus, though on very unfavorable conditions, surrendering to him some frontier cities (1 K. xx. 34), and among them probably Ramoth-gilead (1 K. xxii. 3), and admitting into Samaria a resident Syrian embassy, which is described by the expression "he made streets in Samaria" for Benhadad. (See the phrase more fully explained under AHAB.) As a part of the same system, he united his son in marriage to the daughter of a principal Phœnician prince, which led to the introduction into Israel of Baal worship, and all its attendant calamities and crimes. This worldly and irreligious policy is denounced by Micah (vi. 16) under the name of the "statutes of Omri," which appear to be contrasted with the Lord's precepts to his people, "to do justly, and to love mercy, and to walk humbly with thy God." It achieved, however, a temporary success, for Omri left his kingdom in peace to his son Ahab; and his family, unlike the ephemeral dynasties which had preceded him, gave four kings to Israel, and occupied the throne for about half a century, till it was overthrown by the great reaction against Baal-worship under Jehu. The probable date of Omri's accession (*i. e.* of the deaths of Elah and Zimri) was b. c. 935; of Tibni's defeat and the beginning of Omri's sole reign, b. c. 931, and of his death, b. c. 919. G. E. L. C.

2. (Ἀμαριά; [Vat. Αμαρεία.]) One of the sons of Becher the son of Benjamin (1 Chr. vii. 8).

3. (Ἀμρί; [Vat. Αμρει.]) A descendant of Pharez the son of Judah (1 Chr. ix. 4).

<sup>a</sup> The LXX. read in 1 K. xvi. 22, καὶ ἀπέθανε Θωάβι; καὶ Ἰωρὰμ ὁ ἀδελφὸς αὐτοῦ ἐν τῷ καιρῷ ἐκείνῳ. Ewald pronounces this an "offenbar fichter Zusatz."

<sup>b</sup> \* The founders of cities have usually given to them their own names, but Omri relinquished that honor and called Samaria after the former owner of the hill. The fact, however, of his having built the city, which the Biblical name suppresses, has been confirmed by an unexpected witness. In the Assyrian inscriptions Samaria is found designated as *Beth Kiumri*, *i. e.* "house" or "palace of Omri." See Layard, *Discoveries in the Ruins of Nineveh and Babylon*, p. 613, and Rawlinson's *Five Monarchies*, ii. 365. Dean Stanley treats of the reign of "the house of Omri" as one of the great epochs of Jewish history (*Lectures on the Jewish Church*, ii. 313-376). B

4. (Ἀμβρί; [Vat. Ἀμβρυρί;] Alex. Ἀμρη.) Son of Michael, and chief of the tribe of Issachar in the reign of David (1 Chr. xxvii. 18).

ON (ὄν; Alex. *Onar*; *Hon*). The son of Peleth, and one of the chiefs of the tribe of Reuben who took part with Korah, Dathan, and Abiram in their revolt against Moses (Num. xvi. 1). His name does not again appear in the narrative of the conspiracy, nor is he alluded to when reference is made to the final catastrophe. Possibly he repented; and indeed there is a Rabbinical tradition to the effect that he was prevailed upon by his wife to withdraw from his accomplices. Abendana's note is, "behold On is not mentioned again, for he was separated from their company after Moses spake with them. And our Rabbis of blessed memory said that his wife saved him." Josephus (*Ant.* iv. 2, § 2) omits the name of On, but retains that of his father in the form Φαλασούς, thus apparently identifying Peleth with Phallu, the son of Reuben. W. A. W.

ON (ὄν; ἴν; ἴν; [see below]: [Jer.] ὄν, [Gen.] Ἡλιούπολις [Alex. Ἰλιούπολις]; *Heliopolis*), a town of lower Egypt, which is mentioned in the Bible under at least two names, BETH-SHEMESH, בֵּית שֶׁמֶשׁ (Jer. xliii. 13), corresponding to the ancient Egyptian sacred name HA-RA, "the abode of the sun," and that above, corresponding to the common name AN, and perhaps also spoken of as Ir-ha-heres, אֵר הַהֵרֶס, or אֵר הַהֵרֶס —, the second part being, in this case, either the Egyptian sacred name, or else the Hebrew אֵר, but we prefer to read "a city of destruction." [IR-HA-HERES.] The two names were known to the translator or translators of Exodus in the LXX. where On is explained to be Heliopolis (ὄν ἡ ἐστὶν Ἡλιούπολις, i. 11); but in Jeremiah this version seems to treat Beth-shemesh as the name of a temple (τοῦς στόλους Ἡλιουπόλεως, τοῦς ἐν ὄν, xliii. 13, LXX. i. 13). The Coptic version gives **W** as the equivalent of the names in the LXX., but whether as an Egyptian word or such a word Hebraicized can scarcely be determined.<sup>c</sup>

The ancient Egyptian common name is written AN, or AN-T, and perhaps ANU; but the essential part of the word is AN, probably no more was pronounced. There were two towns called AN, Heliopolis, distinguished as the northern, AN-MEHEET, and Hermonthis, in Upper Egypt, as the southern, AN-RES (Brugsch, *Geogr. Inschr.*

<sup>c</sup> The latter is perhaps more probable, as the letter we represent by A is not commonly changed into the Coptic **W**, unless indeed one hieroglyphic form of the name should be read ANU, in which case the last vowel might have been transposed, and the first incorporated with it. Brugsch (*Geogr. Inschr.* i. 254) supposes AN and ON to be the same, "as the Egyptian A often had a sound intermediate between a and o." But this does not admit of the change of the a vowel to the long vowel o, from which it was as distinct as from the other long vowel EE, respectively like **h** and **z**, **l** and **l**

254, 255, Nos. 1217 a, b, 1218, 870. 1225). As to the meaning, we can say nothing certain. Cyril, who, as bishop of Alexandria, should be listened to on such a question, says that On signified the sun ("Ὀν δὲ ἐστὶ κατ' αὐτοῦ δ ἥλιος, *ad Hos.* p. 145), and the Coptic **ⲠⲚⲚⲚ** (M), **ⲠⲚⲚ**, **ⲠⲚⲚ** (S), "light," has therefore been compared (see La Croze, *Lex.* pp. 71, 189), but the hieroglyphic form is UBEN, "shining," which has no connection with AN.

Heliopolis was situate on the east side of the Pelusiac branch of the Nile, just below the point of the Delta, and about twenty miles northeast of Memphis. It was before the Roman time the capital of the Heliopolite Nome, which was included in Lower Egypt. Now, its site is above the point of the Delta, which is the junction of the Phatnetic, or Damietta branch and the Bolbitine, or Rosetta, and about ten miles to the northeast of Cairo. The oldest monument of the town is the obelisk, which

was set up late in the reign of Sesertesen I., head of the 12th dynasty, dating B. C. cir. 2050. According to Manetho, the bull Mnevis was first worshipped here in the reign of Kaiechôs, second king of the 2d dynasty (B. C. 2400). In the earliest times it must have been subject to the 1st dynasty so long as their sole rule lasted, which was perhaps for no more than the reigns of Menes (B. C. cir. 2717) and Athothis: it doubtless next came under the government of the Memphites, of the 3d (B. C. cir. 2640), 4th, and 6th dynasties: it then passed into the hands of the Diospolites of the 12th dynasty, and the Shepherds of the 15th; but whether the former or the latter held it first, or it was contested between them, we cannot as yet determine. During the long period of anarchy that followed the rule of the 12th dynasty, when Lower Egypt was subject to the Shepherd kings, Heliopolis must have been under the government of the strangers. With the accession of the 18th dynasty, it was probably recovered by the Egypt

Plain and Obelisk of Heliopolis.

tians, during the war which Aâhmes, or Amosis, head of that line, waged with the Shepherds, and thenceforward held by them, though perhaps more than once occupied by invaders (comp. Chabas, *Papyrus Magique Harris*), before the Assyrians conquered Egypt. Its position, near the eastern frontier, must have made it always a post of special importance. [NO-AMON.]

The chief object of worship at Heliopolis was the sun, under the forms RA, the sun simply, hence the sacred name of the place, HA-RA, "the abode of the sun," and ATUM, the setting sun, or sun of the nether world. Probably its chief temple was dedicated to both. SHU, the son of Atum, and TAFNET, his daughter, were also here worshipped, as well as the bull Mnevis, sacred to RA, Osiris, Isis, and the Phoenix, BENNU, probably represented by a living bird of the crane kind. (On the mythology see Brugsch, p. 254 ff.) The temple of the sun, described by Strabo (xvii. p. 8 f. 5, 806), is now only represented by the single

beautiful obelisk, which is of red granite, 68 feet 2 inches high above the pedestal, and bears a dedication, showing that it was sculptured in or after his 30th year (cir. 2050) by Sesertesen I., first king of the 12th dynasty (B. C. cir. 2080-2045). There were probably far more than a usual number of obelisks before the gates of this temple, on the evidence of ancient writers, and the inscriptions of some yet remaining elsewhere, and no doubt the reason was that these monuments were sacred to the sun. Heliopolis was anciently famous for its learning, and Eudoxus and Plato studied under its priests; but, from the extent of the mounds, it seems to have been always a small town.

The first mention of this place in the Bible is in the history of Joseph, to whom we read Pharaoh gave "to wife Asenath the daughter of Poti-pherah, priest of On" (Gen. xli. 45, comp. ver. 50, and xlii. 20). Joseph was probably governor of Egypt under a king of the 15th dynasty, of which Memphis was, at least for a time, the capital. In this case his

would doubtless have lived for part of the year at Memphis, and therefore near to Heliopolis. The name of Asenath's father was appropriate to a Heliopolite, and especially to a priest of that place (though according to some he may have been a prince), for it means "Belonging to Ra," or "the sun." The name of Joseph's master Potiphar is the same, but with a slight difference in the Hebrew orthography. According to the LXX. version, On was one of the cities built for Pharaoh by the oppressed Israelites, for it mentions three "strong cities" instead of the two "treasure cities" of the Heb., adding On to Pithom and Raamses (Καὶ ἀποδόμισαν πόλεις ὄχυράς τῷ Φαραῶ, τὴν τε Πειθᾶ, καὶ Ῥαμσῶ, καὶ Ὀν, ἥ ἐστὶν Ἡλιούπολις, Ex. i. 11). If it be intended that these cities were founded by the labor of the people, the addition is probably a mistake, although Heliopolis may have been ruined and rebuilt; but it is possible that they were merely fortified, probably as places for keeping stores. Heliopolis lay at no great distance from the land of Goshen and from Raamses, and probably Pithom also.

Isaiah has been supposed to speak of On when he prophesies that one of the five cities in Egypt that should speak the language of Canaan, should be called Ir-ha-heres, which may mean the City of the Sun, whether we take "heres" to be a Hebrew or an Egyptian word; but the reading "a city of destruction" seems preferable, and we have no evidence that there was any large Jewish settlement at Heliopolis, although there may have been at one time from its nearness to the town of Onias. [IR-HA-HERES; ONIAS.] Jeremiah speaks of On under the name Beth-shemesh, "the house of the sun," where he predicts of Nebuchadnezzar, "He shall

break also the pillars [? מַצְבֵּוֹת, but, perhaps, statues, comp. IDOL, ii. 1119] of Beth-shemesh, that [is] in the land of Egypt; and the houses of the gods of the Egyptians shall be burnt with fire" (xliii. 13). By the word we have rendered "pillars," obelisks are reasonably supposed to be meant, for the number of which before the temple of the sun Heliopolis must have been famous, and perhaps by "the houses of the gods," the temples of this place are intended, as their being burnt would be a proof of the powerlessness of Ra and Atum, both forms of the sun, Shu the god of light, and Tafnet a fire-goddess, to save their dwellings from the very element over which they were supposed to rule. Perhaps it was on account of the many false gods of Heliopolis, that in Ezekiel, On is written Aven, by a change in the punctuation, if we can here depend on the Masoretic text, and so made to signify "vanity," and especially the vanity of idolatry. The prophet foretells, "The young men of Aven and of Pi-beseth shall fall by the sword: and these [cities] shall go into captivity" (xxx. 17). Pi-beseth or Bubastis is doubtless spoken of with Heliopolis as in the same part of Egypt, and so to be involved in a common calamity at the same time when the land should be invaded.

After the age of the prophets we hear no more in Scripture of Heliopolis. Local tradition however, points it out as a place where our Lord and the Virgin came, when Joseph brought them into Egypt, and a very ancient sycamore is shown as a tree beneath which they rested. The Jewish settlements in this part of Egypt, and especially the town of Onias, which was probably only twelve

miles distant from Heliopolis in a northerly direction, but a little to the eastward (*Modern Egypt and Thebes*, i. 297, 298), then flourished, and were nearer to Palestine than the heathen towns like Alexandria, in which there was any large Jewish population, so that there is much probability in this tradition. And, perhaps, Heliopolis itself may have had a Jewish quarter, although we do not know it to have been the Ir-ha-heres of Isaiah.

R. S. P.

ONAM (אָנָם) [*strong, vigorous*]: Ὀνάμ, Ὀνάμ; Alex. Ὀμαν, Ὀναν: Onam). 1. One of the sons of Shobal the son of Seir (Gen. xxxvi. 23; 1 Chr. i. 40). Some Hebrew MSS. read "Onan." 2. (Ὀζύμ; Alex. Ουνομία.) The son of Jerahmeel by his wife Atarah (1 Chr. ii. 26, 28).

ONAN (אָנָן) [*strong, vigorous*]: Ἀνάμ: Onan). The second son of Judah by the Canaanitess, "the daughter of Shua" (Gen. xxxviii. 4; 1 Chr. ii. 3). On the death of Er the first-born, it was the duty of Onan, according to the custom which then existed and was afterwards established by a definite law (Deut. xxv. 5-10), continuing to the latest period of Jewish history (Mark xii. 19), to marry his brother's widow and perpetuate his race. But he found means to prevent the consequences of marriage, "and what he did was evil in the eyes of Jehovah, and He slew him also," as He had slain his elder brother (Gen. xxxviii. 9). His death took place before the family of Jacob went down into Egypt (Gen. xli. 12; Num. xxvi. 19).

W. A. W.

ONESIMUS (Ὀνήσιμος [*profitable or useful*]: Onesimus) is the name of the servant or slave in whose behalf Paul wrote the Epistle to Philemon. He was a native, or certainly an inhabitant of Colossæ, since Paul in writing to the church there speaks of him (Col. iv. 9) as ὅς ἐστιν ἐξ ὑμῶν, "one of you." This expression confirms the presumption which his Greek name affords, that he was a Gentile, and not a Jew, as some have argued from μάλιστα ἐμοί in Phil. 16. Slaves were numerous in Phrygia, and the name itself of Phrygian was almost synonymous with that of slave. Hence it happened that in writing to the Colossians (iii. 22-iv. 1) Paul had occasion to instruct them concerning the duties of masters and servants to each other. Onesimus was one of this unfortunate class of persons, as is evident both from the manifest implication in οὐκέτι ὡς δούλον in Phil. 16, and from the general tenor of the epistle. There appears to have been no difference of opinion on this point among the ancient commentators, and there is none of any critical weight among the modern. The man escaped from his master and fled to Rome, where in the midst of its vast population he could hope to be concealed, and to baffle the efforts which were so often made in such cases for retaking the fugitive. (Walter, *Die Geschichte des Röm. Rechts*, ii. 62 f.) It must have been to Rome that he directed his way, and not to Casarea, as some contend; for the latter view stands connected with an indelible opinion respecting the place whence the letter was written (see Neander's *Pflanzung*, ii. 506). Whether Onesimus had any other motive for the flight than the natural love of liberty we have not the means of deciding. It has been very generally supposed that he had committed some offense, as theft or embezzlement, and feared the punishment of his guilt. But as the ground of that opinion

we must know the meaning of ἠδίκησε in Phil. 18, which is uncertain, not to say inconsistent with any such imputation (see notes in the *Epistle to Philemon*, by the American Bible Union, p. 60).<sup>a</sup> Commentators at all events go entirely beyond the evidence when they assert (as Conybeare, *Life and Epistles of Paul*, ii. 467) that he belonged to the dregs of society, that he robbed his master, and confessed the sin to Paul. Though it may be doubted whether Onesimus heard the Gospel for the first time at Rome, it is beyond question that he was led to embrace the Gospel there through the Apostle's instrumentality. The language in ver. 10 of the letter (ὅτι ἐγέννησα ἐν τοῖς δεσμοῖς μου) is explicit on this point. As there were believers in Phrygia when the Apostle passed through that region on his third missionary tour (Acts xviii. 23), and as Onesimus belonged to a Christian household (Phil. 2), it is not improbable that he knew something of the Christian doctrine before he went to Rome. How long a time elapsed between his escape and conversion, we cannot decide; for πρὸς ἄραν in the 15th verse, to which appeal has been made, is purely a relative expression, and will not justify any inference as to the interval in question.

After his conversion, the most happy and friendly relations sprung up between the teacher and the disciple. The situation of the Apostle as a captive and an indefatigable laborer for the promotion of the Gospel (Acts xxviii. 30, 31) must have made him keenly alive to the sympathies of Christian friendship<sup>b</sup> and dependent upon others for various services of a personal nature, important to his efficiency as a minister of the word. Onesimus appears to have supplied this twofold want in an eminent degree. We see from the letter that he won entirely the Apostle's heart, and made himself so useful to him in various private ways, or evinced such a capacity to be so (for he may have gone back to Colossæ soon after his conversion), that Paul wished to have him remain constantly with him. Whether he desired his presence as a personal attendant or as a minister of the Gospel, is not certain from ἵνα διακομῆ μοι in ver. 13 of the epistle. Be this as it may, Paul's attachment to him as a disciple, as a personal friend, and as a helper to him in his bonds, was such that he yielded him up only in obedience to that spirit of self-denial, and that sensitive regard for the feelings or the rights of others, of which his conduct on this occasion displayed so noble an example.

There is but little to add to this account, when we pass beyond the limits of the New Testament. The traditionary notices which have come down to us, are too few and too late to amount to much as historical testimony. Some of the later fathers assert that Onesimus was set free, and was subsequently ordained Bishop of Berea in Macedonia (*Constit. Apost.* vii. 46). The person of the same

name mentioned as Bishop of Ephesus in the first epistle to Ignatius to the Ephesians (Hefele, *Patrum Apost. Opp.*, p. 152) was a different person (see Winer, *Realw.* ii. 175). It is related also that Onesimus finally made his way to Rome again, and ended his days there as a martyr during the persecution under Nero.

H. B. H.

ONESIPHORUS (Ὀνησίφορος [*bringer of profit*]) is named twice only in the N. T., namely, 2 Tim. i. 16-18, and iv. 19. In the former passage Paul mentions him in terms of grateful love, as having a noble courage and generosity in his behalf, amid his trials as a prisoner at Rome, when others from whom he expected better things had deserted him (2 Tim. iv. 16); and in the latter passage he singles out "the household of Onesiphorus" as worthy of a special greeting. It has been made a question whether this friend of the Apostle was still living when the letter to Timothy was written, because in both instances Paul speaks of "the household" (in 2 Tim. i. 16, δφῆ ἔλεος δὲ κύριος τῷ Ὀνησίφδρου οἴκῳ), and not separately of Onesiphorus himself. If we infer that he was not living, then we have in 2 Tim. i. 18, almost an instance of the apostolic sanction of the practice of praying for the dead. But the probability is that other members of the family were also active Christians; and as Paul wished to remember them at the same time, he grouped them together under the comprehensive τὸν Ὀν. οἶκον (2 Tim. iv. 19), and thus delicately recognized the common merit, as a sort of family distinction. The mention of Stephanus in 1 Cor. xvi. 17, shows that we need not exclude him from the Στεφανῶ οἶκον in 1 Cor. i. 16. It is evident from 2 Tim. i. 18 (ὅσα ἐν Ἐφέσῳ διεκόνησε), that Onesiphorus had his home at Ephesus; though if we restrict the salutation near the close of the epistle (iv. 18) to his family, he himself may possibly have been with Paul at Rome when the latter wrote to Timothy. Nothing authentic is known of him beyond these notices. According to a tradition in Fabricius (*Luz Evang.* p. 117), quoted by Winer (*Realw.* ii. 175), he became bishop of Corone in Messenia.

H. B. H.

ONIARES (Ὀνιαρῆς [Alex. -νει-]), a name introduced into the Greek and Syriac texts of 1 Macc. xii. 19 by a very old corruption. The true reading is preserved in Josephus (*Ant.* xii. 4, § 10) and the Vulgate, (Ὀνία Ἀρείου, *Oniaz Arius*), and is given in the margin of the A. V.

ONIAS (Ὀνίας; *Onias*), the name of five high-priests, of whom only two (1 and 3) are mentioned in the A. V., but an account of all is here given to prevent confusion. 1. [Vat.<sup>1</sup> Sin. *Ionias*.] The son and successor of Jaddua, who entered on the office about the time of the death of Alexander the Great, cir. B. C. 330-309, or, according to Eusebius, 300 (*Joseph. Ant.* xi. 7, § 7). According to

embezzlement or theft, as many writers assume, we do not know. From this passage we by no means discover this; and, indeed, it is hardly probable that, if the Apostle had known or conjectured any such thing, he would have expressed himself in so half-sportive a manner as he has done." H.

b \* This trait of Paul's character, which made the personal sympathy of others so important to him, Dr. Houson has illustrated with great beauty and effect in his *Lectures on the Character of St. Paul* (pp. 58-61).

<sup>a</sup> \* This milder view of the conduct of Onesimus has been generally overlooked or denied by interpreters. We are glad to be able to adduce for it so eminent a name as that of Dr. Bleek in his more recently published *Vorlesungen üb. die Briefe an die Kolosser, den Philemon*, etc. (Berl. 1865). His words are (p. 136 f.): "The clandestine escape of Onesimus might itself be regarded as a wrong against his master; and so also the loss of personal service which he had failed to render in his absence might be viewed as a debt which he had incurred. Whether it was known to the Apostle that he had committed some other offense, especially

Josephus he was father of Simon the Just (Joseph. *Ant.* xii. 2, § 4; *Eccles.* i. 1). [ECCLESIASTICUS, vol. i. p. 651 a; SIMON.]

2. The son of Simon the Just (Joseph. *Ant.* xii. 4, § 1). He was a minor at the time of his father's death (cir. B. C. 290), and the high-priesthood was occupied in succession by his uncles Eleazar and Manasseh to his exclusion. He entered on the office at last cir. B. C. 240, and his conduct threatened to precipitate the rupture with Egypt, which afterwards opened the way for Syrian oppression. Onias, from avarice, it is said — a vice which was likely to be increased by his long exclusion from power — neglected for several years to remit to Ptol. Euergetes the customary annual tribute of 20 talents. The king claimed the arrears with threats of violence in case his demands were not satisfied. Onias still refused to discharge the debt, more, as it appears, from self-will than with any prospect of successful resistance. The evil consequences of this obstinacy were, however, averted by the policy of his nephew Joseph, the son of Tobias, who visited Ptolemy, urged the imbecility of Onias, won the favor of the king, and entered into a contract for farming the tribute, which he carried out with success. Onias retained the high-priesthood till his death cir. B. C. 226, when he was succeeded by his son Simon II. (Joseph. *Ant.* xii. 4).

3. The son of Simon II., who succeeded his father in the high-priesthood, cir. B. C. 198. In the interval which had elapsed since the government of his grandfather the Jews had transferred their allegiance to the Syrian monarchy (Dan. xi. 14), and for a time enjoyed tranquil prosperity. Internal dissensions furnished an occasion for the first act of oppression. Seleucus Philopator was informed by Simon, governor of the Temple, of the riches contained in the sacred treasury, and he made an attempt to seize them by force. At the prayer of Onias, according to the tradition (2 Macc. iii.), the sacrilege was averted; but the high-priest was obliged to appeal to the king himself for support against the machinations of Simon. Not long afterwards Seleucus died (B. C. 175), and Onias found himself supplanted in the favor of Antiochus Epiphanes by his brother Jason, who received the high-priesthood from the king. Jason, in turn, was displaced by his youngest brother Menelaus, who procured the murder of Onias (cir. B. C. 171), in anger at the reproach which he had received from him for his sacrilege (2 Macc. iv. 32–38). But though his righteous zeal was thus fervent, the punishment which Antiochus inflicted on his murderer was a tribute to his “sober and modest behavior” (2 Macc. iv. 37) after his deposition from his office. [ANDRONICUS, vol. i. p. 94.]

It was probably during the government of Onias III. that the communication between the Spartans and Jews took place (1 Macc. xii. 19–23; Joseph. *Ant.* xii. 4, § 10). [SPARTANS.] How powerful an impression he made upon his contemporaries is seen from the remarkable account of the dream of Judas Maccabeus before his great victory (2 Macc. xv. 12–16).

4. The youngest brother of Onias III., who bore the same name, which he afterwards exchanged for Menelaus (Joseph. *Ant.* xii. 5, § 1). [MENELAUS.]

5. The son of Onias III., who sought a refuge in Egypt from the sedition and sacrilege which disgraced Jerusalem. The immediate occasion of his flight was the triumph of “the sons of Tobias,” gained by the interference of Antiochus Epiphanes.

Onias, to whom the high-priesthood belonged by right, appears to have supported throughout the alliance with Egypt (Joseph. *B. J.* i. 1, § 1), and receiving the protection of Ptol. Philometor, he endeavored to give a unity to the Hellenistic Jews which seemed impossible for the Jews in Palestine. With this object he founded the Temple at Leontopolis [ON], which occupies a position in the history of the development of Judaism of which the importance is commonly overlooked: but the discussion of this attempt to consolidate Hellenism belongs to another place, though the connection of the attempt itself with Jewish history could not be wholly overlooked (Joseph. *Ant.* xiii. 3; *B. J.* i. 1, § 1, vii. 10, § 2; Ewald, *Gesch.* iv. 405 ff.; Herzfeld, *Gesch.* ii. 460 ff., 557 ff.). B. F. W.

THE CITY OF ONIAS, THE REGION OF ONIAS the city in which stood the temple built by Onias and the region of the Jewish settlements in Egypt Ptolemy mentions the city as the capital of the Heliopolite nome: ‘Ἡλιοπολίτης νομός, καὶ μητροπόλις Ὀνίου (iv. 5, § 53); where the reading ‘Ἡλίου is not admissible, since Heliopolis is afterwards mentioned, and its different position distinctly laid down (§ 54). Josephus speaks of “the region of Onias,” Ὀνίου χώρα (*Ant.* xiv. 8, § 1; *B. J.* i. 9, § 4; comp. vii. 10, § 2), and mentions a place there situated called “the Camp of the Jews,” Ἰουδαίων στρατόπεδον (*Ant.* xiv. 8, § 2; *B. J.* i. c.). In the spurious letters given by him in the account of the foundation of the temple of Onias, it is made to have been at Leontopolis in the Heliopolite nome, and called a strong place of Bubastis (*Ant.* xiii. 3, §§ 1, 2); and when speaking of its closing by the Romans, he says that it was in a region 180 stadia from Memphis, in the Heliopolite nome, where Onias had founded a castle (lit. watch-post, φρούριον, *B. J.* vii. 10, §§ 2, 3, 4). Leontopolis was not in the Heliopolite nome, but in Ptolemy's time was the capital of the Leontopolite (iv. 5, § 51), and the mention of it is altogether a blunder. There is probably also a confusion as to the city Bubastis; unless, indeed, the temple which Onias adopted and restored were one of the Egyptian goddess of that name.

The site of the city of Onias is to be looked for in some one of those to the northward of Heliopolis which are called *Tel el-Yahood*, “the Mound of the Jews,” or *Tel el-Yahooddeeyeh*, “the Jewish Mound.” Sir Gardner Wilkinson thinks that there is little doubt that it is one which stands in the cultivated land near Shibbeen, to the northward of Heliopolis, in a direction a little to the east, at a distance of twelve miles. “Its mounds are of very great height.” He remarks that the distance from Memphis (29 miles) is greater than that given by Josephus; but the inaccuracy is not extreme. Another mound of the same name, standing on the edge of the desert, a short distance to the south of Belbays, and 24 miles from Heliopolis, would, he thinks, correspond to the *Vicus Judæorum* of the *Itinerary of Antoninus*. (See *Modern Egypt and Thebes*, i. 297–300.)

During the writer's residence in Egypt, 1842–1849, excavations were made in the mound supposed by Sir Gardner Wilkinson to mark the site of the city of Onias. We believe, writing only from memory, that no result was obtained but the discovery of portions of pavement very much resembling the Assyrian pavements now in the British Museum.

From the account of Josephus, and the same

given to one of them, "the Camp of the Jews," these settlements appear to have been of a half-military nature. The chief of them seems to have been a strong place; and the same is apparently the case with another, that just mentioned, from the circumstances of the history even more than from its name. This name, though recalling the "Camp" where Psammetichus I. established his Greek mercenaries [ΜΙΓΔΟΙ], does not prove it was a military settlement, as the "Camp of the Tyrians" in Memphis (Her. ii. 112) was perhaps in its name a reminiscence of the Shepherd occupation, for there stood there a temple of "the Foreign Venus," of which the age seems to be shown by a tablet of Amenoph II. (B. C. cir. 1400) in the quarries opposite the city in which Ash-toreth is worshipped, or else it may have been a merchant-settlement. We may also compare the Coptic name of El-Gezeh, opposite Cairo, Γνερσιος, which has been ingeniously conjectured to record the position of a Persian camp. The easternmost part of Lower Egypt, be it remembered, was always chosen for great military settlements, in order to protect the country from the incursions of her enemies beyond that frontier. Here the first Shepherd king Salatis placed an enormous garrison in the stronghold Avaris, the Zoan of the Bible (Manetho, ap. Jos. c. Ap. i. 14). Here foreign mercenaries of the Saitte kings of the 26th dynasty were settled; where also the greatest body of the Egyptian soldiers had the lands allotted to them, all being established in the Delta (Her. ii. 164-166). Probably the Jewish settlements were established for the same purpose, more especially as the hatred of their inhabitants towards the kings of Syria would promise their opposing the strongest resistance in case of an invasion.

The history of the Jewish cities of Egypt is a very obscure portion of that of the Hebrew nation. We know little more than the story of the foundation and overthrow of one of them, though we may infer that they were populous and politically important. It seems at first sight remarkable that we have no trace of any literature of these settlements; but as it would have been preserved to us by either the Jews of Palestine or those of Alexandria, both of whom must have looked upon the worshippers at the temple of Onias as schismatics, it could scarcely have been expected to have come down to us.

R. S. P.

**ONIONS** (בצילין, *betsālin*: τὰ κρόμμυα: *krape*). There is no doubt as to the meaning of the Hebrew word, which occurs only in Num. xi. 5, as one of the good things of Egypt of which the Israelites regretted the loss. Onions have been from time immemorial a favorite article of food amongst the Egyptians. (See Her. ii. 125; Plin. xxxv. 12.) The onions of Egypt are much milder in flavor and less pungent than those of this country. Hasselquist (*Trav.* p. 290) says, "Whoever has tasted onions in Egypt must allow that none can be had better in any other part in the universe: here they are sweet; in other countries

they are nauseous and strong. . . . They eat them roasted, cut into four pieces, with some bits of roasted meat which the Turks in Egypt call *kebab*; and with this dish they are so delighted that I have heard them wish they might enjoy it in Paradise. They likewise make a soup of them."

W. II.

\* The Israelites might have spared their murmurings, in regard to the loss of Egyptian onions, as the onions of Palestine have the same sweet and delicious flavor that characterizes those of Egypt. They are still called **بصل** (*bust*) by the Arabs. They enter into almost every process of cookery in Palestine and Syria. G. E. P.

**ONO** (אֹנוֹ), and once אֹנוֹר [*strong*]: in Clz. [Ἄνωρ,] Alex. [Ἄνω]; elsewhere [Vat. Alex.] Ἄνωρ, and Ἄνω: *Ono*). One of the towns of Benjamin. It does not appear in the catalogues of the Book of Joshua, but is first found in 1 Chr. viii. 12, where Shamed or Shamer is said to have built Ono and Lod with their "daughter villages." It was therefore probably annexed by the Benjamites subsequently to their original settlement,<sup>b</sup> like Aijalon, which was allotted to Dan, but is found afterwards in the hands of the Benjamites (1 Chr. viii. 13). The men of Lod, Hadid, and Ono, to the number of 725 (or Neh. 721) returned from the Captivity with Zerubbabel (Ezr. ii. 33; Neh. vii. 37; see also 1 Esdr. v. 22). [ONUS.]

A plain was attached to the town, and bore its name — *Bikath-Ono*, "the plain of Ono" (Neh. vi. 2), perhaps identical with the "valley of craftsmen" (Neh. xi. 35). By Eusebius and Jerome it is not named. The Rabbis frequently mention it, but without any indication of its position further than that it was three miles from Lod. (See the citations from the Talmud in Lightfoot, *Chor. Decad on S. Mark*, ch. ix. § 3.) A village called *Kefr 'Ana* is enumerated by Robinson among the places in the districts of *Ramleh* and *Lydd* (*Bibl. Res.* 1st ed. App. 120, 121). This village, almost due N. of *Lydd*, is suggested by Van de Velde (*Memoir*, p. 337) as identical with Ono. Against the identification however are, the difference in the names — the modern one containing the *Ain*, — and the distance from *Lydda*, which instead of being 3 milliaria is fully 5, being more than 4 English miles according to Van de Velde's map. Winer remarks that *Beit Unia* is more suitable as far as its orthography is concerned; but on the other hand *Beit Unia* is much too far distant from *Ludd* to meet the requirements of the passages quoted above. G.

**ONUS** (ὄνωϋς: om. in Vulg.). The form in which the name **ONO** appears in 1 Esdr. v. 22.

**ONYCHA** (שֹׁחַלִּית, *shecheleth*: ὄνυξι: *onyx*; according to many of the old versions denotes the operculum of some species of *Strombus*, a genus of gasteropodous Mollusca. The Hebrew word, which appears to be derived from a root which means "to shell or peel off," occurs only in Ex. xxx. 34, as one of the ingredients of the sacred perfume; in

<sup>a</sup> In Neh. vi. 2 the Vat. MS., according to Mai, reads *εν πεδίο εν φ*. . .

<sup>b</sup> The tradition of the Talmudists is that it was left intact by Joshua, but burnt during the war of Gibeah (Judg. xx. 43), and that 1 Chr. viii. 12 describes its restoration (See Targum on this latter passage)

<sup>c</sup> שחל, an unused root, i. q. שחל; whence probably our word "shell," "scale." (See Gesenius s. v.)

Eccles. xxiv. 15, Wisdom is compared to the pleasant odor yielded by "galbanum, onyx, and sweet storax." There can be little doubt that the *ὄνυξ* of Dioscorides (ii. 10), and the *onyx* of Pliny (xxxii.) 10, are identical with the operculum of a *Strombus*, perhaps *S. lentiginosus*. There is frequent mention of the *onyx* in the writings of Arabian authors, and it would appear from them that the operculum of several kinds of *strombus* were prized as perfumes. The following is Dioscorides' description of the *ὄνυξ*: "The onyx is the operculum of a shell-fish resembling the *purpura*, which is found in India in the nard-producing lakes; it is odorous, because the shell-fish feed on the nard, and is collected after the heat has dried up the marshes: that is the best kind which comes from the Red Sea, and is whitish and shining; the Babylonian kind is dark and smaller than the other; both have a sweet odor when burnt, something like castoreum." It is not easy to see what Dioscorides can mean by "nard-producing lakes." The *ὄνυξ*, "nail," or "claw," seems to point to the operculum of the *Strombidae*, which is of a claw shape and serrated, whence the Arabs call the mol-

A. *Strombus Dianz*.

B. The Operculum.

lusk "the devil's claw;" the *Unguis odoratus*, or *Blatta byzantina*, — for under both these terms apparently the devil claw (*Teufelskluu* of the Germans, see Winer, *Realw.* s. v.) is alluded to in old English writers on *Materia Medica* — has by some been supposed no longer to exist. Dr. Lister laments its loss, believing it to have been a good medicine "from its strong aromatic smell." Dr. Gray of the British Museum, who has favored us with some remarks on this subject, says that the opercula of the different kinds of *Strombidae* agree with the figures of *Blatta byzantina* and *Unguis*

<sup>a</sup> Since the above was written, we have been favored with a communication from Mr. Daniel Hanbury, on the subject of the *Blatta byzantina* of old Pharmacological writers, as well as with specimens of the substance itself, which it appears is still found in the oazars of the East, though not now in much demand. Mr. Hanbury procured some specimens in Damascus in October (1860), and a friend of his bought some in Alexandria a few months previously. The article appears to be always mixed with the opercula of some species of *Fusus*. As regards the perfume ascribed to this substance, it does not appear to us, from specimen we burnt, to deserve the character of the excellent odor which has been ascribed to it, though it is not without an aromatic scent. See a figure of the true *B. byzant.* in Matthiolus' *Comment. in Dioscor.* (ii. 8), where there is a long discussion on the subject; also a figure of *Blatta byzantina* and the

*odoratus* in the old books; with regard to the odor he writes, — "The horny opercula when burnt al emit an odor which some may call sweet according to their fancy." Bochart (*Hieroz.* iii. 797) believes some kind of bdellium is intended; but there can be no doubt that the *ὄνυξ* of the LXX. denotes the operculum of some one or more species of *strombus*. For further information on this subject see Rumph (*Amboinische Raritäten-Kammer*, cap. xvii. p. 48, the German ed. Vienna, 1766), and compare also Sprengel (*Comment. ad Dioscor.* ii. 10); Forskål (*Desc. Anim.* 143, 21, "*Unguis odoratus*"); *Philos. Transac.* (xvii. 641); Johnston (*Introduc. to Conchol.* p. 77); and Gesenius (*Thes.* s. v. *אֲוֹנִיט*). W. H.

ONYX (אֲוֹנִיט, *shôham*: δ λίθος ὁ πρᾶσις, *σμάραγδος, σάρδιος, σάπφειρος, θηρύλλιον, ὄνυξ*; Aq. *σαρδόνυξ*; Symm. and Theod. *ὄνυξ* and *ὄνυξ: onychinus (lapis), sardonychus, onyx*). The A. V. uniformly renders the Hebrew *shôham* by "onyx;" the Vulgate too is consistent with itself, the *sardonyx* (Job xxviii. 16) being merely a variety of the *onyx*; but the testimonies of ancient interpreters generally are, as Gesenius has remarked, diverse and ambiguous. The *shôham* stone is mentioned (Gen. ii. 12) as a product of the land of Havilah. Two of these stones, upon which were engraven the names of the children of Israel, six on either stone, adorned the shoulders of the high-priest's ephod (Ex. xxviii. 9-12), and were to be worn as "stones of memorial" (see Kalisch on Ex. l. c.). A *shôham* was also the second stone in the fourth row of the sacerdotal breastplate (Ex. xxviii. 20). *Shôham* stones were collected by David for adorning the Temple (1 Chr. xxix. 2). In Job xxviii. 16, it is said that wisdom "cannot be valued with the gold of Ophir, with the <sup>b</sup> precious *shôham* or the sapphire." The *shôham* is mentioned as one of the treasures of the king of Tyre (Ez. xxviii. 13). There is nothing in the contexts of the several passages where the Hebrew term occurs to help us to determine its signification. Braun (*De Vest. sac. Heb.* p. 727) has endeavored to show that the *sardonyx* is the stone indicated, and his remarks are well worthy of careful perusal. Josephus (*Ant.* iii. 7, § 5, and *B. J.* v. 5, § 7) expressly states that the shoulder-stones of the high-priest were formed of two large sardonyses, an onyx being, in his description, the second stone in the fourth row of the breastplate. Some writers believe that the "beryl" is intended, and the authority of the LXX. and other versions has been adduced in proof of this interpretation; but a

operculum of *Fusus* in Pomet's *Histoire des Drogues*, 1694, part 2, p. 97. "Mansfield Parkyns," writes Mr. Hanbury, "in his *Life in Abyssinia* (vol. i. p. 419), mentions among the exports from Massowah, a certain article called *Doofu*, which he states is the operculum of a shell, and that it is used in Nubia as a perfume, being burnt with sandal-wood. This bit of information is quite confirmatory of Forskål's statement concerning the *Dofr el afit* — (Is not Parkyns's 'Doofu' meant for *dofr*, ذفر?) — namely, 'e Mochha per

Sués. Arabes etiam afferunt. *Nigritis fumigatorium* est."

<sup>b</sup> The Rev. C. W. King writes to us that "A large perfect sardonyx is still precious. A dealer tells me he saw this summer (1861) in Paris one valued at £1,000, not engraved."

place at the head of this article will show that the LXX. is most inconsistent, and that nothing can, in consequence, be learnt from it. Of those who identify the *shōham* with the beryl are Bellermann (*Die Urim und Thummim*, p. 64), Winer (*Bib. Realwörter*, i. 333), and Rosenmüller (*The Mineralogy of the Bible*, p. 40, *Bib. Cab.*). Other interpretations of *shōham* have been proposed, but all are mere conjectures. Braun traces *shōham* to the Arabic *sacham*, "blackness": "Of such a color," says he, "are the Arabian sardonyxes, which have a black ground-color." This agrees essentially with Mr. King's remarks (*Antique Gems*, p. 9): "The Arabian species," he says, "were formed of black or blue strata, covered by one of opaque white; over which again was a third of a vernilion color." But Gesenius and Fürst refer the Hebrew word to the Arabic *saham*, "to be pale." The different kinds of onyx and sardonyx,<sup>a</sup> however, are so variable in color, that either of these definitions is suitable. They all form excellent materials for the engraver's art. The balance of authority is, we think, in favor of some variety of the onyx. We are content to retain the rendering of the A. V., supported as it is by the Vulgate and the express statement of so high an authority as Josephus,<sup>b</sup> till better proofs in support of the claims of some other stone be forthcoming. As to the "Onyx" of *Eclus. xxiv. 15*, see ONYCHIA.

## W. II.

OPHEL (פֶּלֶא, always with the def. article [*swelling, hill*]: 'Οπέλα, δ' Ὠφέλα, [Ὀφλά: Vat. Ὀπλα, Ὠφαλα, Ὀφοαλα;] Alex. ο Ὀφλα, [Ἐφαλα, Σοφλα:] *Ophel*). A part of ancient Jerusalem. The name is derived by the lexicographers from a root of similar sound, which has the force of a swelling or tumor (Gesenius, *Thes.*; Fürst, *Hdw.* ii. 169 b). It does not come forward till a late period of Old Test. history. In 2 Chr. xxvii. 3, Jotham is said to have built much "on the wall of Ophel." Manasseh, amongst his other defensive works, "compassed about Ophel" (*Ibid.* xxxiii. 14). From the catalogue of Nehemiah's repairs to the wall of Jerusalem, it appears to have been near the "water-gate" (*Neh. iii. 26*) and the "great tower that lieth out" (*ver. 27*). Lastly, the former of these two passages, and *Neh. xi. 21*, show that Ophel was the residence of the Levites. It is not again mentioned, though its omission in the account of the route round the walls at the sanctification of the second Temple, *Neh. xii. 31-40*, is singular.

In the passages of his history parallel to those quoted above, Josephus either passes it over altogether, or else refers to it in merely general terms — "very large towers" (*Ant. ix. 11, § 2*), "very high towers" (*x. 3, § 2*). But in his ac-

count of the last days of Jerusalem he mentions it four times as Ophla (δ' Ὀφλά, accompanying it as in the Hebrew with the article). The first of these (*B. J. ii. 17, § 9*) tells nothing as to its position; but from the other three we can gather something. (1.) The old wall of Jerusalem ran above the spring of Siloam and the pool of Solomon, and on reaching the place called Ophla, joined the eastern porch of the Temple (*B. J. v. 4, § 2*). (2.) "John held the Temple and the places round it, not a little in extent, — both the Ophla and the valley called Kedron" (*Ibid. v. 6, § 1*). (3.) After the capture of the Temple, and before Titus had taken the upper city (the modern Zion) from the Jews, his soldiers burnt the whole of the lower city, lying in the valley between the two, "and the place called the Ophla" (*Ibid. vi. 6, § 3*).

From this it appears that Ophel was outside the south wall of the Temple, and that it lay between the central valley of the city, which debouches above the spring of Siloam, on the one hand, and the east portico of the Temple on the other. The east portico, it should be remembered, was not on the line of the east wall of the present *haram*, but 330 feet further west, on the line of the solid wall which forms the termination of the vaults in the eastern corner. [See JERUSALEM, vol. ii. 1314; and the Plan, 1316.] This situation agrees with the mention of the "water-gate" in *Neh. iii. 26*, and the statement of *xi. 21*, that it was the residence of the Levites. Possibly the "great tower that lieth out," in the former of these, may be the "tower of Eder" — mentioned with "Ophel of the daughter of Zion," by Micah (*iv. 8*), or that named in an obscure passage of Isaiah — "Ophel and watch-tower" (*xxxii. 14*; A. V. inaccurately "forts and towers").

Ophel, then, in accordance with the probable root of the name, was the swelling declivity by which the Mount of the Temple slopes off on its southern side into the Valley of Hinnom — a long, narrowish rounded spur or promontory, which intervenes between the mouth of the central valley of Jerusalem (the Tyropœon) and the Kidron, or Valley of Jehoshaphat.<sup>c</sup> Half-way down it on its eastern face is the "Fount of the Virgin," so called; and at its foot the lower outlet of the same spring — the Pool of Siloam. How much of this declivity was covered with the houses of the Levites, or with the suburb which would naturally gather round them, and where the "great tower" stood, we have not at present the means of ascertaining.<sup>e</sup>

Professor Stanley (*Sermons on the Apostolic Age*, pp. 329, 330) has ingeniously conjectured that the name Oblas (Ὀβλαίας) — which was one of the titles by which St. James the Less was distinguished from other Jacobs of the time, and which is explained by Hegesippus (Euseb. *Hist. Eccl. ii.*

<sup>a</sup> The onyx has two strata, the sardonyx three.

<sup>b</sup> "Who speaks from actual observation: he expressly notices the fine quality of these two pieces of sardonyx." — [C. W. KING.]

<sup>c</sup> \* The explorations of Lieut. Warren have demonstrated the incorrectness of the theory here named respecting the line of the east wall of the Temple-area, and confirmed the view given under JERUSALEM (§ iv. Amer. ed.). S. W.

<sup>d</sup> \* Later observations require us to modify this opinion. Mr. Grove inserts the following note on p. 80 of Clark's *Bible Atlas* (Lond. 1868): "There seems reason to suspect that the Hill of the AKRA, the Hill of the Temple, and Ophel, were originally three sep-

arate heights. Lieutenant Warren has discovered what he conceives may have been either a deep ditch or a natural valley, now filled up with earth, running from east to west, just north of the platform of the Dome of the Rock (*Letter*, Nov. 12, 1867, p. 43); and the Tyropœon gully probably turned sharply round to the east, at the southwest corner of the Temple substruction, so as to cut off the Temple Mount from Ophel. (Dec. 12, 1867, p. 52.)" H.

<sup>e</sup> Fürst (*Hdw.* ii. 169) states, without a word that could lead a reader to suspect that there was any doubt on the point, that Ophel is identical with Millo. It may be so, only there is not a particle of evidence for or against it.

23) as meaning "bulwark (*περιοχή*) of the people," — was in its original form Ophli-am<sup>a</sup> (אֶפְרַיִם). In this connection it is a singular coincidence that St. James was martyred by being thrown from the corner of the Temple, at, or close to, the very spot which is named by Josephus as the boundary of Ophiel. [JAMES, vol. ii. 1207; ENROUËL, i. 741 b.] Ewald, however (*Geschichte*, vi. 204, *note*), restores the name as אֶפְרַיִם, as if from אֶפְרַיִם, a fence or boundary. [CHEBEL.]

This has in its favor the fact that it more closely agrees in signification with *περιοχή* than Ophel does.

The Ophel which appears to have been the residence of Elisha at the time of Naaman's visit to him (2 K. v. 24: A. V. "the tower") was of course a different place from that spoken of above. The narrative would seem to imply that it was not far from Samaria; but this is not certain. The LXX. and Vulg. must have read אֶפְרַיִם, "darkness," for they give τὸ σκοτεινόν and *vesperi* G.

**O'PHIR** (אֶפְרַיִם, אֶפְרַיִם [see below]: Οὐφέρι: *Ophir*). 1. The eleventh in order of the sons of Joktan, coming immediately after Sheba (Gen. x. 29; 1 Chr. i. 23). So many important names in the genealogical table in the 10th chapter of Genesis — such as Sidon, Canaan, Asshur, Aram (Syria), Mizraim (the two Egypts, Upper and Lower), Sheba, Caphtorim, and Philistim (the Philistines) — represent the name of some city, country, or people, that it is reasonable to infer that the same is the case with all the names in the table. It frequently happens that a father and his sons in the genealogy represent districts geographically contiguous to each other; yet this is not an invariable rule, for in the case of Tarshish the son of Javan (ver. 10), and of Nimrod the son of Cush, whose kingdom was Babel or Babylon (ver. 11), a son was conceived as a distant colony or offshoot. But there is one marked peculiarity in the sons of Joktan, which is common to them with the Canaanites alone, that precise geographical limits are assigned to their settlements. Thus it is said (ver. 19) that the border of the Canaanites was "from Sidon, as thou comest to Gerar, unto Gaza; as thou goest, unto Sodom and Gomorrah, and Admah, and Zeboim, even unto Lasha;" and in like manner (vv. 29, 30) that the dwelling of the sons of Joktan was "from Mesha, as thou goest unto Sephar a mountain of the east." The peculiar wording of these geographical limits, and the fact that the well-known towns which define the border of the Canaanites are mentioned so nearly in the same manner, forbid the supposition that Mesha and Sephar belonged to very distant countries, or were comparatively unknown; and as many of the sons of Joktan — such as Sheba, Hazarimaveth, Almodad, and others — are by common consent admitted to represent settlements in Arabia, it is an obvious inference that *all* the settlements corresponding to the names of the other sons are to be sought for in the same peninsula

alone. Hence, as Ophir is one of those sons, it may be regarded as a fixed point in discussions concerning the place Ophir mentioned in the book of Kings, that the author of the 10th chapter of Genesis regarded Ophir the son of Joktan as corresponding to some city, region or tribe in Arabia.

*Etymology.* — There is, seemingly, no sufficient reason to doubt that the word Ophir is Semitic, although, as is the case with numerous proper names known to be of Hebrew origin, the precise word does not occur as a common name in the

Bible. See the words from עֶפְרַיִם and עֶפְרַיִם in Gesenius's *Thesaurus*, and compare 'Αφάρ, the metropolis of the Sabaeans in the Periplus, attributed to Arrian. Gesenius suggests that it meant a "fruitful region," if it is Semitic. Baron von Wrede, who explored Hadhrumant in Arabia in 1843 (*Journal of the R. Geographical Society*, vol. xiv. p. 110), made a small vocabulary of Himyaritic words in the vernacular tongue, and amongst these he gives *ofir* as signifying *red*. He says that the Mahra people call themselves the tribes of the red country (*ofir*), and called the Red Sea, *bahr ofir*. If this were so, it might have some what of the same relation to *aphar*, "dust" or "dry ground" (N and Y being interchangeable), that *adom*, "red," has to *adamah*, "the ground." Still it is unsafe to accept the use of a word of this kind on the authority of any one traveller, however accurate; and the supposed existence and meaning of a word *ofir* is recommended for special inquiry to any future traveller in the same district.

2. (Σουφίρ, Σωφίρ, [and 'Οφέρι; Vat. Σουφείρ, Σωφείρ, Σωφείρα, Ωφείρ; Alex. Σουφείρ, Σωφίρα, Ωφείρδε, Ωφείρ; Sin. in Job and Is., Σωφείρ, Σωφίρ, Σουφείρ:] *Ophira*, 1 K. ix. 28, x. 11; 2 Chr. viii. 18, ix. 10: in 1 K. ix. 28 the translation of the LXX. is *eis Σωφίρα* [Vat. Σωφίρα, Alex. Σωφάρα], though the ending in the original merely denotes motion towards Ophir, and is no part of the name.) A seaport or region from which the Hebrews in the time of Solomon obtained gold, in vessels which went thither in conjunction with Tyrian ships from Ezion-geber, near Elath, on that branch of the Red Sea which is now called the Gulf of Akabah. The gold was proverbial for its fineness, so that "gold of Ophir" is several times used as an expression for fine gold (Ps. xlv. 9; Job xxviii. 16; Is. xiii. 12; 1 Chr. xxix. 4); and in one passage (Job xxii. 24) the word "Ophir" by itself is used for gold of Ophir, and for gold generally. In Jer. x. 9 and Dan. x. 5 it is thought by Gesenius and others that Ophir is intended by the word "Uphaz" — there being a very trifling difference between the words in Hebrew when written without the vowel-points. In addition to gold, the vessels brought from Ophir almsg-wood and precious stones.

The precise geographical situation of Ophir has long been a subject of doubt and discussion. Calmet (*Dictionary of the Bible*, s. v. "Ophir" regarded it as in Armenia; Sir Walter Raleigh (*History of the World*, book i. ch. 8) thought it was one of the Molucca Islands; and Arias Montanus (Bochart, *Phaleg*, Pref. and ch. 9), led by the similarity of the word Parvaïm, supposed to be identical with Ophir (2 Chr. iii. 6), found it in

<sup>a</sup> Some of the MSS. of Eusebius have the name Οφλιαν (Οφλιάν), preserving the termination, though they corrupt the former part of the word.

Peru.<sup>1</sup> But these countries, as well as Iberia and Phrygia, cannot now be viewed as affording matter for serious discussion on this point, and the three opinions which have found supporters in our own time were formerly represented, amongst other writers, by Huet (*Sur le Commerce et la Navigation des Anciens*, p. 59), by Bruce (*Travels*, book ii. c. 4), and by the historian Robertson (*Disquisition respecting Ancient India*, sect. 1), who placed Ophir in Africa; by Vitringa (*Geograph. Sacra*, p. 114) and Reland (*Dissertatio de Ophir*), who placed it in India; and by Michaelis (*Spicilegium*, d. 184), Niebuhr, the traveller (*Description de l'Arabie*, p. 253), Gosselin (*Recherches sur la Géographie des Anciens*, ii. 99), and Vincent (*History of the Commerce and Navigation of the Ancients*, ii. 265-270), who placed it in Arabia. Of other distinguished geographical writers, Bochart (*Phaleg*, ii. 27) admitted two Ophirs, one in Arabia and one in India, i. e. at Ceylon; while D'Anville (*Dissertation sur le Pays d'Ophir*, *Mémoires de Littérature*, xxx. 83), equally admitting two, placed one in Arabia and one in Africa. In our own days the discussion has been continued by Gesenius, who in articles on Ophir in his *Thesaurus* (p. 141), and in Ersch and Gruber's *Encyclopädie* (s. v.) stated that the question lay between India and Arabia, assigned the reasons to be urged in favor of each of these countries, but declared the arguments for each to be so equally balanced that he refrained from expressing any opinion of his own on the subject. M. Quatremère, however, in a paper on Ophir which was printed in 1842 in the *Mémoires de l'Institut*, again insisted on the claims of Africa (*Académie des Inscriptions et Belles Lettres*, t. xv. ii. 362); and in his valuable work on Ceylon (part vii. chap. 1) Sir J. Emerson Tennent adopts the opinion, sanctioned by Josephus, that Malacca was Ophir. Otherwise the two countries which have divided the opinions of the learned have been India and Arabia—Lassen, Ritter, Bertheau (*Ezæget. Handbuch*, 2 Chr. viii. 18), Thenius (*Ezæget. Handbuch*, 1 K. x. 22), and Ewald (*Geschichte*, iii. 347, 2d ed.) being in favor of India, while Winer (*Realw. s. v.*), Fürst (*Hebr. und Chald. Handw. s. v.*), Knobel (*Völkertafel der Genesis*, p. 190), Forster (*Geogr. of Arabia*, i. 161-167), Crawford (*Descriptive Dictionary of the Indian Islands*, s. v.), and Kalisch (*Commentary on Genesis*, chap. "The Genealogy of Nations") are in favor of Arabia. The fullest treatise on the question is that of Ritter, who in his *Erdkunde*, vol. xiv., published in 1848, devoted 80 octavo pages to the discussion (pp. 351-431), and adopted the opinion of Lassen (*Ind. Alt. i. 529*) that Ophir was situated at the mouth of the Indus.

Some general idea of the arguments which may be advanced in favor of each of the three countries may be derived from the following statement. In favor of Arabia, there are these considerations: 1st. The 10th chapter of Genesis, ver. 29, contains what is equivalent to an intimation of the author's opinion, that Ophir was in Arabia. [OPHIR I.] 2dly. Three places in Arabia may be pointed out, the names of which agree sufficiently with the

word Ophir: namely, Apha, called by Ptolemy Sapphara, now Zafûr or Saphar, which, according to the Periplus ascribed to Arrian, was the metropolis of the Sabeans, and was distant twelve days' journey from the emporium Muza on the Red Sea: Doffir, a city mentioned by Niebuhr the traveller (*Description de l'Arabie*, p. 219), as a considerable town of Yemen, and capital of Bellad Hadsje, situated to the north of Loheia, and 15 leagues from the sea; and Zafar or Zafûri [ARABIA, vol. i. p. 137 b] (Sepher, Dhafar), now Dofar a city on the southern coast of Arabia, visited in the 14th century by Ibn Batuta, the Arabian traveller, and stated by him to be a month's journey by land from Aden, and a month's voyage, when the wind was fair, from the Indian shores (Lee's *Translation*, p. 57). 3dly. In antiquity Arabia was represented as a country producing gold by four writers at least: namely, by the geographer Agatharchides, who lived in the 2d century before Christ (in Ptolemy 250, and Hudson's *Geograph. Minores*, i. 60); by the geographer Artemidorus, who lived a little later, and whose account has been preserved, and, as it were, adopted by the geographer Strabo (xiv. 18); by Diodorus Siculus (ii. 50, iii. 44); and by Pliny the Elder (vi. 32). 4thly. Eupolemus, a Greek historian who lived before the Christian era, and who, besides other writings, wrote a work respecting the kings of Judæa, expressly states, as quoted by Eusebius (*Præp. Evang.* ix. 30), that Ophir was an island with gold mines in the Erythraean Sea (Ὀύροῦ, comp. Ούφειρα, the LXX. Translation in Gen. x. 29), and that David sent miners thither in vessels which he caused to be built at Elana = Elath. Now it is true that the name of the Erythraean Sea was deemed to include the Persian Gulf, as well as the Red Sea, but it was always regarded as closely connected with the shores of Arabia, and cannot be shown to have been extended to India. 5thly. On the supposition that, notwithstanding all the ancient authorities on the subject, gold really never existed either in Arabia, or in any island along its coasts, Ophir was an Arabian emporium, into which gold was brought as an article of commerce, and was exported into Judæa. There is not a single passage in the Bible inconsistent with this supposition; and there is something like a direct intimation that Ophir was in Arabia.

While such is a general view of the arguments for Arabia, the following considerations are urged in behalf of India. 1st. Sofir is the Coptic word for India; and Sophir, or Sophira is the word used for the place Ophir by the Septuagint translators, and likewise by Josephus. And Josephus positively states that it was a part of India (*Ant.* viii. 6, § 4), though he places it in the Golden Chersonese, which was the Malay peninsula, and belonged, geographically, not to India proper, but to India beyond the Ganges. Moreover, in three passages of the Bible, where the Septuagint has Σοφίρα or Σουφίρα, 1 K. ix. 28, x. 11; Is. xiii. 12, Arabian translators have used the word *India*. 2dly. All the three imports from Ophir, gold, precious stones,

And there within, sir, are the golden mines,  
Great Solomon's Ophir."

Arias Montanus fancied that Parvaim meant, in the dual number, two Perus; one Peru Proper, and the other New Spain (פְּרַיִם פְּרַיִם).

<sup>a</sup> This strange idea of one of the most learned Spaniards of his time (b. 1527, A. D., d. 1598) accounts for the following passage in Ben Jonson's *Alchemists*, Act ii. Sc. 1:—

"Come on, sir; now you set your foot on shore  
In Novo Orbe.—Here's the rich Peru;

and almug-wood, are essentially Indian. Gold is found in the sources of the Indus and the Cabool River before their juncture at Attock; in the Himalaya mountains, and in a portion of the Deccan, especially at Cochin. India has in all ages been celebrated for its precious stones of all kinds. And sandal-wood, which the best modern Hebrew scholars regard as the almug-wood of the Bible, is almost exclusively, or at any rate pre-eminently, a product of the coast of Malabar. 3dly. Assuming that the ivory, peacocks, and apes, which were brought to Ezion-geber once in three years by the navy of Tharshish in conjunction with the navy of Hiram (1 K. x. 22), were brought from Ophir, they also collectively point to India rather than Arabia. Moreover, etymologically, not one of these words in the Hebrew is of Hebrew or Semitic origin; one being connected with Sanskrit, another with the Tamil, and another with the Malay language. [TARSHISH.] 4thly. Two places in India may be specified, agreeing to a certain extent in name with Ophir; one at the mouths of the Indus, where Indian writers placed a people named the Abhira, agreeing with the name *Σαβείρια* of the geographer Ptolemy; and the other, the *Σουπάρα* of Ptolemy, the *Ούππαρα* of Arrian's Periplus, where the town of Goa is now situated, on the western coast of India.

Lastly, the following pleas have been urged in behalf of Africa. 1st. Of the three countries, Africa, Arabia, and India, Africa is the only one which can be seriously regarded as containing districts which have supplied gold in any great quantity. Although, as a statistical fact, gold has been found in parts of India, the quantity is so small, that India has never supplied gold to the commerce of the world; and in modern times no gold at all, nor any vestiges of exhausted mines have been found in Arabia. 2dly. On the western coast of Africa, near Mozambique, there is a port called by the Arabians Sofala, which, as the liquids *l* and *r* are easily interchanged, was probably the Ophir of the Ancients. When the Portuguese, in A. D. 1500, first reached it by the Cape of Good Hope, it was the emporium of the gold district in the interior; and two Arabian vessels laden with gold were actually off Sofala<sup>a</sup> at the time (see *Cadmosto*, cap. 58). 3dly. On the supposition that the passage (1 K. x. 22) applies to Ophir, Sofala has still stronger claims in preference to India. Peacocks, indeed, would not have been brought from it; but the peacock is too delicate a bird for a long voyage in small vessels, and the word *tukkiyim* probably signified "parrots." At the same time, ivory and apes might have been supplied in abundance from the district of which Sofala was the emporium. On the other hand, if Ophir had been in India, other Indian productions might have been expected in the list of imports; such as shawls, silk, rich tissues of cotton, perfumes, pepper, and cinnamon. 4thly. On the same supposition respecting 1 K. x. 22, it can, according to the traveller Bruce, be proved by the laws of the monsoons in the Indian Ocean, that Ophir was at Sofala; inasmuch as the voyage to Sofala from Ezion-geber would have been performed

exactly in three years; it could not have been accomplished in less time and it would not have required more (vol. i. p. 440).

From the above statement of the different views which have been held respecting the situation of Ophir, the suspicion will naturally suggest itself that no positive conclusion can be arrived at on the subject. And this seems to be true, in this sense that the Bible in all its direct notices of Ophir as a place does not supply sufficient data for an independent opinion on this disputed point. At the same time, it is an inference in the highest degree probable, that the author of the 10th chapter of Genesis regarded Ophir as in Arabia; and, in the absence of conclusive proof that he was mistaken, it seems most reasonable to acquiesce in his opinion.

To illustrate this view of the question it is desirable to examine closely all the passages in the historical books which mention Ophir by name. These are only five in number: three in the books of Kings, and two in the books of Chronicles. The latter were probably copied from the former; and, at any rate, do not contain any additional information; so that it is sufficient to give a reference to them, 2 Chr. viii. 18, ix. 10. The three passages in the books of Kings, however, being short, will be set out at length. The first passage is as follows: it is in the history of the reign of Solomon. "And king Solomon made a navy of ships at Ezion-geber, which is beside Elath, on the shore of the Red Sea, in the land of Edom. And Hiram sent in the navy his servants, shipmen that had knowledge of the sea, with the servants of Solomon. And they came to Ophir, and fetched from thence gold, four hundred and twenty talents, and brought it to king Solomon," 1 K. ix. 26-28. The next passage is in the succeeding chapter, and refers to the same reign. "And the navy also of Hiram that brought gold from Ophir, brought in from Ophir great plenty of almug-trees and precious stones," 1 K. x. 11. The third passage relates to the reign of Jehoshaphat king of Judah, and is as follows: "Jehoshaphat made ships of Tharshish to go to Ophir for gold; but they went not: for the ships were broken at Ezion-geber," 1 K. xxii. 48. In addition to these three passages, the following verse in the book of Kings has very frequently been referred to Ophir: "For the king (*i. e.* Solomon) had at sea a navy of Tharshish with the navy of Hiram: once in three years came the navy of Tharshish bringing gold and silver, ivory, and apes, and peacocks," 1 K. x. 22. But there is not sufficient evidence to show that the fleet mentioned in this verse was identical with the fleet mentioned in 1 K. ix. 26-28, and 1 K. x. 11, as bringing gold, almug-trees, and precious stones from Ophir; and if, notwithstanding, the identity of the two is admitted as a probable conjecture, there is not the slightest evidence that the fleet went *only* to Ophir, and that therefore the silver, ivory, apes, and peacocks must have come from Ophir. Indeed, the direct contrary might be inferred, even on the hypothesis of the identity of the two fleets, inasmuch as the actual mention of Ophir is distinctly confined to the imports of gold, almug-trees, and precious stones, and the compiler might seem carefully to have distinguished between

<sup>a</sup> Mr. Grove has pointed out a passage in Milton's *Paradise Lost*, xi. 399-401, favoring this Sofala: —

"Mombaza, and Quiloa, and Melind,  
And Sofala, thought Ophir, to the realm  
Of Congo and Angola farthest south."

Milton followed a passage in Purchas's *Pilgrimes*, p. 1022 of the 2d volume, published in 1625; and all the modern geographical names in vv. 387-411 are in Purchas.

It and the country from which silver, ivory, apes, and peacocks were imported. Hence, without referring farther to the passage in 1 K. x. 22, we are thrown back, for the purpose of ascertaining the situation of Ophir, to the three passages from the book of Kings which were first set forth. And if those three passages are carefully examined, it will be seen that all the information given respecting Ophir is, that it was a place or region, accessible by sea from Ezion-geber on the Red Sea, from which imports of gold, almug-trees, and precious stones were brought back by the Tyrian and Hebrew sailors. No data whatever are given as to the distance of Ophir from Ezion-geber; no information direct or indirect, or even the slightest hint, is afforded for determining whether Ophir was the name of a town, or the name of a district; whether it was an emporium only, or the country which actually produced the three articles of traffic. Bearing in mind the possibility of its being an emporium, there is no reason why it may not have been either in Arabia, or on the Persian coast, or in India, or in Africa; but there is not sufficient evidence for deciding in favor of one of these suggestions rather than of the others.

Under these circumstances it is well to revert to the 10th chapter of Genesis. It has been shown [OPHIR 1] to be reasonably certain that the author of that chapter regarded Ophir as the name of some city, region, or tribe in Arabia. And it is almost equally certain that the Ophir of Genesis is the Ophir of the book of Kings. There is no mention, either in the Bible or elsewhere, of any other Ophir; and the idea of there having been two Ophirs, evidently arose from a perception of the obvious meaning of the 10th chapter of Genesis, on the one hand, coupled with the erroneous opinion on the other, that the Ophir of the book of Kings *could not* have been in Arabia. Now, whatever uncertainty may exist as to the time when the 10th chapter of Genesis was written (Knobel, *Völkertafel der Genesis*, p. 4, and Hartmann's *Forschungen über die 5 Bücher Moses*, p. 584), the author of it wrote while Hebrew was yet a living language; there is no statement in any part of the Bible inconsistent with his opinion; and the most ancient writer who can be opposed to him as an authority, lived, under any hypothesis, many centuries after his death. Hence the *burden of proof* lies on any one who denies Ophir to have been in Arabia.

But all that can be advanced against Arabia falls very short of such proof. In weighing the evidence on this point, the assumption that ivory, peacocks, and apes were imported from Ophir must be dismissed from consideration. In one view of the subject, and accepting the statement in 2 Chr. ix. 21, they might have connection with Tarshish [TARSHISH]; but they have a very slight bearing on the position of Ophir. Hence it is not here necessary to discuss the law of monsoons in the Indian Ocean; though it may be said in passing that the facts on which the supposed law is founded, which seemed so cogent that they induced the historian Robertson to place Ophir in Africa (*Disquisition on India*, § 2), have been pointedly denied by Mr. Salt in his *Voyage to Abyssinia* (p. 103). Moreover, the resemblance of names of places in India and Africa to Ophir, cannot reasonably be insisted on; for there is an equally great resemblance in the names of some places in Arabia. And in reference to Africa, especially, the place there imagined to be Ophir, namely, *Sofala*, has been

shown to be merely an Arabic word, corresponding to the Hebrew *Shefelath*, which signifies a plain or low country (Jer. xxxii. 44; Josh. xi. 16; the  $\Sigma\phi\lambda\alpha$  of the Maccabees, 1 Macc. xii. 38; see Gesenius, *Lex.* s. v.). Again, the use of Sofir as the Coptic word for Ophir cannot be regarded as of much importance, it having been pointed out by Reland that there is no proof of its use except in late Coptic, and that thus its adoption may have been the mere consequence of the erroneous views which Josephus represented, instead of being a confirmation of them. Similar remarks apply to the Biblical versions by the Arabic translators. The opinion of Josephus himself would have been entitled to much consideration in the absence of all other evidence on the subject; but he lived about a thousand years after the only voyages to Ophir of which any record has been preserved, and his authority cannot be compared to that of the 10th chapter of Genesis. Again, he seems inconsistent with himself; for in *Ant.* ix. 1, § 4, he translates the Ophir of 1 K. xxii. 48, and the Tarshish of 2 Chr. xx. 36, as *Pontus* and *Thrace*. It is likewise some deduction from the weight of his opinion, that it is contrary to the opinion of Eupolemus, who was an earlier writer; though he too lived at so great a distance of time from the reign of Solomon that he is by no means a decisive authority. Moreover, imagination may have acted on Josephus to place Ophir in the Golden Chersonese, which to the ancients was, as it were, the extreme east; as it acted on Arias Montanus to place it in Peru, in the far more improbable and distant west. All the foregoing objections having been rejected from the discussion, it remains to notice those which are based on the assertion that sandal-wood (assumed to be the same as almug-wood), precious stones, and gold, are not productions of Arabia. And the following observations tend to show that such objections are not conclusive.

1st. In the Periplus attributed to Arrian, sandal-wood ( $\xi\upsilon\lambda\alpha\ \sigma\alpha\upsilon\tau\alpha\lambda\iota\upsilon\alpha$ ) is mentioned as one of the imports into Omana, an emporium on the Persian Gulf; and it is thus proved, if any proof is requisite, that a sea-port would not necessarily be in India, because sandal-wood was obtained from it. But independently of this circumstance, the reasons advanced in favor of almug-wood being the same as sandal-wood, though admissible as a conjecture, seem too weak to justify the founding any argument on them. In 2 Chr. ii. 8, Solomon is represented as writing to Hiram, king of Tyre, in these words: "Send me also cedar-trees, fir-trees, and almug-trees, out of Lebanon; for I know that thy servants can skill to cut timber in Lebanon;" a passage evidently written under the belief that almug-trees grew in Lebanon. It has been suggested that this was a mistake — but this is a point which cannot be assumed without distinct evidence to render it probable. The LXX. translator of the book of Kings, 1 K. x. 12, translates almug-wood by  $\xi\upsilon\lambda\alpha\ \pi\epsilon\lambda\epsilon\kappa\eta\tau\acute{\alpha}$ , or  $\alpha\pi\epsilon\lambda\epsilon\kappa\eta\tau\acute{\alpha}$ , which gives no information as to the nature of the wood; and the LXX. translator of the Chronicles renders it by  $\xi\upsilon\lambda\alpha\ \pi\acute{\epsilon}\nu\kappa\iota\upsilon\alpha$ , which strictly means *fir-wood* (compare Ennius's translation of *Medea*, ver. 4), and which, at the utmost, can only be extended to any wood of resinous trees. The Vulgate translation is "thynea," i. e. wood made of *thya* ( $\theta\upsilon\omicron\nu$ ,  $\theta\upsilon\iota\alpha$ ), a tree which Theophrastus mentions as having supplied peculiarly durable timber for the roofs of temples; which he says is

like the wild cypress; and which is classed by him as an evergreen with the pine, the fir, the juniper, the yew-tree, and the cedar (*Histor. Plant.* v. 3, § 7, i. 9, § 3). It is stated both by Buxtorf and Gesenius (s. v.), that the Rabbinists understood by the word, *corals* — which is certainly a most improbable meaning — and that in the 3d century, among in the Mishnah (*Kelim* 13, 6) was used for coral in the singular number. In the 13th century, Kimchi, it is said, proposed the meaning of Brazil wood. And it was not till last century that, for the first time, the suggestion was made that almug-wood was the same as sandal-wood. This suggestion came from Celsius, the Swedish botanist, in his *Hierobotanicon*; who at the same time recounted thirteen meanings proposed by others. Now, as all that has been handed down of the uses of almug-wood is, that the king made of it a prop<sup>a</sup> or support for the House of the Lord and the king's house; and harps also and psalteries for singers (1 K. x. 12), it is hard to conceive how the greatest botanical genius that ever lived can now do more than make a guess, more or less probable, at the meaning of the word.

Since the time of Celsius, the meaning of "sandal-wood" has been defended by Sanskrit etymologies. According to Gesenius (*Lexicon*, s. v.), Bohlen proposed, as a derivation for *almuggim*, the Arabic article *Al* and *micata*, from simple *mica*, a name for red sandal-wood. Lassen, in *Indische Alterthumskunde* (vol. i. pt. 1, p. 538), adopting the form *aluminum*, says that if the plural ending is taken from it, there remains *valgu*, as one of the Sanskrit names for sandal-wood, which in the language of the Deccan is *valgun*. Perhaps, however, these etymologies cannot lay claim to much value until it is made probable, independently, that almug-wood is sandal-wood. It is to be observed that there is a difference of opinion as to whether "al" in *aluminum* is an article or part of the noun, and it is not denied by any one that *chandana* is the ordinary Sanskrit word for sandal-wood. Moreover, Mr. Crawford, who resided officially many years in the East and is familiar with sandal-wood, says that it is never — now, at least — used for musical instruments, and that it is unfit for pillars, or stairs, balustrades or banisters, or balconies. (See also his *Descriptive Dictionary of the Indian Islands*, pp. 310–375.) It is used for incense or perfume, or as fancy wood.

2. As to precious stones, they take up such little room, and can be so easily concealed, if necessary, and conveyed from place to place, that there is no difficulty in supposing they came from Ophir, simply as from an emporium, even admitting that there were no precious stones in Arabia. But it has already been observed [ARABIA, i. 137 a] that the Arabian peninsula produces the emerald and onyx stone; and it has been well pointed out by Mr. Crawford that it is impossible to identify precious stones under so general a name with any

particular country. Certainly it cannot be shown that the Jews of Solomon's time included under that name the diamond, for which India is peculiarly renowned.

3. As to gold, far too great stress seems to have been laid on the negative fact that no gold nor trace of gold-mines has been discovered in Arabia. Negative evidence of this kind, in which Ritter<sup>b</sup> has placed so much reliance (vol. xiv. p. 408), is by no means conclusive. Sir Roderick Murchison and Sir Charles Lyell concur in stating that, although no rock is known to exist in Arabia from which gold is obtained at the present day, yet the peninsula has not undergone a sufficient geological examination to warrant the conclusion that gold did not exist there formerly or that it may not yet be discovered there. Under these circumstances there is no sufficient reason to reject the accounts of the ancient writers who have been already adduced as witnesses for the former existence of gold in Arabia. It is true that Artemidorus and Diodorus Siculus may merely have relied on the authority of Agatharchides, but it is important to remark that Agatharchides lived in Egypt and was guardian to one of the young Ptolemies during his minority, so that he must have been familiar with the general nature of the commerce between Egypt and Arabia. Although he may have been inaccurate in details, it is not lightly to be admitted that he was altogether mistaken in supposing that Arabia produced any gold at all. And it is in his favor that two of his statements have unexpectedly received confirmation in our own time: 1st, respecting gold-mines in Egypt, the position of which in the Bisharee Desert was ascertained by Mr. Linant and Mr. Bonomi (Wilkinson's *Ancient Egyptians*, ch. ix.); and 2d, as to the existence of nuggets of pure gold, some of the size of an olive-stone, some of a medlar, and some of a chestnut. The latter statement was discredited by Michaelis (*Spicilegium*, p. 287, "Nec credo ullibi massas auri non experti castaneæ nucis magnitudine reperiri"), but it has been shown to be not incredible by the result of the gold discoveries in California and Australia.

If, however, negative evidence is allowed to outweigh on this subject the authority of Agatharchides, Artemidorus, Diodorus Siculus, Pliny, and, it may be added, Strabo, all of whom may possibly have been mistaken, there is still nothing to prevent Ophir having been an Arabian emporium for gold (Winer, *Rehnc.* s. v. "Ophir"). The Periplus, attributed to Arrian, gives an account of several Arabian emporia. In the Red Sea, for example, was the Emporium Musa, only twelve days distant from Aphar the metropolis of the Sabæans and the Homerites. It is expressly stated that this port had commercial relations with Barygaza, i. e. Beroach, on the west coast of India, and that it was always full of Arabs, either ship-owners or sailors. Again, where the British town of Aden is now situated, there was another em-

<sup>a</sup> The general meaning of  $\text{עֲמֻדָּה}$ , a prop or support, is certain, though its special meaning in 1 K. x. 12 seems irrecoverably lost. It is translated "pillars" in the A. V., and  $\text{ὑποστηρίγματα}$  in the LXX. In the corresponding passage of 2 Chr. ix. 11, the word is

$\text{מַסְלָחִים}$ , the usual meaning of which is *highways*; and which is translated in the A. V. *terraces*, and in the LXX *ἀναβάσεις*, *ascents*, or *stairs*. See Her. i. 191.

<sup>b</sup> Bearing this in mind, it is remarkable that Ritter should have accepted Lassen's conjecture respecting the position of Ophir at the mouths of the Indus. Attock is distant from the sea 942 miles by the Indus, and 648 in a straight line; and the upper part of the Indus is about 860 miles long above Attock (Thorn-ton's *Gazetteer of India*). Hence gold would be so distant from the mouths of the Indus, that now could be obtained thence, except from an emporium situated there.

porium, with an excellent harbor, called Arabia Felix (to be carefully distinguished from the district so called), which received its name of Felix, according to the author of the Periplus, from its being the depot for the merchandise both of the Indians and Egyptians at a time when vessels did not sail direct from India to Egypt, and when merchants from Egypt did not dare to venture farther eastward towards India. At Zafar or Zafari, likewise, already referred to as a town in Hadramaut, there was an emporium in the Middle Ages, and there may have been one in the time of Solomon. And on the Arabian side of the Persian Gulf was the emporium of Gerrha, mentioned by Strabo (xvi. p. 766), which seems to have had commercial intercourse with Babylon both by caravans and by barges. Its exports and imports are not specified, but there is no reason why the articles of commerce to be obtained there should have been very different from those at Omana on the opposite side of the gulf, the exports from which were purple cloth, wine, dates, slaves, and gold, while the imports were brass, sandal-wood, horn, and ebony. In fact, whatever other difficulties may exist in relation to Ophir, no difficulty arises from any absence of emporia along the Arabian coast, suited to the size of vessels and the state of navigation in early times.

There do not, however, appear to be sufficient data for determining in favor of any one emporium or of any one locality rather than another in Arabia as having been the Ophir of Solomon. Mr. Forster (*Geography of Arabia*, i. 167) relies on Ofor or Ofir, in Sale and D'Auvillie's maps, as the name of a city and district in the mountains of Oman; but he does not quote any ancient writer or modern traveller as an authority for the existence of such an Ofir, though this may perhaps be reasonably required before importance is attached, in a disputed point of this kind, to a name on a map. Niebuhr the traveller (*Description de l'Arabie*, p. 253) says that Ophir was probably the principal port of the kingdom of the Sabaeans, that it was situated between Aden and Dafar (or Zafar), and that perhaps even it was Cane. Gosselin, on the other hand, thinks it was Dofir, the city of Yemen already adverted to; and in reference to the obvious objection (which applies equally to the metropolis Aghar) that it is at some distance from the sea, he says that during the long period which has elapsed since the time of Solomon, sands have encroached on the coast of Lobeia, and that Ophir may have been regarded as a port, although vessels did not actually reach it (*Recherches sur la Géographie des Anciens*, l. c.). Dean Vincent agrees with Gosselin in confining Ophir to Sabaea, partly because in Gen. x. Ophir is mentioned in connection with sons of Joktan who have their residence in Arabia Felix, and partly because, in 1 K. ix., the voyage to Ophir seems related as if it were in consequence of the visit of the Queen of Sheba to Jerusalem (*History of the Commerce and Navigation of the Ancients*, l. c.). But the opinion that Jobab and Aviliah represent parts of Arabia Felix would by no means command universal assent; and although the book of Kings certainly suggests the inference that there was some connection between the visit of the Queen of Sheba and the voyage to Ophir, this would be consistent with Ophir being either contiguous to Sabaea, or situated on any point of the southern or eastern coasts of Arabia; as in either of these cases it would have been politic

in Solomon to conciliate the good will of the Sabaeans, who occupied a long tract of the eastern coast of the Red Sea, and who might possibly have commanded the Straits of Babelmandel. On the whole, though there is reason to believe that Ophir was in Arabia, there does not seem to be adequate information to enable us to point out the precise locality which once bore that name.

In conclusion it may be observed that objections against Ophir being in Arabia, grounded on the fact that no gold has been discovered in Arabia in the present day, seem decisively answered by the parallel case of Sheba. In the 72d Psalm, v. 15, "gold of Sheba," translated in the English Psalter "gold of Arabia," is spoken of just as "gold of Ophir" is spoken of in other passages of the O. T., and in Ezekiel's account of the trade with Tyre (xxvii. 22), it is stated, "the merchants of Sheba and Raamah, they were thy merchants: they occupied in thy fairs with chief of all spices and with all precious stones, and gold;" just as in 1 K. x., precious stones and gold are said to have been brought from Ophir by the navy of Solomon and of Hiram. (Compare Plin. vi. 28; Horace, *Ode* i. 29, l. ii. 12, 24, iii. 24, 2; *Epist.* i. 7, 36; and *Judg.* viii. 24.) Now, of two things one is true. Either the gold of Sheba and the precious stones sold to the Tyrians by the merchants of Sheba were the natural productions of Sheba, and in this case — as the Sheba here spoken of was confessedly in Arabia — the assertion that Arabia did not produce gold falls to the ground; or the merchants of Sheba obtained precious stones and gold in such quantities by trade, that they became noted for supplying them to the Tyrians and Jews, without curious inquiry by the Jews as to the precise locality whence these commodities were originally derived. And exactly similar remarks may apply to Ophir. The resemblance seems complete. In answer to objections against the obvious meaning of the tenth chapter of Genesis, the alternatives may be stated as follows. Either Ophir, although in Arabia, produced gold and precious stones; or, if it shall be hereafter proved in the progress of geological investigation that this could not have been the case, Ophir furnished gold and precious stones as an emporium, although the Jews were not careful to ascertain and record the fact. E. T.

OPH'NI (אֹפְנִי), with the def. article — "the Ophnite;" LXX. both MSS. omit; [Ald. *Aphi*: Comp. *Aphi*:] *Ophni*). A town of Benjamin, mentioned in Josh. xviii. 24 only, apparently in the northeastern portion of the tribe. Its name may perhaps imply that, like others of the towns of this region, it was originally founded by some non-Israelite tribe — the Ophnites — who in that case have left but this one slight trace of their existence. [See note *b* to vol. i. p. 277.] In the Biblical history of Palestine Ophni plays no part, but it is doubtless the Gophna of Josephus, a place which at the time of Vespasian's invasion was apparently so important as to be second only to Jerusalem (*B. J.* iii. 3, § 5). It was probably the Gufnith, Gufna, or Beth-gufnith of the Talmud (*Schwarz*, p. 126), which still survives in the modern *Jifna* or *Jufna*, 2½ miles northwest of Bethel (*Reland, Pal.*, p. 816; *Rob. Bibl. Res.* ii. 264). The change from the *Ain*, which Ophni begins, to *G*, is common enough in the LXX. (Comp. Gomorrah, Athaliah, etc.) G.

\* This Ophni, the present *Jufna*, though not

named in the N. T., is probably connected with incidents mentioned there. Of the two military roads which led from Jerusalem to Antipatris, the more direct one (traces of the pavement of which still remain) was by the way of Gophna (Rob. *Bibl. Res.* ii. 138); and Paul, when sent thither on his night-journey to Caesarea (Acts xxiii. 21), may be presumed to have followed that road. The escort in that case would arrive at Ophni or Gophna about midnight, and at daybreak would reach the last line of hills which overlook the plain of Sharon. See Howson's *Life and Letters of Paul*, ii. p. 331 (Amer. ed.). It is very possible also that when Saul went on his persecuting errand to Damascus he passed through Gophna to Neapolis (*Nablus*), and thence onward to the north. On the right of the road, just before coming to *Jufna* from the south, are some ruins of an ancient Greek church. The most important relic is a baptistery carved out of a single limestone block, in the form of a cross, two feet nine inches deep, and four feet four inches in diameter, or according to Dr. Robinson, five feet inside (*Bibl. Res.* iii. 78), which account appears to have included the width of the rim. Except a slight difference in the dimensions, this font is a *fac-simile* of one which the writer saw at *Tekū'a*, and has described under *Tekoa*. The present inhabitants of *Jufna*, about two hundred, are Christians. The appearance of the little village as approached from the south, surrounded by luxuriant vines and fruit-bearing trees, is uncommonly beautiful.

H.

OPH'RAH (אֹפְרָתָא [*female fawn*]). The name of two places in the central part of Palestine

1. (In Josh., 'Εφραθά; Alex. Αφρα; in Sam. Γοφράδ; *Ophra*, in Sam. *Aphra*.) In the tribe of Benjamin (Josh. xviii. 23). It is named between hap-Parah and Chephar ha-Ammonai, but as the position of neither of these places is known, we do not thereby obtain any clew to that of Ophrah. It appears to be mentioned again (1 Sam. xiii. 17) in describing the routes taken by the spoilers who issued from the Philistine camp at Michmas. One of these bands of ravagers went due west, on the road to Beth-horon; one towards the "ravine of Zehoim," that is in all probability one of the clefts which lead down to the Jordan Valley, and therefore due east; while the third took the road "to Ophrah and the land of Shual" — doubtless north, for south they could not go, owing to the position held by Saul and Jonathan. [GIBEON, vol. ii. p. 915 a.] In accordance with this is the statement of Jerome (*Onomasticon*, "Aphra"), who places it 5 miles east of Bethel. Dr. Robinson (*Bibl. Res.* i. 447) suggests its identity with *et-Taizābeh*, a small village on the crown of a conical and very conspicuous hill, 4 miles E. N. E. of *Beitūn* (Bethel), on the ground that no other ancient place occurred to him as suitable, and that the situation accords with the notice of Jerome. In the absence of any similarity in the name, and of any more conclusive evidence, it is impossible absolutely to adopt this identification.

Ophrah is probably the same place with that which is mentioned under the slightly different form of EPHRAIM (or Ephron) and EPHRAIM. [See vol. i. p. 755 a.] It may also have given its name to the district or government of APHEREMA. [1 Macc. xi. 34.]

2. (Εφραθά; and so Alex., excepting [viii. 27 and] ix 5 Εφραμ, [Comp. in Josh. vi. 11, viii.

27, 32, 'Εφ-ά:] *Ephra*.) More fully OPHRAH OF THE ΑΦΡΑΖΙΤΕΣ, the native place of Gideon (Judg. vi. 11); the scene of his exploits against Baal (ver. 24); his residence after his accession to power (ix. 5), and the place of his burial in the family sepulchre (viii. 32). In Ophrah also he deposited the ephod which he made or enriched with the ornaments taken from the Ishmaelite followers of Zebah and Zalmunna (viii. 27), and so great was the attraction of that object, that the town must then have been a place of great pilgrimage and resort. The indications in the narrative of the position of Ophrah are but slight. It was probably in Manasseh (vi. 15), and not far distant from Shechem (ix. 1, 5). Van de Velde (*Memoir*) suggests a site called *Erfiti*, a mile south of *Akrabeh*, about 8 miles from *Nablus*, and Schwarz (p. 158) "the village Erafa, north of Sanur," by which he probably intends *Arabeh*. The former of them has the disadvantage of being altogether out of the territory of Manasseh. Of the latter, nothing either for or against can be said.

Ophrah possibly derives its name from *Epher*, who was one of the heads of the families of Manasseh in its Gileadite portion (1 Chr. v. 24), and who appears to have migrated to the west of Jordan with Abi-ezer and Shechem (Num. xxvi. 30; Josh. xvii. 2). [ABI-EZER; EPHER, vol. i. p. 744 b; MANASSEH, ii. 1170 b.] G.

OPH'RAH (אֹפְרָתָא [*female fawn*]; Γοφράδ; Alex. Γοφρα; [Comp. Εφράδ:] *Ophra*). The son of Meonothai (1 Chr. iv. 14). By the phrase "Meonothai begat Ophrah," it is uncertain whether we are to understand that they were father and son, or that Meonothai was the founder of Ophrah.

\* OR in the phrase "or ever" represents the Anglo-Saxon *ær*, and is used in the A. V. in the sense of "ere," "before;" see Ps. xc. 2; Prov. viii. 23; Song of Sol. vi. 12; Dan. vi. 24; Acts xxiii. 15. So "ere ever," Ecclus. xxiii. 20. A.

\* ORACLE. This word, in every case but one in which it occurs in the O. Testament stands for the Heb. אִרְבֵּי (LXX. δαβίρα), which is apparently employed, 1 K. viii. 6 (אִרְבֵּי הַבַּיִת), as equivalent to אִימֵי הַקֹּדֶשׁ הַזֶּה (Holy of Holies). The translation "oracle" (Vulg. *oraculum*, comp. *χρηματιστήριον*, Aq. and Sym.) assumes the derivation of the Heb. word from אָרַב, "to speak," as if to designate a place chosen for the special manifestation of the divine will. A more probable etymology, and that now generally received, connects it with אָרַב, taken, like the Arab. أَرَبَ,

in the sense of "to be behind," the name being thus supposed to be given to the most holy place, as the *hinder apartment* of the temple proper. The word is once employed (in the phrase "oracle of God," Heb. אִרְבֵּי הָאֱלֹהִים) 2 Sam. xvi. 23, apparently in the general sense of any appointed means of obtaining a revelation from God.

In the N. T. only the plural form occurs (λόγια), always as a designation of truths supernaturally revealed, and once (Acts vii. 38) in connection with the epithet "lively" (rather "living," ζωῶτα), expressive of their vital, quickening efficacy. [LIVE LY, Amer. ed.] D S. T.

**ORATOR.** 1. The A. V. rendering for *luch-shah*, a whisper, or incantation, joined with *nebôn*, skillful, <sup>a</sup> Is. iii. 3, A. V. "eloquent orator," marg. "skillful of speech." The phrase appears to refer to pretended skill in magic, comp. Ps. lviii. 5. [DIVINATION.]

2. The title <sup>b</sup> applied to Tertullus, who appeared as the advocate or *patronus* of the Jewish accusers of St. Paul before Felix, Acts xxiv. 1. The Latin language was used, and Roman forms observed in provincial judicial proceedings, as, to cite an obviously parallel case, Norman-French was for so many ages the language of English law proceedings. The trial of St. Paul at Caesarea was distinctly one of a Roman citizen; and thus the advocate spoke as a Roman lawyer, and probably in the Latin language (see Acts xxv. 9, 10 Val. Max. ii. 2, 2; Cic. *pro Caelio*, c. 30; *Brutus*, c. 37, 38, 41, where the qualifications of an advocate are described: Conybeare and Howson, *Life and Travels of St. Paul*, i. 3, ii. 348). [TERTULLUS.]

H. W. P.

**ORCHARD.** [GARDEN, vol. i. p. 868 *a.*]

**O'REB** (עֹרֵב); in its second occurrence only,

עֹרֵב: 'Ωρηβ; [Vat. in Judg. vii. 25, Ορηβ:] Alex. Ωρηβ: *Oreb*). The "raven" or "crow," the companion of Zeeb, the "wolf." One of the chieftains of the Midianite host which invaded Israel, and was defeated and driven back by Gideon.

The title given to them (עֲרִי, A. V. "princes") distinguishes them from Zebah and Zalmunna, the other two chieftains, who are called "kings" (מְלָכִי), and were evidently superior in rank to Oreb and Zeeb. They were killed, not by Gideon himself, or the people under his immediate conduct, but by the men of Ephraim, who rose at his entreaty and intercepted the flying horde at the fords of the Jordan. This was the second act of this great tragedy. It is but slightly touched upon in the narrative of Judges, but the terms in which Isaiah refers to it (x. 23) are such as to imply that it was a truly awful slaughter. He places it in the same rank with the two most tremendous disasters recorded in the whole of the history of Israel—the destruction of the Egyptians in the Red Sea, and of the army of Sennacherib. Nor is Isaiah alone among the poets of Israel in his reference to this great event. While it is the terrific slaughter of the Midianites which points his allusion, their discomfiture and flight are prominent in that of the author of Ps. lxxxiii. In imagery both obvious and vivid to every native of the gusty hills and plains of Palestine, though to us comparatively unintelligible, the Psalmist describes them as driven over the uplands of Gilead like the clouds of chaff blown from the threshing-floors; chased away like the spherical masses of dry weeds<sup>c</sup> which course over the plains of Esraielon and Philistia—flying with the dreadful

hurry and confusion of the flames, that rush and leap from tree to tree and hill to hill when the wooded mountains of a tropical country are by chance ignited (Ps. lxxxiii. 13, 14). The slaughter was concentrated round the rock at which Oreb fell, and which was long known by his name (Judg. vii. 25; Is. x. 26). This spot appears to have been on the east of Jordan, from whence the heads of the two chiefs were brought to Gideon to encourage him to further pursuit after the fugitive Zebah and Zalmunna.

This is a remarkable instance of the value of the incidental notices of the later books of the Bible in confirming or filling up the rapid and often necessarily slight outlines of the formal history. No reader of the relation in Judges would suppose that the death of Oreb and Zeeb had been accompanied by any slaughter of their followers. In the subsequent pursuit of Zebah and Zalmunna the "host" is especially mentioned, but in this case the chiefs alone are named. This the notices of Isaiah and the Psalmist, who evidently referred to facts with which their hearers were familiar, fortunately enable us to supply. Similarly in the narrative of the exodus of Israel from Egypt, as given in the Pentateuch, there is no mention whatever of the tempest, the thunder and lightning, and the earthquake, which from the incidental allusions of Ps. lxxvii. 16–18 we know accompanied that event, and which are also stated fully by Josephus (*Ant.* ii. 16, § 3). We are thus reminded of a truth perhaps too often overlooked, that the occurrences preserved in the Scriptures are not the only ones which happened in connection with the various events of the sacred history: a consideration which should dispose us not to reject too hastily the supplements to the Bible narrative furnished by Josephus, or by the additions and corrections of the Septuagint, and even those facts which are reflected, in a distorted form it is true, but still often with considerable remains of their original shape and character, in the legends of the Jewish, Mohammedan, and Christian East. G.

**O'REB** (*Oreb*), *i. e.* Mount Horeb (2 Esdr. ii. 33). [HOREB.]

**O'REB, THE ROCK** (עֹרֵב עֵינַי: in Judges Σοῦρ [Ωρηβ], Alex. Σουρειν [only]; in Is. τῶπος ὀλίφῳ in both MSS.: *Petra Oreb*, and *Horeb*). The "raven's crag," the spot at which the Midianite chieftain Oreb, with thousands of his countrymen, fell by the hand of the Ephraimites, and which probably acquired its name therefrom. It is mentioned in Judg. vii. 25; <sup>a</sup> Is. x. 26. It seems plain from the terms of Judg. vii. 25 and viii. 1 that the rock Oreb and the winepress Zeeb were on the east side<sup>c</sup> of Jordan.

Perhaps the place called 'Orbo (עֵרְבו), which in the *Beresith Rabba* (Reland, *Pal.* p. 913) is stated to have been in the neighborhood of Beth shean, may have some connection with it. Rabbi

<sup>a</sup> כְּבֹוֹן לַחֲשׁ: *συνερός ἀκροατής*; Vulg. and Symm. *pru'ens eloquii mystici*; Aquila, *συνερός ὑπερσυσματός*; Theodot. *συνερός ἑνωθῆς*. See Ges pp. 702, 754.

<sup>b</sup> Πῆγρον, orator.

<sup>c</sup> See a good passage on this by Thomson (*Land and Book*, ch. xxxvii.), describing the flight before the wind of the dry plants of the wild artichoke. He gives also a striking Arab imprecation in reference to

it, which recalls in a remarkable way the words of the Psalm quoted above: "May you be whirled like the 'akkhōb before the wind, until you are caught in the thorns, or plunged into the sea!"

<sup>d</sup> The word "upon" in the Auth. version of this passage is not correct. The preposition *בְּ* = "in" or "at."

<sup>e</sup> Suck is the conclusion of Reland (*Pal.* p. 915 "Oreb").

Judah (*Ber. Rabba*, *ibid.*) was of opinion that the *Orebim* ("ravens") who ministered to Elijah were no ravens, but the people of this Orbo or of the rock Oreb,<sup>a</sup> an idea upon which even St. Jerome himself does not look with entire disfavor (*Comm. in Is.* xv. 7), and which has met in later times with some supporters. The present defective state of our knowledge of the regions east of the Jordan renders it impossible to pronounce whether the name is still surviving. G.

O'REN (רֵן) [*pine-tree*, Ges.]: 'Αράμη; [Vat. Αμβραμ:] Alex. Αραμ: *Aram*). One of the sons of Jerahmeel the firstborn of Hezron (1 Chr. ii. 25).

ORGAN (אָרְגָן, Gen. iv. 21; Job xxi. 12;

אָרְגָן, Job xxx. 31; Ps. cl. 4). The Hebrew word 'agáb or 'uggáb, thus rendered in our version, probably denotes a pipe or perforated wind-instrument, as the root of the word indicates.<sup>b</sup> In Gen. iv. 21 it appears to be a general term for all wind-instruments, opposed to *cinnôr* (A. V. "harp"), which denotes all stringed instruments. In Job xxi. 12 are enumerated the three kinds of musical instruments which are possible, under the general terms of the timbrel, harp, and organ. The 'agáb is here distinguished from the timbrel and harp, as in Job xxx. 31, compared with Ps. cl. 4. Our translators adopted their rendering, "organ," from the Vulgate, which has uniformly *organum*, that is, the double or multiple pipe. The renderings of the LXX. are various: *κithára* in Gen. iv. 21, *ψαλμός* in Job, and *ὄργανον* in Ps. cl. 4. The Chaldee in every case has אַבְבָּא, *abbábá*, which signifies "a pipe," and is the rendering of the Hebrew word so translated in our version of Is. xxx. 29; Jer. xlviii. 36. Joel Brill, in his 2d preface to the Psalms in Mendelssohn's Bible, adopts the opinion of those who identify it with the Pandean pipes, or syrinx, an instrument of unquestionably ancient origin, and common in the East. It was a favorite with the shepherds in the time of Homer (*Il.* xviii. 526), and its invention was attributed to various deities: to Pallas Athene by Pindar (*Pyth.* xii. 12-14), to Pan by Pliny (vii. 57; cf. Virg. *Ecl.* ii. 32; Tibull. ii. 5, 30); by others to Marsyas or Silenus (Athen. iv. 184). In the last-quoted passage it is said that Hermes first made the syrinx with one reed, while Silenus, or, according to others, two Medes, Seuthes and Rhonakes, invented that with many reeds, and Marsyas fastened them with wax. The reeds were of unequal length but equal thickness, generally seven in number (Virg. *Ecl.* ii. 36), but sometimes nine (Theoc. *Id.* viii.). Those in use among the Turks sometimes numbered fourteen or fifteen (Calmet, *Diss. in Mus. Inst. Hebr.*, in Ugolini, *Thess.* xxxii. 790). Russell describes those he met with in Aleppo. "The syrinx, or Pan's pipe, is still a pastoral instrument in Syria; it is known also in the city, but very few of the performers can sound it tolerably well. The higher notes are clear and pleasing, but the longer reeds are apt, like the

dervis's flute, to make a hissing sound, though blown by a good player. The number of reeds of which the syrinx is composed varies in different instruments, from five to twenty-three"<sup>c</sup> (*Aleppo*, b. ii. c. 2, vol. i. p. 155, 2d ed.).

If the root of the word 'agáb above given be correct, a stringed instrument is out of the question, and it is therefore only necessary to mention the opinion of the author of *Shillê Haggibborim* (*Ugol.* vol. xxxii.), that it is the same as the Italian *viola da gamba*, which was somewhat similar in form to the modern violin, and was played upon with a bow of horsehair, the chief difference being that it had six strings of gut instead of four. Michaelis (*Suppl. ad Lex. Hebr.*, No. 1184) identifies the 'agáb with the psaltery.

Winer (*Realw. art.* "Musikalische Instrumente") says that in the Hebrew version of the book of Daniel 'agáb is used as the equivalent of סוּמְפוּנְיָהּ, *sûmpunyáh* (Gr. *συμφωνία*), rendered "dulcimer" in our version. W. A. W.

OR'ION (אֲרִיֹן: 'Εσπερος, Job ix. 9; 'Αράων, Job xxxviii. 31: *Orion*, *Arcturus*, in Job xxxviii. 31). That the constellation known to the Hebrews by the name *cesil* is the same as that which the Greeks called *Orion*, and the Arabs "the Giant," there seems little reason to doubt, though the ancient versions vary in their renderings. In Job ix. 9 the order of the words has evidently been transposed. In the LXX. it appears to have been thus, — *cimáh*, *cesil*, 'ash: the Vulgate retains the words as they stand in the Hebrew; while the Peshito Syriac read *cimáh*, 'ash, *cesil*, rendering the last-mentioned word גַּבּוֹרָה, *gaboro*, "the giant," as in Job xxxviii. 31. In Am. v. 8 there is again a difficulty in the Syriac version, which represents *cesil* by אֲרִיֹן, 'Iqúthó, by which 'ash in Job ix. 9, and 'aish in Job xxxviii. 32 (A. V. "Arcturus"), are translated. Again, in Job xxxviii. 32, 'aish is represented by 'Εσπερος in the LXX., which raises a question whether the order of the words which the translators had before them in Job ix. 9 was not, as in the Syr., *cimáh*, 'ash, *cesil*; in which case the last would be represented by 'Αρκτούρος, which was the rendering adopted by Jerome from his Hebrew teacher (*Comm. in Jes.* xiii. 10). But no known manuscript authority supports any such variation from the received Hebrew text.

The "giant" of oriental astronomy was Nimrod, the mighty hunter, who was fabled to have been bound in the sky for his impiety. The two dogs and the hare, which are among the constellations in the neighborhood of Orion, made his train complete. There is possibly an allusion to this belief in "the bands of *cesil*" (Job xxxviii. 31), with which Gesenius (*Jes.* i. 458) compares Prov. vii. 22. In the *Chronicon Paschale* (p. 36) Nimrod is said to have been "a giant, the founder of Babylon, who, the Persians say, was deified and placed among the stars of heaven, whom they call Orion" (comp. Cedrenus, p. 14). The name *cesil*, literally

<sup>a</sup> Manasseh ben-Israel, *Conciliator*, on Lev. xi. 15.

<sup>b</sup> אָרְגָן, to blow, or breathe.

<sup>c</sup> "The Arabs," says Mr. Porter (*Kitto's Bible Illustrations*, i. 106, Edinb. 1865), "have still the flute, and taught in its music. They make it themselves, and it

is rude and simple. A common reed is taken, cut the required length, holes are burned in it, a mouth-piece is fitted on, and the instrument is complete." He supposes the Hebrew 'agáb to have been a similar instrument. Dr. Conant renders the Hebrew word "pipe" in Job xxx. 31. H.

‘a fool,’ and then “an impious, godless man, is supposed to be appropriate to Nimrod, who, according to tradition, was a rebel against God in building the tower of Babel, and is called by the Arab historians “the mocker.” All this, however, is the invention of a later period, and is based upon a false etymology of Nimrod’s name, and an attempt to adapt the word *cesil* to a Hebrew derivation. Some Jewish writers, the Rabbis Isaac Israel and Jonah among them, identified the Hebrew *cesil* with the Arabic *sohail*, by which was understood either Sirius or Canopus. The words of R. Jonah (Abulwalid), as quoted by Kimchi (*Lex. Hebr.* s. v.), are — “*Cesil* is the large star called in Arabic *Sohail*, and the stars combined with it are called after its name, *cesilim*.” The name *Sohail*, “foolish,” was derived from the supposed influence of the star in causing folly in men, and was probably an additional reason for identifying it with *cesil*. These conjectures proceed, first, upon the supposition that the word is Hebrew in its origin, and, secondly, that, if this be the case, it is connected with the root of *cesil*, “a fool;” whereas it is more probably derived from a root signifying firmness or strength, and so would denote the “strong one,” the giant of the Syrians and Arabs. A full account of the various theories which have been framed on the subject will be found in Michaelis, *Suppl. ad Lex. Hebr.*, No. 1192. W. A. W.

**ORNAMENTS, PERSONAL.** The number, variety, and weight of the ornaments ordinarily worn upon the person forms one of the characteristic features of oriental costume, both in ancient and modern times. The monuments of ancient Egypt exhibit the hands of ladies loaded with rings, ear-rings of very great size, anklets, armlets, bracelets of the most varied character, and frequently inlaid with precious stones or enamel, handsome and richly ornamented necklaces, either of gold or of beads, and chains of various kinds (Wilkinson, ii. 335-341). The modern Egyptians retain to the full the same taste, and vie with their progenitors in the number and beauty of their ornaments (Lane, vol. iii. Appendix A.). Nor is the display confined, as with us, to the upper classes: we are told that even “most of the women of the lower orders wear a variety of trumpery ornaments, such as earrings, necklaces, bracelets, etc., and sometimes a nose ring” (Lane, i. 78). There is sufficient evidence in the Bible that the inhabitants of Palestine were equally devoted to finery. In the Old Testament, Isaiah (iii. 18-23) supplies us with a detailed description of the articles with which the luxurious women of his day were decorated, and the picture is filled up by incidental notices in other places:

<sup>a</sup> *Nezem* (נֶזֶם); A. V. “ear-ring.” The term is used both for “ear-ring” and “nose-ring.” That it was the former in the present case appears from ver. 47:

“I put the nose-ring upon her face” (עָלָה לָהּ צִיָּה). The term is etymologically more appropriate to the nose-jewel than to the ear-ring. [EAR-RING; NOSE-JEWEL.]

<sup>b</sup> *Tzamid* (צִמֶּיךָ), a particular kind of bracelet, so named from a root signifying “to fasten.” [BRACELET.]

<sup>c</sup> *Celi* (צֵלִי); A. V. “jewels.” The word signifies generally “articles.” They may have been either vessels or personal ornaments: we think the latter sense more adapted to this passage

in the New Testament the Apostles lead us to infer the prevalence of the same habit when they recommend the women to adorn themselves, “not with braided hair, or gold, or pearls, or costly array, but with good works” (1 Tim. ii. 9, 10), even with “the ornament of a meek and quiet spirit, which is in the sight of God of great price” (1 Pet. iii. 4). Ornaments were most lavishly displayed at festivities, whether of a public (Hos. ii. 13) or a private character, particularly on the occasion of a wedding (Is. lxi. 10; Jer. ii. 32). In times of public mourning they were, on the other hand, laid aside (Is. xxxiii. 4-6).

With regard to the particular articles noticed in the Old Testament, it is sometimes difficult to explain their form or use, as the name is the only source of information open to us. Much illustration may, however, be gleaned both from the monuments of Egypt and Assyria, and from the statements of modern travellers; and we are in all respects in a better position to explain the meaning of the Hebrew terms, than were the learned men of the Reformation era. We propose, therefore, to review the passages in which the personal ornaments are described, substituting, where necessary, for the readings of the A. V. the more correct sense in italics, and referring for more detailed descriptions of the articles to the various heads under which they may be found. The notices which occur in the early books of the Bible, imply the weight and abundance of the ornaments worn at that period. Eliezer decorated Rebekah with “a golden nose-ring <sup>a</sup> of half a shekel weight, and two bracelets <sup>b</sup> for her hands of ten shekels weight of gold” (Gen. xxiv. 22); and he afterwards added “trinkets <sup>c</sup> of silver and trinkets <sup>c</sup> of gold” (verse 53). Ear-rings <sup>d</sup> were worn by Jacob’s wives, apparently as charms, for they are mentioned in connection with idols: “they gave unto Jacob all the strange gods, which were in their hand, and their ear-rings which were in their ears” (Gen. xxxv. 4). The ornaments worn by the patriarch Judah were a “signet,” <sup>e</sup> which was suspended by a string <sup>f</sup> round the neck, and a “staff” (Gen. xxxviii. 18): the staff itself was probably ornamented, and thus the practice of the Israelites would be exactly similar to that of the Babylonians, who, according to Herodotus (i. 195), “each carried a seal, and a walking-stick, carved at the top into the form of an apple, a rose, an eagle, or something similar.” The first notice of the ring occurs in reference to Joseph: when he was made ruler of Egypt, Pharaoh “took off his signet-ring <sup>g</sup> from his hand and put it upon Joseph’s hand, and put a gold chain <sup>h</sup> about his neck” (Gen. xli. 42), the latter being probably a “simple gold chain in

<sup>d</sup> The word *nezem* is again used, but with the addition of הַאָּזְנוֹתָיִם, “in their ears.”

<sup>e</sup> *Chôthâm* (חֹתָם). [SEAL.]

<sup>f</sup> *Pâthil* (פַּתִּיל); A. V. “bracelets.” The signet is still worn, suspended by a string, in parts of Arabia (Robinson, i. 36.)

<sup>g</sup> *Tabba’ath* (טַבְּעוֹת). The signet-ring in this, as in other cases (Esth. iii. 10, viii. 2; 1 Macc. vi. 15), was not merely an ornament, but the symbol of authority.

<sup>h</sup> *Râbid* (רַבִּיד). The term is also applied to chain worn by a woman (Ec. xvi. 11).

limitation of string, to which a stone scarabæus, set in the same precious metal, was appended" (Wilkinson, ii. 339). The number of personal ornaments worn by the Egyptians, particularly by the females, is incidentally noticed in Ex. iii. 22:—"Every woman shall ask (A. V. "borrow") of her neighbor *trinkets* <sup>a</sup> of silver and *trinkets* <sup>a</sup> of gold . . . and ye shall spoil the Egyptians;" in Ex. xi. 2 the order is extended to the males, and from this time we may perhaps date the more frequent use of trinkets among men; for, while it is said in the former passage: "ye shall put them upon your sons and upon your daughters," we find subsequent notices of ear-rings being worn at all events by young men (Ex. xxxii. 2), and again of offerings both from men and women of "nose-rings,"<sup>b</sup> and ear-rings, and rings, and necklaces,<sup>c</sup> all articles of gold" (Ex. xxxv. 22). The profusion of those ornaments was such as to supply sufficient gold for making the sacred utensils for the Tabernacle, while the laver of brass was constructed out of the brazen mirrors<sup>d</sup> which the women carried about with them (Ex. xxxviii. 8). The Midianites appear to have been as prodigal as the Egyptians in the use of ornaments: for the Israelites are described as having captured "*trinkets* of gold, *armlets*,<sup>e</sup> and bracelets, rings, ear-rings,<sup>f</sup> and necklaces,<sup>g</sup> the value of which amounted to 16,750 shekels (Num. xxxi. 50, 52). Equally valuable were the ornaments obtained from the same people after their defeat by Gideon: "the weight of the golden nose-rings<sup>h</sup> was a thousand and seven hundred shekels of gold; beside collars<sup>i</sup> and ear-pendants<sup>k</sup> (Judg. viii. 26).

<sup>a</sup> *Celi*. See note *c*, p. 2267.

<sup>b</sup> *Chârâh* (חַרְאָה); A. V. "bracelets." The meaning of the term is rather doubtful, some authorities preferring the sense "buckle." In other passages the same word signifies the ring placed through the nose of an animal, such as a bull, to lead him by.

<sup>c</sup> *Cûmâz* (פְּרָמָז); A. V. "tablets." It means a necklace formed of perforated gold drops strung together. [NECKLACE.]

<sup>d</sup> *Marôth* (מַרְאוֹת); A. V. "looking-glasses." The use of polished mirrors is alluded to in Job xxxvii. 18. [MIRROR.]

<sup>e</sup> *Ets 'ädâh* (אֵת עֲדָה); A. V. "chains." A cognate term, used in Is. iii. 20, means "step-chain;" but the word is used both here and in 2 Sam. i. 10 without reference to its etymological sense. [ARMLET.]

<sup>f</sup> *'Agil* (עֲגִיל); a circular ear-ring, of a solid character.

<sup>g</sup> *Cûmâz*; A. V. "tablets." See note *c* above.

<sup>h</sup> *Nezen*; A. V. "ear-rings." See note *a*, p. 2267. The term is here undefined; but, as ear-rings are subsequently noticed in the verse, we think it probable that the nose-ring is intended.

<sup>i</sup> *Salarônim* (שַׁלְרֹנִים); A. V. "ornaments." The word specifies moon-shaped disks of metal, strung on a cord, and placed round the necks either of men or of camels. Compare ver. 21. [CHAIN.]

<sup>k</sup> *Netiphôth* (נֵטִיפּוֹת); A. V. "collars" or "sweet-jewels." The etymological sense of the word is pendants, which were no doubt attached to earrings.

<sup>l</sup> *Tôrîm* (תּוֹרִים); A. V. "rows." The term means, according to Gesenius (*Thes.* p. 1499), rows of pearls or beads; but, as the etymological sense is connected with *circle*, it may rather mean the individual

The poetical portions of the O. T. contain numerous references to the ornaments worn by the Israelites in the time of their highest prosperity. The appearance of the bride is thus described in the book of the Canticles: "Thy cheeks are comely with beads,<sup>1</sup> thy neck with *perforated* <sup>m</sup> (pearls); we will make thee beads of gold with studs of silver" (i. 10, 11). Her neck rising tall and stately "like the tower of David builded for an armoury," was decorated with various ornaments hanging like the "thousand bucklers, all shields of mighty men, on the walls of the armoury" (iv. 4); her hair falling gracefully over her neck is described figuratively as a "chain" <sup>n</sup> (iv. 9); and "the roundings" (not as in the A. V. "the joints") of her thighs are likened to the pendant<sup>o</sup> of an ear-ring, which tapers gradually downwards (vii. 1). So again we read of the bridegroom: "his eyes are . . . fitly set," <sup>p</sup> as though they were gems filling the sockets of rings (v. 12): "his hands are as gold rings <sup>q</sup> set with the beryl," <sup>i. e.</sup> (as explained by Gesenius, *Thesaur.* p. 287) the fingers when curved are like gold rings, and the nails dyed with henna resemble gems. Lastly, the yearning after close affection is expressed thus: "Set me as a seal upon thine heart, as a seal upon thine arm," whether that the seal itself was the most valuable personal ornament worn by a man, as in Jer. xxii. 24; Hag. ii. 23, or whether perchance the close contiguity of the seal to the wax on which it is impressed may not rather be intended (Cant. viii. 6). We may further notice the imagery employed in the Proverbs to describe the effects of wisdom in beautify-

beads, which might be strung together, and so make a row, encircling the cheeks. In the next verse the same word is rendered in the A. V. "borders." The sense must, however, be the same in both verses, and the point of contrast may perchance consist in the difference of the material, the beads in ver. 10 being of some ordinary metal, while those in ver. 11 were to be of gold.

<sup>m</sup> *Charâzîm* (חַרְצִימַי); A. V. "chains." The word would apply to any perforated articles, such as beads, pearls, coral, etc.

<sup>n</sup> *'Anâk* (עֲנָק). In the A. V. it is supposed to be literally a chain: and hence some critics explain the word attached to it, עֲנַקְתְּ, as meaning a "collar," instead of a "neck." The latter, which is the correct sense, may be retained by treating *'anâk* as metaphorically applied to a pendant lock of hair.

<sup>o</sup> *Chalâim* (חַלְאִים); A. V. "jewels." Gesenius understands the term as referring to a necklace, and renders this passage, "the roundings of thy hips are like the knobs or bosses of a necklace." The two notions of rounded and polished may be combined in the word in this case. A cognate term is used in Hos. ii. 13, and is rendered in the A. V. "jewels."

<sup>p</sup> The words in the original literally mean *sitting in fullness*; and the previous reference to "rivers of waters" would rather lead us to adopt a rendering in harmony with that image, as is done in the LXX. and the Vulgate, καθήμεναι ἐπὶ πληρώματα ὑδάτων, *juata fluentia plenissima*.

<sup>q</sup> The term here rendered "rings," *gelîm* (גְּלִימַי), is nowhere else found in this sense, at all events as a personal ornament. Its etymological sense implies something rounded, and therefore the word admits of being rendered "stuffs;" in which case a comparison would be instituted between the outstretched fingers and the handsomely decorated staff, of which we have already spoken (Hitzig, *in loc.*)

ng the character; in reference to the terms used we need only explain that the "ornament" of the A. V. in i. 9, iv. 40, is more specifically a wreath <sup>a</sup> or garland; the "chains" of i. 9, the drops <sup>b</sup> of which the necklace was formed, the "jewel of gold in a swine's snout" of xi. 22, a nose-ring; <sup>c</sup> the "jewel" of xx. 15, a trinket, and the "ornament" of xxv. 12, an ear-pendant.<sup>d</sup>

The passage of Isaiah (iii. 18-23), to which we have already referred, may be rendered as follows: (18) "In that day the Lord will take away the bravery of their anklets,<sup>e</sup> and their lace caps<sup>f</sup> and their necklaces; <sup>g</sup> (19) the ear-pendants,<sup>h</sup> and the bracelets,<sup>i</sup> and the light veils;<sup>k</sup> (20) the turbans,<sup>l</sup> and the step-chains,<sup>m</sup> and the girdles,<sup>n</sup> and the scent-bottles,<sup>o</sup> and the amulets; <sup>p</sup> (21) the rings and nose-rings; <sup>q</sup> (22) the state-dresses<sup>r</sup> and the cloaks, and the shawls, and the purses; <sup>s</sup> (23) the mirrors,<sup>t</sup> and the fine linen shirts, and the turbans,<sup>u</sup> and the light dresses."<sup>v</sup>

The following extracts from the Mishna (*Shabb. cap. vi.*) illustrate the subject of this article, it being premised that the object of the inquiry was to ascertain what constituted a proper article of dress, and what might be regarded by rabbinical refinement as a burden: "A woman must not go out (on the Sabbath) with linen or woollen laces, nor with the straps on her head: nor with a frontlet and pendants thereto, unless sewn to her cap: nor with a golden tower (*i. e.* an ornament in the shape of a tower): nor with a tight gold chain: nor with nose-rings: nor with finger-rings on which there is no seal: nor with a needle without any eye (§ 1): nor with a needle that has an eye: nor with a finger-ring that has a seal on it: nor with a diamond: nor with a smelling-bottle or balm-<sup>א</sup>ב ( § 3 ).

<sup>a</sup> *Livyāh* (לִיבָיָהּ).

<sup>b</sup> See note *n*, p. 2268.

<sup>c</sup> The word is *nezem*. See note *a*, p. 2267.

<sup>d</sup> *Chālī*. See note *o*, p. 2268.

<sup>e</sup> *Acāsīm* (עֲכָסִים); A. V. "tinkling ornaments about their feet." The effect of the anklet is described in ver. 16, "making a tinkling with their feet." [ANKLET.]

<sup>f</sup> *Shēbīstīm* (שֵׁבִיכִים); A. V. "cauls" or "networks." The term has been otherwise explained as meaning ornaments shaped like the sun, and worn as a necklace. [HAIR.]

<sup>g</sup> *Saharōnīm*; A. V. "round tires like the moon." See note *i* p. 2268.

<sup>h</sup> *Netiphōth*; A. V. "chains" or "sweet balls." See note *k* p. 2268.

<sup>i</sup> *Shērōth* (שֵׁרוֹת). The word refers to the construction of the bracelet by intertwining cords or metal rods.

<sup>k</sup> *Re'ālōth* (רֵעָלוֹת); A. V. "mufflers" or "spangled ornaments." The word describes the tremulous motion of the veil. [VEIL.]

<sup>l</sup> *Peērīm* (פְּעָרִים); A. V. "bonnets." The *peēr* may mean more specifically the decoration in front of the turban. [HEAD-DRESS.]

<sup>m</sup> *Tsēādōth* (צְעָדוֹת); A. V. "ornaments of the legs." See note *e* p. 2268. The effect of the step-chain is to give a "mincing" gait, as described in ver. 16.

<sup>n</sup> *Kishshurīm* (כִּשְׁשׁוּרִים); A. V. "head-bands." It probably means a handsomely decorated girdle (GIRDLE.) It formed part of a bride's attire (Jer. ii. 22).

A man is not to go out . . . with an amulet, unless it be by a distinguished sage (§ 2): knee-buckles are clean and a man may go out with them: step-chains are liable to become unclean, and a man must not go out with them" (§ 4). W. L. B.

OR'NAN (אֲרָנָן) [*a strong one, a hero*]: 'Opvā (Ornan). The form in which the name of the Jebusite king, who in the older record of the book of Samuel is called Araunah, Aranyah, Havarnah, or Haornah, is given in Chronicles (1 Chr. xxi. 15, 18, 20-25, 28; 2 Chr. iii. 1). This extraordinary variety of form is a strong corroboration to the statement that Ornan was a non-Israelite [ARAUNAH; JEBUSITE, vol. ii. p. 1222 *a*].

In some of the Greek versions of Origen's Hexapla collected by Bahrdt, the threshing-floor of Ornan (Ἐργὰ τοῦ Ἰεβουσαίου) is named for that of Nachon in 2 Sam. vi. 6. G.

ORPAH (אֲרָפָה) [see below]: 'Opφα: *Orpha*, [Ruth i. 4, 14.] A Moabite woman, wife of Chilion son of Naomi, and thereby sister-in-law to RUTH. On the death of their husbands Orpah accompanied her sister-in-law and her mother-in-law on the road to Bethlehem. But here her resolution failed her. The offer which Naomi made to the two younger women that they should return "each to their own mother's house," after a slight hesitation, she embraced. "Orpah kissed her mother-in-law," and went back "to her people and to her gods," leaving to the unconscious Ruth the glory, which she might have rivaled, of being the mother of the most illustrious house of that or any nation. G.

\* Simonis (p. 401) makes אֲרָפָה = אֲרָפָה, עֲרָפָה.

<sup>o</sup> *Bottē hannepheš* (בֵּיתֵי הַנֶּפֶשׁ); A. V. "tables," or "houses of the soul," the latter being the literal rendering of the words. The scent-bottle was either attached to the girdle or suspended from the neck.

<sup>p</sup> *Lechāshīm* (לְחָשִׁים); A. V. "ear-rings." The meaning of this term is extremely doubtful: it is derived from a root signifying "to whisper"; and hence is applied to the mutterings of serpent charmers, and in a secondary sense to amulets. They may have been in the form of ear-rings, as already stated. The etymological meaning might otherwise make it applicable to describe light, rustling robes (Saalschütz, *Archaeol.* i. 80).

<sup>q</sup> A. V. "nose-jewels."

<sup>r</sup> For this and the two following terms see DRESS.

<sup>s</sup> *Charītīm* (חֲרִיטִים); A. V. "crisping-pins." Compare 2 K. v. 23. According to Gesenius (*Thess.* p. 519), the purse is so named from its round, conical form.

<sup>t</sup> *Gilyōnīm* (גִּלְיֹנִים); A. V. "glasses." The term is not the same as was before used; nor is its sense well ascertained. It has been otherwise understood as describing a transparent material like gauze. See DRESS.

<sup>u</sup> A. V. "hoods." [HEAD-DRESS.]

<sup>v</sup> A. V. "vails." [DRESS.]

<sup>w</sup> Declined 'Opvā, *Opvāw*, in the Vat. MS. (Mat); but in the Alex. MS. constantly *Opva*. In the Targum on Chronicles the name is given in four different forms: usually אֲרָנָן, but also אֲרָנָן, אֲרָנָן, אֲרָנָן, and אֲרָנָן. See the edition of Beck (*Augs. v. ind.* 1680).

ῥαων (the letters being transposed); but Gesenius prefers *nime*, *forelock*, from  $\text{נִמְעַ$ .

## H.

**ORTHO'SIAS** (Ὀρθωσίας; Alex. *Ορθωσία*: *Orthosias*). Tryphon, when besieged by Antiochus Sidetes in Dora, fled by ship to Orthosias (1 Macc. xv. 37). Orthosias is described by P'liny (v. 17) as north of Tripolis, and south of the river Eleutherus, near which it was situated (Strabo, xvi. p. 753). It was the northern boundary of Phœnicæ, and distant 1130 stadia from the Orontes (id. p. 760). Shaw (*Trav.* pp 270, 271, 2d ed.) identifies the Eleutherus with the modern *Nahr el-Bârid* on the north bank of which, corresponding to the description of Strabo (p. 753), he found "ruins of a considerable city, whose adjacent district pays yearly to the bashaws of Tripoly a tax of fifty dollars by the name of *Or-tosa*. In Pentinger's Table, also, Orthosia is placed thirty miles to the south of Antaratulus, and twelve miles to the north of Tripoly. The situation of it likewise is further illustrated by a medal of Antoninus Pius, struck at Orthosia; upon the reverse of which we have the goddess Astarte treading upon a river. For this city was built upon a rising ground on the northern banks of the river, within half a furlong of the sea, and, as the rugged eminences of Mount Libanus lie at a small distance in a parallel with the shore, Orthosia must have been a place of the greatest importance, as it would have hereby the entire command of the road (the only one there is) betwixt Phœnicæ and the maritime parts of Syria." On the other hand, Mr. Porter, who identifies the Eleutherus with the modern *Nahr el-Kebîr*, describes the ruins of Orthosia as on the south bank of the *Nahr el-Bârid*, "the cold river" (*Hand'b.* p. 593), thus agreeing with the accounts of Ptolemy and P'liny. The statement of Strabo is not sufficiently precise to allow the inference that he considered Orthosia north of the Eleutherus. But if the ruins on the south bank of the *Nahr el-Bârid* be really those of Orthosia, it seems an objection to the identification of the Eleutherus with the *Nahr el-Kebîr*; for Strabo at one time makes Orthosia (xiv. p. 670), and at another the neighboring river Eleutherus (ὁ πλησιον ποταμός), the boundary of Phœnicæ on the north. This could hardly have been the case if the Eleutherus were 3½ hours, or nearly twelve miles, from Orthosia.

According to Josephus (*Ant.* x. 7, § 2), Tryphon fled to Apamea, while in a fragment of Charax, quoted by Grimm (*Kurzgef. Handb.*) from Müller's *Frag. Græc. Hist.* iii. p. 644, fr. 14, he is said to have taken refuge at Ptolemais. Grimm reconciles these statements by supposing that Tryphon fled first to Orthosia, then to Ptolemais, and lastly to Apamea where he was slain. W. A. W.

**OSATIAS** [3 syl.] (Ὀσαίτας; [Vat. omits:] **σα.** in Vulg.). A corruption of JESHIAIAH (1 Esdr. viii. 48; comp. Ezr. viii. 19).

**OSE'A** (*Osee*). HOSHEA the son of Elah, king of Israel (2 Esdr. xiii. 40).

**OSE'AS** (*Osee*). The prophet HOSEA (2 Esdr. i. 39).

\* **OSE'E** (Ὀσηέ; Tisch. Treg. Ὀσηέ: *Osee*). The prophet HOSEA (Rom. ix. 25). A.

**OSHE'A** (Ὀση'א, i. e. Hoshea [see below];

šamar.  $\text{שׁוֹשֵׁב}$ : *Aðsô*: *Osee*). The original name of Joshua the son of Nun (Num. xiii. 8), which on some occasion not stated — but which

we may with reason conjecture to have been his resistance to the factious conduct of the spies — received from Moses (ver. 16) the addition of the great name of Jehovah, so lately revealed to the nation (Ex. vi. 3), and thus from "Help" became "Help of Jehovah." The Samaritan Codex has Jehoshua in both places, and therefore misses the point of the change.

The original form of the name recurs in Deut. xxxii. 44, though there the A. V. (with more accuracy than here) has Hoshea.

Probably no name in the whole Bible appears in so many forms as that of this great personage, in the original five, and in the A. V. no less than seven — Oshea, Hoshea, Jehoshua, Jehoshuah, Joshua, Jeshua, Jesus; and if we add Hosea (also identical with Oshea) and Osea, nine. G.

**OSPRAY** (ἰσπρίαι, *osprîyâh*: ἀλταίετος: *haliaetus*). The Hebrew word occurs only in Lev. xi. 13, and Deut. xiv. 12, as the name of some unclean bird which the law of Moses disallowed as food to the Israelites. The old versions and many

*Pandion haliaetus.*

commentators are in favor of this interpretation; but Bochart (*Hieroz.* ii. 774) has endeavored, though on no reasonable grounds, to prove that the bird denoted by the Hebrew term is identical with

*Circusctus gallicus.*

the *melanæctus* (μελαναίετος) of Aristotle, the *Valeria aquila* of Pliny. There is, however, some difficulty in identifying the *haliaetus* of Aristotle

and Pliny, on account of some statements these writers make with respect to the habits of this bird. The general description they give would suit either the ospray (*Pandion haliaetus*) or the white-tailed eagle (*Haliaetus albicilla*). The following passage, however, of Pliny (x. 3), points to the ospray: "The *haliaetus* poises itself aloft, and the moment it catches sight of a fish in the sea below pounces headlong upon it, and cleaving the water with its breast, carries off its booty." With this may be compared the description of a modern naturalist, Dr. Richardson: "When looking out for its prey it sails with great ease and elegance, in undulating lines at a considerable altitude above the water, from whence it precipitates itself upon its quarry, and bears it off in its claws." Again, both Aristotle and Pliny speak of the diving habits of the *haliaetus*. The ospray often plunges entirely under the water in pursuit of fish. The ospray belongs to the family *Falconidae*, order *Raptatores*. It has a wide geographical range, and is occasionally seen in Egypt; but as it is rather a northern bird, the Hebrew word may refer, as Mr. Tristram suggests to us, either to the *Aquila naevia*, or *A. naevioles*, or more probably still to the very abundant *Circus gallicus* which feeds upon reptilia. W. H.

**OSSIFRAGE** (כֶּרֶב, *peres*: γρύψ: *gryps*). There is much to be said in favor of this translation of the A. V. The word occurs, as the name of an unclean bird, in Lev. xi. 13, and in the parallel passage of Deut. xiv. 12. (For other renderings of *peres* see Bochart, *Hieroz.* ii. 770.) The

generic name used by the Arabs to express any of the large kinds of the *Falconidae*." (See Loche's *Catalogue des Oiseaux observés en Algérie*, p. 37.) There is nothing conclusive to be gathered from the γρύψ of the LXX. and the *gryps* of the Vulgate, which is the name of a fabulous animal. Etymologically the word points to some rapacious bird with an eminently "hooked beak;" and certainly the ossifrage has the hooked beak characteristic of the order *Raptatores* in a very marked degree. If much weight is to be allowed to etymology, the *peres* of the Hebrew Scriptures may well be represented by the ossifrage, or bone-breaker; for *peres* in Hebrew means "the breaker." And the ossifrage (*Gypaëtus barbatus*) is well deserving of his name in a more literal manner, it will appear, than Col. H. Smith (Kitto's *Cyc.* art. "Peres") is willing to allow; for not only does he push kids and lambs, and even men, off the rocks, but he takes the bones of animals which other birds of prey have denuded of the flesh high up into the air, and lets them fall upon a stone in order to crack them, and render them more digestible even for his enormous powers of deglutition. (See Mr. Simpson's very interesting account of the *Lammergeyer* in *Ibis*, ii. 282.) The *lammergeyer*, or bearded vulture, as it is sometimes called, is one of the largest of the birds of prey. It is not uncommon in the East; and Mr. Tristram several times observed this bird "sailing over the high mountain-passes west of the Jordan" (*Ibis*, i. 23). The English word ossifrage has been applied to some of the *Falconidae*; but the *ossifraga* of the Latins evidently points to the *lammergeyer*, one of the *Vulturidae*. W. H.

**OSTRICH**. There can be no doubt that the Hebrew words *bath haya'anah*, *yá'en*, and *vánán*, denote this bird of the desert.

1. *Bath haya'anah* (בַּת־הַיָּאֲנָה): στρουθός, στρουθιον, σειρήν: *struthio* occurs in Lev. xi. 16, Deut. xiv. 15, in the list of unclean birds; and in other passages of Scripture. The A. V. erroneously renders the Hebrew expression, which signifies either "daughter of greediness" or "daughter of shouting," by "owl," or, as in the margin, by "daughter of owl." In Job xxx. 29, Is. xxxiv. 13, and xliii. 20, the margin of the A. V. correctly reads "ostriches." Bochart considers that *bath haya'anah* denotes the female ostrich only, and that *tachmás*, the following word in the Hebrew text, is to be restricted to the male bird. In all probability, however, this latter word is intended to signify a bird of another genus. [NIGHT-HAWK.] There is considerable difference of opinion with regard to the etymology of the Hebrew word *ya'anah*. Bochart (*Hieroz.* ii. 811) derives it from a root <sup>b</sup> meaning "to cry out" (see also Maurer, *Comment. in V. T. ad Thren.* iv. 3): and this is the interpretation of old commentators generally. Gesenius (*Theas. s. v.* יָעַן) refers the word to a root which signifies "to be greedy or voracious;" <sup>c</sup> and denurs to the explanation given by Michaelis (*Suppl. ad Lec. Heb.* p. 1127), and by Rosenmüller (*Not. ad Hieroz.* ii. 829, and *Schol. ad Lev.* xi. 16), who trace the Hebrew word *ya'anah* to one which in Arabic denotes "hard and sterile land:" <sup>d</sup> *bath haya'anah* accordingly would

*Gypaëtus barbatus*.

Arabic version has *okab*, which Bochart renders *αελανατος*, "the black eagle." [OSPRAY.] This word, however, is in all probability generic, and is used to denote any bird of the eagle kind, or in the vernacular Arabic of Algeria *okab* is "the

<sup>a</sup> פָּרַס, from פָּרַס, "to break," to "crash."  
<sup>b</sup> יָעַן, "to cry out"      <sup>c</sup> יָעַן.

<sup>d</sup> 5-1  
 وَاغْلَا, terra dura et sterilitis.

mean "daughter of the desert." Without entering into the merits of these various explanations, it will be enough to mention that any one of them is well suited to the habits of the ostrich. This bird, as is well known, will swallow almost any substance, pieces of iron, large stones, etc., etc.; this it does probably in order to assist the triturating action of the gizzard: so that the oriental expression of "daughter of voracity" is eminently characteristic of the ostrich.<sup>a</sup> With regard to the two other derivations of the Hebrew word, we may add that the cry of the ostrich is said sometimes to resemble the lion, so that the Hottentots of S. Africa are deceived by it; and that its particular haunts are the parched and desolate tracts of sandy deserts.

The loud crying of the ostrich seems to be referred to in Mic. i. 8: "I will wail and howl . . . I will make a mourning as the ostriches" (see also Job xxx. 29). The other passages where *bath haya'anah* occurs point to the desolate places which are the natural habitat of these birds.

2. *Yā'ên* (יָאֵן) occurs only in the plural number יָאֵנִים, *ye'ênim* (LXX. *στρουθίων, struthio*), in Lam. iv. 3, where the context shows that the ostrich is intended: "The daughter of my people is become cruel like the ostriches in the wilderness." This is important, as showing that the other word (1), which is merely the feminine form of this one, with the addition of *bath*, "daughter," clearly points to the ostrich as its correct translation, even if all the old versions were not agreed upon the matter. For remarks on Lam. iv. 3, see below.

3. *Rânân* (רָנַן). The plural form רָנַנִּים, *renânim*: LXX. *τεροβόμοι: struthio*) alone occurs in Job xxxix. 13; where, however, it is clear from the whole passage (13-18) that ostriches are intended by the word. The A. V. renders *renânim* by "peacocks," a translation which has not found favor with commentators; as "peacocks," for which there is a different Hebrew name,<sup>b</sup> were probably not known to the people of Arabia or Syria before the time of Solomon. [PEACOCKS.] The "ostrich" of the A. V. in Job xxxix. 13 is the representative of the Hebrew *nôṣeh*, "feathers." The Hebrew *renânim* appears to be derived from the root *rânan*,<sup>c</sup> "to wail," or to "utter a stridulous sound," in allusion to this bird's nocturnal cries. Gesenius compares the Arabic *zimar*, "a female ostrich," from the root *zamar*, "to sing."

The following short account of the nidification of the ostrich (*Struthio camelus*) will perhaps elucidate those passages of Scripture which ascribe cruelty to this bird in neglecting her eggs or young. Ostriches are polygamous: the hens lay their eggs promiscuously in one nest, which is merely a hole scratched in the sand; the eggs are then covered over to the depth of about a foot, and are, in the case of those birds which are found within the tropics, generally left for the greater part of the day to the heat of the sun, the parent-birds taking their turns at incubation during the night. But in those countries which have not a tropical sun ostriches frequently incubate during the day, the

male taking his turn at night, and watching over the eggs with great care and affection, as is evidenced by the fact that jackals and other of the smaller *carnivora* are occasionally found dead near the nest, having been killed by the ostrich in defense of the eggs or young. "As a further proof of the affection of the ostrich for its young" (we quote from Shaw's *Zoology*, xi. 426), "it is related by Thunberg that he once rode past a place where a female was sitting on her nest, when the bird sprang up and pursued him, evidently with a view to prevent his noticing her eggs or young." The habit of the ostrich leaving its eggs to be matured by the sun's heat is usually appealed to in order to confirm the Scriptural account, "she leaveth her eggs to the earth;" but, as has been remarked above, this is probably the case only with the tropical birds: the ostriches with which the Jews were acquainted were, it is likely, birds of Syria, Egypt, and North Africa; but, even if they were acquainted with the habits of the tropical ostriches, how can it be said that "she forgetteth that the foot may crush" the eggs, when they are covered a foot deep or more in sand?<sup>d</sup> We believe the true

Ostrich.

explanation of this passage is to be found in the fact that the ostrich deposits some of her eggs not in the nest, but around it: these lie about on the surface of the sand, to all appearance forsaken; they are, however, designed for the nourishment of the young birds, according to Levaillant and Bonjainville (Cuvier, *An. King.* by Griffiths and others, viii. 432). Are not these the eggs "that the foot may crush," and may not hence be traced the cruelty which Scripture attributes to the ostrich? We have had occasion to remark in a former article [ANT], that the language of Scripture is adapted to the opinions commonly held by the people of the East: for how otherwise can we explain, for instance, the passages which ascribe to

<sup>a</sup> Mr. Tristram, who has paid considerable attention to the habits of the ostrich, has kindly read over this article; he says, "The necessity for swallowing stones, etc., may be understood from the favorite food of the same ostriches I have seen being the date-stone, the hardest of vegetable substances."

<sup>b</sup> תַּיִם יָרִים.

<sup>c</sup> רָנַן.

<sup>d</sup> See Tristram (*Ibis*, ii. 74); "Two Arabs began to dig with their hands, and presently brought up four fine fresh eggs from the depth of about a foot under the warm sand."

the hare or to the coney the habit of chewing the cud? And this remark will hold good in the passage of Job which speaks of the ostrich being without understanding. It is a general belief amongst the Arabs that the ostrich is a very stupid bird: indeed they have a proverb, "Stupid as an ostrich;" and Bochart (*Hieroz.* ii. 865) has given us five points on which this bird is supposed to deserve its character. They may be briefly stated thus: (1) Because it will swallow iron, stones, etc.; (2) Because when it is hunted it thrusts its head into a bush and imagines the hunter does not see it;<sup>a</sup> (3) Because it allows itself to be deceived and captured in the manner described by Strabo (xvi. 772, ed. Kramer); (4) Because it neglects its eggs;<sup>b</sup> (5) Because it has a small head and few brains. Such is the opinion the Arabs have expressed with regard to the ostrich; a bird, however, which by no means deserves such a character, as travellers have frequently testified. "So wary is the bird," says Mr. Tristram (*Ibis*, ii. 73), "and so open are the vast plains over which it roams, that no ambuscades or artifices can be employed, and the vulgar resource of dogged perseverance is the only mode of pursuit."

Dr. Shaw (*Travels*, ii. 345) relates as an instance of want of sagacity in the ostrich, that he "saw one swallow several leaden bullets, scorching hot from the mould." We may add that not unfrequently the stones and other substances which ostriches swallow prove fatal to them. In this one respect, perhaps, there is some foundation for the character of stupidity attributed to them.

The ostrich was forbidden to be used as food by the Levitical law, but the African Arabs, says Mr. Tristram, eat its flesh, which is good and sweet. Ostrich's brains were among the dainties that were placed on the supper-tables of the ancient Romans. The fat of the ostrich is sometimes used in medicine for the cure of palsy and rheumatism (Pococke, *Travels*, i. 209). Burckhardt (*Syria*, Append. p. 664) says that ostriches breed in the Dhahy. They are found, and seem formerly to have been more abundant than now, in Arabia.

The ostrich is the largest of all known birds, and perhaps the swiftest of all cursorial animals. The capture of an ostrich is often made at the sacrifice of the lives of two horses (*Ibis*, ii. 73). Its strength is enormous. The wings are useless for flight, but when the bird is pursued they are extended and act as sails before the wind. The ostrich's feathers so much prized are the long white plumes of the wings. The best come to us from Barbary and the west coast of Africa. The ostrich belongs to the family *Struthionida*, order *Cursores*.

## W. II.

\* OTHER, in the A. V. Josh. viii. 22; 2 Chr. xxxii. 22; Job xxiv. 24; Phil. ii. 3, iv. 3, is used in the plural, for "others." In Luke xxiii. 32 the unfortunate rendering of the A. V., "two other malefactors," has been amended in some modern editions by inserting a comma after "other." The Greek is ἑτεροὶ δύο, κακοῦργοι, "two others, malefactors."

## A.

OTH'NI (אֹתְנִי) [prob. *lion of Jehovah*]: Othni; [Vat. *Θοθνι*.;] Alex. *Θοθνι*: Othni. Son

of Shemaiah, the first-born of Obed-edom, one of the "able men for strength for the service" of the Tabernacle in the reign of David (1 Chr. xxvi. 7). The name is said by Gesenius to be derived from an obsolete word, 'Othen, "a lion."

OTH'NIEL (אֹתְנִיֵּל), *lion of God*, cf. Othni, 1 Chr. xxvi. 7; *Γοθωνιήλ*: Othniel, [*Gothoniel*], son of Kenaz, and younger brother of Caleb (Josh. xv. 17; Judg. i. 13, iii. 9, 11; 1 Chr. iv. 13, xxvii. 15). But these passages all leave it doubtful whether Kenaz was his father, or, as is more probable, the more remote ancestor and head of the tribe, whose descendants were called Kenezites (Num. xxxii. 12, &c.), or sons of Kenaz. If Jephunneh was Caleb's father, then probably he was father of Othniel also. [CALEB.] The first mention of Othniel is on occasion of the taking of Kirjath-Sepher, or Debir, as it was afterwards called. Debir was included in the mountainous territory near Hebron, within the border of Judah, assigned to Caleb the Kenezite (Josh. xiv. 12-15); and in order to stimulate the valor of the assailants, Caleb promised to give his daughter Achsah to whosoever should assault and take the city. Othniel won the prize, and received with his wife in addition to her previous dowry the upper and nether springs in the immediate neighborhood. These springs are identified by Van de Velde, after Stewart, with a spring which rises on the summit of a hill on the north of Wady Dilbeh (2 hours S. W. from Hebron), and is brought down by an aqueduct to the foot of the hill. (For other views see DEBIR.) The next mention of Othniel is in Judg. iii. 9, where he appears as the first judge of Israel after the death of Joshua, and their deliverer from their first servitude. In consequence of their intermarriages with the Canaanites, and their frequent idolatries, the Israelites had been given into the hand of Chushan-Rishathaim, king of Mesopotamia, for eight years. From this oppressive servitude they were delivered by Othniel. "The Spirit of the Lord came upon him, and he judged Israel, and went out to war: and the Lord delivered Chushan-Rishathaim, king of Mesopotamia, into his hand; and his hand prevailed against Chushan-Rishathaim. And the land had rest forty years. And Othniel the son of Kenaz died."

This with his genealogy (1 Chr. iv. 13, 14), which assigns him a son, Hathath, whose posterity, according to Judith vi. 15, continued till the time of Holofernes. is all that we know of Othniel. But two questions of some interest arise concerning him, the one his exact relationship to Caleb; the other the time and duration of his judgeship.

(1.) As regards his relationship to Caleb, the doubt arises from the uncertainty whether the words in Judg. iii. 9, "Othniel the son of Kenaz, Caleb's younger brother," indicate that Othniel himself, or that Kenaz was the brother of Caleb. The most natural rendering, according to the canon of R. Moses ben Nachman, on Num. x. 29, that in constructions of this kind such designations belong to the principal person in the preceding sentence, makes Othniel to be Caleb's brother. And this is favored by the probability that Kenaz was not Othniel's father, but the father and head of the tribe, as we learn that Kenaz was, from the desig-

<sup>a</sup> This is an old conceit; see Pliny (x. 1), and the remark of Diodorus Siculus (li. 50) thereon.

<sup>b</sup> Ostriches are very shy birds, and will, if their nest

is discovered, frequently forsake the eggs. Sure' this is a mark rather of sagacity than stupidity

nation of Caleb as "the Kenezite," or "son of Kenaz." Jerome also so translates it, "Othniel filius Cenez, frater Caleb junior;" and so did the LXX. originally, because even in those copies which now have ἀδελφού, they still retain νεώτερον in the acc. case. Nor is the objection, which influences most of the Jewish commentators to understand that Kenaz was Caleb's brother, and Othniel his nephew, of any weight. For the marriage of an uncle with his niece is not expressly prohibited by the Levitical law (Lev. xviii. 12, xx. 19); and even if it had been, Caleb and Othniel as men of foreign extraction would have been less amenable to it, and more likely to follow the custom of their own tribe. On the other hand it must be acknowledged that the canon above quoted does not hold universally. Even in the very passage (Num. x. 29) on which the canon is adduced, it is extremely doubtful whether the designation "the Midianite, Moses' father-in-law," does not apply to Reuel, rather than to Hobab, seeing that Reuel, and not Hobab, was father to Moses' wife (Ex. ii. 18). In Jer. xxxii. 7, in the phrase "Hanameel the son of Shallum thine uncle," the words "thine uncle" certainly belong to Shallum, not to Hanameel, as appears from vv. 8, 9. And in 2 Chr. xxxv. 3, 4; Neh. xiii. 28, the designations "King of Israel," and "high-priest," belong respectively to David, and to Eliashib. The chronological difficulties as to Othniel's judgeship would also be mitigated considerably if he were nephew and not brother to Caleb, as in this case he might well be 25, whereas in the other he could not be under 40 years of age, at the time of his marriage with Achsah. Still the evidence, candidly weighed, preponderates strongly in favor of the opinion that Othniel was Caleb's brother.

(2.) And this leads to the second question suggested above, namely, the time of Othniel's judgeship. Supposing Caleb to be about the same age as Joshua, as Num. xiii. 6, 8; Josh. xiv. 10, suggest, we should have to reckon about 25 years from Othniel's marriage with Achsah till the death of Joshua at the age of 110 years ( $85 + 25 = 110$ ). And if we take Africanus's allowance of 30 years for the elders after Joshua, in whose lifetime "the people served the Lord" (Judg. ii. 7), and then allow 8 years for Chushan-Rishathaim's dominion, and 40 years of rest under Othniel's judgeship, and suppose Othniel to have been 40 years old at his marriage, we obtain ( $40 + 25 + 30 + 8 + 40 =$ ) 143 years as Othniel's age at his death. This we are quite sure cannot be right. Nor does any escape from the difficulty very readily offer itself. It is in fact a part of that larger chronological difficulty which affects the whole interval between the exodus and the building of Solomon's Temple, where the dates and formal notes of time indicate a period more than twice as long as that derived from the genealogies and other ordinary calculations from the length of human life, and general historical probability. In the case before us one would guess an interval of not more than 25 years between Othniel's marriage and his victory over Chushan-Rishathaim.

In endeavoring to bring these conflicting statements into harmony, the first thing that occurs to one is, that if Joshua lived to the age of 110 years, i. e. full 30 years after the entrance into Canaan, supposing him to have been 40 when he went as a spy, he must have outlived all the elder men of the generation which took possession of Canaan,

and that 10 or 12 years more must have seen the last of the survivors. Then again, it is not necessary to suppose that Othniel lived through the whole 80 years of rest, nor is it possible to avoid suspecting that these long periods of 40 and 80 years are due to some influences which have disturbed the true computation of time. If these dates are discarded, and we judge only by ordinary probabilities, we shall suppose Othniel to have survived Joshua not more than 20, or at the outside, 30 years. Nor, however unsatisfactory this may be, does it seem possible, with only our present materials, to arrive at any more definite result. It must suffice to know the difficulties and wait patiently for the solution, should it ever be vouchsafed to us.

A. C. H.

**OTHONI'AS** (Ὀθωνίας: *Zochias*). A corruption of the name ΜΑΤΤΑΝΙΑΗ in Ezr. x. 27 (1 Esdr. ix. 28).

\* **OUCHES** (Ex. xxviii. 11, 13, 14, 25, xxxix. 6, 13, 16, 18) denotes the *bezels* or *sockets* in which precious stones are set. In Old English it was also applied to the jewels themselves. The earlier form of the word is *nouches* or *nowches*, which occurs in Chaucer.

A.

\* **OUTROAD.** To "make outroads" (1 Macc. xv. 41, A. V. ed. 1611) is to "make excursions." In some modern editions nonsense is made of the passage by printing it "make out roads."

A.

**OVEN** (אֵפֶן : κλῆβανος). The eastern oven is of two kinds — fixed and portable. The former is found only in towns, where regular bakers are employed (Hos. vii. 4). The latter is adapted to the nomad state, and is the article generally intended by the Hebrew term *tannûr*. It consists of a large jar made of clay, about three feet high, and widening towards the bottom, with a hole for the extraction of the ashes (Niebuhr, *Descr. de l'Arab.* p. 46). Occasionally, however, it is not an actual jar, but an erection of clay in the form of a jar, built on the floor of the house (Wellsted, *Travels*, i. 350). Each household possessed such an article (Ex. viii. 3); and it was only in times of extreme dearth that the same oven sufficed for several families (Lev. xxvi. 26). It was heated with dry twigs and grass (Matt. vi. 30); and the loaves were placed both inside and outside of it. It was also used for roasting meat (Mishna, *Taan.* 3, § 8). The heat of the oven furnished Hebrew writers with an image of rapid and violent destruction (Ps. xxi. 9; Hos. vii. 7; Mal. iv. 1).

W. L. B.

Egyptian Oven.

\* **OVERPASS** (A. V. Jer. v. 28; *Eclus. iv* 14) is "to pass by," "neglect." A.

\* **OVERRUN** (A. V. 2 Sam. xviii. 23) means to "outrun." A.

\* **VERSEERS**, as a ministerial title, Acts xx. 28. [BISHOP.] H.

\* **OWE**, in Lev. xiv. 35; Acts xxi. 11 (A. V. ed. 1611), is used in the sense of "to own," which has been substituted for it in modern editions. A.

**OWL**, the representative in the A. V. of the Hebrew words *bath haya'anāh*, *yanshūph*, *cōs*, *kippōz*, and *līlīth*.

1. *Bath haya'anāh* (בַּת־הַיַּעֲנָה). [OS-TRICH.]

2. *Yanshūph*, or *yanshōph* (יַנְשׁוּף, יַנְשׁוּף; יָבִיס, γλαύς; α *ibis*), occurs in Lev. xi. 17; Deut. xiv. 16, as the name of some unclean bird, and in Is. xxiv. 11, in the description of desolate Edom, "the *yanshōph* and the raven shall dwell in it." The A. V. translates *yanshūph* by "owl," or "great owl." The Chaldee and Syriac are in favor of some kind of owl; and perhaps the etymology of the word points to a nocturnal bird. Bochart is satisfied that an "owl" is meant, and supposes the bird is so called from the Hebrew for "twilight" (*Hieroz.* iii. 29). For other conjectures see Bochart (*Hieroz.* iii. 24-29). The LXX. and Vulg. read *Ybis* (*ibis*), i. e. the *Ibis religiosa*, the sacred bird of Egypt. Col. H. Smith suggests that the night heron (*Ardea nycticorax*, Lin.) is perhaps intended, and objects to the ibis on the ground that so rare a bird, and one totally unknown in Palestine, could

*Ibis religiosa.*

not be the *yanshūph* of the Pentateuch; there is, however, no occasion to suppose that the *yanshūph* was ever seen in Palestine; the Levitical law was given soon after the Israelites left Egypt, and it is only natural to suppose that several of the unclean animals were Egyptian; some might never have been seen or heard of in Palestine: the *yanshūph* is mentioned as a bird of Edom (Is. l. c.), and the ibis might have formerly been seen there; the old Greek and Latin writers are in error when they state that this bird never leaves Egypt: Cuvier says it is found throughout the extent of Africa,

and latterly Dr. Heuglin met with it on the coast of Abyssinia (*List of Birds collected in the Red Sea*; "Ibis," i. 347). The Coptic version renders *yanshūph* by "Hippen," from which it is believed the Greek and Latin word *ibis* is derived (see Jablonski's *Opusc.* i. 93, ed. te Water). On the whole the evidence is inconclusive, though it is in favor of the *Ibis religiosa*, and probably the other Egyptian species (*Ibis falcinellus*) may be included under the term. See on the subject of the Ibis of the ancients, Savigny's *Histoire naturelle et mythologique de l'Ibis* (Paris, 1807, 8vo); and Cuvier's *Mémoire sur l'Ibis des Anciens Égyptiens* (*Ann. Mus.* iv. 116).

3. *Cōs* (פֹּרֶס : νυκτικράξ, ἑρωδίδος; *bubo*, *herodius*, *nycticorax*), the name of an unclean bird (Lev. xi. 17; Deut. xiv. 16); it occurs again in Ps. cii. 6. There is good reason for believing that the A. V. is correct in its rendering of "owl" or "little owl." Most of the old versions and paraphrases are in favor of some species of "owl" as the proper translation of *cōs*: Bochart is inclined to think that we should understand the pelican (*Hieroz.* iii. 17), the Hebrew *cōs* meaning a "cup," or "pouch;" the pelican being so called from its membranous bill-pouch. He compares the Latin *trua*, "a pelican," from *trua*, "a scoop" or "ladle." But the ancient versions are against this theory, and there does not seem to be much doubt that *kaath* is the Hebrew name for the pelican. The passage in Ps. cii. 6, "I am like a pelican of the wilderness, I am like a *cōs* of ruined places," points decidedly to some kind of owl. Michaelis, who has devoted great attention to the elucidation of this word, has aptly compared one of the Arabic names for the owl, *um elcharab* ("mother of ruins"), in reference to the expression

*Otus ascalaphus.*

in the psalm just quoted (comp. *Suppl. ad Lex. Heb.* p. 1236, and Rosenmüller, *Not. ad Hieroz.* l. c.). Thus the context of the passage in the Psalm where the Hebrew word occurs, as well as the authority of the old versions, goes far to prove that an *owl* is intended by it. The *νυκτικράξ* of

α It is important to observe, in reference to the LXX. renderings of the Hebrew names of the different unclean birds, etc. that the verses of Deut. xiv. ar

some of them evidently transposed (see Michaelis *Suppl.* i. 1240, and note): the order as given in Lev. xi is, therefore, to be taken as the standard

the LXX. is no doubt a general term to denote the different species of *horned owl* known in Egypt and Palestine; for Aristotle (*H. An.* viii. 14, § 6) tells us that *νυκτικόραξ* is identical with *ἄστος*, evidently, from his description, one of the horned owls, perhaps either the *Otus vulgaris*, or the *O. brachyotos*. The owl we figure is the *Otus ascalanus*, the Egyptian and Asiatic representative of our great horned owl (*Bubo maximus*). Mr. Tristram says it swarms among the ruins of Thebes, and that he has been informed it is also very abundant at Petra and Baalbec; it is the great owl of all eastern ruins, and may well therefore be the "cōs of ruined places."

4. *Kippōz* (כִּפּוֹז) : *ἐχίνος*: *ericicus* occurs only in Is. xxxiv. 15: "There (*i. e.* in Edom) the *kippōz* shall make her nest, and lay and hatch and gather under her shadow." It is a hopeless affair to attempt to identify the animal denoted by this word; the LXX. and Vulg. give "hedgog," reading no doubt *kippōd* instead of *kippōz*, which variation six Hebrew MSS. exhibit (Michaelis, *Suppl.* p. 2199). Various conjectures have been made with respect to the bird which ought to represent the Hebrew word, most of which, however, may be passed over as unworthy of consideration. We cannot think with Bochart (*Hieroz.* iii. 194, &c.) that a darting serpent is intended (the *ἄκοντις* of Nicander and Ælian, and the *jaculus* of Lucan), for the whole context (Is. xxxiv. 16) seems to point to some *bird*, and it is certainly stretching the words very far to apply them to any kind of serpent. Bochart's argument rests entirely on the fact that the cognate Arabic, *kippāz*, is used by Avicenna to denote some darting tree-serpent; but this theory, although supported by Gesenius, Fürst, Rosenmüller, and other high authorities, must be rejected as entirely at variance with the plain and literal meaning of the prophet's words; though incubation by reptiles was denied by Cuvier, and does not obtain amongst the various orders and families of this class as a general rule, yet some few excepted instances are on record, but "the gathering under the shadow" clearly must be understood of the act of a bird fostering her young under her wings; the *kippōz*, moreover, is mentioned in the same verse with "vultures" (kites), so that there can be no doubt that some bird is intended.

*Scops aldrovan.*

Deodati, according to Bochart, conjectures the "Scops owl," being led apparently to this interpretation on somewhat strained etymological grounds.

See on this subject Bochart, *Hieroz.* iii. 197; and for the supposed connection of *σκῶψ* with *σκῶπτος*, see Ælian, *Nat. Anim.* xv. 28; Pliny, x. 49; Eustathius, on *Odys.* v. 66; and Jacobs' annotations to Ælian, l. c. We are content to believe that *kippōz* may denote some species of owl, and to retain the reading of the A. V. till other evidence be forthcoming. The wood-cut represents the *Athene meridionalis*, the commonest owl in Palestine. Mount Olivet is one of its favorite resorts (*Ibis*, i. 26). Another common species of owl is the *Scops zorca*; it is often to be seen inhabiting the mosque of Omar at Jerusalem (see Tristram, in *Ibis*, i. 26).

*Athene meridionalis.*

5. *Lilith* (לִילִית) : *ὄνοκένταυροι*; Aq. *Λιλθ*, Symm. *λαμία*: *lamia*). The A. V. renders this word by "screech-owl" in the text of Is. xxxiv. 14, and by "night-monster" in the margin. The *lilith* is mentioned in connection with the desolation that was to mark Edom. According to the Rabbins the *lilith* was a nocturnal spectre in the form of a beautiful woman that carried off children at night and destroyed them (see Bochart, *Hieroz.* iii. 829; Gesenius, *Thes.* s. v. לִילִית; Buxtorf, *Lex. Chald. et Talm.* p. 1140). With the *lilith* may be compared the *ghule* of the Arabian fables. The old versions support the opinion of Bochart that a spectre is intended. As to the *ὄνοκένταυροι* of the LXX., and the *lamia* of the Vulgate translations of Isaiah, see the *Hieroz.* iii. 832 and Gesenius (*Jesaja*, i. 915-920). Michaelis (*Suppl.* p. 1443) observes on this word, "in the poetical description of desolation we borrow images even from fables." If, however, some animal be denoted by the Hebrew term, the screech-owl (*strix flammea*) may well be supposed to represent it, for this bird is found in the Bible lands (see *Ibis*, i. 26, 46), and is, as is well known, a frequent inhabitant of ruined places. The statement of Irby and Mangles relative to Petra illustrates the passage in Isaiah under consideration: "The screaming of eagles, hawks, and owls, which were soaring above our heads in considerable numbers, seemingly annoyed at any one approaching their lonely habitation, added much to the singularity of the scene." (See also Stephens, *Incid. of Trav.* ii. 76.)

OX (OX: *Idox*), an ancestor of Judith (Jud. iii. 1).  
B. F. W.

OX, the representative in the A. V. of several Hebrew words, the most important of which have been already noticed. [BULL; BULLOCK.]

We propose in this article to give a general review of what relates to the ox tribe (*Bovide*), so far as the subject has a Biblical interest. It will be convenient to consider (1) the ox in an economic point of view, and (2) its natural history.

1. There was no animal in the rural economy of the Israelites, or indeed in that of the ancient Orientals generally, that was held in higher esteem than the ox; and deservedly so, for the ox was the animal upon whose patient labors depended all the ordinary operations of farming. Ploughing with horses was a thing never thought of in those days. Asses, indeed, were used for this purpose [ASS]; but it was the ox upon whom devolved for the most part this important service. The preëminent value of the ox to "a nation of husbandmen like the Israelites," to use an expression of Michaelis in his article on this subject, will be at once evident from the Scriptural account of the various uses to which it was applied. Oxen were used for ploughing (Deut. xxii. 10; 1 Sam. xiv. 14; 1 K. xix. 19; Job i. 14; Am. vi. 12, &c.); for treading out corn (Deut. xxv. 4; Hos. x. 11; Mic. iv. 13; 1 Cor. ix. 9; 1 Tim. v. 18) [AGRICULTURE]; for draught purposes, when they were generally yoked in pairs (Num. vii. 3; 1 Sam. vi. 7; 2 Sam. vi. 6); as beasts of burden (1 Chr. xii. 40); their flesh was eaten (Deut. xiv. 4; 1 K. i. 9, iv. 23 xix. 21; Is. xxii. 13; Prov. xv. 17; Neh. v. 18); they were used in the sacrifices [SACRIFICES]; they supplied milk, butter, etc. (Deut. xxxii. 14; Is. vii. 22; 2 Sam. xvii. 23) [BUTTER; MILK].

Connected with the importance of oxen in the rural economy of the Jews is the strict code of laws which was mercifully enacted by God for their protection and preservation. The ox that threshed the corn was by no means to be muzzled; he was to enjoy rest on the Sabbath as well as his master (Ex. xxiii. 12; Deut. v. 14); nor was this only, as Michaelis has observed, on the people's account, because beasts can perform no work without man's assistance, but it was for the good of the beasts "that thine ox and thine ass may rest."

The law which prohibited the slaughter of any clean animal, excepting as "an offering unto the Lord before the tabernacle," during the time that the Israelites abode in the wilderness (Lev. xvii. 1-6), although expressly designed to keep the people from idolatry, no doubt contributed to the preservation of their oxen and sheep, which they were not allowed to kill excepting in public. There can be little doubt that during the forty years' wanderings oxen and sheep were rarely used as food, whence it was *flesh* that they so often lusted after. (See Michaelis, *Laws of Moses*, art. 169.)

It is not easy to determine whether the ancient Hebrews were in the habit of castrating their animals or not. The passage in Lev. xxi. 24 may be read two ways, either as the A. V. renders it, or thus, "Ye shall not offer to the Lord that which is bruised," etc., "neither shall ye make it so in your and." Le Clerc believed that it would have been impossible to have used an uncastrated ox for agricultural purposes on account of the danger. Michaelis, on the other hand, who cites the express testimony of Josephus (*Ant.* iv. 8, § 40), argues that

castration was wholly forbidden, and refers to the authority of Niebuhr (*Descr. de l'Arab.*, p. 81), who mentions the fact that Europeans use stallions for cavalry purposes. In the East, it is well known horses are as a rule not castrated. Michaelis observes (art. 168), with truth, that where people are accustomed to the management of uncastrated animals, it is far from being so dangerous as we from our experience are apt to imagine.

It seems clear from Prov. xv. 17, and 1 K. iv. 23, that cattle were sometimes stall-fed [FOOD], though as a general rule it is probable that they fed in the plains or on the hills of Palestine. That the Egyptians stall-fed oxen is evident from the representations on the monuments (see Wilkinson's *Anc. Egypt.* i. 27, ii. 49, ed. 1854). The cattle that grazed at large in the open country would no doubt often become fierce and wild, for it is to be remembered that in primitive times the lion and other wild beasts of prey roamed about Palestine. Hence, no doubt, the laws with regard to "going," and the expression of "being wont to push with his horns" in time past (Ex. xxi. 28, &c.); hence the force of the Psalmist's complaint of his enemies, "Many bulls have compassed me, the mighty ones of Bashan have beset me round" (Ps. xxii. 13). The habit of surrounding objects which excite their suspicion is very characteristic of half-wild cattle. See Mr. Culley's observations on the Chillingham wild cattle, in Bell's *British Quadrupeds* (p. 424).

2. The monuments of Egypt exhibit representations of a long-horned breed of oxen, a short-horned, a polled, and what appears to be a variety of the zebu (*Bos Indicus*, Lin.). Some have identified this latter with the *Bos Dante* (the *Bos elegans et parvus Africanus* of Belon). The Abyssinian breed is depicted on the monuments at Thebes (see *Anc. Egypt.* i. 385), drawing a *plastrum* or car. [CART.] These cattle are "white and black in clouds, low in the legs, with the horns hanging loose, forming small horny hooks nearly of equal thickness to the point, turning freely either way, and hanging against the cheeks" (see Hamilton Smith in Griffith's *Anim. King.* iv. 425). The drawings on Egyptian monuments shew that the cattle of ancient Egypt were fine handsome animals: doubtless these may be taken as a sample of the cattle of Palestine in ancient times. "The cattle of Egypt," says Col. H. Smith (Kitto's *Cyc.* art. "OX"), a high authority on the *Ruminantia*, "continued to be remarkable for beauty for some ages after the Moslem conquest, for Abdollatiph the historian extols their bulk and proportions, and in particular mentions the Alchisiah breed for the abundance of the milk it furnished, and for the beauty of its curved horns." (See figures of Egyptian cattle under AGRICULTURE.) There are now fine cattle in Egypt; but the Palestine cattle appear to have deteriorated, in size at least, since Biblical times. "Herds of cattle," says Schubert (*Oriental Christian Spectator*, April, 1853), "are seldom to be seen; the bullock of the neighborhood of Jerusalem is small and insignificant; beef and veal are but rare dainties. Yet the bullock thrives better, and is more frequently seen, in the upper valley of the Jordan, also on Mount Tabor and near Nazareth, but particularly along of the Jordan on the road from Jacob's bridge to Damascus." See also Thomson (*Land and Book*, p. 322), who observes (p. 335) that danger from being gored has not ceased "among the half-wild droves that range

over the luxuriant pastures in certain parts of the country."

The buffalo (*Bubalus bubalus*) is not uncommon in Palestine; the Arabs call it *jámús*. Robinson (*Bibl. Res.* iii. 306) notices buffaloes "around the lake el-Hálch as being mingled with the neat cattle, and applied in general to the same uses. They are a shy, ill-looking, ill-tempered animal." These animals love to wallow and lie for hours in water or mud, with barely the nostrils above the surface. It is doubtful whether the domestic buffalo was known to the ancient people of Syria, Egypt, etc.; the animal under consideration is the *bhainsa*, or tame buffalo of India; and although now common in the West, Col. H. Smith is of opinion that it was not known in the Bible lands till after the Arabian conquest of Persia (A. D. 651). Robinson's remark, therefore, that the buffalo doubtless existed anciently in Palestine in a wild state, must be received with caution. [See further remarks on this subject under UNICORN.]

The A. V. gives "wild ox" in Deut. xiv. 5, and "wild bull" in Is. li. 20, as the representatives of the Hebrew word *teó* or *tó*.

*Teó* or *tó* (תֵּוֹ, תֹּ) : *δρυξ*, *σέντλιον* <sup>a</sup>; Aq., Symm., and Theod., *δρυξ*: *oryx*. Among the beasts that were to be eaten mention is made of the *teó* (Deut. l. c.); again, in Isaiah, "they lie at the head of all the streets like a *tó* in the nets." The most important ancient versions point to the *oryx* (*Oryx leucorox*) as the animal denoted by the Hebrew words. Were it not for the fact that another Hebrew name (*yachmur*) seems to stand for this animal, <sup>b</sup> we should have no hesitation in referring the *teó* to the antelope above named. Col. H. Smith suggests that the antelope he calls the Nubian *Oryx* (*Oryx tao*), may be the animal intended; this, however, is probably only a variety of the other. Oedmann (*Verm. Stamm.* p. iv. 23) thinks the *Bubule* (*Alcephalus bubalis*) may be the *tó*; this is the *Bekker-el-wash* of N. Africa mentioned by Shaw (*Trav.* i. 310, 8vo ed.). The point must be left undetermined. See FALLOW DEER.

W. H.

\* The grain used for fodder in the East (see above) is principally barley; only the poorest of the people eat this grain, and they only when wheat fails them. Oats are not cultivated in the East for fodder. There is a wild species of *avena* which grows extensively as a weed in Syria, and is often plucked up with the *Hordeum bulbosum* and other *Gramineæ*, and fed as green fodder to the cattle, but it is never sown, and never threshed out. Its grain is small and lean, and would not be profitable as a crop. This species is called by the Arabs

شَيْفُون (*shāphoon*). Barley is the universal fodder of the Orientals. It is given mixed with the fine-cut straw of its own stalk from the threshing-floors, also with the straw of wheat. This latter

is called تَبْن (*tibn*). Barley is not used in the East for distilling purposes, as far as I know. I never saw native whiskey. The Arabic name for

<sup>a</sup> As to this word, see Schleusner, *Lex.* in LXX.

<sup>b</sup> *Yachmur*, in the vernacular Arabic of N. Africa, is one of the names for the *oryx*.

barley شَعِير (*sha'ir*) is from the same root as

the Hebrew, and undoubtedly refers to the long hair-like beards of the ripe ears. G. E. P.

OX-GOAD. [GOAD.]

O'ZEM (זְעֵם, i. e. Otsem [*strength, power*]). The name of two persons of the tribe of Judah.

1. ([*Ἀσδμ*; Vat.] Alex. *Ἀσσμ*: *Assom*.) The sixth son of Jesse, the next eldest above David (1 Chr. ii. 15). His name is not again mentioned in the Bible, nor do the Jewish traditions appear to contain anything concerning him.

2. (*Ἀσδν*; <sup>c</sup> Alex. *Ἀσσμ*: *Assom*.) SON of Jerahmeel, a chief man in the great family of Hezron (1 Chr. ii. 25). G.

OZIAS (Ὀζίας; [Vat. Sin. *Οζίας*, and so Alex. vi. 15, 21, viii. 28, 35, xv. 4:] *Ozias*). 1. The son of Michah of the tribe of Simeon, one of the "governors" of Bethulia, in the history of Judith (Jud. vi. 15 [16, 21], vii. 23 [30], viii. 10, 28, 35 [xv. 4]). B. F. W.

2. [Vat. *Οζίας*; Alex. *Εζίας*.] UZZI, one of the ancestors of Ezra (2 Esdr. i. 2); also called SAVIAS (1 Esdr. viii. 2).

3. [Lachm. Tisch. Treg. *Ὀζίας*.] UZZIAH, King of Judah (Matt. i. 8, 9).

O'ZIEL (Ὀζήλ; [Vat. Sin. Alex. *Οζήηλ*: *Ozias*], an ancestor of Judith (Jud. viii. 1). The name occurs frequently in O. T. under the form UZZIEL. B. F. W.

OZNI (זְנִי [having ears, attentive]: *Ἀζενί*: [Vat. *Αζενει*;] Alex. *Αζαυι*: *Ozni*). One of the sons of Gad (Num. xxvi. 16), called EZBOH in Gen. xli. 16, and founder of the family of the

OZ'NITES (זְנִיָּת [as above]: *δημος δ' Ἀζενι* [Vat. *-νει*;] Alex. *δ. ο Αζαυι*: *familia Ozniatarum*), Num. xxvi. 16.

OZORA (Ὀζωρά; [Ald. *Ὀζωρά*]). "The sons of Machnadebai," in Ezr. x. 40, is corrupted into "the sons of Ozora" (1 Esdr. ix. 34).

P.

PA'ARAI [3 syl.] (פְּאַרַי [perh. *Jehovah reveals*, Fürst: Alex.] *Φαραει*; [Comp. *Φαρααί*:] *Pharai*). In the list of 2 Sam. xxiii. 35, "Paarai the Arbite" is one of David's mighty men. In 1 Chr. xi. 37, he is called "Naarai the son of Ezbai," and this in Kennicott's opinion is the true reading (*Diss.* p. 209-211). The Vat. MS. [Rom.] omits the first letter of the name, and reads the other three with the following word, thus, *οβρα-οερχι* [Vat. *-χει*]. The Peshito-Syriac has "Gari of Arub," which makes it probable that "Naarai" is the true reading, and that the Syriac translators mistook *ן* for *ל*.

PADAN (פְּדָן [acre, field]: *Μεσοποταμία τῆς Συρίας*: *Mesopotamia*). Padan-Aram (Gen. xlviii. 7).

<sup>c</sup> The word following this — פְּדָן — A. V. *Ahl jah*, Vulg. *Achia*, is in the LXX. rendered ἀχιάζαυτου.

**PADAN-ARAM** (פַּדְאֵן אֲרָם) [see below]:  
 ἡ Μεσοποταμία Συρίας, Gen. xxv. 20, xxviii. 6, 7, xxxiii. 18; ἡ M. Gen. xxviii. 2, 5, xxxi. 18; M. τῆς Συρ. Gen. xxv. 9, 26, xli. 15; Alex. η M. Gen. xxv. 20, xxviii. 5, 7, xxxi. 18; η M. Συρ. Gen. xxviii. 2, xxxiii. 18; Mesopotamía, Gen. xxv. 20, xxxi. 18; M. Syriae, Gen. xxviii. 2, 5, 6, xxxiii. 18, xxxv. 9, 26, xli. 15; Syria, Gen. xxvi. 15). By this name, more properly *Paddan-Aram*, which signifies "the table-land of Aram" according to Fürst and Gesenius, the Hebrews designated the tract of country which they otherwise called Aram-naharaim, "Aram of the two rivers," the Greek Mesopotamia (Gen. xxiv. 10), and "the field (A. V. 'country') of Aram" (Hos. xii. 12). The term was perhaps more especially applied to that portion which bordered on the Euphrates, to distinguish it from the mountainous districts in the N. and N. E. of Mesopotamia. Rashi's note on Gen. xxv. 20 is curious: "Because there were two Arams, Aram-naharaim and Aram Zobah, he (the writer) calls it Paddan-Aram: the expression 'yoke of oxen' is in the Targums פַּדְאֵן הַרְרִין, *paddan tórin*; and some interpret Paddan-Aram as 'field of Aram,' because in the language of the Ishmaelites they call a field 'paddan' (أفدان). In Syr. حَبْل, *pidmó*, is used for a "plain" or "field;" and both this and the Arabic word are probably from the

root *fid*, *fadda*, "to plough," which seems akin to *fid*-in *fidit*, from *findere*. If this etymology be true *Paddan-Aram* is the arable land of Syria; "either an upland vale in the hills, or a fertile district immediately at their feet" (Stanley, *S. & P.* p. 123, note). *Paddan*, the ploughed land, would thus correspond with the Lat. *arvum*, and is analogous to Eng. *field*, the *felled* land, from which the trees have been cleared.

Padan-Aram plays an important part in the early history of the Hebrews. The family of their founder had settled there, and were long looked upon as the aristocracy of the race, with whom alone the legitimate descendants of Abraham might intermarry, and thus preserve the purity of their blood. Thither Abraham sent his faithful steward (Gen. xxiv. 10), after the news had reached him in his southern home at Beer-sheba that children had been born to his brother Nahor. From this family alone, the offspring of Nahor and Milcah, Abraham's brother and niece, could a wife be sought for Isaac, the heir of promise (Gen. xxv. 20), and Jacob the inheritor of his blessing (Gen. xxviii.).

It is elsewhere called PADAN simply (Gen. lviii. 7). W. A. W.

\* **PADDLE** is used in Deut. xxiii. 13 (A. V.) in the sense of a "small spade" or "shovel." The term is still applied in provincial English to an instrument of this kind (also called *paddle-staff*), used by ploughmen for freeing the share from earth. "Thou shalt have a *paddle upon thy weapon*," in the passage above referred to, would be better translated, "Thou shalt have a *small tool among thy implements*" (*ein Schäuſtein bei einer Geräthschaft*, Bunsen). A.

† The resemblance between *Laadah* (לַעֲדָה, 1 Chr. iv. 21), one of the sons of Shelah, and *Laaitan* (לַעֲיָן), an ancestor of Joshua (1 Chr. vii. 26), may

**PADON** (פְּדוֹן) [*deliverance*]: פֶּאדוֹן: *Phadon*). The ancestor of a family of Nethinim who returned with Zerubbabel (Ezr. ii. 44; Neh. vii. 47). He is called PHALEAS in 1 Esdr. v. 29.

**PAG'IEL** (פַּגְעִיֵּל) [*God allot*]: פֶּאגְעִיֵּל: Alex. פֶּאגֶּאֶתְלָא, [and so Vat. i. 13, ii. 27:] *Phe-giel*). The son of Ocran, and chief of the tribe of Asher at the time of the Exodus (Num. i. 13, ii. 27, vii. 72, 77, x. 26).

**PA'HATH-MO'AB** (פְּרַחַת מוֹאָב): פֶּאאָב [Vat. also פֶּאָלָאב, פֶּאָאָב, פֶּאָאָב (so FA. Neh. iii. 11, where Rom. פֶּאָאָרְ)] *Moadb*: *Phahath-Moab*, "governor of Moab"). Head of one of the chief houses of the tribe of Judah. Of the individual or the occasion of his receiving so singular a name, nothing is known certainly, either as to the time when he lived, or the particular family to which he belonged. But as we read in 1 Chr. iv. 22, of a family of Shilonites, of the tribe of Judah, who in very early times "had dominion in Moab," it may be conjectured that this was the origin of the name. It is perhaps a slight corroboration of this conjecture that as we find in Ezr. ii. 6, that the sons of Pahath-Moab had among their number "children of Joab," so also in 1 Chr. iv. we find these families who had dominion in Moab very much mixed with the sons of Caleb, among whom, in 1 Chr. ii. 54, iv. 14, we find the house of Joab.<sup>a</sup> It may further be conjectured that this dominion of the sons of Shelah in Moab, had some connection with the migration of Elimelech and his sons into the country of Moab, as mentioned in the book of Ruth; nor should the close resemblance of the names

עֲרַפְרָה (Ophrah), 1 Chr. iv. 14, and עֲרַפְרָה (Orpah), Ruth i. 4, be overlooked. Jerome, indeed, following doubtless his Hebrew master, gives a mystical interpretation to the names in 1 Chr. iv. 22, and translates the strange word *Jashub-lehem*, "they returned to Leem" (Bethlehem). And the author of *Quest. Heb. in Lib. Parateip.* (printed in Jerome's works; follows up this opening, and makes *JOKIM* (qui stare fecit solem) to mean ELIAKIM, and the men of Chozeba (viri mendacii), Joash and Saraph (*securus et incendens*), to mean Mahlon and Chilion, who took wives (פְּעֻלָּה) in Moab, and returned (i. e. Ruth and Naomi did) to the plentiful bread of Bethlehem (*house of bread*); interpretations which are so far worth noticing, as they point to ancient traditions connecting the migration of Elimelech and his sons with the Jewish dominion in Moab mentioned in 1 Chr. iv. 22.<sup>b</sup> However, as regards the name Pahath-Moab, this early and obscure connection of the families of Shelah the son of Judah with Moab seems to supply a not improbable origin for the name itself, and to throw some glimmering upon the association of the children of Joshua and Joab with the sons of Pahath-Moab. That this family was of high rank in the tribe of Judah we learn from their appearing *fourth* in order in the two lists, Ezr. ii. 6; Neh. vii. 11, and from their chief having signed *second*, among the lay princes, in Neh. x. 14. It was also the most numerous (2818) of all the families specified, except the

be noted in connection with the mention of *Joash*, Ezr. ii. 6.

<sup>b</sup> 1 Sam. xxii. 3, may also be noticed in this connection.

Benjamite house of Senaah (Neh. vii. 38). The name of the chief of the house of Pahath-Moab, in Nehemiah's time, was Hashub; and, in exact accordance with the numbers of his family, we find him repairing *two* portions of the wall of Jerusalem (Neh. iii. 11, 23). It may also be noticed as slightly confirming the view of Pahath-Moab being a Shilonite family, that whereas in 1 Chr. ix. 5-7, Neh. xi. 5-7, we find the Benjamite families in close juxtaposition with the Shilonites, so in the building of the wall, where each family built the portion over against their own habitation, we find Benjamin and Hashub the Pahath-Moabite coupled together (Neh. iii. 23). The only other notices of the family are found in Ezr. viii. 4, where 200 of its males are said to have accompanied Elihoönai, the son of Zerabiah, when he came up with Ezra from Babylon; and in Ezr. x. 30, where eight of the sons of Pahath-Moab are named as having taken strange wives in the time of Ezra's government.

\* PAI (פַּי: פּוֹגָרֹפּ: *Phau*), 1 Chr. i. 50, a town of Idumæa. [PAU.] A.

PAINT (as a cosmetic). The use of cosmetic dyes has prevailed in all ages in eastern countries. We have abundant evidence of the practice of painting the eyes both in ancient Egypt (Wilkinson, ii. 342) and in Assyria (Layard's *Nineveh*, ii. 328); and in modern times no usage is more general. It does not appear, however, to have been by any means universal among the Hebrews. The notices of it are few; and in each instance it seems to have been used as a meretricious art, unworthy of a woman of high character. Thus Jezebel "put her eyes in painting" (2 K. ix. 30, margin); Jeremiah says of the harlot city, "Though thou rentest thy eyes with painting" (Jer. iv. 30); and Ezekiel again makes it a characteristic of a harlot (Ez. xxiii. 40; comp. Joseph. *B. J.* iv. 9, § 10). The expressions used in these passages are worthy of observation, as referring to the mode in which the process was effected. It is thus described by Chandler (*Travels*, ii. 140): "A girl, closing one of her

"Eye ornamented with Kohl, as represented in ancient paintings." (Lane, p. 37, new ed.)

eyes, took the two lashes between the forefinger and thumb of the left hand, pulled them forward, and then thrusting in at the external corner a rod which had been immersed in the soot, and extracting it again, the particles before adhering to it remained within, and were presently ranged round the organ." The eyes were thus literally "put in paint," and were "rent" open in the process. A broad line was also drawn round the eye, as represented in the accompanying cut. The effect was an apparent enlargement of the eye; and the expression in Jer. iv. 30 has been by some understood in this sense (Ges. *Thes.* p. 1239), which is without doubt admissible, and would harmonize

<sup>a</sup> פָּחַל.

<sup>b</sup> The Hebrew verb has even been introduced into the Spanish version: "Alcoholaste tuos ojos" (Ges. *Thes.* p. 676).

<sup>c</sup> פָּחַל.

with the observations of other writers (Juv. ii. 94, "obliquâ *producit* acui;" Plin. *Ep.* vi. 2). The term used for the application of the dye was *kâchal*,<sup>a</sup> "to smear;" and Rabbinical writers described the paint itself under a cognate term (Mishn. *Shabb.* 8, § 3). These words still survive in *kohl*,<sup>b</sup> the modern oriental name for the powder used. [See note, vol. ii. p. 1391 (Amer. ed.).] The Bible gives no indication of the substance out of which the dye was formed. If any conclusion were deducible from the evident affinity between the Hebrew *pâk*,<sup>c</sup> the Greek *φύκος*, and the Latin *fuscus*, it would be to the effect that the dye was of a vegetable kind. Such a dye is at the present day produced from the henna plant (*Lawsonia inermis*), and is extensively applied to the hands and the hair (Russell's *Alippo*, i. 109, 110). But the old versions (the LXX., Chaldee, Syriac, etc.) agree in pronouncing the dye to have been produced from antimony, the very name of which (στίβιον) probably owed its currency in the ancient world to this circumstance, the name itself and the application of the substance having both emanated from Egypt.<sup>d</sup> Antimony is still used for the purpose in Arabia (Burckhardt's *Travels*, i. 376), and in Persia (Morier's *Second Journey*, p. 61), though lead is also used in the latter country (Russell, i. 366); but in Egypt the *kohl* is a soot produced by burning either a kind of frankincense or the shells of almonds (Lane, i. 61). The dye-stuff was moistened with oil, and kept in a small jar, which we may infer to have been made of horn, from the proper name, Keren-happuch, "horn for paint" (Job xlii. 14). The probe with

Ancient Vessel and Probe for Kohl.

which it was applied was made either of wood, silver, or ivory, and had a blunted point. Both the probe and the jar have frequently been discovered in Egyptian tombs (Wilkinson, ii. 343). In addition to the passages referring to eye-paint already quoted from the Bible, we may notice probable allusions to the practice in Prov. vi. 25, Ecclus. xxvi. 9, and Is. iii. 16, the term rendered

"wanton" in the last passage bearing the radical sense of painted. The contrast between the black paint and the white of the eye led to the transfer of the term *pâk* to describe the variegated stones used in the string courses of a handsome building (1 Chr. xxix. 2; A. V. "glistening stones," lit. *stones of eye-paint*); and again the dark cement in which marble or other bright stones were imbedded (Is. liv. 11; A. V. "I will lay thy stones with fair colors"). Whether the custom of staining the hands and feet, particularly the nails, now so prevalent in the East, was known to the Hebrews, is doubtful. The plant, *henna*, which is used for that purpose, was certainly known (Cant. i. 14; A. V. "camphire"), and the expressions in Cant. v. 14 may possibly refer to the custom. W. L. B.

PALACE. There are few tasks more difficult or puzzling than the attempt to restore an ancient

<sup>d</sup> This mineral was imported into Egypt for the purpose. One of the pictures at *Beni Hassan* represents the arrival of a party of traders in stibium. The powder made from antimony has been always supposed to have a beneficial effect on the eyesight (Plin. xxxiii. 84; Russell, i. 111; Lane, i. 61)

building of which we possess nothing but two verbal descriptions, and these difficulties are very much enhanced when one account is written in a language like Hebrew, the scientific terms in which are, from our ignorance, capable of the widest latitude of interpretation; and the other, though written in a language of which we have a more

definite knowledge, was composed by a person who never could have seen the buildings he was describing.

Notwithstanding this, the palace which Solomon occupied himself in erecting during the thirteen years after he had finished the Temple is a building of such world-wide notoriety, that it cannot

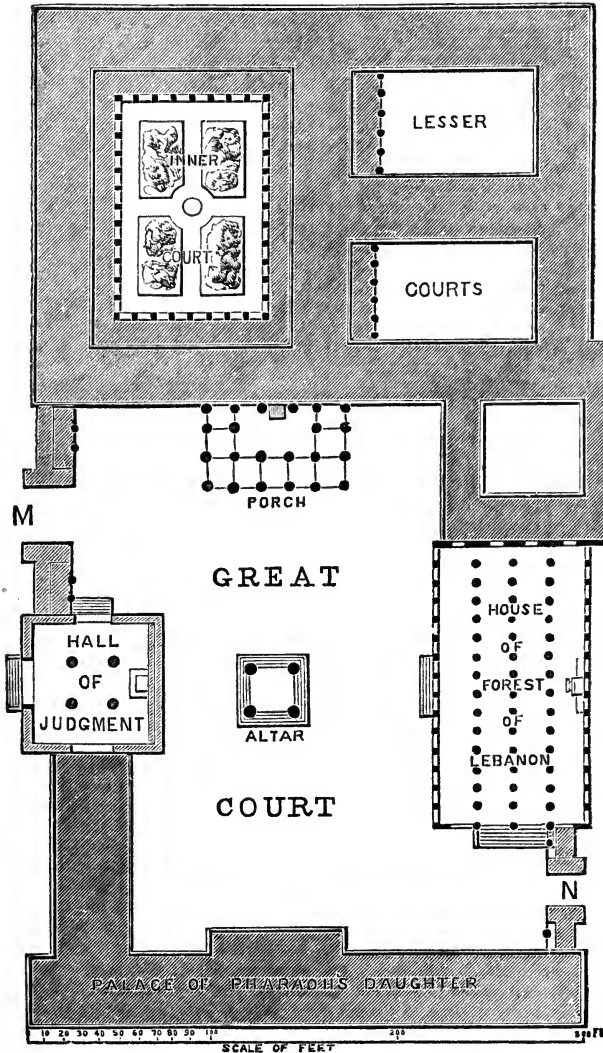

Fig. 1. Diagram Plan of Solomon's Palace.

be without interest to the Biblical student that those who have made a special study of the subject, and who are familiar with the arrangements of eastern palaces, should submit their ideas on the subject; and it is also important that our knowledge on this, as on all other matters connected with the Bible, should be brought down to the latest date. Almost all the restorations of this celebrated edifice which are found in earlier

editions of the Bible are what may be called Vitruvian, namely, based on the principles of classical architecture which were the only ones known to their authors. During the earlier part of this century attempts were made to introduce the principles of Egyptian design into these restorations, but with even less success. The Jews hated Egypt and all that it contained, and everything they did, or even thought, was antagonistic to the arts and

feelings of that land of bondage. On the other hand, the exhumation of the palaces of Nineveh, and the more careful examination of those at Persepolis, have thrown a flood of light on the subject. Many expressions which before were entirely unintelligible are now clear and easily understood, and, if we cannot yet explain everything, we know at least where to look for analogies, and what was the character, even if we cannot predicate the exact form, of the buildings in question.

The site of the Palace of Solomon was almost certainly in the city itself, on the brow opposite to the Temple, and overlooking it and the whole city of David.<sup>a</sup> It is impossible, of course, to be at all certain what was either the form or the exact disposition of such a palace, but, as we have the dimensions of the three principal buildings given in the book of Kings, and confirmed by Josephus, we may, by taking these as a scale, ascertain pretty nearly that the building covered somewhere about 150,000 or 160,000 square feet. Less would not suffice for the accommodation specified, and more would not be justified, either from the accounts we have, or the dimensions of the city in which it was situated. Whether it was a square of 400 feet each way, or an oblong of about 550 feet by 300, as

represented in the annexed diagram, must always be more or less a matter of conjecture. The form here adopted seems to suit better not only the exigencies of the site, but the known disposition of the parts.

The principal building situated within the Palace was, as in all eastern palaces, the great hall of state and audience; here called the "House of the Forest of Lebanon." Its dimensions were 100 cubits, or 150 feet long, by half that, or 75 feet, in width. According to the Bible (1 K. vii. 2) it had "four rows of cedar pillars with cedar beams upon the pillars;" but it is added in the next verse that "it was covered with cedar above the beams that lay on 45 pillars, 15 in a row." This would be easily explicable if the description stopped there, and so Josephus took it. He evidently considered the hall, as he afterwards described the Stoa basilica of the Temple, as consisting of four rows of columns, three standing free, but the fourth built into the outer wall (*Ant.* xi. 5); and his expression, that the ceiling of the palace hall was in the Corinthian manner (*Ant.* vii. 5, § 2), does not mean that it was of that order, which was not then invented, but after the fashion of what was called in his day a Corinthian œcus, namely, a hall with

Fig. 2. Diagram Sections of the House of Cedars of Lebanon.

a clere-story. If we, like Josephus, are contented with these indications, the section of the hall was certainly as shown in fig. A. But the Bible goes on to say (ver. 4) that "there were windows in three rows," and in the next verse it repeats, "and light was against light in three ranks." Josephus escapes the difficulty by saying it was lighted by "θυρώμασι τριγυλίφοις," or by windows in three divisions, which might be taken as an extremely probable description if the Bible were not so very specific regarding it; and we must therefore adopt some such arrangement as that shown in figure B. Though other arrangements might be suggested, on the whole it appears probable that this is the one nearest the truth; as it admits of a clere-story, to which Josephus evidently refers, and shows the three rows of columns which the Bible description requires. Besides the clere-story there was probably a range of openings under the cornice of the walls, and then a range of open doorways, which would thus make the three openings required by the Bible description. In a hotter climate the first arrangement (fig. A) would be the more probable; but on a site so exposed and occasionally so cold

as Jerusalem, it is scarcely likely that the great hall of the palace was permanently open even on one side.

Another difficulty in attempting to restore this hall arises from the number of pillars being unequal ("15 in a row"), and if we adopt the last theory (fig. B), we have a row of columns in the centre both ways. The probability is that it was closed, as shown in the plan, by a wall at one end, which would give 15 spaces to the 15 pillars, and so provide a central space in the longer dimension of the hall in which the throne might have been placed. If the first theory be adopted, the throne may have stood either at the end, or in the centre of the longer side, but, judging from what we know of the arrangement of eastern palaces, we may be almost certain that the latter is the correct position.

Next in importance to the building just described is the hall or porch of judgment (ver. 7), which Josephus distinctly tells us (*Ant.* vii. 5, § 1) was situated opposite to the centre of the longer side of the great hall: an indication which may be admitted with less hesitation, as such a position is identical with that of a similar hall at Persepolis,

<sup>a</sup> \* This allusion to "the city of David" is based on the author's peculiar theory, which is set forth at length, and answered, in article JERUSALEM. Stanley suggests, with equal confidence, a different locality

from the above. "The new Palace must have been apart from the castle of David, and considerably below the level of the Temple-mount." (*History of the Jewish Church*, ii. 215.) S. W.

and with the probable position of one at Khor-sabad.

Its dimensions were 50 cubits, or 75 feet square (Josephus says 30 in one direction at least), and its disposition can easily be understood by comparing the descriptions we have with the remains of the Assyrian and Persian examples. It must have been supported by four pillars in the centre, and had three entrances; the principal opening from the street and facing the judgment-seat, a second from the court-yard of the palace, by which the councillors and officers of state might come in, and a third from the palace, reserved for the king and his household as shown in the plan (fig. 1, N).

The third edifice is merely called "the Porch." Its dimensions were 50 by 30 cubits, or 75 feet by 45. Josephus does not describe its architecture; and we are unable to understand the description contained in the Bible, owing apparently to our ignorance of the synonyms of the Hebrew architectural terms. Its use, however, cannot be considered as doubtful, as it was an indispensable adjunct to an Eastern palace. It was the ordinary place of business of the palace, and the reception-room — the Guesten Hall — where the king received ordinary visitors, and sat, except on great state occasions, to transact the business of the kingdom.

Behind this, we are told, was the inner court, adorned with gardens and fountains, and surrounded by cloisters for shade; and besides this were other courts for the residence of the attendants and guards, and in Solomon's case, for the three hundred women of his harem: all of which are shown in the plan with more clearness than can be conveyed by a verbal description.

Apart from this palace, but attached, as Josephus tells us, to the Hall of Judgment, was the palace of Pharaoh's daughter — too proud and important a personage to be grouped with the ladies of the harem, and requiring a residence of her own.

There is still another building mentioned by Josephus, as a *temple* or temple, supported by massive columns, and situated opposite the Hall of Judgment. It may thus have been outside, in front of the palace in the city; but more probably was, as shown in the plan, in the centre of the great court. It could not have been a temple in the ordinary acceptation of the term, as the Jews had only one temple, and that was situated on the other side of the valley; but it may have been an altar covered by a baldachino. This would equally meet the exigencies of the description as well as the probabilities of the case; and so it has been represented in the plan (fig. 1).

If the site and disposition of the palace were as above indicated, it would require two great portals: one leading from the city to the great court, shown at M; the other to the Temple and the king's garden, at N. This last was probably situated where the stairs then were which led up to the City of David, and where the bridge afterwards joined the Temple to the city and palace.

The recent discoveries at Nineveh have enabled us to understand many of the architectural details of this palace, which before they were made were nearly wholly inexplicable. We are told, for instance, that the walls of the halls of the palace were wainscotted with three tiers of stone, apparently versi-colored marbles, hewn and polished, and surmounted by a fourth course, elaborately carved with representations of leafage and flowers. Above

this the walls were plastered and ornamented with colored arabesques. At Nineveh the walls were like these, wainscoted to a height of about eight feet, but with alabaster, a peculiar product of the country, and these were separated from the painted space above by an architectural band; the real difference being that the Assyrians revealed in sculptural representations of men and animals, as we now know from the sculptures brought home, as well as from the passage in Ezekiel (xxiii. 14) where he describes "men pourtrayed on the wall, the images of the Chaldeans pourtrayed with vermilion," etc. These modes of decoration were forbidden to the Jews by the second commandment, given to them in consequence of their residence in Egypt and their consequent tendency to that multifarious idolatry. Some difference may also be due to the fact that the soft alabaster, though admirably suited to bassi-relievi, was not suited for sharp, deeply-cut foliage sculpture, like that described by Josephus; while, at the same time, the hard material used by the Jews might induce them to limit their ornamentation to one band only. It is probable, however, that a considerable amount of color was used in the decoration of these palaces, not only from the constant reference to gold and gilding in Solomon's buildings, and because that as a color could hardly be used alone, but also from such passages as the following: "Build me a wide house and large" — or through-aired — "chambers, and cutteth out windows; and it is ceiled with cedar, and painted with vermilion" (Jer. xxii. 14). It may also be added, that in the East all buildings, with scarcely an exception, are adorned with color internally, generally the three primitive colors used in all their intensity, but so balanced as to produce the most harmonious results.

Although incidental mention is made of other palaces at Jerusalem and elsewhere, they are all of subsequent ages, and built under the influence of Roman art, and therefore not so interesting to the Biblical student as this. Besides, none of them are anywhere so described as to enable their disposition or details to be made out with the same degree of clearness, and no instruction would be conveyed by merely reiterating the rhetorical flourishes in which Josephus indulges when describing them; and no other palace is described in the Bible itself so as to render its elucidation indispensable in such an article as the present. J. F.

\* PALACE in A. V., singular and plural, is the rendering of several words of diverse meaning (בֵּית־הַמֶּלֶךְ, 1 Chr. xxix. 1 *al.*; הַיְבֵל, Ezr. iv. 14 *al.*; הַבְּרִיטָה, 2 K. xv. 25 *al.*; הַבְּרִיטָה, Am. iv. 3; הַבְּרִיטָה, Ez. xxv. 4 *al.*; בְּיָרֵךְ, 2 Chr. ix. 11 *al.*; בְּיָרֵךְ, Dan. xi. 45; LXX. οἶκος, L. xxxii. 14 *al.*; πόλις, Esth. ii. 13 *al.*; ναός, 1<sup>st</sup>. xlv. 15 *al.*; βάρυς, Lam. ii. 5 *al.*; ἀβυρά, βιρά, Neh. i. 1, vii. 2; θεμέλια (pl.), Jer. vi. 5 *al.*; χώρα, Mic. v. 5 *al.*; ἄντρον, 1 K. xvi. 18; ἄλως, 1 K. xxi. 1; ἔπαυλις, 1<sup>st</sup>. lxix. 25; πυργόβαρις, Ps. cxvii. 7; ἔπαλις, Cant. viii. 9; γῆ, Jer. ix. 21; ἀμφοδα (pl.), Jer. xvii. 27 *al.*; Ἐφθαυῶν, Dan. xi. 45, Ῥομαῖα, Am. iv. 3; βασιλείων, Na. ii. 6; N. T., αὐλή, Matt. xxv. 58 *al.*; πραιτώριον, Phil. i. 13).<sup>a</sup>

<sup>a</sup> \* On "Palace" in Phil. i. 13 (A. V.), see JUDGMENT-SEAT [Amer. ed.], and PRÆTORIUM at the end H.

It often designates the royal residence and usually suggests a fortress, or battlemented house — the citadel, as the most secure place, being commonly in eastern towns the abode of the ruler. The word occasionally (as in Esth. ix. 12) includes the whole city; and again (as in 1 K. xvi. 18) it is restricted to a part of the royal apartments. It is applied (as in 1 Chr. xxix. 1) to the Temple in Jerusalem. By "the palace which appertained to the house" (Nab. ii. 6) is probably meant the tower of Antonia adjacent to the Temple.

The Palace of Solomon, who "was building his own house thirteen years" (1 K. vii. 1), of which a conjectural restoration is attempted in the preceding article, must have stood on the high eastern brow of Zion, overlooking the Temple and the lower city. No site within the walls could have been more commanding, and the immense edifice, built of white stone and cedar-wood, must have been one of the most imposing. The Asmonean princes, according to Josephus, whose descriptions of the city have been mainly confirmed, erected a palace on the same site, adjoining the great bridge which spanned the Tyropœon. It was also occupied as a royal residence by the Herodian family, and was enlarged by king Agrippa. Magnificent private residences were probably embraced in the allusions found in the Psalms and the Prophets to the palaces of Zion. The massive foundations which have been uncovered, as the subterranean parts of the modern city have been explored, convey an impressive idea of the architectural solidity and grandeur of ancient Jerusalem. S. W.

**PAL'LAL** (פָּלַל) [a judge]: φαλάξ; [Vat. φαλα; FA. φαλακ:] Alex. φαλάξ: *Phalel*. The son of Uzai, who assisted in restoring the walls of Jerusalem in the time of Nehemiah (Neh. iii. 25).

**PALESTINA** and **PALESTINE**. These two forms occur in the A. V. but four times in all, always in poetical passages: the first, in Ex. xv. 14, and Is. xiv. 29, 31; the second, Joel iii. 4. In each case the Hebrew is פְּלִשְׁתִּים, *Pel'sheth*, a word found, besides the above, only in Ps. lx. 8, lxxxiii. 7, lxxxvii. 4, and cviii. 9, in all which our translators have rendered it by "Philistia" or "Philistines." The LXX. has in Ex. φυλιστινίμ, but in Is. and Joel ἀλλόφυλοι; the Vulg. in Ex. *Philisthim*, in Is. *Philisthaea*, in Joel *Palesthini*. The apparent ambiguity in the different renderings of the A. V. is in reality no ambiguity at all, for at the date of that translation "Palestine" was synonymous with "Philistia." Thus Milton, with

his usual accuracy in such points, mentions *Phogon* as

"Dreaded through the coast  
Of Palestine, in Gath and Ascalon,  
And Accaron and Gaza's frontier bounds":  
(*Par. Lost*, i. 464.)

and again as

"That twice-battered god of Palestine":  
(*Hymn on Nat.* 190)

— where if any proof be wanted that his meaning is restricted to Philistia, it will be found in the fact that he has previously connected other deities with the other parts of the Holy Land. See also, still more decisively, *Samson Ag.* 144, 1093<sup>a</sup>. But even without such evidence, the passages themselves show how our translators understood the word. Thus in Ex. xv. 14, "Palestine," Edom, Moab, and Canaan are mentioned as the nations alarmed at the approach of Israel. In Is. xiv. 29, 31, the prophet warns "Palestine" not to rejoice at the death of king Abaz, who had subdued it. In Joel iii. 4, Phœnicia and "Palestine" are upbraided with cruelties practiced on Judah and Jerusalem.

Palestine, then, in the Authorized Version, really means nothing but Philistia. The original Hebrew word *Pel'sheth*, which, as shown above, is elsewhere translated Philistia, to the Hebrews signified merely the long and broad strip of maritime plain inhabited by their encroaching neighbors. We shall see that they never applied the name to the whole country. An inscription of Iva-lush, king of Assyria (probably the Pul of Scripture), as deciphered by Sir H. Rawlinson, names "Palaztu on the Western Sea," and distinguishes it from Tyre, Damascus, Samaria, and Edom (Rawlinson's *Herod.* i. 467). In the same restricted sense it was probably employed — if employed at all — by the ancient Egyptians, in whose records at Karnak the *Pulusatu* has been deciphered in close connection with that of the *Shairutana* or *Sharu*, possibly the Sidonians or Syrians (Birch, doubtfully, in Layard, *Nineveh*, ii. 407, note). Nor does it appear that at first it signified more to the Greeks. As lying next the sea, and as being also the high-road from Egypt to Phœnicia and the richer regions north of it, the Philistine plain became sooner known to the western world than the country further inland, and was called by them Syria Palestina — Συρία Παλαιστίνη — Philistina Syria. This name is first found in Herodotus (i. 105; ii. 104; iii. 5; vii. 83); and there can be little doubt that on each occasion he is speaking of the coast, and the coast<sup>b</sup> only. (See also the testimony of Joseph. *Ant.* i. 6, § 2.) From thence it was

<sup>a</sup> *Paradise Lost* was written between 1660 and 1670. Shakespeare, on the other hand, uses the word in its ordinary sense in two passages, *King John*, act ii. scene 1, and *Othello*, act iv. scene 3: the date of the former of these plays is 1596, that of the latter 1602. But Shakespeare and Milton wrote for different audiences; and the language of the one would be as modern (for his time) as that of the other was classical and antique. That the name was changing its meaning from the restricted to the general sense just at the beginning of the 17th century, is curiously ascertainable from two Indexes "of the Hardest Words," appended to successive editions of Sylvester's *Du Bartas* (1605 and 1608), in one of which it is explained as "Judea, the Holy Land, first called Canaan," and in the other "the Land of the Philistines." Fuller, in his *Pisgah-sight of Palestine* (1650), of course uses it

in the largest sense; but it is somewhat remarkable that he says nothing whatever of the signification of the name. In France the original narrow signification has been retained. Thus ch. xxxi. c. Volney's *Travels* treats of "Palestine, i. e. the plain which terminates the country of Syria on the west," and "comprehends the whole country between the Mediterranean on the west, the mountains on the east, and two lines, one drawn by Khan Younes, and the other between Kaisaria and the rivulet of Yafa." It is thus used repeatedly by Napoleon I. in his dispatches and correspondence. See *Corresp. de Nap.*, Nos. 4020, 4035, &c.

<sup>b</sup> In the second of these passages, he seems to extend it as far north as *Beirut* — if the sculptures at the *Nahr el-Kelb* are the stele of Sesostris

gradually extended to the country further inland, till in the Roman and later Greek authors, both heathen and Christian, it becomes the usual appellation for the whole country of the Jews, both west and east of Jordan. (See the citations of Reland, *Pal.* cc. vii. viii.) Nor was its use confined to heathen writers: it even obtained among the Jews themselves. Josephus generally uses the name for the country and nation of the Philistines (*Ant.* xiii. 5, § 10; vi. 1, § 1, &c.), but on one or two occasions he employs it in the wider sense (*Ant.* i. 8, § 4; viii. 10, § 3; *c. Ap.* i. 22). So does Philo, *De Abrah.* and *De Vita Mosis*. It is even found in such thoroughly Jewish works as the Talmudic treatises *Bereshith Rabba* and *Echa Rabbathi* (Reland, p. 39); and it is worthy of notice how much the feeling of the nation must have degenerated before they could apply to the Promised Land the name of its bitterest enemies — the "uncircumcised Philistines."

Jerome (cir. A. D. 400) adheres to the ancient meaning of Palestina, which he restricts to Philistia (see *Ep. ad Dardanum*, § 4; *Comm. in Esaiam* xiv. 29; *in Amos* i. 6).<sup>a</sup> So also does Procopius of Gaza (cir. A. D. 510) in a curious passage on Gerar, in his comment on 2 Chr. xiv. 13.

The word is now so commonly employed in our more familiar language to designate the whole country of Israel, that, although Biblically a misnomer, it has been chosen here as the most convenient heading under which to give a general description of THE HOLY LAND, embracing those points which have not been treated under the separate headings of cities or tribes.

This description will most conveniently divide itself into two sections:—

- I. The Names applied to the country of Israel in the Bible and elsewhere.
- II. The Land: its situation, aspect, climate, physical characteristics, in connection with its history; its structure, botany, and natural history.<sup>b</sup>

The history of the country is so fully given under its various headings throughout the work, that it is unnecessary to recapitulate it here.

#### I. THE NAMES.

PALESTINE, then, is designated in the Bible by more than one name:—

1. During the Patriarchal period, the Conquest, and the age of the Judges, and also where those early periods are referred to in the later literature (as Ps. cv. 11; and Joseph. *Ant.* i. 7; 8; 20; v. 1, &c.), it is spoken of as "Canaan," or more

frequently "the Land of Canaan," meaning thereby the country west of the Jordan, as opposed to "the Land of Gilead" on the east.<sup>c</sup> [CANAAN, LAND OF, vol. i. p. 351 f.] Other designations, during the same early period, are "the land of the Hebrews" (Gen. xl. 15 only — a natural phrase in the mouth of Joseph); the "land of the Hittites" (Josh. i. 4): a remarkable expression, occurring here only, in the Bible, though frequently used in the Egyptian records of Rameses II., in which *Cheta* or *Chita* appears to denote the whole country of Lower and Middle Syria. (Brugsch, *Geogr. Inschrift.* ii. 21, &c.) The name *Tu-neh* (i. e. Holy Land), which is found in the inscriptions of Rameses II. and Thothmes III., is believed by M. Brugsch to refer to Palestine (*Ibid.* 17). But this is contested by M. de Rougé (*Revue Archéologique*, Sept. 1861, p. 216). The Phœnicians appear to have applied the title Holy Land to their own country, and possibly also to Palestine at a very early date (Brugsch, p. 17). If this can be substantiated, it opens a new view to the Biblical student, inasmuch as it would seem to imply that the country had a reputation for sanctity before its connection with the Hebrews.

2. During the Monarchy the name usually, though not frequently, employed, is "Land of Israel" (יִשְׂרָאֵל; 1 Sam. xiii. 19; 2 K. v. 2, 4, vi. 23; 1 Chr. xxii. 2; 2 Chr. ii. 17). Of course this must not be confounded with the same appellation as applied to the northern kingdom only (2 Chr. xxx. 25; Ez. xxvii. 17). It is Ezekiel's favorite expression, though he commonly alters its form slightly, substituting יִשְׂרָאֵל for יִשְׂרָאֵל. The pious and loyal aspirations of Hosea find vent in the expression "land of Jehovah" (Hos. ix. 3; comp. Is. lxii. 4, &c., and indeed Lev. xxv. 23, &c.). In Zechariah it is "the holy land" (Zech. ii. 12); and in Daniel "the glorious land" (Dan. xi. 41). In Amos (ii. 10) alone it is "the land of the Amorite;" perhaps with a glance at Deut. i. 7. Occasionally it appears to be mentioned simply as "The Land;" as in Ruth i. 1; Jer. xxii. 27; 1 Macc. xiv. 4; Luke iv. 25, and perhaps even xxiii. 44. The later Jewish writers are fond of this title, of which several examples will be found in Reland, *Pal.* chap. v.

3. Between the Captivity and the time of our Lord, the name "Judæa" had extended itself from the southern portion to the whole of the country,<sup>d</sup> even that beyond Jordan (Matt. xix. 4; Mark x. 1; Joseph. *Ant.* ix. 14, § 1; xii. 4, § 11). In the book of Judith it is applied to the portion between the

inappropriate name as applied to a land of valleys and plains like Palestine, see CANAAN, LAND OF. The generally received view, however, is that the name belonged originally to Phœnicia, which lay along the coast of the Mediterranean, where the Canaanites make their first appearance (Gen. x. 15-19), and that subsequently as they spread themselves into the interior they carried with them the old name into the new settlements. (See Kurtz, *Gesch. des Alten Bundes*, i. 104; Kell, *Bibl. Archæologie*, p. 175; Arnold, *art. Palästina in Herzog's Real-Encyk.* xi. 1; and others.)

#### II.

<sup>d</sup> An indication of this is discovered by Reland (*Pal.* p. 32), as early as the time of Solomon, in the terms of 2 Chr. ix. 11; but there is nothing to imply that "Judah" in that passage means more than the actual territory of the tribe.

<sup>a</sup> In his *Epit. Paulæ* (§ 8) he extends the region of the Philistines as far north as Dor, close under Mount Carmel. We have seen above that Herodotus extends Palestine to *Beirût*. Cæsarea was anciently entitled C. Palestine, to distinguish it from other towns of the same name, and it would seem to be even still called *Kaisariyeh Felistin* by the Arabs (see note to Burckhardt, *Syria*, p. 387, July 15; also Schultens, *Index Geogr.* "Cæsarea"). Ramleh, 10 miles east of Jaffa, retained in the time of hap-Parchi the same affix (see Asher's B. of Tudela, li. 439). He identifies the latter with Gath.

<sup>b</sup> The reader will observe that the botany and natural history have been treated by Dr. Hooker and the Rev. W. Houghton. The paper of the former distinguished botanist derives a peculiar value from the fact that he has visited Palestine.

<sup>c</sup> \* For Mr. Grove's explanation of this apparently

plain of Esdraelon and Samaria (xi. 19), as it is in Luke xxiii. 5; though it is also used in the stricter sense of Judea proper (John iv. 3, vii. 1), that is, the most southern of the three main divisions west of Jordan. In this narrower sense it is employed throughout 1 Macc. (see especially ix. 50, x. 30, 38, xi. 34).

In the Epistle to the Hebrews (xi. 9) we find Palestine spoken of as "the land of promise;" and in 2 Esdr. xiv. 31, it is called "the land of Sion."

4. The Roman division of the country hardly coincided with the Biblical one, and it does not appear that the Romans had any distinct name for that which we understand by Palestine. The province of Syria, established by Pompey, of which Scaurus was the first governor (quæstor proprætor) in 62 B. C., seems to have embraced the whole seaboard from the Bay of Issus (*Iskanderûn*) to Egypt, as far back as it was habitable, that is, up to the desert which forms the background to the whole district. "Judæa" in their phrase appears to have signified so much of this country as intervened between Idumæa on the south, and the territories of the numerous free cities, on the north and west, which were established with the establishment of the province — such as Scythopolis, Sebaste, Joppa, Azotus, etc. (*Dict. of Geogr.* ii. 1077). The district east of the Jordan, lying between it and the desert — at least so much of it as was not covered by the lands of Pella, Gadara, Canatha, Philadelphia, and other free towns — was called Peræa.

5. Soon after the Christian era, we find the name Palæstina in possession of the country. Ptolemy (A. D. 161) thus applies it (*Geogr.* v. 16). "The arbitrary divisions of Palæstina Prima, Secunda, and Tertia, settled at the end of the 4th or beginning of the 5th cent. (see the quotations from the *Cod. Theodos.* in Ireland, p. 205), are still observed in the documents of the Eastern Church" (*Dict. of Geogr.* ii. 533 a). Palæstina Tertia, of which Petra was the capital, was however out of the Biblical limits; and the portions of Peræa not comprised in Pal. Secunda were counted as in Arabia.

6. Josephus usually employs the ancient name "Canaan" in reference to the events of the earlier history, but when speaking of the country in reference to his own time styles it Judea (*Ant.* i. 6, § 2, &c.); though as that was the Roman name for the southern province, it is sometimes (e. g. *B. J.* i. 1, § 1; iii. 3, § 5 b) difficult to ascertain whether he is using it in its wider or narrower<sup>a</sup> sense. In the narrower sense he certainly does often employ it (e. g. *Ant.* v. 1, § 22; *B. J.* iii. 3, § 4, 5 a). Nicolaus of Damascus applies the name to the whole country (*Joseph. Ant.* i. 7, § 2).

The Talmudists and other Jewish writers use the title of the "Land of Israel." As the Greeks

styled all other nations but their own Barbarian, so the Rabbis divide the whole world into two parts — the Land of Israel, and the regions outside it.<sup>b</sup>

7. The name most frequently used throughout the Middle Ages, and down to our own time, is *Terra Sancta* — the Holy Land. In the long list of Travels and Treatises given by Ritter (*Erdkunde, Jordan*, 31-55), Robinson (*Bibl. Res.* ii. 534-555), and Bonar (*Land of Promise*, pp. 517-535), it predominates far beyond any other appellation. Quaresmius, in his *Elucidatio Terræ Sanctæ* (i. 9, 10), after enumerating the various names above mentioned, concludes by adducing seven reasons why that which he has embodied in the title of his own work, "though of later date than the rest, yet in excellency and dignity surpasses them all;" closing with the words of Pope Urban II. addressed to the Council of Clermont: *Quam terram merito Sanctam dicimus, in quâ non est etiam passus pedis quem non illustraverit et sanctificaverit vel corpus vel umbra Salvatoris, vel gloria presentia Sanctæ Dei genitricis, vel amplectendus Apostolorum commectus, vel martyrum ebibendus sanguis effusus.*

## II. THE LAND.

The Holy Land is not in size or physical characteristics proportioned to its moral and historical position, as the theatre of the most momentous events in the world's history. It is but a strip of country, about the size of Wales, less than 140 miles<sup>c</sup> in length, and barely 40<sup>d</sup> in average breadth, on the very frontier of the East, hemmed in between the Mediterranean Sea on the one hand, and the enormous trench of the Jordan Valley on the other, by which it is effectually cut off from the mainland of Asia behind it. On the north it is shut in by the high ranges of Lebanon and anti-Lebanon, and by the chasm of the *Litâny*,<sup>e</sup> which runs at their feet and forms the main drain of their southern slopes. On the south it is no less inclosed by the arid and inhospitable deserts of the upper part of the peninsula of Sinai, whose undulating wastes melt imperceptibly into the southern hills of Judæa.

1. Its position on the Map of the World — as the world was when the Holy Land first made its appearance in history — is a remarkable one.

(1.) It is on the very outpost — on the extreme western edge of the East, pushed forward, as it were, by the huge continent of Asia, which almost seems to have rejected and cut off from communication with itself this tiny strip, by the broad and impassable desert interposed between it and the vast tracts of Mesopotamia and Arabia in its rear. On the shore of the Mediterranean it stands, as if it had advanced as far as possible toward the West — toward that New World which in the fullness

<sup>a</sup> This very ambiguity is a sign (notwithstanding all that Josephus says of the population and importance of Galilee) that the southern province was by far the most important part of the country. It conferred its name on the whole.

<sup>b</sup> See the citations in Otho, *Lex. Rabb.* "Israelitæ Regio;" and the Itineraries of Benjamin; Parchi; Isaac ben Chelvi, in Carmoly; etc.

<sup>c</sup> The latitude of *Banias*, the ancient Dan, is 33° 16', and that of Beer-sheba 31° 16'; thus the distance between these two points — the one at the north, the

other at the south — is 2 degrees, 120 geogr. or 130 English miles.

<sup>d</sup> The breadth of the country at Gaza, from the shore of the Mediterranean to that of the Dead Sea, is 48 geogr. miles, while at the latitude of the *Litany* from the coast to the Jordan it is 20. The average of the breadths between these two parallels, taken at each half degree, gives 34 geogr. miles, or just 40 English miles.

<sup>e</sup> The latitude of the *Litâny* (or *Kasimiyeh*) differs but slightly from that of *Banias*. Its mouth is given by Van de Velde (*Memoir*, p. 69) at 33° 20'.

of time it was so mightily to affect; separated therefrom by that which, when the time arrived, proved to be no barrier, but the readiest medium of communication — the wide waters of the "Great Sea." Thus it was open to all the gradual influences of the rising communities of the West, while it was saved from the retrogression and decrepitude which have ultimately been the doom of all purely eastern states whose connections were limited to the East<sup>a</sup> only. And when at last its ruin was effected, and the nation of Israel driven from its home, it transferred without obstacle the result of its long training to those regions of the West with which by virtue of its position it was in ready communication.

(2.) There was, however, one channel, and but one, by which it could reach and be reached by the great oriental empires. The only road by which the two great rivals of the ancient world could approach one another — by which alone Egypt could get to Assyria, and Assyria to Egypt — lay along the broad flat strip of coast which formed the maritime portion of the Holy Land, and thence by the Plain of the Lebanon to the Euphrates. True, this road did not, as we shall see, lie actually through the country, but at the foot of the highlands which virtually composed the Holy Land; still the proximity was too close not to be full of danger; and though the catastrophe was postponed for many centuries, yet, when it actually arrived, it arrived through this channel.

(3.) After this the Holy Land became (like the Netherlands in Europe) the convenient arena on which in successive ages the hostile powers who contended for the empire of the East, fought their battles. Here the Seleucids routed, or were routed by, the Ptolemies; here the Romans vanquished the Parthians, the Persians, and the Jews themselves; and here the armies of France, England, and Germany, fought the hosts of Saladin.

2. It is essentially a mountainous country. Not that it contains independent mountain chains, as in Greece, for example, dividing one region from another, with extensive valleys or plains between and among them — but that every part of the highland is in greater or less undulation. From its station in the north, the range of Lebanon pushes forth before it a multitude of hills and eminences, which crowd one another more or less thickly<sup>b</sup> over the face of the country to its extreme south limit. But it is not only a mountainous country. It contains in combination with its mountains a remarkable arrangement of plains, such as few other countries can show, which indeed form its chief peculiarity, and have had an equal, if not a more important bearing on its history than the mountains themselves. The mass of hills which occupies the centre of the country is bordered or framed on both sides, east and west, by a broad belt of lowland, sunk deep

below its own level. The slopes or cliffs which form, as it were, the retaining walls of this depression, are furrowed and cleft by the torrent beds which discharge the waters of the hills, and form the means of communication between the upper and lower level. On the west this lowland interposes between the mountains and the sea, and is the Plain of Philistia and of Sharon. On the east it is the broad bottom of the Jordan Valley deep down in which rushes the one river of Palestine to its grave in the Dead Sea.

3. Such is the first general impression of the physiognomy of the Holy Land. It is a physiognomy compounded of the three main features already named — the plains, the highland hills, and the torrent beds: features which are marked in the words of its earliest describers (Num. xiii. 29; Josh. xi. 16, xii. 8), and which must be comprehended by every one who wishes to understand the country, and the intimate connection existing between its structure and its history. In the accompanying sketch-map an attempt has been made to exhibit these features with greater distinctness than is usual, or perhaps possible, in maps containing more detail.

On a nearer view we shall discover some traits not observed<sup>c</sup> at first, which add sensibly to the expression of this interesting countenance. About half-way up the coast the maritime plain is suddenly interrupted by a long ridge thrown out from the central mass, rising considerably<sup>c</sup> above the general level, and terminating in a bold promontory on the very edge of the Mediterranean. This ridge is Mount Carmel. On its upper side, the plain, as if to compensate for its temporary displacement, invades the centre of the country and forms an undulating hollow right across it from the Mediterranean to the Jordan Valley. This central lowland, which divides with its broad depression the mountains of Ephraim from the mountains of Galilee, is the plain of Esdraelon or Jezreel, the great battle-field of Palestine. North of Carmel the lowland resumes its position by the seaside till it is again interrupted and finally put an end to by the northern mountains which push their way out to the sea, ending in the white promontory of the *Ris Nakhûra*. Above this is the ancient Phœnicia — a succession of headlands sweeping down to the ocean, and leaving but few intervals of beach. Behind Phœnicia — north of Esdraelon, and inclosed between it, the *Lilâny*, and the upper valley of the Jordan — is a continuation of the mountain district, not differing materially in structure or character from that to the south, but rising gradually in occasional elevation until it reaches the main ranges of Lebanon and anti-Lebanon (or Hermon), as from their lofty heights they overlook the whole land below them, of which they are indeed the parents.

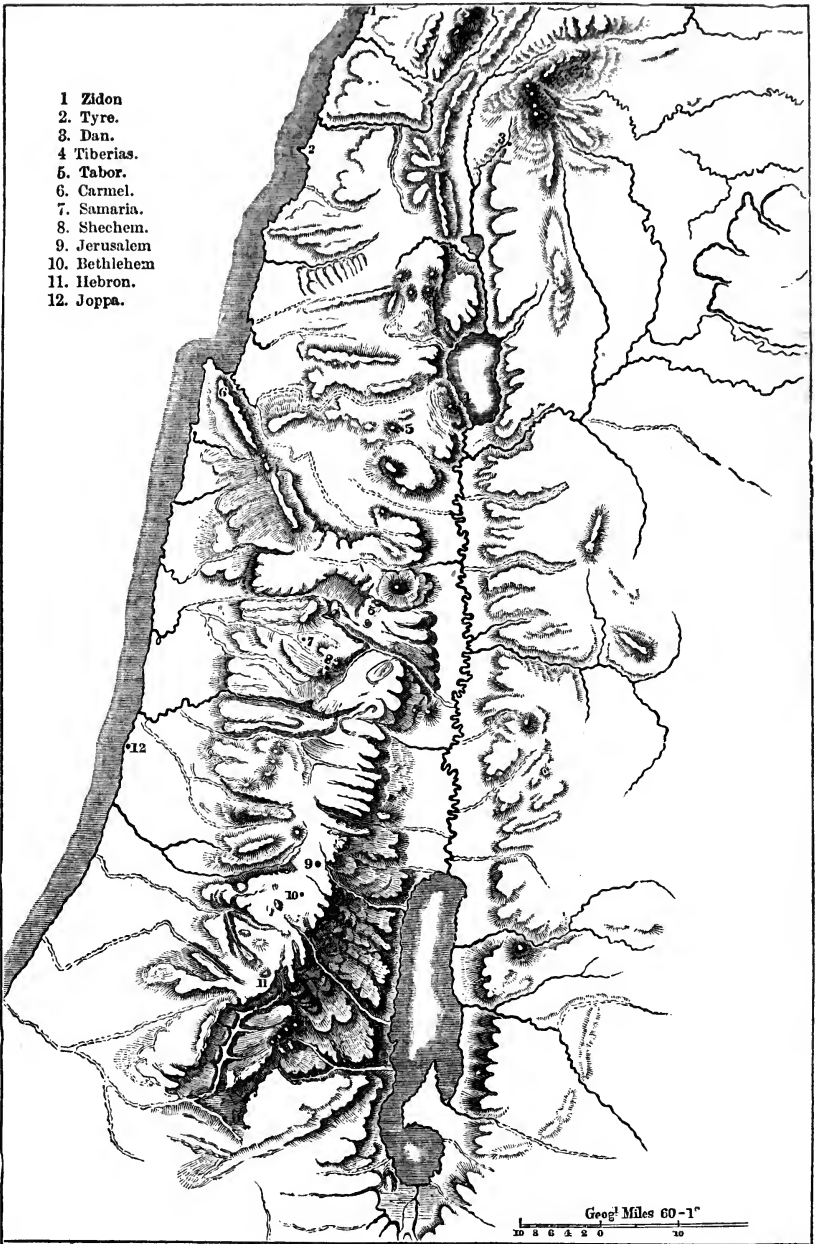

<sup>a</sup> The contrast between East and West, and the position of the Holy Land as on the confines of each, is happily given in a passage in *Bohen* (ch. 28).

<sup>b</sup> The district of the Surrey hills about Caterham, in its most regular portions, if denuded of most of its wood, turf, and soil, would be not unlike many parts of Palestine. So are (or were) the hills of Roxburghshire on the banks of the Tweed, as the following description of them by Washington Irving will show: "From a hill which" like Gerizim or Olivet "commanded an extensive prospect . . . I gazed about me for a time with surprise, I may almost say with disappointment. I beheld a succession of gray

waving hills, line beyond line, as far as my eye could reach, monotonous in their aspect, and entirely destitute of trees . . . The far-famed Tweed appeared a naked stream flowing between bare hills. And yet" (what is even more applicable to the Holy Land) "such had been the magic web thrown over the whole, that it had a greater charm than the richest scenery in England."

<sup>c</sup> The main ridge of Carmel is between 1,700 and 1,800 feet high. The hills of Samaria immediately to the S. E. of it are only about 1,100 feet (Van de Velde, *Memoir*, 177, 178).

MAP OF PALESTINE, with section of the country from JAFFE to the mountains of Moab.

4. The country thus roughly portrayed, and which, as before stated, is less than 140 miles in length, and not more than 40 in average breadth, is to all intents and purposes the whole Land of Israel.<sup>a</sup> The northern portion is Galilee; the centre, Samaria; the south, Judea. This is the Land of Canaan which was bestowed on Abraham; the covenantal home of his descendants. The two tribes and a half remained on the uplands beyond Jordan, instead of advancing to take their portion with the rest within its circumscription of defense; but that act appears to have formed no part of the original plan. It arose out of an accidental circumstance, — the abundance of cattle which they had acquired during their stay in Egypt, or during the transit through the wilderness, — and its result was, that the tribes in question soon ceased to have any close connection with the others, or to form any virtual part of the nation. But even this definition might without impropriety be further circumscribed; for during the greater part of the O. T. times the chief events of the history were confined to the district south of Esdraelon, which contained the cities of Hebron, Jerusalem, Bethel, Shiloh, Shechem, and Samaria, the Mount of Olives, and the Mount Carmel. The battles of the Conquest and the early struggles of the era of the Judges once passed, Galilee subsided into obscurity and unimportance till the time of Christ.

5. Small as the Holy Land is on the map, and when contrasted either with modern states or with the two enormous ancient empires of Egypt and Assyria between which it lay, it seems even smaller to the traveller as he pursues his way through it. The long solid purple wall of the Moab and Gilead mountains, which is always in sight, and forms the background to almost every view to the eastward, is perpetually reminding him that the confines of the country in that direction are close at hand. There are numerous eminences in the highlands which command the view of both frontiers at the same time — the eastern mountains of Gilead with the Jordan at their feet on the one hand, on the other the Western Sea,<sup>b</sup> with its line of white sand and its blue expanse. Hermon, the apex of the country on the north, is said to have been seen from the southern end of the Dead Sea: it is certainly plain enough, from many a point nearer the centre. It is startling to find that from the top of the hills of *Nebv Samuil*, Bethel, Tabor, Gerizim, or Safed, the eye can embrace at one glance, and almost without turning the head, such opposite points as the Lake of Galilee and the Bay of Akka, the farthest mountains of the Hauran and the long ridge of Carmel, the ravine of the Jabbok, or the green windings of Jordan, and the sand-hills of Jaffa.

The impression thus produced is materially assisted by the transparent clearness of the air and the exceeding brightness of the light, by which objects that in our duller atmosphere would be invisible from each other or thrown into dim distance are made distinctly visible, and thus appear to be much nearer together than they really are.

6. The highland district, thus surrounded and intersected by its broad lowland plains, preserves from north to south a remarkably even and horizontal profile. Its average height may be taken as 1,500 to 1,800 feet above the Mediterranean. It can hardly be denominated a plateau, yet so evenly is the general level preserved, and so thickly do the hills stand behind and between one another, that, when seen from the coast or the western part of the maritime plain, it has quite the appearance of a wall, standing in the background of the rich district between it and the observer — a district which from its gentle undulations, and its being so nearly on a level with the eye, appears almost immeasurable in extent. This general monotony of profile is, however, accentuated at intervals by certain centres of elevation. These occur in a line almost due north and south, but lying somewhat east of the axis of the country. Beginning from the south, they are Hebron,<sup>c</sup> 3,029 feet above the Mediterranean; Jerusalem, 2,610, and Mount of Olives, 2,724, with *Nebv Samuil* on the north, 2,650; Bethel, 2,400; *Sinjil*, 2,685; Ebal and Gerizim, 2,700; "Little Hermon" and Tabor (on the north side of the Plain of Esdraelon), 1,900; Safed, 2,775; *Jebel Jarmuk*, 4,000. Between these elevated points runs the watershed <sup>d</sup> of the country sending off on either hand — to the Jordan Valley on the east and the Mediterranean on the west, and be it remembered east and west <sup>e</sup> only — the long tortuous arms of its many torrent beds. But though keeping north and south as its general direction, the line of the watershed is, as might be expected from the prevalent equality of level of these highlands, and the absence of anything like ridge or saddle, very irregular, the heads of the valleys on the one side often passing and "overlapping" those of the other. Thus in the territory of the ancient Benjamin, the heads of the great wadies *Fuwar* (or *Suceinait*) and *Malyah* (or *Kelt*) — the two main channels by which the torrents of the winter rains hurry down from the bald hills of this district into the valley of the Jordan — are at *Bireh* and *Beitn* respectively, while the great *Wady Belit*, which enters the Mediterranean at *Nahr Aujeh*, a few miles above Jaffa, stretches its long arms as far as, and even farther than, *Taiyibeh*, nearly four miles to the east of either *Bireh* or *Beitn*. Thus also in the more northern district of Mount Ephraim

<sup>a</sup> \* "The whole area of the land of Palestine," says Dr. Robinson, "does not vary greatly from 12,000 geographical square miles, — about equal to the area of the two States of Massachusetts and Connecticut together. Of this whole area, more than one half, or about 7,000 square miles, being by far the most important portion, lies on the west of the Jordan. . . . Only from that land has gone forth to other nations and to modern times all the true knowledge which exists of God, of his revelation of a future state, and of man's redemption through Jesus Christ. Compared with this distinction, the splendor and learning and fame of Egypt, Greece, and Rome fade away; and the traces of their influence upon the world become as the footprints of the traveller upon

the sands of the desert." (*Phys. Geogr. of the Holy Land*, pp. 2, 18.)

<sup>b</sup> The same word is used in Hebrew for "sea" and for "west."

<sup>c</sup> The altitudes are those given by Van de Velde, after much comparison and investigation, in his *Memoir* (pp. 170-183). [For the Lebanon summits, see *Bibl. Sacra*, xxxix. 552.]

<sup>d</sup> For the watershed see Ritter, *Erdkunde, Jordan*, pp. 474-486. His heights have been somewhat modified by more recent observations, for which see Van de Velde's *Memoir*.

<sup>e</sup> Except in the immediate neighborhood of the Plain of Esdraelon, and in the extreme north — where the drainage, instead of being to the Mediterranean

around *Nablus*, the ramifications of that extensive system of valleys which combine to form the *Wady Ferrah*—one of the main feeders of the central Jordan—interlace and cross by many miles those of the *Wady Shair*, whose principal arm is the Valley of *Nablus*, and which pours its waters into the Mediterranean at *Nahr Falak*.

7. The valleys on the two sides of the watershed differ considerably in character. Those on the east—owing to the extraordinary depth of the Jordan Valley into which they plunge, and also to the fact already mentioned, that the watershed lies rather on that side of the highlands, thus making the fall more abrupt—are extremely steep and rugged. This is the case during the whole length of the southern and middle portions of the country. The precipitous descent between Olivet and Jericho, with which all travellers in the Holy Land are acquainted, is a type, and by no means an unfair type, of the eastern passes, from *Zuweirah* and *Ain-jidi* on the south to *Wady Bidan* on the north. It is only when the junction between the Plain of Esdracoon and the Jordan Valley is reached, that the slopes become gradual and the ground fit for the maneuvers of anything but detached bodies of foot soldiers. But, rugged and difficult as they are, they form the only access to the upper country from this side, and every man or body of men who reached the territory of Judah, Benjamin, or Ephraim from the Jordan Valley, must have climbed one or other of them.<sup>a</sup> The Ammonites and Moabites, who at some remote date left such lasting traces of their presence in the names of Chephar ha-Ammonai and Michmash, and the Israelites pressing forward to the relief of Gibeon and the slaughter of Beth-horon, doubtless entered alike through the great *Wady Fuar* already spoken of. The Moabites, Edomites, and Melunim swarmed up to their attack on Judah through the crevices of *Ain-jidi* (2 Chr. xx. 12, 16). The pass of Adummim was in the days of our Lord—what it still is—the regular route between Jericho and Jerusalem. By it Pompey advanced with his army when he took the city.

8. The western valleys are more gradual in their slope. The level of the external plain on this side is higher, and therefore the fall less, while at the same time the distance to be traversed is much greater. Thus the length of the *Wady Belât* already mentioned, from its remotest head at *Taiyibeh* to the point at which it emerges on the Plain of Sharon, may be taken as 20 to 25 miles, with a total difference of level during that distance of perhaps 1,800 feet, while the *Wady el-Aujeh*, which falls from the other side of *Taiyibeh* into the Jordan, has a distance of barely 10 miles to reach the Jordan Valley, at the same time falling not less than 2,800 feet.

Here again the valleys are the only means of

communication between the lowland and the highland. From Jaffa and the central part of the plain there are two of these roads "going up to Jerusalem": the one to the right by *Ramleh* and the *Wady Aly*; the other to the left by Lydda, and thence by the Beth-horons, or the *Wady Suteiman*, and Gibeon. The former of these is modern, but the latter is the scene of many a famous incident in the ancient history. Over its long acclivities the Canaanites were driven by Joshua to their native plains; the Philistines ascended to Michmash and Geba, and fled back past Ajalon; the Syrian force was stopped and hurled back by Judas; the Roman legions of Cestius Gallus were chased pell-mell to their strongholds at Antipatris.

9. Further south, the communications between the mountains of Judah and the lowland of Philistia are hitherto comparatively unexplored. They were doubtless the scene of many a foray and repulse during the lifetime of Samson and the struggles of the Danites, but there is no record of their having been used for the passage of any important force either in ancient or modern times.<sup>b</sup>

North of Jaffa the passes are few. One of them, by the *Wady Belât*, led from Antipatris to Gophna. By this route St. Paul was probably conveyed away from Jerusalem. [OPHNI, Amer. ed.] Another leads from the ancient sanctuary of Gilgal near *Kefr Sabat*, to *Nablus*. These western valleys, though easier than those on the eastern side, are of such a nature as to present great difficulties to the passage of any large force encumbered by baggage. In fact these mountain passes really formed the security of Israel, and if she had been wise enough to settle her own intestinal quarrels without reference to foreigners, the nation might, humanly speaking, have stood to the present hour. The height, and consequent strength, which was the frequent boast of the prophets and psalmists in regard to Jerusalem, was no less true of the whole country, rising as it does on all sides from plains so much below it in level. The armies of Egypt and Assyria, as they traced and retraced their path between Pelusium and Carchemish, must have looked at the long wall of heights which closed in the broad level roadway they were pursuing, as belonging to a country with which they had no concern. It was to them a natural mountain fastness, the approach to which was beset with difficulties, while its bare and soilless hills were hardly worth the trouble of conquering, in comparison with the rich green plains of the Euphrates and the Nile, or even with the boundless cornfield through which they were marching. This may be fairly inferred from various notices in Scripture and in contemporary history. The Egyptian kings, from Ramesses II. and Thothmes III. to Pharaoh Necho, were in the constant habit<sup>c</sup> of pursuing this route during their expeditions against the Chatti, or Hittites, in

or to the Jordan, is to the *Litány*,—the statement in the text is strictly accurate.

<sup>a</sup> Nothing can afford so strong a testimony to the really unilitary genius of the Canaanites, and subsequently, in their turn, of the Jews also, as the way in which they suffered their conquerors again and again to advance through these defiles, where their destruction might so easily have been effected. They always retired at once, and, shutting themselves up in their strongholds, awaited the attack there. From Jericho, Hebron, Jerusalem, to Silistria, the story is one and the same,—the dislike of Orientals to fight in the

open field, and their power of determined resistance when entrenched behind fortifications.

<sup>b</sup> Richard I., when intending to attack Jerusalem, moved from Ascalon to Blanche Garde (*Sajir*, or *Tell es-Safieh*), on the edge of the mountains of Judea; and then, instead of taking a direct route to the Holy City through the passes of the mountains, turned northwards over the plain and took the road from Ramleh to Bettenubel (*Nuba*), that is, the ordinary approach from Jaffa to Jerusalem; a circuit of at least four days. (See Vinsauf, v. 48, in *Chron. of Crusades*, p. 204.)

<sup>c</sup> Rawlinson, note to Herod. ii. § 157.

the north of Syria; and the two last-named monarchs fought battles at Megiddo, without, as far as we know, having taken the trouble to penetrate into the interior of the country. The Pharaoh who was Solomon's contemporary came up the Philistine plain as far as Gezer (probably about *Ramleh*), and besieged and destroyed it, without leaving any impression of uneasiness in the annals of Israel. Later in the monarchy, Psammetichus besieged Ashdod in the Philistine plain for the extraordinary period of twenty-nine years (Herod. ii. 157); during a portion of that time an Assyrian army probably occupied part of the same district, endeavoring to relieve the town. The battles must have been frequent; and yet the only reference to these events in the Bible is the mention of the Assyrian general by Isaiah (xx. 1), in so casual a manner as to lead irresistibly to the conclusion that neither Egyptians nor Assyrians had come up into the highland. This is illustrated by Napoleon's campaign in Palestine. He entered it from Egypt by *el-Arish*, and after overrunning the whole of the lowland, and taking Gaza, Jaffa, Ramleh, and the other places on the plain, he writes to the sheikhs of *Nablus* and Jerusalem, announcing that he has no intention of making war against them (*Corresp. de Nap.*, No. 4,020, "19 Ventose, 1799"). To use his own words, the highland country "did not lie within his base of operations;" and it would have been a waste of time, or worse, to ascend thither.

In the later days of the Jewish nation, and during the Crusades, Jerusalem became the great object of contest; and then the battle-field of the country, which had originally been Esdraelon, was transferred to the maritime plain at the foot of the passes communicating most directly with the capital. Here Judas Maccabæus achieved some of his greatest triumphs; and here some of Herod's most decisive actions were fought; and Blanchegarde, Ascalon, Jaffa, and Beitnaba (the Dettenule of the Crusading historian), still shine with the brightest rays of the valor of Richard the First.

10. When the highlands of the country are more closely examined, a considerable difference will be found to exist in the natural condition and appearance of their different portions. The south, as being nearer the arid desert, and farther removed from the drainage of the mountains, is drier and less productive than the north. The tract below Hebron, which forms the link between the hills of Judah and the desert, was known to the ancient Hebrews by a term originally derived from its dryness (*Negeb*). This was THE SOUTH country. It contained the territory which Caleb bestowed on his daughter, and which he had afterwards to endow specially with the "upper and lower springs" of a less parched locality (Josh. xv. 19). Here

lived Nabal, so chary of his "water" (1 Sam. xxv. 11); and here may well have been the scene of the composition of the 33d Psalm<sup>a</sup>—the "dry and thirsty land where no water is." As the traveller advances north of this tract there is an improvement; but perhaps no country equally cultivated is more monotonous, bare, or uninviting in its aspect, than a great part of the highlands of Judah and Benjamin during the largest portion of the year. The spring covers even those bald gray rocks with verdure and color, and fills the ravines with torrents of rushing water; but in summer and autumn the look of the country from Hebron up to Bethel is very dreary and desolate. The flowers, which for a few weeks give so brilliant<sup>c</sup> and varied a hue to whole districts, wither and vanish before the first fierce rays of the sun of summer: they are "to-day in the field—tomorrow cast into the oven." Rounded hills of moderate height fill up the view on every side, their coarse gray stone continually discovering itself through the thin coating of soil, and hardly distinguishable from the remains of the ancient terraces which run round them with the regularity of contour lines, or from the confused heaps of ruin which occupy the site of former village or fortress. On some of the hills the terraces have been repaired or reconstructed, and these contain plantations of olives or figs, sometimes with and sometimes without vineyards, surrounded by rough stone walls, and with the watch-towers at the corners, so familiar to us from the parables of the Old and New Testaments. Others have a shaggy covering of oak bushes in clumps. There are traditions that in former times the road between Bethlehem and Hebron was lined with large trees; but all that now remains of them are the large oak-roots which are embedded in the rocky soil, and are dug up by the peasants for fuel (Miss Beaufort, ii. 124). The valleys of denudation which divide these monotonous hills are also planted with figs or olives, but often cultivated with corn or *dourra*, the long reed-like stalks of which remain on the stony ground till the next seed-time, and give a singularly dry and slovenly look to the fields. The general absence of fences in the valleys does not render them less desolate to an English eye, and where a fence is now and then encountered, it is either a stone wall trodden down and dilapidated, or a hedge of the prickly-pear cactus, gaunt, irregular, and ugly, without being picturesque. Often the track rises and falls for miles together over the edges of the white strata upturned into almost a vertical<sup>d</sup> position; or over sheets of bare rock spread out like flag-stones,<sup>e</sup> and marked with fissures which have all the regularity of artificial joints; or along narrow channels, through which the feet

<sup>a</sup> For Thothmes' engagement at Megiddo, see De Rougé's interpretation of his monuments recently discovered at Thebes, in the *Revue Archéologique*, 1861, p. 384, &c. For Pharaoh Necho, see 2 K. xxiii. 29.

<sup>b</sup> The identification of Megiddo, coinciding as it does with the statements of the Bible, is tolerably certain; but at present as much can hardly be said of the other names in these lists. Not only does the agreement of the names appear doubtful, but the lists, as now deciphered, present an amount of confusion—places in the north being jumbled up with those in the south, etc.—which raises a constant suspicion.

<sup>c</sup> Is. xx. 1, as explained by Gesenius, and by Rawlinson (ii. 242, note).

<sup>d</sup> This Psalm is also referred to the hot and water-

less road of the deep descent to Jericho and the Jordan. See OLIVES, MOUNT OF, p. 2243 a.

<sup>e</sup> Stanley (*S. & P.* p. 139)—not prone to exaggerate color (comp. 87, "Petra")—speaks of it as "a blaze of scarlet."

<sup>f</sup> "Rounded swelling masses like huge bubbles," says Mr. Seddon the painter (p. 122). "Each one uglier than its neighbor" (Miss Beaufort, ii. 97). See also the description of Russegger the geologist, in Ritter, *Jordan*, p. 495.

<sup>g</sup> "Often looking as if burnt in the kiln" (Anderson, p. 172).

<sup>h</sup> As at *Beit-ur* (Beth-horon).

<sup>i</sup> As south of *Beitin* (Bethel), and many other places

of centuries of travellers have with difficulty retained their hold on the steep declivities; or down flights of irregular steps hewn or worn in the solid rock of the ravine, and strewed thick with innumerable loose <sup>a</sup> stones. Even the gray villages — always on the top or near the top of the hills — do but add to the dreariness of the scene by the forlorn look which their flat roofs and absence of windows present to a European eye, and by the poverty and ruin so universal among them. At Jerusalem this reaches its climax, and in the leaden ashy hue which overspreads, for the major part of the year, much of the landscape immediately contiguous to the city, and which may well be owing to the débris <sup>b</sup> of its successive demolitions, there is something unspeakably affecting. The solitude which reigns throughout most of these hills and valleys is also very striking. "For miles and miles there is often no appearance of life except the occasional goat-herd on the hill-side, or gathering of women at the wells."<sup>c</sup>

To the west and northwest of the highlands, where the sea-breezes are felt, there is considerably more vegetation. The *Wady es-Sunt* derives its name from the acacias which line its sides. In the same neighborhood olives abound, and give the country "almost a wooded appearance" (Rob. ii. 21, 22). The dark grateful foliage of the *butm*, or terebinth, is frequent; and one of these trees, perhaps the largest in Palestine, stands a few minutes' ride from the ancient Socho (*ibid.* 222). About ten miles north of this, near the site of the ancient Kirjath-jearim, the "city of forests," are some thickets of pine (*snober*) and laurel (*kebkáb*), which Tobler compares with European woods (*3tte Wanderung*, p. 178).

11. Hitherto we have spoken of the central and northern portions of Judæa. Its eastern portion — a tract some 9 or 10 miles in width by about 35 in length — which intervenes between the centre and the abrupt descent to the Dead Sea, is far more wild and desolate, and that not for a portion of the year only, but throughout it.<sup>d</sup> This must have been always what it is now — an uninhabited desert, because uninhabitable; "a bare arid wilderness; an endless succession of shapeless yellow and ash-colored hills, without grass or shrubs, without water, and almost <sup>e</sup> without life," — even without ruins, with the rare exceptions of Masada, and a solitary watch-tower or two.

12. No descriptive sketch of this part of the country can be complete which does not allude to the caverns, characteristic of all limestone districts, but here existing in astonishing numbers. Every hill and ravine is pierced with them, some very large and of curious formation — perhaps partly natural, partly artificial — others mere grottoes. Many of them are connected with most important and interesting events of the ancient history of the

country. Especially is this true of the district now under consideration. Machpeah, Makedah, Adullam, En-gedi, names inseparably connected with the lives, adventures, and deaths of Abraham, Joshua, David, and other Old Testament worthies, are all within the small circle of the territory of Judæa. Moreover, there is perhaps hardly one of these caverns, however small, which has not at some time or other furnished a hiding-place to some ancient Hebrew from the sweeping incursions of Philistine or Amalekite. For the bearing which the present treatment of many of the caverns has on the modern religious aspect of Palestine, and for the remarkable symbol which they furnish of the life of Israel, the reader must be referred to a striking passage in *Sinai and Palestine* (ch. ii. x. 3). [CAVE.]

13. The bareness and dryness which prevails more or less in Judæa is owing partly to the absence of wood (see below), partly to its proximity to the desert, and partly to a scarcity of water, arising from its distance from the Lebanon. The abundant springs which form so delightful a feature of the country further north, and many of which continue to flow even after the hottest summers, are here very rarely met with after the rainy season is over, and their place is but poorly supplied by the wells, themselves but few in number, bored down into the white rock of the universal substratum, and with mouths so narrow and so carefully closed that they may be easily passed without notice by travellers unaccustomed to the country. [WELLS.]

14. But to this discouraging aspect there are happily some important exceptions. The valley of *Urtás*, south of Bethlehem, contains springs which in abundance and excellence rival even those of *Nablus*; the huge "Pools of Solomon" are enough to supply a district for many miles round them; and the cultivation now going on in that neighborhood shows what might be done with a soil which requires only irrigation and a moderate amount of labor to evoke a boundless produce. At Bethlehem and *Mar Elyás*, too, and in the neighborhood of the Convent of the Cross, and especially near Hebron, there are excellent examples of what can be done with vineyards, and plantations of olives and fig-trees. And it must not be forgotten that during the limited time when the plains and bottoms are covered with waving crops of green or golden corn, and when the naked rocks are shrouded in that brilliant covering of flowers to which allusion has already been made, the appearance of things must be far more inviting than it is during that greater portion of the year which elapses after the harvest, and which, as being the more habitual aspect of the scene, has been dwelt upon above.

15. It is obvious that in the ancient days of the nation, when Judah and Benjamin possessed the

<sup>a</sup> As in the *Wady Aly*, 7 miles west of Jerusalem. See Beaumont's description of this route in his *Diary of a Journey*, etc. i. 192.

<sup>b</sup> See JERUSALEM, vol. ii. p. 1280 b. The same remark will be found in Seddon's *Memoir*, p. 198.

<sup>c</sup> Stanley, *S. & P.* p. 117.

<sup>d</sup> Even on the 8th January, De Saucy found no water.

<sup>e</sup> Van de Velde, *Syr. & Pal* ii. 99; and see the same still more forcibly stated on p. 101; and a graphic description by Miss Beaufort, ii. 102, 103, 127, 128. The character of the upper part of the district, to the S. E. of the Mount of Olives, is well seized by

Mr. Seddon: "A wilderness of mountain-tops, in some places tossed up like waves of mud, in others wrinkled over with ravines, like models made of crumpled brown paper, the nearer ones whitish, strewed with rocks and bushes" (*Memoir*, p. 204).

<sup>f</sup> There is no adequate provision here or elsewhere in Palestine (except perhaps in Jerusalem) for catching and preserving the water which falls in the heavy rains of winter and spring — a provision easily made and found to answer admirably in countries similarly circumstanced, such as Malta and Bermuda, where the rains furnish almost the whole water supply.

teeming population indicated in the Bible, the condition and aspect of the country must have been very different. Of this there are not wanting sure evidences. There is no country in which the ruined towns bear so large a proportion to those still existing. Hardly a hill-top of the many within sight, that is not covered with vestiges of some fortress or city.<sup>a</sup> That this numerous population knew how most effectually to cultivate their rocky territory, is shown by the remains of their ancient terraces, which constantly meet the eye, the only mode of husbanding so scanty a coating of soil, and preventing its being washed by the torrents into the valleys. These frequent remains enable the traveller to form an idea of the look of the landscape when they were kept up. But, besides this, forests appear to have stood in many parts of Judæa,<sup>b</sup> until the repeated invasions and sieges caused their fall, and the wretched government of the Turks prevented their reinstatement; and all this vegetation must have reacted on the moisture of the climate, and, by preserving the water in many a ravine and natural reservoir, where now it is rapidly dried by the fierce sun of the early summer, must have influenced materially the look and the resources of the country.

16. Advancing northward from Judæa the country becomes gradually more open and pleasant. Plains of good soil occur between the hills, at first small,<sup>c</sup> but afterwards comparatively large. In some cases (such as the *Mukhna*, which stretches away from the feet of Gerizim for several miles to the south and east) these would be remarkable anywhere. The hills assume here a more varied aspect than in the southern districts, springs are more abundant and more permanent, until at last, when the district of the *Jebel Nablûs* is reached — the ancient Mount Ephraim, — the traveller encounters an atmosphere and an amount of vegetation and water which, if not so transcendently lovely as the representations of enthusiastic travellers would make it, is yet greatly superior to anything he has met with in Judæa, and even sufficient to recall much of the scenery of the West.

17. Perhaps the Springs are the only objects which in themselves, and apart from their associations, really strike an English traveller with astonishment and admiration. Such glorious fountains as those of *Ain-Jalûd* or the *Ras el-Mukâtta*, where a great body of the clearest water wells silently but swiftly out from deep blue recesses worn in the foot of a low cliff of limestone rock, and at once forms a considerable stream — or as that of *Tell el-Kady*, eddying forth from the base of a lovely, wooded mound into a wide, deep, and limpid pool — or those of *Banius* and *Fijeh*, where a large river leaps headlong, foaming and roaring, from its cave — or even as that of *Jemîn*, bubbling upwards from the level ground — are very rarely to be met with out of irregular, rocky, mountainous countries, and being such unusual sights can hardly be looked on by the traveller without surprise and emotion. But, added to this their natural impressiveness, there is the consideration of the prominent part which so many of these springs have played in the history. Even the caverns are not more charac-

teristic of Palestine, or oftener mentioned in the accounts both of the great national crises and of more ordinary transactions. It is sufficient here to name En-hakkore, En-gedi, Gihon, and, in this particular district, the spring of Harod, the fountain of Jezreel, En-dor, and En-gannim, reserving a fuller treatment of the subject for the special head of SPRINGS. [See also FOUNTAINS.]

18. The valleys which lead down from the upper level in this district to the valley of the Jordan, and the mountains through which they descend, are also a great improvement on those which form the eastern portion of Judah, and even of Benjamin. The valleys are (as already remarked) less precipitous, because the level from which they start in their descent is lower, while that of the Jordan Valley is higher; and they have lost that savage character which distinguishes the naked clefts of the wadies *Suweinit* and *Kel'*, of the *Ain-jidi* or *Zuweirah*, and have become wider and shallower, swelling out here and there into basins, and containing much land under cultivation more or less regular. Fine streams run through many of these valleys, in which a considerable body of water is found even after the hottest and longest summers, their banks hidden by a thick shrubbery of oleanders and other flowering trees, — truly a delicious sight, and one most rarely seen to the south of Jerusalem, or within many miles to the north of it. The mountains, though bare of wood and but partially cultivated, have none of that arid, worn look which renders those east of Hebron, and even those between Mukhmas and Jericho, so repulsive. In fact, the eastern district of the *Jebel Nablûs* contains some of the most fertile and valuable spots in Palestine.<sup>d</sup>

19. Hardly less rich is the extensive region which lies northwest of the city of *Nablus*, between it and Carmel, in which the mountains gradually break down into the Plain of Sharon. This has been very imperfectly explored, but it is spoken of as extremely fertile — huge fields of corn, with occasional tracts of wood, recalling the county of Kent<sup>e</sup> — but mostly a continued expanse of sloping downs.

20. But with all its richness, and all its advance on the southern part of the country, there is a strange dearth of natural wood about this central district. Olive-trees are indeed to be found everywhere, but they are artificially cultivated for their fruit, and the olive is not a tree which adds to the look of a landscape. A few carobs are also met with in such richer spots as the Valley of *Nablus*. But of all natural non-fruit-bearing trees there is a singular dearth. It is this which makes the wooded sides of Carmel and the park-like scenery of the adjacent slopes and plains so remarkable. True, when compared with European timber, the trees are but small, but their abundance is in strong contrast with the absolute dearth of wood in the neighboring mountains. Carmel is always mentioned by the ancient prophets and poets as remarkable for its luxuriance; and, as there is no reason to believe that it has changed its character, we have, in the expressions referred to, pretty conclusive evidence that the look of the adjoining dis-

<sup>b</sup> For a list of these, see FOREST.

<sup>c</sup> That at the northern foot of *Nebi Samwil*, out of

which rise the gentle hills which bear the ruins of Gibeon, Neballat, etc., is perhaps the first of these in the advance from south to north.

<sup>d</sup> Robinson, *Bibl. Res.* iii. 304.

<sup>e</sup> Lord Lindsay (Bohn's ed.), p. 256

tract of Ephraim was not very different then from what it is now.

21. No sooner, however, is the Plain of Esdraelon passed, than a considerable improvement is perceptible. The low hills which spread down from the mountains of Galilee, and form the barrier between the plains of Akka and Esdraelon, are covered with timber, of moderate size, it is true, but of thick, vigorous growth, and pleasant to the eye. Eastward of these hills rises the round mass of Tabor, dark with its copses of oak, and set off by contrast with the bare slopes of *Jebel ed-Duhj* (the so called "Little Hermon") and the white hills of Nazareth. North of Tabor and Nazareth is the plain of *el-Buttauf*, an upland tract hitherto very imperfectly described, but apparently of a similar nature to Esdraelon, though much more elevated. It runs from east to west, in which direction it is perhaps ten miles long, by two miles wide at its broadest part. It is described as extremely fertile, and abounding in vegetation. Beyond this the amount of natural growth increases at every step, until towards the north the country becomes what even in the West would be considered as well timbered. The centre part — the watershed between the upper end of the Jordan Valley on the one hand, and the Mediterranean on the other, is a succession of swelling hills, covered with oak and terebinth, its occasional ravines thickly clothed in addition with maple, arbutus, sumach, and other trees. So abundant is the timber that large quantities of it are regularly carried to the sea-coast at Tyre, and there shipped as fuel to the towns on the coast (Kob. ii. 450). The general level of the country is not quite equal to that of Judæa and Samaria, but on the other hand there are points which reach a greater elevation than anything in the south, such as the prominent group of *Jebel Jarmuk*, and perhaps *Tibnin* — and which have all the greater effect from the surrounding country being lower. *Tibnin* lies about the centre of the district, and as far north as this the valleys run east and west of the watershed, but above it they run northwards into the *Litány*, which cleaves the country from east to west, and forms the northern border of the district, and indeed of the Holy Land itself.

22. The notices of this romantic district in the Bible are but scanty; in fact, till the date of the New Testament, when it had acquired the name of Galilee, it may be said, for all purposes of history, to be hardly mentioned. And even in the New Testament times the interest is confined to a very small portion — the south and southwest corner, containing Nazareth, Cana, and Nain, and the confines of Esdraelon, Capernaum, Tiberias, and Genesaret, on the margin of the Lake.<sup>a</sup>

In the great Roman conquest, or rather destruction, of Galilee, which preceded the fall of Jerusalem, the contest penetrated but a short distance into the interior. Jotapata and Giscala — neither of them more than 12 miles from the Lake — are the farthest points to which we know of the struggle extending in that wooded and impenetrable district. One of the earliest accounts we possess describes it as a land "quiet and secure" (Judg.

<sup>a</sup> The associations of Mt. Tabor, dim as they are, belong to the Old Testament: for there can be very little doubt that it was no more the scene of the Transfiguration than the Mount of Olives was. [HER-ROD, Amer. ed. TABOR.]

xviii. 27). There is no thoroughfare through it, nor any inducement to make one. May there not be, retired in the recesses of these woody hills and intricate valleys, many a village whose inhabitants have lived on from age to age, undisturbed by the invasions and depopulations with which Israelites, Assyrians, Romans, and Moslems have successively visited the more open and accessible parts of the country?

23. From the present appearance of this district we may, with some allowances, perhaps gain an idea of what the more southern portions of the central highlands were during the earlier periods in the history. There is little material difference in the natural conditions of the two regions. Galilee is slightly nearer the springs and the cool breezes of the snow-covered Lebanon, and further distant from the hot siroccos of the southern deserts, and the volcanic nature of a portion of its soil is more favorable to vegetation than the chalk of Judæa; but these circumstances, though they would tell to a certain degree, would not produce any very marked differences in the appearance of the country provided other conditions were alike. It therefore seems fair to believe that the hills of Shechem, Bethel, and Hebron, when Abram first wandered over them, were not very inferior to those of the *Belud Besharah* or the *Belud el-Buttauf*. The timber was probably smaller, but the oak-groves<sup>b</sup> of Moreh, Mamre, Tabor,<sup>c</sup> must have consisted of large trees; and the narrative implies that the "forests" or "woods" of Hareth, Ziph, and Bethel were more than mere scrub.

24. The causes of the present bareness of the face of the country are two, which indeed can hardly be separated. The first is the destruction of the timber in that long series of sieges and invasions which began with the invasion of Shishak (B. C. circa 970) and has not yet come to an end. This, by depriving the soil and the streams of shelter from the burning sun, at once made, as it invariably does, the climate more arid than before, and doubtless diminished the rainfall. The second is the decay of the terraces necessary to retain the soil on the steep slopes of the round hills. This decay is owing to the general unsettlement and insecurity which have been the lot of this poor little country almost ever since the Babylonian conquest. The terraces once gone, there was nothing to prevent the soil which they supported being washed away by the heavy rains of winter; and it is hopeless to look for a renewal of the wood, or for any real improvement in the general face of the country, until they have been first reestablished. This cannot happen to any extent until a just and firm government shall give confidence to the inhabitants.

25. Few things are a more constant source of surprise to the stranger in the Holy Land than the manner in which the hill-tops are, throughout, selected for habitation. A town in a valley is a rare exception. On the other hand, scarce a single eminence of the multitude always in sight but is crowned with its city or village,<sup>d</sup> inhabited or in ruins, often so placed as if not accessibility but in-

<sup>b</sup> In the Authorized Version rendered inaccurately "plain."

<sup>c</sup> Tabor (1 Sam. x. 3) has no connection with the mount of the same name.

<sup>d</sup> The same thing may be observed, though not with the same exclusive regularity, in Provence, &

inaccessibility had been the object of its builders.<sup>a</sup> And indeed such was their object. These groups of naked, forlorn structures, piled irregularly one over the other on the curve of the hill-top, their rectangular outline, flat roofs, and blank walls, suggestive to the western mind rather of fastness than of peaceful habitation, surrounded by filthy heaps of the rubbish of centuries, approached only by the narrow, winding path, worn white, on the gray or brown breast of the hill — are the lineal descendants, if indeed they do not sometimes contain the actual remains, of the "fenced cities, great and walled up to heaven," which are so frequently mentioned in the records of the Israelite conquest. They bear witness now, no less surely than they did even in that early age, and as they have done through all the ravages and conquests of thirty centuries, to the insecurity of the country — to the continual risk of sudden plunder and destruction incurred by those rash enough to take up their dwelling in the plain. Another and hardly less valid reason for the practice is furnished in the terms of our Lord's well-known apologue, — namely, the treacherous nature of the loose alluvial "sand" of the plain under the sudden rush of the winter torrents from the neighboring hills, as compared with the safety and firm foundation attainable by building on the naked "rock" of the hills themselves (Matt. vii. 24-27).

26. These hill-towns were not what gave the Israelites their main difficulty in the occupation of the country. Wherever strength of arm and fleetness of foot availed, there those hardy warriors, fierce as lions, sudden and swift as eagles, sure-footed and fleet as the wild deer on the hills (1 Chr. xii. 8; 2 Sam. i. 23, ii. 18), easily conquered. It was in the plains, where the horses and chariots of the Canaanites and Philistines had space to manoeuvre, that they failed in dislodging the aborigines. "Judah drove out the inhabitants of the mountain, but could not drive out the inhabitants of the valley, because they had chariots of iron . . . neither could Manasseh drive out the inhabitants of Beth-shean . . . nor Megiddo," in the plain of Esdraelon . . . "nor could Ephraim drive out the Canaanites that dwelt in Gezer," on the maritime plain near Ramleh . . . "nor could Asher drive out the inhabitants of Acho . . . and the Amorites forced the children of Dan into the mountain, for they would not suffer them to come down into the valley" (Judg. i. 19-35). Thus in this case the ordinary conditions of conquest were reversed — the conquerors took the hills, the conquered kept the plains. To a people so exclusive as the Jews there must have been a constant satisfaction in the elevation and inaccessibility of their highland regions. This is evident in every page of their literature, which is tinged throughout with a highland coloring. The "mountains" were to "bring peace," the "little hills, justice to the people:" when plenty came, the corn was to flourish on the "top of the moun-

tains" (Ps. lxxii. 3, 16). In like manner the mountains were to be joyful before Jehovah when He came to judge his people (xcviii. 8). What gave its keenest sting to the Babylonian conquest, was the consideration that the "mountains of Israel," the "ancient high places," were become a "prey and a derision;" while, on the other hand, one of the most joyful circumstances of the restoration is, that the mountains "shall yield their fruit as before, and be settled after their old estates" (Ez. xxxvi. 1, 8, 11). But it is needless to multiply instances of this, which pervades the writings of the psalmists and prophets in a truly remarkable manner, and must be familiar to every student of the Bible. (See the citations in *S. § P. ch. ii. viii.*) Nor was it unacknowledged by the surrounding heathen. We have their own testimony that in their estimation Jehovah was the "God of the mountains" (1 K. xx. 28), and they showed their appreciation of the fact by fighting (as already noticed), when possible, in the lowlands. The contrast is strongly brought out in the repeated expression of the psalmists. "Some," like the Canaanites and Philistines of the lowlands, "put their trust in chariots and some in horses; but we" — we mountaineers, from our "sanctuary" on the heights of "Zion" — "will remember the name of Jehovah our God," "the God of Jacob our father," the shepherd-warrior, whose only weapons were sword and bow — the God who is now a high fortress for us — "at whose command both chariot and horse are fallen," "who burneth the chariots in the fire" (Ps. xx. 1, 7, xlv. 7-11, lxxvi. 2, 6).

27. But the hills were occupied by other edifices besides the "fenced cities." The tiny white domes which stand perched here and there on the summits of the eminences, and mark the holy ground in which some Mohammedan saint is resting — sometimes standing alone, sometimes near the village in either case surrounded with a rude inclosure, and overshadowed with the grateful shade and pleasant color of terebith or carob — these are the successors of the "high places" or sanctuaries so constantly denounced by the prophets, and which were set up "on every high hill and under every green tree" (Jer. ii. 20; Ez. vi. 13).

28. From the mountainous structure of the Holy Land and the extraordinary variations in the level of its different districts, arises a further peculiarity most interesting and most characteristic — namely, the extensive views of the country which can be obtained from various commanding points. The number of *panoramas* which present themselves to the traveller in Palestine is truly remarkable. To speak of the west of Jordan only, for east of it all is at present more or less unknown — the prospects from the height of *Beni naim*,<sup>b</sup> near Hebron, from the Mount of Olives, from *Nebv Samuil*, from Bethel, from Gerizim or Ebal, from Jenin, Carmel, Tabor, Safed, the Castle of Banias, the *Kubbet en-Nasr* above Damascus — are known to many travellers. Their peculiar charm resides in

country which, in its natural and artificial features, presents many a likeness to Palestine.

\* Hence the Saviour's illustration from "a city set on a hill" (Matt. v. 14) was perfectly natural, without its being suggested by any particular passage in sight at the time. Stanley writes incorrectly "the city" (*S. § P. p. 121, Amer. ed.*), and thinks that *Safed* was meant, so conspicuous from the traditional *Mount of the Beatitudes (Kurân Hattin)*. The *Book* has no article. H.

<sup>a</sup> Two such may be named as types of the rest, — *Kuriyet Jitt* (perhaps an ancient Gath or Gitta), perched on one of the western spurs of the *Jebel Nablus*, and described high up beside the road from *Jaffa* to *Nablus*; and *Wazz* or *Mazz*, on the absolute top of the lofty peaked hill, at the foot of which the spring of *Jalud* wells forth.

<sup>b</sup> *Robinson, Bibl. Res. i. 490.*

their wide extent, the number of spots historically remarkable which are visible at once, the limpid clearness of the air, which brings the most distant objects comparatively close, and the consideration that in many cases the feet must be standing on the same ground, and the eyes resting on the same spots which have been stood upon and gazed at by the most famous patriarchs, prophets, and heroes, of all the successive ages in the eventful history of the country. We can stand where Abraham and Lot stood looking down from Bethel into the Jordan Valley, when Lot chose to go to Sodom and the great destiny of the Hebrew people was fixed forever;<sup>a</sup> or with Abraham on the height near Hebron gazing over the gulf towards Sodom at the vast column of smoke as it towered aloft tinged with the rising sun, and wondering whether his kinsman had escaped; or with Gaal the son of Ebed on Gerizim when he watched the armed men steal along like the shadow of the mountains on the plain of the Mukhna; or with Deborah and Barak on Mount Tabor when they saw the hosts of the Canaanites marshalling to their doom on the undulations of Esdraelon; or with Elisha on Carmel looking across the same wide space towards Shunem, and recognizing the bereaved mother as she urged her course over the flat before him; or, in later times, with Mohammed on the heights above Damascus, when he put by an earthly for a heavenly paradise; or with Richard Cœur de Lion on *Nebj Samuil* when he refused to look at the towers of the Holy City, in the deliverance of which he could take no part. These we can see; but the most famous and the most extensive of all we cannot see. The view of Balaam from Pisgah, and the view of Moses from the same spot, we cannot realize, because the locality of Pisgah is not yet accessible. [Yet see Addition to NEBO, Amer. ed.]

These views are a feature in which Palestine is perhaps approached by no other country, certainly by no country whose history is at all equal in importance to the world. Great as is their charm when viewed as mere landscapes, their deep and abiding interest lies in their intimate connection with the history and the remarkable manner in which they corroborate its statements. By its constant reference to localities — mountain, rock, plain, river, tree — the Bible seems to invite examination; and, indeed, it is only by such examination that we can appreciate its minute accuracy and realize how far its plain matter-of-fact statements of actual occurrences, to actual persons, in actual places — how far these raise its records above the unreal and unconnected rhapsodies, and the vain repetitions, of the sacred books of other religions.<sup>b</sup>

29. A few words must be said in general description of the maritime lowland, which it will be remembered intervenes between the sea and the highlands, and of which detailed accounts will be found under the heads of its great divisions.

This region, only slightly elevated above the level of the Mediterranean, extends without interruption from *el-Arish*, south of Gaza, to Mount

Carmel. It naturally divides itself into two portions, each of about half its length: the lower one the wider; the upper one the narrower. The lower half is the Plain of the Philistines — Philistia, or, as the Hebrews called it, the *Shefelah* or lowland. [SHEFELAH.] The upper half is the Sharon of the Old and New Testaments, the "Forest country" of Josephus and the LXX. (Joseph. *Ant.* xiv. 13, § 3; LXX. Is. lxx. 10). [SHARON.] Viewed from the sea this maritime region appears as a long, low coast of white or cream-colored sand, its slight undulations rising occasionally into mounds or cliffs, which in one or two places, such as *Jaffe* and *Um-Khalil*, almost aspire to the dignity of headlands. Over these white undulations, in the farthest background, stretches the faint blue level line of the highlands of Judea and Samaria.

30. Such is its appearance from without. But from within, when traversed, or overlooked from some point on those blue hills, such as *Beit-ur* or *Beit-nettif*, the prospect is very different.

The Philistine Plain is on an average fifteen or sixteen miles in width from the coast to the first beginning of the belt of hills, which forms the gradual approach to the highland of the mountains of Judah. This district of inferior hills contains many places which have been identified with those named in the lists of the Conquest as being in the plain, and it was therefore probably attached originally to the plain, and not to the highland. It is described by modern travellers as a beautiful open country, consisting of low calcareous hills rising from the alluvial soil of broad arable valleys, covered with inhabited villages and deserted ruins, and clothed with much natural shrubbery and with large plantations of olives in a high state of cultivation; the whole gradually broadening down into the wide expanse of the plain <sup>c</sup> itself. The plain is in many parts almost a dead level, in others gently undulating in long waves; here and there low mounds or hillocks, each crowned with its village, and more rarely still a hill overtopping the rest, like *Tell es-Safieh* or *Ajlun*, the seat of some fortress of Jewish or Crusading times. The larger towns, as Gaza and Ashdod, which stand near the shore, are surrounded with huge groves of olive, sycamore, and palm, as in the days of King David (1 Chr. xxvii. 28) — some of them among the most extensive in the country. The whole plain appears to consist of a brown loamy soil, light, but rich, and almost without a stone. This is noted as its characteristic in a remarkable expression of one of the leaders in the Maccabean wars, a great part of which were fought in this locality (1 Macc. x. 73). It is to this absence of stone that the disappearance of its ancient towns and villages — so much more complete than in other parts of the country — is to be traced. The common material is brick, made, after the Egyptian fashion, of the sandy loam of the plain mixed with stubble, and this has been washed away in almost all cases by the rains of successive centuries (Thomson, p. 563). It is now, as it was when the Philistines possessed

<sup>a</sup> Stanley, *S. & P.* pp. 218, 219.

<sup>b</sup> Nothing can be more instructive than to compare (in regard to this one only of the many points in which they differ) the Bible with the Koran. So little ascertainable connection has the Koran with the life or career of Mohammed, that it seems impossible to arrange it with any certainty in the order, real or sensible, of its composition. With the Bible, on the

other hand, each book belongs to a certain period. It describes the persons of that period; the places under the names which they then bore, and with many a note of identity by which they can often be still recognized; so that it may be said, almost without exaggeration, to be the best Handbook to Palæstine.

<sup>c</sup> Robinson, *Bibl. Res.* ii. 15, 20, 29, 32. 225.

It, one enormous cornfield; an ocean of wheat covers the wide expanse between the hills and the sand dunes of the sea-shore, without interruption of any kind — no break or hedge, hardly even a single olive-tree (Thomson, p. 552; Van de Velde, ii. 175). Its fertility is marvelous; for the prodigious crops which it raises are produced, and probably have been produced almost year by year for the last 40 centuries, without any of the appliances which we find necessary for success — with no manure beyond that naturally supplied by the washing down of the hill-torrents — without irrigation, without succession of crops, and with only the rudest method of husbandry. No wonder that the Jews struggled hard to get, and the Philistines to keep such a prize: no wonder that the hosts of Egypt and Assyria were content to traverse and re-traverse a region where their supplies of corn were so abundant and so easily obtained.

The southern part of the Philistine Plain, in the neighborhood of *Beit Jibrin*, appears to have been covered, as late as the sixth century, with a forest, called the Forest of Gerar; but of this no traces are known now to exist (Procopius of Gaza, *Scholion* on 2 Chr. xiv.).

31. The Plain of Sharon is much narrower than Philistia. It is about ten miles wide from the sea to the foot of the mountains, which are here of a more abrupt character than those of Philistia, and without the intermediate hilly region there occurring. At the same time it is more undulating and irregular than the former, and crossed by streams from the central hills, some of them of considerable size, and containing water during the whole year. Owing to the general level of the surface and to the accumulation of sand on the shore, several of these streams spread out into wide marshes, which might without difficulty be turned to purposes of irrigation, but in their present neglected state form large boggy places. The soil is extremely rich, varying from bright red to deep black, and producing enormous crops of weeds or grain, as the case may be. Here and there, on the margins of the streams or the borders of the marshes, are large tracts of rank meadow, where many a herd of camels or cattle may be seen feeding, as the royal herds did in the time of David (1 Chr. xxvii. 29). At its northern end Sharon is narrowed by the low hills which gather round the western flanks of Carmel, and gradually encroach upon it until it terminates entirely against the shoulder of the mountain itself, leaving only a narrow beach at the foot of the promontory by which to communicate with the plain on the north.

32. The tract of white sand already mentioned as forming the shore line of the whole coast, is gradually encroaching on this magnificent region. In the south it has buried Askelon, and in the north between Caesarea and Jaffa the dunes are said to be as much as three miles wide and 300 feet high. The obstruction which is thus caused to the outflow of the streams has been already noticed. All along the edge of Sharon there are pools and marshes due to it. In some places the sand is covered by a stunted growth of maritime pines, the descendants of the forests which at the Christian era gave its name to this portion of the plain, and which seem to have existed as late as

the second Crusade (Vinisaufr in *Chron. of Crus.*). It is probable, for the reasons already stated, that the Jews never permanently occupied more than a small portion of this rich and favored region. Its principal towns were, it is true, allotted to the different tribes (Josh. xv. 45–47; xvi. 3, Gezer xvii. 11, Dor, etc.); but this was in anticipation of the intended conquest (xiii. 3–6). The five cities of the Philistines remained in their possession (1 Sam. v., xxi. 10, xxvii.); and the district was regarded as one independent of and apart from Israel (xxvii. 2; 1 K. ii. 39; 2 K. viii. 2, 3). In like manner Dor remained in the hands of the Canaanites (Judg. i. 27), and Gezer in the hands of the Philistines till taken from them in Solomon's time by his father-in-law (1 K. ix. 16). We find that towards the end of the monarchy the tribe of Benjamin was in possession of Lydd, Jimzu, Ono, and other places in the plain (Neh. xi. 35; 2 Chr. xxviii. 18); but it was only by a gradual process of extension from their native hills, in the rough ground of which they were safe from the attack of cavalry and chariots. But, though the Jews never had any hold on the region, it had its own population, and towns probably not inferior to any in Syria. Both Gaza and Askelon had regular ports (*marjumas*): and there is evidence to show that they were very important and very large long before the fall of the Jewish monarchy (Kenrick, *Phœnicia*, pp. 27–29). Ashdod, though on the open plain, resisted for 29 years the attack of the whole Egyptian force: a similar attack to that which reduced Jerusalem without a blow (2 Chr. xii.), and was sufficient on another occasion to destroy it after a siege of a year and a half, even when fortified by the works of a score of successive monarchs (2 K. xxv. 1–3).

33. In the Roman times this region was considered the pride of the country (*B. J.* i. 29, § 9), and some of the most important cities of the province stood in it — Caesarea, Antipatris, Diospolis. The one ancient port of the Jews, the "beautiful" city of Joppa, occupied a position central between the Shefelah and Sharon. Roads led from these various cities to each other, to Jerusalem, Neapolis, and Sebaste in the interior, and to Ptolemais and Gaza on the north and south. The commerce of Damascus, and, beyond Damascus, of Persia and India, passed this way to Egypt, Rome, and the infant colonies of the west; and that traffic and the constant movement of troops backwards and forwards must have made this plain one of the busiest and most populous regions of Syria at the time of Christ. Now, Caesarea is a wave-washed ruin; Antipatris has vanished both in name and substance; Diospolis has shaken off the appellation which it bore in the days of its prosperity, and is a mere village, remarkable only for the ruin of its fine mediæval church, and for the palm-grove which shrouds it from view. Joppa alone maintains a dull life, surviving solely because it is the nearest point at which the sea-going travellers from the west can approach Jerusalem. For a few miles above Jaffa cultivation is still carried on, but the fear of the Bedouins who roam (as they always have roamed) over parts of the plain, plundering all passers-by, and extorting black mail from the wretched peasants, has desolated a large district,

<sup>a</sup> *Le grenier de la Syrie* (Duc de Raguse, *Voyage*).

<sup>b</sup> The Bedouins from beyond Jordan, whom Gideon spoiled, destroyed the earth "as far as Gaza;" i. e.

they filled the Plain of Esdraelon, and overflowed into Sharon, and thence southwards to the richest prize of the day.

and effectually prevents it being used any longer as the route for travellers from south to north; while in the portions which are free from this scourge, the teeming soil itself is doomed to unproductiveness through the folly and iniquity of its Turkish rulers, whose exactions have driven, and are driving, its industrious and patient inhabitants to remoter parts of the land.<sup>a</sup>

34. The characteristics already described are hardly peculiar to Palestine. Her hilly surface and general height, her rocky ground and thin soil, her torrent beds wide and dry for the greater part of the year, even her belt of maritime lowland—these she shares with other lands, though it would perhaps be difficult to find them united elsewhere. But there is one feature, as yet only alluded to, in which she stands alone. This feature is the Jordan—the one River of the country.

35. Properly to comprehend this, we must cast our eyes for a few moments north and south, outside the narrow limits of the Holy Land. From top to bottom—from north to south—from Antioch to Akaba at the tip of the eastern horn of the Red Sea, Syria is cleft by a deep and narrow

trench running parallel with the coast of the Mediterranean, and dividing, as if by a fosse or ditch, the central range of maritime highlands from those further east.<sup>b</sup> At two points only in its length is the trench interrupted: by the range of Lebanon and Hermon, and by the high ground south of the Dead Sea. Of the three compartments thus formed, the northern is the valley of the Orontes; the southern is the *Wady el-Arabah*, while the central one is the valley of the Jordan, the *Arabah* of the Hebrews, the *Aulón* of the Greeks, and the *Ghôr* of the Arabs. Whether this remarkable fissure in the surface of the earth originally ran without interruption from the Mediterranean to the Red Sea, and was afterwards (though still at a time long anterior to the historic period) broken by the protrusion or elevation of the two tracts just named, cannot be ascertained in the present state of our geological knowledge of this region. The central of its three divisions is the only one with which we have at present to do; it is also the most remarkable of the three. The river is elsewhere described in detail [JORDAN]; but it and the valley through which it rushes down its extraordinary

Profile-Section of the Holy Land from the Dead Sea to Mount Hermon, along the line of the Jordan.

descent—and which seems as it were to inclose and conceal it during the whole of its course—must be here briefly characterized as essential to a correct comprehension of the country of which they form the external barrier, dividing Galilee, Ephraim, and Judah from Bashan, Gilead, and Moab, respectively.

36. To speak first of the Valley. It begins with the river at its remotest springs of Hasbeiya on the N. W. side of Hermon, and accompanies it to the lower end of the Dead Sea, a length of about 150 miles. During the whole of this distance its course is straight, and its direction nearly due north and south. The springs of Hasbeiya are 1,700 feet above the level of the Mediterranean, and the northern end of the Dead Sea is 1,317 feet below it, so that between these two points the valley falls with more or less regularity through a height of more than 3,000 feet. But though the river disappears at this point, the valley still continues its descent below the waters of the Dead Sea till it reaches a further depth of 1,308 feet. So that the

bottom of this extraordinary crevasse is actually more than 2,600 feet below the surface of the ocean.<sup>c</sup> Even that portion which extends down to the brink of the lake and is open to observation, is without a parallel in any other part of the world. It is obvious that the road by which these depths are reached from the Mount of Olives or Hebron must be very steep and abrupt. But this is not its real peculiarity. Equally great and sudden descents may be found in our own or other mountainous countries. That which distinguishes this from all others is the fact that it is made into the very bowels of the earth. The traveller who stands on the shore of the Dead Sea has reached a point nearly as far below the surface of the ocean as the miners in the lowest levels of the deepest mines of Cornwall.

37. In width the valley varies. In its upper and shallower portion, as between Banias and the lake of Huleh, it is about five miles across; the inclosing mountains of moderate height, though tolerably vertical in character; the floor almost an absolute

<sup>a</sup> This district, called the *Sahel Athlit*, between the sea and the western flanks of Carmel, has been within a very few years reduced from being one of the most thriving and productive regions of the country, as well as one of the most profitable to the government, to desolation and desertion, by these wicked exactions. The taxes are paid in kind; and the officers who gather them demand so much grain for their own perquisites as to leave the peasant barely enough for the next sowing. In addition to this, as long as any people remain in a district they are liable for the whole of the tax at which the district is rated. No wonder that

under such pressure the inhabitants of the *Sahel Athlit* have almost all emigrated to Egypt, where the system is better, and better administered.

<sup>b</sup> So remarkable is this depression, that it is adopted by the great geographer Ritter as the base of his description of Syria.

<sup>c</sup> Deep as it now is, the Dead Sea was once doubtless far deeper, for the sediment brought into it by the Jordan must be gradually accumulating. No data however, exist by which to judge of the rate of this accumulation.

flat, with the mysterious river hidden from sight in an impenetrable jungle of reeds and marsh vegetation.

Between the Hülch and the Sea of Galilee, as far as we have any information, it contracts, and becomes more of an ordinary ravine or glen.

It is in its third and lower portion that the valley assumes its more definite and regular character. During the greater part of this portion, it is about seven miles wide from the one wall to the other. The eastern mountains preserve their straight line of direction, and their massive horizontal wall-like aspect, during almost the whole<sup>a</sup> distance. Here and there they are cloven by the vast mysterious rents, through which the Hieromax, the *Wady Zurka*, and other streams force their way down to the Jordan. The western mountains are more irregular in height, their slopes less vertical, and their general line is interrupted by projecting outposts such as *Tell Fasail*, and *Kurn Sártubeh*. North of Jericho they recede in a kind of wide amphitheatre, and the valley becomes twelve miles broad, a breadth which it thenceforward retains to the southern extremity of the Dead Sea. What the real bottom of this cavity may be, or at what depth below the surface, is not yet known, but that which meets the eye is a level or gently undulating surface of light sandy soil, about Jericho brilliant white, about *Beisan* dark and reddish, crossed at intervals by the torrents of the western highlands which have ploughed their zigzag course deep down into its soft substance, and even in autumn betray the presence of moisture by the bright green of the thorn-bushes which flourish in and around their channels, and cluster in greater profusion round the spring-heads at the foot of the mountains. Formerly palms abounded on both sides<sup>b</sup> of the Jordan at its lower end, but none now exist there. Passing through this vegetation, such as it is, the traveller emerges on a plain of bare sand, furrowed out in innumerable channels by the rain-streams, all running eastward towards the river, which lies there in the distance, though invisible. Gradually these channels increase in number and depth till they form steep cones or mounds of sand of brilliant

white, 50 to 100 feet high, their lower part loose but their upper portion indurated by the action of the rains and the tremendous heat of the sun. Here and there these cones are marshaled in tolerably regular line, like gigantic tents, and form the bank of a terrace overlooking a flat considerably lower in level than that already traversed. After crossing this lower flat for some distance, another descent, of a few feet only, is made into a thick growth of dwarf shrubs: and when this has been pursued until the traveller has well-nigh lost all patience, he suddenly arrives on the edge of a "hole" filled with thick trees and shrubs, whose tops rise to a level with his feet. Through the thicket comes the welcome sound of rushing waters. This is the Jordan.<sup>c</sup>

38. Buried as it is thus between such lofty ranges, and shielded from every breeze, the climate of the Jordan Valley is extremely hot and relaxing. Its enervating influence is shown by the inhabitants of Jericho, who are a small, feeble, exhausted race, dependent for the cultivation of their lands on the hardier peasants of the highland villages (Rob. i. 550), and to this day prone to the vices which are often developed by tropical climates, and which brought destruction on Sodom and Gomorrah. But the circumstances which are unfavorable to morals are most favorable to fertility. Whether there was any great amount of cultivation and habitation in this region in the times of the Israelites the Bible does not<sup>e</sup> say; but in post-biblical times there is no doubt on the point. The palms of Jericho, and of Abila (opposite Jericho on the other side of the river), and the extensive balsam and rose-gardens of the former place, are spoken of by Josephus, who calls the whole district a "divine spot" (*θεῖον χωῖον*, B. J. iv. 8, § 3; see vol. ii. 1265).<sup>f</sup> Bethshan was a proverb among the rabbis for its fertility. Succoth was the site of Jacob's first settlement west of the Jordan; and therefore was probably then, as it still is, an eligible spot. In later times indigo and sugar appear to have been grown near Jericho and elsewhere; <sup>g</sup> aqueducts are still partially standing, of Christian or Saracenic arches; and there are remains, all over the plain between Jericho and the river, of former residences or towns

<sup>a</sup> North of the *Wady Zurka* their character alters. They lose the vertical wall-like appearance, so striking at Jericho, and become more broken and sloping. The writer had an excellent view of the mountains behind *Beisan* from the Burj at Zerim in October, 1861. Zerim, though distant, is sufficiently high to command a prospect into the interior of the mountains. Thus viewed, their wall-like character had entirely vanished. There appeared, instead, an infinity of separate summits, fully as irregular and multitudinous as any district west of Jordau, rising gradually in height as they receded eastward. Is this the case with this locality only? or would the whole region east of the Jordan prove equally broken, if viewed sufficiently near? Prof. Stanley hints that such may be the case (S. § P. p. 320). Certainly the hills of Judah and Samaria appear as much a "wall" as those east of Jordan, when viewed from the sea-coast.

<sup>b</sup> Jericho was the city of palm-trees (2 Chr. xxviii. 15); and Josephus mentions the palms of Abila, on the eastern side of the river, as the scene of Moses' last address. "The whole shore of the Dead Sea," says Mr. Poole, "is strewn with palms" (*Geog. Society's Journal*, 1856). Dr. Anderson (p. 192) describes a large grove as standing on the lower margin of the sea between *Wady Mojeb* (Arnon) and *Zurka Main* (Callirhoë).

<sup>c</sup> The writer is here speaking from his own observation of the lower part. A similar description is given by Lynch of the upper part (*Official Report*, April 13; Van de Velde, *Memoir*, p. 125).

<sup>d</sup> The lines which have given many a young mind its first and most lasting impression of the Jordan and its surrounding scenery, are not more accurate than many other versions of Scripture scenes and facts:—

"Sweet fields beyond the swelling flood  
Stand dressed in living green;  
So to the Jews old Canaan stood,  
While Jordan rolled between."

<sup>e</sup> Besides Gilgal, the tribe of Benjamin had four cities or settlements in the neighborhood of Jericho (Joab. xviii. 21). The rebuilding of the last-named town in Ahab's reign probably indicates an increase in the prosperity of the district.

<sup>f</sup> This seems to have been the *περίχωρος*, or "region round about" Jordan, mentioned in the Gospels, and possibly answering to the *Ciccar* of the ancient Hebrews. (See Stanley, S. § P. pp. 234, 488.)

<sup>g</sup> The word *suckkar* (sugar) is found in the names of places near Tiberias below Sebbeh (Masada), and near Gaza, as well as at Jericho. All these are in the depressed regions. For the indigo, see Poole (*Geogr. Journal*, xvi. 57).

and of systems of irrigation (Ritter, *Jordan*, pp. 503, 512). Phasaelis, a few miles further north, was built by Herod the Great; and there were other towns either in or closely bordering on the plain. At present this part is almost entirely desert, and cultivation is confined to the upper portion, between *Sakul* and *Beisan*. There indeed it is conducted on a grand scale; and the traveller as he journeys along the road which leads over the foot of the western mountains, overlooks an immense extent of the richest land, abundantly watered, and covered with corn and other grain.<sup>a</sup> Here, too, as at Jericho, the cultivation is conducted principally by the inhabitants of the villages on the western mountains.

39. All the irrigation necessary for the towns, or for the cultivation which formerly existed, or still exists, in the *Ghór*, is obtained from the torrents and springs of the western mountains. For all purposes to which a river is ordinarily applied, the Jordan is useless. So rapid that its course is one continued cataract; so crooked, that in the whole of its lower and main course, it has hardly half a mile straight; so broken with rapids and other impediments, that no boat can swim for more than the same distance continuously; so deep below the surface of the adjacent country that it is invisible, and can only with difficulty be approached; resolutely refusing all communication with the ocean, and, ending in a lake, the peculiar conditions of which render navigation impossible — with all these characteristics the Jordan, in any sense which we attach to the word "river," is no river at all: alike useless for irrigation and navigation, it is in fact, what its Arabic name signifies, nothing but a "great watering place" (*Shev'at el-Khebir*).

40. But though the Jordan is so unlike a river in the western sense of the term, it is far less so than the other streams of the Holy Land. It is at least perennial, while, with few exceptions, they are mere winter torrents, rushing and foaming during the continuance of the rain, and quickly drying up after the commencement of summer: "What time they wax warm they vanish; when it is hot they are consumed out of their place . . . they go to nothing and perish" (Job vi. 17). For fully half the year, these "rivers" or "brooks," as our version of the Bible renders the special term (*nachal*) which designates them in the original, are often mere dry lanes of hot white or gray stones; or if their water still continues to run, it is a tiny rill, working its way through heaps of parched boulders in the centre of a broad flat tract of loose stones, often only traceable by the thin line of verdure which springs up along its course. Those who have travelled in Provence or Granada in the summer will have no difficulty in recognizing this description, and in comprehending how the use of such terms as "river" or "brook" must mislead those who can only read the exact and vivid narrative of the Bible through the medium of the Authorized Version.<sup>b</sup>

This subject will be more fully described, and a list of the few perennial streams of the Holy Land given under RIVER.

<sup>a</sup> Robiusion, iii. 314; and from the writer's own observation.

<sup>b</sup> \* To prevent this confusion, some recent geographers (as Dr. Menke, on his map, Gotha, 1868) very properly distinguish the river and *Wady* from each other by different signs. H.

41. How far the valley of the Jordan was employed by the ancient inhabitants of the Holy Land as a medium of communication between the northern and southern parts of the country we can only conjecture. Though not the shortest route between Galilee and Judæa, it would yet, as far as the levels and form of the ground are concerned, be the most practicable for large bodies; though these advantages would be seriously counterbalanced by the sultry heat of its climate, as compared with the fresher air of the more difficult road over the highlands.

The ancient notices of this route are very scanty.

(1.) From 2 Chr. xxviii. 15, we find that the captives taken from Judah by the army of the northern kingdom were sent back from Samaria to Jerusalem by way of Jericho. The route pursued was probably by *Nablus* across the *Mukinna*, and by *Wady Farrah* or *Fasail* into the Jordan Valley. Why this road was taken is a mystery, since it is not stated or implied that the captives were accompanied by any heavy baggage which would make it difficult to travel over the central route. It would seem, however, to have been the usual road from the north to Jerusalem (comp. Luke xvii. 11 with xix. 1), as if there were some impediment to passing through the region immediately north of the city.

(2.) Pompey brought his army and siege-train from Damascus to Jerusalem (B. C. 40), past Scythopolis and Pella, and thence by Koreæ (possibly the present *Kerawa* at the foot of the *Wady Ferrah*) to Jericho (Joseph. *Ant.* xiv. 3, § 4; *B. J.* i. 6, § 5).

(3.) Vespasian marched from Emmaus, on the edge of the plain of Sharon, not far east of *Ramleh*, past Neapolis (*Nablus*), down the *Wady Ferrah* or *Fasail* to Koreæ, and thence to Jericho (*B. J.* iv. 8, § 1); the same route as that of the captive Judæans in No. 1.

(4.) Antoninus Martyr (cir. A. D. 600), and possibly Willibald<sup>c</sup> (A. D. 722) followed this route to Jerusalem.

(5.) Baldwin I. is said to have journeyed from Jericho to Tiberias with a caravan of pilgrims.

(6.) In our own times the whole length of the valley has been traversed by De Bertou, and by Dr. Anderson, who accompanied the American Expedition as geologist, but apparently by few if any other travellers.

42. Monotonous and uninviting as much of the Holy Land will appear from the above description to English readers, accustomed to the constant verdure, the succession of flowers, lasting almost throughout the year, the ample streams and the varied surface of our own country — we must remember that its aspect to the Israelites after that weary march of forty years through the desert, and even by the side of the rightest recollections of Egypt that they could conjure up, must have been very different. After the "great and terrible wilderness" with its "fery serpents," its "scorpions," "drought," and "rocks of flint"; the slow and sultry march all day in the dust of that enormous procession; the eager looking forward to the well

<sup>c</sup> Willibald omits his route between Caesarea (? C. Philippi = *Bantias*) and the monastery of St. John the Baptist near Jericho. He is always assumed to have come down the valley.

at which the encampment was to be pitched; the crowding, the fighting, the clamor, the bitter disappointment round the modicum of water when at last the desired spot was reached; the "light bread" <sup>a</sup> so long "loathed"; the rare treat of animal food when the quails descended, or an approach to the sea permitted the "fish" <sup>b</sup> to be caught; after this daily struggle for a painful existence, how grateful must have been the rest afforded by the Land of Promise! — how delicious the shade, scanty though it were, of the hills and ravines, the gushing springs and green plains, even the mere wells and cisterns, the vineyards and oliveyards and "fruit trees" <sup>c</sup> in abundance, the cattle, sheep, and goats, covering the country with their long black lines, the bees swarming round their pendant combs <sup>d</sup> in rock or wood! Moreover they entered the country at the time of the Passover, <sup>e</sup> when it was arrayed in the full glory and freshness of its brief spring-tide, before the scorching sun of summer had had time to wither its flowers and embrown its verdure. Taking all these circumstances into account, and allowing for the bold metaphors <sup>f</sup> of oriental speech — so different from our cold depreciating expressions, — it is impossible not to feel that those wayworn travellers could have chosen no fitter words to express what their new country was to them than those which they so often employ in the accounts of the conquest — "a land flowing with milk and honey, the glory of all lands."

43. Again, the variations of the seasons may appear to us slight, and the atmosphere dry and hot; but after the monotonous climate of Egypt, where rain is a rare phenomenon, and where the difference between summer and winter is hardly perceptible, the "rain of heaven" must have been a most grateful novelty in its two seasons, the former and the latter — the occasional snow and ice of the winters of Palestine, and the burst of returning spring, must have had double the effect which they would produce on those accustomed to such changes. Nor is the change only a relative one; there is a real difference — due partly to the higher latitude of Palestine, partly to its proximity to the sea — between the sultry atmosphere of the Egyptian valley and the invigorating sea-breezes which blow over the hills of Ephraim and Judah.

44. The contrast with Egypt would tell also in another way. In place of the huge ever-flowing river whose only variation was from low to high, and from high to low again, and which lay at the lowest level of that level country, so that all irrigation had to be done by artificial labor — "a land

where thou sowest thy seed and waterest it with thy foot like a garden of herbs" <sup>g</sup> — in place of this, they were to find themselves in a land of constant and considerable undulation, where the water, either of gushing spring, or deep well, or flowing stream, could be procured at the most varied elevations, requiring only to be judiciously husbanded and skillfully conducted to find its own way through field or garden, whether terraced on the hill-sides or extended in the broad bottoms. <sup>h</sup> But such change was not compulsory. Those who preferred the climate and the mode of cultivation of Egypt could resort to the lowland plains of the Jordan Valley, where the temperature is more constant and many degrees higher than on the more elevated districts of the country, where the breezes never penetrate, where the light fertile soil recalls, as it did in the earliest <sup>i</sup> times, that of Egypt, and where the Jordan in its lowness of level presents at least one point of resemblance to the Nile.

45. In truth, on closer consideration, it will be seen that, beneath the apparent monotony, there is a variety in the Holy Land really remarkable. There is the variety due to the difference of level between the different parts of the country. There is the variety of climate and of natural appearances, proceeding, partly from those very differences of level, and partly from the proximity of the snow-capped Hermon and Lebanon on the north and of the torrid desert on the south; and which approximate the climate, in many respects, to that of regions much further north. There is also the variety which is inevitably produced by the presence of the sea — "the eternal freshness and liveliness of ocean."

46. Each of these is continually reflected in the Hebrew literature. The contrast between the highlands and lowlands is more than implied in the habitual forms of <sup>k</sup> expression, "going up" to Judah, Jerusalem, Hebron; "going down" to Jericho, Capernaum, Lydda, Caesarea, Gaza, and Egypt. More than this, the difference is marked unmistakably in the topographical terms which so abound in, and are so peculiar to, this literature. "The mountain of Judah," "the mountain of Israel," "the mountain of Naphtali," are the names by which the three great divisions of the highlands are designated. The predominant names for the towns of the same district — Gibeah, Geba, Gaba, Gibeon (meaning "hill"); Ramah, Ramathaim (the "brow" of an eminence); Mizpeh, Zophim, Zephathah (all modifications of a root signifying a wide prospect) — all reflect the elevation of the region in which they were situated. On the other

<sup>a</sup> Num. xxi. 5.

<sup>b</sup> Num. xi. 22.

<sup>c</sup> Neh. ix. 25.

<sup>d</sup> 1 Sam. xiv. 26.

<sup>e</sup> Josh. v. 10, 11.

<sup>f</sup> See some useful remarks on the use of similar language by the natives of the East at the present day, in reference to spots inadequate to such expressions, in *The Jews in the East*, by Beaton and Frankl (ii. 359).

<sup>g</sup> \* For the meaning of this expression, see FOOT, WATERING WITH THE (Amer. ed.). II.

<sup>h</sup> The view taken above, that the beauty of the Promised Land was greatly enhanced to the Israelites by its contrast with the scenes they had previously passed through, is corroborated by the fact that such laudatory expressions as "the land flowing with milk and honey," "the glory of all lands," etc., occur, with rare exceptions, in those parts of the Bible only which report to have been composed just before their

entrance, and that in the few cases of their employment by the Prophets (Jer. xi. 5, xxxii. 22; Ez. xx. 6, 15) there is always an allusion to "Egypt," "the iron furnace," the passing of the Red Sea, or the wilderness, to point the contrast.

<sup>i</sup> Gen. xiii. 10. Ali Bey (ii. 209) says that the maritime plain, from *Khan Younes*, to Jaffa, is "of rich soil, similar to the slime of the Nile." Other points of resemblance are mentioned by Robinson (*Bibl. Res.* ii. 22, 34, 35, 226), and Thomson (*Lana and Book*, ch. 36). The plain of Gennesareth still "recalls the valley of the Nile" (Stanley, *S. & P.* p. 374). The papyrus is said to grow there (Buchanan, *Cler Furlough*, p. 392).

<sup>k</sup> The same expressions are still used by the Arabs of the *Nejd*, with reference to Syria and their own country (Wallin, *Geogr. Soc. Journal*, xxiv. 174).

nand, the great lowland districts have each their peculiar name. The southern part of the maritime plain is "the Shefelah;" the northern, "Sharon;" the valley of the Jordan, "ha-Arâbah;" names which are never interchanged, and never confounded with the terms (such as *emek, nachal, gai*) employed for the ravines, torrent-beds, and small valleys of the highlands.<sup>a</sup>

47. The differences in climate are no less often mentioned. The Psalmists, Prophets, and historical books, are full of allusions to the fierce heat of the mid-day sun and the dryness of summer; no less than to the various accompaniments of winter — the rain, snow, frost, ice, and fogs, which are experienced at Jerusalem and other places in the upper country quite sufficiently to make every one familiar with them. Even the sharp alternations between the heat of the days and the coldness of the nights, which strike every traveller in Palestine, are mentioned.<sup>c</sup> The Israelites practiced no commerce by sea; and, with the single exception of Joppa, not only possessed no harbor along the whole length of their coast, but had no word by which to denote one. But that their poets knew and appreciated the phenomena of the sea is plain from such expressions as are constantly recurring in their works — "the great and wide sea," its "ships," its "monsters," its roaring and dashing "waves," its "depths," its "sand," its mariners, the perils of its navigation.

It is unnecessary here to show how materially the Bible has gained in its hold on western nations by these vivid reflections of a country so much more like those of the West than are most oriental regions: but of the fact there can be no doubt, and it has been admirably brought out by Professor Stanley in *Sinai and Palestine*, chap. ii. sect. vii.

48. In the preceding description allusion has been made to many of the characteristic features of the Holy Land. But it is impossible to close this account without mentioning a defect which is even more characteristic — its lack of monuments and personal relics of the nation who possessed it for so many centuries, and gave it its claim to our veneration and affection. When compared with other nations of equal antiquity — Egypt, Greece, Assyria, the contrast is truly remarkable. In Egypt and Greece, and also in Assyria, as far as our knowledge at present extends, we find a series of buildings, reaching down from the most remote and mysterious antiquity, a chain, of which hardly a link is wanting, and which records the progress of the people in civilization, art, and religion, as certainly as the buildings of the mediæval architects do that of the various nations of modern Europe. We possess also a multitude of objects of use and ornament, belonging to those nations, truly astonishing in number, and pertaining to every station, office, and fact in their official, religious, and domestic life. But in Palestine it is not too much to say that there does not exist a single edifice, or part of an edifice, of which we can be sure that it

is of a date anterior to the Christian era. Excavated tombs, cisterns, flights of stairs, which are encountered everywhere, are of course out of the question. They may be — some of them, such as the tombs of Hinnion and Shiloh, probably are — of very great age, older than anything else in the country. But there is no evidence either way, and as far as the history of art is concerned nothing would be gained if their age were ascertained. The only ancient buildings of which we can speak with certainty are those which were erected by the Greeks or Romans during their occupation of the country. Not that these buildings have not a certain individuality which separates them from any mere Greek or Roman building in Greece or Rome. But the fact is certain, that not one of them was built while the Israelites were masters of the country, and before the date at which western nations began to get a footing in Palestine. And as with the buildings so with other memorials. With one exception, the museums of Europe do not possess a single piece of pottery or metal work, a single weapon or household utensil, an ornament or a piece of armor, of Israelite make, which can give us the least conception of the manners or outward appliances of the nation before the date of the destruction of Jerusalem by Titus. The coins form the single exception. A few rare specimens still exist, the oldest of them attributed — though even that is matter of dispute — to the Maccabees, and their rudeness and insignificance furnish a stronger evidence than even their absence could imply, of the total want of art among the Israelites.

It may be said that Palestine is now only in the same condition with Assyria before the recent researches brought so much to light. But the two cases are not parallel. The soil of Babylonia is a loose loam or sand, of the description best fitted for covering up and preserving the relics of former ages. On the other hand, the greater part of the Holy Land is hard and rocky, and the soil lies in the valleys and lowlands, where the cities were only very rarely built. If any store of Jewish relics were remaining embedded or hidden in suitable ground — as for example, in the loose mass of debris which coats the slopes around Jerusalem — we should expect occasionally to find articles which might be recognized as Jewish. This was the case in Assyria. Long before the mounds were explored, Rich brought home many fragments of inscriptions, bricks, and engraved stones, which were picked up on the surface, and were evidently the productions of some nation whose art was not then known. But in Palestine the only objects hitherto discovered have all belonged to the West — coins or arms of the Greeks or Romans.

The buildings already mentioned as being Jewish in character, though carried out with foreign details, are the following: —

The tombs of the Kings and of the Judges: the buildings known as the tombs of Absalom, Zecariah, St. James, and Jehoshaphat: the monolith at Siloam, — all in the neighborhood of Jerusalem,

<sup>a</sup> It is impossible to trace these correspondences and distinctions in the English Bible, our translators not having always rendered the same Hebrew by the same English word. But the corrections will be found in the Appendix to Professor Stanley's *Sinai and Palestine*.

<sup>b</sup> Ps. xix. 6. xxxii. 4; Is. iv. 6, xxv. 5, Gen. xviii. 1; 1 Sam. xl. 9; Net. vii. 3.

<sup>c</sup> Jer. xxxvi. 30. Gen. xxxi. 40 refers — unless the recent speculations of Mr. Beke should prove true — to Mesopotamia.

\* Mr. Beke supposes a Haran in Syria near Damascus to be meant in Gen. xxxi. 40. For the grounds of that opinion and the insufficiency of them, see addition to HARAN, Amer. ed.

the ruined synagogues at Meiron and *Kefr Birim*. But there are two edifices which seem to bear a character of their own, and do not so clearly betray the style of the West. These are, the inclosure round the sacred cave at Hebron; and portions of the western, southern, and eastern walls of the *Haram* at Jerusalem, with the vaulted passage below the *Aksa*. Of the former it is impossible to speak in the present state of our knowledge. The latter will be more fully noticed under the head of TEMPLE; it is sufficient here to name one or two considerations which seem to bear against their being of older date than Herod. (1.) Herod is distinctly said by Josephus to have removed the old foundations, and laid others in their stead, inclosing double the original area (*Ant.* xv. 11, § 3; *B. J.* i. 21, § 1). (2.) The part of the wall which all acknowledge to be the oldest contains the springing of an arch. This and the vaulted passage can hardly be assigned to builders earlier than the time of the Romans. (3.) The masonry of these magnificent stones (absurdly called the "bevel"), on which so much stress has been laid, is not exclusively Jewish or even Eastern. It is found at Persepolis; it is also found at Cnidus and throughout Asia Minor, and at Athens; not on stones of such enormous size as those at Jerusalem, but similar in their workmanship.<sup>a</sup>

M. Renan, in his recent report of his proceedings in Phœnicia, has named two circumstances which must have had a great effect in suppressing art or architecture amongst the ancient Israelites, while their very existence proves that the people had no genius in that direction. These are (1) the prohibition of sculptured representations of living creatures, and (2) the command not to build a temple anywhere but at Jerusalem. The hewing or polishing of building-stones was even forbidden. "What," he asks, "would Greece have been, if it had been illegal to build any temples but at Delphi or Eleusis? In ten centuries the Jews had only three temples to build, and of these certainly two were erected under the guidance of foreigners. The existence of synagogues dates from the time of the Maccabees, and the Jews then naturally employed the Greek style of architecture, which at that time reigned universally."

<sup>a</sup> \* In the former of the passages here cited (*Ant.* xv. 11, § 3) Josephus limits Herod's work of reconstruction to the *Naos*, or body of the temple, and the adjacent porticoes. He expressly distinguishes between the foundations of the Temple proper, which Herod relaid, and the solid walls of the outer inclosure, which were laid by Solomon. These outer walls he represents as composed of stones so vast and so firmly joined by bands of iron, as to be immovable for all time — ἀκίνητους τῷ παντί χρόνῳ. Some of the courses of the walls which he thus describes, evidently existing in his day, are plainly recognizable now in the southern portion of the walls of *el-Haram*, including the immense layers which remain of the arch of the ancient bridge across the Tyropœon. His more minute description of the Temple and its area in another work (*B. J.* v. 5, §§ 1-6) correspond entirely with this statement. He also mentions (§ 8) the addition to this inclosure by Herod of the space occupied by the tower of Antonia. The original inclosure of the Temple measured four stadia in circumference; but he tells us (§ 2) that the area, "including the tower of Antonia," measured six stadia.

When, now, in the latter passage quoted above *B. J.* i. 21, § 1), he tells us that Herod "inclosed double the original area," he clearly refers to this inclosure of the space of the tower of Antonia on the

In fact the Israelites never lost the feeling or the traditions of their early pastoral nomad life. Long after the nation had been settled in the country, the cry of those earlier days, "To your tents, O Israel!" was heard in periods of excitement<sup>b</sup>. The prophets, sick of the luxury of the cities, are constantly recalling<sup>c</sup> the "tents" of that simpler, less artificial life; and the Temple of Solomon, may even perhaps of Zerubbabel, was spoken of to the last as the "tent<sup>d</sup> of the Lord of hosts," the "place where David had pitched<sup>e</sup> his tent." It is a remarkable fact, that eminent as Jews have been in other departments of arts, science, and affairs, no Jewish architect, painter, or sculptor has ever achieved any signal success.

THE GEOLOGY. — Of the geological structure of Palestine it has been said with truth that our information is but imperfect and indistinct, and that much time must elapse, and many a cherished hypothesis be sacrificed, before a satisfactory explanation can be arrived at of its more remarkable phenomena.

It is not intended to attempt here more than a very cursory sketch, addressed to the general and non-scientific reader. The geologist must be referred to the original works from which these remarks have been compiled.

1. The main sources of our knowledge are (1) the observations contained in the Travels of Russegger, an Austrian geologist and mining engineer who visited this amongst other countries of the East in 1836-38 (*Reisen in Griechenland*, etc., 4 vols., Stuttgart, 1841-49, with *Atlas*); (2) the Report of H. J. Anderson, M. D., an American geologist, formerly Professor in Columbia College, New York, who accompanied Captain Lynch in his exploration of the Jordan and the Dead Sea (*Geol. Reconnaissance*, in Lynch's *Official Report*, 4to, 1852, pp. 75-207); and (3) the Diary of Mr. H. Poole, who visited Palestine on a mission for the British government in 1836 (*Journal of Geogr. Society*, vol. xxvi. pp. 55-70). Neither of these contains anything approaching a complete investigation, either as to extent or to detail of observations. Russegger travelled from Sinai to Hebron and Jerusalem. He explored carefully the route between the latter place and the Dead Sea. He then

north. He cannot refer to any dislocation of the "immovable" walls which Solomon had built above the valleys on the northeast and southwest, or to any enlargement by Herod of the area in those directions. "No mention is made of his having had anything to do with the massive walls of the exterior inclosure" (Robinson, *Bibl. Res.* i. 418). The portions of the walls referred to in the article above are almost indisputably Jewish. In a previous article, "the masonry in the western wall near its southern extremity," is claimed by Mr. Fergusson as in the judgment of "almost all topographers, a proof that the wall there formed part of the substructures of the Temple" (vol. ii. p. 1314, Amer. ed.).

The recent excavations of Lieut. Warren appear to have fully convinced Mr. Grove that these substructions are "earlier than the times of the Romans," and clearly Jewish.

See the well-known passage in *Coningsby*, bk. iv. ch. 15.

proceeded to Jaffa by the ordinary road; and from thence to Beyrût and the Lebanon by Nazareth, Tiberias, Cana, Akka, Tyre, and Sidon. Thus he left the Dead Sea in its most interesting portions, the Jordan Valley, the central highlands, and the important district of the upper Jordan, untouched. His work is accompanied by two sections: from the Mount of Olives to the Jordan, and from Tabor to the Lake of Tiberias. His observations, though clearly and attractively given, and evidently those of a practiced observer, are too short and cursory for the subject. The general notice of his journey is in vol. iii. pp. 76-157; the scientific observations, tables, etc., are contained between pp. 161 and 291. Dr. Anderson visited the southwestern portion of the Lebanon between Beyrût and Banias, Galilee, the Lake of Tiberias, the Jordan; made the circuit of the Dead Sea; and explored the district between that lake and Jerusalem. His account is evidently drawn up with great pains, and is far more elaborate than that of Russegger. He gives full analyses of the different rocks which he examined, and very good lithographs of fossils; but unfortunately his work is deformed by a very unreadable style. Mr. Poole's journey was confined to the western and southeastern portions of the Dead Sea, the Jordan, the country between the latter and Jerusalem, and the beaten track of the central highlands from Hebron to *Nablus*.

2. From the reports of these observers it appears that the Holy Land is a much-disturbed mountainous tract of limestone of the secondary period (Jurassic and cretaceous); the southern offshoot of the chain of Lebanon; elevated considerably above the sea level; with partial interruptions from tertiary and basaltic deposits. It is part of a vast mass of limestone, stretching in every direction except west, far beyond the limits of the Holy Land. The whole of Syria is cleft from north to south by a straight crevasse of moderate width, but extending in the southern portion of its centre division to a truly remarkable depth (2,625 ft.) below the sea level. This crevasse, which contains the principal watercourse of the country, is also the most exceptional feature of its geology. Such fissures are not uncommon in limestone formations; but no other is known of such a length and of so extraordinary a depth, and so open throughout its greatest extent. It may have been volcanic in its origin; the result of an upheaval from beneath, which has tilted the limestone back on each side, leaving this huge split in the strata; the volcanic force having stopped short at that point in the operation, without intruding any volcanic rocks into the fissure. This idea is supported by the crater-like form of the basins of the Lake of Tiberias and of the Dead Sea (Russ. pp. 206, 207), and by many other tokens of volcanic action, past and present, which are encountered in and around those lakes, and along the whole extent of the valley. Or it may have been excavated by the gradual action of the ocean during the immense periods of geological operation. The latter appears to be the opinion of Dr. Anderson (pp. 79, 140, 205); but further examination is necessary before a positive opinion can be pronounced. The ranges of the

hills of the surface take the direction nearly due north and south, though frequently thrown from their main bearing and much broken up into detached masses. The lesser watercourses run chiefly east and west of the central highlands.

3. The limestone consists of two strata, or rather groups of strata. The upper one, which usually meets the eye, over the whole country from Hebron to Hermon, is a tolerably solid stone, varying in color from white to reddish brown, with very few fossils, inclining to crystalline structure, and abounding in caverns. Its general surface has been formed into gently rounded hills, crowded more or less thickly together, separated by narrow valleys of denudation occasionally spreading into small plains. The strata are not well defined, and although sometimes level<sup>b</sup> (in which case they lend themselves to the formation of terraces), are more often violently disarranged.<sup>c</sup> Remarkable instances of such contortions are to be found on the road from Jerusalem to Jericho, where the beds are seen pressed and twisted into every variety of form.

It is hardly necessary to say that these contortions, as well as the general form of the surface, are due to forces not now in action, but are part of the general configuration of the country, as it was left after the last of that succession of immersions below, and upheavals from, the ocean, by which its present form was given it, long prior to the historic period. There is no ground for believing that the broad geological features of this or any part of the country are appreciably altered from what they were at the earliest times of the Bible history. The evidences of later action are, however, often visible, as for instance where the atmosphere and the rains have furrowed the face of the limestone cliffs with long and deep vertical channels, often causing the most fantastic forms (And. p. 89, 111; Poole, p. 56).

4. This limestone is often found crowned with chalk, rich in flints, the remains of a deposit which probably once covered a great portion of the country, but has only partially survived subsequent immersions. In many districts the coarse flint or chert which originally belonged to the chalk is found in great profusion. It is called in the country chalcodony (Poole, p. 57).

On the heights which border the western side of the Dead Sea, this chalk is found in greater abundance and more undisturbed, and contains numerous springs of salt and sulphurous water.

5. Near Jerusalem the mass of the ordinary limestone is often mingled with large bodies of dolomite (magnesian limestone), a hardish semi-crystalline rock, reddish white or brown, with glistening surface and pearly lustre, often containing pores and small cellular cavities lined with oxide of iron or minute crystals of bitter spar. It is not stratified; but it is a question whether it has not been produced among the ordinary limestone by some subsequent chemical agency. Most of the caverns near Jerusalem occur in this rock, though in other parts of the country they are found in the more friable chalky limestone.<sup>d</sup> So much for the upper stratum.

<sup>a</sup> The surface of the Dead Sea is 1,317 feet below the Mediterranean, and its depth 1,303 feet.

<sup>b</sup> The table of altitudes (vol. ii. p. 127; Amer. ed.) makes the figures somewhat different.

H.

<sup>b</sup> As at the twin hills of *el-Jib*, the ancient Gibeon below *Néby Samwil*.

<sup>c</sup> As on the road between the upper and lower *Beit-ur* about five miles from *el-Jib*.

<sup>d</sup> See the description of the caverns of *Beit Jibrin*.

6. The lower stratum is in two divisions or series of beds — the upper, dusky in color, contorted and cavernous like that just described, but more ferruginous — the lower one dark gray, compact and solid, and characterized by abundant fossils of *cidaris*, an extinct echinus, the spines of which are the well-known "olives" of the contents. This last-named rock appears to form the substratum of the whole country, east as well as west of the Jordan.

The ravine by which the traveller descends from the summit of the Mount of Olives (2,700 feet above the Mediterranean) to Jericho (900 below it) cuts through the strata already mentioned, and affords an unrivalled opportunity for examining them. The lower formation differs entirely in character from the upper. Instead of smooth, commonplace, swelling outlines, everything here is rugged, pointed, and abrupt. Huge fissures, the work of the earthquakes of ages, cleave the rock in all directions — they are to be found as much as 1,000 feet deep by not more than 30 or 40 feet wide, and with almost vertical sides. One of them, near the ruined khan at which travellers usually halt, presents a most interesting and characteristic section of the strata (Russegger, pp. 247–251, &c.).

7. After the limestone had received the general form which its surface still retains, but at a time anterior to any historic period, it was pierced and broken by large eruptions of lava pushed up from beneath, which has broken up and overflowed the stratified beds, and now appears in the form of basalt or trap.

8. On the west of Jordan these volcanic rocks have been hitherto found only north of the mountains of Samaria. They are first encountered on the southwestern side of the Plain of Esdraelon (Russ. p. 258): then they are lost sight of till the opposite side of the plain is reached, being probably hidden below the deep rich soil, except a few pebbles here and there on the surface. Beyond this they abound over a district which may be said to be contained between *Delâta* on the north, Tiberias on the east, Tabor on the south, and Turan on the west. There seem to have been two centres of eruption: one, and that the most ancient (And. pp. 129, 134), at or about the *Kurn Hattin* (the traditional Mount of Beatitudes), whence the stream flowed over the declivities of the limestone towards the lake (Russ. pp. 259, 260). This mass of basalt forms the cliffs at the back of Tiberias, and to its disintegration is due the black soil, so extremely productive, of the *Ard el-Hamma* and the Plain of Genesaret, which lie, the one on the south, the other on the north, of the ridge of *Hattin*. The other — the more recent — was more to the north, in the neighborhood of Safed, where three of the ancient craters still exist, converted into the reservoirs or lakes of *el-Jish*, *Taitebn*, and *Delâta* (And. pp. 128, 129; Calman, in Kitto's *Phys. Geog.* p. 119).

The basalt of Tiberias is fully described by Dr. Anderson. It is dark iron-gray in tint, cellular, but firm in texture, amygdaloidal, the cells filled with carbonate of lime, olivine and augite, with a

specific gravity of 2.6 to 2.9. It is often columnar in its more developed portions, as, for instance, on the cliffs behind the town. Here the junctions of the two formations may be seen; the base of the cliffs being limestone, while the crown and brow are massive basalt (pp. 124, 135, 136).

The lava of *Delâta* and the northern centre differs considerably from that of Tiberias, and is pronounced by Dr. Anderson to be of later date. It is found of various colors, from black-brown to reddish-gray, very porous in texture, and contains much pumice and scorie; polygonal columns are seen at *el-Jish*, where the neighboring cretaceous beds are contorted in an unusual manner (And. pp. 128, 129, 130).

A third variety is found at a spur of the hills of Galilee, projecting into the *Ard el-Hûleh* below Kedes, and referred to by Dr. Anderson as *Tell el-Hayeh*; but of this rock he gives no description, and declines to assign it any chronological position (p. 134).

9. The volcanic action which in pre-historic times projected this basalt, has left its later traces in the ancient records of the country, and is even still active in the form of earthquakes. Not to speak of passages<sup>b</sup> in the poetical books of the Bible, which can hardly have been suggested except by such awful catastrophes, there is at least one distinct allusion to them, namely, that of Zechariah (xiv. 5) to an earthquake in the reign of Uzziah, which is corroborated by Josephus, who adds that it injured the Temple, and brought down a large mass of rock from the Mount of Olives (*Ant.* ix. 10, § 4).

"Syria and Palestine," says Sir Charles Lyell (*Principles*, 8th ed. p. 340), "abound in volcanic appearances; and very extensive areas have been shaken at different periods, with great destruction of cities and loss of lives. Continued mention is made in history of the ravages committed by earthquakes in Sidon, Tyre, Beyrût, Laodicea, and Antioch." The same author (p. 342) mentions the remarkable fact that "from the 13th to the 17th centuries there was an almost entire cessation of earthquakes in Syria and Judæa; and that, during the interval of quiescence, the Archipelago, together with part of Asia Minor, Southern Italy, and Sicily, suffered greatly from earthquakes and volcanic eruptions." Since they have again begun to be active in Syria, the most remarkable earthquakes have been those which destroyed Aleppo in 1616 and 1822 (for this see Wolff, *Travels*, ch. 9), Antioch in 1737, and Tiberias and Safed in 1837<sup>c</sup> (Thomson, ch. 19). A list of those which are known to have affected the Holy Land is given by Dr. Pusey in his *Commentary* on Amos iv. 11. See also the Index to Kitter, vol. viii. p. 1953.

The rocks between Jerusalem and Jericho show many an evidence of these convulsions, as we have already remarked. Two earthquakes only are recorded as having affected Jerusalem itself — that in the reign of Uzziah already mentioned, and that at the time of the crucifixion, when "the rocks were rent and the rocky tombs torn open" (*Matt.* xxvii. 51). Slight<sup>d</sup> shocks are still occasionally felt there

and *Deir Dubban* in Rob. ii. 23, 51–53; and van de Velde, ii. 155.

<sup>a</sup> Similar rents were cleft in the rock of *el-Jisa* by the earthquake of 1837 (Calman, in Kitto, *Ph. Geog.* p. 158).

<sup>b</sup> Is. xxiv. 17–20; Amos ix. 6, &c., &c.

<sup>c</sup> Four-fifths of the population of Safed, and one-fourth of that of Tiberias, were killed on this occasion.

<sup>d</sup> Even the tremendous earthquake of May 20, 1202, only did Jerusalem a very slight damage (Abdul-latif in Kitto, *Phys. Geogr.* p. 148).

(e. g. Poole, p. 56), but the general exemption of that city from any injury by earthquakes, except in these two cases, is really remarkable. The ancient Jewish writers were aware of it, and appealed to the fact as a proof of the favor of Jehovah to his chosen city (1's. xlv. 1, 2).

10. But in addition to earthquakes, the hot salt and fetid springs which are found at Tiberias, Callirhoë, and other spots along the valley of the Jordan, and round the basins of its lakes,<sup>a</sup> and the rock-salt, nitre, and sulphur of the Dead Sea are all evidences of volcanic or plutonic action. Von Buch, in his letter to Robinson (*Bibl. Res.* i. 525), goes so far as to cite the bitumen of the Dead Sea as a further token of it. The hot springs of Tiberias were observed to flow more copiously, and to increase in temperature, at the time of the earthquake of 1837 (Thomson, ch. 19, 26).

11. In the Jordan Valley the basalt is frequently encountered. Here, as before, it is deposited on the limestone, which forms the substratum of the whole country. It is visible from time to time on the banks and in the bed of the river; but so covered with deposits of tufa, conglomerate, and alluvium, as not to be traceable without difficulty (And. pp. 136-152). On the western side of the lower Jordan and Dead Sea no volcanic formations have been found (And. pp. 81, 133; Russ. pp. 205, 251); nor do they appear on its eastern shore till the *Wady Zerka Main* is approached, and then only in erratic fragments (And. p. 191). At *Wady Hemarah*, north of the last-mentioned stream, the igneous rocks first make their appearance *in situ* near the level of the water (p. 194).

12. It is on the east of the Jordan that the most extensive and remarkable developments of igneous rocks are found. Over a large portion of the surface from Damascus to the latitude of the south of the Dead Sea, and even beyond that, they occur in the greatest abundance all over the surface. The limestone, however, still underlies the whole. These extraordinary formations render this region geologically the most remarkable part of all Syria. In some districts, such as the *Lejah* (the ancient Argob or Trachonitis), the *Sufâ* and the *Harrâh*, it presents appearances and characteristics which are perhaps unique on the earth's surface. These regions are yet but very imperfectly known, but travellers are beginning to visit them, and we shall possibly be in possession ere long of the results of further investigation. A portion of them has been recently described in great detail<sup>b</sup> by Mr. Wetzstein, Prussian consul at Damascus. They lie, however, beyond the boundary of the Holy Land

<sup>a</sup> It may be convenient to give a list of the hot or brackish springs of Palestine, as far as they can be collected. It will be observed that they are all in or about the Jordan Valley. Beginning at the north:—*Ain Eyûb*, and *Ain Tabighah*, N. E. of Lake of Tiberias: slightly warm, too brackish to be drinkable. (Rob. ii. 405.)

*Ain el-Bârdeh*, on shore of lake, S. of *Mrjdel*: 80° Fahr., slightly brackish. (Rob. ii. 396.)

Tiberias: 144° Fahr.; salt, bitter, sulphureous.

*Amateh*, in the *Wady Mandhur*: very hot, slightly sulphureous. (Burckhardt, May 6.)

*Wady Malih* (Salt Valley), in the Ghôr near *Sakât*: 99° Fahr.; very salt, fetid. (Rob. iii. 308.)

Below *Ain-Feshkah*: fetid and brackish. (Lynch, Apr. 18.)

One day N. of *Ain-Jidy*: 80° Fahr.; salt. (Poole, p. 67.)

proper, and the reader must therefore be referred for these discoveries to the head of TRACHONITIS.

13. The tertiary and alluvial beds remain to be noticed. These are chiefly remarkable in the neighborhood of the Jordan, as forming the floor of the valley, and as existing along the course, and accumulated at the mouths, of the torrents which deliver their tributary streams into the river, and into the still deeper cauldron of the Dead Sea. They appear to be all of later date than the igneous rocks described, though even this cannot be considered as certain.

14. The floor of the Jordan Valley is described by Dr. Anderson (p. 140) as exhibiting throughout more or less distinctly the traces of two independent terraces. The upper one is much the broader of the two. It extends back to the face of the limestone mountains which form the walls of the valley on east and west. He regards this as older than the river, though of course formed after the removal of the material from between the walls. Its upper and accessible portions consist of a mass of detritus brought down by the ravines of the walls, always chalky, sometimes "an actual chalk;" usually bare of vegetation (And. p. 143), though not uniformly so (Rob. iii. 315).

Below this, varying in depth from 50 to 150 feet, is the second terrace, which reaches to the channel of the Jordan, and, in Dr. Anderson's opinion, has been excavated by the river itself before it had shrunk to its present limits, when it filled the whole space between the eastern and western faces of the upper terrace. The inner side of both upper and lower terraces is furrowed out into conical knolls, by the torrents of the rains descending to the lower level. These cones often attain the magnitude of hills, and are ranged along the edge of the terraces with curious regularity. They display convenient sections, which show sometimes a tertiary limestone or marl, sometimes quaternary deposits of sands, gravels, variegated clays, or unstratified detritus. The lower terrace bears a good deal of vegetation, oleander, agnus castus, etc. The alluvial deposits have in some places been swept entirely away, for Dr. Anderson speaks of crossing the upturned edges of nearly vertical strata of limestone, with neighboring beds contorted in a very violent manner (p. 148). This was a few miles N. of Jericho.

All along the channel of the river are found mounds and low cliffs of conglomerates, and breccias of various ages, and more various composition. Rolled boulders and pebbles of flinty sandstone or chert, which have descended from the upper hills

Between *Wady Mahras* and *W. Khushêitsh*, S. of *Ain Jidy*: brackish. (Anderson, p. 177.)

*Wady Muhariyat*, 45<sup>1</sup>/<sub>2</sub> E. of *Usdim*: salt, containing small fish. (Ritter, *Jordan*, p. 736; Poole, p. 61.)

*Wady el-Ahsy*, S. E. end of Dead Sea: hot. (Burekhardt, Aug. 7.)

*Wady Beni-Hamed*, near Rabba, E. side of Dead Sea. (Ritter, *Syrien*, p. 1223.)

*Wady Zerka Main* (Callirhoë), E. side of Dead Sea: very hot, very slightly sulphureous. (Soetzen, Jan 18; Irby, June 8.) [See, respecting these springs Robinson's *Phys. Geogr. of Palestine*, pp. 250-264—H.]

<sup>b</sup> *Reisebericht über Hawran und die Trachonen, 1866* with map and woodcuts.

<sup>c</sup> Compare Robinson's diary of his journey across the Jordan near *Sakât* (iii. 318).

are found in the cross ravines; and tufas, both calcareous and siliceous, abound on the terraces (And. p. 147).

15. Round the margin of the Dead Sea the tertiary beds assume larger and more important proportions than by the course of the river. The marls, gypsites, and conglomerates continue along the base of the western cliff as far as the *Wady Sebbeh*, where they attain their greatest development. South of this they form a sterile waste of brilliant white marl and bitter salt flakes, ploughed by the rain-torrents from the heights into pinnacles and obelisks (p. 180).

At the southeastern corner of the sea, sandstones begin to display themselves in great profusion, and extend northward beyond *Wady Zurki Ma'in* (p. 189). Their full development takes place at the mouth of the *Wady Mojeb*, where the beds are from 100 to 400 feet in height. They are deposited on the limestone, and have been themselves gradually worn through by the waters of the ravine. There are many varieties, differing in color, composition, and date. Dr. A. enumerates several of these (pp. 190, 196), and states instances of the red sandstone having been filled up, after excavation, by non-conforming beds of yellow sandstone of a much later date, which in its turn has been hollowed out, the hollows being now occupied by detritus of a stream long since extinct.

Russegger mentions having found a tertiary breccia overlying the chalk on the south of Carmel, composed of fragments of chalk and flint, cemented by lime (p. 257).

16. The rich alluvial soil of the wide plains which form the maritime portion of the Holy Land, and also that of Esdraelon, Gennesaret, and other similar plains, will complete our sketch of the geology. The former of these districts is a region of from eight to twelve miles in width, intervening between the central highlands and the sea. It is formed of washings from those highlands, brought down by the heavy rains which fall in the winter months, and which, though they rarely remain as permanent streams, yet last long enough to spread this fertilizing manure over the face of the country. The soil is a light loamy sand, red in some places, and deep black in others. The substratum is rarely seen, but it appears to be the same limestone which composes the central mountains. The actual coast is formed of a very recent sandstone full of marine shells, often those of existing species (Russ. pp. 256, 257), which is disintegrated by the waves and thrown on the shore as sand,<sup>a</sup> where it forms a tract of considerable width and height. This sand in many places stops the outflow of the streams, and sends them back on to the plain, where they overflow and form marshes, which with proper treatment might afford most important assistance to the fertility of this already fertile district.

17. The Plain of Gennesaret is under similar conditions, except that its outer edge is bounded by the lake instead of the ocean. Its superiority in fertility to the maritime land is probably due to the abundance of running water which it contains all the year round, and to the rich soil produced from the decay of the volcanic rocks on the steep heights which immediately inclose it.

18. The Plain of Esdraelon lies between two ranges of highland, with a third (the hills separating it from the Plain of Akka) at its north-west end. It is watered by some of the finest springs of Palestine, the streams from which traverse it both east and west of the central watershed, and contain water or mud, moisture and marsh, even during the hottest months of the year. The soil of this plain is also volcanic, though not so purely so as that of Gennesaret.

19. Bitumen or asphaltum, called by the Arabs *el hummar* (the "slime" of Gen. xi. 3), is only met with in the Valley of Jordan. At *Hasbeiyat*, the most remote of the sources of the river, it is obtained from pits or wells which are sunk through a mass of bituminous earth to a depth of about 180 feet (And. pp. 115, 116). It is also found in small fragments on the shore of the Dead Sea, and occasionally, though rarely, very large masses of it are discovered floating in the water (Rob. i. 518). This appears to have been more frequently the case in ancient times (Joseph. B. J. iv. 8, § 4; Diod. Sic. ii. 48). [SLIME.] The Arabs report that it proceeds from a source in one of the precipices on the eastern shore of the Dead Sea (Rob. i. 517) opposite *Ain-Jidy* (Russ p. 253); but this is not corroborated by the observations of Lynch's party, of Mr. Poole, or of Dr. Robinson, who examined the eastern shore from the western side with special reference thereto. It is more probable that the bituminous limestone in the neighborhood of *Nely Musa* exists in strata of great thickness, and that the bitumen escapes from its lower beds into the Dead Sea, and there accumulates until by some accident it is detached, and rises to the surface.

20 Sulphur is found on the W. and S. and S. E. portions of the shore of the Dead Sea (Rob. i. 512). In many spots the air smells strongly of sulphurous acid and sulphuretted hydrogen gas (And. p. 176; Poole, p. 66; Beaufort, ii. 113), a sulphurous crust is spread over the surface of the beach, and lumps of sulphur are found in the sea (Rob. i. 512). Poole (p. 63) speaks of "sulphur hills" on the peninsula at the S. E. end of the sea (see And. p. 187).

Nitre is rare. Mr. Poole did not discover any, though he made special search for it. Irby and Mangles, Seetzen and Robinson, however, mention having seen it (Rob. i. 513).

Rock-salt abounds in large masses. The salt mound of *Kashm Usdum* at the southern end of the Dead Sea is an enormous pile, 5 miles long by 2½ broad, and some hundred feet in height (And. p. 181). Its inferior portion consists entirely of rock-salt, and the upper part of sulphate of lime and salt, often with a large admixture of alumina.

G.

THE BOTANY. — The Botany of Syria and Palestine differs but little from that of Asia Minor, which is one of the most rich and varied on the globe. What differences it presents are due to a slight admixture of Persian forms on the eastern frontier, of Arabian and Egyptian on the southern, and of Arabian and Indian tropical plants in the low torrid depression of the Jordan and Dead Sea. These latter, which number perhaps a hundred different kinds, are anomalous features in the other-

<sup>a</sup> The statement in the text is from Thomson (*Land and Book*, ch. 33). But the writer has learned that in the opinion of Capt. Mansell, R. N. (than whom no one has had more opportunity of judging), the sand of the

whole coast of Syria has been brought up from Egypt by the S. S. W. wind. This is also stated by Josephus (*Ant.* xv. 9, § 2).

wise Levantine landscape of Syria. On the other hand, the Palestine forms the southern and eastern limit of the Asia-Minor flora, and contains a multitude of trees, shrubs, and herbs that advance no further south and east. Of these the pine, oak, elder, bramble, dog-rose, and hawthorn are conspicuous examples; their southern migration being checked by the drought and heat of the regions beyond the hilly country of Judæa. Owing, however, to the geographical position and the mountainous character of Asia Minor and Syria, the main features of their flora are essentially Mediterranean-European, and not Asiatic. A vast proportion of the commoner arboreous and frutescent plants are identical with those of Spain, Algeria, Italy, and Greece; and as they belong to the same genera as do British, Germanic, and Scandinavian plants, there are ample means of instituting such a comparison between the Syrian flora and that familiar to us as any intelligent non-botanical observer can follow and understand.

As elsewhere throughout the Mediterranean regions, Syria and Palestine were evidently once thickly covered with forests, which on the lower hills and plains have been either entirely removed, or else reduced to the condition of brushwood and copse; but which still abound on the mountains, and along certain parts of the sea-coast. The low grounds, plains, and rocky hills are carpeted with herbaceous plants, that appear in rapid succession from before Christmas till June, when they disappear; and the brown alluvial or white calcareous soil, being then exposed to the scorching rays of the sun, gives an aspect of forbidding sterility to the most productive regions. Lastly, the lofty regions of the mountains are stony, dry, swardless, and swamplish, with few alpine or arctic plants, mosses, lichens, or ferns; thus presenting a most unfavorable contrast to the Swiss, Scandinavian, and British mountain floras at analogous elevations.

To a traveller from England, it is difficult to say whether the familiar or the foreign forms predominate. Of trees he recognizes the oak, pine, walnut, maple, juniper, alder, poplar, willow, ash, dwarf elder, plane, ivy, arbutus, rhamnus, almond, plum, pear, and hawthorn, all elements of his own forest scenery and plantations; but misses the beech, chestnut, lime, holly, birch, larch, and spruce; while he sees for the first time such southern forms as Pride of India (*Melia*), carob, sycamore, fig, jujube, pistachio, styrax, olive, phyllirea, vitex, eleagnus, celtis, many new kinds of oak, the papyrus, castor oil, and various tall tropical grasses.

Of cultivated English fruits he sees the vine, apple, pear, apricot, quince, plum, mulberry, and fig; but misses the gooseberry, raspberry, strawberry, currant, cherry, and other northern kinds, which are as it were replaced by such southern and sub-tropical fruits as the date, pomegranate, cordia myxa (*sebanus* of the Arabs), orange, shaddock, lime, banana, almond, prickly pear, and pistachio-nut.

Amongst cereals and vegetables the English traveller finds wheat, barley, peas, potatoes, many varieties of cabbage, carrots, lettuces, endive, and mustard; and misses oats, rye, and the extensive fields of turnip, beet, mangold-wurzel, and fodder grasses, with which he is familiar in England. On the other hand, he sees for the first time the cotton, millet, rice, sorghum, sesamum, sugar-cane, maize, egg-apple, okra, or *Abelmoschus esculentus*, Cor-

*chorus olitorius*, various beans and lentils, as *Labbu vulgaris*, *Phaseolus mungos*, and *Vicia arietinum*; melons, gourds, pumpkins, cumin, coriander, fennel, anise, sweet potato, tobacco, yam, colocasia, and other sub-tropical and tropical field and garden crops.

The flora of Syria, so far as it is known, may be roughly classed under three principal Botanical regions, corresponding with the physical characters of the country. These are (1.), the western or seaboard half of Syria and Palestine, including the lower valleys of the Lebanon and Anti-Lebanon, the plain of Cæle-Syria, Galilee, Samaria, and Judæa. (2.) The desert or eastern half, which includes the east flanks of the Anti-Lebanon, the plain of Damascus, the Jordan and Dead Sea Valley. (3.) The middle and upper mountain regions of Mount Casius, and of Lebanon above 3,400 feet, and of the Anti-Lebanon above 4,000 feet. Nothing whatever is known botanically of the regions to the eastward, namely, the Hauran, Lejah, Gilead, Ammon, and Moab; countries extending eastward into Mesopotamia, the flora of which is Persian, and south to Idul ea, where the purely Arabian flora begins.

These Botanical regions present no definite boundary line. A vast number of plants, and especially of herbs, are common to all, except the loftiest parts of Lebanon and the driest spots of the eastern district, and in no latitude is there a sharp line of denarcation between them. But though the change is gradual from the dry and semi-tropical eastern flora to the moister and cooler western, or from the latter to the cold temperate one of the Lebanon, there is a great and decided difference between the floras of three such localities as the Lebanon at 5,000 feet, Jerusalem, and Jericho; or between the tops of Lebanon, of Carmel, and of any of the hills bounding the Jordan; for in the first locality we are most strongly reminded of northern Europe, in the second of Spain, and in the third of Western India or Persia.

I. *Western Syria and Palestine.*—The flora throughout this district is made up of such a multitude of different families and genera of plants, that it is not easy to characterize it by the mention of a few. Amongst trees, oaks are by far the most prevalent, and are the only ones that form continuous woods, except the *Pinus maritima* and *P. Halpensis* (Aleppo Pine); the former of which extends in forests here and there along the shore, and the latter crests the spurs of the Lebanon, Carmel, and a few other ranges as far south as Hebron. The most prevalent oak is the *Quercus pseudo-coccifera*, a plant scarcely different from the common *Q. coccifera* of the western Mediterranean, and which it strongly resembles in form, habit, and evergreen foliage. It is called holly by many travellers, and *Quercus ilex* by others, both very different trees. *Q. pseudo-coccifera* is perhaps the commonest plant in all Syria and Palestine, covering as a low dense bush many square miles of hilly country everywhere, but rarely or never growing in the plains. It seldom becomes a large tree, except in the valleys of the Lebanon, or where, as in the case of the famous oak of Mamre, it is allowed to attain its full size. It ascends about 5,000 feet on the mountains, but does not descend into the middle and lower valley of the Jordan; nor is it seen on the east slopes of the Anti-Lebanon, and scarcely to the eastward of Jerusalem; it may indeed have

been removed by man from these regions, when the effect of its removal would be to dry the soil and climate, and prevent its reestablishment. Even around Jerusalem it is rare, though its roots are said to exist in abundance in the soil. The only other oaks that are common are the *Q. infectoria* (a gall oak), and *Q. aegilops*. The *Q. infectoria* is a small deciduous-leaved tree, found here and there in Galilee, Samaria, and on the Lebanon; it is very conspicuous from the numbers of bright chestnut-colored shining viscid galls which it bears, and which are sometimes exported to England, but which are a poor substitute for the true Aleppo galls. *Q. aegilops* again is the Valonia oak; a low, very stout-trunked sturdy tree, common in Galilee, and especially on Tabor and Carmel, where it grows in scattered groups, giving a park-like appearance to the landscape. It bears acorns of a very large size, whose cups, which are covered with long recurved spines, are exported to Europe as Valonia, and are used, like the galls of *Q. infectoria*, in the operation of dyeing. This, I am inclined to believe, is the oak of Bashan, both on account of its sturdy habit and thick trunk, and also because a fine piece of the wood of this tree was sent from Bashan to the Kew Museum by Mr. Cyril Graham. The other oaks of Syria are chiefly confined to the mountains, and will be noticed in their proper place.

The trees of the genus *Pistacia* rank next in abundance to the oak, — and of these there are three species in Syria, two wild and most abundant, but the third, *P. vera*, which yields the well-known pistachio-nut, very rare, and chiefly seen in cultivation about Aleppo, but also in Beyrût and near Jerusalem. The wild species are the *P. lentiscus* and *P. terebinthus*, both very common; the *P. lentiscus* rarely exceeds the size of a low bush, which is conspicuous for its dark evergreen leaves and numberless small red berries; the other grows larger, but seldom forms a fair-sized tree.

The Carob or Locust-tree, *Ceratonia siliqua*, ranks perhaps next in abundance to the foregoing trees. It never grows in clumps or forms woods, but appears as an isolated, rounded or oblong, very dense-foliaged tree, branching from near the base, of a bright lucid green hue, affording the best shade. Its singular flowers are produced from its thick branches in autumn, and are succeeded by the large pendulous pods, called St. John's Bread, and extensively exported from the Levant to England for feeding cattle. [HUSKS.]

The oriental Plane is far from uncommon, and though generally cultivated, it is to all appearance wild in the valleys of the Lebanon and Anti-Lebanon. The great plane of Damascus is a well-known object to travellers; the girth of its trunk was nearly 40 feet, but it is now a mere wreck.

The Sycamore-fig is common in the neighborhood of towns, and attains a large size; its wood is much used, especially in Egypt, where the mummy-cases were formerly made of it. Poplars, especially the aspen and white poplar, are extremely common by streams; the latter is generally trimmed for firewood, so as to resemble the Lombardy poplar. The Walnut is more common in Syria than in Palestine, and in both countries is generally confined to gardens and orchards. Of large native shrubs or small trees almost universally spread over this district are, *Arbutus Andrachne*, which is common in the hilly country from Hebron northward; *Craegus Aronia*, which grows equally in dry rocky

exposures, as on the Mount of Olives, and in cool mountain valleys; it yields a large yellow or red haw that is abundantly sold in the markets. Cypresses are common about villages, and especially near all religious establishments, often attaining a considerable size, but I am not aware of their being indigenous to Syria. *Zizyphus Spina-Christi*, Christ's Thorn — often called jujube — the *Nubk* of the Arabs, is most common on dry open plains, as that of Jericho, where it is either a scrambling briar, a standard shrub, or rarely even a middling-sized tree with pendulous branches: it is familiar to the traveller from its sharp hooks, white undersides to the three-nerved leaves, and globular yellow sweetish fruit with a large woody stone. The *Paliurus aculeatus*, also called Christ's Thorn, resembles it a good deal, but is much less common; it abounds in the Anti-Lebanon, where it is used for hedges, and may be recognized by its curved prickles and curious dry fruit, with a broad flat wing at the top. *Stryax officinalis*, which used to yield the famous storax, abounds in all parts of the country where hilly; sometimes, as on the east end of Carmel and on Tabor, becoming a very large bush branching from the ground, but never assuming the form of a tree; it may be known by its small downy leaves, white flowers like orange blossoms, and round yellow fruit, pendulous from slender stalks, like cherries. The flesh of the berry, which is quite uneatable, is of a semi-transparent hue, and contains one or more large, chestnut-colored seeds. *Tamarisk* is common, but seldom attains a large size, and has nothing to recommend it to notice. *Oleander* claims a separate notice, from its great beauty and abundance; lining the banks of the streams and lakes in gravelly places, and bearing a profusion of blossoms. Other still smaller but familiar shrubs are *Phyllirea*, *Rhamnus alaternus*, and others of that genus. *Rhus coriaria*, several leguminous shrubs, as *Anagyris foetida*, *Calycotome* and *Genista*; *Cotoneaster*, the common bramble, dog-rose, and hawthorn, *Elaeagnus*, wild olive, *Lycium Europaeum*, *Vitex agnus-castus*, sweet-bay (*Laurus nobilis*), *Ephedra*, *Clematis*, *Gun-Cistus*, and the caper-plant: these nearly complete the list of the commoner shrubs and trees of the western district, which attain a height of four feet or more, and are almost universally met with, especially in the hilly country.

Of planted trees and large shrubs, the first in importance is the Vine, which is most abundantly cultivated all over the country, and produces, as in the time of the Canaanites, enormous bunches of grapes. This is especially the case in the southern districts; those of Eschol being still particularly famous. Stephen Schultz states that at a village near Ptolemais (Acre) he supped under a large vine, the stem of which measured a foot and a half in diameter, its height being 30 feet; and that the whole plant, supported on a trellis, covered an area 50 feet either way. The bunches of grapes weighed 10–12 lbs., and the berries were like small plums. Mariti relates that no vines can vie for produce with those of Judæa, of which a bunch cannot be carried far without destroying the fruit; and we have ourselves heard that the bunches produced near Hebron are sometimes so long that, when attached to a stick which is supported on the shoulders of two men, the tip of the bunch trails on the ground.

Next to the vine, or even in some respects it superior in importance, ranks the Olive, which no

where grows in greater luxuriance and abundance than in Palestine, where the olive orchards form a prominent feature throughout the landscape, and have done so from time immemorial. The olive-tree is in no respects a handsome or picturesque object; its bark is gray and rugged; its foliage is in color an ashy, or at best a dusky green, and affords little shade; its wood is useless as timber, its flowers are inconspicuous, and its fruit uninviting to the eye or palate; so that, even where most abundant and productive, the olive scarcely relieves the aspect of the dry soil, and deceives the superficial observer as to the fertility of Palestine. Indeed it is mainly owing to these peculiarities of the olive-tree, and to the deciduous character of the foliage of the fig and vine, that the impression is so prevalent amongst northern travellers, that the Holy Land is in point of productiveness not what it was in former times; for to the native of northern Europe especially, the idea of fertility is inseparable from that of verdure. The article OLIVE must be referred to for details of this tree, which is perhaps most skillfully and carefully cultivated in the neighborhood of Hebron, where for many miles the roads run between stone walls inclosing magnificent olive orchards, apparently tended with as much neatness, care, and skill as the best fruit gardens in England. The terraced olive-yards around Sebastieh must also strike the most casual observer, as admirable specimens of careful cultivation.

The Fig forms another most important crop in Syria and Palestine, and one which is apparently greatly increasing in extent. As with the olive and mulberry, the fig-trees, where best cultivated, are symmetrically planted in fields, whose soil is freed from stones, and kept as scrupulously clean of weeds as it can be in a semi-tropical climate. As is well known, the fig bears two or three crops in the year: Josephus says that it bears for ten months out of the twelve. The early figs, which ripen about June, are reckoned especially good. The summer figs again ripen in August, and a third crop appears still later when the leaves are shed; these are occasionally gathered as late as January. The figs are dried by the natives, and are chiefly purchased by the Arabs of the eastern deserts. The sycamore-fig, previously noticed, has much smaller and very inferior fruit.

The quince, apple,<sup>a</sup> almond, walnut, peach, and apricot, are all most abundant field or orchard crops, often planted in lines, rows, or quineux order, with the olive, mulberry, or fig; but they are by no means so abundant as these latter. The pomegranate grows everywhere as a bush; but, like the orange, *Elaeagnus*, and other less common plants, is more often seen in gardens than in fields. The fruit ripens in August, and is kept throughout the winter. Three kinds are cultivated—the acid, sweet, and insipid—and all are used in preparing sherbets: while the bark and fruit rind of all are used for dyeing and as medicine, owing to their astringent properties.

The Banana is only found near the Mediterranean; it ripens its fruit as far north as Beyrüt, and occasionally even at Tripoli, but more constantly at Sidon and Jaffa; only one kind is commonly cultivated, but it is excellent. Dates are not frequent: they are most common at Caiffa and

Jaffa, where the fruit ripens, but there are now no groves of this tree anywhere but in Southern Palestine, such as once existed in the valley of the Jordan, near the assumed site of Jericho. Of that well-known grove no tree is standing; one log of date-palm, now lying in a stream near the locality, is perhaps the last remains of that ancient race, though that they were once abundant in the immediate neighborhood of the Dead Sea is obvious from the remark of Mr. Poole, that some part of the shore of that sea is strewn with their trunks. [See p. 2299, note *b*.] Wild dwarf dates, rarely producing fruit, grow by the shores of the Lake of Tiberias and near Caiffa; but whether they are truly indigenous date-palms, or crab-dates produced from seedlings of the cultivated form, is not known.

The *Opuntia*, or Prickly Pear, is most abundant throughout Syria, and though a native of the New World, has here, as elsewhere throughout the dry, hot regions of the eastern hemisphere, established its claim to be regarded as a permanent and rapidly increasing denizen. It is in general use for hedging, and its well-known fruit is extensively eaten by all classes. I am not aware that the cochineal insect has ever been introduced into Syria, where there can, however, be little doubt but that it might be successfully cultivated.

Of dye-stuffs the *Carthamus* (Safflower) and Indigo are both cultivated; and of textiles, Flax, Hemp, and Cotton.

The Carob, or St. John's Bread (*Ceratonia siliqua*), has already been mentioned amongst the conspicuous trees: the sweetish pulp of the pods is used for sherbets, and abundantly eaten; the pods are used for cattle-feeding, and the leaves and bark for tanning.

The Cistus or Rock-rose, two or three species of which are abundant throughout the hilly districts of Palestine, is the shrub from which in former times gum-labdanum was collected in the islands of Candia and Cyprus.

With regard to the rich and varied herbaceous vegetation of West Syria and Palestine, it is difficult to afford any idea of its nature to the English non-botanical reader, except by comparing it with the British; which I shall first do, and then detail its most prominent botanical features.

The plants contained in this botanical region probably number not less than 2,000 or 2,500, of which perhaps 500 are British wild flowers; amongst the most conspicuous of these British ones are the *Ranunculus aquatilis*, *arenensis*, and *Ficaria*; the yellow water-lily, *Papaver Rhoeas* and *hybridum*, and several Fumitories: fully 20 cruciferous plants, including *Draba verna*, water-cress, *Tarritis glabra*, *Sisymbrium irio*, *Capsella bursa-pastoris*, *Cakile maritima*, *Lepidium draba*, charlock, mustard (often growing 8 to 9 feet high), two nig-nonnettes (*Reseda alba* and *lutea*), *Silene inflata*, various species of *Cerastium*, *Spergula*, *Stellaria*, and *Arenaria*, mallows, *Geranium molle*, *rotundifolium*, *lucicutum*, *dissectum*, and *Robertianum*, *Erodium moschatum*, and *cicutarium*. Also many species of *Leguminosae*, especially of *Medicago*, *Trifolium*, *Melilotus*, *Lotus*, *Ononis*, *Ervum*, *Vicia*, and *Lathyrus*. Of *Rosaceae* the common bramble and dog-rose. *Lythrum Salicaria*, *Epilobium hirsutum*, *Bryonia dioica*, *Saxifraga tridactylites*, *Galum verum*, *Rubia peregrina*, *Asperula arvensis*. Various *Umbelliferae* and *Compositae*, including the daisy, wormwood, groundsel, dandelion.

<sup>a</sup> \* See APPLE (Amer. ed.), which according to the best testimony is not abundant. H.

thick, sowthistle, and many others. Blue and white pimpernel, *Cyclamen Europæum*, *Sonchus Valerianii*, *Erica vagans*, borage, *Veronica angustifolia*, *Beccabunga*, *agrestis*, *triphyllos*, and *Chamaedrys*, *Lathræa squarrosa*, vervain, *Lamium amplexicaule*, mint, horehound, *Prunella*, *Statice linumium*, many *Chenopodiaceæ*, *Polygonum*, and *Rumex*, Pellitory, *Mercurialis*, *Euphorbia*, nettles, box, elm, several willows and poplars, common duck-weed and pond weed, *Orchis morio*, *Crocus aureus*, butcher's-broom, black bryony, autumnal squill, and many rushes, sedges, and grasses.

The most abundant natural families of plants in West Syria and Palestine are: (1) *Leguminosæ*, (2) *Compositæ*, (3) *Labiatæ*, (4) *Cruciferae*; after which come (5) *Umbelliferae*, (6) *Caryophyllæ*, (7) *Boraginæ*, (8) *Scrophularinæ*, (9) *Graminæ*, and (10) *Liliacæ*.

(1.) *Leguminosæ* abound in all situations, especially the genera *Trifolium*, *Trigonella*, *Medicago*, *Lotus*, *Vicia*, and *Orobus*, in the richer soils, and *Astragalus* in enormous profusion in the drier and more barren districts. The latter genus is indeed the largest in the whole country, upwards of fifty species belonging to it being enumerated, either as confined to Syria, or common to it and the neighboring countries. Amongst them are the gum-bearing *Astragalii*, which are, however, almost confined to the upper mountain regions. Of the shrubby *Leguminosæ* there are a few species of *Genista*, *Cytisus*, *Ononis*, *Retama*, *Anagyris*, *Calyotome*, *Coronilla*, and *Acacia*. One species, the *Ceratonia*, is arboreous.

(2.) *Compositæ*.—No family of plants more strikes the observer than the *Compositæ*, from the vast abundance of thistles and centauries, and other spring-plants of the same tribe, which swarm alike over the richest plains and most stony hills, often towering high above all other herbaceous vegetation. By the unobservant traveller these are often supposed to indicate sterility of soil, instead of the contrary, which they for the most part really do, for they are nowhere so tall, rank, or luxuriant as on the most productive soils. It is beyond the limits of this article to detail the botanical peculiarities of this vegetation, and we can only mention the genera *Centurea*, *Echinops*, *Onopordum*, *Cistus*, *Cynara*, and *Carduus*, as being eminently conspicuous for their numbers or size. The tribe *Cichoreæ* are scarcely less numerous, whilst those of *Gnaphalium*, *Asteroidæ*, and *Senecionidæ*, so common in more northern latitudes, are here comparatively rare.

(3.) *Labiatæ* form a prominent feature everywhere, and one all the more obtrusive for the fragrance of many of the genera. Thus the lovely hills of Galilee and Samaria are inseparably linked in the memory with the odoriferous herbage of marjoram, thymes, lavenders, calamintus, sages, and teucriums; of all which there are many species, as also there are of *Sideritis*, *Phlomis*, *Stachys*, *Billota*, *Nepeta*, and *Mentha*.

(4.) Of *Cruciferae* there is little to remark: its species are generally weed-like, and present no marked feature in the landscape. Among the most noticeable are the gigantic mustard, previously mentioned, which does not differ from the common mustard, *Sinapis nigra*, save in size, and the *Arvensis Hierochantica*, or rose of Jericho, an Egyptian and Arabian plant, which is said to grow in the Jordan and Dead Sea valleys.

(5.) *Umbelliferae* present little to remark on save the abundance of fennels and *Eupleura*. The order is exceedingly numerous both in species and individuals, which often form a large proportion of the tall rank herbage at the edges of copse-wood and in damp hollows. The gray and spiny *Eryngium*, so abundant on all the arid hills, belongs to this order.

(6.) *Caryophyllæ* also are not a very conspicuous order, though so numerous that the abundance of pinks, *Silene* and *Saponaria*, is a marked feature to the eye of the botanist.

(7.) The *Boraginæ* are for the most part annual weeds, but some notable exceptions are found in the *Echium*, *Anchusis*, and *Onosmas*, which are among the most beautiful plants of the country.

(8.) Of *Scrophularinæ* the principal genera are *Scrophularia*, *Veronica*, *Linaria*, and *Verbascum* (Mulleins): the latter is by far the most abundant, and many of the species are quite gigantic.

(9.) *Grasses*, though very numerous in species, seldom afford a sward as in moister and colder regions: the pasture of England having for its oriental equivalent the herbs and herbaceous tips of the low shrubby plants which cover the country, and on which all herbivorous animals love to browse. The *Arundo Donax*, *Saccharum Egyptiacum*, and *Eriandrus Ravenneæ*, are all conspicuous for their gigantic size and silky plumes of flowers of singular grace and beauty.

(10.) *Liliacæ*.—The variety and beauty of this order in Syria is perhaps nowhere exceeded, and especially of the bulb-bearing genera, as tulips, fritillaries, squills, gageas, etc. The *Urginea scilla* (medicinal squill), abounds everywhere, throwing up a tall stalk beset with white flowers at its upper half; and the little purple autumnal squill is one of the commonest plants in the country, springing up in October and November in the most arid situations imaginable.

Of other natural orders worthy of notice, for one reason or another, are *Violaceæ*, for the paucity of its species; *Geraniaceæ*, which are very numerous and beautiful; *Rutaceæ*, which are common, and very strong-scented when bruised. *Rosaceæ* are not so abundant as in more northern climates, but are represented by one remarkable plant, *Poterium spinosum*, which covers whole tracts of arid, hilly country, much as the ling does in Britain. *Crasulaceæ* and *Saxifragæ* are also not so plentiful as in cooler regions. *Dipsacæ* are very abundant, especially the genera *Knaulia*, *Scabiosa*, *Cephalarin*, and *Pteroccephalus*. *Campyulidæ* are common, and *Lobeliæ* rare. *Primulaceæ* and *Eriaceæ* are both rare, though one or two species are not uncommon. There are very few *Gentianeæ*, but many *Convolvuli*. Of *Solanæ*, *Mandragora*, *Solanum*, and *Hyoscyamus* are very common, also *Physalis*, *Capsicum*, and *Lycopersicum*, all probably escapes from cultivation. *Plumbaginæ* contain a good many *Staticeæ*, and the blue-flowered *Plumbago Europæa* is a very common weed. *Chenopodiaceæ* are very numerous, especially the weedy *Atriplices* and *Chenopodia* and some shrubby *Salsolæ*. *Polygonæ* are very common indeed, especially the smaller species of *Polygonum* itself. *Aristolochiæ* present several species. *Euphorbiaceæ*. The herbaceous genus *Euphorbia* is vastly abundant, especially in fields: upwards of fifty Syrian species are known. *Crotophora*, *Ardrachne*, and *Ricinus*, all southern types, are also common.

*Urticæ* present the common European nettles, *Mercurialis*, and Pellitory. *Morææ*, the common and sycamore figs, and the black and white mulberries. *Aroidææ* are very common, and many of them are handsome, having deep-purple lurid spathes, which rise out of the ground before the leaves.

Of *Balanophorææ*, the curious *Cynomorium coccineum*, or "Fungus Melitensis," used as a styptic during the Crusades by the knights of Malta, is found in the valleys of Lebanon near the sea. *Naiadeææ*, as in other dry countries, are scarce. *Orchidææ* contain about thirty to forty kinds, chiefly South European species of *Orchis*, *Ophrys*, *Spiranthes*, and *Scirpius*.

*Amargilidææ* present *Panocratum*, *Sternbergia*, *Izoliuon*, and *Narcissus*. *Irîdææ* has many species of *Iris* and *Crocus*, besides *Morææ*, *Gladiolus*, *Trichonema*, and *Romulea*. *Dioscorææ*, *Timus communis*. *Smilicææ*, several *Aspiragii*, *Smilix*, and *Ruscus aculeatus*. *Melanthaceææ* contain many *Colchicums*, besides *Merendera* and *Erythrostictus*. *Juncææ* contain none but the commoner British rushes and luzulus. *Cyperacææ* are remarkably poor in species; the genus *Carex*, so abundant in Europe, is especially rare, not half a dozen species being enumerated.

Ferns are extremely scarce, owing to the dryness of the climate, and most of the species belong to the Lebanon flora. The common lowland ones are *Adiantum capillus-venenis*, *Cheilanthes fragrans*, *Gymnogramme leptophylla*, *Ceterach officinarum*, *Pteris lanceolata*, and *Asplenium Adiantum-nigrum*. *Selaginella denticulata* is also found.

One of the most memorable plants of this region, and indeed in the whole world, is the celebrated Papyrus of the ancients (*Papyrus antiquorum*), which is said once to have grown on the banks of the lower Nile, but which is nowhere found now in Africa north of the tropics. The only other known habitat beside Syria and tropical Africa is one spot in the island of Sicily. The papyrus is a noble plant, forming tufts of tall stout 3 angled green smooth stems, 6 to 10 feet high, each surmounted by a mop of pendulous threads: it abounds in some marshes by the Lake of Tiberias, and is also said to grow near Caiffa and elsewhere in Syria. It is certainly the most remarkable plant in the country.

Of other cryptogamic plants little is known. Mosses, lichens, and *Hepaticææ* are not generally common, though doubtless many species are to be found in the winter and spring months. The marine *Algææ* are supposed to be the same as in the rest of the Mediterranean, and of *Fungi* we have no knowledge at all.

*Cucurbiticææ*, though not included under any of the above heads, are a very frequent order in Syria. Besides the immense crops of melons, gourds, and pumpkins, the colocynth apple, which yields the famous drug, is common in some parts, while even more so is the squirting cucumber (*Ecbalium elaterium*).

Of plants that contribute largely to that showy character for which the herbage of Palestine is famous, may be mentioned *Adonis*, *Ranunculus Asiaticus*, and others; *Anemone coronaria*, poppies, *Glucium*, *Matthiola*, *Malcolmia*, *Alyssum*, *Biscutella*, *Helianthemum*, *Cistus*, the caper plant, many pinks, *Silene*, *Supponaria*, and *Gypsophili*; various *Phloxes*, mallows, *Lavatera*, *Hypericum*; many geraniums, *Erodiums*, and *Leguminosææ*, and *Labiæææ* far too numerous to individualize; *Scar-*

*biosa*, *Cephalaria*, chrysanthemums, *Pyrethrum*, *Inula*, *Achillea*, *Calendula*, *Centaurea*, *Tragopogon*, *Scorzonera*, and *Crepis*; many noble *Campanulas*, cyclamens, *Convolvuli*, *Anchusa*, *Oenothera*, and *Echium*, *Aconitum*, *Verbascum* (most conspicuously), *Veronica*, *Celsus*, *Hyoscyamus*; many *Arums* in autumn, orchis and *Ophrys* in spring; *Narcissus*, *Tazetta*, irises, *Puncratium*, *Sternbergia*, *Gladiolus*; many beautiful crocuses and colchicums, squills, *Tulipa oculus-solis*, *Gageas*, fritillaries, *Allium*, Star of Bethlehem, *Muscari*, white lily, *Hyacinthus orientalis*, *Bellevalis*, and *Asphodeli*.

With such gay and delicate flowers as these, in numberless combinations, the ground is almost carpeted during spring and early summer; and as in similar hot and dry, but still temperate climates as the Cape of Good Hope and Australia, they often color the whole landscape, from their lavish abundance.

H. Botany of Eastern Syria and Palestine. — Little or nothing being known of the flora of the range of mountains east of the Jordan and Syrian desert, we must confine our notice to the valley of the Jordan, that of the Dead Sea, and the country about Damascus.

Nowhere can a better locality be found for showing the contrast between the vegetation of the eastern and western districts of Syria than in the neighborhood of Jerusalem. To the west and south of that city the valleys are full of the dwarf oak, two kinds of *Pistacia*, besides *Smilax*, *Arbutus*, rose, Aleppo Pine, *Rhamnus*, *Phyllirææ*, bramble, and *Cratægus Aronia*. Of these the last alone is found on the Mount of Olives, beyond which, eastward to the Dead Sea, not one of these plants appears, nor are they replaced by any analogous ones. For the first few miles the olive groves continue, and here and there a carob and lentisk or sycamore recurs, but beyond Bethany these are scarcely seen. Naked rocks, or white chalky rounded hills, with bare open valleys, succeed, wholly destitute of copse, and sprinkled with sterile-looking shrubs of *Salsola*, *Cappariidææ*, *Zygophyllum*, rues, *Fagonia*, *Polygonum*, *Zizyphus*, tamarisks, alhagi, and *Artemisia*. Herbaceous plants are still abundant, but do not form the continuous sward that they do in Judea. Amongst these, *Boraginææ*, *Alsinææ*, *Fagonia*, *Polygonum*, *Crozophora*, *Euphorbias*, and *Leguminosææ* are the most frequent.

On descending 1,000 feet below the level of the sea to the valley of the Jordan, the sub-tropical and desert vegetation of Arabia and West Asia is encountered in full force. Many plants wholly foreign to the western district suddenly appear, and the flora is that of the whole dry country as far east as the Panjab. The commonest plant is the *Zizyphus Spina-Christi*, or *nubb* of the Arabs, forming bushes or small trees. Scarcely less abundant, and as large, is the *Balanites Aegyptiaca*, whose fruit yields the oil called *zab* by the Arabs, which is reputed to possess healing properties, and which may possibly be alluded to as Balm of Gilead. Tamarisks are most abundant, together with *Rhus* (*Syriaca*?), conspicuous for the bright green of its few small leaves, and its exact resemblance in foliage bark, and habit to the true Balm of Gilead, the *Amyris Gileadensis* of Arabia. Other most abundant shrubs are *Ochrælenus bracteatus*, a tall, branching, almost leafless plant, with small white berries, and the twiggy, leafless broom called *Retama Acacia Farnesiana* is very abundant, and celebrated

for the delicious fragrance of its yellow flowers. It is chiefly upon it that the superb mistletoe, *Loranthus Acaciae*, grows, whose scarlet flowers are brilliant ornaments to the desert during winter, giving the appearance of flame to the bushes. *Capparis spinosa*, the common caper-plant, flourishes everywhere in the Jordan Valley, forming clumps in the very arid rocky bottoms, which are conspicuous for their pale-blue hue, when seen from a distance. *Alnagi Maurorum* is extremely common; as is the prickly *Solanum Sodomæum*, with purple flowers and globular yellow fruits, commonly known as the Dead Sea apple.

On the banks of the Jordan itself the arboreous and shrubby vegetation chiefly consists of *Populus Euphratica* (a plant found all over Central Asia, but not known west of the Jordan), tamarisk, *Ostrya alba*, *Periploca*, *Acacia vera*, *Prosopis Stephaniana*, *Arundo Donax*, *Lycium*, and *Capparis spinosa*. As the ground becomes saline, *Atriplex Halimus* and large *Stilices* (sea-pinks) appear in vast abundance, with very many succulent shrubby *Salsolas*, *Silicornias*, *Suaedas*, and other allied plants to the number of at least a dozen, many of which are typical of the salt depressions of the Caspian and Central Asia.

Other very tropical plants of this region are *Zygodophyllum coccineum*, *Boerhavia*, *Indigofera*; several *Astragali*, *Cassias*, *Gymnocarpum*, and *Nitaria*. At the same time thoroughly European forms are common, especially in wet places; as dock, mint, *Veronica anagallis*, and *Simu*. One remote and little-visited spot in this region is particularly celebrated for the tropical character of its vegetation. This is the small valley of En-gedi (*Ain-Jidy*), which is on the west shore of the Dead Sea, and where alone, it is said, the following tropical plants grow: *Sida nutica* and *Asiatica*, *Crotropis proceru* (whose bladderly fruits, full of the silky coma of the seeds, have even been assumed to be the Apple of Sodom), *Amberboa*, *Batatas littoralis*, *Aerva Swznica*, *Pluchea Dioscoridis*.

It is here that the *Salvadora Persica*, supposed by some to be the mustard-tree of Scripture, grows: it is a small tree, found as far south as Abyssinia or Aden, and eastward to the peninsula of India, but is unknown west or north of the Dead Sea. The late Dr. Royle — unaware, no doubt, how scarce and local it was, and arguing from the pungent taste of its bark, which is used as horse-radish in India — supposed that this tree was that alluded to in the parable of the mustard tree; but not only is the pungent nature of the bark not generally known to the natives of Syria, but the plant itself is so scarce, local, and little known, that Jesus Christ could never have made it the subject of a parable that would reach the understanding of his hearers.

The shores immediately around the Dead Sea present abundance of vegetation, though almost wholly of a saline character. *Juncus maritimus* is very common in large clumps, and a yellow-flowered groundsel-like plant, *Inula erithroides* (also common on the rocky shores of Tyre, Sidon, etc.). *Spergularia maritima*, *Atriplex Halimus*, *Batatas Egyptiaca*, several shrubby *Suaedas* and *Salicornias*, *Tamarix*, and a prickly-leaved grass *Vestuca*, all grow more or less close to the edge of the water; while of non-saline plants the *Solanum Sodomæum*, *Tamarix*, *Centaurea*, and im-

mense brakes of *Arundo Donax* may be seen all around.

The most singular effect is, however, experienced in the re-ascend from the Dead Sea to the hills on its N. W. shore, which presents first a sudden steep rise, and then a series of vast water-worn terraces at the same level as the Mediterranean. During this ascent such familiar plants of the latter region are successively met with as *Poterium spinosum*, *Anchusa*, pink, *Hypericum*, *Inula viscosa*, etc.; but no trees are seen till the longitude of Jerusalem is approached.

III. *Flora of the Middle and Upper Mountain Regions of Syria*. — The oak forms the prevalent arboreous vegetation of this region below 5,000 feet. The *Quercus pseudo-coccifera* and *infectoria* is not seen much above 3,000 feet, nor the Valonia oak at so great an elevation; but above these heights some magnificent species occur, including the *Quercus Cerris* of the South of Europe, the *Q. Ehrenbergii*, or *castaneaefolia*, *Q. Toza*, *Q. Libani*, and *Q. Mamifera*, Lindl., which is perhaps not distinct from some of the forms of *Q. Robur*, or *sessiliflora*.<sup>a</sup>

At the same elevations junipers become common, but the species have not been satisfactorily made out. The *Juniperus communis* is found, but is not so common as the tall, straight, black kind (*J. excelsa*, or *fœtidissima*). On Mount Casius the *J. drupacea* grows, remarkable for its large plum-like fruit; and *J. Sabina*, *phœnicia*, and *oxycedrus*, are all said to inhabit Syria. But the most remarkable plant of the upper region is certainly the cedar; for which we must refer the reader to the article CEDAR.<sup>b</sup>

Lastly, the flora of the upper temperate and alpine Syrian mountains demands some notice. As before remarked, no part of the Lebanon presents a vegetation at all similar, or even analogous, to that of the Alps of Europe, India, or North America. This is partly owing to the heat and extreme dryness of the climate during a considerable part of the year, to the sudden desiccating influence of the desert winds, and to the sterile nature of the dry limestone soil on the highest summits of Lebanon, Hermon, and the Anti-Lebanon; but perhaps still more to a warm period having succeeded to that cold one during which the glaciers were formed (whose former presence is attested by the moraines in the cedar valley and elsewhere), and which may have obliterated almost every trace of the glacial flora. Hence it happens that far more boreal plants may be gathered on the Himalaya at 10–15,000 ft. elevation, than at the analogous heights on Lebanon of 8–10,000 ft.; and that whilst fully 300 plants belonging to the Arctic circle inhabit the ranges of North India, not half that number are found on the Lebanon, though those mountains are in a far higher latitude.

At the elevation of 4,000 feet on the Lebanon many plants of the middle and northern latitudes of Europe commence, amongst which the most conspicuous are hawthorn, dwarf elder, dog-rose, ivy, butcher's broom, a variety of the berberry, honey suckle, maple, and jasmine. A little higher, at 5–7000 ft., occur *Cotoneaster*, *Rhododendron ponticum*, primrose, *Daphne oleoides*, several other roses,

<sup>a</sup> For some notices of the oaks of Syria, see *Transactions of the Linn. Society*, xxiii. 381, and plates 36–38.

<sup>b</sup> See also Dr. Hooker's paper "On the Cedars of Lebanon," etc., in the *Nat. Hist. Review*, No. 5: with 3 plates.

*Poterium*, *Juniperus communis*, *fetidissima* (or *excelsa*), and cedar. Still higher, at 7-10,000 ft., there is no shrubby vegetation, properly so called. What shrubs there are form small, rounded, harsh, prickly bushes, and belong to genera, or forms of genera, that are almost peculiar to the dry mountain regions of the Levant and Persia, and West Asia generally. Of these *Astragal* are by far the most numerous, including the *A. Tragacantha*, which yields the famous gum in the greatest abundance; and next to them a curious tribe of *Statice* called *Acantholimon*, whose rigid, pungent leaves spread like stars over the whole surface of the plant; and, lastly, a small white chenopodiaceous plant called *Noœa*. These are the prevalent forms up to the very summit of Lebanon, growing in globular masses on the rounded flank of *Dhar el-Khodib* itself, 10,200 feet above the sea.

At the elevation of 8-9,000 feet the beautiful silvery *Vicia canescens* forms large tufts of pale blue, where scarcely anything else will grow.

The herbaceous plants of 7-10,000 feet altitude are still chiefly Levantine forms of *Campanula*, *Ranunculus*, *Corydalis*, *Draba*, *Silene*, *Arenaria*, *Saponaria*, *Geranium*, *Erodium*, several *Umbellifera*, *Galium*, *Erigeron*, *Scorzonera*, *Taraxacum*, *Androsace*, *Scrophularia*, *Nepeta*, *Sideritis*, *Aspidodeline*, *Crocus*, *Ornithogalum*; and a few grasses and sedges. No gentians, heaths, *Primulus*, saxifrages, anemones, or other alpine favorites, are found.

The most boreal forms, which are confined to the clefts of rocks, or the vicinity of patches of snow above 9,000 feet, are *Drabas*, *Arenaria*, one small *Potentilla*, a *Festuca*, an *Arabis* like *alpina*, and the *Oxyria reniformis*, the only decidedly Arctic type in the whole country, and probably the only characteristic plant remaining of the flora which inhabited the Lebanon during the glacial period. It is, however, extremely rare, and only found nestling under stones, and in deep clefts of rocks, on the very summit, and near the patches of snow on *Dhar el-Khodib*.

No doubt Cryptogamic plants are sufficiently numerous in this region, but none have been collected, except ferns, amongst which are *Cystopteris fragilis*, *Polypodium vulgare*, *Nephrodium pallidum*, and *Polystichum angulare*. J. D. H.

ZOOLOGY.—Much information is still needed on this subject before we can possibly determine with any degree of certainty the fauna of Palestine; indeed, the complaint of Linnæus in 1747, that "we are less acquainted with the Natural History of Palestine than with that of the remotest parts of India," is almost as just now as it was when the remark was made. "There is perhaps," writes a recent visitor to the Holy Land, "no country frequented by travellers whose fauna is so little known as that of Palestine" (*Ibis*, i. 22); indeed, the complaint is general amongst zoologists.

It will be sufficient in this article to give a general survey of the fauna of Palestine, as the reader will find more particular information in the

<sup>a</sup> There is some little doubt whether the brown bear (*U. arctos*) may not occasionally be found in Palestine. See Schubert (*Reise in das Morgenland*).

<sup>b</sup> Col. H. Smith, in Kitto's *Cyc.* art. "Badger," says that the badger occurs in Palestine, and says 't has not yet been found out of Europe. This animal, however, is certainly an inhabitant of certain

several articles which treat of the various animals under their respective names.

**Mammalia.**—The *Cheiroptera* (bats) are probably represented in Palestine by the species which are known to occur in Egypt and Syria, but we want precise information on this point. [BAT.] Of the *Insectivora* we find hedgehogs (*Eriaceus Europæus*) and moles (*Talpa vulgaris*, *T. caeca* (?)) which are recorded to occur in great numbers and to commit much damage (Hasselquist, *Trav.* p. 120): doubtless the family of *Soricidae* (shrews) is also represented, but we lack information. Of the *Carnivora* are still seen, in the Lebanon, the Syrian bear (*Ursus Syriacus*),<sup>a</sup> and the panther (*Leopardus varius*), which occupies the central mountains of the land. Jackals and foxes are common; the hyena and wolf are also occasionally observed; the badger (*Meles meles*) is also said to occur in Palestine;<sup>b</sup> the lion is no longer a resident in Palestine or Syria, though in Biblical times this animal must have been by no means uncommon, being frequently mentioned in Scripture. [LION.] The late Dr. Roth informed Mr. Tristram that bones of the lion had recently been found among the gravel on the banks of the Jordan not far south of the Sea of Galilee. A species of squirrel (*Sciurus Syriacus*), which the Arabs term *Orkidum*, "the leaper," has been noticed by Hemprich and Ehrenberg on the lower and middle parts of Lebanon; two kinds of hare, *Lepus Syriacus*, and *L. Ægyptius*; rats and mice, which are said to abound, but to be partly kept down by the tame Persian cats; the jerboa (*Dipus Ægyptius*); the porcupine (*Hystrix cristata*); the short-tailed field-mouse (*Arvicola agrestis*), a most injurious animal to the husbandman, and doubtless other species of *Castoridae*, may be considered as the representatives of the *Rodentia*. Of the *Pachydermata*, the wild boar (*Sus scrofa*), which is frequently met with on Tabor and Little Hermon, appears to be the only living wild example. The Syrian hyrax appears to be now but rarely seen. [CONEY.]

There does not appear to be at present any wild ox in Palestine, though it is very probable that in Biblical times some kind of urus or bison roamed about the hills of Bashan and Lebanon. [UNICORN.] Dr. Thomson states that wild goats (*Ibex*?) are still (see 1 Sam. xxiv. 2) frequently seen in the rocks of En-gedi. Mr. Tristram possesses a specimen of *Capra ægagrus*, the Persian ibex, obtained by him a little to the south of Helron. The gazelle (*Gazella dorcas*) occurs not unfrequently in the Holy Land, and is the antelope of the country. We want information as to other species of antelopes found in Palestine: probably the variety named, by Hemprich and Ehrenberg, *Antelope Arabica*, and perhaps the *Gazella Isabella*, belong to the fauna. The Arabs hunt the gazelles with greyhound and falcon; the fallow-deer (*Dama vulgaris*) is said to be not unfrequently observed.

Of domestic animals we need only mention the Arabian or one-humped camel, asses,<sup>c</sup> and mules,

parts of Asia; and it is mentioned, together with wolves, jackals, porcupines, &c., by Mr. H. Poole, as abounding at Helron (see *Geograph. Journal* for 1856 p. 58).

<sup>c</sup> \* It may be well to add here that four of the five names for this animal used in the Hebrew Scriptures are used by the Arabs of the present day in Syria

and horses, all which are in general use. The buffalo (*Bubalus buffalo*) is common, and is on account of its strength much used for ploughing and draught purposes. The ox of the country is small and unsightly in the neighborhood of Jerusalem, but in the richer pastures of the upper part of the country, the cattle, though small, are not unsightly, the head being very like that of an Alderney; the common sheep of Palestine is the broad-tail (*Ovis laticaudatus*), with its varieties [SHEEP]; goats are extremely common everywhere.

**Aves.** — Palestine abounds in numerous kinds of birds. Vultures, eagles, falcons, kites, owls of different kinds, represent the *Raptorial* order. Of the smaller birds may be mentioned, amongst others, the *Merops Persicus*, the *Upupa Epops*, the *Sitta Syriaca* or Dalmatian nuthatch, several kinds of *Silvidae*, the *Cyanus osea*, or Palestine sunbird, the *Ixos xanthopygos*, Palestine nightingale — the finest songster in the country, which long before sunrise pours forth its sweet notes from the thick jungle which fringes the Jordan; the *Amythus Tristramii*, or glossy starling, discovered by Mr. Tristram in the gorge of the Kedron not far from the Dead Sea, "the roll of whose music, something like that of the organ-bird of Australia, makes the rocks resound" — this is a bird of much interest, inasmuch as it belongs to a purely African group not before met with in Asia; the sly and wary *Crateropus chalybeus*, in the open wooded district near Jericho; the jay of Palestine (*Corvus melanocephalus*); kingfishers (*Ceryle rudis*, and perhaps *Alcedo ispida*) about about the Lake of Tiberias and in the streams above the Huleh; the raven, and carrion crow; the *Pastor roseus*, or locust-bird [see LOCUST]; the common cuckoo; several kinds of doves; sandgrouse (*Pterocles*), partridges, francolins, quails, the great bustard, storks, both the black and white kinds, seen often in flocks of some hundreds; herons, curlews, pelicans, sea-swallows (*Sterna*), gulls, etc. etc. For the ornithology of the Holy Land the reader is referred to Hemprich and Ehrenberg's *Symbole Physica* (Berlin, 1820-25), and to Mr. Tristram's paper in the *Ibis*, i. 22.

**Reptilia.** — Several kinds of lizards (*Saura*) occur. The *Lacerta stellio*, Lin., which the Arabs call *Hardun*, and the Turks kill, as they think it mimics them saying their prayers, is very common in ruined walls. The *Waran el hard* (*Psammisaurus scincus*) is very common in the deserts. The common Greek tortoise (*Testudo Græca*) Dr. Wilson observed at the sources of the Jordan; fresh-water tortoises (probably *Emus Caspica*) are found abundantly in the upper part of the country in the streams of Esdraelon and of the higher Jordan Valley, and in the lakes. The chameleon (*Chameleo vulgaris*) is common; the crocodile does not occur in Palestine; the *Monitor*

*Niloticus* has doubtless been confounded with it. In the south of Palestine especially reptiles of various kinds abound; besides those already mentioned, a large *Acanthodactylus* frequents old buildings; a large species of *Uromastix*, at least two species of *Gecko* (*Tarentola*), a *Gongylus (ocellatus?)*, several other *Acanthodactylus* and *Seps tridactylus* have been observed. Of *Ophiidians*, there is more than one species of *Echidna*; a *Nain*, several *Tropidonoti*, a *Coronella*, a *Coluber (trivirgatus?)* occur; and on the southern frontier of the land the desert form *Cerastes Hasselquistii* has been observed. Of the *Batrachia* we have little information beyond that supplied by Kitto, namely, that frog (*Rana esculenta*) abound in the marshy pools of Palestine; that they are of a large size, but are not eaten by the inhabitants. The tree-frog (*Hyla* and toad (*Bufo*) are also very common.

**Pisces.** — Fish were supplied to the inhabitants of Palestine both from the Mediterranean and from the inland lakes, especially from the Lake of Tiberias. The men of Tyre brought fish and sold on the Sabbath to the people of Jerusalem (Neh. xiii. 16). The principal kinds which are caught off the shores of the Mediterranean are supplied by the families *Sparidae*, *Percide*, *Scomberide*, *Raidæ*, and *Pleuronectide*. The sea of Galilee has been always celebrated for its fish. Burckhardt (*Syria*, p. 332) says the most common species are the binny (*Cyprinus lepidotus*), frequent in all the fresh waters of Palestine and Syria, and a fish called *Mesht*, which he describes as being a foot long and five inches broad, with a flat body like the sole. The *Binny* is a species of barbel; it is the *Barbus Binni* of Cuv. and Valenc., and is said by Bruce to attain sometimes to a weight of 70 lbs.; it is common in the Nile, and is said to occur in all the fresh waters of Syria. The *Mesht* is undoubtedly a species of *Chromius*, one of the *Labridæ*, and is perhaps identical with the *C. Niloticus*, which is frequently represented on Egyptian monuments. The fish of this lake are, according to old tradition, nearly identical with the fish of the Nile; but we sadly want accurate information on this point. As to the fishes of Egypt and Syria, see Rüppell, E., *Neue Fische des Nils*, in *Verhandl. Senckenberg. Gesellsch. Frankf.*, and Heckel, J., *Die Fische Syriens*, in *Russegger, Reise nach Egypten und Klein-Asien*. There does not appear to be any separate work published on the fishes of the Holy Land. [CAPERNAUM, i. 382.]

Concerning the other divisions of the animal kingdom we have little information. *Molluscs* are numerous; indeed in few areas of similar extent could so large a number of land molluscs be found; Mr. Tristram collected casually, and without search, upwards of 100 species in a few weeks. The land shells may be classified in four groups. In the north of the country the prevailing type is that of the Greek and Turkish mountain region, numerous species of the genus *Clausilia*, and of opaque *Bulimi* and *Pupæ* predominating. On the coast

(1.) حمار, which is the generic name for the domestic ass. (2.) اتان, which is the name of the she-ass. (3.) عَيْر = لاير, a name used for the wild ass, indistinguishable from (4.) فَرَس = فَرَس, which is without doubt the *Asinus hemippus* or *Asinus onager*.

The ass is capable of bearing greater burdens relatively to its size than any other draught animal. Its load of wheat or flour is more than half that of a full-grown mule, and a third of the load of a camel. It is common in the East to see loads of brushwood, as broad as the streets will allow, and eight feet high, borne by a little donkey which is quite concealed under his monstrous burden. G E P

and in the plains the common shells of the East Mediterranean basin abound, e. g. *Helix Pisana*, *H. Syriaca*, etc. In the south, in the hill country of Judæa, occurs a very interesting group, chiefly confined to the genus *Helix*, three subdivisions of which may be typified by *H. Boissieri*, *H. Seetzeni*, *H. tuberculosa*, recalling by their thick, calcareous, lustreless coating, the prevalent types of Egypt, Arabia, and Sahara. In the valley of the Jordan the prevailing group is a subdivision of the genus *Bulinus*, rounded, semi-pellucid, and lustrous, very numerous in species, which are for the most part peculiar to this district. The reader will find a list of *Mollusca* found in the neighborhood of Jerusalem, in the *An. and Mag. of Nat. Hist.* vi. No. 34, p. 312. The following remark of a resident in Jerusalem may be mentioned. "No shells are found in the Dead Sea or on its margin except the bleached specimens of *Melanopsis*, *Neritina*, and various *Unionide*, which have been washed down by the Jordan, and afterwards drifted on shore. In fact, so intense is the bitter-saline quality of its waters that no mollusc (nor, so far as I know, any other living creature) can exist in it.<sup>a</sup> These may be typified by *B. Jordani* and *B. Aleppensis*. Of the *Crustacea* we know scarcely anything. Lord Lindsay observed large numbers of a small crab in the sands near Akaba. Hasselquist (*Trav.* p. 238) speaks of a "running crab" seen by him on the coasts of Syria and Egypt. Dr. Baird has recently (*An. and Mag. N. H.* viii. No. 45, p. 209) described an interesting form of Entomostracous Crustacean, which he terms *Branchipus eximius*, reared from mud sent him from a pool near Jerusalem. Five other species of this group are described by Dr. Baird in the *An. and Mag. N. H.* for Oct. 1859. With regard to the insects, a number of beetles may be seen figured in the *Symbole Physica*.

The *Lepidoptera* of Palestine are as numerous and varied as might have been expected in a land of flowers. All the common butterflies of southern Europe, or nearly allied congeners, are plentiful in the cultivated plains and on the hill-sides. Numerous species of *Polyommatus* and *Lycæna*, *Thecla ilicis* and *acaciæ*; many kinds of *Pontia*; the lovely *Anthocaris epheno* abounds on the lower hills in spring, as does *Parnassius Apollinus*; more than one species of *Thais* occurs; the genera *Argynnis* and *Melitæa* are abundantly represented, not so *Hipparchia*, owing probably to the comparative dryness of the soil. *Libythea* (*Celtis*?) is found, and the gorgeous genus *Vanessa* is very common in all suitable localities; the almost cosmopolitan *Cynthia Cardui* and *Vanessa Atalanta*, *V. L. album*, and *V. Antiopa*, may be mentioned; *Papilio Alexmor* and some others of the same species flit over the plains of Sharon, and the caterpillar

<sup>a</sup> This statement with regard to the total absence of organic life in the Dead Sea is confirmed by almost every traveller, and there can be no doubt as to its general accuracy. It is, however, but right to state that Mr. Poole discovered some small fish in a brine-spring, about 100 yards distant from, and 30 feet above the level of the Dead Sea, which he was inclined to think had been produced from fish in the sea (see *Geograph. Journal* for 1856). These fish have been identified by Sir J. Richardson with *Cyprinodon Hamonnis*, *Env.* et *Val.* xvii. 169; see *Proceed. of Zoolog. Soc.* for 1856, p. 371. Mr. Tristram observes that he found in the Sahara *Cyprinodon dispar* in hot salt-springs where the water was shallow, but that these

of the magnificent *Sphinx Nerii* feeds in swarms on the oleanders by the banks of the Jordan. Bees are common. [BEE.] At least three species of scorpions have been distinguished. Spiders are common. The *Aru Hamckein*, noticed as occurring at Sinai by Burekhardt, which appears to be some species of *Gileodes*, one of the Solpugidae, probably may be found in Palestine. Locusts occasionally visit Palestine and do infinite damage. Ants are numerous; some species are described in the *Journal of the Linnean Society*, vi. No. 21, which were collected by Mr. Hanbury in the autumn of 1860. Of the *Annelida* we have no information; while of the whole sub-kingdoms of *Cœlenterata* and *Protozoa* we are completely ignorant.

It has been remarked that in its physical character Palestine presents on a small scale an epitome of the natural features of all regions, mountainous and desert, northern and tropical, maritime and inland, pastoral, arable, and volcanic. This fact, which has rendered the allusions in the Scriptures so varied as to afford familiar illustrations to the people of every climate, has had its natural effect on the zoology of the country. In no other district, not even on the southern slopes of the Himalayah, are the typical fauna of so many distinct regions and zones brought into such close juxtaposition. The bear of the snowy heights of Lebanon and the gazelle of the desert may be hunted within two days' journey of each other; sometimes even the ostrich approaches the southern borders of the land; the wolf of the north and the leopard of the tropics howl within hearing of the same bivouac; while the falcons, the linnets and buntings, recall the familiar inhabitants of our English fields, the sparkling little sun-bird (*Cinnyris osea*), and the grackle of the glen (*Amydrus Tristramii*) introduce us at once to the most brilliant types of the bird-life of Asia and S. Africa.

Within a walk of Bethlehem, the common frog of England, the chameleon, and the gecko of Africa, may be found almost in company; and descending to the lower forms of animal life, while the northern valleys are prolific in *Clausilia* and other genera of molluscs common to Europe, the valley of the Jordan presents types of its own, and the hill country of Judæa produces the same type of *Helices* as is found in Egypt and the African Sahara. So in insects, while the familiar forms of the butterflies of Southern Europe are represented on the plain of Sharon, the Apollo butterfly of the Alps is recalled on Mount Olivet by the exquisite *Parnassius Apollinus* hovering over the same plants as the sparkling *Thais mediciste* and the *Libythea* (*Celtis*?), northern representatives of sub-tropical lepidoptera.

If the many travellers who year by year visit the

fish are never found in deep pools or lakes. Mr. Poole observed also a number of aquatic birds diving frequently in the Dead Sea, and thence concluded, justly, Sir J. Richardson thinks, "that they must have found something edible there." It would, moreover, be an interesting question to determine whether some species of *Artemia* (brine-shrimp) may not exist in the shallow pools at the extreme south end of the Salt Lake. In the open tanks at Lyngington myriads of these transparent little brine-shrimps (they are about half an inch in length) are seen swimming actively about in water every pint of which contains as much as a quarter of a pound of salt!

Holy Land would pay some attention to its zoology, by bringing home collections and by investigations in the country, we should soon hope to have a fair knowledge of the fauna of a land which in this respect has been so much neglected, and should doubtless gain much towards the elucidation of many passages of Holy Scripture.

W. H. and H. B. TRISTRAM.

\* Our most convenient manual on the *Natural History of the Bible* at present is that of Mr. Tristram, published by the Society for Promoting Christian Knowledge. (London, 1867.) The contributions of Dr. G. E. Post, in this edition of the *Dictionary*, will be found to be important to this branch of science. H.

THE CLIMATE. — No materials exist for an accurate account of the climate of the very different regions of Palestine. Besides the casual notices of travellers (often unscientific persons), the following observations are all that we possess: —

(1.) Average monthly temperatures at Jerusalem, taken between June 1851, and Jan. 1855, inclusive, by Dr. R. G. Barclay, of Beyrût and Jerusalem, and published by him in a paper "On the State of Medical Science in Syria," in the *N. American Medico-Chirurgical Review* (Philadelphia), vol. i. 705-718.<sup>a</sup>

(2.) A set of observations of temperature, 206 in all, extending from Nov. 19, 1838, to Jan. 16, 1839, taken at Jerusalem, Jaffa, Nazareth, and Beyrût, by Russegger, and given in his work (*Reisen*, iii. 170-185).

(3.) The writer is indebted to his friend Mr. James Glaisher, F. R. S., for a table showing the mean temperature of the air at Jerusalem for each month, from May, 1843, to May, 1844;<sup>b</sup> and at Beyrût, from April, 1842, to May, 1845.

(4.) Register of the fall of rain at Jerusalem from 1846 to 1849, and 1850 to 1854, by Dr. R. G. Barclay (as above).

1. *Temperature.* — The results of these observa-

<sup>a</sup> These observations are inserted in Dr. Barclay's work (*City of the Great King*, p. 428), and are accompanied by his comments, the result of a residence of several years in Jerusalem (see also pp. 48-56).

<sup>b</sup> There is considerable variation in the above three sets of observations, as will be seen from the following comparative table of the mean temperatures of Jerusalem: —

Month.	(1.)	(2.)	(3.)
Jan.	49.4		47.7
Feb.	54.4		53.7
March	55.7		60.
April	61.4		54.7
May	73.8		66.8
June	75.2		71.7
July	79.1		77.3
Aug.	79.3		72.6
Sept.	77.	(Mean of 67 obs. from Nov. 19 to Dec. 5.)	72.2
Oct.	74.2		68.4
Nov.	63.8		58.9
Dec.	54.5	62.	47.4
Mean for the year.	66.5		62.6

tions at Jerusalem may be stated generally as follows. January is the coldest month, and July and August the hottest, though June and September are nearly as warm. In the first-named month the average temperature is 49.1° Fahr., and greatest cold 28°; in July and August the average is 78.4°; with greatest heat 92° in the shade and 143° in the sun. The extreme range in a single year was 52°; the mean annual temperature 65.6°. Though varying so much during the different seasons, the climate is on the whole pretty uniform from year to year. Thus the thermometric variation in the same latitude on the west coast of North America is nearly twice as great. The isothermal line of mean annual temperature of Jerusalem passes through California and Florida (to the north of Mobile), and Dr. Barclay remarks that in temperature and the periodicity of the seasons there is a close analogy between Palestine and the former state. The isothermal line also passes through Gibraltar, and near Madeira and the Bermudas. The heat, though extreme during the four mid-summer months, is much alleviated by a sea-breeze from the N.W., which blows with great regularity from 10 A.M. till 10 P.M. and from this and other unexplained causes the heat is rarely oppressive, except during the occasional presence of the Khamsin or sirocco, and is said to be much more bearable than even in many parts of the western world which are deemed tropical. The Khamsin blows during February, March, and April (Wildenbruch). It is most oppressive when it comes from the east, bearing the heat and sand of the desert with it, and during its continuance darkening the air and filling everything with fine dust (Miss Beaufort, ii. 223).

During January and February snow often falls to the depth of a foot or more, though it may not make its appearance for several years together. In 1854-55 it remained on the ground for a fortnight.<sup>c</sup> Nor is this of late occurrence only, but is reported by Shaw in 1722. In 1818 it was between two and three feet deep.<sup>e</sup> In 1754 a heavy fall took place, and twenty-five persons are said to have been frozen to death at Nazareth.<sup>f</sup> Snow is repeatedly mentioned in the poetical books of the Bible, and must therefore have been known at that time (Ps. lxxviii. 14, cxlvii. 16; Is. lv. 10, &c.). But in the narrative it only appears twice (1 Macc. xiii. 22; 2 Sam. xxiii. 20).

Thin ice is occasionally found on pools or sheets of water; and pieces of ground out of the reach of the sun's rays remain sometimes slightly frozen for several days. But this is a rare occurrence, and no injury is done to the vegetation by frost, nor do plants require shelter during winter (Barclay).

Observations made at Jerusalem are not applicable to the whole of the highland, as is obvious from Russegger's at Nazareth. These show us the result of fifty-five observations, extending from

It is understood that a regular series of observations, with standard barometer, thermometer, and rain-gauge, was made for 10 years by the late Dr M'Gowan of the Hospital, Jerusalem, but the records are unfortunately never mislaid.

<sup>c</sup> Barclay, p. 48; Rob. *Bibl. Res.* i. 430; also Schwarz, p. 327.

<sup>d</sup> *Jewish Intelligencer*, 1856, p. 137, note.

<sup>e</sup> "1 Ellu hoch," Scholz, quoted by Von Raumer, p. 7b.

<sup>f</sup> S. Schulz, quoted by Von Raumer Schwarz, p. 326.

Dec. 15 to 26: highest temp. 58.5°, lowest 46°, mean 53°, all considerably lower than those taken at Jerusalem a fortnight before.

2. *Rain*. — The result of Dr. Barclay's observations is to show that the greatest fall of rain at Jerusalem in a single year was 85 inches,<sup>a</sup> and the smallest 44, the mean being 61.6 inches. The greatest fall in any one month (Dec. 1850) was 33.8, and the greatest in three months (Dec. 1850, Jan. and Feb. 1851) 72.4. These figures will be best appreciated by recollecting that the average rain-fall of London during the whole year is only 25 inches, and that in the wettest parts of the country, such as Cumberland and Devon, it rarely exceeds 60 inches.

As in the time of our Saviour (Luke xii. 54), the rains come chiefly from the S. or S. W. They commence at the end of October or beginning of November, and continue with greater or less constancy till the end of February or middle of March, and occasionally, though rarely, till the end of April. It is not a heavy, continuous rain, so much as a succession of severe showers or storms with intervening periods of fine bright weather, permitting the grain crops to grow and ripen. And although the season is not divided by any entire cessation of rain for a lengthened interval, as some represent, yet there appears to be a diminution in the fall for a few weeks in December and January, after which it begins again, and continues during February and till the conclusion of the season. On the uplands the barley-harvest (which precedes the wheat) should begin about the last week of May, so that it is preceded by five or six weeks of summer weather. Any falling-off in the rain during the winter or spring is very prejudicial to the harvest; and, as in the days of the prophet Amos, nothing could so surely occasion the greatest distress or be so fearful a threat as a drought three months before harvest (Amos iv. 7).

There is much difference of opinion as to whether the former and the latter rain of Scripture are represented by the beginning and end of the present rainy season, separated by the slight interval mentioned above (e. g. Kenrick, *Phœnicia*, p. 33), or whether, as Dr. Barclay (*City*, &c. p. 54) and others affirm, the latter rain took place after the harvest, about midsummer, and has been withheld as a punishment for the sins of the nation. This will be best discussed under RAIN.

Between April and November there is, with the rarest exceptions, an uninterrupted succession of fine weather, and skies without a cloud. Thus the year divides itself into two, and only two, seasons — as indeed we see it constantly divided in the Bible — “winter and summer,” “cold and heat,” “seed-time and harvest.”

<sup>a</sup> Here again there is a considerable discrepancy, since Mr. Poole (*Geogr. Journal*, xxvi. 57) states that Dr. McGowan had registered the greatest quantity in one year at 108 inches.

<sup>b</sup> At 5 P. M. on the 25th Nov. Russegger's thermometer at Jerusalem showed a temp. of 62.8°; but when he arrived at Jericho at 5.30 P. M. on the 27th it had risen to 72.5°. At 7.30 the following morning it was 63.5°, against 58° at Jerusalem on the 25th; and at noon, at the Jordan, it had risen to 81°. At Marsaba, at 11 A. M. on the 29th, it was 66°; and on returning to Jerusalem on the 1st Dec. it again fell to an average of 61°. An observation recorded by Dr. Robinson (iii. 110) at *Sakht* (Succoth), in the central part of the Jordan Valley, on May 14, 1862, in the shade, and close

to a spring, gives 92°, which is the very highest reading recorded at Jerusalem in July: later on the same day it was 93°, in a strong N. W. wind (p. 814). On May 13, 1838, at Jericho, it was 91° in the shade and the breeze. Dr. Anderson (p. 184) found it 106° Fahr. “through the first half of the night” at the S. E. corner of the Dead Sea. In a paper on the “Climate of Palestine,” etc., in the *Edinburgh New Philos. Journal* for April, 1862, published while this sheet was passing through the press, the mean annual temperature of Jericho is stated as 72° Fahr., but without giving any authority.

During the summer the dews are very heavy, and often saturate the traveller's tent as if a shower had passed over it. The nights, especially towards sunrise, are very cold, and thick fogs or mists are common all over the country. Thunder-storms of great violence are frequent during the winter months.

3. So much for the climate of Jerusalem and the highland generally. In the lowland districts, on the other hand, the heat is much greater and more oppressive,<sup>b</sup> owing to the quantity of vapor in the atmosphere, the absence of any breeze, the sandy nature of the soil, and the manner in which the heat is confined and reflected by the inclosing heights; perhaps also to the internal heat of the earth, due to the depth below the sea level of the greater part of the Jordan Valley, and the remains of volcanic agency, which we have already shown to be still in existence in this very depressed region [p. 2305 *b*]. No indication of these conditions is discoverable in the Bible, but Josephus was aware of them (*B. J.* iv. 8, § 3), and states that the neighborhood of Jericho was so much warmer than the upper country that linen clothing was worn there even when Judæa was covered with snow. This is not quite confirmed by the experience of modern travellers, but it appears that when the winter is at its severest on the highlands, and both eastern and western mountains are white with snow, no frost visits the depths of the Jordan Valley, and the greatest cold experienced is produced by the driving rain of tempests (Seetzen, Jan. 9, ii. 300). The vegetation already mentioned as formerly or at present existing in the district — palms, indigo, sugar — testifies to its tropical heat. The harvest in the Ghor is fully a month in advance of that on the highlands, and the fields of wheat are still green on the latter when the grain is being threshed in the former (*Rob. Bibl. Res.* i. 431, 551, iii. 314). Thus Burckhardt on May 5 found the barley of the district between Tiberias and Beisan nearly all harvested, while on the upland plains of the Hauran, from which he had just descended, the harvest was not to commence for fifteen days. In this fervid and moist atmosphere irrigation alone is necessary to insure abundant crops of the finest grain (*Rob.* i. 550).

4. The climate of the maritime lowland exhibits many of the characteristics of that of the Jordan Valley,<sup>c</sup> but, being much more elevated, and exposed on its western side to the sea-breezes, is not so oppressively hot. Russegger's observations at Jaffa (Dec. 7 to 12) indicate only a slight advance in temperature on that of Jerusalem. But Mr. Glaisher's observations at Beyrût (mentioned above) show on the other hand that the temperature there is considerably higher, the Jan. being

<sup>c</sup> Robinson (ii. 223), on June 8, 1838, found the thermometer 88° Fahr. before sunrise, at *Beit Nettif*, on the lower hills overlooking the Plain of Philistia

40°, July 82°, and the mean for the year 69° 30'. The situation of Beyrût (which indeed is out of the confines of the Holy Land) is such as to render its climate very sultry. This district retains much tropical vegetation: all along the coast from Gaza to Beyrût, and inland as far as Ramleh and Lydd, the date-palm flourishes and fruits abundantly, and the orange, sycamore-fig, pomegranate, and banana grow luxuriantly at Jaffa and other places. Here also the harvest is in advance of that of the mountainous districts (Thomson, *Land and Book*, p. 543). In the lower portions of this extensive plain frost and snow are as little known as they are in the Ghor. But the heights, even in summer, are often very chilly, and the sunrise is frequently obscured by a dense low fog (Thomson, pp. 490, 542; Rob. ii. 19). North of Carmel slight frosts are occasionally experienced.

In the winter months, however, the climate of these regions is very similar to that of the south of France or the maritime districts of the north of Italy. Napoleon, writing from Gaza on the "8th Ventose (26 Feb.), 1799," says, "Nous sommes ici dans l'eau et la boue jusqu'aux genoux. Il fait ici le même froid et le même temps qu'à Paris dans cette saison" (*Corr. de Napoléon*, No 3,993). Berthier to Marmont, from the same place (23 Dec. 1798), says, "Nous trouvons ici un pays qui ressemble à la Provence et le climat à celui d'Europe" (*Mém. du Duc de Raguse*, ii. 56).

A register of the weather and vegetation of the twelve months in Palestine, referring especially to the coast region, is given by Colonel von Wildenbruch in *Geogr. Society's Journal*, xx. 232. A good deal of similar information will be found in a tabular form on Petermann's Physical Map of Palestine in the *Biblical Atlas* of the Tract Society.

The permanence of the climate of Palestine, on the ground that the same vegetation which anciently flourished there still exists, is ingeniously maintained in a paper on *The Climate of Palestine in Modern compared to Ancient Times* in the *Edinburgh New Philosophical Journal* for April, 1862. Reference is therein made to a paper on the same subject by Schouw in vol. viii. of the same periodical; p. 311.

LITERATURE. — The list of works on the Holy Land is of prodigious extent. Dr. Robinson, in the Appendix to his *Biblical Researches*, enumerates no less than 183; to which Bonar (*Land of Promise*) adds a large number; and even then the list is far from complete.

\* A unique work on this branch of bibliography is Dr. Tobler's *Bibliotheca Geographica Palestine*, pp. 265 (Leipzig, 1837). Beginning with A. D. 553, and coming down to 1865, he enumerates (if we have counted right) 1,066 writers in this field of exploration and study. They represent all the principal nationalities and languages. In most instances he characterizes the works mentioned with reference to their object and critical value.

## H.

Of course every traveller sees some things which none of his predecessors saw, and therefore none should be neglected by the student anxious thoroughly to investigate the nature and customs of

the Holy Land; but the following works will be found to contain nearly all necessary information:—

1. Josephus. — Invaluable, both for its own sake, and as an accompaniment and elucidation of the Bible narrative. Josephus had a very intimate knowledge of the country. He possessed both the Hebrew Bible and the Septuagint, and knew them well; and there are many places in his works which show that he knew how to compare the various books together, and combine their scattered notices in one narrative, in a manner more like the processes of modern criticism than of ancient record. He possessed also the works of several ancient historians, who survive only through the fragments he has preserved. And it is evident that he had in addition other nameless sources of information, now lost to us, which often supplement the Scripture history in a very important manner. These and other things in the writings of Josephus have yet to be investigated. Two tracts by Tuch (*Quæstiones de F. Josephi libris*, etc., Leipzig, 1859), on geographical points, are worth attention.

2. The *Onomasticon* (usually so called) of Eusebius and Jerome. A tract of Eusebius (†340), "concerning the names of places in the Sacred Scriptures;" translated, freely and with many additions, by Jerome (†420), and included in his works as *Liber de Situ et Nominibus Locorum Hebraicorum*. The original arrangement is according to the Books of Scripture, but it was thrown into one general alphabetical order by Bonfrère (1631, &c.); and finally edited by J. Clericus, Amst. 1707, &c. [The best edition is that of Larsow and Parthey, Berlin, 1862. — A.] This tract contains notices (often very valuable, often absolutely absurd) of the situation of many ancient places of Palestine, as far as they were known to the two men who in their day were probably best acquainted with the subject. In connection with it, see Jerome's *Ep. ad Eustochium*; *Epit. Paulæ* — an itinerary through a large part of the Holy Land. Others of Jerome's Epistles, and his Commentaries, are full of information on the country.

3. The most important of the early travellers — from Arculf (A. D. 700) to Maundrell (1697) — are contained in *Early Travels in Palestine*, a volume published by Bohn. The shape is convenient, but the translation is not always to be implicitly relied on.

4. Reland. — *H. Relandi Palestinae ac Monumentis Veteribus illustrata*, 1714. A treatise on the Holy Land in three books: 1. The country; 2. The distances; 3. The places; with maps (excellent for their date), prints of coins and inscriptions. Reland exhausts all the information obtainable on his subject down to his own date (he often quotes Maundrell, 1703). His learning is immense, he is extremely accurate, always ingenious, and not wanting in humor. But honesty and strong sound sense are his characteristics. A sentence of his own might be his motto: "Conjectura, quibus non delectamur" (p. 139), or "Ego nil muto" (p. 671).

5. Benjamin of Tudela. — *Travels of Rabbi Benjamin* (in Europe, Asia, and Africa) from 1160-73. The best edition is that of A. Asher, 2 vols.

a Chilly nights, succeeding scorching days, have formed a characteristic of the East ever since the days of Jacob (Gen. xxxi. 40; Jer. xxxvi. 80). [See Hackert's *Illustr. of Scripture*, pp. 144-46.]

b A list of all the works on Palestine which have any pretensions to importance, with full critical remarks, is given by Ritter at the commencement of the 2d division of his eighth volume (*Jordan*).

184C-41. The part relating to Palestine is contained in pp. 61-87. The editor's notes contain some curious information; but their most valuable part (ii. 397-445) is a translation of extracts from the work of Esthori B. Mose hap-Parcki on Palestine (A. D. 1314-22). These passages — notices of places and identifications — are very valuable, more so than those of Benjamin. The original work, *Cyflor ra-Pherach*, "knop and flower," has been reprinted, in Hebrew, by Edelmann, Berlin, 1852. Other Itineraries of Jews have been translated and published by Carnoly (Brux. 1847), but they are of less value than the two already named.

6. Abulfeda. — The chief Moslem accounts of the Holy Land are those of Eirisi (cir. 1150), and Abulfeda (cir. 1300), translated under the titles of *Tubala Syriae*, and *Descr. Arabiae*. Extracts from these and from the great work of Yakoot are given by Schultens in an *Index Geographicus* appended to his edition of Bohæddin's *Life of Saladin*, folio, 1755. Yakoot has yet to be explored, and no doubt he contains a mass of valuable information.

7. Quaresmius. — *Terræ Sanctæ Elucidatio*, etc. Ant. 1639, 2 vols. folio. The work of a Latin monk who lived in the Holy Land for more than twelve years, and rose to be Principal and Commissary Apostolic of the country. It is divided into eight books: the first three, general dissertations; the remainder "peregrinations" through the Holy Land, with historical accounts, and identifications (often incorrect), and elaborate accounts of the Latin traditions attaching to each spot, and of the ecclesiastical establishments, military orders, etc. of the time. It has a copious index. Similar information is given by the Abbé Mislin (*Les Saints Lieux*, Paris, 1858, 3 vols. 8vo.); but with less elaboration than Quaresmius, and in too hostile a vein towards Lamartine and other travellers.

8. The great burst of modern travel in the Holy Land began with Seetzen and Burckhardt. Seetzen resided in Palestine from 1805 to 1807, during which time he travelled on both E. and W. of Jordan. He was the first to visit the Hauran, the Ghor, and the mountains of Ajlun: he travelled completely round the Dead Sea, besides exploring the east side a second time. As an experienced man of science, Seetzen was charged with collecting antiquities and natural objects for the Oriental Museum at Gotha; and his diaries contain inscriptions, and notices of flora and fauna, etc. They have been published in 3 vols., with a 4th vol. of notes (but without an index), by Kruse (Berlin, 1854-59). The Palestine journeys are contained in vols. 1 and 2. His Letters, founded on these diaries, and giving their results, are in *Zach's Monatl. Corresp.* vols. 17, 18, 26, 27.

9. Burckhardt. — *Travels in Syria and the Holy Land*, 4to, 1822. With the exception of an excursion of twelve days to Safed and Nazareth, Burckhardt's journeys S. of Damascus were confined to the east of the Jordan. These regions he explored and described more completely than Seetzen, or any later traveller till Wetzstein (1861), and even his researches do not extend over so wide an area. Burckhardt made two tours in the Hauran, in one of which he penetrated — first of Europeans — into the mysterious Ijea. The southern portions of the Transjordanic country he traversed in his journey from Damascus to Petra and Sinai. The fullness of the notes which he contrived to keep under the very difficult circumstances in which he travelled is

astonishing. They contain a multitude of inscriptions, long catalogues of names, plans of sites, etc. The strength of his memory is shown not only by these notes but by his constant references to books, from which he was completely cut off. His diaries are interspersed with lengthened accounts of the various districts, and the manners and customs, commerce, etc., of their inhabitants. Burckhardt's accuracy is universally praised. No doubt justly. But it should be remembered that on the E. of Jordan no means of testing him as yet exist; while in other places his descriptions have been found imperfect or at variance with facts. The volume contains an excellent preface by Colonel Leake, but is very defective from the want of an index. This is partially supplied in the German translation (Weimar, 1823-24, 2 vols. 8vo.), which has the advantage of having been edited and annotated by Gesenius.

10. Irby and Mangles. — *Travels in Egypt and Nubia, Syria and the Holy Land* (in 1817-18). Hardly worth special notice except for the portions which relate their route on the east of Jordan, especially about Kerek and the country of Moab and Ammon, which are very well told, and with an air of simple faithfulness. These portions are contained in chapters vi. and viii. The work is published in the *Home and Col. Library*, 1847.

11. Robinson. — (1.) *Biblical Researches in Palestine*, etc., in 1838: 1st ed. 1841, 3 vols. 8vo.; 2d ed. 1856, 2 vols. 8vo. (2.) *Later Bib. Res. in 1852*, 8vo, 1856. Dr. Robinson's is the most important work on the Holy Land since Reland. His knowledge of the subject and its literature is very great, his common sense excellent, his qualifications as an investigator and a describer remarkable. He had the rare advantage of being accompanied on both occasions by Dr. Eli Smith, long resident in Syria, and perfectly versed in both classical and vernacular Arabic. Thus he was enabled to identify a host of ancient sites, which are mostly discussed at great length, and with full references to the authorities. The drawbacks to his work are a want of knowledge of architectural art, and a certain dogmatism, which occasionally passes into contempt for those who differ with him. He too uniformly disregards tradition, an extreme folly as bad as its opposite in a country like the East.

The first edition has a most valuable Appendix, containing lists of the Arabic names of modern places in the country, which in the second edition are omitted. Both series are furnished with indexes, but those of Geography and Antiquities might be extended with advantage.

\* *Physical Geography of the Holy Land*, by Edward Robinson (Boston, 1865, pp. xvi., 394). This is a posthumous work, but eminently worthy of the author's reputation. At the outset he points out our best sources of a knowledge of sacred geography. The book seems not to have obtained the general recognition which it deserves. H.

12. Wilson. — *The Lands of the Bible visited*, etc., 1847, 2 vols. 8vo. Dr. Wilson traversed the Holy Land twice, but without going out of the usual routes. He paid much attention to the topography, and keeps a constant eye on the reports of his predecessor Dr. Robinson. His book cannot be neglected with safety by any student of the coun-

<sup>a</sup> For examples of this see Robinson, *Bibl. Res.* in 323, 408, 478, 494. Stanley, *Sinai & Pal.* pp. 61, 72

try; but it is chiefly valuable for its careful and detailed accounts of the religious bodies of the East, especially the Jews and Samaritans. His Indian labors having accustomed him to Arabic, he was able to converse freely with all the people he met, and his inquiries were generally made in the direction just named. His notice of the Samaritans is unusually full and accurate, and illustrated by copies and translations of documents and information not elsewhere given.

\* Bonar and McCheyne's *Narrative of a Mission to the Jews in Palestine* (Edinb. 1852), often reprinted, continues to be one of the best sources of information on this subject. H.

13. Schwarz. — *A Descriptive Geography, etc., of Palestine*, Philad. 1850. 8vo. A translation of a work originally published in Hebrew (*Sepher Tebuchth*, Jerusalem, 5605, A. D. 1845) by Rabbi Joseph Schwarz. Taking as his basis the catalogues of Joshua, Chronicles, etc., and the numerous topographical notices of the Rabbinical books, he proceeds systematically through the country, suggesting identifications, and often giving curious and valuable information. The American translation is almost useless for want of an index. This is in some measure supplied in the German version, *Das heilige Land*, etc., Frankfurt a. M. 1852.

14. De Sauley. — *Voyage autour de la Mer Morte*, etc., 1853, 2 vols. 8vo, with *Atlas of Maps and Plates*, lists of Plants and Insects. Interesting rather than the unusual route taken by the author, the boldness of his theories, and the atlas of admirably engraved maps and plates which accompanies the text, than for its own merits. Like many French works, it has no index. Translated: *Narrative of a Journey*, etc., 2 vols. 8vo, 1854. See *The Dead Sea*, by Rev. A. A. Isaacs, 1857. Also a valuable Letter by "A Pilgrim," in the *Athenæum*, Sept. 9, 1854.

\* De Sauley has also published: *Voyage en Terre Sainte*, 2 vols., Paris, 1865, 8vo, with maps and wood-cuts. *Les derniers jours de Jérusalem*, Paris, 1866, 8vo, with views, plans, and a map of the Holy City. These works are regarded as more valuable than his earlier volumes. A.

15. Lynch. — *Official Report of the United States Expedition to explore the Dead Sea and the Jordan*, 4to, Baltimore, 1852. Contains the daily Report of the Expedition, and separate Reports on the Ornithology, Botany, and Geology. The last of these Reports is more particularly described at pp. 2303, 2304.

\* L. Vignes. — *Extrait des Notes d'un Voyage d'exploration à la Mer Morte, dans le Wady Arabah*, etc. (Paris, 1865). H.

16. Stanley. — *Sinai and Palestine*, 1853 (6th ed. 1866), 8vo. Professor Stanley's work differs from those of his predecessors. Like them he made a lengthened journey in the country, is intimately acquainted with all the authorities, ancient and modern, and has himself made some of the most brilliant identifications of the historical sites. But his great object seems to have been not so much to make fresh discoveries, as to apply those already made, the structure of the country and the peculiarities of the scenery, to the elucidation of the history. This he has done with a power and a delicacy truly remarkable. To the sentiment and eloquence of Lanartine, the genial freshness of Miss Martineau, and the sound judgment of Robinson, he adds a reverent appreciation of the subject, ac-

care for the smallest details of the picture, which no one else has yet displayed, and which render his descriptions a most valuable commentary on the Bible narrative. The work contains an Appendix on the Topographical Terms of the Bible, of importance to students of the English version of the Scriptures.

See also a paper on "Sacred Geography" by Professor Stanley in the *Quarterly Review*, No. clxxxviii.

\* For valuable monographic sketches, see Rozein's art. *Dis Thal u. die Umgegend Hebrons*, in *Zeitsch. der D. M. Gesellschaft*, xii. 477-513, and Pastor Valentiner's *Beitrag zur Topographie des Stammes Benjamin*, *ibid.* xii. 161 ff.

The *Bibliotheca Sinaitica* (vols. i.-xxvi., 1844-1869) is particularly rich in articles on Biblical geography in Palestine and other parts of the East. The July number for 1869 (pp. 541-71) contains a valuable paper on Mount Lebanon by Dr. Laurik, founded in part on his own personal observations. H.

17. Tobler. — *Bethlehem, 1849: Topographie von Jerusalem u. seine Umgebungen*, 1854. These works are models of patient industry and research. They contain everything that has been said by everybody on the subject, and are truly valuable storehouses for those who are unable to refer to the originals. His *Dritte Wanderung*, 8vo, 1859, describes a district but little known, namely, part of Philistia and the country between Hebron and Ramleh, and thus possesses, in addition to the merits above named, that of novelty. It contains a sketch-map of the latter district, which corrects former maps in some important points.

\* Dr. Tobler made a fourth journey to Palestine in 1865. His main object was to revisit Nazareth and collect materials for a special history of that place. But owing to cholera there, he was compelled to give up that purpose, and after a hurried visit to Jerusalem, returned to Europe. For the results of this journey see his *Nazareth in Palästina* (Berlin, 1866), described in note c, p. 2072 (Amer. ed.). H.

18. Van de Velde. — *Syria and Palestine*, 2 vols. 8vo, 1854. Contains the narrative of the author's journeys while engaged in preparing his large *Map of the Holy Land* (1858), the best map yet published [Deutsche Ausgabe, nach d. 2<sup>e</sup> Aufl. d. "Map of the Holy Land," Gotha, 1868, considerably improved]. A condensed edition of this work, omitting the purely personal details too frequently introduced, would be useful. Van de Velde's *Memoir*, 8vo, 1858, gives elevations, latitudes and longitudes, routes, and much very excellent information. His *Pays d'Israel* [Paris, 1857-58], 100 colored lithographs from original sketches, are accurate and admirably executed, and many of the views are unique.

19. Ritter. — *Die Vergleichende Erdkunde*, etc. The six volumes of Ritter's great geographical work which relate to the peninsula of Sinai, the Holy Land, and Syria, and form together *Band viii.* They may be conveniently designated by the following names, which the writer has adopted in his other articles: 1. Sinai. 2. Jordan. 3. Syria (Index). 4. Palestine. 5. Lebanon. 6. Damascus (Index).

\* The parts of this great work relating to the Sinaitic Peninsula and Palestine proper have been condensed and translated, with brief additions, by

William L. Gage, 4 vols. 8vo (London and New York, 1866). H.

20. Of more recent works the following may be noticed: Porter, *Five Years in Damascus, the Hauran, etc.*, 2 vols. 8vo, 1855; *Handbook for Syria and Palestine*, 1858 [new ed., 2 vols., 1868]. Bonar, *The Land of Promise*, 1858. Thomson, *The Land and the Book*, 1859. The fruit of twenty-five years' residence in the Holy Land, by a shrewd and intelligent observer. Wetzein, *Reisebericht über Hauran und die beiden Truchosen*, 1860, with wood-cuts, a plate of inscriptions, and a map of the district by Kiepert. The first attempt at a real exploration of those extraordinary regions east of the Jordan, which were partially visited by Burekhardt, and recently by Cyril Graham (*Cambridge Essays*, 1858: *Trans. R. S. Lit.* 1850, etc.). [Mr. Porter has given the results of his exploration of this region, in his *Giant Cities of Bishan* (1866). — H.] Drew, *Scripture Land in Connection with their History*, 1860.

Two works by ladies claim especial notice. *Egyptian Sepulchres and Syrian Shrines*, by Miss E. A. Beaufort, 2 vols. 1861. The 2d vol. contains the record of six months' travel and residence in the Holy Land, and is full of keen and delicate observation, caught with the eye of an artist, and characteristically recorded. *Domestic Life in Palestine*, by Miss Rogers (1862), is, what its name purports, an account of a visit of several years to the Holy Land, during which, owing to her brother's position, the author had opportunities of seeing at leisure the interiors of many unsophisticated Arab and Jewish households, in places out of the ordinary track, such as few Englishwomen ever before enjoyed, and certainly none have recorded. These she has described with great skill and fidelity, and with an abstinence from descriptions of matters out of her proper path or at second-hand which is truly admirable.

It still remains, however, for some one to do for Syria what Mr. Lane has so faultlessly accomplished for Egypt, the more to be desired because the time is fast passing, and Syria is becoming every day more deserted by the West.

\* Other recent works: — C. Furrer, *Wanderungen durch Palästina*, Zürich, 1863. ("Much that is new and fresh." — Tobler.) H. B. Tristram, *The Land of Israel; a Journal of Travels in Palestine, undertaken with special reference to its Physical Character*, Lond. 1865; 2d ed. 1866. (Valuable.) E. Arnaud, *La Palestine ancienne et moderne, ou géographie hist. et physique de la Terre Sainte. Avec 3 cart. chrono-lithogr.* Paris et Strasb. 1868. C. P. Caspari, *Chronol. geogr. Einleitung in das Leben Jesu Christi. Nebst vier Karten u. Plänen*, Hamb. 1869. N. C. Burt, *The Land and its Story; or the Sacred Historical Geogr. of Palestine*, N. Y. 1869. In the two following important works by learned Jews, a comparatively untrodden field is explored: J. Derenbourg, *Essai sur l'hist. et la géog. de la Palestine, d'après les Thalmins et les autres sources rabbiniques*, 1<sup>o</sup> partie, Paris, 1867; and A. Neubauer, *La géographie du Taloud; mémoire couronné par l'Acad. des Inscr. et Belles-Lettres*, Paris, 1868. A.

Views. — Two extensive collections of Views of the Holy Land exist — those of Bartlett and of Roberts. Pictorially beautiful as these plates are, they are not so useful to the student as the very accurate views of William Tipping, Esq. (published

in Traill's *Josephus*), some of which have been inserted in the article JERUSALEM. There are some instructive views taken from photographs, in the last edition of Keith's *Land of Israel*. Photographs have been published by Frith, Robertson, Rev. G. W. Bridges, and others. Photographs have also been taken by Salzmann, whose plates are accompanied by a treatise, *Jerusalem, Etude*, etc. (Paris, 1856).

\* Those of Mr. Frith (see above) are sixty in number, and are superbly executed (on cards of 12 inches by 15). They embrace views of places and antiquities in Egypt and Idumæa, as well as in Palestine. A large and splendid collection of photographs accompanies the *Ordnance Survey of Jerusalem*. They furnish a panoramic view of the city and its environs (Olivet, Gethsemane, Valley of Jehoshaphat, etc.), a view of important sections of the city walls, and the walls of the Mosque of Omar, of the principal modern edifices, of numerous ancient monuments, etc. etc. The Palestine Exploration Fund has published numerous photographs of places, ruins, and scenery in the Holy Land (numbering 343). H.

Maps. — Mr. Van de Velde's map, already mentioned, has superseded all its predecessors; but much still remains to be done in districts out of the track usually pursued by travellers. On the east of Jordan, Kiepert's map (in Wetzein's *Hauran*) is as yet the only trustworthy document. The new Admiralty surveys of the coast are understood to be rapidly approaching completion, and will leave nothing to be desired.

\* The best collection of maps for the geography of Palestine, both ancient and modern, is no doubt the *Bible Atlas of Maps and Plans*, by Samuel Clark, M. A. (Lond. 1858), published by the Society for Promoting Christian Knowledge. It contains an Index compiled by Mr. Grove, representing all the instances of the occurrence "of any geographical name in the English version of the O. and N. Testaments and the Apocrypha, with its original in Hebrew or Greek, and the modern name of its site, whether known or only conjectured. In all cases, what may be regarded as certain is distinguished from what is uncertain." It contains also important dissertations and notes on questions relating to the identification of places and points of archaeology, history, and exegesis.

Dr. Theodor Menke, *Bibel-Atlas in 8 Blättern* (Gotha, 1868). Similar to the preceding, but less complete. In addition to other points, it illustrates especially the topography of Jerusalem in the light of recent discoveries. Prominence is given to the ethnography of the ante-Hebrew nations or races. It is a great convenience that the author distinguishes rivers and *Wadies* from each other by different signs on the map.

The large wall *Map of Palestine and other parts of Syria*, by H. S. Osborn, LL. D. and Lyman Coleman, D. D., Philad. [1868?], 6 ft. by 9, is well adapted to its purpose. There is a good relief map of Palestine by H. W. Altmüller, *Das Heilige Land u. der Libanon in plastischer Darstellung nach den neuesten Forschungen*, Cassel, 1860. A *Reliefplan von Jerusalem* was also published by Altmüller in 1859; "improved and corrected by Conrad Schick," Cassel, 1865. H.

Of works on Jerusalem the following may be named: —

Williams. — *The Holy City*: 2d ed., 2 vols. 8vo 1849. Contains a detailed history of Jerusalem

1. account of the modern town, and an essay on the architectural history of the Church of the Sepulchre by Professor Willis. Mr. Williams in most if not all cases supports tradition.

Barclay. — *The City of the Great King*: Philad. 1858. An account of Jerusalem as it was, is, and will be. Dr. B. had some peculiar opportunities of investigating the subterranean passages of the city and the Haram area, and his book contains many valuable notices. His large map of *Jerusalem and Environs*, though badly engraved, is accurate and useful, giving the form of the ground very well.

Fergusson. — *The Ancient Topography of Jerusalem*, etc., 1847, with 7 plates. Treats of the Temple and the walls of ancient Jerusalem, and the site of the Holy Sepulchre, and is full of the most original and ingenious views, expressed in the boldest language. From architectural arguments the author maintains the so-called Mosque of Omar to be the real Holy Sepulchre. He also shows that the Temple, instead of occupying the whole of the Haram area, was confined to its southwestern corner. His arguments have never been answered or even fairly discussed. The remarks of some of his critics are, however, dealt with by Mr. F. in a pamphlet, *Notes on the Site of the Holy Sepulchre*, 1861. See also vol. ii. of this Dictionary, pp. 1311-1330.

\* See especially Dr. Wolcott's elaborate examination of Mr. Fergusson's theory, under the head "Topography of the City," vol. ii., pp. 1330-1337, Amer. ed. H.

Thrupp. — *Ancient Jerusalem, a new Investigation*, etc., 1855.

\* We should recall the reader's attention here to the *Ordinance Survey of Jerusalem* (Lond. 1865), and Lieut. Warren's *Reports*, etc., in the service of the Exploration Fund, detailing his labors and discoveries in and around the Holy City. H.

A good *resumé* of the controversy on the Holy Sepulchre is given in the *Museum of Classical Antiquities*, No. viii., and Suppl.

\* *The Holy Sepulchre, and the Royal Temple at Jerusalem*, two lectures before the Royal Institution, 1862 and 1865, by James Fergusson. He maintains here, of course, his peculiar views on the points in question. H.

Maps. — Besides Dr. Barclay's, already mentioned, Mr. Van de Velde has published a very clear and correct map (1858). So also has Signor Pierotti (1861). The latter contains a great deal of information, and shows plans of the churches, etc., in the neighborhood of the city. G.

**PALLU** (פַּלְלוּ) [*distinguished, eminent*]: פֶּאללוּס; [in Num., פֶּאללוּ: *Phallu*]. The second son of Reuben, father of Eliab and founder of the family of the PALLUITES (Ex. vi. 14; Num. xxvi. 5, 8; 1 Chr. v. 3). In the A. V. of Gen. lvi. 9, he is called PHALLU, and Josephus appears to identify him with Peleth in Num. xvi. 1, whom he calls פֶּאללוּס. [See ON.]

**PALLUITES, THE** (פַּלְלוּיִתִּים) [patr. see above]: δ פֶּאלλουί; [Vat.] Alex. δ פֶּאלλουεί: *Phalluite*. The descendants of Pallu the son of Reuben (Num. xxvi. 5).

\* **PALM**. [HAND; PALM-TREE.]

\* **PALMCRIST** (in the margin of Jon. iv. 6, A. V.). [GOURD.]

**PALMER-WORM** (פַּלְמֵר־זֶמֶן; *gázám*: κέρμη: *eruca*) occurs Joel i. 4, ii. 25; Am. iv. 9. Bochart (*Hieroz.* iii. 253) has endeavored to show that *gázám* denotes some species of locust; it has already been shown that the ten Hebrew names to which Bochart assigns the meaning of different kinds of locusts cannot possibly apply to so many, as not more than two or three destructive species of locust are known in the Bible Lands. [LOCUST; CATERPILLAR.] The derivation of the Hebrew word from a root which means "to cut off," is as applicable to several kinds of insects, whether in their perfect or larva condition, as it is to a locust; accordingly we prefer to follow the LXX. and Vulg., which are consistent with each other in the rendering of the Hebrew word in the three passages where it is found. The κέρμη of Aristotle (*Anim. Hist.* ii. 17, 4, 5, 6) evidently denotes a caterpillar, so called from its "bending itself" up (κέρμα) to move, as the caterpillars called geometric, or else from the habit some caterpillars have of "coiling" themselves up when handled. The *Eruci* of the Vulg. is the κέρμη of the Greeks, as is evident from the express assertion of Columella (*De Re Rust.* xi. 3, 68, *Script. R. R.* ed. Schneider). The Chaldee and Syriac understand some locust larva by the Hebrew word. Oedmann (*Vern. Samn.* fasc. ii. c. vi. p. 116) is of the same opinion. Tychsen (*Comment. de locustis*, etc., p. 88) identifies the *gázám* with the *Gryllus cristatus*, Lin., a South African species. Michaelis (*Suppl.* p. 220) follows the LXX. and Vulg. We cannot agree with Mr. Denham (*Kitto's Cycl. art.* "Locust") that the depredations ascribed to the *gázám* in Amos better agree with the characteristics of the locust than of a caterpillar, of which various kinds are occasionally the cause of much damage to fruit-trees, the fig and the olive, etc. [JOEL.] W. H.

**PALM-TREE** (פַּלְמָה; *pholmē*). Under this generic term many species are botanically included; but we have here only to do with the Date-palm, the *Phoenix dactylifera* of Linnaeus. It grew very abundantly (more abundantly than now) in many parts of the Levant. On this subject generally it is enough to refer to Ritter's monograph ("Ueber die geographische Verbreitung der Dattelpalme") in his *Erlkunde*, and also published separately.

While this tree was abundant generally in the Levant, it was regarded by the ancients as peculiarly characteristic of Palestine and the neighboring regions. (Συρία, ὅπου φοίνικες ἢ καρποφόροι, Xen. *Cyrop.* vi. 2, § 22. Judaea inelyta est palmis, Plin. *H. N.* xiii. 4. Palmētis [Judæis] proccrta et decor, Tac. *Hist.* v. 6. Compare Strabo xvii. pp. 800, 818; Theophrast. *Hist. Plant.* ii. 8; Paus. ix. 19, § 5). The following places may be enumerated from the Bible as having some connection with the palm-tree, either in the derivation of the name, or in the mention of the tree as growing on the spot.

(1.) At ELIM, one of the stations of the Israelites between Egypt and Sinai, it is expressly stated that there were "twelve wells (fountains) of water, and threescore and ten palm-trees" (Ex. xv. 27, Num. xxxiii. 9). The word "fountains" of the latter passage is more correct than the "wells" of the former: it is more in harmony, too, with the habits of the tree; for, as Theophrastus says (*l. c.*),

the palm ἐπι(στει) μᾶλλον τὸ ναματιαῖον ὄδωρ. There are still palm-trees and fountains in *Wady Ghirraulet*, which is generally identified with Elin (Rob. *Bibl. Res.* i. 69).

(2.) Next, it should be observed that ELATU (Deut. ii. 8; 1 K. ix. 26; 2 K. xiv. 22, xvi. 6; 2 Chr. viii. 17, xxvi. 2) is another plural form of the same word, and may likewise mean "the palm-trees." See Prof. Stanley's remarks (*S. of P.* pp. 20, 84, 519), and compare Remond (*Palest.* p. 930). This place was in Edom (probably *Akiba*); and we are reminded here of the "Idumæe palmæ" of Virgil (*Georg.* iii. 12) and Martial (x. 50).

(3.) No place in Scripture is so closely associated with the subject before us as JERICHO. Its rich palm-groves are connected with two very different periods — with that of Moses and Joshua on the one hand, and that of the Evangelists on the other. As to the former, the mention of "Jericho, the city of palm-trees" (Deut. xxxiv. 3), gives a peculiar vividness to the Lawgiver's last view from Pisgah: and even after the narrative of the conquest, we have the children of the Kenite, Moses' father-in-law, again associated with "the city of palm-trees" (Judg. i. 16). So Jericho is described in the account of the Moabite invasion after the death of Othniel (Judg. iii. 13); and, long after, we find the same phrase applied to it in the reign of Ahaz (2 Chr. xxviii. 15). What the extent of these palm-groves may have been in the desolate period of Jericho we cannot tell; but they were renowned in the time of the Gospels and Josephus. The Jewish historian mentions the luxuriance of these trees again and again; not only in allusion to the time of Moses (*Ant.* iv. 6, § 1), but in the account of the Roman campaign under Pompey (*Ant.* xiv. 4, § 1; *B. J.* i. 6, § 6), the proceedings of Antony and Cleopatra (*Ant.* xv. 4, § 2), and the war of Vespasian (*B. J.* iv. 8, §§ 2, 3). Herod the Great did much for Jericho, and took great interest in its palm-groves. Hence Horace's "Herodis palmata pinguis" (*Ep.* ii. 2, 184), which seems almost to have been a proverbial expression. Nor is this the only heathen testimony to the same fact. Strabo describes this immediate neighborhood as *πλεονάδων τῶ φόνικι, ἐπὶ μήκους σταδίων ἑκατόν* (xvi. 763), and Pliny says, "Hiericuntæ palmæ cœsantur" (*H. N.* v. 14), and adds elsewhere that, while palm-trees grow well in other parts in Judea, "Hiericunte maxime" (xiii. 4). See also Galen, *De Aliment. facult.* ii., and Justin. xxxvi. 3. Shaw (*Trav.* p. 371, folio) speaks of several of these trees still remaining at Jericho in his time.

(4.) The name of HAZEZON-TAMAR, "the felling of the palm-tree," is clear in its derivation. This place is mentioned in the history both of Abraham (Gen. xiv. 7) and of Jehoshaphat (2 Chr. xx. 2). In the second of these passages it is expressly identified with En-gedi, which was on the western edge of the Dead Sea; and here we can adduce, as a valuable illustration of what is before us, the language of the Apocrypha, "I was exalted like a palm-tree in En-gaddi" (Ecclus. xxiv. 14). Here again, too, we can quote alike Josephus *Ἰγγενῶτα ἐν αὐτῇ φόνιξ ὁ κάλλιστος*, *Ant.* ix. i. § 2) and Pliny (*Engadla oppidum secundum ab Hierosolymis, fertilitate palmetorumque nemoribus*, *H. N.* v. 17).

(5.) Another place having the same element in its name, and doubtless the same characteristic in

its scenery, was ΒΑΛΙ-ΤΑΜΑΡ (Judg. xx. 33), the *Βηθσαμάρ* of Eusebius. Its position was near Gibeath of Benjamin: and it could not be far from Deborah's famous palm-tree (Judg. iv. 5); if indeed it was not identical with it, as is suggested by Stanley (*S. of P.* p. 146).

(6.) We must next mention the TAMAR, "the palm," which is set before us in the vision of Ezekiel (xliv. 19, xlviii. 28) as a point from which the southern border of the land is to be measured eastwards and westwards. Robinson identifies it with the *Θαμαρό* of Ptolemy (v. 16), and thinks its site may be at *el-Milh* (between Hebron and *Wah Musa*) (*Bibl. Res.* ii. 198, 202). It seems from Jerome to have been in his day a Roman fortress.

(7.) There is little doubt that Solomon's TAMMOR, afterwards the famous Palmyra, on another desert frontier far to the N. E. of Tamar, is primarily the same word; and that, as Gibbon says (*Decline and Fall*, ii. 38), "the name, by its signification in the Syriac as well as in the Latin language, denoted the multitude of palm-trees which afforded shade and verdure to that temperate region." In fact, while the undoubted reading in 2 Chr. viii. 4 is תַּמְרוֹר, the best text in 1 K. ix. 18 is תַּמָּר. See Joseph. *Ant.* viii. 6, § 1. The springs which he mentions there make the palm-trees almost a matter of course.

(8.) Nor again are the places of the N. T. without their associations with this characteristic tree of Palestine. BETHANY means "the house of dates;" and thus we are reminded that the palm grew in the neighborhood of the Mount of Olives. This helps our realization of our Saviour's entry into Jerusalem, when the people "took branches of palm-trees and went forth to meet Him" (John xii. 13). This again carries our thoughts backwards to the time when the Feast of Tabernacles was first kept after the Captivity, when the proclamation was given that they should "go forth unto the mount and fetch palm-branches" (Neh. viii. 15) — the only branches, it may be observed (those of the willow excepted), which are specified by name in the original institution of the festival (Lev. xxiii. 40). From this Gospel incident comes *Palm Sunday* (Dominica in Ramis Palmarum), which is observed with much ceremony in some countries where true palms can be had. Even in northern latitudes (in Yorkshire, for instance) the country people use a substitute which comes into flower just before Easter: —

"And willow branches hallow,  
That they palmes do use to call."

(9.) The word Phœnicia (Φοινίκη), which occurs twice in the N. T. (Acts xi. 19, xv. 3), is in all probability derived from the Greek word (φόνιξ) for a palm. Sidonius mentions palms as a product of Phœnicia (*Panegy. Majorian.* p. 44). See also Plin. *H. N.* xiii. 4; Athen. i. 21. Thus we may imagine the same natural objects in connection with St. Paul's journeys along the coast to the north of Palestine, as with the wanderings of the Israelites through the desert on the south.

(10.) Lastly, Phoenix in the island of Crete, the harbor which St. Paul was prevented by the storm from reaching (Acts xxvii. 12), has doubtless the same derivation. Both Theophrastus and Pliny say that palm-trees are indigenous in this island. See Hoeck's *Kreta*, i. 38, 388. [PHENICE.]

From the passages where there is a literal refer

mice to the palm-tree, we may pass to the emblematical uses of it in Scripture. Under this head may be classed the following:—

(1.) The striking appearance of the tree, its uprightness and beauty, would naturally suggest the giving of its name occasionally to women. As we find in the *Odysey* (vi. 163) Nausicaa, the daughter of Alcinoüs, compared to a palm, so in Cant. vii. 7 we have the same comparison: "Thy stature is like to a palm-tree." In the O. T. three women named Tamar are mentioned: Judah's daughter-in-law (Gen. xxxviii. 6), Absalom's sister (2 Sam. xiii. 1), and Absalom's daughter (2 Sam. xiv. 27). The beauty of the two last is expressly mentioned.

(2.) We have notices of the employment of this form in decorative art, both in the real Temple of Solomon and in the visionary temple of Ezekiel. In the former case we are told (2 Chr. iii. 5) of this decoration in general terms, and elsewhere more specifically that it was applied to the walls (1 K. vi. 29), to the doors (vi. 32, 35), and to the "bases" (vii. 36). So in the prophet's vision we

Palm-Tree. (*Phœnix dactylifera*.)

find palm-trees on the posts of the gates (Ez. xl. 16, 22, 26, 31, 34, 37), and also on the walls and the doors (xli. 18–20, 25, 26). This work seems whether it had any symbolical meanings. It was a natural and doubtless customary kind of ornamentation in eastern architecture. Thus we are told by Herodotus (ii. 169) of the hall of a temple at Sais in Egypt, which was *ἡρακλεμένη στέλοισι φοινίκας τὰ δένδρεα μεμυημένοισι*: and we are familiar now with the same sort of decoration in Assyrian buildings (Layard's *Nineveh and its Remains*, ii. 137, 396, 401). The image of such rigid and motionless forms may possibly have been before the mind of Jeremiah when he said of the idols of the heathen (x. 4, 5), "They fasten it with nails and with hammers, that it move not: they are upright as the palm-tree, but speak not."

(3.) With a tree so abundant in Judæa, and so

marked in its growth and appearance, as the palm, it seems rather remarkable that it does not appear more frequently in the imagery of the O. T. There is, however, in the Psalms (xcii. 12) the familiar comparison, "The righteous shall flourish like the palm tree," which suggests a world of illustration, whether respect be had to the orderly and regular aspect of the tree, its fruitfulness, the perpetual greenness of its foliage, or the height at which the foliage grows, as far as possible from earth and as near as possible to heaven. Perhaps no point is more worthy of mention, if we wish to pursue the comparison, than the elasticity of the fibre of the palm, and its determined growth upwards, even when loaded with weights ("nititur in pondus palma"). Such particulars of resemblance to the righteous man were variously dwelt on by the early Christian writers. Some instances are given by Celsius in his *Hierobotanicon* (Upsal 1747), ii. 522–547. One, which he does not give, is worthy of quotation: "Well is the life of the righteous likened to a palm, in that the palm below is rough to the touch, and in a manner enveloped in dry bark, but above it is adorned with fruit, fair even to the eye; below, it is compressed by the enfoldings of its bark; above, it is spread out in amplitude of beautiful greenness. For so is the life of the elect, despised below, beautiful above. Down below it is, as it were, enfolded in many barks, in that it is straitened by innumerable afflictions; but on high it is expanded into a foliage, as it were, of beautiful greenness by the amplitude of the rewarding" (St. Gregory, *Mor. on Job* xix. 49).

(4.) The passage in Rev. vii. 9, where the glories of all nations are described as "clothed with white robes and palms in their hands," might seem to us a purely classical image, drawn (like many of St. Paul's images) from the Greek games, the victors in which carried palms in their hands. But we seem to trace here a Jewish element also, when we consider three passages in the Apocrypha. In 1 Macc. xiii. 51, Simon Maccabæus, after the surrender of the tower at Jerusalem, is described as entering it with music and thanksgiving "and branches of palm-trees." In 2 Macc. x. 7, it is said that when Judas Maccabæus had recovered the Temple and the city "they bare branches and palms, and sang psalms also unto Him that had given them good success." In 2 Macc. xiv. 4, Demetrius is presented "with a crown of gold and a palm." Here we see the palm-branches used by Jews in token of victory and peace. (Such indeed is the case in the Gospel narrative, *Jcân* xii. 13.)

There is a fourth passage in the Apocrypha, as commonly published in English, which approximates closely to the imagery of the Apocalypse. "I asked the angel, What are these? He answered and said unto me, These be they which have put off the mortal clothing, and now they are crowned and receive palms. Then said I unto the angel, What young person is it that croweth them and giveth them palms in their hands? So he answered and said unto me, It is the Son of God, whom they have confessed in the world" (2 Esdr. ii. 44–47). This is clearly the approximation not of anticipation, but of an imitator. Whatever may be determined concerning the date of the rest of the book, this portion of it is clearly subsequent to the Christian era. [ESDRAS. THE SECOND BOOK OF.]

As to the industrial and domestic uses of the palm, it is well known that they are very numerous; but there is no clear allusion to them in the Bible. That the ancient Orientals, however, made use of wine and honey obtained from the palm-tree is evident from Herodotus (i. 193, ii. 86), Strabo (xvi. ch. 14, ed. Kranz.), and Pliny (*H. N.* xiii. 4). It is indeed possible that the honey mentioned in some places may be palm-sugar. (In 2 Chr. xxxi. 5 the margin has "dates.") There may also in Cant. vii. 2, "I will go up to the palm-tree, I will take hold of the boughs thereof," be a reference to climbing for the fruit. The LXX. have ἀναβήσομαι ἐν τῷ φοίνικι, κρατήσω τῶν ὑψέων αὐτοῦ. So in ii. 3 and elsewhere (e. g. Ps. i. 3) the fruit of the palm may be intended: but this cannot be proved.<sup>a</sup> [SUGAR; WINE.]

Group of Dates.

It is curious that this tree, once so abundant in Judæa, is now comparatively rare, except in the Philistine plain, and in the old Phœnicia about *Beyrout*. A few years ago there was just one palm-tree at Jericho: but that is now gone.<sup>b</sup> Old trunks are washed up in the Dead Sea. It would almost seem as though we might take the history of this tree in Palestine as emblematical of that of the people whose home was once in that land. The well-known coin of Vespasian representing the palm-tree with the legend "Judæa capta," is figured in vol. ii. p. 1308. J. S. II.

<sup>a</sup> The palm-tree being dioecious—that is to say, the stamens and pistils (male and female parts) being on different trees—it is evident that no edible fruit can be produced unless fertilization is effected either by insects or by some artificial means. That the mode of impregnating the female plant with the pollen of the male (ἀνανθήσειον τὸν φοίνικα) was known to the ancients, is evident from Theophrastus (*H. P.* ii. 9), and Herodotus, who states that the Babylonians adopted a similar plan. The modern Arabs of Barbery, Persia, etc., take care to hang clusters of male flowers on female trees. The ancient Egyptians probably did the same. A cake of preserved dates was

PALSU. [MEDICINE, p. 1866 b.]

PALTI (פַּלְתִּי) [*deliverance of Jehoshaphat* Ges.]: פּאָלְטִי [Vat. -טֵי]: *Phalti*. The son of Raphu; a Benjamite who was one of the twelve spies (Num. xiii. 9).

PAL'TIEL (פַּלְתִּיֶּל) [*deliverance of God*] פּאָלְטִיֶּל [Vat. -טֵי]: *Phaltiel*. The son of Azzan and prince of the tribe of Issachar (Num. xxxiv. 26). He was one of the twelve appointed to divide the land of Canaan among the tribes west of Jordan.

PAL'TITE, THE (פַּלְתִּיֶּתִי) [patr. from *Phalti*]: δ Κελαθί [Vat. -θῆι]: Alex. ο φελλαυεῖ de *Phalti*. Helez "the Paltite" is named in 2 Sam. xxiii. 26 among David's mighty men. In 1 Chr. xi. 27, he is called "the Pelonite," and such seems to have been the reading followed by the Alex. MS. in 2 Sam. The Peshito-Syriac, however, supports the Hebrew, "Cholots of Pelat." But in 1 Chr. xxvii. 10, "Helez the Pelonite" of the tribe of Ephraim is again mentioned as captain of 24,000 men of David's army for the seventh month, and the balance of evidence therefore inclines to "Pelonite" as the true reading. The variation arose from a confusion between the letters ו and ו. In the Syriac of 1 Chr. both readings are combined, and Helez is described as "of Paltōn."

PAMPHYLIA (Παμφυλία), one of the coast-regions in the south of Asia Minor, having CILICIA on the east, and LYCIA on the west. It seems in early times to have been less considerable than either of these contiguous districts; for in the Persian war, while Cilicia contributed a hundred ships and Lycia fifty, Pamphylia sent only thirty (Herod. vii. 91, 92). The name probably then embraced little more than the crescent of comparatively level ground between Taurus and the sea. To the north, along the heights of Taurus itself, was the region of PISIDIA. The Roman organization of the country, however, gave a wider range to the term Pamphylia. In St. Paul's time it was not only a regular province, but the Emperor Claudius had united Lycia with it (Dio Cass. ix. 17), and probably also a good part of Pisidia. However, in the N. T., the three terms are used as distinct. It was in Pamphylia that St. Paul first entered Asia Minor, after preaching the Gospel in Cyprus. He and Barnabas sailed up the river Cestrus to PERGA (Acts xiii. 13). Here they were abandoned by their sub-ordinate companion John-Mark; a circumstance which is alluded to again with much feeling, and with a pointed mention of the place where the separation occurred (Acts xv. 38).<sup>c</sup> It might be the pain of this separation which induced Paul and Barnabas to leave Perga

found by Sir G. Wilkinson at Thebes (ii. 151, ed. 1854). It is certainly curious there is no distinct mention of dates in the Bible, though we cannot doubt that the ancient Hebrews used the fruit, and were probably acquainted with the art of fertilizing the flowers of the female plant.

<sup>b</sup> Mr. Tristram now informs us that this is not strictly the case. "We discovered one wild palm of considerable size, with a clump of young ones around it, on the edge of the stream, a little below the modern village" (*Nat. Hist. of the Bible*, p. 382). H.

<sup>c</sup> The Greek (ἀποστάνα ἀν' αὐτῶν), as De Wette remarks on Acts xv. 38, implies that Mark was culpable

without delay. They did however preach the Gospel there on their return from the interior (Acts xiv. 24, 25). We may conclude, from Acts ii. 10, that there were many Jews in the province; and possibly Perga had a synagogue. The two missionaries finally left Pamphylia by its chief seaport, ATTALIA. We do not know that St. Paul was ever in this district again: but many years afterwards he sailed near its coast, passing through "the sea of Cilicia and Pamphylia" on his way to a town of Lycia (Acts xxvii. 5). We notice here the accurate order of these geographical terms, as in the above-mentioned land journey we observe how Pisidia and Pamphylia occur in their true relations, both in going and returning (εἰς Πέργην τῆς Παμφυλίας . . . ἀπὸ τῆς Πέργης εἰς Ἀντιοχείαν τῆς Πισιδίας, xiii. 13, 14; διελεύσαντες τὴν Πισιδίαν ἦλθον εἰς Παμφυλίαν, xiv. 24).

J. S. H.

PAN. Of the six words<sup>a</sup> so rendered in A. V., two, *machbath* and *mis'êth*, seem to imply a shallow pan or plate, such as is used by Bedouins and Syrians for baking or dressing rapidly their cakes of meal, such as were used in legal oblations: the others, especially *shûr*, a deeper vessel or cauldron for boiling meat, placed during the process on three stones (Burckhardt, *Notes on Bed.* i. 58; Niebuhr, *Descr. de l'Arab.* p. 46; Lane, *Mod. Egypt.* i. 181). [CALDRON] H. W. P.

PANNAG (פַּנָּג), an article of commerce exported from Palestine to Tyre (Ez. xxvii. 17), the nature of which is a pure matter of conjecture, as the term occurs nowhere else. In comparing the passage in Ezekiel with Gen. xliii. 11, where the most valued productions of Palestine are enumerated, the omission of tragacanth and ladanum (A. V. "spices and myrrh") in the former is very observable, and leads to the supposition that pannag represents some of the spices grown in that country. The LXX., in rendering it *καρία*, favors this opinion, though it is evident that cassia cannot be the particular spice intended (see ver. 19). Hitzig observes that a similar term occurs in Sanskrit (*pannaga*) for an aromatic plant. The Syriac version, on the other hand, understands by it "millet" (*panicum milivaceum*); and this view is favored by the expression in the book of Sohar, quoted by Gesenius (*s. v.*), which speaks of "bread of pannag;" though this again is not decisive, for the pannag may equally well have been some flavoring substance, as seems to be implied in the doubtful equivalent<sup>b</sup> given in the Targum.

PAPER. [WRITING.]

\* PAPER-REEDS. "The *paper-reeds* by

the brooks" (Is. xix. 7, A. V.) is probably a mis-translation for "the *meadows* by the river" (i. e. the Nile). So, substantially, Gesenius, Fürst, De Wette, Knobel, Ewald. [REED, 3.] A.

PAPHOS (Πάφος), a town at the west end of CYPRUS, connected by a road with SALAMIS at the east end. Paul and Barnabas travelled, on their first missionary expedition, "through the isle," from the latter place to the former (Acts xiii. 6).

What took place at Paphos was briefly as follows. The two missionaries found SERGIUS PAULUS, the proconsul of the island, residing here, and were enabled to produce a considerable effect on his intelligent and candid mind. This influence was resisted by ELYMAS (or Bar-Jesus), one of those oriental "sorcerers," whose mischievous power was so great at this period, even among the educated classes. Miraculous sanction was given to the Apostles, and Elymas was struck with blindness. The proconsul's faith having been thus confirmed, and doubtless a Christian Church having been founded in Paphos, Barnabas and Saul crossed over to the continent and landed in PAMPHYLIA (ver. 13). It is observable that it is at this point that the latter becomes the more prominent of the two, and that his name henceforward is Paul, and not Saul (Σαῦλος, ὁ καὶ Παῦλος, ver. 9). How far this was connected with the proconsul's name, must be discussed elsewhere.

The great characteristic of Paphos was the worship of Aphrodite or Venus, who was here fabled to have risen from the sea (Hom. *Oi.* viii. 362). Her temple, however, was at "Old Paphos," now called *Kuklia*. The harbor and the chief town were at "New Paphos," at some little distance. The place is still called *Biffa*. The road between the two was often filled with gay and profligate processions (Strabo, xiv. p. 683); strangers came constantly to visit the shrine (Athen. xv. 18); and the hold which these local superstitions had upon the higher minds at this very period is well exemplified by the pilgrimage of Titus (Tac. *Hist.* ii. 2, 3) shortly before the Jewish war.

For notices of such scanty remains as are found at Paphos we must refer to Pococke (*Desc. of the East*, ii. 325-328), and especially Ross (*Reisen nach Kos, Hildesburghausen, Rhodus u. Cyprus*, pp. 180-192). Extracts also are given in *Life and Expp. of St. Paul* (2d ed. i. 190, 191), from the MS. notes of Captain Graves, R. N., who recently surveyed the island of Cyprus. For all that relates to the harbor the Admiralty Chart should be consulted.

PAPYRUS. [REED.]

PARABLE (פַּרְבֵּל, *mâshâl*: παραβολή; pa

ble in thus leaving his associates. Yet it is pleasing to know that the estrangement was only temporary; for Mark became subsequently Paul's fellow-traveller (Col. iv. 10), and is commended by him as eminently *assui* in the ministry (2 Tim. iv. 11). H.

a 1. פַּיִר, or פִּיר; λέβης ὁ μέγας; *lebes* (1 Sam. i. 14); elsewhere "laver" and "hearth," i. e. a brazier or pan for fire (Zech. xii. 6).

2. פַּחַבַּת, from פָּחַת, "bake" (Ges. p. 444); *ψήγανον*; *sartago* (Lev. ii. 5), where it follows פַּרְחֵיטָה, *εσχάρα*, *craticula*, "frying-pan," and is therefore distinct from it.

3. מִשְׁתָּה; *τήγανον*; "a baking-pan" (2 Sam. ciii. 9), Ges. p. 1343.

4. פִּיר; λέβης; *olla*; from פִּיר, "boil," joined (2 K. iv. 38) with *gêdôlâh*, "great," i. e. the great kettle or cauldron.

5. פִּרְרִיר; *χύτρα*; *olla*.

6. פַּחְחֹת, plur. λέβητες; *olla* (2 Chr. xxxv. 13) In Prov. xix. 24 "dish."

7. קוּלֵיטָה.

*rubata*). The distinction between the Parable and one cogmate form of teaching has been discussed under FABLE. Something remains to be said (1) as to the word, (2) as to the Parables of the Gospels, (3) as to the laws of their interpretation.

1. The word *παραβολή* does not of itself imply a narrative. The juxtaposition of two things, differing in most points, but agreeing in some, is sufficient to bring the comparison thus produced within the etymology of the word. The *παραβολή* of Greek rhetoric need not be more than the simplest argument from analogy. "You would not choose pilots or athletes by lot; why then should you choose statesmen?" (Aristot. *Rhet.* ii. 20). In Hellenistic Greek, however, it acquired a wider meaning, coexistent with that of the Hebrew *mashal*, for which the LXX. writers, with hardly an exception, make it the equivalent.<sup>a</sup> That word (= *similitude*), as was natural in the language of a people who had never reduced rhetoric to an art, had a large range of application, and was applied sometimes to the shortest proverbs (1 Sam. x. 12, xxiv. 13; 2 Chr. vii. 20), sometimes to dark prophetic utterances (Num. xxiii. 7, 18, xxiv. 3; Ez. xx. 49), sometimes to enigmatic maxims (Ps. lxxviii. 2; Prov. i. 6), or metaphors expanded into a narrative (Ez. xii. 22). In Ecclesiasticus the word occurs with a striking frequency, and, as will be seen hereafter, its use by the son of Sirach throws light on the position occupied by parables in Our Lord's teaching. In the N. T. itself the word is used with a like latitude. While attached most frequently to the illustrations which have given it a special meaning, it is also applied to a short saying like, "Physician, heal thyself" (Luke iv. 23), to a mere comparison without a narrative (Matt. xxiv. 32), to the figurative character of the Levitical ordinances (Heb. ix. 9), or of single facts in patriarchal history (Heb. xi. 19).<sup>b</sup> The later history of the word is not without interest. Naturalized in Latin, chiefly through the Vulgate or earlier versions, it loses gradually the original idea of figurative speech, and is used for speech of any kind. Mediaeval Latin gives us the strange form of *parabolare*, and the descendants of the technical Greek word in the Romance languages are *parler*, *parole*, *parola*, *palabras* (Diez, *Roman. Wörterb.* s. v. "Parola").

II. As a form of teaching, the Parable, as has been shown, differs from the Fable, (1) in excluding brute or inanimate creatures passing out of the laws of their nature, and speaking or acting like men, (2) in its higher ethical significance. It differs, it may be added, from the Mythus, in being the result of a conscious deliberate choice, not the growth of an unconscious realism, personifying attributes, appearing, no one knows how, in popular belief. It differs from the Allegory, in that the latter, with its direct personification of ideas or attributes, and the names which designate them, involves really no comparison. The virtues and vices of mankind appear, as in a drama, in their own

character and costume. The allegory is *self-interpreting*. The parable demands attention, insight, sometimes an actual explanation. It differs lastly from the Proverb, in that it must include a similitude of some kind, while the proverb may assert, without a similitude, some wide generalization of experience. So far as proverbs go beyond this, and state what they affirm in a figurative form, they may be described as condensed parables, and parables as expanded proverbs (comp. Trench on *Parables*, ch. i.; and Grotius on *Matt.* xiii.).

To understand the relation of the parables of the Gospels to our Lord's teaching, we must go back to the use made of them by previous or contemporary teachers. We have sufficient evidence that they were frequently employed by them. They appear frequently in the Gemara and Midrash (comp. Lightfoot, *Hor. Heb. in Matt.* xiii. 3; Jost, *Judenthum*, ii. 216), and are ascribed to Hillel, Shammai, and other great Rabbis of the two preceding centuries.<sup>c</sup> The panegyric passed upon the great Rabbi Meir, that after his death men ceased to speak parables, implies that, up to that time, there had been a succession of teachers more or less distinguished for them (*Sota*, fol. 49, in Jost, *Judenthum*, ii. 87; Lightfoot, *l. c.*). Later Jewish writers have seen in this employment of parables a condescension to the ignorance of the great mass of mankind, who cannot be taught otherwise. For them, as for women or children, parables are the natural and fit method of instruction (Maimonides, *Porta Mosis*, p. 84, in Wetstein, on *Matt.* xiii.), and the same view is taken by Jerome as accounting for the common use of parables in Syria and Palestine (Hieron. in *Matt.* xviii. 23). It may be questioned, however, whether this represents the use made of them by the Rabbis of our Lord's time. The language of the Son of Sirach confines them to the scribe who devotes himself to study. They are at once his glory and his reward (*Eclus.* xxxix. 2, 3). Of all who eat bread by the sweat of their brow, of the great mass of men in cities and country, it is written that "they shall not be found where parables are spoken" (*Ibid.* xxxviii. 33). For these therefore it is probable that the scribes and teachers of the law had simply rules and precepts, often perhaps burdensome and oppressive (*Matt.* xxiii. 3, 4), formulæ of prayer (*Luke* xi. 1), appointed times of fasting and hours of devotion (*Mark* ii. 18). They, with whom they would not even eat (comp. Wetstein and Lampe on *John* vii. 49), cared little to give even as much as this to the "people of the earth," whom they scorned as "knowing not the law," a brute herd for whom they could have no sympathy. For their own scholars they had, according to their individual character and power of thought, the casuistry with which the Mishna is for the most part filled, or the parables which here and there give tokens of some deeper insight. The parable was made the instrument for teaching the young disciple to discern the treasures of wisdom of which the "ac-

<sup>a</sup> The word *παροιμία* is used by the LXX. in *Prov.* i. 1, xxv. 1, xxvi. 7; *Eclus.* vi. 35, &c., and in some other passages by Symmachus. The same word, it will be remembered, is used throughout by St. John, instead of *παραβολή*.

<sup>b</sup> It should be mentioned that another meaning has been given by some interpreters to *παραβολή* in this passage, but, it is believed, on insufficient grounds.

<sup>c</sup> Some interesting examples of these may be seen

in Trench's *Parables*, ch. iv. Others, presenting some striking superficial resemblances to those of the Par of Great Price, the Laborers, the Lost Piece of Money, the Wise and Foolish Virgins, may be seen in Wetstein's notes to those parables. The conclusion from them is, that there was at least a generic resemblance between the outward form of our Lord's teaching and that of the Rabbis of Jerusalem.

raised" multitude were ignorant. The teaching of our Lord at the commencement of his ministry was, in every way, the opposite of this. The Sermon on the Mount may be taken as the type of the "words of Grace" which he spake, "not as the scribes." Beatitudes, laws, promises were uttered distinctly, not indeed without similitudes, but with similitudes that explained themselves. So for some months He taught in the synagogues and on the sea-shore of Galilee, as He had before taught in Jerusalem, and as yet without a parable. But then there comes a change. The direct teaching was met with scorn, unbelief, hardness, and He seems for a time to abandon it for that which took the form of parables. The question of the disciples (Matt. xiii. 10) implies that they were astonished. Their Master was no longer proclaiming the Gospel of the kingdom as before. He was falling back into one at least of the forms of Rabbinic teaching (comp. Schoettgen's *Hor. Heb.* ii. *Christus Rabbinorum Summus*). He was speaking to the multitude in the parables and dark sayings which the Rabbis reserved for their chosen disciples. Here for them were two grounds of wonder. Here, for us, is the key to the explanation which he gave, that He had chosen this form of teaching because the people were spiritually blind and deaf (Matt. xiii. 13), and in order that they might remain so (Mark. iv. 12). Two interpretations have been given of these words. (1.) Spiritual truths, it has been said, are in themselves hard and uninviting. Men needed to be won to them by that which was more attractive. The parable was an instrument of education for those who were children in age or character. For this reason it was chosen by the Divine teacher as fables and stories, "admiracula imbecillitatis" (Seneca, *Epist.* 59), have been chosen by human teachers (Chrysost. *Hom. in Johann.* 34). (2.) Others again have seen in this use of parables something of a penal character. Men have set themselves against the truth, and therefore it is hid from their eyes, presented to them in forms in which it is not easy for them to recognize it. To the inner circle of the chosen it is given to know the mysteries of the kingdom of God. To those who are without, all these things are done in parables. Neither view is wholly satisfactory. Each contains a partial truth. All experience shows (1) that parables do attract, and, when once understood, are sure to be remembered; (2) that men may listen to them and see that they have a meaning, and yet never care to ask what that meaning is. Their worth, as instruments of teaching, lies in their being at once a test of character, and in their presenting each form of character with that which, as a penalty or blessing, is adapted to it. They withdraw the light from those who love darkness. They protect the truth which they enshrine from the mockery of the scoffer. They leave something even with the careless which may be interpreted and understood afterwards. They reveal, on the other hand, the seekers after truth. These ask the meaning of the parable, will not rest till the teacher has explained it, are led step by step to the laws of interpretation, so that they can "understand all parables," and then pass on into the higher region in which parables are no longer necessary, but all

things are spoken plainly. In this way the parable did its work, found out the fit hearers and led them on. And it is to be remembered also that even after this self-imposed law of reserve and reticence, the teaching of Christ presented a marvellous contrast to the narrow exclusiveness of the scribes. The mode of education was changed, but the work of teaching or educating was not for a moment given up, and the aptest scholars were found in those whom the received system would have altogether shut out.

From the time indicated by Matt. xiii., accordingly, parables enter largely into our Lord's recorded teaching. Each parable of those which we read in the Gospels may have been repeated more than once with greater or less variation (as e. g. those of the Pounds and the Talents, Matt. xxv. 14; Luke xix. 12; of the Supper, in Matt. xxii. 2, and Luke xiv. 16). Everything leads us to believe that there were many others of which we have no record (Matt. xiii. 34; Mark iv. 33). In those which remain it is possible to trace something like an order.<sup>a</sup>

(A.) There is the group with which the new mode of teaching is ushered in, and which have for their subject the laws of the Divine Kingdom, its growth, its nature, its consummation. Under this head we have—

1. The Sower (Matt. xiii.; Mark iv.; Luke viii.).
2. The Wheat and the Tares (Matt. xiii.).
3. The Mustard-Seed (Matt. xiii.; Mark iv.).
4. The Seed cast into the Ground (Mark iv.).
5. The Leaven (Matt. xiii.).
6. The Hid Treasure (Matt. xiii.).
7. The Pearl of Great Price (Matt. xiii.).
8. The Net cast into the Sea (Matt. xiii.).

(B.) After this there is an interval of some months of which we know comparatively little. Either there was a return to the more direct teaching, or else these were repeated, or others like them spoken. When the next parables meet us they are of a different type and occupy a different position. They occur chiefly in the interval between the mission of the seventy and the last approach to Jerusalem. They are drawn from the life of men rather than from the world of nature. Often they occur, not, as in Matt. xiii., in discourses to the multitude, but in answers to the questions of the disciples or other inquirers. They are such as these:—

9. The Two Debtors (Luke vii.).
10. The Merciless Servant (Matt. xviii.).
11. The Good Samaritan (Luke x.).
12. The Friend at Midnight (Luke xi.).
13. The Rich Fool (Luke xii.).
14. The Wedding-Feast (Luke xiv.).
15. The Fig-Tree (Luke xiii.).
16. The Great Supper (Luke xiv.).
17. The Lost Sheep (Matt. xviii.; Luke xv.).
18. The Lost Piece of Money (Luke xv.).
19. The Prodigal Son (Luke xv.).
20. The Unjust Steward (Luke xvi.).
21. The Rich Man and Lazarus (Luke xvi.).
22. The Unjust Judge (Luke xviii.).
23. The Pharisee and the Publican (Luke xviii.).
24. The Laborers in the Vineyard (Matt. xx.).

(C.) Towards the close of our Lord's ministry,

<sup>a</sup> The number of parables in the Gospels will of course depend on the range given to the application of the name. Thus Mr. Greswell reckons twenty-

seven; Dean Trench, thirty. By others, the number has been extended to fifty.

immediately before and after the entry into Jerusalem, the parables assume a new character. They are again theocratic, but the phase of the Divine Kingdom, on which they chiefly dwell, is that of its final consummation. They are prophetic, in part, of the rejection of Israel, in part of the great retribution of the coming of the Lord. They are to the earlier parables what the prophecy of Matt. xxiv. is to the Sermon on the Mount. To this class we may refer —

25. The Pounds (Luke xix.).
26. The Two Sons (Matt. xxi.).
27. The Vineyard let out to Husbandmen (Matt. xxi.; Mark xii.; Luke xx.).
28. The Marriage-Feast (Matt. xxii.).
29. The Wise and Foolish Virgins (Matt. xxv.).
30. The Talents (Matt. xxv.).
31. The Sheep and the Goats (Matt. xxv.).

It is characteristic of the several Gospels that the greater part of the parables of the first and third groups belong to St. Matthew, emphatically the Evangelist of the kingdom. Those of the second are found for the most part in St. Luke. They are such as we might expect to meet with in the Gospel which dwells most on the sympathy of Christ for all men. St. Mark, as giving vivid recollections of the acts rather than the teaching of Christ, is the scantiest of the three synoptic Gospels. It is not less characteristic that there are no parables properly so called in St. John. It is as if he, sooner than any other, had passed into the higher stage of knowledge in which parables were no longer necessary, and therefore dwelt less on them. That which his spirit appropriated most readily were the words of eternal life, figurative it might be in form, abounding in bold analogies, but not in any single instance taking the form of a narrative.<sup>a</sup>

Lastly it is to be noticed, partly as a witness to the truth of the four Gospels, partly as a line of demarcation between them and all counterfeits, that the apocryphal Gospels contain no parables. Human invention could imagine miracles (though these too in the spurious Gospels are stripped of all that gives them majesty and significance), but the parables of the Gospels were inimitable and unapproachable by any writers of that or the succeeding age. They possess a life and power which stamp them as with the "image and superscription" of the Son of Man. Even the total absence of any allusion to them in the written or spoken teaching of the Apostles shows how little their minds set afterwards in that direction, how little likely they were to do more than testify what they had actually heard.<sup>b</sup>

III. Lastly, there is the law of interpretation. It has been urged by some writers, by none with greater force or clearness than by Chrysostom (*Hon. in Matt.* 64), that there is a scope or purpose for each parable, and that our aim must be to discern this, not to find a special significance in each circumstance or incident. The rest, it is said, may be dealt with as the drapery which the

parable needs for its grace and completeness, but which is not essential. It may be questioned, however, whether this canon of interpretation is likely to lead us to the full meaning of this portion of our Lord's teaching. True as it doubtless is, that there was in each parable a leading thought to be learnt partly from the parable itself, partly from the occasion of its utterance, and that all else gathers round that thought as a centre, it must be remembered that in the great patterns of interpretation which He himself has given us, there is more than this. Not only the sower and the seed and the several soils have their counterparts in the spiritual life, but the birds of the air, the thorns, the scorching heat, have each of them a significance. The explanation of the wheat and the tares, given with less fullness, an outline as it were, which the advancing scholars would be able to fill up, is equally specific. It may be inferred from these two instances that we are, at least, justified in looking for a meaning even in the seeming accessories of a parable. If the opposite mode of interpreting should seem likely to lead us, as it has led many, to strange and forced analogies, and an arbitrary dogmatism, the safeguard may be found in our recollecting that in assigning such meanings we are but as scholars guessing at the mind of a teacher whose words are higher than our thoughts, recognizing the analogies which may have been, but which were not necessarily those which he recognized. No such interpretation can claim anything like authority. The very form of the teaching makes it probable that there may be, in any case, more than one legitimate explanation. The outward fact in nature, or in social life, may correspond to spiritual facts at once in God's government of the world, and in the history of the individual soul. A parable may be at once ethical, and in the highest sense of the term prophetic. There is thus a wide field open to the discernment of the interpreter. There are also restraints upon the mere fertility of his imagination. (1.) The analogies must be real, not arbitrary. (2.) The parables are to be considered as parts of a whole, and the interpretation of one is not to override or encroach upon the lessons taught by others. (3.) The direct teaching of Christ presents the standard to which all our interpretations are to be referred, and by which they are to be measured. (Comp. Dean Trench *On the Parables*, Introductory Remarks; to which one who has once read it cannot but be more indebted than any mere references can indicate: Stier, *Words of the Lord Jesus, on Matt. xiii. 11.*)

<sup>a</sup> See an ingenious classification of the parables of each Gospel, according to their subject-matter, in Westcott, *Introduction to the Study of the Gospels*, ch. vii., and Appendix F.

<sup>b</sup> The existence of Rabbinic parables, presenting a superficial resemblance to those of the Gospel, is no real exception to this statement. Whether we believe them to have had an independent origin, and so to be

fair specimens of the *genus* of this form of teaching among the Jews, or to have been (as chronologically they might have been) borrowed, consciously or unconsciously, from those of Christ, there is still in the latter a distinctive power, and purity, which place the others almost beyond the range of comparison, except as to outward form.

**PARADISE** (פָּרַדֵּיז, *Parâdēs*: *παράδεισος*: *Paradisus*). Questions as to the nature and locality of Paradise as identical with the garden of Gen. ii. and iii. have been already discussed under EDEN. It remains to trace the history of the word and the associations connected with it, as it appears in the later books of the O. T. and in the language of Christ and His Apostles.

The word itself, though it appears in the above form in Cant. iv. 13, Eccl. ii. 5, Neh. ii. 8, may be lassed, with hardly a doubt, as of Aryan rather than of Semitic origin. It first appears in Greek as coming straight from Persia (*Xen. ut inf.*). Greek lexicographers classify it as a Persian word (Julius Pollux, *Onomast.* ix. 3). Modern philologists accept the same conclusion with hardly a dissentient voice (Renan, *Langues Sémitiques*, ii. 1, p. 153). Gesenius (s. v.) traces it a step further, and connects it with the Sanskrit *para-dēga* = high, well-tilled land, and applied to an ornamental garden attached to a house. Other Sanskrit scholars, however, assert that the meaning of *para-dēga* in

classical Sanskrit is "foreign country," and although they admit that it may also mean "the best or most excellent country," they look on this as an instance of casual coincidence rather than derivation.<sup>a</sup> Other etymologies, more fanciful and far-fetched, have been suggested — (1) from *parā* and *deśas*, giving as a meaning, the "well-watered ground" (Suidas, s. v.); (2) from *parā* and *deśasa*, a barbarous word, supposed to signify a plant, or collection of plants (Joann. Damasc. in Suidas, l. c.); (3) from פָּרַה דֶּשָׁא, to bring forth herbs;

(4) פָּרַה הָרֵם, to bring forth myrrh (Ludwig, *de raptu Pauli in Parad.* in Menthen's *Theosaur. Theolog.* p. 1702).

On the assumption that the Song of Solomon and Ecclesiastes were written in the time of Scythia, the occurrence of the foreign word may be accounted for either (1) on the hypothesis of later forms having crept into the text in the process of transcription, or (2) on that of the word having found its way into the language of Israel at the time when its civilization took a new flight under the Son of David, and the king borrowed from the customs of central Asia that which made the royal park or garden part of the glory of the kingdom. In Neh. ii. 8, as might be expected, the word is used in a connection which points it out as distinctly Persian. The account given of the hanging gardens of Babylon, in like manner, indicates Media as the original seat both of the word and of the thing. Nebuchadnezzar constructed them, terrace upon terrace, that he might reproduce in the plains of Mesopotamia the scenery with which the Median princess he had married had been familiar in her native country; and this was the origin of the *κρεμαστὸς παράδεισος* (Berosus, in Joseph. c. Ap. i. 19). In Xenophon the word occurs frequently, and we get vivid pictures of the scene which it implied. A wide open park, inclosed against injury, yet with its natural beauty unspoiled, with stately forest trees, many of them bearing fruit, watered by clear streams, on whose banks roved large herds of antelopes or sheep — this was the scenery which connected itself in the mind of the Greek traveller with the word *παράδεισος*, and for which his own language supplied no precise equivalent. (*Comp. Anab.* i. 2, § 7, 4, § 9; ii. 4, § 14; *Hellen.* iv. 1, § 15; *Cyrop.* i. 3, § 14; *Œconom.* 4, § 13.) Through the writings of Xenophon, and through the general admixture of orientalism in the later Greek after the conquests of Alexander, the word gained a recognized place, and the LXX. writers chose it for a new use which gave it a higher worth and secured for it a more perennial life. The garden of Eden became *ὁ παράδεισος τῆς τροφῆς* (Gen. ii. 15, iii. 23; Joel ii. 3). They used the same word whenever there was any allusion, however remote, to the fair region which had been the first blissful home of man. The valley of the Jordan, in their version, is the paradise of God (Gen. xiii. 10). There is no tree in the paradise of God equal to that which in the prophet's vision symbolizes the glory of Assyria (Ez. xxxi. 1-9). The imagery of this chapter furnishes a more vivid picture of the scenery of a *παράδεισος* than we find elsewhere. The prophet to whom "the word of the Lord came" by the river of Chebar may

<sup>a</sup> Professor Monier Williams allows the writer to say that he is of this opinion. Comp. also Busch-

mann, in Humboldt's *Cosmos*, ii. note 230, and Ersch u. Gruber, *Encyclop.* τ. v.

well have seen what he describes so clearly. Elsewhere, however, as in the translation of the three passages in which *parades* occurs in the Hebrew, it is used in a more general sense. (Comp. Is. i. 30; Num. xxiv. 6; Jer. xxix. 5; Susann. ver. 4.)

It was natural, however, that this higher meaning should become the exclusive one, and be associated with new thoughts. Paradise, with no other word to qualify it, was the bright region which man had lost, which was guarded by the flaming sword. Soon a new hope sprang up. Over and above all questions as to where the primeval garden had been, there came the belief that it did not belong entirely to the past. There was a paradise still into which man might hope to enter. It is a matter of some interest to ascertain with what associations the word was connected in the minds of the Jews of Palestine and other countries at the time of our Lord's teaching, what sense therefore we may attach to it in the writings of the N. T.

In this as in other instances we may distinguish three modes of thought, each with marked characteristics, yet often blended together in different proportions, and melting one into the other by hardly perceptible degrees. Each has its counterpart in the teaching of Christian theologians. The language of the N. T. stands apart from and above all. (1.) To the Idealist school of Alexandria, of which Philo is the representative, paradise was nothing more than a symbol and an allegory. Traces of this way of looking at it had appeared previously in the teaching of the Son of Sirach. The four rivers of Eden are figures of the wide streams of Wisdom, and she is as the brook which becomes a river and waters the Paradise of God (Ecclus. xxiv. 25-30). This, however, was compatible with the recognition of Gen. ii. as speaking of a fact. To Philo the thought of the fact was unendurable. The primeval history spoke of no garden such as men plant and water. Spiritual perfection (*ἀρετή*) was the only paradise. The trees that grew in it were the thoughts of the spiritual man. The fruits which they bore were life and knowledge and immortality. The four rivers flowing from one source are the four virtues of the later Platonists, each derived from the same source of goodness (Philo, *de Alleg.* i.). It is obvious that a system of interpretation such as this was not likely to become popular. It was confined to a single school, possibly to a single teacher. It has little or nothing corresponding to it in the N. T.

(2.) The Rabbinic schools of Palestine presented a phase of thought the very opposite of that of the Alexandrian writer. They had their descriptions, definite and detailed, a complete topography of the unseen world. Paradise, the garden of Eden, existed still, and they discussed the question of its locality. The answers were not always consistent with each other. It was far off in the distant East, further than the foot of man had trod. It was a region of the world of the dead, of Sheol, in the heart of the earth. Gehenna was on one side, with its flames and torments. Paradise on the other, the intermediate home of the blessed. (Comp. Wetstein, Grotius, and Schoettgen on *Luc.* xxiii.) The patriarchs were there, Abraham, and Isaac, and Jacob, ready to receive their faithful descendants into their bosoms (*Joseph. de Macc.* c. 13). The highest place of honor at the feast of the blessed souls was Abraham's bosom (*Luke* vi. 23), on which the new heir of immortality reclined as the favored and honored guest. Or,

again, paradise was neither on the earth, nor with it, but above it, in the third heaven, or in some higher orb. [HEAVEN.] Or there were two paradises, the upper and the lower — one in heaven, for those who had attained the heights of holiness — one in earth, for those who had lived but decently (Schoettgen, *Hor. Heb. in Apoc.* ii. 7), and the heavenly paradise was sixty times as large as the whole lower earth (Eisenmenger, *Entdeckt. Judenth.* ii. p. 297). Each had seven palaces, and in each palace were its appropriate dwellers (*ibid.* p. 302). As the righteous dead entered paradise, angels stripped them of their grave-clothes, arrayed them in new robes of glory, and placed on their heads diadems of gold and pearls (*ibid.* p. 310). There was no night there. Its pavement was of precious stones. Plants of healing power and wondrous fragrance grew on the banks of its streams (*ibid.* p. 313). From this lower paradise the souls of the dead rose on sabbaths and on feast-days to the higher (*ibid.* p. 318), where every day there was the presence of Jehovah holding council with His saints (*ibid.* p. 320). (Comp. also Schoettgen, *Hor. Heb. in Luc.* xxiii.)

(3.) Out of the discussions and theories of the Rabbis, there grew a broad popular belief, fixed in the hearts of men, accepted without discussion, blending with their best hopes. Their prayer for the dying or the dead was that his soul might rest in paradise, in the garden of Eden (Maimonides, *Porta Mosis*, quoted by Wetstein in *Luc.* xxiii.; Taylor, *Funeral Sermon on Sir G. Dalston*). The belief of the Essenes, as reported by Josephus (*B. J.* ii. 8, § 11), may be accepted as a fair representation of the thoughts of those who, like them, were not trained in the Rabbinical schools, living in a simple and more childlike faith. To them accordingly paradise was a far-off land, a region where there was no scorching heat, no consuming cold, where the soft west-wind from the ocean blew forevermore. The visions of the 2d book of Esdras, though not without an admixture of Christian thoughts and phrases, may be looked upon as representing this phase of feeling. There also we have the picture of a fair garden, streams of milk and honey, twelve trees laden with divers fruits, mighty mountains whereon grow lilies and roses (ii. 19) — a place into which the wicked shall not enter.

It is with this popular belief, rather than with that of either school of Jewish thought, that the language of the N. T. connects itself. In this, as in other instances, it is made the starting-point for an education which leads men to rise from it to higher thoughts. The old word is kept, and is raised to a new dignity or power. It is significant, indeed, that the word "paradise" nowhere occurs in the public teaching of our Lord, or in his intercourse with his own disciples. Connected as it had been with the thoughts of a sensuous happiness, it was not the fittest or the best word for those whom He was training to rise out of sensuous thoughts to the higher regions of the spiritual life. For them, accordingly, the kingdom of Heaven, the kingdom of God, are the words most dwelt on. The blessedness of the pure in heart is that they shall see God. If language borrowed from their common speech is used at other times, if they hear of the marriage-supper and the new wine, it is not till they have been taught to understand parables and to separate the figure from the reality. With the thief dying on the cross the case was different

We can assume nothing in the robber-outlaw, but the most rudimentary forms of popular belief. We may well believe that the word used here, and here only, in the whole course of the Gospel history, had a special fitness for him. His reverence, sympathy, repentance, hope, uttered themselves in the prayer, "Lord, remember me when thou comest into thy kingdom!" What were the thoughts of the sufferer as to that kingdom we do not know. Unless they were supernaturally raised above the level which the disciples had reached by slow and painful steps, they must have been mingled with visions of an earthly glory, of pomp, and victory, and triumph. The answer to his prayer gave him what he needed most, the assurance of immediate rest and peace. The word paradise spoke to him, as to other Jews, of repose, shelter, joy—the greatest contrast possible to the thirst, and agony, and shame of the hours upon the cross. Rudimentary as his previous thoughts of it might be, this was the word fittest for the education of his spirit.

There is a like significance in the general absence of the word from the language of the Epistles. Here also it is found nowhere in the direct teaching. It occurs only in passages that are apocalyptic, and therefore almost of necessity symbolic. St. Paul speaks of one, apparently of himself, as having been "caught up into paradise," as having there heard things that might not be uttered (2 Cor. xii. 4).<sup>a</sup> In the message to the first of the Seven Churches of Asia, "a tree of life which is in the midst of the paradise of God," appears as the reward of him that overcometh, the symbol of an eternal blessedness. (Comp. Dean French, *Comm. on the Epistles to the Seven Churches*, in loc.) The thing, though not the word, appears in the closing visions of Rev. xxii.

(4.) The eager curiosity which prompts men to press on into the things behind the veil, has led them to construct hypotheses more or less definite as to the intermediate state, and these have affected the thoughts which Christian writers have connected with the word paradise. Patristic and later interpreters follow, as has been noticed, in the footsteps of the Jewish schools. To Origen and others of a like spiritual insight, paradise is but a synonym for a region of life and immortality—one and the same with the third heaven (Jerome, *Ep. ad Joh. Hieros.* in Wordsworth on 2 Cor. xii.). So far as it is a place, it is as a school in which the souls of men are trained and learn to judge rightly of the things they have done and seen on earth (Origen, *de Princ.* ii. 12). The sermon of Basil, *le Paradiso*, gives an eloquent representation of the common belief of Christians who were neither mystical nor speculative. Minds at once logical and sensuous ask questions as to the locality, and he answers are wildly conjectural. It is not in

Hades, and is therefore different from Abraham's bosom (Tertull. *de Idol.* c. 13). It is above and beyond the world, separated from it by a wall of fire (Tertull. *Apol.* c. 47). It is the "refrigerium" for all faithful souls, where they have the vision of saints, and angels, and of Christ himself (Just. M. *Respons. ad Orthodox.* 75 and 85), or for those only who are entitled, as martyrs, fresh from the baptism of blood, to a special reward above their fellows (Tertull. *de Anim.* c. 55).<sup>b</sup> It is in the fourth heaven (Clem. Alex. *Fragm.* § 51). It is in some unknown region of the earth, where the seas and skies meet, higher than any earthly mountain (Joanni. Damasc. *de Orthod. Fid.* ii. 11), and had thus escaped the waters of the Flood (P. Lombard, *Senten.* ii. 17, E.). It has been identified with the *φωλακή* of 1 Pet. iii. 19, and the spirits in it are those of the antediluvian races who repented before the great destruction overtook them (Bishop Horsley, *Sermons*, xx.). (Comp. an elaborate note in Thilo, *Codex Apocryph.* N. T. p. 754.) The word enters largely, as might be expected, into the apocryphal literature of the early Church. Where the true Gospels are most reticent, the mythical are most exuberant. The Gospel of Nicodemus, in narrating Christ's victory over Hades (the "harrowing of hell" of our early English mysteries), tells how, till then, Enoch and Elijah had been its sole inhabitants—how the penitent robber was there with his cross on the night of the crucifixion—how the souls of the patriarchs were led thither by Christ, and were received by the archangel Michael, as he kept watch with the flaming swords at the gate. In the apocryphal *Acta Philippi* (Tischendorf, *Act. Apost.* p. 89), the Apostle is sentenced to remain for forty days outside the circle of paradise, because he had given way to anger and cursed the people of Hierapolis for their unbelief.

(5.) The later history of the word presents some facts of interest. Accepting in this, as in other instances, the mythical elements of eastern Christianity, the creed of Islam presented to its followers the hope of a sensuous paradise, and the Persian word was transplanted through it into the languages spoken by them.<sup>c</sup> In the West it passes through some strange transformations, and descends to baser uses. The thought that men on entering the Church of Christ returned to the blessedness which Adam had forfeited, was symbolized in the church architecture of the fourth century. The narthex, or *atrium*, in which were assembled those who, not being *fideles* in full communion, were not admitted into the interior of the building, was known as the "Paradise" of the church (Alt, *Cultus*, p. 591). Athanasius, it has been said, speaks scornfully of Arianism as creeping into this paradise,<sup>e</sup> implying that it addressed itself to the ignorant and untought. In the West

<sup>a</sup> For the questions (1) whether the *raptus* of St. Paul was corporeal or incorporeal, (2) whether the third heaven is to be identified with or distinguished from paradise, (3) whether this was the upper or the lower paradise of the Jewish schools, comp. Meyer, Wordsworth, Alford, in loc.; August. *de Gen. ad litt.* ii.; Ludwig, *Diss. de raptu Pauli*, in Menthen's *Thesaurus*. Interpreted by the current Jewish belief of the period, we may refer the "third heaven" to a vision of the Divine Glory; "paradise," to a vision of the fellowship of the righteous dead, waiting in calmness and peace for their final resurrection.

<sup>b</sup> A special treatise by Tertullian, *de Paradiso*, is unfortunately lost.

<sup>c</sup> One trace of this belief is found in the Vulg. of Eccles. xlv. 16, "transitus est in paradysum," in the absence of any corresponding word in the Greek text.

<sup>d</sup> Thus it occurs in the Koran in the form *fir'daus*; and the name of the Persian poet Ferdusi is probably derived from it (Humboldt's *Cosmos*, ii. note 230).

<sup>e</sup> The passage quoted by Alt is from *Orat. c. Arian. II.* (vol. i. p. 307, Colon. 1686): Καὶ βιάζεται πάλαι εἰσελαθεῖν εἰς τὸν παράδεισον τῆς ἐκκλησίας. Ingenious

we trace a change of form, and one singular change of application. Paradiso becomes in some Italian dialects Paraviso, and this passes into the French *parvis*,<sup>a</sup> denoting the western porch of a church, or the open space in front of it (Ducange, s. v. "Parvisus"; Diez, *Etymolog. Wörterb.* p. 703). In the church this space was occupied, as we have seen, by the lower classes of the people. The word was transferred from the place of worship to the place of amusement, and, though the position was entirely different, was applied to the highest and cheapest gallery of a French theatre (Alt, *Cultus*, l. c.). By some, however, this use of the word is connected only with the extreme height of the gallery, just as "chemin de Paradis" is a proverbial phrase for any specially arduous undertaking (Bechicelle, *Dictionnaire Français*). E. H. P.

\* On this subject see W. A. Alger's *Critical History of the Doctrine of a Future Life*, 4th ed. N. Y. 1866, and for the literature, the bibliographical Appendix to that work (comp. references in the Index of Subjects). A.

PARAH (פָּרָה), with the def. article [*the heifer*]: פָּרָה; Alex. Αφαρ: *Aphphura*, one of the cities in the territory allotted to Benjamin, named only in the lists of the conquest (Josh. xviii. 23). It occurs in the first of the two groups into which the towns of Benjamin are divided, which seems to contain those of the northern and eastern portions of the tribe, between Jericho, Bethel, and Geba; the towns of the south, from Gibeon to Jerusalem, being enumerated in the second group.

In the *Onomasticon* ("Aphra") it is specified by Jerome only — the text of Eusebius being wanting, — as five miles east of Bethel. No traces of the name have yet been found in that position; but the name *Fārah* exists further to the S. E. attached to the *Wady Fārah*, one of the southern branches of the great *Wady Suweinit*, and to a site of ruins at the junction of the same with the main valley.

This identification, first suggested by Dr. Robinson (i. 439), is supported by Van de Velde (*Memoir*, p. 339) and Schwarz (p. 126). The drawback mentioned by Dr. R., namely, that the Arabic word (= "mouse") differs in signification from the Hebrew ("the cow") is not of much force, since it is the habit of modern names to cling to similarity of sound with the ancient names, rather than of signification. (Compare *Beit-ur*; *el Aal*, etc.)

A view of *Wady Fārah* is given by Barclay (*City*, etc. p. 558), who proposes it for *ÆNON*. G.

\* PARALYTIC, HEALING OF THE. [House, vol. ii. p. 1104.]

PARAN, EL-PARAN (פָּרָן, לְפָרָן) [פָּרָן: פָּרָן, LXX. and Joseph.: [1 Sam. xxv. 1, Rom. Μαών, Vat. Maan: *Pharan*].

1 It is shown under KADESH that the name Paran corresponds probably in general outline with the desert *et-Tih*. The Sinaitic desert, including the widge of metamorphic rocks, granite, syenite, and

porphyry, set, as it were, in a superficial margin of old red sandstone, forms nearly a scalene triangle with its apex southwards, and having its base or upper edge not a straight, but concave crescent line — the ridge, in short, of the *et-Tih* range of mountains, extending about 120 miles from east to west, with a slight dip, the curve of the aforesaid crescent southwards. Speaking generally, the wilderness of Sinai (Num. x. 12, xii. 16), in which the march-stations of Taberah and Hazeroth, if the latter [HAZEROTH] be identical with *Hādherā*, are probably included towards its N. E. limit, may be said to lie S. of the *et-Tih* range, the wilderness of Paran N. of it, and the one to end where the other begins. That of Paran is a stretch of chalky formation, the chalk being covered with coarse gravel, mixed with black flint and drifting sand. The surface of this extensive desert tract is a slope ascending towards the north, and in it appear to rise (by Russegger's map, from which most of the previous description is taken) three chalky ridges, as it were, terraces of mountainous formation, all to the W. of a line drawn from *Res Mohammed* to *Kābit el-Arish* on the Mediterranean. The caravan-route from *Cairo* to *Akaba* crosses the *et-Tih* desert in a line from W. to E., a little S. In this wide tract, which extends northwards to join the "wilderness of Beer-sheba" (Gen. xxi. 21, cf. 14), and eastward probably to the wilderness of Zin [KADESH] on the Edomitish border, Ishmael dwelt, and there probably his posterity originally multiplied. Ascending northwards from it on a meridian to the E. of Beer-sheba, we should reach Maon and Carmel, or that southern portion of the territory of Judah, W. of the Dead Sea, known as "the South," where the waste changes gradually into an uninhabited pasture-land, at least in spring and autumn, and in which, under the name of "Paran," Nahal fed his flocks (1 Sam. xxv. 1). Between the wilderness of Paran and that of Zin no strict demarcation exists in the narrative, nor do the natural features of the region, so far as yet ascertained, yield a well-defined boundary. The name of Paran seems, as in the story of Ishmael, to have predominated towards the western extremity of the northern desert frontier of *et-Tih*, and in Num. xxxiv. 4 the wilderness of Zin, not Paran, is spoken of as the southern border of the land or of the tribe of Judah (Josh. xv. 3). If by the Paran region we understand "that great and terrible wilderness" so emphatically described as the haunt of noxious creatures and the terror of the wayfarer (Deut. i. 19, viii. 15), then we might see how the adjacent tracts, which still must be called "wilderness," might, either as having less repulsive features, or because they lay near to some settled country, have a special nomenclature of their own. For the latter reason the wildernesses of Zin, eastward towards Edom and Mount Seir, and of Shur, westward towards Egypt, might be thus distinguished: for the former reason that of Sin and Sinai. It would not be inconsistent with the rules of Scriptural nomenclature, if we suppose these accessory wilds to be sometimes included

<sup>a</sup> This conjecture is, it may be questioned whether the sarcasm which he finds in the words is not the creation of his own imagination. There seems no ground for referring the word paradise to any section of the Church, but rather to the Church as a whole (comp. August. *de Gen. ad litt.* xii.). The Arians were to it what the serpent had been to the earlier paradise.

<sup>a</sup> This word will be familiar to many readers from the "Responsiones in *Parriso*" of the Oxford system of examination, however little they may previously have connected that place with their thoughts of paradise. By others, however, Parvisum (or -sus) is derived "a parvis pueris ibi edoctis" (*Menage, Orig. de la Langue Franç.* s. v. "Parvis").

under the general name of "wilderness of Paran;" and to this extent we may perhaps modify the previous general statement that S. of the *et-Tih* range is the wilderness of Sinai, and N. of it that of Paran. Still, construed strictly, the wildernesses of Paran and Zin would seem to lie as already approximately laid down. [KADESH.] If, however, as previously hinted, they may in another view be regarded as overlapping, we can more easily understand how Chedorlaomer, when he "smote" the peoples S. of the Dead Sea, returned round its southwestern curve to the el-Paran, or "terebinth-tree of Paran," viewed as indicating a locality in connection with the wilderness of Paran, and yet close, apparently, to that Dead Sea border (Gen. xiv. 6).

Was there, then, a Paran proper, or definite spot to which the name was applied? From Deut. i. 1 it should seem there must have been. This is con-

firmed by 1 K. xi. 18, from which we further learn the fact of its being an inhabited region; and the position required by the context here is one between Midian and Egypt. If we are to reconcile these passages by the aid of the personal history of Moses, it seems certain that the local Midian of the Sinaitic peninsula must have lain near the Mount Horeb itself (Ex. iii. 1, xviii. 1-5). The site of the "Paran" of Hadad the Edomite must then have lain to the N. W. or Egyptian side of Horeb. This brings us, if we assume any principal mountain, except *Serbâla* of the whole Sinaitic group, to be "the Mount of God," so close to the *Wady Feiran* that the similarity of name,<sup>d</sup> supported by the recently expressed opinion of eminent geographers, may be taken as establishing substantial identity. Ritter (vcl. xiv. p. 740, 741) and Stanley (pp. 39-41) both consider that Rephidim is to be found in *Wady Feiran*, and n

Ruins of Feiran in Wady Feiran.

other place in the whole peninsula seems, from its local advantages, to have been so likely to form an *entrepôt* in Solomon's time between Edom and Egypt. Burckhardt (*Syria*, etc. p. 602) describes this wady as narrowing in one spot to 100 paces, and adds that the high mountains adjacent, and the thick woods which clothe it, contribute with the bad water to make it unhealthy, but that it is, for productiveness, the finest valley<sup>c</sup> in the whole peninsula, containing four miles of gardens and date-groves. Yet he thinks it was *not* the Paran of Scripture. Professor Stanley, on the contrary, seems to speak on this point with greater confidence in the affirmative than perhaps on any other question connected with the Exodus. See especially his remarks (39-41) regarding the local term "hill" of Ex. xvii. 9, 10, which he considers to

be satisfied by an eminence adjacent to the *Wady Feiran*. The vegetable mauna<sup>d</sup> of the tamarisk grows wild there (Seetzen, *Reisen*, iii. 75), as does the *colocynth*, etc. (Robinson, i. 121-124). What could have led Winer (s. v. "Paran") to place el-Paran near Elath, it is not easy to say, especially as he gives no authority.

2. "Mount" Paran occurs only in two poetic passages (Deut. xxxiii. 2; Hab. iii. 3), in one of which Sinai and Seir appear as local accessories, in the other Teman and (ver. 7) Cushan and Midian. We need hardly pause to inquire in what sense Seir can be brought into one local view with Sinai. It is clear from a third poetic passage, in which Paran does not appear (Judg. v. 4, 5), but which contains "Seir," more literally determined by "Edom," still in the same local connection with

<sup>a</sup> For the reasons why *Serbâla* should not be accepted, see SINAI.

<sup>b</sup> Gesen s. v. פָּרָן, says the wilderness so called, "between Midian and Egypt, bears this name at the present day." No maps now in use give any closer approximation to the ancient name than *Feiran*.

<sup>c</sup> Compare, however, the same traveller's statement of the claims of a coast wady at *Tir*, on the Gulf of Suze (Burckhardt, *Arab.* ii. 362; comp. Wellsted, ii. 9), "receiving all the waters which flow down from the higher range of Sinai to the sea." (Stanley, p. 19).

<sup>d</sup> The *Tamarix Gallica mannifera* of Ehrenberg, the *Tirfa* of the Arabs (Robinson, i. 115).

"Sinai," that the Hebrew found no difficulty in viewing the greater scenes of God's manifestation in the Exodus as historically and morally,<sup>a</sup> if not locally connected. At any rate Mount Parau here may with as good a right be claimed for the Sinaitic as for the Edomitish side of the difficulty. And the distance, after all, from Horeb to Mount Seir was probably one of ten days or less (Deut. i. 2). It is not unlikely that if the *Wady Feiran* be the Paran proper, the name "Mount" Paran may have been either assigned to the special member (the northwestern) of the Sinaitic mountain-group which lies adjacent to that wady,<sup>b</sup> or to the whole Sinaitic cluster. That special member is the five-peaked ridge of *Serbil*. If this view for the site of Paran is correct, the Israelites must have proceeded from their encampment by the sea (Num. xxxiii. 10), probably *Tayibeh* [WILDERNESS OF THE WANDERING], by the "middle" route of the three indicated by Stanley (pp. 38, 39).

H. H.

PARBAR (פַּרְבָּר, פַּרְבָּר), with the definite article [see below]: *διαδεχομένους: cellule*). A word occurring in Hebrew and A. V. only in 1 Chr. xxvi. 18, but there found twice: "At the Parbar westward four (Levites) at the causeway two at the Parbar." From this passage, and also from the context, it would seem that Parbar was some place on the west side of the Temple inclosure, the same side with the causeway and the gate Shallecheth. The latter was close to the causeway — perhaps on it as the *Bab Silsilus* now is — and we know from its remains that the causeway was at the extreme north of the western wall. Parbar therefore must have been south of Shallecheth.

As to the meaning of the name, the Rabbis generally agree<sup>d</sup> in translating it "the outside place;" while modern authorities take it as equivalent to the *parvarim* in 2 K. xxiii. 11 (A. V. "suburbs"), a word almost identical with *parbar*, and used by the early Jewish interpreters as the equivalent of *mirpashim*, the precincts (A. V. "suburbs") of the Levitical cities. Accepting this interpretation, there is no difficulty in identifying the Parbar with the suburb (τὸ πρόστειον) mentioned by Josephus in describing Herod's Temple (*Ant.* xv. 11, § 5), as lying in the deep valley which separated the west wall of the Temple from the city opposite it; in other words, the southern end of the Tyropæon, which intervenes between the Wailing Place and the (so-called) Zion. The two gates in the original wall were in Herod's Temple increased to four.

<sup>a</sup> The language in the three passages (Deut. xxxiii. 2; Hab. iii.; Judg. v. 4, 5) is as strikingly similar as is the purport and spirit of all the three. All describe a spiritual presence manifested by natural convulsions attendant; and all are confirmed by Ps. lxxvii. 7, 8, in which Sinai alone is named. We may almost regard this lofty rhapsody as a commonplace of the inspired song of triumph, in which the seer seems to "leave earth so far beneath him that the preciseness of geographic detail is lost to his view.

<sup>b</sup> Out of the *Wady Feiran*, in an easterly direction, runs the *Wady Shikih*, which conducts the traveller directly to the "modern Horeb." See Kiepert's map.

<sup>c</sup> What Hebrew word the LXX. read here is not clear.

<sup>d</sup> See the Targum of the passage; also Buxtorf, *Lez.*

It does not follow (as some have assumed) that Parbar was identical with the "suburbs" of 2 K. xxiii. 11, though the words denoting each may have the same signification. For it seems most consonant with probability to suppose that the "horses of the Sun" would be kept on the eastern side of the temple mount, in full view of the rising rays of the god as they shot over the Mount of Olives, and not in a deep valley on its western side.

Parbar is possibly an ancient Jebusite name, which perpetuated itself after the Israelite conquest of the city, as many a Danish and Saxon name has been perpetuated, and still exists, only slightly disguised, in the city of London. G.

\* PARCHED CORN. [RUTH, BOOK OF, Amer. ed.]

\* PARCHED GROUND. The Hebrew term (שָׂרָב, *sharab*) so rendered in Is. xxxv. 7 (A. V.) — "the parched ground shall become a pool" — is understood by the best scholars to denote the *mirage*, the Arabic name for which is *servab*. So Gesenius, First, De Wette, Hitzig, Knobel, Ewald, etc.; comp. Winer, *Bibl. Realwörterb.* art. "Sandmeer," and Thomson's *Land and Book*, ii. 287, 288. The phenomenon referred to is too well known to need description here. A.

PARCHMENT. [WRITING.]

\* PARLOR. A word in English usage meaning the common room of the family, and hence probably in A. V. denoting the king's audience-chamber, so used in reference to Eglon (Judg. iii. 20–25; Richardson, *Eng. Dict.*) [HOUSE, vol. ii. p. 1135.] H. W. P.

PARMASHTA (פַּרְמַשְׁתָּא) [*superior*, Sanskr., Ges.]: *Μαρμασιυά*; Alex. *Μαρμασιυα*: [FA. *Μαρμασιυ*:] *Phermesta*). One of the ten sons of Haman slain by the Jews in Shushan (Esth. ix. 9).

PARMENAS (*Παρμενᾶς* [prob. ε contraction of Parmenides, *steadfast*]). One of the seven deacons, "a man of honest report, full of the Holy Ghost and wisdom," selected by the whole body of the disciples to superintend the ministrations of their alms to the widows and necessitous poor. Parmenas is placed sixth on the list of those who were ordained by the laying on of the hands of the Apostles to this special function (Acts vi. 5). His name occurs but this once in Scripture; and ecclesiastical history records nothing of him save the tradition that he suffered martyrdom at Philippi in the reign of Trajan (Baron. ii. 55). In the

*Talm.* s. v. פַּרְבָּר; and the references in Lightfoot, *Prospect of Temple*, ch. v.

<sup>e</sup> Gesenius, *Thes.* p. 1123 a; Fürst, *Handub.* ii. 225 b, etc. Gesenius connects *parvarim* with a similar Persian word, meaning a building open on all sides to the sun and air.

<sup>f</sup> 1. פַּרְלֹר; ἀποθήκη; *cubiculum*; once only "parlor" in 1 Chr. xxviii. 11; elsewhere usually "chamber," a withdrawing room (Ges. p. 448).

2. פַּרְבֵּי; *κατάλυμα*; *triclinium*; usually "chamber."

3. פַּרְבֵּי, with art. in each instance where A. V. has "parlor;" τὸ ὑπερῶνον; *canaculum*; usually "chamber." It denotes an upper chamber in 2 Sam. xviii. 33, 2 K. xxiii. 12.

calendar of the Byzantine Church he and Prochorus are commemorated on July 28th.

E. H.—s.

**PAR'NACH** (פֶּרְנָחַי [swift or delicate, Ges.]: פֶּרְנָחַי: *Pharnach*). Father or ancestor of Elizaphan, prince of the tribe of Zebulun (Num. xxxiv. 25).

**PAR'OSH** (פֶּרְעֹשׁ [flea]: פֶּרְעֹשׁ, Alex. *φωρές* in Ezr. ii. 3; elsewhere *φόρος*: *Pharos*). The descendants of Parosh, in number 2,172, returned from Babylon with Zerubbabel (Ezr. ii. 3; Neh. vii. 8). Another detachment of 150 males, with Zechariah at their head, accompanied Ezra (Ezr. viii. 3 [where A. V. reads ΠΙΛΑΡΟΣΗ]). Seven of the family had married foreign wives (Ezr. x. 25). They assisted in the building of the wall of Jerusalem (Neh. iii. 25), and signed the covenant with Nehemiah (Neh. x. 14). In the last-quoted passage the name Parosh is clearly that of a family, and not of an individual.

**PARSHANDATHA** (פֶּרְשָׁנְדָּתָה [see below]: פֶּרְשָׁנְדָּתָה; Alex. *φαρσανδᾶς*; [Comp. *φαρσανδᾶδᾶ*]: *Pharsandath*). The eldest of Haman's ten sons who were slain by the Jews in Shushan (Esth. ix. 7). First (*Handub.*) renders it into old Persian *frashnādūta*, "given by prayer," and compares the proper name Παρσώνδης, which occurs in Diod. ii. 33.

**PARTHIAN** (Πάρθοι: *Parthi*) occurs only in Acts ii. 9, where it designates Jews settled in Parthia. Parthia Proper was the region stretching along the southern flank of the mountains which separate the great Persian desert from the desert of Kharezm. It lay south of Hyrcania, east of Media, and north of Sagartia. The country was pleasant, and fairly fertile, watered by a number of small streams flowing from the mountains, and absorbed after a longer or a shorter course by the sands. It is now known as the *Atik* or "skirt," and is still a valuable part of Persia, though supporting only a scanty population. In ancient times it seems to have been densely peopled; and the ruins of many large and apparently handsome cities attest its former prosperity. (See Fraser's *Khorassan*, p. 245.)

The ancient Parthians are called a "Scythic" race (Strab. xi. 9, § 2; Justin, xli. 1-4; Arrian, *Fr.* p. 1); and probably belonged to the great Turanian family. Various stories are told of their origin. Moses of Chorene calls them the descendants of Abraham by Keturah (*Hist. Armen.* ii. 65); while John of Malala relates that they were Scythians whom the Egyptian king Sesostris brought with him on his return from Scythia, and settled in a region of Persia (*Hist. Univ.* p. 26; compare Arrian, *l. s. c.*). Really, nothing is known of them till about the time of Darius Hystaspis, when they are found in the district which so long retained their name, and appear as faithful subjects of the Persian monarchs. We may fairly presume that they were added to the empire by Cyrus, about B. C. 550; for that monarch seems to have been the conqueror of all the northeastern provinces. Herodotus speaks of them as contained in the 16th satrapy of Darius, where they were joined with the Chorasians, the Sogdians, and the Arians, or people of Herat (*Herod.* iii. 93). He also mentions that they served in the army which Xerxes led into Greece, under the same leader as the Chorasians (vii. 66). They carried bows and

arrows, and short spears; but were not at this time held in much repute as soldiers. In the final struggle between the Greeks and Persians they remained faithful to the latter, serving at Arbela (*Arr. Exp. Alex.* iii. 8), but offering only a weak resistance to Alexander when, on his way to Bactria, he entered their country (*ibid.* 25). In the division of Alexander's dominions they fell to the share of Eumenes, and Parthia for some while was counted among the territories of the Seleucidæ. About B. C. 256, however, they ventured upon a revolt, and under Arsaces (whom Strabo calls "a king of the Dahæ," but who was more probably a native leader) they succeeded in establishing their independence. This was the beginning of the great Parthian empire, which may be regarded as rising out of the ruins of the Persian, and as taking its place during the centuries when the Roman power was at its height.

Parthia, in the mind of the writer of the Acts, would designate this empire, which extended from India to the Tigris, and from the Chorasian desert to the shores of the Southern Ocean. Hence the prominent position of the name Parthians in the list of those present at Pentecost. Parthia was a power almost rivaling Rome — the only existing power which had tried its strength again at Rome and not been worsted in the encounter. By the defeat and destruction of Crassus near Carrhæ (the Scriptural Harran) the Parthians acquired that character for military prowess which attaches to them in the best writers of the Roman classical period. (See *Hor. Od.* ii. 13; *Sat.* ii. 1, 15; *Virg. Georg.* iii. 31; *Ov. Art. Am.* i. 209, &c.) Their armies were composed of clouds of horsemen, who were all riders of extraordinary expertness; their chief weapon was the bow. They shot their arrows with wonderful precision while their horses were in full career, and were proverbially remarkable for the injury they inflicted with these weapons on an enemy who attempted to follow them in their flight. From the time of Crassus to that of Trajan they were an enemy whom Rome especially dreaded, and whose ravages she was content to repel without revenging. The warlike successor of Nerva had the boldness to attack them; and his expedition, which was well conceived and vigorously conducted, deprived them of a considerable portion of their territories. In the next reign, that of Hadrian, the Parthians recovered these losses; but their military strength was now upon the decline; and in A. D. 226, the last of the Arsacidæ was forced to yield his kingdom to the revolted Persians, who, under Artaxerxes, son of Sassan, succeeded in reëstablishing their empire. The Parthian dominion thus lasted for nearly five centuries, commencing in the third century before, and terminating in the third century after, our era.

It has already been stated that the Parthians were a Turanian race. Their success is to be regarded as the subversion of a tolerably advanced civilization by a comparative barbarism — the substitution of Tatar coarseness for Aryan polish and refinement. They aimed indeed at adopting the art and civilization of those whom they conquered; but their imitation was a poor travesty, and there is something ludicrously grotesque in most of their more ambitious efforts. At the same time, they occasionally exhibit a certain amount of skill and taste, more especially where they followed Greek models. Their architecture was better than their sculpture. The famous ruins of Ctesiphon have a

grandeur of effect which strikes every traveller; and the Parthian constructions at Akkerkuf, El Hamman, etc., are among the most remarkable of oriental remains. Nor was grandeur of general

Figure of Fame, surmounting the Arch at Tack-i-Bostan. (Sir R. K. Porter's *Travels*, vol. ii. fol. 62.)

effect the only merit of their buildings. There is sometimes a beauty and delicacy in their ornamentation which is almost worthy the Greeks. (For

Ornamentation of Arch at Tack-i-Bostan.

specimens of Parthian sculpture and architecture, see the *Travels* of Sir R. K. Porter, vol. i. plates 19-24; vol. ii. plates 62-66 and 82, &c. For the general history of the nation, see Heeren's *Manual of Ancient History*, pp. 229-305. Eng. Tr.; and the article PARTHIA in *Dict. of Gr. and Rom. Geography*.] [See also Rawlinson's *Ancient Monarchies*, iii. 42, and iv. 19.] G. R.

\* PARTITION, MIDDLE WALL OF, Eph. ii. 14. The Greek is τὸ μεσότοιχον τοῦ φραγμοῦ, and in the figure the "middle wall" formed the "partition," or more strictly "fence" (φραγμός), which before the coming of Christ separated Jews and Gentiles from each other, but which his death abolished, so as to bring all nations together on the same common ground as regards their participation in the blessings of the Gospel. Many interpreters find here an allusion to the row of marble pillars or screen which in Herod's Temple fenced off the court of the Gentiles from that of the Jews, on which, as Philo and Josephus state, was written in Latin and Greek: "No foreigner may go further on penalty of death" (see Kninoel, *Acta Apost.* p. 706; and Keil, *Bibl. Archæologie*, i. 142). Ellicott would admit a reference in this passage both to this middle wall and to the rending of the

a "Perdix enim nomen suum hebraicum שָׁרָף habet a *vocando*, que nomenclum eadem avis Germanis dicitur *Rephuhn* a *ripen*, i. e. *rufen*, vocare" (Rosenmüll. *Schol. in Jer.* xvii. 11). Mr. Tristram says that *koré* would be an admirable imitation of the call-note of *Caccabis saxatilis*.

vail at the moment when Christ died (Matt. xxvii. 51; Eph. ii. 14). "The Temple was, as it were, a material embodiment of the law, and in its very outward structure was a symbol of spiritual distinctions." Yet we cannot insist on this view as certain, by any means, for the language may well be figurative without its having any such local origin. Some commentators (see Wordsworth *ad loc.*) regard the metaphor as that of a vineyard, in which the people of God were fenced off from other nations.

It was Paul's introducing Trophimus (as the Jews falsely alleged) into the part of the Temple (εἰς τὸ ἱερόν) beyond the middle wall, between the courts of the Jews and of the Gentiles, which led to the tumult in which the Apostle came so near being killed by the mob (Acts xxi. 27-30). H.

PARTRIDGE (שָׁרָף, *koré*: *πέρδιξ*, *mektikópaξ*: *perdix*) occurs only 1 Sam. xxvi. 20, where David compares himself to a hunted *koré* upon the mountains, and in Jer. xvii. 11, where it is said, "As a *koré* sitteth on eggs, and hatcheth them not; so he that getteth riches, and not by right, shall leave them in the midst of his days, and at his end shall be a fool." The translation of *koré* by "partridge" is supported by many of the old versions, the Hebrew name, as is generally supposed, having reference to the "call" of the cock bird; compare the German *Rebhuhn* from *rufen*, "to call." a Bochart (*Hieroz.* ii. 632) has attempted to show that *koré* denotes some species of "snipe," or "woodcock" (*rusticola*?); he refers

*Ammoperdix Heyii*.

the Hebrew word to the Arabic *karria*, which he believes, but upon very insufficient ground, to be the name of some one of these birds. Oedmann (*Verm. Samm.* ii. 57) identifies the *karria* of Arabic writers with the *Merops apiaster* (the Bee-eater); this explanation has deservedly found favor with no commentators. What the *karria* of the Arabs may be we have been unable to determine; but the *koré* there can be no doubt denotes a partridge. The "hunting this bird upon the mountains" b (1 Sam. xxvi. 20) entirely agrees with the habits of two well-known species of partridge, namely, *Cac-*

b "The partridge of the mountains I suspect to be *Ammoperdix Heyii*, familiar as it must have been to David when he camped by the cave of Adullam—a bird more difficult by far to be induced to take wing than *C. saxatilis*" (H. B. Tristram).

*caccabis saxatilis* (the Greek partridge) and *Ammoperdix Heylii*. The specific name of the former is partly indicative of the localities it frequents, namely, rocky and hilly ground covered with brush-wood.

It will be seen by the marginal reading that the passage in Jeremiah may bear the following interpretation: As the *kôré* "gathereth young which she hath not brought forth." This rendering is supported by the LXX. and Vulg., and is that which Maurer (*Comment. in Jer.* l. c.), Rosenmüller (*Sch. in Jer.* l. c.), Gesenius (*Thes.* s. v.), Wüster (*Realwb.* "Rebhuhn"), and scholars generally, adopt. In order to meet the requirements of this latter interpretation, it has been asserted that the partridge is in the habit of stealing the eggs from the nests of its congeners and of sitting upon them, and that when the young are hatched they forsake their false parent; hence, it is said, the meaning of the simile: the man who has become rich by dishonest means loses his riches, as the fictitious partridge her stolen brood (see Jerome in *Jerem.* l. c.). It is perhaps almost needless to remark that this is a mere fable, in which, however, the ancient Orientals may have believed.

*Caccabis saxatilis.*

There is a passage in the Arabian naturalist Damiir, quoted by Bochart (*Hieroz.* ii. 638), which shows that in his time this opinion was held with regard to some kind of partridge.<sup>a</sup> The explanation of the rendering of the text of the A. V. is obviously as follows. Partridges were often "hunted" in ancient times as they are at present, either by hawking or by being driven from place to place till they become fatigued, when they are knocked down by the clubs or *zeruattys* of the Arabs (see Shaw's *Trav.* i. 425, 8vo.). Thus, nests were no doubt constantly disturbed, and many destroyed: as, therefore, is a partridge which is driven from her eggs, so is he that enricheth himself by unjust means — "he shall leave them in the midst of his days."<sup>b</sup> The expression in Ecclus. xi. 30, "like as a partridge taken (and kept) in a cage," clearly refers, as Shaw (*Trav.* l. c.) has observed, to "a *šecoy* partridge," and the Greek *πέδιλι θηρευτής*

should have been so translated, as is evident both from the context and the Greek words; compare Aristot. *Hist. Anim.* ix. 9, § 3 and 4. Besides the two species of partridge named above, the *Caccabis chukar* — the red-leg of India and Persia, which Mr. Tristram regards as distinct from the Greek partridge — is found about the Jordan. Our common partridge (*Perdix cinerea*), as well as the Barbary (*C. petrosa*) and red-leg (*C. rufi*), do not occur in Palestine. There are three or four species of the genus *Pterocles* (Sand-grouse) and *Franco-linus* found in the Bible lands, but they do not appear to be noticed by any distinct term. [QUAIL.] W. H.

\* PARTS, UPPER. [UPPER COASTS, Amer. ed.]

PARU'AH (פָּרוֹאֵה) [*blossoming*, Ges.; *increase*, First]: Φουασούδ; Alex. φαρρου; [Comp Φαρουέ:] *Pharue*). The father of Jehoshaphat, Solomon's commissariat officer in Issachar (1 K. iv. 17).

PARVA'IM (פָּרְוַיִּם) [see below]: Φαρουίμ; [Vat. Alex. Φαρουαίμ: (aurum) *probatissimum*]), the name of a place or country whence the gold was procured for the decoration of Solomon's Temple (2 Chr. iii. 6). The name occurs but once in the Bible, and there without any particulars that assist to its identification. We may notice the conjectures of Hitzig (on Dan. x. 5), that the name is derived from the Sanskrit *parva*, "hill," and betokens the *διδυμα ὄρη* in Arabia, mentioned by Ptolemy (vi. 7, § 11): of Knobel (*Völkert.* p. 191), that it is an abbreviated form of Sepharvaim, which stands in the Syriac version and the Targum of Jonathan for the Sephar of Gen. x. 30; and of Wilford (quoted by Gesenius, *Thes.* ii. 1125), that it is derived from the Sanskrit *pârva*, "eastern," and is a general term for the East. Bochart's identification of it with Taprobane is etymologically incorrect. W. L. B.

PA'SACH (פָּסַח) [*cut, incision*, Ges.]: Φασέκ; [Vat. Βασηχι: Alex. Φασηχι: *Phosechi*]. Son of Japhlet of the tribe of Asher (1 Chr. vii. 33), and one of the chiefs of his tribe.

PAS-DAMMIM (פֶּסֶחַ דָּמִיִּם) [*the border of blood*]: [Rom. Φασοδαμίν; Vat. Φασοδομη; Alex. Φασοδομιν: *Phesdomim*]. The form under which in 1 Chr. xi. 13 the name appears, which in 1 Sam. xvii. 1 is given more at length as EPHESDAMMIM. The lexicographers do not decide which is the earlier or correcter of the two. Gesenius (*Thes.* p. 139) takes them to be identical in meaning. It will be observed that in the original of Pas-dammim, the definite article has taken the place of the first letter of the other form. In the parallel narrative of 2 Sam. xxiii., the name appears to be corrupted<sup>d</sup> to *charpham* (חָרְפָּח), in the A. V. rendered "there." The present text of Josephus (*Ant.* vii. 12, § 4) gives it as Arasamos (*Ἀράσαμος*).

<sup>a</sup> Partridges, like gallinaceous birds generally, may occasionally lay their eggs in the nests of other birds of the same species: it is hardly likely, however, that this fact should have attracted the attention of the ancients; neither can it alone be sufficient to explain the simile.

<sup>b</sup> Tromson (*Land and Book*, i. 309 f.) describes the mode of hunting partridges by the Syrians at the

present time. See also Wood's *Bible Animals* (Lond. 1869), p. 427 f.

<sup>c</sup> Mr. Tristram tells us the *Caccabis saxatilis* makes an admirable decoy, becoming very tame and clever. He brought one home with him from Cyprus.

<sup>d</sup> This is carefully examined by Kennicott (*Dissertation*, p. 13 &c.).

The chief interest attaching to the appearance of the name in this passage of Chronicles is the evidence it affords that the place was the scene of repeated encounters between Israel and the Philistines, unless indeed we treat 1 Chr. xi. 13 (and the parallel passage, 2 Sam. xxiii. 9) as an independent account of the occurrence related in 1 Sam. xvii. — which hardly seems possible. [ELAH, VALLEY OF.]

A ruined site bearing the name of *Damún* or *Chirbet Damoun* lies near the road from Jerusalem to *Beit Jibrin* (Van de Velde, *Syr. & Pal.* ii. 193; Tobler, *3tte Wand.* 201), about three miles E. of *Shuweikéh* (Socho). This Van de Velde proposes to identify with Pas-dammim. G.

**PASE'AH** (פסאח [umē]: Βεσσαή; Alex. φεσση; *Phesse*). 1. Son of Eshton, in an obscure fragment of the genealogies of Judah (1 Chr. iv. 12). He and his brethren are described as "the men of Keclah," which in the Targum of R. Joseph is rendered "the men of the great Sanhedrin."

2. (פסאח, Ezr. [Vat. φισον]; פסאח, Neh.: *Phasea*.) The "sons of Paseah" were among the Nethinim who returned with Zerubbabel (Ezr. ii. 49). In the A. V. of Neh. vii. 51, the name is written PHASEAH. Jehoiada, a member of the family, assisted in rebuilding the old gate of the city under Nehemiah (Neh. iii. 6).

**PASHUR** (פשוּר [freedom, redemption, Fürst: in Jer. and 1 Chr.,] Πασχάωρ; [1 Chr. ix. 12, Rom. Alex. Πασχάωρ; Ezr. ii. 38, φασσούρ, Alex. φασουρ; x. 22, Neh. x. 3, φασούρ; Neh. vii. 41. φασεούρ, Vat. φασεδουρ; xi. 12, φασσούρ, Alex. FA. φασουρ:] *Pashsur* [*Phesur*, *Phasur*]), of uncertain etymology, although Jer. xx. 3 seems to allude to the meaning of it: comp. Ruth i. 20; and see Gesen. s. v.

1. Name of one of the families of priests of the chief house of Malchijah (Jer. xxi. 1, xxxviii. 1; 1 Chr. ix. 12, xxiv. 9; Neh. xi. 12). In the time of Nehemiah this family appears to have become a chief house, and its head the head of a course (Ezr. ii. 38; Neh. vii. 41, x. 3); and, if the text can be relied upon, a comparison of Neh. x. 3 with xii. 2 would indicate that the time of their return from Babylon was subsequent to the days of Zerubbabel and Jeshua. The individual from whom the family was named was probably Pashur the son of Malchiah, who in the reign of Zedekiah was one of the chief princes of the court (Jer. xxxviii. 1). He was sent, with others, by Zedekiah to Jeremiah at the time when Nebuchadnezzar was preparing his attack upon Jerusalem, to inquire what would

be the issue, and received a reply full of forebodings of disaster (Jer. xxi.). Again somewhat later, when the temporary raising of the siege of Jerusalem by the advance of Pharaoh Hophra's army from Egypt had inspired hopes in king and people that Jeremiah's predictions would be falsified, Pashur joined with several other chief men in petitioning the king that Jeremiah might be put to death as a traitor, who weakened the hands of the patriotic party by his exhortations to surrender, and his prophecies of defeat, and he proceeded, with the other princes, actually to cast the prophet into the dry well where he nearly perished (Jer. xxxviii.). Nothing more is known of Pashur. His descendant Adaiah seems to have returned with Zerubbabel (1 Chr. ix. 12), or whenever the census there quoted was taken.

2. Another person of this name, also a priest, and "chief governor of the house of the Lord," is mentioned in Jer. xx. 1. He is described as "the son of Immer," who was the head of the 16th course of priests (1 Chr. xxiv. 14), and probably the same as Amariah, Neh. x. 3, xii. 2, &c. In the reign of Jehoiakim he showed himself as hostile to Jeremiah as his namesake the son of Malchiah did afterwards, and put him in the stocks by the gate of Benjamin, for prophesying evil against Jerusalem, and left him there all night. For this indignity to God's prophet, Pashur was told by Jeremiah that his name was changed to Magor-missabib (*Terror on every side*), and that he and all his house should be carried captives to Babylon and there die (Jer. xx. 1-6). From the expression in v. 6, it should seem that Pashur the son of Immer acted the part of a prophet as well as that of priest.

3. Father of Gedaliah (Jer. xxxviii. 1).

A. C. H.

**PASSAGE.**<sup>a</sup> Used in plur. (Jer. xxii. 20), probably to denote the mountain region of Abarim, on the east side of Jordan [ABARIM] (Raumer, *Pal.* p. 62; Ges. p. 987; Stanley, *S. & P.* p. 204, and App. p. 503). It also denotes a river-ford or a mountain gorge or pass. [MICHMASH.]

H. W. P.

\* **PASSION** is used in Acts i. 3 in its etymological sense of "suffering," with reference to the death of our Lord. "To whom he showed himself alive after his *passion*" (lit. "after he suffered," μετά τὸ παθεῖν αὐτοῦ). A.

**PASSOVER** (פסח, פסחא: τὸ πάσχα: *b phase, id est transitus*: also, חג המצות, חג

1. פָּסַח; τὸ πέραν τῆς θαλάσσης.  
2. פָּסַח; διάβασις; vadum (Gen. xxxii. 22); also a gorge (1 Sam. xiii. 23).  
3. פָּסַח; φάραγξ; transcensus (Is. x. 29). "A ford" (Is. xvi. 2).

b This is evidently the word פָּסַח, the Aramaean form of פָּסַח, put into Greek letters. Some have taken the meaning of פָּסַח, the root of פָּסַח, to be that of "passing through," and have referred its application here to the passage of the Red Sea. Hence the Vulgate has rendered פָּסַח by *transitus*, Philo (*De Vit. Moysis*, lib. iii. c. 29) by διαβάστρια, and Gregory of Nazianzen by διάβασις. Angustine takes

the same view of the word; as do also Von Bhlen and a few other modern critics. Jerome applies *transitus* both to the *passing over* of the destroyer and the *passing through* the Red Sea (in Matt. xxvi.). But the true sense of the Hebrew substantive is plainly indicated in Ex. xii. 27; and the best authorities are agreed that פָּסַח never expresses "passing through," but that its primary meaning is "leaping over." Hence the verb is regularly used with the preposition עָלַ. But since, when we jump or step over anything, we do not tread upon it, the word has a secondary meaning, "to spare," or "to show mercy" (comp. Is. xxxi. 5, with Ex. xii. 27). The LXX. have therefore used σκεπάσειν in Ex. xii. 13; and Onkelos has rendered פָּסַח, "the sacrifice of the Passover," by

חַמְצוּמִים: ἃ ἀζυμα; in N. T. ἡ ἐορτὴ τῶν ἀζύμων, ἡμέραι τῶν ἀζύμων; *azyma, festum azymorum*), the first of the three great annual Festivals of the Israelites, celebrated in the month Nisan, from the 14th to the 21st.

The following are the principal passages in the Pentateuch relating to the Passover: Ex. xii. 1-11, in which there is a full account of its original institution and first observance in Egypt; Ex. xiii. 3-10, in which the unleavened bread is spoken of in connection with the sanctification of the first-born, but there is no mention of the paschal lamb; <sup>a</sup> Ex. xxiii. 14-19, where, under the name of the feast of unleavened bread, it is first connected with the other two great annual festivals, and also with the sabbath, and in which the paschal lamb is styled "My sacrifice"; Ex. xxxiv. 18-26, in which the festival is brought into the same connection, with immediate reference to the redemption of the first-born, and in which the words of Ex. xxiii. 18, regarding the paschal lamb, are repeated; Lev. xxiii. 4-14, where it is mentioned in the same connection, the days of holy convocation are especially noticed, and the enactment is prospectively given respecting the offering of the first sheaf of harvest, with the offerings which were to accompany it, when the Israelites possessed the promised land; Num. ix. 1-14, in which the Divine word repeats the command for the observance of the Passover at the commencement of the second year after the Exodus, and in which the observance of the Passover in the second month, for those who could not participate in it at the regular time, is instituted; Num. xxviii. 16-25, where directions are given for the offerings which were to be made on each of the seven days of the festival; Deut. xvi. 1-8, where the command is prospectively given that the Passover, and the other great festivals, should be observed in the place which the Lord might choose in the land of promise, and where there appears to be an allusion to the Chagigah, or voluntary peace-offerings (see p. 2346 a).

חַמְצוּמִים, "the sacrifice of mercy." Josephus rightly explains *πάσχα* by *ὑπερβασία*. In the same purport, agree Aquila, Theodotion, Symmachus, several of the Fathers, and the best modern critics. Our own translators, by using the word "Passover," have made clear Ex. xii. 12, 23, and other passages, which are not intelligible in the LXX. nor in several other versions. (See Bähr, *Symbolik*, ii. 627; Ewald, *Altenhomer*, p. 390; Gesenius, *Thes. s. v.*; Suicer, *sub πάσχα*; Drusius, *Notæ Majoræ*, in Ex. xii. 27; Carpzov, *App. Crit.* p. 394.)

The explanation of *πάσχα* which hinges on the notion that it is derived from *πάσχω* needs no refutation, but is not without interest, as it appears to have given rise to the very common use of the word *passion*, as denoting the death of our Lord. It was held by Irenæus, Tertullian, and a few others. Chrysostom appears to avail himself of it for a paronomasia (*Hom. V. ad I Tim.*), as in another place he formally states the true meaning; *ὑπερβασία ἐστὶ καθ' ἑμμελείαν τὸ πάσχα*. Gregory of Nazianzus seems to do the same (*Orat. xlii.*), since he elsewhere (as is stated above) explains *πάσχα* as = *διάβασις*. See Suicer, *sub voce*. Augustine, who took this latter view, has a passage which is worth quoting: "Pascha, fratres, non sicut quidam existimant, Græcum nomen est, sed Hebræum: oportunitissime tamen occurrit in hoc nomine quædam congruentia utrarumque linguarum. Quia enim *pati* Græce *πάσχω* dicitur, ideo Pascha *passio* putata est, relinquit hoc nomen a passione sit appellatum; in sua

## I. INSTITUTION AND FIRST CELEBRATION OF THE PASSOVER.

When the chosen people were about to be brought out of Egypt, the word of the Lord came to Moses and Aaron, commanding them to instruct all the congregation of Israel to prepare for their departure by a solemn religious ordinance. On the tenth day of the month Abib, which had then commenced, the head of each family was to select from the flock either a lamb or a kid, a male of the first year, without blemish. If his family was too small to eat the whole of the lamb, he was permitted to invite his nearest neighbor to join the party. On the fourteenth day of the month, he<sup>b</sup> was to kill his lamb while the sun was setting.<sup>c</sup> He was then to take the blood in a basin, and with a sprig of hyssop to sprinkle it on the two side-posts and the lintel of the door of the house. The lamb was then thoroughly roasted, whole. It was expressly forbidden that it should be boiled, or that a bone of it should be broken. Unleavened bread and bitter herbs were to be eaten with the flesh. No male who was uncircumcised was to join the company. Each one was to have his loins girt, to hold a staff in his hand, and to have shoes on his feet. He was to eat in haste, and it would seem that he was to stand during the meal. The number of the party was to be calculated as nearly as possible, so that all the flesh of the lamb might be eaten; but if any portion of it happened to remain, it was to be burned in the morning. No morsel of it was to be carried out of the house.

The legislator was further directed to inform the people of God's purpose to smite the first-born of the Egyptians, to declare that the Passover was to be to them an ordinance forever, to give them directions respecting the order and duration of the festival in future times, and to enjoin upon them to teach their children its meaning, from generation to generation.

When the message was delivered to the people, they bowed their heads in worship. The lambs were selected, on the fourteenth they were slain and the blood sprinkled, and in the following evening, after the fifteenth day of the month had commenced, the first paschal meal was eaten. At midnight the first-born of the Egyptians were smitten, from the first-born of Pharaoh that sat on his throne unto the first-born of the captive that was in

vero lingua, hoc est in Hebræa, Pascha *transitus* dicitur: propterea tunc primum Pascha celebravit populus Dei, quando ex Ægypto fugientes, rubrum mare transierunt. Nunc ergo figura illa prophetica in veritate completa est, cum sicut ovis ad immolationem ducitur Christus, cujus sanguine illius postibus nostris, id est, cujus signo crucis signatis frontibus nostris, a perditione hujus seculi tanquam a captivitate vel interemptione Ægyptia liberamur; et agimus saluberrimum transitum, cum a diabolo transimus ad Christum, et ab isto instabili seculo ad ejus fundatissimum regnum, Col. i. 13" (*In Joan. Tract. iv.*)

<sup>a</sup> There are five distinct statutes on the Passover in the 12th and 13th chapters of Exodus (xii. 2-4, 5-20, 21-28, 42-51; xiii. 1-10).

<sup>b</sup> The words translated in A. V. "the whole assembly of the congregation" (Ex. xii. 6), evidently mean *every man of the congregation*. They are well rendered by Vitringa (*Observat. Sac. ii. 3, §9*), "universa Israelitarum multitudo nemine excepto." The word חַמְצוּמִים, though it primarily denotes an assembly, must here signify no more than a complete number of persons, not necessarily assembled together.

<sup>c</sup> See note e, p. 2342.

the dungeon, and all the firstlings of the cattle. The king and his people were now urgent that the Israelites should start immediately, and readily bestowed on them supplies for the journey. In such haste did the Israelites depart, on that very day (Num. xxxiii. 3), that they packed up their kneading-troughs containing the dough prepared for the morrow's provision, which was not yet leavened.

Such were the occurrences connected with the institution of the Passover, as they are related in Ex. xii. It would seem that the law for the consecration of the first-born was passed in immediate connection with them (Ex. xiii. 1, 13, 15, 16).

## II. OBSERVANCE OF THE PASSOVER IN LATER TIMES.

1. In the twelfth and thirteenth chapters of Exodus, there are not only distinct references to the observance of the festival in future ages (*e. g.* xii. 2, 14, 17, 24-27, 42, xiii. 2, 5, 8-10); but there are several injunctions which were evidently not intended for the first passover, and which indeed could not possibly have been observed. The Israelites, for example, could not have kept the next day, the 15th of Nisan, on which they commenced their march (Ex. xii. 51; Num. xxxiii. 3), as a day of holy convocation according to Ex. xii. 16. [FESTIVALS, vol. i. p. 818.]

In the later notices of the festival in the books of the Law, there are particulars added which appear as modifications of the original institution. Of this kind are the directions for offering the Omer, or first sheaf of harvest (Lev. xxiii. 10-14), the instructions respecting the special sacrifices which were to be offered each day of the festival week (Num. xxviii. 16-25), and the command that the paschal lambs should be slain at the national sanctuary, and that the blood should be sprinkled on

<sup>a</sup> Michaelis and Kurtz consider that this visitation was directed against the sacred animals, "the gods of Egypt," mentioned in Ex. xii. 12.

<sup>b</sup> Quoted by Carpov, *App. Crit.* p. 406. For other Jewish authorities, see Otho's *Lexicon*, s. v. "Pascha."

<sup>c</sup> Another Jewish authority (*Tosiphota in Pesachim*, quoted by Otho) adds that the rule that no one who partook of the lamb should go out of the house until the morning (Ex. xii. 22) was observed only on this one occasion; a point of interest, as bearing on the question relating to our Lord's last supper. See p. 2347 *b*.

<sup>d</sup> This offering was common to all the feasts. According to the Mishna (*Chagigah*, i. 2), part of it was appropriated for burnt-offerings and the rest for the *Chagigah*.

<sup>e</sup> "Between the two evenings," בֵּין הָעֶרְבַּיִם (Ex. xii. 6; Lev. xxiii. 5; Num. ix. 3, 5). The phrase also occurs in reference to the time of offering the evening sacrifice (Ex. xxix. 39, 41; Num. xxviii. 4), and in other connections (Ex. xvi. 12, xxx. 8). Its precise meaning is doubtful. The Karaites and Samaritans, with whom Aben Ezra (on Ex. xii. 6) agrees, consider it as the interval between sunset and dark. This appears to be in accordance with Deut. xvi. 6, where the paschal lamb is commanded to be slain "at the going down of the sun." But the Pharisees and Rabbinites held that the first evening commenced when the sun began to decline (δειλη πρωΐα), and that the second evening began with the setting sun (δειλη ψύα). Josephus says that the lambs were slain from the ninth hour till the eleventh, *i. e.* between three and five o'clock (*B. J.* vi. 9, § 3); the Mishna seems to countenance this (*Pesachim*, v. 3); and Maimonides, who says they were killed immediately after the evening sacrifice [The Mishna says, *Pesach*, v. 1, De Sola

the altar, instead of the lintels and door-posts of the houses (Deut. xvi. 1-6).

Hence it is not without reason that the Jewish writers have laid great stress on the distinction between the "Egyptian Passover" and "the perpetual Passover." The distinction is noticed in the Mishna (*Pesachim*, ix. 5). The peculiarities of the Egyptian passover which are there pointed out are, the selection of the lamb on the 10th day of the month, the sprinkling of the blood on the lintels and door-posts, the use of hyssop in sprinkling, the haste in which the meal was to be eaten, and the restriction of the abstinence from unleavened bread to a single day. Elias of Byzantium <sup>b</sup> adds, that there was no command to burn the fat on the altar, that the pure and impure all partook of the paschal meal contrary to the law afterwards given (Num. xviii. 11), that both men and women were then required to partake, but subsequently the command was given only to men (Ex. xxiii. 17; Deut. xvi. 16), that neither the Hallel nor any other hymn was sung, as was required in later times in accordance with Is. xxx. 29, that there were no days of holy convocation, and that the lambs were not slain in the consecrated place.<sup>c</sup>

2. The following was the general order of the observances of the Passover in later times according to the direct evidence of Scripture: On the 14th of Nisan, every trace of leaven was put away from the houses, and on the same day every male Israelite not laboring under any bodily infirmity or ceremonial impurity, was commanded to appear before the Lord at the national sanctuary with an offering of money in proportion to his means (Ex. xxiii. 15; Deut. xvi. 16, 17).<sup>d</sup> Devout women sometimes attended, as is proved by the instances of Hannah and Mary (1 Sam. i. 7; Luke i. 41, 42). As the sun was setting,<sup>e</sup> the lambs were slain, and the fat

and Raphall's translation: "The daily offering was slaughtered half an hour after the eighth hour (*i. e.* at 2.30 P. M.), and sacrificed half an hour after the ninth hour; but on the day before Passover . . . it was slaughtered half an hour after the seventh hour, and sacrificed half an hour after the eighth hour. When the day before Passover happened on Friday, it was slaughtered half an hour after the sixth hour, sacrificed half an hour after the seventh hour, and the Passover sacrifice after it." Under certain circumstances the paschal lamb might be killed before the evening sacrifice; but not before noon (*ibid.* § 3). — A.] A third notion has been held by Jarchi and Kimchi, that the two evenings are the time immediately before, and immediately after sunset, so that the point of time at which the sun sets divides them. Gesenius, Bähr, Winer, and most other critics, hold the first opinion, and regard the phrase as equivalent with בֵּין הָעֶרְבַּיִם (Deut. xvi. 6). See Gesenius, *Thes.* p. 1065; Bähr, *Symbolik*, ii. 614; Hupfeld, *De Festis Hebraeorum*, p. 15; Rosenmüller in *Exod.* xii. 6; Carpov, *App. Crit.* p. 68.

\* This account of the opinion of Jarchi (*i. e.* Rashi or Rabbi Solomon ben Isaac) and Kimchi has been shown by Ginsburg (art. "Passover" in the 3d ed. of Kitto's *Cyclop. of Bibl. Lit.* iii. 423) to be entirely erroneous. They agree with the opinion of the Pharisees and Rabbinites as stated above.

The interpretation of "the two evenings" given by the Pharisees and Rabbinites is supported also by Philo (*De Septenario*, c. 18, *Opp.* ii. 292, ed. Mangey) who says that the paschal lamb is killed "from mid day till the evening" (ἐν ἡ [ἐσπῆρῃ] θύοντο πανδῆμος ἀρξάμενοι κατὰ μεσημβρίαν ἕως ἑσπέρας, ἢ ἀπὸ μεσ

and blood given to the priests (2 Chr. xxxv. 5, 6; comp. Joseph. *B. J.* vi. 9, § 3). In accordance with the original institution in Egypt, the lamb was then roasted whole, and eaten with unleavened bread and bitter herbs; no portion of it was to be left until the morning. The same night, after the 15th of Nisan had commenced, the fat was burned by the priest and the blood sprinkled on the altar (2 Chr. xxx. 16, xxxv. 11). On the 15th, the night being passed, there was a holy convocation, and during that day no work might be done, except the preparation of necessary food (Ex. xii. 16). On this and the six following days an offering in addition to the daily sacrifice was made of two young bullocks, a ram, and seven lambs of the first year, with meat-offerings, for a burnt-offering, and a goat for a sin-offering (Num. xxviii. 19-23). On the 16th of the month, "the morrow after the sabbath" (*i. e.* after the day of holy convocation), the first sheaf of harvest was offered and waved by the priest before the Lord, and a male lamb was offered as a burnt sacrifice with a meat and drink-offering. Nothing necessarily distinguished the four following days of the festival, except the additional burnt and sin-offerings, and the restraint from some kinds of labor. [FESTIVALS.] On the seventh day, the 21st of Nisan, there was a holy convocation, and the day appears to have been one of peculiar solemnity.<sup>a</sup> As at all the festivals, cheerfulness was to prevail during the whole week, and all care was to be laid aside (Deut. xxvii. 7; comp. Joseph. *Ant.* xi. 5; Michaelis, *Laws of Moses*, Art. 197). [PENTECOST.]

3. (a.) *The Paschal Lamb.*—After the first Passover in Egypt there is no trace of the lamb having been selected before it was wanted. In later times, we are certain that it was sometimes not provided before the 14th of the month (Luke xxii. 7-9; Mark xiv. 12-16). The law formally allowed the alternative of a kid (Ex. xii. 5), but a lamb was preferred,<sup>b</sup> and was probably nearly always chosen. It was to be faultless and a male, in accordance with the established estimate of ani-

mal perfection (see Mal. i. 14). Either the head of the family, or any other person who was not ceremonially unclean (2 Chr. xxx. 17), took it into the court of the Temple on his shoulders. According to some authorities, the lamb might, if circumstances should render it desirable, be slain at any time in the afternoon, even before the evening sacrifice, if the blood was kept stirred, so as to prevent it from coagulating, until the time came for sprinkling it (*Pesachim*, v. 3).

The Mishna gives a particular account of the arrangement which was made in the court of the Temple (*Pesachim*, v. 6-8). Those who were to kill the lamb entered successively in three divisions. When the first division had entered, the gates were closed and the trumpets were sounded three times. The priests stood in two rows, each row extending from the altar to the place where the people were assembled. The priests of one row held basins of silver, and those of the other basins of gold. Each Israelite<sup>c</sup> then slew his lamb in order, and the priest who was nearest to him received the blood in his basin, which he handed to the next priest, who gave his empty basin in return. A succession of full basins was thus passed towards the altar, and a succession of empty ones towards the people. The priest who stood next the altar threw the blood out towards the base in a single jet. When the first division had performed their work, the second came in, and then the third. The lambs were skinned, and the viscera taken out with the internal fat. The fat was carefully separated and collected in the large dish, and the viscera were washed and replaced in the body of the lamb, like those of the burnt sacrifices (Lev. i. 9, iii. 3-5; comp. *Pesachim*, vi. 1). Maimonides says that the tail was put with the fat (*Not. in Pes.* v. 10). While this was going on the Hallel was sung, and repeated a second, or even a third time, if the process was not finished. As it grew dark, the people went home to roast their lambs. The fat was burned on the altar, with incense, that same evening.<sup>d</sup> When the 14th of Nisan fell on the Sabbath, all these things were

ἀγρῆ ἁστ., Tischend. *Philonea* (Lips. 1868), p. 46). In the *Book of Jubilees* (supposed to belong to the 1st century) it is said that "the Passover is to be kept on the 14th of the 1st month; it is to be killed before it is evening, and eaten at night, on the evening of the 15th, after sunset." Again, "The children of Israel shall keep the Passover on the 14th of the 1st month between the evenings, in the third part of the day till the third part of the night" (*i. e.* from about noon of the 14th of Nisan to the midnight following). "What remains of all its flesh after the third part of the night they shall burn with fire." (Cap. 49 of Dillmann's translation, in Ewald's *Jahrb. d. Bibl. wissenschaft.* iii. 68, 69.) A.

α The seventh day of the Passover, and the eighth day of the Feast of Tabernacles (see John vii. 37), had a character of their own, distinguishing them from the first days of the feasts and from all other days of holy convocation, with the exception of the day of Pentecost. [PENTECOST.] This is indicated in regard to the Passover in Deut. xvi. 8. "Six days thou shalt eat unleavened bread; and on the seventh day shall be a solemn assembly (עֲצֵרֶת) to the Lord." See also Ex. xiii. 6: "Seven days thou shalt eat unleavened bread, and in the seventh day shall be a feast to the Lord." The word עֲצֵרֶת is used in like manner for the last day of the Feast of Tabernacles (Lev. xxiii.

6, where it is associated with שְׁבִעַת הַיָּמִים, "a holy

convocation;" Num. xxix. 35; 2 Chr. vii. 9; Neh. viii. 18). Our translators have in each case rendered it "solemn assembly," but have explained it in the margin by "restraint." The LXX. have ἐξόδιον. Michaelis and Iken imagined the primary idea of the word to be restraint from labor. Gesenius shows that this is a mistake, and proves the word to mean assembly or congregation. Its root is undoubtedly עָבַר, to shut up, or constrain. Hence Bähr (*Synbolik*, ii. 619) reasonably argues, from the occurrence of the word in the passages above referred to, that its strict meaning is that of the closing assembly; which is of course quite consistent with its being sometimes used for a solemn assembly in a more general sense, and with its application to the day of Pentecost.

b The Chaldee interpreters render עֵזֶב, which means one of the flock, whether sheep or goat, by אֶמְרָא, a lamb; and Theodoret no doubt represents the Jewish traditional usage when he says, ἕνα ὁ μὲν πρόβατον ἔχων θύσῃ τούτου· ὁ δὲ σπανίζων πρόβατον τὸν ἐμύθον (on Ex. xii.).

c Undoubtedly the usual practice was for the head of the family to slay his own lamb; but on particular occasions (as in the great observance of the Passover by Hezekiah, Josiah, and Ezra) the slaughter of the lambs was committed to the Levites. See p. 2347.

d The remarkable passage in which this is commanded, which occurs Ex. xiii. 17, 18, 19, and is

done in the same manner; but the court of the Temple, instead of being carefully cleansed as on other occasions, was merely flooded by opening a sluice.

A spit made of the wood of the pomegranate was thrust lengthwise through the lamb (*Pesachim*, vii. 1). According to Justin Martyr, a second spit, or skewer, was put transversely through the shoulders, so as to form the figure of a cross.<sup>a</sup> The oven was of earthenware, and appears to have been in shape something like a bee-hive with an opening in the side to admit fuel. The lamb was carefully so placed as not to touch the side of the oven, lest the cooking should be effected in part by hot earthenware, and not entirely by fire, according to Ex. xii. 9; 2 Chr. xxxv. 13. If any one concerned in the process broke a bone of the lamb so as to infringe the command in Ex. xii. 46, he was subject to the punishment of forty stripes. The flesh was to be roasted thoroughly<sup>b</sup> (Ex. xii. 9). No portion of it was allowed to be carried out of the house, and if any of it was not eaten at the meal, it was burned, along with the bones and tendons, in the morning of the 16th of Nisan; or, if that day happened to be the Sabbath, on the 17th.

As the paschal lamb could be legally slain, and the blood and fat offered, only in the national sanctuary (Deut. xvi. 2), it of course ceased to be

repeated Ex. xxxiv. 25, 26, appears to be a sort of proverbial caution respecting the three great feasts. "Three times in the year all thy males shall appear before the Lord God. Thou shalt not offer the blood of my sacrifice with leavened bread; neither shall the fat of my sacrifice remain until the morning. The first of the first-fruits of thy land thou shalt bring into the house of the Lord thy God. Thou shalt not see the kid in his mother's milk." The references to the Passover and Pentecost are plain enough. That which is supposed to refer to Tabernacles (which is also found Deut. xiv. 21), "Thou shalt not see the kid in his mother's milk," is explained by Abarbanel, and in a Karaite MS. spoken of by Cudworth, as bearing on a custom of boiling a kid in the milk of its dam as a charm, and sprinkling fields and orebars with the milk to render them fertile (Cudworth, *True Notion of the Lord's Supper*, pp. 36, 37; Spencer, *Leg. Heb.* ii. 8. For other interpretations of the passage, see Rosenmüller, in *Exod.* xxiii. 19). [IDOLATRY; vol. ii. p. 1129 a.

<sup>a</sup> The statement is in the Dialogue with Trypho, c. 40: Καὶ τὸ κελυσθὲν πρόβατον ἐκείνο ὁπῶν ὄλον γίνεσθαι, τοῦ πάθους τοῦ σταυροῦ, δι' οὗ πάσχειν ἐμελλον ὁ Χριστός, σύμβολον ἦν. τὸ γὰρ ὀπῶμενον πρόβατον σχηματίζομενον ὁμοίως τῷ σχήματι τοῦ σταυροῦ ὀπῶται. εἰς γὰρ ὀρθὸς ὀβελίσιος διαπερονᾶται ἀπὸ τῶν κατωτάτω ὑπῶν μέχρι τῆς κεφαλῆς, καὶ εἰς πάλιν κατὰ τὸ μετῴφρον, ὅ ἢ προσερῶνται καὶ αἱ χεῖρες τοῦ προβάτου.

As Justin was a native of Flavia Neapolis, it is a striking fact that the modern Samaritans roast their paschal lambs in nearly the same manner at this day. Mr. George Grove, who visited *Nablous* in 1861, in a letter to the writer of this article, says, "The lambs (they require six for the community now) are roasted all together by stuffing them vertically, head downwards, into an oven which is like a small well, about three feet diameter, and four or five feet deep, roughly steamed, in which a fire has been kept up for several hours. After the lambs are thrust in, the top of the hole is covered with bushes and earth, to confine the heat till they are done. Each lamb has a take or spit run through him to draw him up by; and, to prevent the spit from tearing away through the roast meat with the weight, a cross piece is put through the lower end of it." A similar account is

offered by the Jews after the destruction of Jerusalem. The spring festival of the modern Jews strictly consists only of the feast of unleavened bread.<sup>c</sup>

(b.) *The Unleavened Bread.*—There is no reason to doubt that the unleavened bread eaten in the Passover and that used on other religious occasions were of the same nature. It might be made of wheat, spelt, barley, oats, or rye, but not of rice or millet (*Pesachim*, ii. 5). It appears to have been usually made of the finest wheat flour<sup>d</sup> (Buxt. *Syn. Jud.* c. xviii. p. 397). The greatest care was taken that it should be made in perfectly clean vessels and with all possible expedition, lest the process of fermentation should be allowed to commence in the slightest degree (*Pesachim*, iii. 2-5). It was probably formed into dry, thin biscuits, not unlike those used by the modern Jews.

The command to eat unleavened bread during the seven days of the festival, under the penalty of being cut off from the people, is given with marked emphasis, as well as that to put away all leaven from the house during the festival (Ex. xii. 15, 19, 20, xiii. 7). But the Rabbiniists say that the house was carefully cleansed and every corner searched for any fragment of leavened bread in the evening before the 14th of Nisan, though leavened bread might be eaten till the sixth hour of that day, when all that

given in Miss Rogers's *Domestic Life in Palestine*. Vitringa, Bochart, and Hottinger have taken the statement of Justin as representing the ancient Jewish usage; and, with him, regard the crossed spits as a prophetic type of the cross of our Lord. But it would seem more probable that the transverse spit was a mere matter of convenience, and was perhaps never in use among the Jews. The rabbinical traditions relate that the lamb was called *Galeatus*, "qui quum totus assabatur, cum capite, cruribus, et intestinis, pedes autem et intestina ad latera ligabantur inter assandum, agnus ita quasi armatum representaverit, qui galea in capite et ense in latere est munitus" (Otho, *Lex. Rab.* p. 503). [On the Samaritan Passover, see the addition to this article, p. 2357.]

<sup>b</sup> The word נֶאֱרָא, in A. V. "raw," is rendered "alive" by Oukelos and Jonathan. In 1 Sam. ii. 15, it plainly means *raw*. But Jarchi, Aben Ezra, and other Jewish authorities, understand it as *half-dressed* (Rosenmüller, in *loc.*)

<sup>c</sup> There are many curious particulars in the mode in which the modern Jews observe this festival, to be found in Buxt. *Syn. Jud.*, c. xviii. xix.; Picart, *Ceremonies Religieuses*, vol. i.; Mill, *The British Jews* (London, 1853); Stauben, *Scènes de la vie Juive en Alsace* (Paris, 1850); [Isaacs, *Ceremonies, etc. of the Jews*, p. 104 ff.; Allen's *Modern Judaism*, 2d ed., p. 894 ff.] The following appear to be the most interesting. A shoulder of lamb, thoroughly roasted, is placed on the table to take the place of the paschal lamb, with a hard-boiled egg as a symbol of wholeness. Besides the sweet sauce, to remind them of the sort of work carried on by their fathers in Egypt (see above, c), there is sometimes a vessel of salt and water, to represent the Red Sea, into which they dip the bitter herbs. But the most remarkable usages are those connected with the expectation of the coming of Elijah. A cup of wine is poured out for him, and stands all night upon the table. Just before the filling of the cups of the guests the fourth time, there is an interval of dead silence, and the door of the room is opened for some minutes to admit the prophet. [ELLART, i. 709, note i; Ewald (*Alterthümer*, p. 381) and Hillmann (quoted by Winer) conjecture the original unleavened bread of the Passover to have been of barley, in connection with the commencement of barley harvest.

remained was to be burned (*Pesachim*, i. 1, 4; <sup>a</sup> and citation in Lightfoot, *Temple Serv.*, xii. § 1).

(c.) *The Bitter Herbs and the Sauce.*—According to *Pesachim* (ii. 6) the bitter herbs (מַרְרִיִּם; *πικρῆδες*; *lactuæ agrestes*, Ex. xii. 8), might be endive, chicory, wild lettuce, or nettles. These plants were important articles of food to the ancient Egyptians (as is noticed by Pliny), and they are said to constitute nearly half that of the modern Egyptians. According to Niebuhr they are still eaten at the Passover by the Jews in the East. They were used in former times either fresh or dried and a portion of them is said to have been eaten before the unleavened bread (*Pesach*. x. 3).

The sauce into which the herbs, the bread, and the meat were dipped as they were eaten (John xiii. 26; Matt. xxvi. 23) is not mentioned in the

Pentateuch. It is called in the Mishna תַּרְבִּיחַת. According to Bartenora it consisted of only vinegar and water; but others describe it as a mixture of vinegar, figs, dates, almonds, and spice. The same sauce was used on ordinary occasions thickened with a little flour; but the rabbinitists forbade this at the Passover, lest the flour should occasion a slight degree of fermentation. Some say that it was beaten up to the consistency of mortar or clay, in order to commemorate the toils of the Israelites in Egypt in laying bricks (Buxtorf, *Lex. Tul.* col. 831; *Pesachim*, ii. 8. x. 3, with the notes of Bartenora, Maimonides, and Surenhusius).

(d.) *The Four Cups of Wine.*—There is no mention of wine in connection with the Passover in the Pentateuch; but the Mishna strictly enjoins that there should never be less than four cups of it provided at the paschal meal even of the poorest Israelite (*Pes.* x. 1). The wine was usually red, and it was mixed with water as it was drunk (*Pes.* vii. 13, with Bartenora's note; and Otho's *Lex.* p. 507). The cups were handed round in succession at specified intervals in the meal (see below, f). Two of them appear to be distinctly mentioned Luke xxii. 17, 20. "The cup of blessing" (1 Cor. x. 16) was probably the latter one of these, and is generally considered to have been the third of the series, after which a grace was said; though a comparison of Luke xxii. 20 (where it is called "the cup after supper") with *Pes.* x. 7, and the designation פֶּסַח הַלֵּל, "cup of the Hallel," might rather suggest that it was the fourth and last cup. Schoetgen, however, is inclined to doubt whether there is any reference, in either of the passages of the N. T., to the formal ordering of the cups of the Passover, and proves that the name "cup of blessing" (פֶּסַח שֶׁל בְּרַכָּה) was applied in a general way to any cup which was drunk with thanksgiving, and that the expression was often used metaphorically, e. g. Ps. cxvi. 13 (*Hor. Heb.* in 1 Cor. x. 16. See also Carpzov, *App. Crit.* p. 380).

The wine drunk at the meal was not restricted to the four cups, but none could be taken during the interval between the third and fourth cups (*Pes.* x. 7).

(e.) *The Hallel.*—The service of praise sung at the Passover is not mentioned in the Law. The name is contracted from הַלְלֵיהוָה (*Hallelujah*)

It consisted of the series of Psalms from cxiii. to cxviii. The first portion, comprising Ps. cxiii. and cxiv., was sung in the early part of the meal, and the second part after the fourth cup of wine. This is supposed to have been the "hymn" sung by our Lord and his Apostles (Matt. xxvi. 30; Mark xiv.

26; Buxtorf, *Lex. Tul.* s. v. הַלֵּל, and *Syn. Jud.* p. 48; Otho, *Lex.* p. 271; Carpzov, *App. Crit.* p. 374).

(f.) *Mode and Order of the Paschal Meal.*—Adopting as much from Jewish tradition as is not inconsistent or improbable, the following appears to have been the usual custom. All work, except that belonging to a few trades connected with daily life, was suspended for some hours before the evening of the 14th of Nisan. There was, however, a difference in this respect. The Galileans desisted from work the whole day; the Jews of the south only after the middle of the tenth hour, that is, half-past three o'clock. It was not lawful to eat any ordinary food after midday. The reason assigned for this was, that the paschal supper might be eaten with the enjoyment furnished by a good appetite. (*Pes.* iv. 1-3, x. 1, with Maimonides' note.) But it is also stated that this preliminary fasting was especially incumbent on the eldest son, and that it was intended to commemorate the deliverance of the first-born in Egypt. This was probably only a fancy of later times (Buxt. *Syn. Jud.* xviii. p. 401).

No male was admitted to the table unless he was circumcised, even if he was of the seed of Israel (Ex. xii. 48). Neither, according to the letter of the law, was any one of either sex admitted who was ceremonially unclean<sup>b</sup> (Num. ix. 6; Joseph. *B. J.* vi. 9, § 3). But this rule was on special occasions liberally applied. In the case of Hezekiah's Passover (2 Chr. xxx.) we find that a greater degree of legal purity was required to slaughter the lambs than to eat them, and that numbers partook "otherwise than it was written," who were not "cleansed according to the purification of the sanctuary." The Rabbinites expressly state that women were permitted, though not commanded, to partake (*Pes.* viii. 1; *Chagigah*, i. 1; comp. Joseph. *B. J.* vi. 9, § 3), in accordance with the instances in Scripture which have been mentioned of Hannah and Mary (p. 2342 b). But the Karaites, in more recent times, excluded all but full-grown men. It was customary for the number of a party to be not less than ten (Joseph. *B. J.* vi. 9, § 3). It was perhaps generally under twenty, but it might be as many as a hundred, if each one could have a piece of the lamb as large as an olive (*Pes.* viii. 7).

When the meal was prepared, the family was placed round the table, the paterfamilias taking a place of honor, probably somewhat raised above the rest. There is no reason to doubt that the ancient Hebrews sat, as they were accustomed to do at their ordinary meals (see Otho, *Lex.* p. 7). But when the custom of reclining at table had be-

<sup>a</sup> Other particulars of the precautions which were taken are given in *Pesachim*, and also by Maimonides, in his treatise *De Bermentato et Azymo*, a compendium of which is given by Carpzov, *App. Crit.* p. 404.

<sup>b</sup> Certain precautions to avoid pollution were taken

a month before the Passover. Amongst these was the annual whitewashing of the sepulchres (cf. Matt. xxiii. 27) (Beland, *Ant.* iv. 2, 6). In John xi. 55, we find some Jews coming up to Jerusalem to purify themselves a week before the feast.

some general, that posture appears to have been enjoined, on the ground of its supposed significance. The Mishna says that the meanest Israelite should recline at the Passover "like a king, with the ease becoming a free man" (*Pes.* x. 1, with Maimonides' note). He was to keep in mind that when his ancestors stood at the feast in Egypt they took the posture of slaves (*R. Levi*, quoted by *Otho*, p. 504). Our Lord and his Apostles conformed to the usual custom of their time, and reclined (*Luke* xxii. 14, &c.). [MEALS, p. 1843 f.]

When the party was arranged, the first cup of wine was filled, and a blessing was asked by the head of the family on the feast, as well as a special one on the cup. The bitter herbs were then placed on the table, and a portion of them eaten, either with or without the sauce. The unleavened bread was handed round next, and afterwards the lamb was placed on the table in front of the head of the family (*Pes.* x. 3). Before the lamb was eaten, the second cup of wine was filled, and the son, in accordance with *Ex.* xii. 26, asked his father the meaning of the feast. In reply, an account was given of the sufferings of the Israelites in Egypt, and of their deliverance, with a particular explanation of *Deut.* xxvi. 5, and the first part of the Hallel (*Ps.* cxiii., cxiv.) was sung. This being gone through, the lamb was carved and eaten. The third cup of wine was poured out and drunk, and soon afterwards the fourth. The second part of the Hallel (*Ps.* cxv. to cxviii.) was then sung (*Pes.* x. 2-5). A fifth wine-cup appears to have been occasionally produced, but perhaps only in later times. What was termed the greater Hallel (*Ps.* cxx. to cxxviii.) was sung on such occasions (*Buxt. Syn. Jud.* c. xviii.). The meal being ended, it was unlawful for anything to be introduced in the way of dessert.

The Israelites who lived in the country appear to have been accommodated at the feast by the inhabitants of Jerusalem in their houses, so far as there was room for them (*Luke* xxii. 10-12; *Matt.* xxvi. 18). It is said that the guests left in return for their entertainment the skin of the lamb, the oven, and other vessels which they had used. Those who could not be received into the city encamped without the walls in tents, as the pilgrims now do at Mecca. The number of these must have been very great, if we may trust the computation of Josephus that they who partook of the Passover amounted, in the reign of Nero, to above 2,700,000 (*B. J.* vi. 9, § 3 a). It is not wonderful that seditions were apt to break out in such a vast multitude so brought together (*Jos. Ant.* xvii. 9, § 2; *B. J.* i. 3, &c.; comp. *Matt.* xxvi. 5; *Luke* xiii. 1).

After the paschal meal, such of the Israelites from the country as were so disposed left Jerusalem, and observed the remainder of the festival at their respective homes (*Deut.* xvi. 7). But see *Lightfoot*, on *Luke* ii. 43.

(g.) *The first Sheaf of Harvest.* — The offering of the Omer, or sheaf (מִנְחָה; τὰ δρώματα; *manipulus spicarum*) is mentioned nowhere in the Law except *Lev.* xxiii. 10-14. It is there commanded that when the Israelites might reach the end of promise, they should bring, on the 16th of

the month, "the morrow after the sabbath" (i. e. the day of holy convocation [*PENTECOST*, § 1, note]), the first sheaf of the harvest to the priest, to be waved by him before the Lord. A lamb, with a meat-offering and a drink-offering, was to be offered at the same time. Until this ceremony was performed, no bread, parched corn, or green ears, were to be eaten of the new crop (see *Josh.* v. 11, 12).<sup>b</sup> It was from the day of this offering that the fifty days began to be counted to the day of Pentecost (*Lev.* xxiii. 15). The sheaf was of barley, as being the grain which was first ripe (*2 Kings* iv. 42). Josephus relates (*Ant.* iii. 10, § 5) that the barley was ground, and that ten handfuls of the meal were brought to the altar, one handful being cast into the fire and the remainder given to the priests. The Mishna adds several particulars, and, amongst others, that men were formally sent by the Sanhedrim to cut the barley in some field near Jerusalem; and that, after the meal had been sifted thirteen times, it was mingled with oil and incense<sup>c</sup> (*Menachoth*, x. 2-6).

(h.) *The Chagigah.* — The daily sacrifices are enumerated in the Pentateuch only in *Num.* xxviii. 19-23, but reference is made to them *Lev.* xxiii. 8. Besides these public offerings (which are mentioned, p. 2343 b), there was another sort of sacrifice connected with the Passover, as well as with the other great festivals, called in the Talmud

חֲגִיגָה (*Chagigah*, i. e. "festivity"). It was a voluntary peace-offering made by private individuals. The victim might be taken either from the flock or the herd. It might be either male or female, but it must be without blemish. The offerer laid his hand upon his head and slew it at the door of the sanctuary. The blood was sprinkled on the altar, and the fat of the inside, with the kidneys, was burned by the priest. The breast was given to the priest as a wave-offering, and the right shoulder as a heave-offering (*Lev.* iii. 1-5, vii. 29-34). What remained of the victim might be eaten by the offerer and his guests on the day on which it was slain, and on the day following, but if any portion was left till the third day, it was burned (*Lev.* vii. 16-18; *Pesach.* vi. 4). The connection of these free-will peace-offerings with the festivals appears to be indicated *Num.* x. 10; *Deut.* xiv. 26; *2 Chr.* xxxi. 22, and they are included under the term Passover in *Deut.* xvi. 2 — "Thou shalt therefore sacrifice the passover unto the Lord thy God, of the flock and of the herd." Onkelos here understands the command to sacrifice from the flock, to refer to the paschal lamb; and that to sacrifice from the herd, to the Chagigah. But it seems more probable that both the flock and the herd refer to the Chagigah, as there is a specific command respecting the paschal lamb in *vv.* 5-7. (See *De Muis'* note in the *Crit. Sac.*; and *Lightfoot*, *Hor. Heb.* on *John* xviii. 28.) There are evidently similar references, *2 Chr.* xxx. 22-24, and *2 Chr.* xxxv. 7. Hezekiah and his princes gave away, at the great Passover which he celebrated, two thousand bullocks and seventeen thousand sheep; and Josiah, on a similar occasion, is said to have supplied the people at his own cost with lambs "for the Passover offerings," besides three thousand oxen. From these passages and others it may be seen that the eating of the Chagigah

<sup>a</sup> He states that the number of lambs slain in a single Passover was 256,500. It is difficult to imagine how they could all have been slain, and their blood sprinkled, as described in the Mishna. See p. 2343.

<sup>b</sup> On this text, see *PENTECOST*.

<sup>c</sup> There is no mention of the Omer in *Pesachim*.

was an occasion of social festivity, connected with the festivals, and especially with the Passover. The principal day for sacrificing the Passover Chagigah was the 15th of Nisan, the first day of holy convocation, unless it happened to be the weekly Sabbath. The paschal lamb might be slain on the Sabbath, but not the Chagigah. With this exception, the Chagigah might be offered on any day of the festival, and on some occasions a Chagigah victim was slain on the 14th, especially when the paschal lamb was likely to prove too small to serve as meat for the party (*Pesach*. iv. 4, x. 3; Lightfoot, *Temple Service*, c. xii.; Reland, *Ant.* iv. c. ii. § 2).

That the Chagigah might be boiled, as well as roasted, is proved by 2 Chr. xxxv. 13, "And they roasted the passover with fire according to the ordinance: but the other holy offerings sod they in pots, and in caldrons, and in pans, and divided them speedily among the people."

(i.) *Release of Prisoners.* — It is a question whether the release of a prisoner at the Passover (*Matt.* xxvii. 15; *Mark* xv. 6; *Luke* xxiii. 17; *John* xviii. 39) was a custom of Roman origin resembling what took place at the lectisternium (*Liv.* v. 13); and, in later times, on the birthday of an emperor; or whether it was an old Hebrew usage belonging to the festival, which Pilate allowed the Jews to retain. Grotius argues in favor of the former notion (*On Matt.* xxvii. 15). But others (Hottinger, Schoettgen, Winer) consider that the words of St. John — ἔσται δὲ συνήθεια ἡμῶν — render it most probable that the custom was essentially Hebrew. Schoettgen thinks that there is an allusion to it in *Pesachim* (viii. 6), where it is permitted that a lamb should be slain on the 14th of Nisan for the special use of one in prison to whom a release had been promised. The subject is discussed at length by Hottinger, in his tract *De Ritu dimittendi Reum in Festo Paschatis*, in the *Thesaurus Novus Theologico-Philologicus*.

(k.) *The Second, or Little Passover.* — When the Passover was celebrated the second year, in the wilderness, certain men were prevented from keeping it, owing to their being defiled by contact with a dead body. Being thus prevented from obeying the Divine command, they came anxiously to Moses to inquire what they should do. He was accordingly instructed to institute a second Passover, to be observed on the 14th of the following month, for the benefit of any who had been hindered from keeping the regular one in Nisan (*Num.* ix. 11). The Talmudists called this the Little Passover (חַגְגַּת הַפְּסַחִים). It was distinguished, according to them, from the Greater Passover by the rites lasting only one day, instead of seven days, by it not being required that the Hallel should be sung during the meal, but only when the lamb was slaughtered, and by it not being necessary for leaven to be put out of the houses (*Pesach*. ix. 3; *Buxt. Lex. Tal.* col. 1766).

(l.) *Observances of the Passover recorded in Scripture.* — Of these seven are of chief historical importance.

1. The first Passover in Egypt (*Ex.* xii.).

a Josephus in like manner calls the 14th of Nisan the first day of unleavened bread (*B. J. v.* 3, § 1); and he speaks of the festival of the Passover as lasting eight days (*Ant.* ii. 15, § 1). But he elsewhere calls the 15th of Nisan "the commencement of the feast of unleavened bread." (*Ant.* iii. 10, § 5.) Either mode of

2. The first kept in the desert (*Num.* ix.).

There is no notice of the observance of any other Passover in the desert; and Hupfeld, Keil, and others have concluded that none took place between this one and that at Gilgal. The neglect of circumcision may render this probable. But Calvin imagines that a special commission was given to the people to continue the ordinance of the Passover. (See Keil on *Joshua* v. 10.)

3. That celebrated by Joshua at Gilgal immediately after the circumcision of the people, when the manna ceased (*Josh.* v.).

4. That which Hezekiah observed on the occasion of his restoring the national worship (2 Chr. xxx.). Owing to the impurity of a considerable proportion of the priests in the month Nisan, this Passover was not held till the second month, the proper time for the Little Passover. The postponement was determined by a decree of the congregation. By the same authority, the festival was repeated through a second seven days to serve the need of the vast multitude who wished to attend it. To meet the case of the probable impurity of a great number of the people, the Levites were commanded to slaughter the lambs, and the king prayed that the Lord would pardon every one who was penitent, though his legal pollution might be upon him.

5. The Passover of Josiah in the eighteenth year of his reign (2 Chr. xxxv.). On this occasion, as in the Passover of Hezekiah, the Levites appear to have slain the lambs (*ver.* 6), and it is expressly stated that they flayed them.

6. That celebrated by Ezra after the return from Babylon (*Ezr.* vi.). On this occasion, also, the Levites slew the lambs, and for the same reason as they did in Hezekiah's Passover.

7. The last Passover of our Lord's life.

### III. THE LAST SUPPER.

1. Whether or not the meal at which our Lord instituted the sacrament of the Eucharist was the paschal supper according to the Law, is a question of great difficulty. No point in the Gospel history has been more disputed. If we had nothing to guide us but the three first Gospels, no doubt of the kind could well be raised, though the narratives may not be free from difficulties in themselves. We find them speaking, in accordance with Jewish usage, of the day of the supper as that on which "the Passover must be killed," and as "the first day of unleavened bread" (*Matt.* xxvi. 17; *Mark* xiv. 12; *Luke* xxii. 7). Each relates that the use of the guest-chamber was secured in the manner usual with those who came from a distance to keep the festival. Each states that "they made ready the Passover," and that, when the evening was come, our Lord, taking the place at the head of the family, sat down with the twelve. He himself distinctly calls the meal "this Passover" (*Luke* xxii. 15, 16). After a thanksgiving, he passes round the first cup of wine (*Luke* xxii. 17), and, when the supper is ended, the usual "cup of blessing" (*comp.* *Luke* xxii. 20; 1 *Cor.* x. 16, xi. 25). A hymn is then sung (*Matt.* xxvi. 30; *Mark* xiv.

speaking was evidently allowable: in one case regarding it as a matter of fact that the eating of unleavened bread began on the 14th; and in the other, distinguishing the feast of unleavened bread, lasting from the first day of holy convocation to the concluding one, from the paschal meal.

26), which it is reasonable to suppose was the last part of the Hallel.

If it be granted that the supper was eaten on the evening of the 14th of Nisan, the apprehension, trial, and crucifixion of our Lord must have occurred on Friday the 15th, the day of holy convocation, which was the first of the seven days of the Passover week. The weekly Sabbath on which He lay in the tomb was the 16th, and the Sunday of the resurrection was the 17th.

But, on the other hand, if we had no information but that which is to be gathered from St. John's Gospel, we could not hesitate to infer that the evening of the supper was that of the 13th of Nisan, the day preceding that of the paschal meal. It appears to be spoken of as occurring before the feast of the Passover (xiii. 1, 2). Some of the disciples suppose that Christ told Judas, while they were at supper, to buy what they "had need of against the feast" (xii. 29). In the night which follows the supper, the Jews will not enter the prætorium lest they should be defiled and so not able to "eat the Passover" (xviii. 28). When our Lord is before Pilate, about to be led out to crucifixion, we are told that it was "the preparation of the Passover" (xix. 14). After the crucifixion, the Jews are solicitous, "because it was the preparation, that the bodies should not remain upon the cross on the Sabbath-day, for that Sabbath-day was a high day" (xix. 31).

If we admit, in accordance with the first view of these passages, that the Last Supper was on the 13th of Nisan, our Lord must have been crucified on the 14th, the day on which the paschal lamb was slain and eaten. He lay in the grave on the 15th (which was a "high day" or double Sabbath, because the weekly Sabbath coincided with the day of holy convocation), and the Sunday of the resurrection was the 16th.

It is alleged that this view of the case is strengthened by certain facts in the narratives of the synoptical Gospels, as well as that of St. John, compared with the Law and with what we know of Jewish customs in later times. If the meal was the paschal supper, the law of Ex. xii. 22, that none "shall go out of the door of his house until the morning," must have been broken, not only by Judas (John xiii. 30), but by our Lord and the other disciples (Luke xxii. 39).<sup>a</sup> In like manner it is said that the law for the observance of the 15th, the day of holy convocation with which the paschal week commenced (Ex. xii. 16; Lev. xxiii. 35, &c.), and some express enactments in the Talmud regarding legal proceedings and particular details, such as the carrying of spices, must have been infringed by the Jewish rulers in the apprehending of Christ, in his trials before the high-priest and the Sanhedrim, and in his crucifixion; and also by Simon of Cyrene, who was coming out of the country (Mark xv. 21; Luke xxiii. 26), by Joseph who bought fine linen (Mark xv. 46), by the women who bought spices (Mark xvi. 1; Luke xxiii. 56), and by Nicodemus who brought to the tomb a hundred pounds weight of a mixture of myrrh and aloes (John xix.

<sup>a</sup> It has been stated (p. 2342, note c) that, according to Jewish authorities, this law was disused in later times. But even if this were not the case, it does not seem that there can be much difficulty in adopting the arrangement of Greswell's *Harmony*, that the party did not leave the house to go over the brook till the night.

39). The same objection is considered to lie against the supposition that the disciples could have imagined, on the evening of the Passover, that our Lord was giving directions to Judas respecting the purchase of anything or the giving of alms to the poor. The latter act (except under very special conditions) would have been as much opposed to rabbinical maxims as the former.<sup>b</sup>

It is further urged that the expressions of our Lord, "My time is at hand" (Matt. xxvi. 18), and "this Passover" (Luke xxii. 15), as well as St. Paul's designating it as "the same night that He was betrayed," instead of *the night of the Passover* (1 Cor. xi. 23), and his identifying Christ as our slain paschal lamb (1 Cor. v. 7), seem to point to the time of the supper as being peculiar, and to the time of the crucifixion as being the same as that of the killing of the lamb (Neander and Lücke).

It is not surprising that some modern critics should have given up as hopeless the task of reconciling this difficulty. Several have rejected the narrative of St. John (Bretschneider, Weisse), but a greater number (especially De Wette, Usteri, Ewald, Meyer, and Theile) have taken an opposite course, and have been content with the notion that the three first Evangelists made a mistake and confounded the meal with the Passover.

2. The reconciliations which have been attempted fall under three principal heads:—

i. Those which regard the supper at which our Lord washed the feet of his disciples (John xiii.), as having been a distinct meal eaten one or more days before the regular Passover, of which our Lord partook in due course according to the synoptical narratives.

ii. Those in which it is endeavored to establish that the meal was eaten on the 13th, and that our Lord was crucified on the evening of the true paschal supper.

iii. Those in which the most obvious view of the first three narratives is defended, and in which it is attempted to explain the apparent contradictions in St. John, and the difficulties in reference to the law.

(i.) The first method has the advantage of furnishing the most ready way of accounting for St. John's silence on the institution of the Holy Communion. It has been adopted by Maldonat,<sup>c</sup> Lightfoot, and Bengel, and more recently by Kaiser.<sup>d</sup> Lightfoot identified the supper of John xiii. with the one in the house of Simon the leper at Bethany two days before the Passover, when Mary poured the ointment on the head of our Saviour (Matt. xxvi. 6; Mark xv. 3); and quaintly remarks, "While they are grubbling at the anointing of his head, He does not scruple to wash their feet."<sup>e</sup> Bengel supposes that it was eaten only the evening before the Passover.<sup>f</sup>

But any explanation founded on the supposition of two meals, appears to be rendered untenable by the context. The fact that all four Evangelists introduce in the same connection the foretelling of the treachery of Judas with the dipping of the sop, and of the denials of St. Peter and the going out to

<sup>f</sup> On Matt. xxvi. 17, and John xviii. 28.

the Mount of Olives, can hardly leave a doubt that they are speaking of the same meal. Besides this, the explanation does not touch the greatest difficulties, which are those connected with "the day of preparation."

(ii.) The current of opinion <sup>a</sup> in modern times has set in favor of taking the more obvious interpretation of the passages in St. John, that the supper was eaten on the 13th, and that our Lord was crucified on the 14th. It must, however, be admitted that most of those who advocate this view in some degree ignore the difficulties which it raises in any respectful interpretation of the synoptical narratives. Tittmann (*Meletemata*, p. 476) simply remarks that ἡ πρώτη τῶν ἁγύμων (Matt. xxvi. 17; Mark xiv. 12) should be explained as προτέρα τῶν ἁγύμων. Dean Alford, while he believes that the narrative of St. John "absolutely excludes such a supposition as that our Lord and his disciples ate the usual Passover," acknowledges the difficulty and dismisses it (on Matt. xxvi. 17).

Those who thus hold that the supper was eaten on the 13th day of the month have devised various ways of accounting for the circumstance, of which the following are the most important. It will be observed that in the first three the supper is regarded as a true paschal supper, eaten a day before the usual time; and in the other two, as a meal of a peculiar kind.

(a.) It is assumed that a party of the Jews, probably the Sadducees and those who inclined towards them, used to eat the Passover one day before the rest, and that our Lord approved of their practice. But there is not a shadow of historical evidence of the existence of any party which might have held such a notion until the controversy between the Rabbinites and the Karaites arose, which was not much before the eighth century.<sup>b</sup>

(b.) It has been conjectured that the great body of the Jews had gone wrong in calculating the true Passover-day, placing it a day too late, and that our Lord ate the Passover on what was really the 14th, but what commonly passed as the 13th. This was the opinion of Beza, Bucur, Calovius, and Scaliger. It is favored by Stier. But it is utterly unsupported by historical testimony.

(c.) Calvin supposed that on this occasion, though our Lord thought it right to adhere to the true legal time, the Jews ate the Passover on the 15th instead of the 14th, in order to escape from the burden of two days of strict observance (the day of holy convocation and the weekly Sabbath) coming

together.<sup>c</sup> But that no practice of this kind could have existed so early as our Lord's time is satisfactorily proved in Cocceius' note to *Sanhedrim*, i. § 2.<sup>d</sup>

(d.) Grotius<sup>e</sup> thought that the meal was a πάσχα μνημονευτικόν (like the paschal feast of the modern Jews, and such as might have been observed during the Babylonian captivity), not a πάσχα θύσιμον. But there is no reason to believe that such a mere commemorative rite was ever observed till after the destruction of the Temple.

(e.) A view which has been received with favor far more generally than either of the preceding is, that the Last Supper was instituted by Christ for the occasion, in order that He might himself suffer on the proper evening on which the paschal lamb was slain. Neander says, "He foresaw that He would have to leave his disciples before the Jewish Passover, and determined to give a peculiar meaning to his last meal with them, and to place it in a peculiar relation to the Passover of the Old Covenant, the place of which was to be taken by the meal of the New Covenant" (*Life of Christ*, § 265).<sup>f</sup> This view is substantially the same as that held by Clement, Origen, Erasmus, Calmet, Kuinöl, Winer, Alford.<sup>g</sup>

Erasmus (Paraphrase on John xiii. 1, xviii. 28, Luke xxii. 7) and others have called it an "anticipatory Passover," with the intention, no doubt, to help on a reconciliation between St. John and the other Evangelists. But if this view is to stand, it seems better, in a formal treatment of the subject, not to call it a Passover at all. The difference between it and the Hebrew rite must have been essential. Even if a lamb was eaten in the supper, it can hardly be imagined that the priests would have performed the essential acts of sprinkling the blood and offering the fat on any day besides the legal one (see Maimonides quoted by Otho, *Lex.* p. 501). It could not therefore have been a true paschal sacrifice.

(iii.) They who take the facts as they appear to lie on the surface of the synoptical narratives<sup>h</sup> start from a simpler point. They have nothing unexpected in the occurrences to account for, but they have to show that the passages in St. John may be fairly interpreted in such a manner as not to interfere with their own conclusion, and to meet the objections suggested by the laws relating to the observance of the festival. We shall give in succession, as briefly as we can, what appear to be their best explanations of the passages in question.

<sup>a</sup> Lücke, Ideler, Tittmann, Bleek, De Wette, Neander, Tischendorf, Winer [Meyer, Brückner, Ewald, Holtzmann, Godet, Caspari, Baur, Hilgenfeld, Schoiten], Ebrard [formerly], Alford, Ellicott; of earlier critics, Erasmus, Grotius, Suicer, Carpov.

<sup>b</sup> Iken (*Dissertationes*, vol. ii. diss. 10 and 12), forgetting the late date of the Karaitic controversy, supposed that our Lord might have followed them in making the day which, according to their custom, was calculated from the first appearance of the moon. Carpov (*App. Crit.* p. 430) advocates the same notion, without naming the Karaites. Ebrard conjectures that some of the poorer Galileans may have submitted to eat the Passover a day too early to suit the convenience of the priests, who were overdone with the labor of sprinkling the blood and (as he strangely imagines) of slaughtering the lambs. [Ebrard has given up this hypothesis. — A.]

<sup>c</sup> Harm. in Matt. xxvi. 17, li. 305, edit. Tholuck.

<sup>d</sup> Surenhusius' *Mishna*, iv. 209.

<sup>e</sup> On Matt. xxvi. 19, and John xiii. 1.

<sup>f</sup> Assuming this view to be correct, may not the change in the day made by our Lord have some analogy to the change of the weekly day of rest from the seventh to the first day?

<sup>g</sup> Dean Ellicott regards the meal as "a paschal supper" eaten twenty-four hours before that of the other Jews, "within what were popularly considered the limits of the festival," and would understand the expression in Ex. xii. 6, "between the two evenings," as denoting the time between the evenings of the 13th and 14th of the month. But see note *e*, p. 2342. A somewhat similar explanation is given [by the Rev. Henry Constable] in the *Journal of Sacred Literature* for Oct. 1861.

<sup>h</sup> Lightfoot, Bochart, Reland, Schoettgen, Tholuck, Olshausen, Stier, Lange, Hengstenberg, Robinson, Davidson [formerly], Fairbairn, [Norton, Andrews, Wieseler, Luthardt, Bäumlain, Ebrard since 1862, Riggenbach.]

(a.) John xiii. 1, 2. Does *πρὸ τῆς ἑορτῆς* limit the time only of the proposition in the first verse, or is the limitation to be carried on to verse 2, so as to refer to the supper? In the latter case, for which De Wette and others say there is "a logical necessity," *εἰς τέλος ἠγάπησεν αὐτοὺς* must refer more directly to the manifestation of his love which He was about to give to his disciples in washing their feet; and the natural conclusion is, that the meal was one eaten before the paschal supper. Boehart, however, contends that *πρὸ τῆς ἑορτῆς* is equivalent to *ἐν τῷ προεορτίῳ*, "quod ita præcedit festum, ut tamen sit pars festi." Stier agrees with him. Others take *πάσχα* to mean the seven days of unleavened bread as not including the eating of the lamb, and justify this limitation by St. Luke xxii. 1 (*ἡ ἑορτὴ τῶν ἀζύμων ἢ λεγομένη πάσχα*). See note c, p. 2352. But not a few of those who take this side of the main question (Olshausen, Wieseler, Tholuck, and others) regard the first verse as complete in itself; understanding its purport to be that "Before the Passover, in the prospect of his departure, the Saviour's love was actively called forth towards his followers, and He gave proof of his love to the last." Tholuck remarks that the expression *δείπνου γενομένου* (Tischendorf reads *γινόμενου*), "while supper was going on" (not as in the A. V., "supper being ended") is very abrupt if we refer it to anything except the Passover. [See also Norton's note. — A.] The Evangelist would then rather have used some such expression as, *καὶ ἐποίησαν αὐτῷ δείπνον*; and he considers that this view is confirmed by John xxi. 20, where this supper is spoken of as if it was something familiarly known and not peculiar in its character — *ὃς καὶ ἀπέπεσεν ἐν τῷ δείπνῳ*. On the whole, Neander himself admits that nothing can be safely inferred from John xiii. 1, 2, in favor of the supper having taken place on the 13th.

(b.) John xiii. 29. It is urged that the things of which they had "need against the feast," might have been the provisions for the Chagigah, perhaps with what else was required for the seven days of unleavened bread. The usual day for sacrificing the Chagigah was the 15th, which was then commencing (see p. 2347 a). But there is another difficulty, in the disciples thinking it likely either that purchases could be made, or that alms could be given to the poor, on a day of holy convocation: This is of course a difficulty of the same kind as that which meets us in the purchases actually made by the women, by Joseph, and Nicodemus. Now, it must be admitted, that we have no proof that the strict rabbinical maxims which have been appealed to on this point existed in the time of our Saviour, and that it is highly probable that the letter of the law in regard to trading was habitually relaxed in the case of what was required for religious rites, or for burials. There was plainly a

distinction recognized between a day of holy convocation and the Sabbath in the Mosaic Law itself in respect to the obtaining and preparation of food under which head the Chagigah might come (Ex. xii. 16); and in the Mishna the same distinction is clearly maintained (*Yom Tob*, v. 2, and *Megilla*, i. 5). It also appears that the School of Hillel allowed more liberty in certain particulars on festivals and fasts in the night than in the day-time.<sup>a</sup> And it is expressly stated in the Mishna, that on the Sabbath itself, wine, oil, and bread could be

obtained by leaving a cloak (*רִבְעִי*),<sup>b</sup> as a pledge, and when the 14th of Nisan fell on a Sabbath the paschal lamb could be obtained in like manner (*Shabbath*, xxiii. 1). Alms also could be given to the poor under certain conditions (*Shabbath*, i. 1).

(c.) John xviii. 28. The Jews refused to enter the prætorium, lest they should be defiled and so disqualified from eating the Passover. Neander and others deny that this passage can possibly refer to anything but the paschal supper. But it is alleged that the words *ἵνα φάγωσι τὸ πάσχα*, may either be taken in a general sense as meaning "that they might go on keeping the passover,"<sup>c</sup> or that *τὸ πάσχα* may be understood specifically to denote the Chagigah. That it might be so used is rendered probable by Luke xxii. 1; and the Hebrew word which it represents (*פֶּסַח*) evidently refers equally to the victims for the Chagigah and the paschal lamb (Deut. xvi. 2), where it is commanded that the Passover should be sacrificed "of the flock and the herd."<sup>d</sup> In the plural it is used in the same manner (2 Chr. xxxv. 7, 9). It is moreover to be kept in view that the Passover might be eaten by those who had incurred a degree of legal impurity, and that this was not the case in respect to the Chagigah.<sup>e</sup> Joseph appears not to have participated in the scruple of the other rulers, as he entered the prætorium to beg the body of Jesus (Mark xv. 43). Lightfoot (*Ex. Heb.* in loc.) goes so far as to draw an argument in favor of the 14th being the day of the supper from the very text in question. He says that the slight defilement incurred by entering a Gentile house, had the Jews merely intended to eat the supper in the evening, might have been done away in good time by mere ablution; but that as the festival had actually commenced, and they were probably just about to eat the Chagigah, they could not resort even to such a simple mode of purification.<sup>f</sup>

(d.) John xix. 14. "The preparation of the Passover" at first sight would seem as if it must be the preparation for the Passover on the 14th, a time set apart for making ready for the paschal week and for the paschal supper in particular. It is naturally so understood by those who advocate the notion that the Last Supper was eaten on the 13th. But they who take the opposite view affirm

<sup>a</sup> *Pesachim*, iv. 5. The special application of the license is rather obscure. See Bartenora's note. Comp. also *Pesach.* vi. 2.

<sup>b</sup> This word may mean an outer garment of any form. But it is more frequently used to denote the igned scarf worn by every Jew in the service of the synagogue (Buxt. *Lea. Talm.* col. 877).

<sup>c</sup> St. Augustine says, "O impia cœcitas! Habituculo videlicet contaminarentur alieno, et non contaminarentur scelere proprio? Alienigenæ iudicis prætorio contaminari timebant, et fratris innocentis sanguine non timebant. Dies enim agere cœperant

azymorum: quibus diebus contaminatio illis erat in alienigenæ habitaculum intrare" (*Tract. cxiv. in Joan.* xviii. 2).

<sup>d</sup> See p. 2346 b, and Schoettgen on John xviii. 28.

<sup>e</sup> See 2 Chr. xxx. 17; also *Pesachim*, vii. 4, with Maimonides' note.

<sup>f</sup> Dr. Fairbairn takes the expression, "that they might eat the Passover," in its limited sense, and supposes that these Jews, in their determined hatred, were willing to put off the meal to the verge of, or even beyond, the legal time (*Herm. Manual*, p. 341).

that, though there was a regular "preparation" for the Sabbath, there is no mention of any "preparation" for the festivals (Bochart, *Reland*, Tholuck, Hengstenberg). The word *παρασκευή* is expressly explained by *προσάββατον* (Mark xv. 42: Lachmann reads *πρὸς σάββατον*). It seems to be essentially connected with the Sabbath itself (John xix. 31).<sup>a</sup> There is no mention whatever of the preparation for the Sabbath in the Old Testament, but it is mentioned by Josephus (*Ant.* xvi. 6, § 2), and it would seem from him that the time of preparation formally commenced at the ninth hour of the sixth day of the week. The *προσάββατον* is named in *Judith* viii. 6 as one of the times on which devout Jews suspended their fasts. It was called by the Rabbis *שַׁבָּת פְּרִיָּה*;

*quia est שַׁבָּת פְּרִיָּה* (Buxt. *Lex. Talm.* col. 1659). The phrase in John xix. 14 may thus be understood as the preparation of the Sabbath which fell in the Passover week. This mode of taking the expression seems to be justified by Ignatius, who calls the Sabbath which occurred in the festival *σάββατον τοῦ πάσχα* (*Ep. ad Phil.* 13), and by Socrates, who calls it *σάββατον τῆς ἑορτῆς* (*Hist. Eccl.* v. 22). If these arguments are admitted, the day of the preparation mentioned in the Gospels might have fallen on the day of holy convocation, the 15th of Nisan.

(e.) John xix. 31. "That Sabbath-day was a high day" — *ἡμέρα μεγάλη*. Any Sabbath occurring in the Passover week might have been considered "a high day," as deriving an accession of dignity from the festival. But it is assumed by those who fix the supper on the 13th that the term was applied, owing to the 15th being "a double Sabbath," from the coincidence of the day of holy convocation with the weekly festival. Those, on the other hand, who identify the supper with the paschal meal, contend that the special dignity of the day resulted from its being that on which the Omer was offered, and from which were reckoned the fifty days to Pentecost. One explanation of the term seems to be as good as the other.

(f.) The difficulty of supposing that our Lord's apprehension, trial, and crucifixion took place on the day of holy convocation has been strongly urged.<sup>b</sup> If many of the rabbinical maxims for the observance of such days which have been handed down to us were then in force, these occurrences certainly could not have taken place. But the statements which refer to Jewish usage in regard to legal proceedings on sacred days are very inconsistent with each other. Some of them make the difficulty equally great whether we suppose the trial to have taken place on the 14th or the 15th. In others, there are exceptions permitted which seem to go far to meet the case before us. For

example, the Mishna forbids that a capital offender should be examined in the night, or on the day before the Sabbath or a feast-day (*Sanhedrim*, iv. 1). This law is modified by the glosses of the Gemara.<sup>c</sup> But if it had been recognized in its obvious meaning by the Jewish rulers, they would have outraged it in as great a degree on the preceding day (*i. e.* the 14th) as on the day of holy convocation before the Sabbath. It was also forbidden to administer justice on a high feast-day, or to carry arms (*Yom Tob*, v. 2). But these prohibitions are expressly distinguished from unconditional precepts, and are reckoned amongst those which may be set aside by circumstances. The members of the Sanhedrim were forbidden to eat any food on the same day after condemning a criminal.<sup>d</sup> Yet we find them intending to "eat the Passover" (John xviii. 28) after pronouncing the sentence (*Matt.* xxvi. 65, 66).

It was, however, expressly permitted that the Sanhedrim might assemble on the Sabbath as well as on feast-days, not indeed in their usual chamber, but in a place near the court of the women.<sup>e</sup> And there is a remarkable passage in the Mishna in which it is commanded that an elder not submitting to the voice of the Sanhedrim should be kept at Jerusalem till one of the three great festivals, and then executed, in accordance with Deut. xvii. 12, 13 (*Sanhedrim*, x. 4). Nothing is said to lead us to infer that the execution could not take place on one of the days of holy convocation. It is, however, hardly necessary to refer to this, or any similar authority, in respect to the crucifixion, which was carried out in conformity with the sentence of the Roman procurator, not that of the Sanhedrim.

But we have better proof than either the Mishna or the Gemara can afford that the Jews did not hesitate, in the time of the Roman domination, to carry arms and to apprehend a prisoner on a solemn feast-day. We find them at the feast of Tabernacles, on the "great day of the feast," sending out officers to take our Lord, and rebuking them for not bringing Him (John vii. 32-45). St. Peter also was seized during the Passover (*Acts* xii. 3, 4). And, again, the reason alleged by the rulers for not apprehending Jesus was, not the sanctity of the festival, but the fear of an uproar among the multitude which was assembled (*Matt.* xxvi. 5).

On the whole, notwithstanding the express declaration of the Law and of the Mishna that the days of holy convocation were to be observed precisely as the Sabbath, except in the preparation of food, it is highly probable that considerable license was allowed in regard to them, as we have already observed. It is very evident that the festival times were characterized by a free and jubilant character

<sup>a</sup> It cannot, however, be denied that the days of holy convocation are sometimes designated in the O. T. simply as Sabbaths (*Lev.* xvi. 31, xviii. 11, 32). It is therefore not quite impossible that the language of the Gospels considered by itself, might refer to them. [PENTECOST.]

<sup>b</sup> Especially by Greswell (*Dissert.* iii. 156).

<sup>c</sup> See the notes of Cocceius in Surenhusius, iv. 226.

<sup>d</sup> *Ab. Gem. Sanhedrim*, quoted by Lightfoot on *Matt.* xxvii. 1. The application of this to the point under hand will, however, hinge on the way in which we understand it not to have been lawful for the Jews to put any man to death (*John* xviii. 31), and therefore

to pronounce sentence in the legal sense. If we suppose that the Roman government had not deprived them of the power of life and death, it may have been to avoid breaking their law, as expressed in *Sanhedrim*, iv. 1, that they wished to throw the matter on the procurator. See Biscoe, *Lectures on the Acts*, p. 166; Scaliger's note in the *Critici Sacri*; on *John* xviii. 31; Lightfoot, *Ex. Heb. Matt.* xxvi. 3, and *John* xviii. 31, where the evidence is given which is in favor of the Jews having resigned the right of capital punishment forty years before the destruction of Jerusalem. <sup>e</sup> *Ab. Gem. Sanhedrim*.

which did not belong, in the same degree, to the Sabbath, and which was plainly not restricted to one days which fell between the days of holy convocation (Lev. xxiii. 40; Deut. xii. 7, xiv. 26; see p. 2343). It should also be observed that while the law of the Sabbath was enforced on strangers dwelling amongst the Israelites, such was not the case with the law of the Festivals. A greater freedom of action in cases of urgent need would naturally follow, and it is not difficult to suppose that the women who "rested on the Sabbath-day according to the commandment" had prepared the spices and linen for the tomb on the day of holy convocation. To say nothing of the way in which the question might be effected by the much greater license permitted by the school of Hillel than by the school of Shammai, in all matters of this kind, it is remarkable that we find, on the Sabbath-day itself, not only Joseph (Mark xv. 43), but the chief priests and Pharisees coming to Pilate, and, as it would seem, entering the prætorium (Matt. xxvii. 62).

3. There is a strange story preserved in the Gemara (*Sanhedrin*, vi. 2) that our Lord having vainly endeavored during forty days to find an advocate, was sentenced, and, on the 14th of Nisan, stoned, and afterwards hanged. As we know that the difficulty of the Gospel narratives had been perceived long before this statement could have been written, and as the two opposite opinions on the chief question were both current, the writer might easily have taken up one or the other. The statement cannot be regarded as worth anything in the way of evidence.<sup>a</sup>

Not much use can be made in the controversy of the testimonies of the Fathers. But few of them attempted to consider the question critically. Eusebius (*Hist. Ecc.* v. 23, 24) has recorded the traditions which were in favor of St. John having kept Easter on the 14th of the month. It has been thought that those traditions rather help the conclusion that the supper was on the 14th. But the question on which Eusebius brings them to bear is simply whether the Christian festival should be observed on the 14th, the day ἐν ᾧ θύειν τὸ πρόβατον Ἰουδαίους προηγόρευτο, on whatever day of the week it might fall, or on the Sunday of the resurrection. It seems that nothing whatever can be safely inferred from them respecting the day of

<sup>a</sup> Other Rabbinical authorities countenance the statement that Christ was executed on the 14th of the month (see Jost, *Judenth.* i. 404). But this seems to be a case in which, for the reason stated above, numbers do not add to the weight of the testimony.

<sup>b</sup> Numerous Patristic authorities are stated by Maldonot on Matt. xxvi.

<sup>c</sup> Hupfeld has devised an arrangement of the passages in the Pentateuch bearing on the Passover so as to show, according to this theory, their relative antiquity. The order is as follows:—(1) Ex. xxiii. 14-17; (2) Ex. xxxiv. 18-26; (3) Ex. xiii. 3-10; (4) Ex. xii. 15-20; (5) Ex. xii. 1-14; (6) Ex. xii. 43-50; (7) Num. ix. 10-14.

The view of Baur, that the Passover was an astronomical festival and the lamb a symbol of the sign Aries, and that of Von Bohlen, that it resembled the sun-feast of the Peruvians, are well exposed by Bührer (*Symbolik*). Our own Spencer has endeavored in his usual manner to show that many details of the festival were derived from heathen sources, though he admits the originality of the whole.

It may seem at first sight as if some countenance were given to the notion that the feast of unleavened

the month of the supper or the crucifixion. Clement of Alexandria and Origen appeal to the Gospel of St. John as deciding in favor of the 13th. Chrysostom expresses himself doubtfully between the two. St. Augustine was in favor of the 14th.<sup>b</sup>

4. It must be admitted that the narrative of St. John, as far as the mere succession of events is concerned, bears consistent testimony in favor of the Last Supper having been eaten on the evening before the Passover. That testimony, however, does not appear to be so distinct, and so incapable of a second interpretation, as that of the synoptical Gospels, in favor of the meal having been the paschal supper itself, at the legal time (see especially Matt. xxvi. 17; Mark xiv. 1, 12; Luke xxii. 7). Whether the explanations of the passages in St. John, and of the difficulties resulting from the nature of the occurrences related, compared with the enactments of the Jewish law, be considered satisfactory or not, due weight should be given to the antecedent probability that the meal was no other than the regular Passover, and that the reasonableness of the contrary view cannot be maintained without some artificial theory, having no proper foundation either in Scripture or ancient testimony of any kind.

#### IV. MEANING OF THE PASSOVER.

1. Each of the three great festivals contained a reference to the annual course of nature. Two, at least, of them—the first and the last—also commemorated events in the history of the chosen people. The coincidence of the times of their observance with the most marked periods in the process of gathering in the fruits of the earth, has not unnaturally suggested the notion that their agricultural significance is the more ancient; that in fact they were originally harvest feasts observed by the patriarchs, and that their historical meaning was superadded in later times (Ewald, Hupfeld<sup>c</sup>).

It must be admitted that the relation to the natural year expressed in the Passover was less marked than that in Pentecost or Tabernacles, while its historical import was deeper and more pointed. It seems hardly possible to study the history of the Passover with candor and attention, as it stands in the Scriptures, without being driven to the conclusion that it was, at the very first, essentially the commemoration of a great historical fact. That

bread was originally a distinct festival from the Passover, by such passages as Lev. xxiii. 5, 6: "In the fourteenth day of the first month at even is the Lord's Passover; and on the fifteenth day of the same month is the feast of unleavened bread unto the Lord: seven days ye must eat unleavened bread" (see also Num. xxviii. 16, 17). Josephus in like manner speaks of the feast of unleavened bread as "following the Passover" (*Ant.* iii. 10, § 5). But such language may mean no more than the distinction between the paschal supper and the seven days of unleavened bread, which is so obviously implied in the fact that the eating of unleavened bread was observed by the country Jews who were at home, though they could not partake of the paschal lamb without going to Jerusalem. Every member of the household had to abstain from leavened bread, but some only went up to the paschal meal. (See Maimon. *De Fermentato et Azymo*, vi. 1. It is evident that the common usage, in later times at least, was to employ, as equivalent terms, the feast of the Passover, and the feast of unleavened bread (Matt. xxvi. 17; Mark xiv. 12; Luke xxii. 1; Joseph. *Ant.* xiv. 2, § 1; E. J. li. 1, § 3). See note a, p. 2347.

part of its ceremonies which has a direct agricultural reference — the offering of the Omer — holds a very subordinate place.

But as regards the whole of the feasts, it is not very easy to imagine that the rites which belonged to them connected with the harvest, were of patriarchal origin. Such rites were adapted for the religion of an agricultural people, not for that of shepherds like the patriarchs. It would seem, therefore, that we gain but little by speculating on the simple impression contained in the Pentateuch, that the feasts were ordained by Moses in their integrity, and that they were arranged with a view to the religious wants of the people when they were to be settled in the Land of Promise.

2. The deliverance from Egypt was regarded as the starting-point of the Hebrew nation. The Israelites were then raised from the condition of bondmen under a foreign tyrant to that of a free people owing allegiance to no one but Jehovah. "Ye have seen," said the Lord, "what I did unto the Egyptians, and how I bare you on eagles' wings and brought you unto myself" (Ex. xix. 4). The prophet in a later age spoke of the event as a *creation* and a *redemption* of the nation. God declares himself to be "the creator of Israel," in immediate connection with evident allusions to his having brought them out of Egypt; such as his having made "a way in the sea, and a path in the mighty waters," and his having overthrown "the chariot and horse, the army and the power" (Is. xliii. 1, 15-17). The Exodus was thus looked upon as the birth of the nation; the Passover was its annual birthday feast. Nearly all the rites of the festival, if explained in the most natural manner, appear to point to this as its primary meaning. It was the yearly memorial of the dedication of the people to Him who had saved their first-born from the destroyer, in order that they might be made holy to Himself. This was the lesson which they were to teach to their children throughout all generations. When the young Hebrew asked his father regarding the paschal lamb, "What is this?" the answer prescribed was, "By strength of hand the Lord brought us out from Egypt, from the house of bondage: and it came to pass when Pharaoh would hardly let us go, that the Lord slew all the first-born in the land of Egypt, both the first-born of man and the first-born of beast; therefore I sacrifice to the Lord all that openeth the womb, being males; but all the first-born of my children I redeem" (Ex. xiii. 14, 15). Hence, in the periods of great national restoration in the times of Joshua, Hezekiah, Josiah, and Ezra, the Passover was observed in a special manner, to remind the people of their true position, and to mark their renewal of the covenant which their fathers had made.

3. (a.) The paschal lamb must of course be regarded as the leading feature in the ceremonial of the festival. Some Protestant divines during the last two centuries (Calov, Carpov), laying great stress on the fact that nothing is said in the Law respecting either the imposition of the hands of the

priest on the head of the lamb, or the bestowing of any portion of the flesh on the priest, have denied that it was a sacrifice in the proper sense of the word. They appear to have been tempted to take this view, in order to deprive the Romanists of an analogical argument bearing on the Romish doctrine of the Lord's Supper. They affirmed that the lamb was *sacramentum*, not *sacrificium*. But most of their contemporaries (Cudworth, Boehart, Vitringa), and nearly all modern critics, have held that it was in the strictest sense a sacrifice. The chief characteristics of a sacrifice are all distinctly ascribed to it. It was offered in the holy place (Deut. xvi. 5, 6); the blood was sprinkled on the altar, and the fat was burned (2 Chr. xxx. 16, xxxv. 11). Philo and Josephus commonly call it *θύμα* or *θύσία*. The language of Ex. xii. 27, xxiii. 18, Num. ix. 7, Deut. xvi. 2, 5, together with 1 Cor. v. 7, would seem to decide the question beyond the reach of doubt.

As the original institution of the Passover in Egypt preceded the establishment of the priesthood and the regulation of the service of the tabernacle, it necessarily fell short in several particulars of the observance of the festival according to the fully developed ceremonial law (see H. 1). The head of the family slew the lamb in his own house, not in the holy place: the blood was sprinkled on the doorway, not on the altar. But when the law was perfected, certain particulars were altered in order to assimilate the Passover to the accustomed order of religious service. It has been conjectured that the imposition of the hands of the priest was one of these particulars, though it is not recorded (Kurtz). But whether this was the case or not, the other changes which have been stated seem to be abundantly sufficient for the argument. It can hardly be doubted that the paschal lamb was regarded as the great annual peace-offering of the family, a thank-offering for the existence and preservation of the nation (Ex. xiii. 14-16), the typical sacrifice of the elected and reconciled children of the promise. It was peculiarly the Lord's own sacrifice (Ex. xxiii. 18, xxiv. 25). It was more ancient than the written Law, and called to mind that covenant on which the Law was based. It retained in a special manner the expression of the sacredness of the whole people, and of the divine mission of the head of every family,<sup>a</sup> according to the spirit of the old patriarchal priesthood. No part of the victim was given to the priest as in other peace-offerings, because the father was the priest himself. The custom, handed on from age to age, thus guarded from superstition the idea of a priesthood placed in the members of a single tribe, while it visibly set forth the promise which was connected with the deliverance of the people from Egypt. "Ye shall be unto me a kingdom of priests and a holy nation" (Ex. xix. 6).<sup>b</sup> In this way it became a testimony in favor of domestic worship. In the historical fact that the blood, in later times sprinkled on the altar, had at first had its divinely appointed place on the lintels and door-posts,<sup>c</sup> it was de-

<sup>a</sup> The fact which has been noticed, H. 3, (f), is remarkable in this connection, that those who had not incurred a degree of impurity sufficient to disqualify them from eating the paschal lamb, were yet not pure enough to take the priestly part in slaying it.

<sup>b</sup> Philo, speaking of the Passover, says, *σύμπαν τὸ ἔθνος ἱεράτοι. τὸν κατὰ μέρος ἐκάστον τὰς ὑπὲρ αὐτοῦ θυσίας ἀνάγοντος τότε καὶ χειροουργῶντος. Ὁ μὲν οὖν*

*ἄλλος ἅπας λέως ἐγγήθει καὶ φαίδρος ἦν, ἐκάστον νομίζοντος ἱεροσύνην τετιμηθῆσαι.—De Vit. Moysis, iii. 29, vol. iv. p. 250, ed. Tauch.*

<sup>c</sup> As regards the mere place of sprinkling in the first Passover, on the reason of which there has been some speculation, Bähr reasonably supposes that the lintels and door-posts were selected as parts of the house most obvious to passers-by, and to which in

clared that the national altar itself represented the sanctity which belonged to the house of every Israelite, not that only which belonged to the nation as a whole.

A question, perhaps not a wise one, has been raised regarding the purpose of the sprinkling of the blood on the lintels and door-posts. Some have considered that it was meant as a mark to guide the destroying angel. Others suppose that it was merely a sign to confirm the faith of the Israelites in their safety and deliverance.<sup>a</sup> Surely neither of these views can stand alone. The sprinkling must have been an act of faith and obedience which God accepted with favor. "Through faith (we are told) Moses kept the Passover and the sprinkling of blood, lest he that destroyed the first-born should touch them" (Heb. xi. 28). Whatever else it may have been, it was certainly an essential part of a sacrament, of an "effectual sign of grace and of God's good will," expressing the mutual relation into which the covenant had brought the Creator and the creature. That it also denoted the purification of the children of Israel from the abominations of the Egyptians, and so had the accustomed significance of the sprinkling of blood under the Law (Heb. ix. 22), is evidently in entire consistency with this view.

No satisfactory reason has been assigned for the command to choose the lamb four days before the paschal supper. Kurtz (following Hofmann) fancies that the four days signified the four centuries of Egyptian bondage. As in later times, the rule appears not to have been observed (see p. 2342); the reason of it was probably of a temporary nature.

That the lamb was to be roasted and not boiled, has been supposed to commemorate the haste of the departure of the Israelites.<sup>b</sup> Spencer observes, on the other hand, that, as they had their cooking vessels with them, one mode would have been as expeditious as the other. Some think that, like the dress and the posture in which the first Passover was to be eaten, it was intended to remind the people that they were now no longer to regard themselves as settled down in a home, but as a host upon the march, roasting being the proper military mode of dressing meat. Kurtz conjectures that the lamb was to be roasted with fire, the purifying element, because the meat was thus left pure, without the mixture even of the water, which would have entered into it in boiling. The meat in its purity would thus correspond in signification with the unleavened bread (see II. 3, (b)).

It is not difficult to determine the reason of the command, "not a bone of him shall be broken." The lamb was to be a symbol of unity; the unity of the family, the unity of the nation, the unity of God with his people whom He had taken into covenant with Himself. While the flesh was divided into portions, so that each member of the family could partake, the skeleton was left one and entire to remind them of the bonds which united

descriptions of different kinds were often attached. Comp. Deut. vi. 9.

<sup>a</sup> Especially Bochart and Bähr. The former says, "Hoc signum Deo non datum sed Hebraeis ut eo confirmati de liberatione certi sint."

<sup>b</sup> So Bähr and most of the Jewish authorities.

<sup>c</sup> Hupfeld imagines that bread without leaven, being the simplest result of cooked grain, characterized the

them. Thus the words of the Law are applied to the body of our Saviour, as the type of that still higher unity of which He was himself to be the author and centre (John xix. 36).

The same significance may evidently be attached to the prohibition that no part of the meat should be kept for another meal, or carried to another house. The paschal meal in each house was to be one, whole and entire.

(b.) The unleavened bread ranks next in importance to the paschal lamb. The notion has been very generally held, or taken for granted, both by Christian and Jewish writers of all ages, that it was intended to remind the Israelites of the unleavened cakes which they were obliged to eat in their hasty flight (Ex. xii. 34, 39). But there is not the least intimation to this effect in the sacred narrative. On the contrary, the command was given to Moses and Aaron that unleavened bread should be eaten with the lamb before the circumstance occurred upon which this explanation is based. Comp. Ex. xii. 8 with xii. 39.

It has been considered by some (Ewald, Winer, and the modern Jews) that the unleavened bread and the bitter herbs alike owe their meaning to their being regarded as unpalatable food. The expression "bread of affliction," *לֶחֶם עֲנִי* (Deut. xvi. 3), is regarded as equivalent to *fasting-bread*, and on this ground Ewald ascribes something of the character of a fast to the Passover. But this seems to be wholly inconsistent with the pervading joyous nature of the festival. The *bread of affliction* may mean bread which, in present gladness, commemorated, either in itself, or in common with the other elements of the feast, the past affliction of the people (Bähr, Kurtz, Hofmann). It should not be forgotten that unleavened bread was not peculiar to the Passover. The ordinary "meat-offering" was unleavened (Lev. ii. 4, 5, vii. 12, x. 12, &c.), and so was the shewbread (Lev. xxiv. 5-9). The use of unleavened bread in the consecration of the priests (Ex. xxix. 23), and in the offering of the Nazarite (Num. vi. 19), is interesting in relation to the Passover, as being apparently connected with the consecration of the person. On the whole, we are warranted in concluding that unleavened bread had a peculiar sacrificial character, according to the Law, and it can hardly be supposed that a particular kind of food should have been offered to the Lord because it was insipid or unpalatable.<sup>c</sup>

It seems more reasonable to accept St. Paul's reference to the subject (1 Cor. v. 6-8) as furnishing the true meaning of the symbol. Fermentation is decomposition, a dissolution of unity. This must be more obvious to ordinary eyes where the leaven in common use is a piece of sour dough, instead of the expedients at present employed in this country to make bread light. The pure dry biscuit, as distinguished from bread thus leavened, would be an apt emblem of unchanged duration, and, in its freedom from foreign mixture, of purity also.<sup>d</sup> If this was the accepted meaning among

old agricultural festival which existed before the sacrifice of the lamb was instituted.

<sup>d</sup> The root *צָבַח* signifies "to make dry." Kurtz thinks that *dryness* rather than *sweetness* is the idea in *מַצֵּיִת*. But *sweet* in this connection has the sense of *un-ruptured*, or *incorruptible*, and hence it

the Jews, "the unleavened bread of sincerity and truth" must have been a clear and familiar expression to St. Paul's Jewish readers. Bähr conceives that as the blood of the lamb figured the act of purifying, the getting rid of the corruptions of Egypt, the unleavened bread signified the abiding state of consecrated holiness.

(c.) The bitter herbs are generally understood by the Jewish writers to signify the bitter sufferings which the Israelites had endured<sup>a</sup> (Ex. i. 14). But it has been remarked by Aben Ezra that these herbs are a good and wholesome accompaniment for meat, and are now, and appear to have been in ancient times, commonly so eaten (see p. 2345).

(d.) The offering of the Omer, though it is obviously that part of the festival which is immediately connected with the course of the seasons, bore a distinct analogy to its historical significance. It may have denoted a deliverance from winter, as the lamb signified deliverance from the bondage of Egypt, which might well be considered as a winter in the history of the nation.<sup>b</sup> Again, the consecration of the first-fruits, the first-born of the soil, is an easy type of the consecration of the first-born of the Israelites. This seems to be countenanced by Ex. xiii. 2-4, where the sanctification of the first-born, and the unleavened bread which figured it, seem to be emphatically connected with the time of year, Abib, *the month of green ears*.<sup>c</sup>

4. No other shadow of good things to come contained in the Law can vie with the festival of the Passover in expressiveness and completeness. Hence we are so often reminded of it, more or less distinctly, in the ritual and language of the Church. Its outline, considered in reference to the great deliverance of the Israelites which it commemorated, and many of its minute details, have been appropriated as current expressions of the truths which

easily connected with dryness. Perhaps our Authorized Version has lost something in expressiveness by substituting the term "unleavened bread" for the "sweet bread" of the older versions, which still holds its place in I Esdr. i. 19.

a מריר Istud comedimus quia amaritudine affectur Ægyptii vitam patrum nostrorum in Ægypto. — Maimon. in *Pesachim*, viii. 4.

b This application of the rite perhaps derives some support from the form in which the ordinary first-fruit offering was presented in the Temple. [FIRST-FRUIT.] The call of Jacob ("a Syrian ready to perish"), and the deliverance of his children from Egypt, with their settlement in the land that flowed with milk and honey, were then related (Deut. xxvi. 5-10). It is worthy of notice that, according to *Pesachim*, an exposition of this passage was an important part of the reply which the father gave to his son's inquiry during the paschal supper.

The account of the procession in offering the first-fruits in the Mishna (*Biccurim*), with the probable reference to the subject in Is. xxx. 29, can hardly have anything to do with the Passover. The connection appears to have been suggested by the tradition mentioned by Aben Ezra, that the army of Sennacherib was smitten on the night of the Passover. Regarding this tradition, Vitringa says, "Non recipio, nec sperno" (*In Isaiam* xxx. 29).

c See Gesenius, *Thes.* In the LXX. it is called *μήν των νέων*, *sc. καρπών*. If *Nisan* is a Semitic word, Gesenius thinks that it means the *month of flowers*, in agreement with a passage in Macarius (*Hom.* xvii.) in which it is called *μήν των άνθών*. But he suggests in- stead to favor an explanation of the word suggested by a Zend root, according to which it would signify *the month of New Year's Day*.

God has revealed to us in the fullness of times in sending his Son upon earth.

It is not surprising that ecclesiastical writers should have pushed the comparison so far, and exercised their fancy in the application of trifling or accidental particulars either to the facts of our Lord's life or to truths connected with it.<sup>d</sup> But, keeping within the limits of sober interpretation indicated by Scripture itself, the application is singularly full and edifying. The deliverance of Israel according to the flesh from the bondage of Egypt was always so regarded and described by the prophets as to render it a most apt type of the deliverance of the spiritual Israel from the bondage of sin into the glorious liberty with which Christ has made us free (see IV. 2). The blood of the first paschal lambs sprinkled on the door-ways of the houses has ever been regarded as the best defined foreshadowing of that blood which has redeemed, saved, and sanctified us (Heb. xi. 28). The lamb itself, sacrificed by the worshipper without the intervention of a priest, and its flesh being eaten without reserve as a meal, exhibits the most perfect of peace-offerings, the closest type of the atoning Sacrifice who died for us and has made our peace with God (Is. liii. 7; John i. 29; cf. the expression "my sacrifice," Ex. xxxiv. 25, also Ex. xii. 27; Acts viii. 32; 1 Cor. v. 7; 1 Pet. i. 18, 19). The ceremonial law, and the functions of the priest in later times, were indeed recognized in the sacrificial rite of the Passover; but the previous existence of the rite showed that they were not essential for the personal approach of the worshipper to God (see IV. 3 (a.); Is. lxi. 6; 1 Pet. ii. 5, 9). The unleavened bread is recognized as the figure of the state of sanctification which is the true element of the believer in Christ<sup>e</sup> (1 Cor. v. 8). The haste with which the meal was eaten,

d The crossed spits on which Justin Martyr laid stress are noticed, II. 3 (a). The subject is expanded by Vitringa, *Observat. Sac.* ii. 10. The time of the new moon, at which the festival was held, has been taken as a type of the brightness of the appearing of the Messiah; the lengthening of the days at that season of the year as figuring the ever-increasing light and warmth of the Redeemer's kingdom; the advanced hour of the day at which the supper was eaten, as a representation of the fullness of times; the roasting of the lamb, as the effect of God's wrath against sin; the thorough cooking of the lamb, as a lesson that Christian doctrine should be well arranged and digested; the prohibition that any part of the flesh should remain till the morning, as a foreshowing of the haste in which the body of Christ was removed from the cross; the unfermented bread, as the emblem of a humble spirit, while fermented bread was the figure of a heart puffed up with pride and vanity. (See Suicer, sub *πάργα*.) In the like spirit, Justin Martyr and Lactantius take up the charge against the Jews of corrupting the O. T., with a view to deprive the Passover of its clearness as a witness for Christ. They specifically allege that the following passage has been omitted in the copies of the book of Ezra: "Et dixit Esdras ad populum: Hoc pascha salvator noster est, et refugium nostrum. Cogitate et ascendat in cor vestrum, quoniam habemus humiliare eum in signo: e. post hæc sperabimus in eum, ne deseratur hic locus in æternum tempus." (Just. Mart. *Dialog. cum Tryph.*; Lact. *Inst.* iv. 18.) It has been conjectured that the words may have been inserted between vv. 20 and 21 in Ezr. vi. But they have been all but universally regarded as spurious.

e The use which the Fathers made of this may be seen in Suicr, s. v. *ἀζύμος*.

and the girt-up loins, the staves and the sandals, are fit emblems of the life of the Christian pilgrim, ever hastening away from the world towards his heavenly destination" (Luke xii. 35; 1 Pet. i. 13, ii. 11; Eph. v. 15; Heb. xi. 13).

It has been well observed by Kurtz (on Ex. xii. 38), that, at the very crisis when the distinction between Israel and the nations of the world was most clearly brought out (Ex. xi. 7), a "mixed multitude" went out from Egypt with them (Ex. xii. 38), and that provision was then made for all who were willing to join the chosen seed and participate with them in their spiritual advantages (Ex. xii. 44). Thus, at the very starting-point of national separation, was foreshadowed the calling in of the Gentiles to that covenant in which all nations of the earth were to be blessed.

The offering of the Omer, in its higher significance as a symbol of the first-born, has been already noticed (IV. 3 (d.)). But its meaning found full expression only in that First-born of all creation, who, having died and risen again, became "the first-fruits of them that slept" (1 Cor. xv. 20). As the first of the first-fruits, no other offering of the sort seems so likely as the Omer to have immediately suggested the expressions used (Rom. viii. 23, xi. 16; Jam. i. 18; Rev. xiv. 4).

The crowning application of the paschal rites to the truths of which they were the shadowy promises appears to be that which is afforded by the fact that our Lord's death occurred during the festival. According to the Divine purpose, the true Lamb of God was slain at nearly the same time as "the Lord's Passover," in obedience to the letter of the Law. It does not seem needful that, in order to give point to this coincidence, we should (as some have done) draw from it an *à priori* argument in favor of our Lord's crucifixion having taken place on the 14th of Nisan (see III. 2, ii.). It is enough to know that our own Holy Week and Easter stand as the anniversary of the same great facts as were foreshown in those events of which the yearly Passover was a commemoration.

As compared with the other festivals, the Passover was remarkably distinguished by a single victim essentially its own, sacrificed in a very peculiar manner.<sup>b</sup> In this respect, as well as in the place it held in the ecclesiastical year, it had a formal dignity and character of its own. It was the representative festival of the year, and in this unique position it stood in a certain relation to circumcision as the second sacrament of the Hebrew Church (Ex. xii. 44). We may see this in what occurred at Gilgal, when Joshua, in renewing the Divine covenant, celebrated the Passover immediately after the circumcision of the people. But the nature of the relation in which these two rites stood to each other did not become fully developed until its types were fulfilled, and the Lord's Supper took its place as the sacramental feast of the elect people of God.<sup>c</sup> Hupfeld well observes: "En pul-

cherrima mysteriorum nostrorum exempla: circumcisio quidem baptismatis, scilicet signum gratiæ divinæ et fœderis cum Deo pacti, quo ad sanctitatem populi sacri vocamur; Paschalis vero, agnus et ritus, continuatæ quippe gratiæ divinæ et servati fœderis cum Deo signum et pignus, quo sacra et cum Deo et cum cæteris populi sacri membris communio usque renovatur et alitur, cœnæ Christi sacrae typus aptissimus."

\* *Additional Literature.* The art. *Passover* by C. D. Ginsburg in the 3d edition of Kittó's *Cyclop. of Bibl. Lit.* deserves notice for its thoroughness, and for the minuteness of its account of the later Jewish usages. Winer's art. *Pascha* in his *Bibl. Realwörterbuch* is carefully elaborated. The subject is treated in Herzog's *Real-Encycl.* by Vaihinger; the art. on Easter (*Pascha, christliches*) and the early paschal controversies is, however, by Steitz.

On the question respecting the Last Supper see the references to the literature under JOHN, GOSPEL OF, vol. ii. pp. 1437, 1438. Among the more recent writers on this subject the following are also worthy of notice: S. J. Andrews, *Life of our Lord* (N. Y. 1862), pp. 425-460. T. Lewin,

<sup>a</sup> See Theodoret, *Interrog. XXIV. in Exod.* There is an eloquent passage on the same subject in Greg. *Waz. Orat. XLII.*

<sup>b</sup> The only parallel case to this, in the whole range of the public religious observances of the Law, seems to be that of the scapegoat of the Day of Atonement.

<sup>c</sup> It is worthy of remark that the modern Jews distinguish these two rites above all others, as being immediately connected with the grand fulfillment of the promises made to their fathers. Though they refer

to the coming of Elijah in their ordinary grace at meals, it is only on these occasions that their expectation of the harbinger of the Messiah is expressed by the formal observances. When a child is circumcised, an empty chair is placed at hand for the prophet to occupy. At the paschal meal, a cup of wine is poured out for him; and at an appointed moment the door of the room is solemnly set open for him to enter. (See note c, p. 2344.)

*Fæta Sacri* (Lond. 1865), p. xxxi. ff. Irof. Wm. Milligan, arts. in the *Contemporary Review* for Aug. and Nov. 1868. Holtzmann, in Bunsen's *Bibelwerk*, viii. 305-322 (1868). Ebrard, *Wissensch. Krit. d. evang. Geschichte*, 3e Aufl. (1868), pp. 615-640. C. E. Caspari, *Chronol.-geogr. Einl. in das Leben Jesu Christi* (Hamb. 1869), pp. 164-186. Wieseler, *Beiträge zur richtigen Würdigung der Evangelien u. d. evang. Geschichte* (Gotha, 1869), pp. 230-283. Of these writers, Andrews maintains that there is no real discrepancy between the Synoptists and John,—that they all place the crucifixion on the 15th of Nisan. Prof. Milligan holds the same opinion, contending that the paschal lamb might be eaten on *any part* of the day extending from the evening following the 14th of Nisan to the evening of the 15th, and thus finding no difficulty in John xviii. 28. But this view seems opposed to all our information respecting Jewish usage; see p. 2342, note e, and comp. Wieseler, *Beiträge*, p. 246, note. Holtzmann reviews the literature of the question, and finds the difference between the Synoptists and John irreconcilable. Ebrard, who in the 2d edition of his *Wissensch. Kritik d. ev. Geschichte* (1850) had been convinced by the arguments of Bleek that John places the crucifixion on the 14th of Nisan, has, in the 3d edition of this work, after a careful reëxamination of the subject, reversed his conclusion. Maintaining that John wrote for those who were acquainted with the Synoptic Gospels, he discusses the supposition that it was his intention to correct the chronology of the first three Evangelists in respect to the last day of our Saviour's life, and endeavors to show that it is quite untenable. But supposing John to assume on the part of his readers a knowledge of the facts recorded by the Synoptists, the controverted passages in his Gospel present, as Ebrard thinks, little difficulty. According to Caspari, the Synoptists place the death of Jesus, in agreement with John, on the 14th of Nisan. By the "eating the Passover" of which they speak, he understands not the eating of the paschal lamb, but of the *unleavened bread*, on the evening with which the 14th of Nisan began, i. e. after the sunset of the 13th. In most respects his view agrees with that of Westcott, *Introd. to the Study of the Gospels*, pp. 335-341, Amer. ed. But the difficulties, both archaeological and exegetical, which beset this theory, appear overwhelming. The first day of unleavened bread could not have been regarded as beginning with the evening which followed the 13th of Nisan, when we learn from the Mishna (*Pesach*, 1, § 4), that leaven might be eaten on the 14th till 11 o'clock A. M. according to Rabbi Meir, or till 10 o'clock, according to Rabbi Jehudah, and it was not necessary to destroy it before 11 o'clock on that day. Wieseler defends with much learning and ability the view formerly presented by him in his *Chronol. Synopse der vier Evangelien* (1843), with which that of Robinson, Norton, Andrews, and Lewin essentially agree. See also his art. *Zeitrechnung, neutestamentliche*, in Herzog's *Real-Encycl.* xxi. 550 ff. Bleek's *Beiträge zur Evangelien-Kritik* (Berl. 1846) is still, perhaps, the ablest presentation of the opposite view; see also Meyer's *Komm., das Evang. des Johannes*, 5e Aufl. (1869).

## A.

\* The Samaritans still observe the Passover on Gerizim, their sacred mount (John iv. 20), and with some customs, especially the offering of sac-

rifices, which the Jews have discontinued since the destruction of the Temple at Jerusalem. Some account of the ceremony cannot fail to interest the reader. Various travellers who have been present on the occasion have described the scene. We abbreviate for our purpose Dean Stanley's narrative of the commemoration, as witnessed by him in company with the Prince of Wales and others, on the 13th of April, 1862. In that instance, for some reason, the Samaritans anticipated the 14th of Nisan by two days.

On coming to the top of Gerizim the party found the little community of about 152 persons encamped near the summit of the mount. The women were shut up in tents; and the men were assembled on the rocky terrace. Most of the men were in ordinary dress; only about fifteen of the elders and six youths having any distinguishing sacred costume. About half an hour before sunset the men all gathered about a long trough dug out for the occasion, and, assuming the oriental attitude of devotion, commenced (led by the priest) reciting in a loud chant prayers, chiefly devoted to praises of the patriarchs. In a short time the six young men before mentioned suddenly appeared driving along six sheep into the midst of the assembly. Meanwhile the sun had nearly set; the recitation became more vehement; and the entire history of the exodus was chanted with furious rapidity. As soon as the sun had touched the western horizon, the youths, pausing a moment to brandish their bright knives, suddenly threw the sheep on their backs and drew the knives across their throats. They then dipped their fingers in the blood of the victims, and stained slightly the noses and foreheads of the children. The animals were then fleeced and washed, two holes having been dug in the mountain side for that purpose.

After kindling a fire in one of the holes nearest to the place of sacrifice, and while two cauldrons of water hung over it were boiling, the recitation continued, and bitter herbs wrapped in a strip of unleavened bread were passed among the assembly. After a short prayer, the youths again appeared, poured the boiling water over the sheep, and fleeced them. The right fore-legs and entrails of the animals were burnt, the liver carefully put back, and the victims were then spitted on two transverse stakes suggesting slightly the crucial form. They were then carried to the other oven-like hole, in which a fire had been kindled. Into this they were thrust, and a hurdle covered with wet earth placed over the mouth to seal up the oven.

The sacrifice and preparations thus completed, the community retired. After about five hours, shortly after midnight, the feast began, to which the visitors found themselves admitted with reluctance. The hole being suddenly opened, a cloud of smoke and steam issued from it, and from the pit were dragged successively the blackened sheep, the outlines of their heads, ears, and legs yet visible. The bodies were then thrown upon mats, and wrapped in them were hurried to the first trench, already mentioned, and laid upon them between two lines of Samaritans. Those before distinguished by their sacred costume were now in addition to that garb provided with shoes and staffs and girded with ropes. The recitation of prayers was recommenced, and continued till they suddenly seated themselves, after the Arab fashion, and commenced eating. The flesh was torn away piecemeal with their fingers, and rapidly and st

ently consumed. In ten minutes most of it was gone, separate morsels having been carried to the priest and to the women, and the remnants were gathered into the mats and burnt. Careful search was then made for the particles, which were thrown upon the fire. This finished the ceremony, and early the next morning the community returned to their habitations in the town.

In this ceremony the time, with a slight variation on this special occasion (Exod. xii. 63); the place chosen, outside their gates and on their ancient mountain sanctuary (Deut. xvi. 1); the exclusion of the women (Deut. xvi. 16); the time of day (Deut. xvi. 6); the recital of the circumstances attending the first inauguration of the Passover (Exod. xii. 26, 27); the bitter herbs and unleavened bread with which it was eaten (Exod. xii. 8); the mode of cooking it (Exod. xii. 8, 9); the careful exclusion of foreigners (Exod. xii. 43); the hasty manner in which the meal was eaten (Exod. xii. 11); the care taken to consume the remnants (Exod. xii. 10); and the return by early morning to their dwellings (Deut. xvi. 7), correspond exactly to the ancient Jewish law of the Passover.

The staining of the children's foreheads (2 Chr. xxx. 16); the fleecing of the animals (2 Chr. xxxv. 11); and the girding as if for a journey of only a few of the men (Ex. xii. 11), represent, without exactly imitating, the corresponding portions of the ancient Jewish ritual. (See Stanley's *Jewish Church*, i. 559-567, and his *Sermons in the East*, etc., pp. 176-181.)

The ceremony among the Samaritans is said to be gradually assuming this merely representative character. The number of this singular people is rapidly diminishing, and probably ere long the observance of the Passover will be associated with Gerizim only as a tradition. H.

**PAT'ARA** (Πάραρα: [*Patara* (sing.)] the noun is plural), a Lycian city of some considerable note. One of its characteristics in the heathen world was that it was devoted to the worship of Apollo, and was the seat of a famous oracle (Hor. *Od.* iii. 4, 64). Fellows says that the coins of all the district around show the ascendancy of this divinity. Patara was situated on the southwestern shore of Lycia, not far from the left bank of the river Xanthus. The coast here is very mountainous and bold. Immediately opposite is the island of RHODES. Patara was practically the seaport of the city of Xanthus, which was ten miles distant (Appian, *B. C.* iv. 81). These notices of its position and maritime importance introduce us to the single mention of the place in the Bible (Acts xxi. 1, 2). St. Paul was on his way to Jerusalem at the close of his third missionary journey. He had just come from Rhodes (v. 1); and at Patara he found a ship, which was on the point of going to Phoenicia (v. 2), and in which he completed his voyage (v. 3). This illustrates the mercantile connection of Patara with both the eastern and western parts of the Levant. A good parallel to the Apostle's voyage is to be found in Liv. xxxvii. 16. There was no time for him to preach the gospel here, but still Patara has a place in ecclesiastical history, having been the seat of a bishop (*Hierocl.* p. 684). The old name remains on the spot, and there are still considerable ruins, especially a theatre, some baths, and a triple arch which was one of the gates of the city. But sand-hills are grad-

ually concealing these ruins, and have blocked up the harbor. For fuller details we must refer to Beaufort's *Karamania*, the *Ionian Antiquities* published by the Dilettanti Society, Fellows' *Lycia and Asia Minor*, and the *Travels in Asia Minor* by Spratt and Forbes. [LYCIA; ΜΥΡΑ.]

J. S. H.

**PATHE'US** [properly ΠΑΤΗΛ'US] (Παθαίος: Alex. Φαθαίος: *Factes*). The same as ΠΕΤΗΛΗ the Levite (1 Esdr. ix. 23; comp. Egr. x. 23).

**PATH'ROS** (פַּתְרוֹס [see below]: Παθουρῶς [or ρῶ], [in Ezek., Rom. Vat.] Φαθαρός; [in Is. xi. 11, Βαβυλωνία:] *Phetros, Phatures, Phathures*), gent. noun PATHRUSIM (פַּתְרוּסִים).

Πατροσωιεύς: *Phetrusim*, a part of Egypt, and a Mizraite tribe. That Pathros was in Egypt admits of no question: we have to attempt to decide its position more nearly. In the list of the Mizraites, the Pathrusim occur after the Naphtuhim and before the Casluhim; the latter being followed by the notice of the Philistines, and by the Caphtorim (Gen. x. 13, 14; 1 Chr. i. 12). Isaiah prophesies the return of the Jews "from Mizraim, and from Pathros, and from Cush" (xi. 11). Jeremiah predicts their ruin to "all the Jews which dwell in the land of Egypt, which dwell at Migdol, and at Tahpanhes, and at Noph, and in the country of Pathros" (xliv. 1), and their reply is given, after this introduction, "Then all the men which knew that their wives had burned incense unto other gods, and all the women that stood by, a great multitude, even all the people that dwell in the land of Egypt, in Pathros, answered Jeremiah" (15). Ezekiel speaks of the return of the captive Egyptians to "the land of Pathros, into the land of their birth" (xxix. 14), and mentions it with Egyptian cities, Noph preceding it, and Zoan, No, Sin, Noph again, Aven (On), Pi-beseth, and Tephnehues following it (xxx. 13-18). From the place of the Pathrusim in the list of the Mizraites, they might be supposed to have settled in Lower Egypt, or the more northern part of Upper Egypt. Four only of the Mizraite tribes or peoples can be probably assigned to Egypt, the last four, the Philistines being considered not to be one of these, but merely a colony: these are the Naphtuhim, Pathrusim, Casluhim, and Caphtorim. The first were either settled in Lower Egypt, or just beyond its western border; and the last in Upper Egypt, about Coptos. It seems, if the order be geographical, as there is reason to suppose, that it is to be inferred that the Pathrusim were seated in Lower Egypt, or not much above it, unless there be any transposition; but that some change has been made is probable from the parenthetical notice of the Philistines following the Casluhim, whereas it appears from other passages that it should rather follow the Caphtorim. If the original order were Pathrusim, Caphtorim, Casluhim, then the first might have settled in the highest part of Upper Egypt, and the other two below them. The mention in Isaiah would lead us to suppose that Pathros was Upper Egypt, if there were any sound reason for the idea that Mizraim or Mazor is ever used for Lower Egypt, which we think there is not. Rüdiger's conjecture that Pathros included part of Nubia is too daring to be followed (*Encycloped. Germ.* sect. iii. tom. xiii, p. 312), although there is some slender support for it. The occurrences in Jeremiah seem to favor the idea that Pathros was part of Lower Egypt, or the whole of that regio-

for although it is mentioned in the prophecy against the Jews as a region where they dwelt after Migdol, Tahpanhes, and Noph, as though to the south, yet we are told that the prophet was answered by the Jews "that dwelt in the land of Egypt, in Pathros," as though Pathros were the region in which these cities were. We have, moreover, no distinct evidence that Jeremiah ever went into Upper Egypt. On the other hand, it may be replied that the cities mentioned are so far apart, that either the prophet must have preached to the Jews in them in succession, or else have addressed letters or messages to them (comp. xxix.). The notice by Ezekiel of Pathros as the land of the birth of the Egyptians seems to favor the idea that it was part of or all Upper Egypt, as the Thebais was probably inhabited before the rest of the country (comp. *Idd.* ii. 15); an opinion supported by the tradition that the people of Egypt came from Ethiopia, and by the 1st dynasty's being of Thinite kings.

Pathros has been connected with the Pathyrite nome, the Phaturite of Pliny (*H. N.* v. 9, § 47),

in which Thebes was situate. The first form occurs in a Greek papyrus written in Egypt (Παθούρης τῆς Θηβαΐδος, Papyr. Anast. vid. Reuvens, *Lettres à M. Letronne*, 3 let. p. 4, 30, ap. Parthey, *Vocab.* s. v.). This identification may be as old as the LXX.; and the Coptic version, which reads ΠΑΠΘΟΥΡΗΣ, ΠΑΠΤΟΥΡΗΣ, does not contradict it. The discovery of the Egyptian name of the town after which the nome was called puts the inquiry on a safer basis. It is written HA-HAT-HER, "The Abode of Hat-her," the Egyptian Venus. It may perhaps have sometimes been written P-HA-HAT-HER, in which case the P-H and T-H would have coalesced in the Hebrew form, as did T-H in Caphtor. [CAPHTOR.] Such etymologies for the word Pathros as Π-ΕΤ-ΡΗΣ, "that which is southern," and for the form in the LXX., ΠΑΤΟΥΡΗΣ, "the southern (region)" (Ges. *Thes.* s. v.), must be abandoned. On the evidence here brought forward, it seems

Patmos, Harbor, etc

reasonable to consider Pathros to be part of Upper Egypt, and to trace its name in that of the Pathyrite nome. But this is only a very conjectural identification, which future discoveries may overthrow. It is spoken of with cities in such a manner that we may suppose it was but a small district, and (if we have rightly identified it) that when it occurs Thebes is specially intended. This would account for its distinctive mention.

R. S. P.

#### PATHRUSIM. [PATHROS.]

PATMOS (Πάτμος: [*Patmos*]), Rev. i. 9. Two recent and copious accounts, one by a German, the other by a French traveller, furnish us with very full information regarding this island. Ross visited it in 1841, and describes it at length (*Reise auf den griechischen Inseln des ägäischen Meeres*, ii. 123-139). Guérin, some years later, spent a month there, and enters into more detail,

especially as regards ecclesiastical antiquities and traditions (*Description de l'île de Patmos et de l'île de Samos*, Paris, 1856, pp. 1-120). Among the older travellers who have visited Patmos we may especially mention Tournefort and Pococke. See also Walpole's *Turkey*, ii. 43.<sup>a</sup>

The aspect of the island is peculiarly rugged and bare. And such a scene of banishment for St. John in the reign of Domitian is quite in harmony with what we read of the custom of the period. It was the common practice to send exiles to the most rocky and desolate islands ("in asperissimas insularum"). See Suet. *Til.* 8; *Juv. Sat.* i. 73. Such a scene too was suitable (if we may presume to say so) to the sublime and awful revelation which the Apostle received there. It is possible indeed that there was more greenness in Patmos formerly than now. Its name in the Middle Ages was *Palmos*. But this has now almost entirely

<sup>a</sup> Dean Stanley visited Patmos in returning from his second visit to Palestine (1862). See his account of the visit, *Sermons in the East*, etc., pp. 225-231.

The points on which he touches are the traditions of Patmos, and its connection with the Apocalypse.

given place to the old classical name; and there is just one palm-tree in the island, in a valley which is called "the Saint's Garden" (ὁ κήπος τοῦ Ὁσίου). Here and there are a few poor olives, about a score of cypresses, and other trees in the same scanty proportion.

Patmos is divided into two nearly equal parts, a northern and a southern, by a very narrow isthmus, where, on the east side, are the harbor and the town. On the hill to the south, crowning a commanding height, is the celebrated monastery, which bears the name of "John the Divine." Half-way up the ascent is the cave or grotto where tradition says that St. John received the Revelation, and which is still called τὸ σπήλαιον τῆς Ἀποκαλύψεως. A view of it (said by Ross to be not very accurate) will be found in Choiseul-Gouffier, i. pl. 57. Both Ross and Guérin give a very full, and a very melancholy account of the library of the monastery. There were in it formerly 600 MSS. There are now 240, of which Guérin gives a catalogue. Two ought to be mentioned here, which profess to furnish, under the title of *αἱ περίοδοι τοῦ θεολόγου*, an account of St. John after the ascension of our Lord. One of them is attributed to Prochorus, an alleged disciple of St. John; the other is an abridgment of the same by Nicetas, Archbishop of Thessalonica. Various places in the island are incorporated in the legend, and this is one of its chief points of interest. There is a published Latin translation in the *Bibliotheca Maxima Patrum* (1677, tom. ii.), but with curious modifications, one great object of which is to disengage St. John's martyrdom from Ephesus (where the legend places it), and to fix it in Rome.

We have only to add that Patmos is one of the Sporades, and is in that part of the Ægean which is called the Icarian Sea. It must have been conspicuous on the right when St. Paul was sailing (Acts xx. 15, xxi. 1) from SAMOS to Cos.

J. S. H.

**PATRIARCHS.** The name *πατριάρχης* is applied in the N. T. to Abraham (Heb. vii. 4), to the sons of Jacob (Acts vii. 8, 9), and to David (Acts ii. 29); and is apparently intended to be

equivalent to the phrase *ראש בית אבות*, the "head" or "prince of a tribe," so often found in the O. T. It is used in this sense by the LXX. in 1 Chr. xxiv. 31, xxvii. 22; 2 Chr. xxiii. 20, xxvi. 12. In common usage the title of patriarch is assigned especially to those whose lives are recorded in Scripture previous to the time of Moses. By the "patriarchal system" is meant that state of society which developed itself naturally out of family relations, before the formation of nations properly so called, and the establishment of regular government; and by the "patriarchal dispensation" the communion into which God was pleased to enter with the families of Seth, Noah, and Abraham, before the call of the chosen people.

The patriarchal times are naturally divided into the ante-diluvian and post-diluvian periods.

1. In the former the Scripture record contains little except the list of the line from Seth, through

Enos, Cainan, Mahalaleel, Jared, Enoch, Methuselah, and Lamech, to Noah; with the ages of each at their periods of generation and at their deaths. [CHRONOLOGY.] To some extent parallel to this, is given the line of Cain; Enoch, Irad, Melchizedek, Methuselah, Lamech, and the sons of Lamech, Jabal, Jubal, and Tubal-Cain. To the latter line are attributed the first signs of material civilization, the building of cities, the division of classes, and the knowledge of mechanical arts; while the only moral record of their history obscurely speaks of violence and bloodshed. [LAMECH.] In the former line the one distinction is their knowledge of the true God (with the constant recollection of the promised "seed of the woman") which is seen in its fullest perfection in Enoch and Noah; and the only allusion to their occupation (Gen. v. 29) seems to show that they continued a pastoral and agricultural race. The entire corruption, even of the chosen family of Seth, is traced (in Gen. vi. 1-4) to the union between "the sons of God" and "the daughters of men" (Heb. "of Adam"). This union is generally explained by the ancient commentators of a contact with supernatural powers of evil in the persons of fallen angels; most modern interpretation refers it to intermarriage between the lines of Seth and Cain. The latter is intended to avoid the difficulties attaching to the comprehension of the former view, which nevertheless is undoubtedly far more accordant with the usage of the phrase "sons of God" in the O. T. (comp. Job i. 6, xxxviii. 7), and with the language of the passage in Genesis itself. (See Maitland's *Erwin*, Essay vi.)

One of the main questions raised as to the ante-diluvian period turns on the longevity assigned to the patriarchs. With the single exception of Enoch (whose departure from the earth at 365 years of age is exceptional in every sense), their ages vary from 777 (Lamech) to 969 (Methuselah). It is to be observed that this longevity disappears gradually after the Flood. To Shem are assigned 600 years; and thence the ages diminish down to Terah (205 years), Abraham (175), Isaac (180), Jacob (147), and Joseph (110).<sup>a</sup>

This statement of ages is clear and definite. To suppose, with some, that the name of each patriarch denotes a clan or family, and his age its duration, or, with others, that the word *שָׁנָה* (because it properly signifies "iteration") may, in spite of its known and invariable usage for "year," denote a lunar revolution instead of a solar one (*i. e.* a month instead of a year) in this passage, appears to be a mere evasion of the difficulty.<sup>b</sup> It must either be accepted, as a plain statement of fact, or regarded as purely fabulous, like the legendary assignment of immense ages to the early Indian or Babylonian or Egyptian kings.

The latter alternative is adopted without scruple by many of the German commentators, some of whom attempt to find such significance in the patriarchal names as to make them personify natural powers or human qualities, like the gods and demigods of mythology. It belongs of course to the

<sup>a</sup> The Hebrew text is here taken throughout: for the variations in the LXX. and the Samaritan Pentateuch, see CHRONOLOGY.

<sup>b</sup> It is likely enough that the year (as in so many ancient calendars) may be a lunar year of 354 or 355 days, or even a year of 10 months; but this makes no

real difference. It is possible that there may be some corruption in the text, which may affect the numbers given; but the longevity of the patriarchs is noticed and commented upon, as a well-known fact, by Josephus (*Ant.* i. 3, § 9).

mythical view of Scripture, destroying its claim, in any sense, to authority and special inspiration.

In the acceptance of the literal meaning, it is not easy to say how much difficulty is involved. With our scanty knowledge of what is really meant by "dying of old age," with the certainty that very great effects are produced on the duration of life, both of men and animals, by even slight changes of habits and circumstances, it is impossible to say what might be *a priori* probable in this respect in the antediluvian period, or to determine under what conditions the process of continual decay and reconstruction, which sustains animal life, might be indefinitely prolonged. The constant attribution in all legends of great age to primeval men is at least as likely to be a distortion of fact, as a mere invention of fancy. But even if the difficulty were greater than it is, it seems impossible to conceive that a book, given by inspiration of God to be a treasure for all ages, could be permitted to contain a statement of plain facts, given undoubtedly, and with an elaborate show of accuracy, and yet purely and gratuitously fabulous, in no sense bearing on its great religious subject. If the Divine origin of Scripture be believed, its authority must be accepted in this, as in other cases; and the list of the ages of the patriarchs be held to be (what it certainly claims to be) a statement of real facts.

2. It is in the post-diluvian periods that more is gathered as to the nature of the patriarchal history.

It is at first general in its scope. The "Covenant" given to Noah is one free from all condition, and fraught with natural blessings, extending to all alike; the one great command (against bloodshed) which marks it, is based on a deep and universal ground; the fulfillment of the blessing, "Be fruitful and multiply, and replenish the earth," is expressly connected, first with an attempt to set up an universal kingdom round a local centre, and then (in Gen. x.) with the formation of the various nations by conquest or settlement, and with the peopling of all the world. But the history soon narrows itself to that of a single tribe or family, and afterwards touches the general history of the ancient world and its empires, only so far as it bears upon this.

It is in this last stage that the principle of the patriarchal dispensation is most clearly seen. It is based on the sacredness of family ties and paternal authority. This authority, as the only one which is natural and original, is inevitably the foundation of the earliest form of society, and is probably seen most perfectly in wandering tribes, where it is not affected by local attachments and by the acquisition of wealth. It is one, from the nature of the case, limited in its scope, depending more on its sacredness than its power, and giving room for much exercise of freedom; and, as it extends from the family to the tribe, it must become less stringent and less concentrated, in proportion to its wider diffusion. In Scripture this authority is consecrated by an ultimate reference to God, as the God of the patriarch, the Father (that is) both of him and his children. Not, of course, that the idea of God's Fatherhood carried with it the knowledge of man's personal communion with his nature (which is revealed by the Incarnation); it rather implied faith in his protection, and a free and loving obedience to his authority, with the hope (more or less assured) of some greater blessing from Him

in the coming of the promised seed. At the same time, this faith was not allowed to degenerate, as it was prone to do, into an appropriation of God, as the mere tutelary God of the tribe. The Lord, it is true, suffers Himself to be called "the God of Shem, of Abraham, of Isaac, and of Jacob;" but He also reveals Himself (and that emphatically, as though it were his peculiar title) as the "God Almighty" (Gen. xvii. 1, xxviii. 3, xxxv. 11); He is addressed as the "Judge of all the earth" (xxiii. 25), and as such is known to have intercourse with Pharaoh and Abimelech (xii. 17, xx. 3-8), to hallo the priesthood of Melchizedek (xiv. 18-20), and to execute wrath on Sodom and Gomorrah. All this would confirm what the generality of the covenant with Noah, and of the promise of blessing to "all nations" in Abraham's seed must have distinctly taught, that the chosen family were, not substitutes, but representatives, of all mankind, and that God's relation to them was only a clearer and more perfect type of that in which He stood to all.

Still the distinction and preservation of the chosen family, and the maintenance of the paternal authority, are the special purposes, which give a key to the meaning of the history, and of the institutions recorded. For this the birthright (probably carrying with it the priesthood) was reserved to the first-born, belonging to him by inheritance, yet not assured to him till he received his father's blessing; for this the sanctity of marriage was jealously and even cruelly guarded, as in Gen. xxxiv. 7, 13, 31 (Dinah), and in xxxviii. 24 (Tamar), from the license of the world without; and all intermarriage with idolaters was considered as treason to the family and the God of Abraham (Gen. xxvi. 34, 35, xxvii. 46, xxviii. 1, 6-9). Natural obedience and affection are the earthly virtues especially brought out in the history, and the sins dwelt upon (from the irreverence of Ham to the selling of Joseph) are all such as offend against these.

The type of character formed under it, is one imperfect in intellectual and spiritual growth, because not yet tried by the subtler temptations, or forced to contemplate the deeper quietisms of life; but it is one remarkably simple, affectionate, and free, such as would grow up under a natural authority, derived from God and centering in Him, yet allowing, under its unquestioned sacredness, a familiarity and freedom of intercourse with Him, which is strongly contrasted with the stern and awful character of the Mosaic dispensation. To contemplate it from a Christian point of view is like looking back on the unconscious freedom and innocence of childhood, with that deeper insight and strength of character which are gained by the experience of manhood. We see in it the germs of the future, of the future revelation of God, and the future trials and development of man.

It is on this fact that the typical interpretation of its history depends, an interpretation sanctioned directly by the example of St. Paul (Gal. iv. 21-31; Heb. vii. 1-17), indirectly supported by other passages of Scripture (Matt. xxiv. 37-39; Luke xvii. 28-32; Rom. ix. 10-13, etc.), and instinctively adopted by all who have studied the history itself.

Even in the brief outline of the antediluvian period, we may recognize the main features of the history of the world, the division of mankind into the two great classes, the struggle between the power of evil and good, the apparent triumph of

the evil, and its destruction in the final judgment. In the post-diluvian history of the chosen family, is seen the distinction of the true believers, possessors of a special covenant, special revelation, and special privileges, from the world without. In it is therefore shadowed out the history of the Jewish nation and Christian Church, as regards the freedom of their covenant, the gradual unfolding of their revelation, and the peculiar blessings and temptations which belong to their distinctive position.

It is but natural that the unfolding of the characters of the patriarchs under this dispensation should have a typical interest. Abraham, as the type of a faith, both brave and patient, gradually and continuously growing under the education of various trials, stands contrasted with the lower character of Jacob, in whom the same faith is seen, tainted with deceit and selfishness, and needing therefore to be purged by disappointment and suffering. Isaac in the passive gentleness and submissiveness, which characterizes his whole life, and is seen especially in his willingness to be sacrificed by the hand of his father, and Joseph, in the more active spirit of love, in which he rejoiced to save his family and to forgive those who had persecuted and sold him, set forth the perfect spirit of sonship, and are seen to be types especially of Him, in whom alone that spirit dwelt in all fullness.

This typical character in the hands of the mythical school is, of course, made an argument against the historical reality of the whole; those who recognize a unity of principle in God's dispensations at all times, will be prepared to find, even in their earliest and simplest form, the same features which are more fully developed in their later periods.

A. B.

\* With reference to the individual patriarchs, the reader will consult the articles which treat of them under their respective names in the Dictionary. See also Hess, *Gesch. der Patriarchen*, 2 vols. (1785); the art. *Patriarchen des A. Test.*, by J. P. Lange, in Herzog's *Real-Encycl.* xi. 192-200; Kurtz, *Geschichte des A. Bundes*, i. 139-344 (1853); Ewald, *Gesch. des Volkes Israel*, 3<sup>e</sup> Ausg., i. 412-519, or pp. 300-362, English translation; Stanley, *The Patriarchs* (Abraham, Isaac, Jacob, Joseph), in his *Jewish Church*, i. 3-108 (Lectt. i.-iv.); and Milman's *Hist. of the Jews*, i. 47-92 (N. Y. 1864). The interesting articles on *Heroes of Hebrew History* by the Bishop of Oxford (Samuel Wilberforce), in *Good Words* for 1869, include the patriarchs.

**PATROBAS** (Πατροβᾶς: *Patrobas*). A Christian at Rome to whom St. Paul sends his salutation (Rom. xvi. 14). According to late and uncertain tradition, he was one of the 70 disciples, became bishop of Puteoli (Pseudo-Hippolytus, *De LXX. Apostolis*), and suffered martyrdom together with Philologus on Nov. 4th (Estius). Like many other names mentioned in Rom. xvi., this was borne by at least one member of the emperor's household (Suet. *Galba*, 20; Martial, *Ep.* ii. 32, 3). Probably the name is a contraction, like others of the same termination, and stands for Πατρόβιος (see Wolf, *Cur. Philolog.*). W. T. B.

**PATROCLUS** or **PATROCLUS** (Πάτροκλος: *Patroclus*), the father of Nicanor, the famous adversary of Judas Maccabæus (2 Macc. xiii. 9).

\* **PATTERNS**, as employed in Heb. ix. 23,

confuses the sense of the passage. The Greek term is ὑποδείγμα and may signify, indeed, pattern, or example (see John xiii. 15; Heb. iv. 11), but denotes also figure, outline, copy. The latter must be meant in the above passage; for the sacred writer there represents the "heavenly things" spoken of, which require no purification, as themselves "the patterns" or archetypes, of which the earthly tabernacle and its appurtenances were the copies and not the reverse of this, as in the A. V., i. e. the earthly things, as "the patterns," at least, according to the present use of this expression. [TABERNACLE.] The older versions (Tyndale, Cramer, the Geneva) have more correctly "similitudes." In Heb. viii. 5, "pattern" answers to τύπος, and occurs in its proper sense. H.

**PA'Û** (פֹּאֵז, but in 1 Chr. i. 50, פֹּאֵז, פֹּאֵז, though some copies agree with the reading in Gen.: פֹּאֵז: *Phau*), the capital of Hadar, king of Edom (Gen. xxxvi. 39). Its position is unknown. The only name that bears any resemblance to it is *Phauara*, a ruined place in Idumæa mentioned by Seetzen. W. L. B.

**PAUL** (Παῦλος: *Paulus*), the Apostle of Jesus Christ to the Gentiles.

*Original Authorities.*—Nearly all the original materials for the Life of St. Paul are contained in the Acts of the Apostles, and in the Pauline Epistles. Out of a comparison of these authorities the biographer of St. Paul has to construct his account of the really important period of the Apostle's life. The early traditions of the Church appear to have left almost untouched the space of time for which we possess those sacred and abundant sources of knowledge; and they aim only at supplying a few particulars in the biography beyond the points at which the narrative of the Acts begins and terminates.

The history and the epistles lie side by side, and are to all appearance quite independent of one another. It was not the purpose of the historian to write a life of St. Paul, even as much as the received name of his book would seem to imply. The book called the Acts of the Apostles is an account of the beginnings of the kingdom of Christ on the earth. The large space which St. Paul occupies in it is due to the important part which he bore in spreading that kingdom. As to the epistles, nothing can be plainer than that they were written without reference to the history; and there is no attempt in the Canon to combine them with it so as to form what we should call in modern phrase the Apostle's "Life and Letters." What amount of agreement, and what amount of discrepancy, may be observed between these independent authorities, is a question of the greatest interest and importance, and one upon which various opinions are entertained. The most adverse and extreme criticism is ably represented by Dr. Baur of Tübingen,<sup>a</sup> who finds so much opposition between what he holds to be the few authentic Pauline epistles and the Acts of the Apostles, that he pronounces the history to be an interested fiction. But his criticism is the very caricature of captiousness. We have but to imagine it applied to any history and letters of acknowledged authenticity, and we feel irresistibly how arbitrary and unhistorical it is. Putting aside this extreme view, it is not to

<sup>a</sup> In his *Paulus der Apostel Jesu Christi*, Stuttgart 1845 [2<sup>e</sup> Aufl., 1866-67].

be denied that difficulties are to be met with in reconciling completely the Acts and the received epistles of St. Paul. What the solutions of such difficulties may be, whether there are any direct contradictions, how far the apparent differences may be due to the purpose of the respective writers, by what arrangement all the facts presented to us may best be dove-tailed together, — these are the various questions which have given so much occupation to the critics and expositors of St. Paul, and upon some of which it seems to be yet impossible to arrive at a decisive conclusion.

We shall assume the Acts of the Apostles to be a genuine and authentic work of St. Luke, the companion of St. Paul, and shall speak of the epistles at the places which we believe them to occupy in the history.

*Prominent Points in the Life.* — It may be well to state beforehand a few of the principal occurrences upon which the great work done by St. Paul in the world is seen to depend, and which therefore serve as landmarks in his life. Foremost of all is his *Conversion*. This was the main root of his whole life, outward and inward. Next after this, we may specify his *Labors at Antioch*. From these we pass to the *First Missionary Journey*, in the eastern part of Asia Minor, in which St. Paul first assumed the character of the Apostle of Jesus Christ to the Gentiles. *The Visit to Jerusalem*, for the sake of settling the question of the relation of Gentile converts to the Jewish law, was a critical point, both in the history of the Church and of the Apostle. *The introduction of the Gospel into Europe*, with the memorable visits to Philippi, Athens, and Corinth, was the boldest step in the carrying out of St. Paul's mission. A third great missionary journey, chiefly characterized by a long stay at *Ephesus*, is further interesting from its connection with four leading epistles. This was immediately followed by the *apprehension of St. Paul at Jerusalem*, and his *imprisonment at Cæsarea*. And the last event of which we have a full narrative is the *Voyage to Rome*.

The relation of these events to external chronology will be considered at the end of the article.

*Soul of Tarsus, before his Conversion.* — Up to the time of his going forth as an avowed preacher of Christ to the *Gentiles*, the Apostle was known by the name of Saul. This was the Jewish name which he received from his Jewish parents. But though a Hebrew of the Hebrews, he was born in a Gentile city. Of his parents we know nothing, except that his father was of the tribe of Benjamin (Phil. iii. 5), and a Pharisee (Acts xxiii. 6), that he had acquired by some means the Roman fran-

chise ("I was free born," Acts xxii. 28., and that he was settled in Tarsus. "I am a Jew of Tarsus, a city in Cilicia, a citizen of no mean city" (Acts xxi. 39). Our attention seems to be specially called to this birthplace and early home of Saul by the repeated mention of it in connection with his name. Here he must have learnt to use the Greek language with freedom and mastery in both speaking and writing; and the general tone and atmosphere of a cultivated community cannot have been without their effect upon his highly susceptible nature. At Tarsus also he learnt that trade of *σκηνοποιός* (Acts xviii. 3), at which he afterwards occasionally wrought with his own hands. There was a goat's-hair cloth called *Cilicium*, manufactured in Cilicia, and largely used for tents. Saul's trade was probably that of making tents of this hair cloth. [TEXTMAKER, Amer. ed.] It does not follow that the family were in the necessitous condition which such manual labor commonly implies; for it was a wholesome custom amongst the Jews, to teach every child some trade, though there might be little prospect of his depending upon it for his living.

When St. Paul makes his defense before his countrymen at Jerusalem (Acts xxii.), he tells them that though born in Tarsus, he had been "brought up" (*ἀνατετραμμένος*) in Jerusalem. He must, therefore, have been yet a boy, when he was removed, in all probability for the sake of his education, to the Holy City of his fathers. We may imagine him arriving there perhaps at some age between 10 and 15, already a Hellenist, speaking Greek and familiar with the Greek version of the Scriptures, possessing, besides the knowledge of his trade, the elements of Gentile learning, — to be taught at Jerusalem "according to the perfect manner of the law of the fathers." He learnt, he says, "at the feet of Gamaliel." He who was to resist so stoutly the usurpations of the Law, had for his teacher one of the most eminent of all the doctors of the law. [GAMALIEL.] It is singular, that on the occasion of his well-known intervention in the Apostolical history, the master's counsels of toleration are in marked contrast to the persecuting zeal so soon displayed by the pupil. The temper of Gamaliel himself was moderate and candid, and he was personally free from bigotry; but his teaching was that of the strictest of the Pharisees, and bore its natural fruit when lodged in the ardent and thorough-going nature of Saul. Other fruits, besides that of a zeal which persecuted the Church, may no doubt be referred to the time when Saul sat at the feet of Gamaliel. A thorough training in the Scriptures and in the traditions of the elders

a \* It is by no means certain (if that be meant in the text above) that Paul first introduced the Gospel into Europe. Writers on the book of Acts often make this statement (see Baumgarten's *Apostelgeschichte*, i. 495). Philippi was the first city in Europe where Paul himself preached; but in all probability Rome, at least, had received the Gospel at an earlier period. This result was the more inevitable, because in addition to the general intercourse between that capital of the world and the East, "strangers of Rome" (Acts ii. 10), i. e. Jews and Jewish proselytes, were present at Jerusalem on the day of Pentecost and heard the preaching of Peter. The Cretans too, who were present on this occasion, may have carried with them the seed of the word to Crete, from which sprung the churches of that island, of whose origin we have otherwise no information.

b The story mentioned by Jerome (*Scrip. Eccl. Cat.* "Paulus") that St. Paul's parents lived at Gischala in Galilee, and that, having been born there, the infant Saul emigrated with his parents to Tarsus upon the taking of that city by the Romans, is inconsistent with the fact that Gischala was not taken until a much later time, and with the Apostle's own statement that he was born at Tarsus (Acts xxii. 3).

c His words in the speech before Agrippa (Acts xxvi. 4, 5), according to the received text, refer exclusively to his life at Jerusalem. But if we read, with the better authorities, *ἐν τῷ Ἰερ.* for *ἐν Ἰερ.* he may be speaking of the life he led "amongst his own people" at Tarsus or elsewhere, as well as of his residence at Jerusalem.

under an acute and accomplished master, must have done much to exercise the mind of Saul, and to make him feel at home in the subjects in which he was afterwards to be so intensely interested. And we are not at all bound to suppose that, because his zeal for the Law was strong enough to set him upon persecuting the believers in Jesus, he had therefore experienced none of the doubts and struggles which, according to his subsequent testimony, it was the nature of the Law to produce. On the contrary, we can scarcely imagine these as absent from the spiritual life of Saul as he passed from boyhood to manhood. Earnest persecutors are, oftener than not, men who have been tormented by inward struggles and perplexities. The pupil of Gamaliel may have been crushing a multitude of conflicts in his own mind when he threw himself into the holy work of extirpating the new heresy.

Saul was yet "a young man" (*νεαρίως*, Acts vi. 58), when the Church experienced that sudden expansion which was connected with the ordaining of the Seven appointed to serve tables, and with the special power and inspiration of Stephen. Amongst those who disputed with Stephen were some "of them of Cilicia." We naturally think of Saul as having been one of these, when we find him afterwards keeping the clothes of those suborned witnesses who, according to the Law (Deut. xvii. 7), were the first to cast stones at Stephen. "Saul," says the sacred writer, significantly, "was consenting unto his death." The angelic glory that shone from Stephen's face, and the Divine truth of his words, failing to subdue the spirit of religious hatred now burning in Saul's breast, must have embittered and aggravated its rage. Saul was passing through a terrible crisis for a man of his nature. But he was not one to be moved from his stern purpose by the native refinement and tenderness which he must have been stifling within him. He was the most unwearied and unrelenting of persecutors. "As for Saul, he made havoc of the Church, entering into every house,<sup>a</sup> and haling men and women, committed them to prison" (Acts viii. 3).

*Saul's Conversion.*—The persecutor was to be converted. What the nature of that conversion was, we are now to observe.—Having undertaken to follow up the believers "unto strange cities," Saul naturally turned his thoughts to Damascus, expecting to find, amongst the numerous Jewish residents of that populous city, some adherents of 'the way' (*της ὁδοῦ*), and trusting, we must presume, to be allowed by the connivance of the governor to apprehend them. What befell him as he journeyed thither is related in detail three times in the Acts, first by the historian in his own person, then in the two addresses made by St. Paul at Jerusalem and before Agrippa. These three narratives are not repetitions of one another: there are differences between them which some critics choose to consider irreconcilable. Considering that the same author is responsible for all the accounts, we gain nothing, of course, for the authenticity of their statements by bringing them into agreement; but it seems pretty clear that the author himself could not have been conscious of any contradictions in the narratives. He can scarcely have had any motive for placing side by

side inconsistent reports of St. Paul's conversion and that he should have admitted inconsistencies on such a matter through mere carelessness, is hardly credible. Of the three narratives, that of the historian himself must claim to be the most purely historical: St. Paul's subsequent accounts were likely to be affected by the purpose for which he introduced them. St. Luke's statement is to be read in Acts ix. 3-19, where, however, the words "It is hard for thee to kick against the pricks," included in the Vulgate and English version, ought to be omitted. The sudden light from heaven; the voice of Jesus speaking with authority to his persecutor; Saul struck to the ground, blinded, overcome; the three days' suspense: the coming of Ananias as a messenger of the Lord; and Saul's baptism;—these were the leading features, in the eyes of the historian, of the great event, and in these we must look for the chief significance of the conversion.

Let us now compare the historical relation with those which we have in St. Paul's speeches (Acts xxii. and xxvi.). The reader will do well to consider each in its place. But we have here to deal with the bare facts of agreement or difference. With regard to the light, the speeches add to what St. Luke tells us that the phenomenon occurred at mid-day, and that the light shone round, and was visible to Saul's companions as well as himself. The 2d speech says, that at the shining of this light, the whole company ("we all") fell to the ground. This is not *contradicted* by what is said, ix. 7, "the men which journeyed with him stood speechless;" for there is no emphasis on "stood," nor is the standing antithetical to Saul's falling down. We have but to suppose the others rising before Saul, or standing still afterwards in greater perplexity through not seeing or hearing what Saul saw and heard, to reconcile the narratives without forcing either. After the question, "Why persecutest thou me?" the 2d speech adds, "It is hard for thee to kick against the goads." Then both the speeches supply a question and answer—"I answered, who art thou, Lord? And he said, I am Jesus (of Nazareth), whom thou persecutest." In the direction to go into Damascus and await orders there, the 1st speech agrees with Acts ix. But whereas according to that chapter the men with Saul "heard the voice," in the 1st speech it is said "they heard not the voice of him that spake to me." It seems reasonable to conclude from the two passages, that the men actually heard sounds, but not, like Saul, an articulate voice. With regard to the visit of Ananias, there is no collision between the 9th chapter and the 1st speech, the latter only attributing additional words to Ananias. The 2d speech ceases to give details of the conversion after the words, "I am Jesus, whom thou persecutest. But rise and stand on thy feet." St. Paul adds, from the mouth of Jesus, an exposition of the purpose for which He had appeared to him. It is easy to say that in ascribing these words to Jesus, St. Paul or his professed reporter is violating the order and sequence of the earlier accounts. But, if we bear in mind the nature and purpose of St. Paul's address before Agrippa, we shall surely not suppose that he is violating the strict truth, when he adds to the words which Jesus spoke to him at the moment of the light and the sound, without interposing any reference to a later occasion, that fuller exposition of the meaning of the crisis through which he was passing, which he was not to receive

<sup>a</sup> \* Not "every house," but strictly, *into the houses* (*κατὰ τοὺς οἴκους*), one after another, in which believers dwell or had taken refuge. H.

ill afterwards. What Saul actually heard from Jesus on the way as he journeyed, was afterwards interpreted, to the mind of Saul, into those definite expressions.

For we must not forget that, whatever we hold as to the external nature of the phenomena we are considering, the whole transaction was essentially, in any case, a *spiritual* communication. That the Lord Jesus manifested Himself as a Living Person to the man Saul, and spoke to him so that his very words could be understood, is the substantial fact declared to us. The purport of the three narratives is that an actual conversation took place between Saul and the Lord Jesus. It is remarkable that in none of them is Saul said to have *seen* Jesus. The grounds for believing that he did are the two expressions of Ananias (Acts ix. 17), "The Lord Jesus, who appeared unto thee in the way," and (Acts xxii. 14), "That thou shouldest see the Just One," and the statement of St. Paul (1 Cor. xv. 8), "Last of all He was seen of me also." Comparing these passages with the narratives, we conclude, either that Saul had an instantaneous vision of Jesus as the flash of light blinded him, or that the "seeing" was that apprehension of his presence which would go with a real conversation. How it was that Saul "saw" and "heard" we are quite unable to determine. That the light, and the sound or voice, were both different from any ordinary phenomena with which Saul and his companions were familiar is unquestionably implied in the narrative. It is also implied that they were specially significant to Saul, and not to those with him. We gather therefore that there were real outward phenomena, through which Saul was made inwardly sensible of a Presence revealed to him alone.

Externally there was a flash of light. Spiritually "the light of the gospel of the glory of the Christ, who is the image of God," shone upon Saul, and convicted the darkness of the heart which had shut out Love and knew not the glory of the Cross. Externally Saul fell to the ground. Spiritually he was prostrated by shame, when he knew whom he had been persecuting. Externally sounds issued out of heaven. Spiritually the Crucified said to Saul, with tender remonstrance, "I am Jesus, why persecutest thou me?" Whether audibly to his companions, or audibly to the Lord Jesus only, Saul confessed himself in the spirit the servant of Him whose name he had hated. He gave himself up, without being able to see his way, to the disposal of him whom he now knew to have vindicated his claim over him by the very sacrifice which formerly he had despised. The Pharisee was converted, once for all, into a disciple of Jesus the Crucified.

The only mention in the epistles of St. Paul of the outward phenomena attending his conversion is that in 1 Cor. xv. 8, "Last of all He was seen of me also." But there is one important passage in which he speaks distinctly of his conversion itself. Dr. Baur (*Paulus*, p. 64), with his readiness to find out discrepancies, insists that this passage represents quite a different process from that recorded in the Acts. It is manifestly not a repe-

tion of what we have been reading and considering, but it is in the most perfect harmony with it. In the Epistle to the Galatians (i. 15, 16) St. Paul has these words: "When it pleased God, who separated me from my mother's womb, and called me by His grace, to reveal His Son in me, that I might preach Him among the heathen . . ." (*ἀποκαλύψαι τὸν υἱὸν αὐτοῦ ἐν ἐμοί*). What words could express more exactly than these the spiritual experience which occurred to Saul on the way to Damascus? The manifestation of Jesus as the Son of God is clearly the main point in the narrative. This manifestation was brought about through a removal of the veils of prejudice and ignorance which blinded the eyes of Saul to a Crucified Deliverer, conquering through sacrifice. And, whatever part the senses may have played in the transaction, the essence of it in any case must have been Saul's inward vision of a spiritual Lord close to his spirit, from whom he could not escape, whose every command he was henceforth to obey in the Spirit.

It would be groundless to assume that the new convictions of that mid-day immediately cleared and settled themselves in Saul's mind. It is sufficient to say that he was then *converted*, or turned round. For a while, no doubt, his inward state was one of awe and expectation. He was being "led by the hand" spiritually by his Master, as well as bodily by his companions. Thus entering Damascus as a servant of the Lord Jesus, he sought the house of one whom he had, perhaps, intended to persecute. Judas may have been known to his guest as a disciple of the Lord.<sup>a</sup> Certainly the fame of Saul's coming had preceded him; and Ananias, "a devout man according to the law," but a believer in Jesus, when directed by the Lord to visit him, wonders at what he is told concerning the notorious persecutor. He obeys, however; and going to Saul in the name of "the Lord Jesus, who had appeared to him in the way," he puts his hands on him that he may receive his sight and be filled with the Holy Ghost. Thereupon Saul's eyes are immediately purged and his sight is restored. "The same hour," says St. Paul (Acts xxii. 13), "I looked up upon him. And he said, The God of our fathers hath chosen thee, that thou shouldest know His will, and see the Just One, and shouldest hear the voice of His mouth. For thou shalt be His witness unto all men of what thou hast seen and heard." Every word in this address strikes some chord which we hear sounded again and again in St. Paul's epistles. The new convert is not, as it is so common to say, converted from Judaism to Christianity — *the God of the Jewish fathers chooses him*. He is chosen to know God's will. That will is manifested in the Righteous One. Him Saul sees and hears, in order that he may be a witness of Him to all men. The eternal will of the God of Abraham; that will revealed in a Righteous Son of God; the testimony concerning Him, a Gospel to mankind: — these are the essentially Pauline principles which are declared in all the teaching of the Apostle, and illustrated in all his actions.

After the recovery of his sight, Saul received the

<sup>a</sup> \* It seems improbable that this Judas was at that time a disciple. None of Saul's company were Christians, nor did they know that he had become a believer. Neither they, nor he, would probably know of a Christian family to which they could conduct

him, nor would such a one have readily received him. He went, apparently, to his intended place of stopping, possibly, a public house. It is probable that the host and the guest were both personally strangers to him.

washing away of his sins in baptism. He then broke his three days' fast, and was strengthened: an image, again, of the strengthening of his faint and hungering spirit through a participation in the Divine life of the Church of Damascus. He was at once received into the fellowship of the disciples, and began without delay the work to which Ananias had designated him; and to the astonishment of all his hearers he proclaimed Jesus in the synagogues, declaring him to be the Son of God. This was the actual sequel to his conversion: he was to proclaim Jesus the Crucified, first to the Jews as their own Christ, afterwards to the world as the Son of the Living God.

The narrative in the Acts tells us simply that he was occupied in this work, with increasing vigor, "for many days," up to the time when imminent danger drove him from Damascus. From the Epistle to the Galatians (i. 17, 18) we learn that the many days were at least a good part of "three years," and that Saul, not thinking it necessary to procure authority to preach from the Apostles that were before him, went after his conversion into Arabia, and returned from thence to Damascus. We know nothing whatever of this visit to Arabia: to what district Saul went, how long he stayed, or for what purpose he went there.<sup>a</sup> From the antithetical way in which it is opposed to a visit to the Apostles at Jerusalem, we infer that it took place before he deliberately committed himself to the task of proclaiming Jesus as the Christ; and also, with some probability, that he was seeking seclusion, in order that, by conferring "not with flesh and blood," but with the Lord in the Spirit, he might receive more deeply into his mind the commission given him at his conversion. That Saul did not spend the greater portion of the "three years" at Damascus seems probable, for these two reasons: (1) that the anger of the Jews was not likely to have borne with two or three years of such a life as Saul's now was without growing to a height; and (2) that the disciples at Jerusalem would not have been likely to mistrust Saul as they did, if they had heard of him as preaching Jesus at Damascus for the same considerable period. But it does not follow that Saul was in Arabia all the time he was not disputing at Damascus. For all that we know to the contrary he may have gone to Antioch or Tarsus or anywhere else, or he may have remained silent at Damascus for some time after returning from Arabia.

Now that we have arrived at Saul's departure from Damascus, we are again upon historical ground, and have the double evidence of St. Luke in the Acts, and of the Apostle in his 2d Epistle to the Corinthians. According to the former, the Jews lay in wait for Saul, intending to kill him, and watched the gates of the city that he might not escape from them. Knowing this, the disciples took him by night and let him down in a

<sup>a</sup> \* Paul informs us, Gal. iv. 25, that one of the names of Sinai in Arabia was Hagar. No other writer mentions such a name, and the Apostle may be supposed to have learned the fact during his visit to that country (Gal. i. 17). This contact between the two passages is certainly remarkable. "It is difficult to resist the thought," says Stanley (*Sin. & Pal.* p. 50, Amer. ed.), "that Paul may have stood upon the rocks of Sinai, and heard from Arab lips the oft-quoted 'Hagar,' — 'rock,' suggesting the double meaning" to which he alludes in the epistle. (See HAGAR, vol. II. p. 978, Amer. ed.)

basket from the wall. According to St. Paul (2 Cor. xi. 32) it was the ethnarch under Aretas the king who watched for him, desiring to apprehend him. There is no difficulty in reconciling the two statements. We might similarly say that our Lord was put to death either by the Jews or by the Roman governor. There is more difficulty in ascertaining how an officer of king Aretas should be governing in Damascus, and why he should lend himself to the designs of the Jews. But we learn from secular history that the affairs of Damascus were, at the time, in such an unsettled state as to make the narrative not improbable. [ARETAS.] Having escaped from Damascus, Saul betook himself to Jerusalem, and there "assayed to join himself to the disciples; but they were all afraid of him, and believed not that he was a disciple." In this natural but trying difficulty Saul was befriended by one whose name was henceforth closely associated with his. Barnabas became his sponsor to the Apostles and Church at Jerusalem, assuring them — from some personal knowledge, we must presume — of the facts of Saul's conversion and subsequent behavior at Damascus. It is noticeable that the seeing and hearing are still the leading features in the conversion, and the name of Jesus in the preaching. Barnabas declared how "Saul had seen the Lord in the way, and that he had spoken to him, and how that he had preached boldly at Damascus in the name of Jesus." Barnabas' introduction removed the fears of the Apostles, and Paul "was with them coming in and going out at Jerusalem." His Hellenistical education made him, like Stephen, a successful disputant against the "Grecians;" and it is not strange that the former persecutor was singled out from the other believers as the object of a murderous hostility. He was therefore again urged to flee; and by way of Cæsarea betook himself to his native city Tarsus.

In the Epistle to the Galatians St. Paul adds certain particulars, in which only a perverse and captious criticism could see anything contradictory to the facts just related. He tells us that his motive for going up to Jerusalem rather than anywhere else was that he might see Peter; that he abode with him fifteen days; that the only Apostles he saw were Peter and James the Lord's brother; and that afterwards he came into the regions of Syria and Cilicia,<sup>b</sup> remaining unknown by face, though well-known for his conversion, to the churches in Judæa which were in Christ. St. Paul's object in referring to this connection of his with those who were Apostles before him, was to show that he had never accepted his apostleship as a commission from them. On this point the narrative in the Acts entirely agrees with St. Paul's own earnest asseverations in his epistles. He received his commission from the Lord Jesus, and also mediately through Ananias. This commission

<sup>b</sup> \* From Acts ix. 30 Paul appears to have gone by sea from Cæsarea to Tarsus; nor does the order "Syria and Cilicia" in Gal. i. 21 necessarily conflict with this. It appears to have been usual to associate the provinces in that order (see Acts xv. 23, 41), because that was the order of the land-route from Jerusalem to Cilicia, the one usually taken. Hence Paul, in the Epistle to the Galatians, as above, may have adhered to it from the force of association, though he went in fact first to Cilicia, and then made missionary excursions into Syria.

included a special designation to preach Christ to the Gentiles. Upon the latter designation he did not act, until circumstances opened the way for it. But he at once began to proclaim Jesus as the Christ to his own countrymen. Barnabas introduced him to the Apostles, not as seeking their sanction, but as having seen and heard the Lord Jesus, and as having boldly spoken already in his name. Probably at first, Saul's independence as an Apostle of Christ was not distinctly thought of, either by himself or by the older Apostles. It was not till afterwards that it became so important; and then the reality of it appeared plainly from a reference to the beginning of his Apostolic work.

*St. Paul at Antioch.* — While Saul was at Tarsus, a movement was going on at Antioch, which raised that city to an importance second only to that of Jerusalem itself in the early history of the Church. In the life of the Apostle of the Gentiles Antioch claims a most conspicuous place. It was there that the preaching of the Gospel to the Gentiles first took root, and from thence that it was afterwards propagated. Its geographical position, its political and commercial importance, and the presence of a large and powerful Jewish element in its population, were the more obvious characteristics which adapted it for such a use. There came to Antioch, when the persecution which arose about Stephen scattered upon their different routes the disciples who had been assembled at Jerusalem, men of Cyprus and Cyrene, eager to tell all who would hear them the good news concerning the Lord Jesus. Until Antioch was reached, the word was spoken "to none but unto Jews only" (Acts xi. 19). But here the Gentiles also (*Ἕλληνας*) — not, as in the A. V., "the Grecians," — were amongst the hearers of the word. [See note *b*, vol. ii. p. 967.] A great number believed; and when this was reported at Jerusalem, Barnabas was sent on a special mission to Antioch.

As the work grew under his hands, and "much people was added unto the Lord," Barnabas felt the need of help, and went himself to Tarsus to seek Saul. Possibly at Damascus, certainly at Jerusalem, he had been a witness of Saul's energy and devotedness, and skill in disputation. He had been drawn to him by the bond of a most brotherly affection. He therefore longed for him as a helper, and succeeded in bringing him to Antioch. There they labored together unremittingly for "a whole year," mixing with the constant assemblies of the believers, and "teaching much people." All this time, as St. Luke would give us to understand, Saul was subordinate to Barnabas. Until "Saul" became "Paul," we read of "Barnabas and Saul" (Acts xi. 30, xii. 25, xiii. 2, 7). Afterwards the order changes to "Paul and Barnabas." It seems reasonable to conclude that there was no marked peculiarity in the teaching of Saul during the Antioch period. He held and taught, in common with the other Jewish believers, the simple faith in Jesus the Christ, crucified and raised from the dead. Nor did he ever afterwards depart from the simplicity of this faith. But new circumstances stirred up new questions; and then it was to Saul of Tarsus that it was given to see, more clearly than any others saw, those new applications of the old truth, those deep and world-wide relations of it, with which his work was to be permanently associated. In the mean time, according to the usual method of the Divine government, facts were

silently growing, which were to suggest and occasion the future developments of faith and practice, and of these facts the most conspicuous was the unprecedented accession of Gentile proselytes at Antioch.

An opportunity soon occurred, of which Barnabas and Saul joyfully availed themselves, for proving the affection of these new disciples towards their brethren at Jerusalem, and for knitting the two communities together in the bonds of practical fellowship. A manifest impulse from the Holy Spirit began this work. There came "prophets" from Jerusalem to Antioch: "and there stood up one of them, named Agabus, and signified by the Spirit that there should be great dearth throughout all the world." The "prophets" who now arrived may have been the Simeon and Lucius and Manaen, mentioned in xiii. 1, besides Agabus and others. The prediction of the dearth need not have been purposeless; it would naturally have a direct reference to the needs of the poorer brethren and the duty of the richer. It is obvious that the fulfillment followed closely upon the intimation of the coming famine. For the disciples at Antioch determined to send contributions immediately to Jerusalem; and the gift was conveyed to the elders of that church [at Jerusalem and perhaps of the churches in Judea, Acts xi. 29] by the hands of Barnabas and Saul. The time of this dearth is vaguely designated in the Acts as the reign of Claudius. It is ascertained from Josephus's history, that a severe famine did actually prevail in Judea, and especially at Jerusalem, at the very time fixed by the event recorded in Acts xii., the death of Herod Agrippa. This was in A. D. 44. [AGABUS.]

It could not have been necessary for the mere safe conduct of the contribution that Barnabas and Saul should go in person to Jerusalem. We are bound to see in the relations between the Mother-Church and that of Antioch, of which this visit is illustrative, examples of the deep feeling of the necessity of union which dwelt in the heart of the early Church. The Apostles did not go forth to teach a system, but to enlarge a body. The Spirit which directed and furthered their labors was essentially the Spirit of fellowship. By this Spirit Saul of Tarsus was being practically trained in strict coöperation with his elders in the Church. The habits which he learnt now were to aid in guarding him at a later time from supposing that the independence which he was bound to claim, should involve the slightest breach or loosening of the bonds of the universal brotherhood.

Having discharged their errand, Barnabas and Saul returned to Antioch, bringing with them another helper, John surnamed Mark, sister's son to Barnabas. [SISTER'S SON, Amer. ed.] The work of prophesying and teaching was resumed. Several of the oldest and most honored of the believers in Jesus were expounding the way of God and organizing the Church in that busy metropolis. Travellers were incessantly passing to and fro. Antioch was in constant communication with Cilicia, with Cyprus, with all the neighboring countries. The question must have forced itself upon hundreds of the "Christians" at Antioch, "What is the meaning of this faith of ours, of this baptism, of this incorporation, of this kingdom of the Son of God, for the world? The Gospel is not for Judea alone: here are we called by it at Antioch. Is it meant to stop here?" The Church

was pregnant with a great movement, and the time of her delivery was at hand. We forget the whole method of the Divine work in the nurture of the Church, if we ascribe to the impulses of the Holy Ghost any theatrical suddenness, and disconnect them from the thoughts which were brooding in the minds of the disciples. At every point we find both circumstances and inward reasonings preparing the crisis. Something of direct expectation seems to be implied in what is said of the leaders of the Church at Antioch, that they were "ministering to the Lord, and fasting," when the Holy Ghost spoke to them. Without doubt they knew it for a seal set upon previous surmises, when the voice came clearly to the general mind, "Separate me Barnabas and Saul for the work whereunto I have called them." That "work" was partially known already to the Christians of Antioch: who could be so fit for it as the two brothers in the faith and in mutual affection, the son of exhortation, and the highly accomplished and undaunted convert who had from the first been called "a chosen vessel, to bear the name of the Lord before the Gentiles, and kings, and the people of Israel"?

When we look back, from the higher ground of St. Paul's apostolic activity, to the years that passed between his conversion and the first missionary journey, we cannot observe without reverence the patient humility with which Saul waited for his Master's time. He did not say for once only, "Lord, what wilt thou have me to do?" Obedience to Christ was thenceforth his ruling principle. Submitting, as he believed, to his Lord's direction, he was content to work for a long time as the subordinate colleague of his seniors in the faith. He was thus the better prepared, when the call came, to act with the authority which that call conferred upon him. He left Antioch, however, still the second to Barnabas. Everything was done with orderly gravity in the sending forth of the two missionaries. Their brethren, after fasting and prayer, laid their hands on them, and so they departed.

*The first Missionary Journey.*—Much must have been hid from Barnabas and Saul as to the issues of the journey on which they embarked. But one thing was clear to them, that *they were sent forth to speak the word of God.* They did not go in their own name or for their own purposes: they were instruments for uttering what the Eternal God Himself was saying to men. We shall find in the history a perfectly definite representation of what St. Paul announced and taught as he journeyed from city to city. But the first characteristic feature of his teaching was the absolute conviction that he was only the bearer of a heavenly message. It is idle to discuss St. Paul's character or views without recognizing this fact. We are compelled to think of him as of a man who was capable of cherishing such a conviction with perfect assurance. We are bound to bear in mind the unspeakable influence which that conviction must have exerted upon his nature. The writer of the Acts proceeds upon the same assumption. He tells us that as soon as Barnabas and Saul reached Cyprus, they began to "announce the word of God."

The second fact to be observed is, that for the present they delivered their message in the synagogues of the Jews only. [SYNAGOGUES, Amer. ed.] They trod the old path till they should be

drawn out of it. But when they had gone through the island, from Salamis to Paphos, they were called upon to explain their doctrine to an eminent Gentile, Sergius Paulus, the proconsul. This Roman officer, like so many of his countrymen, had already come under the influence of Jewish teaching; but it was in the corrupt form of magical pretensions, which throve so luxuriantly upon the godless credulity of that age. A Jew, named Barjesus, or Elymas, a *magus* and false prophet, had attached himself to the governor, and had no doubt interested his mind, for he was an intelligent man, with what he had told him of the history and hopes of the Jews. [ELYMAS.] Accordingly, when Sergius Paulus heard of the strange teachers who were announcing to the Jews the advent of their true Messiah, he wished to see them, and sent for them. The impostor, instinctively hating the Apostles, and seeing his influence over the proconsul in danger of perishing, did what he could to withstand them. Then Saul, "who is also called Paul," denouncing Elymas in remarkable terms, declared against him God's sentence of temporary blindness. The blindness immediately falls upon him; and the proconsul, moved by the scene and persuaded by the teaching of the Apostle, becomes a believer.

There is a singular parallelism in several points between the history of St. Paul and that of St. Peter in the Acts. Baur presents it in a highly effective form (*Paulus*, p. 91, &c.), to support his theory of the composition of this book; and this is one of the services which he has incidentally rendered to the full understanding of the early history of the Church. Thus St. Paul's discomfiture of Elymas reminds us of St. Peter's denunciation of Simon Magus. The two incidents bring strongly before us one of the great adverse elements with which the Gospel had to contend in that age. Everywhere there were counterfeits of the spiritual powers which the Apostles claimed and put forth. It was necessary for the preachers of Christ, not so much to prove themselves stronger than the magicians and soothsayers, as to guard against being confounded with them. One distinguishing mark of the true servants of the Spirit would be that of *not trading* upon their spiritual powers (Acts viii. 20). Another would be that of shunning every sort of concealment and artifice, and courting the daylight of open truth. St. Paul's language to Elymas is studiously directed to the reproof of the tricks of the religious impostor. The Apostle, full of the true Holy Ghost, looked steadily on the deceiver, spoke in the name of a God of light and righteousness and straightforward ways, and put forth the power of that God for the vindication of truth against delusion. The punishment of Elymas was itself symbolical, and conveyed "teaching of the Lord." He had chosen to create a spiritual darkness around him; and now there fell upon him a mist and a darkness, and he went about, seeking some one to lead him by the hand. If on reading this account we refer to St. Peter's reproof of Simon Magus, we shall be struck by the differences as well as the resemblance which we shall observe. But we shall undoubtedly gain a stronger impression of this part of the Apostolic work, namely, the conflict to be waged between the Spirit of Christ and of the Church, and the evil spirits of a dark superstition to which men were surrendering themselves as slaves. We shall feel the worth and power of that

audacious and open temper in which alone St. Paul would commend his cause; and in the conversion of Sergius Paulus we shall see an exemplary type of many victories to be won by the truth over falsehood.

This point is made a special crisis in the history of the Apostle by the writer of the Acts. Saul now becomes Paul, and begins to take precedence of Barnabas. Nothing is said to explain the change of name. No reader could resist the temptation of supposing that there must be some connection between Saul's new name and that of his distinguished Roman convert. But on reflection it does not seem probable that St. Paul would either have wished, or have consented to change his own name for that of a distinguished convert. If we put Sergius Paulus aside, we know that it was exceedingly common for Jews to bear, besides their own Jewish name, another borrowed from the country with which they had become connected. (See Conybeare and Howson, i. 163, for full illustrations.) Thus we have Simeon also named Niger, Barsabas also named Justus, John also named Marcus. There is no reason therefore why Saul should not have borne from infancy the other name of Paul. In that case he would be Saul amongst his own countrymen, Paulus amongst the Gentiles. And we must understand St. Luke as wishing to mark strongly the transition point between Saul's activity amongst his own countrymen, and his new labors as the Apostle of the Gentiles, by calling him Saul only, during the first, and Paul only afterwards.<sup>a</sup>

The conversion of Sergius Paulus may be said, perhaps, to mark the beginning of the work amongst the Gentiles; otherwise, it was not in Cyprus that any change took place in the method hitherto followed by Barnabas and Saul in preaching the Gospel. Their public addresses were as yet confined to the synagogues; but it was soon to be otherwise. From Paphos, "Paul and his company" set sail for the mainland, and arrived at Perga in Pamphylia, where the heart of their companion John failed him, and he returned to Jerusalem. [PERGA.] From Perga they travelled on to a place, obscure in secular history, but most memorable in the history of the kingdom of Christ.—Antioch in Pisidia. [ANTIOCH IN PISIDIA.] Here "they went into the synagogue on the sabbath day, and sat down." Small as the place was, it contained its colony of Jews, and with them proselytes who worshipped the God of the Jews. The degree to which the Jews had spread and settled themselves over the world, and the influence they had gained over the more respectable of their Gentile neighbors, and especially over the women of the better class, are facts difficult to appreciate justly, but proved by undoubted evidence, and very important for us to bear in mind. This Pisidian Antioch may have been more Jewish than most similar towns, but it was not more so than many of much

greater size and importance. What took place here in the synagogue and in the city is interesting to us not only on account of its bearing on the history, but also because it represents more or less exactly what afterwards occurred in many other places.

It cannot be without design that we have single but detailed examples given us in the Acts, of the various kinds of addresses which St. Paul used to deliver in appealing to his different audiences. He had to address himself, in the course of his missionary labors, to Jews, knowing and receiving the Scriptures; to ignorant barbarians: to cultivated Greeks; to mobs enraged against himself personally; to magistrates and kings. It is an inestimable help in studying the Apostle and his work, that we have specimens of the tone and the arguments he was accustomed to use in all these situations. These will be noticed in their places. In what he said at the synagogue in Antioch, we recognize the type of the addresses in which he would introduce his message to his Jewish fellow-countrymen.

The Apostles<sup>b</sup> of Christ sat still with the rest of the assembly, whilst the Law and the Prophets were read. They and their audience were united in reverence for the sacred books. Then the rulers of the synagogue sent to invite them, as strangers but brethren, to speak any word of exhortation which might be in them to the people. Paul stood up, and beckoning with his hand, he spoke.—The speech is given in Acts xiii. 16–41. The characteristics we observe in it are these. The speaker begins by acknowledging "the God of this people Israel." He ascribes to him the calling out of the nation and the conduct of its subsequent history. He touches on the chief points of that history up to the reign of David, whom he brings out into prominence. He then names JESUS as the promised Son of David. To convey some knowledge of Jesus to the minds of his hearers, he recounts the chief facts of the gospel history; the preparatory preaching and baptism of John (of which the rumor had spread perhaps to Antioch); the condemnation of Jesus by the rulers "who knew neither him nor the prophets," and his resurrection. That resurrection is declared to be the fulfillment of all God's promises of life, given to the fathers. Through Jesus, therefore, is now proclaimed by God Himself the forgiveness of sins and full justification. The Apostle concludes by drawing from the prophets a warning against unbelief. If this is an authentic example of Paul's preaching, it was impossible for Peter or John to start more exclusively from the Jewish covenant and promises than did the Apostle of the Gentiles. How entirely this discourse resembles those of St. Peter and of Stephen in the earlier chapters of the Acts! There is only one specially Pauline touch in the whole,—the words in ver. 39, "By Him all that believe are justified from all things, from which ye could not

<sup>a</sup> \* A little more prominence should probably be given here to the occurrence with which this change of name is associated, and to the communication of spiritual power which seems to have marked the transfer of precedence in the joint mission. The smiting of Elymas with blindness was the first miracle which the Apostle wrought; and miracles were the acknowledged credentials or "signs of an apostle" (2 Cor. xii. 12). At this juncture he appears to have received a special consecration to the apostleship to

which he had been called, "being filled with the Holy Ghost," not for the first time, but in a special sense. With the divine afflatus upon him, he addressed the sorcerer with the authority of an apostle of the Lord, and with a supernatural effect. This attestation of his apostolic commission would naturally be decisive with Barnabas, and may account for the quiet assumption, with the new name, by his associate, of the leadership from this point. S W

<sup>b</sup> \* See APOSTLE on the use of this title. S W

be justified by the law of Moses." "Evidently foisted in," says Baur (p. 103), who thinks we are dealing with a mere fiction, "to prevent the speech from appearing too Petrine, and to give it a slightly Pauline air." Certainly, it sounds like an echo of the epistles to the Romans and Galatians. But is there therefore the slightest incongruity between this and the other parts of the address? Does not that "forgiveness of sins" which St. Peter and St. Paul proclaimed with the most perfect agreement, connect itself naturally, in the thoughts of one exercised by the law as Saul of Tarsus had been, with justification not by the law but by grace? If we suppose that Saul had accepted just the faith which the older Apostles held in Jesus of Nazareth, the Messiah of the Jews, crucified and raised from the dead according to the teaching of the prophets, and in the remission of sins through him confirmed by the gift of the Holy Ghost; and that he had *also* had those experiences, not known to the older Apostles, of which we see the working in the epistles to the Romans and the Galatians; this speech, in all its parts, is precisely what we might expect; this is the very teaching which the Apostle of the Gentiles must have everywhere and always set forth, when he was speaking "God's word" for the first time to an assembly of his fellow-countrymen.

The discourse thus epitomized produced a strong impression; and the hearers (not "the Gentiles")<sup>a</sup> requested the Apostles to repeat their message on the next Sabbath. During the week so much interest was excited by the teaching of the Apostles, that on the Sabbath day "almost the whole city came together, to hear the word of God." It was this concern of the Gentiles which appears to have first alienated the minds of the Jews from what they had heard. They were filled with envy. They probably felt that there was a difference between those efforts to gain Gentile proselytes in which they had themselves been so successful, and this new preaching of a Messiah in whom a justification which the Law could not give was offered to men. The eagerness of the Gentiles to hear may have confirmed their instinctive apprehensions. The Jewish envy once roused became a power of deadly hostility to the Gospel; and these Jews at Antioch set themselves to oppose bitterly the words which Paul spoke. We have here, therefore, a new phase in the history of the Gospel. In these foreign countries it is not the Cross or Nazareth which is most immediately repulsive to the Jews in the proclaiming of Jesus. It is the wound given to Jewish importance in the association of Gentiles with Jews as the receivers of the good tidings. If the Gentiles had been asked to become Jews, no offense would have been taken. But the proclamation of the Christ could not be thus governed and restrained. It overleaped, by its own force, these narrowing methods. It was felt to be addressed not to one nation only, but to mankind.

The new opposition brought out new action on the part of the Apostles. Rejected by the Jews, they became bold and outspoken, and turned from them to the Gentiles. They remembered and declared what the prophets had foretold of the enlightening and deliverance of the whole world.

<sup>a</sup> \* The best copies omit τὰ ἔθνη after παρεκάλουν.

H.

<sup>b</sup> \* These women of the higher class were Gentile women who had embraced Judaism, and could be

In speaking to the Gentiles, therefore, they were simply fulfilling the promise of the Covenant. The gift, we observe, of which the Jews were depriving themselves, and which the Gentiles who believed were accepting, is described as "eternal life" (*αἰώνιος ζωή*). It was the life of which the riser Jesus was the fountain, which Peter and John had declared at Jerusalem, and of which all acts of healing were set forth as signs. This was now poured out largely upon the Gentiles. The word of the Lord was published widely, and had much fruit. Henceforth, Paul and Barnabas knew it to be their commission, — not the less to present their message to Jews first; but in the absence of an adequate Jewish medium, to deal directly with the Gentiles. But this expansion of the Gospel work brought with it new difficulties and dangers. At Antioch now, as in every city afterwards, the unbelieving Jews used their influence with their own adherents among the Gentiles, and especially the women of the higher class,<sup>b</sup> to persuade the authorities or the populace to persecute the Apostles, and to drive them from the place.

With their own spirits raised, and amidst much enthusiasm of their disciples, Paul and Barnabas now travelled on to Iconium, where the occurrences at Antioch were repeated, and from thence to the Lycaonian country which contained the cities Lystra and Derbe. Here they had to deal with uncivilized heathens. At Lystra the healing of a cripple took place, the narrative of which runs very parallel to the account of the similar act done by Peter and John at the gate of the Temple. The agreement becomes closer, if we insert here, with Lachmann, before "Stand upright on thy feet," the words "I say unto thee in the name of the Lord Jesus Christ." The parallel leads us to observe more distinctly that every messenger of Jesus Christ was a herald of life. The spiritual life — the *ζωή αἰώνιος* — which was of faith, is illustrated and expounded by the invigoration of impotent limbs. The same truth was to be conveyed to the inhabitants of Jerusalem and to the heathens of Lycaonia. The act was received naturally by these pagans. They took the Apostles for gods, calling Barnabas, who was of the more imposing presence, Zeus (Jupiter), and Paul, who was the chief speaker, Hermes (Mercurius). This mistake, followed up by the attempt to offer sacrifices to them, gives occasion to the recording of an address, in which we see a type of what the Apostles would say to an ignorant pagan audience. [LYSTRA, Amer. ed.] Appeals to the Scriptures, references to the God of Abraham and Isaac and Jacob, would have been out of place. The Apostles name the Living God, who made heaven and earth and the sea and all things therein, the God of the whole world and all the nations in it. They declare themselves to be his messengers. They expatiate upon the tokens of Himself which the Father of men had not withheld, in that He did them good, sending rain from heaven and fruitful seasons, the supporters of life and joy. They protest that in restoring the cripple they had only acted as instruments of the Living God. They themselves were not gods but human beings of like passions with the Lycaonians. The Living God was now mani-

easily excited against a sect who were represented to them by the crafty Jews as hostile to their faith (See Acts xlii. 50, and xvii. 4.)

H.

lecting Himself more clearly to men, desiring that henceforth the nations should not walk in their own ways, but his. They therefore call upon the people to give up the vanities of idol worship, and to turn to the Living God (comp. 1 Thess. i. 9, 10). In this address, the name of Jesus does not occur. It is easy to understand that the Apostles preached Him as the Son of that Living God to whom they bore witness, telling the people of his death and resurrection, and announcing his coming again.

Although the people of Lystra had been so ready to worship Paul and Barnabas, the repulse of their idolatrous instincts appears to have provoked them, and they allowed themselves to be persuaded into hostility by Jews who came from Antioch and Iconium, so that they attacked Paul with stones, and thought they had killed him. He recovered, however, as the disciples were standing round him, and went again into the city. The next day he left it with Barnabas, and went to Derbe, and thence they returned once more to Lystra, and so to Iconium and Antioch, renewing their exhortations to the disciples, bidding them not to think their trials strange, but to recognize them as the appointed door through which the kingdom of Heaven, into which they were called, was to be entered. In order to establish the churches after their departure, they solemnly appointed "elders" in every city. Then they came down to the coast, and from Attalia they sailed home to Antioch in Syria, where they related the successes which had been granted to them, and especially the "opening of the door of faith to the Gentiles." And so the First Missionary Journey ended.

*The Council at Jerusalem.* (Acts xv. Galatians ii.)—Upon that missionary journey follows most naturally the next important scene which the historian sets before us,—the council held at Jerusalem to determine the relations of Gentile believers to the Law of Moses. In following this portion of the history, we encounter two of the greater questions which the biographer of St. Paul has to consider. One of these is historical, What were the relations between the Apostle Paul and the Twelve? The other is critical, How is Galatians ii. to be connected with the narrative of the Acts?

The relations of St. Paul and the Twelve will best be set forth in the narrative. But we must explain here why we accept St. Paul's statements in the Galatian epistle as additional to the history in Acts xv. The first impression of any reader would be a supposition that the two writers might be referring to the same event. The one would at least bring the other to his mind. In both he reads of Paul and Barnabas going up to Jerusalem, reporting the Gospel preached to the uncircumcised, and discussing with the older Apostles the terms to be imposed upon Gentile believers. In both the conclusion is announced, that these believers should be entirely free from the necessity of circumcision. These are main points which the narratives have in common. On looking more closely into both, the second impression upon the reader's mind may possibly be that of a certain incompatibility between the two. Many joints and members of the transaction as given by St. Luke, do not appear in St. Paul. Others in one or two cases are substituted.

Further, the visit to Jerusalem is the 3d mentioned in the Acts, after Saul's conversion; in Galatians it is apparently mentioned as the 2d. Supposing this sense of incompatibility to remain, the reader will go on to inquire whether the visit to Jerusalem mentioned in Galatians coincides better with any other mentioned in the Acts,—as the 2d (xi. 30) or the 4th (xviii. 22). He will, in all probability, conclude without hesitation that it does not. Another view will remain, that St. Paul refers to a visit not recorded in the Acts at all. This is a perfectly legitimate hypothesis; and it is recommended by the vigorous sense of Paley. But where are we to place the visit? The only possible place for it is some short time before the visit of ch. xv. But it can scarcely be denied, that the language of ch. xv. decidedly implies that the visit there recorded was the first paid by Paul and Barnabas to Jerusalem, after their great success in preaching the Gospel amongst the Gentiles.

We suppose the reader, therefore, to recur to his first impression. He will then have to ask himself, "Granting the considerable differences, are there after all any plain contradictions between the two narratives, taken to refer to the same occurrences?" The answer must be, "There are no plain contradictions." And this, he will perceive, is a very weighty fact. When it is recognized, the resemblances first observed will return with renewed force to the mind.

We proceed then to combine the two narratives. Whilst Paul and Barnabas were staying at Antioch, "certain men from Judea" came there and taught the brethren that it was necessary for the Gentile converts to be circumcised. This doctrine was vigorously opposed by the two Apostles, and it was determined that the question should be referred to the Apostles and elders at Jerusalem. Paul and Barnabas themselves, and certain others, were selected for this mission. In Gal. ii. 2, St. Paul says that he went up "by revelation" (*κατ' ἀποκάλυψιν*), so that we are to understand him as receiving a private intimation from the Divine Spirit, as well as a public commission from the Church at Antioch.<sup>a</sup> On their way to Jerusalem, they announced to the brethren in Phœnicia and Samaria the conversion of the Gentiles; and the news was received with great joy. "When they were come to Jerusalem, they were received by the Church, and by the Apostles and elders, and they declared all things that God had done with them" (Acts xv. 4). St. Paul adds that he communicated his views "privately to them which were of reputation," through anxiety as to the success of his work (Gal. ii. 2). The Apostles and the Church in general, it appears, would have raised no difficulties; but certain believers who had been Pharisees thought fit to maintain the same doctrine which had caused the disturbance at Antioch. In either place, St. Paul would not give way to such teaching for a single hour (Gal. ii. 5). It became necessary, therefore, that a formal decision should be come to upon the question. The Apostles and elders came together, and there was much disputing. Arguments would be used on both sides; but when the persons of highest authority spoke, they appealed to what was stronger than argu-

<sup>a</sup> \* The passages in Acts (xv. 2) and in Galatians (ii. 2) are alike consistent whether we suppose that the revelation was first and the action of the church subsequent, or the reverse. Paul may have been in-

structed to propose the sending of delegates to Jerusalem; or the church may have proposed the measure and Paul have been directed to approve it, and so on of the messengers. H

ments,—the course of *facts*, through which the will of God had been manifestly shown. St. Peter, reminding his hearers that he himself had been first employed to open the door of faith to Gentiles, points out that God had himself bestowed on the uncircumcised that which was the seal of the highest calling and fellowship in Christ, (the gift of the Holy Ghost. "Why do you not acquiesce in this token of God's will? Why impose upon Gentile believers ordinances which we ourselves have found a heavy burden? Have not we Jews left off trusting in our Law, to depend only on the grace of our Lord Jesus Christ?"—Then, carrying out the same appeal to the will of God as shown in facts, Barnabas and Paul relate to the silent multitude the wonders with which God had accompanied their preaching amongst the Gentiles. After they had done, St. James, with incomparable simplicity and wisdom, binds up the testimony of recent facts with the testimony of ancient prophecy, and gives a practical judgment upon the question.

The judgment was a decisive one. The injunction that the Gentiles should abstain from pollutions of idols and from fornication explained itself. The abstinence from things strangled and from blood is desired as a concession to the customs of the Jews, who were to be found in every city, and for whom it was still right, when they had believed in Jesus Christ, to observe the Law. St. Paul had completely gained his point. The older Apostles, James, Cephas, and John, perceiving the grace which had been given him (his effectual Apostleship), gave to him and Barnabas the right hand of fellowship. At this point it is very important to observe precisely what was the matter at stake between the contending parties (compare Prof. Jowett on "St. Paul and the Twelve," in *St. Paul's Epistles*, i. 417). St. Peter speaks of a heavy yoke; St. James of troubling the Gentile converts. But we are not to suppose that they mean merely the outward trouble of conforming to the Law of Moses. That was not what St. Paul was protesting against. The case stood thus: Circumcision and the ordinances of the Law were witnesses of a separation of the chosen race from other nations. The Jews were proud of that separation. But the Gospel of the Son of Man proclaimed that the time had come in which the separation was to be done away, and God's good-will manifested to all nations alike. It spoke of a union with God, through trust, which gave hope of a righteousness that the Law had been powerless to produce. Therefore to insist upon Gentiles being circumcised would have been to deny the Gospel of Christ. If there was to be simply an enlarging of the separated nation by the receiving of individuals into it, then the other nations of the world remained as much on the outside of God's covenant as ever. Then there was no Gospel to mankind; no justification given to men. The loss, in such a case, would have been as much to the Jew as to the Gentile. St. Paul felt this the most strongly; but St. Peter also saw that if the Jewish believers were thrown back on the Jewish law, and gave up the free and absolute grace of God, the Law became a mere burden, just as heavy to the Jew as it would be to the Gentile. The only hope for the

<sup>a</sup> The presence of St. Peter, and the growth of Jewish prejudice, are more easily accounted for if we suppose St. Paul to have left Antioch for a long time.

Jew was in a Saviour who *must be the Saviour of mankind.*

It implied therefore no difference of belief when it was agreed that Paul and Barnabas should go to the heathen, while James and Cephas and John undertook to be the Apostles of the Circumcision. St. Paul, wherever he went, was to preach "to the Jew first;" St. Peter was to preach to the Jews as free a Gospel, was to teach the admission of the Gentiles without circumcision as distinctly as St. Paul himself. The unity of the Church was to be preserved unbroken; and in order to nourish this unity the Gentiles were requested to remember their poorer brethren in Palestine (Gal. ii. 10). How zealously St. Paul cherished this beautiful witness of the common brotherhood we have seen in part already (Acts xi. 29, 30), but it is yet to appear more strikingly.

The judgment of the Church was immediately recorded in a letter addressed to the Gentile brethren in Antioch and Syria and Cilicia. That this letter might carry greater authority it was intrusted to "chosen men of the Jerusalem Church, Judas surnamed Barsabas, and Silas, chief men among the brethren." The letter speaks affectionately of Barnabas and Paul (with the elder Church Barnabas still retained the precedence, xv. 12, 25) as "men who have hazarded their lives for the name of our Lord Jesus Christ." So Judas and Silas come down with Paul and Barnabas to Antioch, and comfort the Church there with their message, and when Judas returned "it pleased Silas to abide there still."

It is usual to connect with this period of the history that rebuke of St. Peter which St. Paul records in Gal. ii. 11-14. The connection of subject makes it convenient to record the incident in this place, although it is possible that it took place before the meeting at Jerusalem, and perhaps most probable that it did not occur till later, when St. Paul returned from his long tour in Greece to Antioch (Acts xviii. 22, 23). St. Peter was at Antioch, and had shown no scruple about "eating with the Gentiles," until "certain came from James." These Jerusalem Christians brought their Jewish exclusiveness with them, and St. Peter's weaker and more timid mood came upon him, and through fear of his stricter friends he too began to withdraw himself from his former free association with the Gentiles. Such an example had a dangerous weight, and Barnabas and the other Jews at Antioch were being seduced by it. It was an occasion for the intrepid faithfulness of St. Paul. He did not conceal his anger at such weak dissembling, and he publicly remonstrated with his elder fellow-Apostle. "If thou, being a Jew, livest after the manner of Gentiles, and not as do the Jews, why compellest thou the Gentiles to live as do the Jews?" (Gal. ii. 14). St. Peter had abandoned the Jewish exclusiveness, and deliberately claimed common ground with the Gentile: why should he, by separating himself from the uncircumcised, require the Gentiles to qualify themselves for full communion by accepting circumcision? This "withstanding" of St. Peter was no opposition of Pauline to Petrine views; it was a faithful rebuke of blamable moral weakness.<sup>b</sup>

<sup>b</sup> \* An interval of a year or a year and a half only could have elapsed between Paul's return to Antioch from the council at Jerusalem, and his departure on his second missionary tour, as the best chronologists

*Second Missionary Journey.* — The most resolute courage, indeed, was required for the work to which St. Paul was now publicly pledged. He would not associate with himself in that work one who had already shown a want of constancy. This was the occasion of what must have been a most painful difference between him and his comrade in the faith and in past perils, Barnabas. After remaining awhile at Antioch, Paul proposed to Barnabas to revisit the brethren in the countries of their former journey. Hereupon Barnabas desired that his nephew John Mark should go with them. But John had deserted them in Pamphylia, and St. Paul would not try him again. "And the contention was so sharp between them that they departed asunder one from the other; and so Barnabas took Mark, and sailed unto Cyprus; and Paul chose Silas, and departed." Silas, or Silvanus, becomes now a chief companion of the Apostle. The two went together through Syria and Cilicia, visiting the churches, and so came to Derbe and Lystra. Here they find Timotheus, who had become a disciple on the former visit of the Apostle, and who so attracted the esteem and love of St. Paul, that "he would have him go forth with him." Him St. Paul took and circumcised. If this fact had been omitted here and stated in another narrative, how utterly irreconcilable it would have been, in the eyes of some critics, with the history in the Acts! Paul and Silas were actually delivering the Jerusalem decree to all the churches they visited. They were no doubt triumphing in the freedom secured to the Gentiles. Yet at this very time our Apostle had the wisdom and largeness of heart to consult the feelings of the Jews by circumcising Timothy. There were many Jews in those parts, who knew that Timothy's father was a Greek, his mother a Jewess. That St. Paul should have had, as a chief companion, one who was uncircumcised, would of itself have been a hindrance to him in preaching to Jews; but it would have been a still greater stumbling-block if that companion were half a Jew by birth, and had professed the Jewish faith. Therefore in this case St. Paul "became unto the Jews as a Jew that he might gain the Jews."

St. Luke now steps rapidly over a considerable space of the Apostle's life and labors. "They went throughout Phrygia and the region of Galatia" (xvi. 6). At this time St. Paul was founding "the churches of Galatia" (Gal. i. 2). He himself gives us hints of the circumstances of his preaching in that region, of the reception he met with, and of the ardent, though unstable, character of the people, in the following words: "Ye know how through infirmity of the flesh (*ὄτι δι' ἀσθένειαν τῆς σαρκὸς*) I preached the Gospel unto you at the first (*τὸ πρότερον*), and my temptation which was in my flesh ye despised not nor rejected, but received me as an angel of God, even as Christ Jesus. Where is then the blessedness ye spake of (*ὃ μακαριστὸς ἂν ὄμων*)? for I bear you record that, if it had been possible, ye would have plucked out our own eyes, and have given them to me" (iv. 13). It is not easy to decide as to the meaning

of the words *δι' ἀσθένειαν τῆς σαρκὸς*. Undoubtedly their grammatical sense implies that "weakness of the flesh" — an illness — was the occasion of St. Paul's preaching in Galatia; and De Wette and Alford adhere to this interpretation, understanding St. Paul to have been detained by illness, when otherwise he would have gone rapidly through the country. On the other hand, the form and order of the words are not what we should have expected if the Apostle meant to say this; and Professor Jowett prefers to assume an inaccuracy of grammar, and to understand St. Paul as saying that it was *in* weakness of the flesh that he preached to the Galatians. In either case St. Paul must be referring to a more than ordinary pressure of that bodily infirmity which he speaks of elsewhere as detracting from the influence of his personal address. It is hopeless to attempt to determine positively what this infirmity was. But we may observe here — (1) that St. Paul's sensitiveness may have led him to exaggerate this personal disadvantage; and (2) that, whatever it was, it allowed him to go through sufferings and hardships such as few ordinary men could bear. And it certainly did not repel the Galatians; it appears rather to have excited their sympathy and warmed their affection towards the Apostle.

St. Paul at this time had not indulged the ambition of preaching his Gospel in Europe. His views were limited to the peninsula of Asia Minor. Having gone through Phrygia and Galatia he intended to visit the western coast [ASIA]; but "they were forbidden by the Holy Ghost to preach the word" there. Then, being on the borders of Mysia, they thought of going back to the north-east into Bithynia; but again "the Spirit of Jesus suffered them not." <sup>b</sup> So they passed by Mysia, and came down to Troas. Here the Spirit of Jesus, having checked them on other sides, revealed to them in what direction they were to go. St. Paul saw in a vision a man of Macedonia, who besought him, saying, "Come over into Macedonia and help us." The vision was at once accepted as a heavenly intimation; the help wanted by the Macedonians was believed to be the preaching of the Gospel. It is at this point that the historian, speaking of St. Paul's company, substitutes "we" for "they." He says nothing of himself; we can only infer that St. Luke, to whatever country he belonged, became a companion of St. Paul at Troas. It is perhaps not too arbitrary a conjecture, that the Apostle, having recently suffered in health, derived benefit from the medical skill and attendance of "the beloved physician." The party, thus reinforced, immediately set sail from Troas, touched at Samothrace, then landed on the continent at Neapolis, and from thence journeyed to Philippi. They hastened to carry the "help" that had been asked to the first considerable city in Macedonia. Philippi was no inapt representative of the western world. A Greek city, it had received a body of Roman settlers, and was politically a Colonia. We must not assume that to Saul of Tarsus, the Roman citizen, there was anything very novel or strange in the world to which he had now come.

side; and the statement in Acts xv. 31 certainly indicates that the Judaistic question was essentially laid at rest for a season. Such a reaction therefore in favor of Judaism as the conduct of Peter at Antioch (Gal. ii. 11 f.) shows to have taken place, must have arisen later, and belongs in all probability to Acts xviii. 23. H.

<sup>a</sup> May not this mean "your calling me blessed" making me as one of the *μακάριοι θεοῦ*.

<sup>b</sup> \* "The spirit of Jesus" is the reading of all the best MSS. and critical editions (Griesb., Lachm., Tisch. Tregelles, Alford) in Acts xvi. 7. ▲

But the name of Greece must have represented very imposing ideas to the Oriental and the Jew; and we may silently imagine what it must have been to St. Paul to know that he was called to be the herald of his Master, the Crucified Jesus, in the centre of the world's highest culture, and that he was now to begin his task. He began, however, with no flourish of trumpets, but as quietly as ever, and in the old way. There were a few Jews, if not many, at Philippi; and when the Sabbath came round, the Apostolic company joined their countrymen at the place by the river-side where prayer was wont to be made. The narrative in this part is very graphic: "We sat down," says the writer (xvi. 13). "and spoke to the women who had come together." Amongst these women was a proselyte from Thyatira (*σεβομένη τὸν Θεόν*), named Lydia, a dealer in purple. As she listened "the Lord opened her heart" to attend to what Paul was saying. The first convert in Macedonia was but an Asiatic woman who already worshipped the God of the Jews; but she was a very earnest believer, and besought the Apostle and his friends to honor her by staying in her house. They could not resist her urgency, and during their stay at Philippi they were the guests of Lydia (ver. 40).

But a proof was given before long that the preachers of Christ were come to grapple with the powers in the spiritual world to which heathenism was then doing homage. A female slave, who brought gain to her masters by her powers of prediction when she was in the possessed state, beset Paul and his company, following them as they went to the place of prayer, and crying out, "These men are servants of the Most High God, who publish to you (or to us) the way of salvation." Paul was vexed by her cries, and addressing the spirit in the girl, he said, "I command thee in the name of Jesus Christ to come out of her." Comparing the confession of this "spirit of divination" with the analogous confessions made by evil spirits to our Lord, we see the same singular character of a true acknowledgment extorted as if by force, and rendered with a certain insolence which implied that the spirits, though subject, were not willingly subject. The cries of the slave-girl may have sounded like sneers, mimicking what she had heard from the Apostles themselves, until St. Paul's exorcism, "in the name of Jesus Christ," was seen to be effectual. Then he might be recognized as in truth a servant of the Most High God, giving an example of the salvation which he brought, in the deliverance of this poor girl herself from the spirit which degraded her.

But the girl's masters saw that now the hope of their gains was gone. Here at Philippi, as afterwards at Ephesus, the local trade in religion began to suffer from the manifestation of the Spirit of Christ, and an interested appeal was made to local and national feelings against the dangerous innovations of the Jewish strangers. Paul and Silas were dragged before the magistrates, the multitude clamoring loudly against them, upon the vague charge of "troubling the city," and introducing observances which were unlawful for Romans. If the magistrates had desired to act justly they might

have doubted how they ought to deal with the charge. On the one hand Paul and Silas had abstained carefully, as the preachers of Christ always did, from disturbing public order, and had as yet violated no express law of the state. But on the other hand, the preaching of Jesus as King and Lord was unquestionably revolutionary, and aggressive upon the public religion, in its effects; and the Roman law was decided, in general terms, against such innovations (see reff. in Conyb. and Hows. i. 324). But the prætors or duumviri of Philippi were very unworthy representatives of the Roman magistracy. They yielded without inquiry to the clamor of the inhabitants, caused the clothes of Paul and Silas to be torn from them, and themselves to be beaten, and then committed them to prison. The jailer, having received their commands, "thrust them into the inner prison, and made their feet fast in the stocks." This cruel wrong was to be the occasion of a signal appearance of the God of righteousness and deliverance. It was to be seen which were the true servants of such a God, the magistrates or these strangers. In the night Paul and Silas, sore and sleepless, but putting their trust in God, prayed and sang praises so loudly that the other prisoners could hear them. Then suddenly the ground beneath them was shaken, the doors were opened, and every prisoner's hands were struck off (compare the similar openings of prison-doors in xii. 6-10, and v. 19). The jailer awoke and sprang up, saw with consternation that the prison-doors were open, and, concluding that the prisoners were all fled, drew his sword to kill himself. But Paul called to him loudly, "Do thyself no harm; we are all here." The jailer's fears were then changed to an overwhelming awe. What could this be? He called for lights, sprang in and fell trembling before the feet of Paul and Silas. Bringing them out from the inner dungeon, he exclaimed, "Sirs, what must I do to be saved?" (*τί με δεῖ ποιεῖν ἵνα σωθῶ*). They answered, "Believe in the Lord Jesus Christ, and thou shalt be saved, and thy house." And they went on to speak to him and to all in his house "the word of the Lord." The kindness he now showed them reminds us of their miseries. He washed their wounds, took them into his own house, and spread a table before them. The same night he received baptism, "he and all his" (including slaves<sup>a</sup>), and rejoiced in his new-found faith in God.

In the morning the magistrates, either having heard of what had happened, or having repented of their injustice, or having done all they meant to do by way of pacifying the multitude, sent word to the prison that the men might be let go. But legal justice was to be more clearly vindicated in the persons of these men, who had been charged with subverting public order. St. Paul denounced plainly the unlawful acts of the magistrates, informing them moreover that those whom they had beaten and imprisoned without trial were Roman citizens. "And now do they thrust us out privily? Nay, verily, but let them come themselves and fetch us out." The magistrates, in great alarm, saw the necessity of humbling themselves ("Faciens est vinciri civem Romanum, scelus verberari, Cicero, *in Verrem*, v. 66). They came and begged

<sup>a</sup> \* That is, if there were slaves in the family who believed. Luke's account limits the baptism to those in the jailer's household who, like the jailer, heard the word of the Lord spoken by Paul and Silas

(ἐδάξανσαν αὐτῶν . . . σὺν παντί τοῖς ἐν τῇ οἰκίᾳ αὐτοῦ) and like him received it and rejoiced in it (ἠγαλλιάσατο παροικί). See especially Meyer and Lechler *ibid.* 1.

them to leave the city. Paul and Silas consented to do so, and, after paying a visit to "the brethren" in the house of Lydia, they departed.

The Church thus founded at Philippi, as the first-fruits of the Gospel in Europe, was called, as we have seen, in the name of a spiritual deliverer, of a God of justice, and of an equal Lord of free-men and slaves. That a warm and generous feeling distinguished it from the first, we learn from a testimony of St. Paul in the epistle written long after to this Church. "In the beginning of the Gospel," as soon as he left them, they began to send him gifts, some of which reached him at Thessalonica, others afterwards (1 Phil. iv. 15, 16). Their partnership in the Gospel (*κοινωνία εἰς τὸ εὐαγγέλιον*) had gladdened the Apostle from the first day (Phil. i. 5).

Leaving St. Luke, and perhaps Timothy for a short time, at Philippi, Paul and Silas travelled through Amphipolis and Apollonia, and stopped again at Thessalonica. At this important city there was a synagogue of the Jews. True to his custom, St. Paul went in to them, and for three Sabbath-days proclaimed Jesus to be the Christ, as he would have done in a city of Judæa. As usual, the proselytes were those who heard him most gladly, and among them were many women of station. Again, as in Pisidian Antioch, the envy of the Jews was excited. They contrived to stir up the lower class of the city to tumultuary violence by representing the preachers of Christ as revolutionary disturbers, who had come to proclaim one Jesus as king instead of Cæsar. The mob assaulted the house of Jason, with whom Paul and Silas were staying as guests, and, not finding them, dragged Jason himself and some other brethren before the magistrates. In this case the magistrates, we are told, and the people generally, were "troubled" by the rumors and accusations which they heard. But they seem to have acted wisely and justly, in taking security of Jason and the rest, and letting them go. After these signs of danger the brethren immediately sent away Paul and Silas by night.

The epistles to the Thessalonians were written very soon after the Apostle's visit, and contain more particulars of his work in founding that Church than we find in any other epistle. The whole of these letters ought to be read for the information they thus supply. St. Paul speaks to the Thessalonian Christians as being mostly Gentiles. He reminds them that they had turned from idols to serve the living and true God, and to wait for his Son from heaven, whom He raised from the dead, "Jesus who delivers us from the coming wrath" (1 Thess. i. 9, 10). The Apostle had evidently spoken much of the coming and presence of the Lord Jesus Christ, and of that wrath which was already descending upon the Jews (ii. 16, 19, &c.). His message had had a wonderful power amongst them, because they had known it to be really the word of a God who also wrought in them, having had helps towards this conviction in the zeal and disinterestedness and affection with which St. Paul (notwithstanding his recent shameful treatment at Philippi) proclaimed his Gospel amongst them (ii. 2, 8-13). He had purposely wrought with his own hands, even night and day, that his disinterestedness might be more apparent (1 Thess. ii. 9; 2 Thess. iii. 8). He exhorted them not to be drawn away from patient industry by the hopes of the kingdom into which

they were called, but to work quietly, and to cultivate purity and brotherly love (1 Thess. iv. 3, 9, 11). Connecting these allusions with the preaching in the synagogue (Acts xvii. 3), we see clearly how the teaching of St. Paul turned upon the person of Jesus Christ as the Son of the living God, prophesied of in the Scriptures, suffering and dying, raised up and exalted to a kingdom, and about to appear as the Giver of light and life, to the destruction of his enemies and the saving of those who trusted in him.

When Paul and Silas left Thessalonica they came to Berea. Here they found the *Ἰεῦρα* more noble (*εὐγενέστεροι*) — more disposed to receive the news of a rejected and crucified Messiah, and to examine the Scriptures with candor — than those at Thessalonica had been. Accordingly they gained many converts, both Jews and Greeks; but the Jews of Thessalonica, hearing of it, sent emissaries to stir up the people, and it was thought best that St. Paul should himself leave the city, whilst Silas and Timothy remained behind. Some of "the brethren" went with St. Paul as far as Athens, where they left him, carrying back a request to Silas and Timothy that they would speedily join him. He apparently did not like to preach alone, and intended to rest from his apostolic labor until they should come up to him; but how could he refrain himself, with all that was going on at Athens round him? There he witnessed the most profuse idolatry side by side with the most pretentious philosophy. Either of these would have been enough to stimulate his spirit. To idolaters and philosophers he felt equally urged to proclaim his Master and the living God. So he went to his own countrymen and the proselytes in the synagogue and declared to them that the Messiah had come; but he also spoke, like another Socrates, with people in the market, and with the followers of the two great schools of philosophy, Epicureans and Stoics, naming to all Jesus and the Resurrection. The philosophers encountered him with a mixture of curiosity and contempt. The Epicurean, teaching himself to seek for tranquil enjoyment as the chief object of life, heard of One claiming to be the Lord of men, who had shown them the glory of dying to self, and had promised to those who fought the good fight bravely a nobler bliss than the comforts of life could yield. The Stoic, cultivating a stern and isolated moral independence, heard of One whose own righteousness was proved by submission to the Father in heaven, and who had promised to give his righteousness to those who trusted not in themselves but in Him. To all, the announcement of a Person was much stranger than the publishing of any theories would have been. So far as they thought the preacher anything but a silly trifler, he seemed to them, not a philosopher, but "a setter forth of strange gods" (*ξένων δαιμονίων καταγγελεύς*). But any one with a novelty was welcome to those who "spent their time in nothing else but either to hear or to tell some new thing." They brought him therefore to the Areopagus, that he might make a formal exposition of his doctrine to an assembled audience.

We are not to think here of the Council or Court, renowned in the oldest Athenian history, which took its name from Mars' Hill, but only of the elevated spot where the council met, not covered in, but arranged with benches and steps of stone, so as to form a convenient place for a public address. Here the Apostle delivered that wonderfu

discourse, reported in Acts xvii. 22-31, which seems as fresh and instructive for the intellect of the 19th century as it was for the intellect of the first. In this we have the Pauline Gospel as it addressed itself to the speculative mind of the cultivated Greeks. How the "report" was obtained by the writer of the history we have no means of knowing. Possibly we have in it notes written down before or after the delivery of this address by St. Paul himself. Short as it is, the form is as perfect as the matter is rich. The loftiness and breadth of the theology, the dignity and delicacy of the argument, the absence of self, the straightforward and reverent nature of the testimony delivered — all the characteristics so strikingly displayed in this speech, — help us to understand what kind of a teacher had now appeared in the Grecian world. St. Paul, it is well understood, did not begin with calling the Athenians "too superstitious." "I perceive you," he said, "to be eminently religious."<sup>a</sup> He had observed an altar inscribed Ἄγνωστος Θεός, "To the unknown God."<sup>b</sup> It meant, no doubt, "To some unknown God." "I come," he said "as the messenger of that unknown God." And then he proceeds to speak of God in terms which were not altogether new to Grecian ears. They had heard of a God who had made the world and all things therein, and even of One who gave to all life, and breath, and all things. But they had never learnt the next lesson which was now taught them. It was a special truth of the new dispensation, that "God had made of one blood all nations of men, for to dwell on all the face of the earth, having determined the times assigned to them, and the bounds of their habitation, that they should seek the Lord, if haply they might feel after him and find him." [MARS' HILL, Amer. ed.]

Comparing it with the teaching given to other audiences, we perceive that it laid hold of the deepest convictions which had ever been given to Greeks, whilst at the same time it encountered the strongest prejudices of Greeks. We see, as at Lystra, that an apostle of Christ had no need to refer to the Jewish Scriptures, when he spoke to those who had not received them. He could speak to men as God's children, and subjects of God's educating discipline, and was only bringing them further tidings of Him whom they had been always feeling after. He presented to them the Son of Man as acting in the power of Him who had made all nations, and who was not far from any single man. He began to speak of Him as risen from the dead, and of the power of a new life which was in Him for men; but his audience would not hear of Him who thus claimed their personal allegiance. Some mocked, others more courteously, talked of hearing him again another time. The Apostle gained but few converts at Athens, and he soon took his departure and came to Corinth.

Athens still retained its old intellectual predominance; but Corinth was the political and commercial capital of Greece. It was in places of living activity that St. Paul labored longest and most

successfully, as formerly at Antioch, now at Corinth and afterwards at Ephesus. The rapid spread of the Gospel was obviously promoted by the preaching of it in cities where men were continually coming and going; but besides this consideration we may be sure that the Apostle escaped gladly from dull ignorance on the one side, and from philosophical dilettantism on the other, to places in which the real business of the world was being done. The Gospel, though unworldly, was yet a message to practical and inquiring men and it had more affinity to work of any kind than to torpor or to intellectual frivolity. One proof of the wholesome agreement between the following of Christ and ordinary labor was given by St. Paul himself during his stay at Corinth. Here, as at Thessalonica, he chose to earn his own subsistence by working at his trade of tent-making. This trade brought him into close connection with two persons who became distinguished as believers in Christ, Aquila and Priscilla. They were Jews, and had lately left Rome, in consequence of an edict of Claudius [see CLAUDIUS]; and as they also were tent-makers, St. Paul "abode with them and wrought." Laboring thus on the six days, the Apostle went to the synagogue on the Sabbath, and there by expounding the Scriptures sought to win both Jews and proselytes to the belief that Jesus was the Christ.

He was testifying with unusual effort and anxiety (συνελεχοτο τῷ λόγῳ), when Silas and Timothy came from Macedonia, and joined him. We are left in some uncertainty as to what the movements of Silas and Timothy had been, since they were with Paul at Berea. From the statements in the Acts (xvii. 15, 16) that Paul, when he reached Athens, desired Silas and Timotheus to come to him with all speed, and waited for them there, compared with those in 1 Thess. (iii. 1, 2), "When we could no longer forbear, we thought it good to be left at Athens alone, and sent Timotheus, our brother, and minister of God, and our fellow-laborer in the Gospel of Christ, to establish you and to comfort you concerning your faith." — Paley (*Horæ Pauline*, 1 Thess. No. iv.) reasonably argues that Silas and Timothy had come to Athens, but had soon been dispatched thence, Timothy to Thessalonica, and Silas to Philippi, or elsewhere. From Macedonia they came together, or about the same time, to Corinth; and their arrival was the occasion of the writing of the First Epistle to the Thessalonians.

This is the first extant example of that work by which the Apostle Paul has served the Church of all ages in as eminent a degree as he labored at the founding of it in his lifetime. All commentators upon the New Testament have been accustomed to notice the points of coincidence between the history in the Acts, and these Letters. Paley's *Horæ Pauline* is famous as a special work upon this subject. But more recently, important attempts have been made to estimate the Epistles of St. Paul more broadly, by considering them in their mutual order and relations, and in their bearing upon the question of the development of the writer's teach-

<sup>a</sup> See, in confirmation, passages quoted from ancient authors in Conybeare and Howson, i. 389. &c.

<sup>b</sup> \* No doubt θεός, as of the nature of a proper name, may be definite without the article; but it is more naturally indefinite here, the conception being that of God dimly revealed to their consciousness, in ad-

dition to all the gods, so called, acknowledged by them. H.

<sup>c</sup> Ewald believes, rather capriciously, that the Sen. op. Ed. to the Thess. was written first, and was sent from Berea (*Die Sendschreiben der Apostels Paulus* pp. 17, 18).

ing. Such attempts <sup>a</sup> must lead to a better understanding of the epistles themselves, and to a finer appreciation of the Apostle's nature and work. It is notorious that the order of the epistles in the book of the N. T. is not their real, or chronological order. The mere placing of them in their true sequence throws considerable light upon the history; and happily the time of composition of the more important epistles can be stated with sufficient certainty. The two epistles to the Thessalonians belong — and these alone — to the present Missionary Journey. The epistles to the Galatians, Romans, and Corinthians, were written during the next journey. Those to Philemon, the Colossians, the Ephesians, and the Philippians, belong to the captivity at Rome. With regard to the Pastoral Epistles, there are considerable difficulties, which require to be discussed separately.

Two general remarks relating to St. Paul's letters may find a place here. (1.) There is no reason to assume that the extant letters are all that the Apostle wrote. On the contrary, there is a strong presumption, and some slight positive evidence, that he wrote many which have not been preserved (Jowett, i. p. 195–201, 2d ed.). (2.) We must be on our guard against concluding too much from the contents and style of any epistle, as to the fixed bent of the Apostle's whole mind at the time when it was written. We must remember that the epistles to the Thessalonians were written whilst St. Paul was deeply absorbed in the peculiar circumstances of the Corinthian Church; and that the epistles to the Corinthians were written between those to the Galatians and the Romans. These facts are sufficient to remind us of the versatility of the Apostle's mind; — to show us how thoroughly the feelings and ideas suggested to him by the circumstances upon which he was dwelling had the power to mould his utterances.

The *First Epistle to the Thessalonians* was probably written soon after his arrival at Corinth, and before he turned from the Jews to the Gentiles. It was drawn from St. Paul by the arrival of Silas and Timothy. [THESSALONIANS, FIRST EPISTLE TO THE.] The largest portion of it consists of an impassioned recalling of the facts and feelings of the time when the Apostle was personally with them. But we perceive gradually that those expectations which he had taught them to entertain of the appearing and presence of the Lord Jesus Christ had undergone some corruption. There were symptoms in the Thessalonian church of a restlessness which speculated on the times and seasons of the future, and found present duties flat and unimportant. This evil tendency St. Paul seeks to correct, by reviving the first spirit of faith and hope and mutual fellowship, and by setting forth the appearing of Jesus Christ — not indeed as distant, but as the full shining of a day of which all believers in Christ were already children. The ethical characteristics apparent in this letter, the degree in which St. Paul identified himself with his friends, the entire surrender of his existence to his calling as a preacher of Christ, his anxiety for the good fame and well-being of his converts, are the same which will reappear continually. What interval of time separated the Second Letter to the Thessalonians from the First, we have no means of judging, except that the later one was certainly written before St.

Paul's departure from Corinth. [THESSALONIANS, SECOND EPISTLE TO THE.] The Thessalonians had been disturbed by announcements that those convulsions of the world which all Christians were taught to associate with the coming of Christ were immediately impending. To meet these assertions, St. Paul delivers express predictions in a manner not usual with him elsewhere; and whilst reaffirming all he had ever taught the Thessalonians to believe respecting the early coming of the Saviour and the blessedness of waiting patiently for it, he informs them that certain events, of which he had spoken to them, must run their course before the full manifestation of Jesus Christ could come to pass. At the end of this epistle St. Paul guards the Thessalonians against pretended letters from him, by telling them that every genuine letter, even if not written by his hand throughout, would have at least an autograph salutation at the close of it.

We return now to the Apostle's preaching at Corinth. When Silas and Timothy came, he was testifying to the Jews with great earnestness, but with little success. So "when they opposed themselves and blasphemed, he shook out his raiment," and said to them, in words of warning taken from their own prophets (Ez. xxxiii. 4): "Your blood be upon your own heads; I am clean, and henceforth will go to the Gentiles." The experience of Pisidian Antioch was repeating itself. The Apostle went, as he threatened, to the Gentiles, and began to preach in the house of a proselyte named Justus. Already one distinguished Jew had become a believer. Crispus, the ruler of the synagogue, mentioned (1 Cor. i. 14) as baptized by the Apostle himself; and many of the Gentile inhabitants were receiving the Gospel and being baptized. The envy and rage of the Jews, therefore, were excited in an unusual degree, and seem to have pressed upon the spirit of St. Paul. He was therefore encouraged by a vision of the Lord, who appeared to him by night, and said, "Be not afraid, but speak, and hold not thy peace; for I am with thee, and no man shall set on thee, to hurt thee; for I have much people in this city." Corinth was to be an important seat of the Church of Christ, distinguished, not only by the number of believers, but also by the variety and the fruitfulness of the teaching to be given there. At this time St. Paul himself stayed there for a year and six months, "teaching the word of God amongst them."

Corinth was the chief city of the province of Achaia, and the residence of the proconsul. During St. Paul's stay, we find the proconsular office held by Gallio, a brother of the philosopher Seneca. [GALLIO.] Before him the Apostle was summoned by his Jewish enemies, who hoped to bring the Roman authority to bear upon him as an innovator in religion. But Gallio perceived at once, before Paul could "open his mouth" to defend himself, that the movement was due to Jewish prejudice, and refused to go into the question. "If it be a question of words and names and of your law," he said to the Jews, speaking with the tolerance of a Roman magistrate, "look ye to it; for I will be no judge of such matters." Then a singular scene occurred. The Corinthian spectators either favoring St. Paul, or actuated only by anger against the Jews, seized on the principal person of those who

<sup>a</sup> Amongst these, the works of Prof. Jowett (*Epistles to the Thess., Gal., and Rom.*), of Ewald (*Die*

*Sendschreiben*, etc.), and of Dr. Wordsworth (*Epistles of St. Paul*), may be named.

had brought the charge, and beat him before the judgment-seat. (See on the other hand Ewald, *Geschichte*, vi. 463-466.) Gallio left these religious quarrels to settle themselves. The Apostle therefore was not allowed to be "hurt," and remained some time longer at Corinth unmolested.

We do not gather from the subsequent epistles to the Corinthians many details of the founding of the Church at Corinth. The main body of the believers consisted of Gentiles, — ("Ye know that ye were Gentiles," 1 Cor. xii. 2). But, partly from the number who had been proselytes, partly from the mixture of Jews, it had so far a Jewish character, that St. Paul could speak of "our fathers" as having been under the cloud (1 Cor. x. 1). The tendency to intellectual display, and the traffic of sophists in philosophical theories, which prevailed at Corinth, made the Apostle more than usually anxious to be independent in his life and simple in bearing his witness. He wrought for his living that he might not appear to be taking fees of his pupils (1 Cor. ix. 18); and he put the Person of Jesus Christ, crucified and risen, in the place of all doctrines (1 Cor. ii. 1-5, xv. 3, 4). What gave infinite significance to his simple statements, was the nature of the Christ who had been crucified, and his relation to men. Concerning these mysteries St. Paul had uttered a wisdom, not of the world, but of God, which had commended itself chiefly to the humble and simple. Of these God had chosen and called not a few "into the fellowship of His Son Jesus Christ the Lord of men" (1 Cor. ii. 6, 7, i. 27, 9).

Having been the instrument of accomplishing this work, St. Paul took his departure for Jerusalem, wishing to attend a festival there. Before leaving Greece, he cut off his hair<sup>a</sup> at Cenchreæ, in fulfillment of a vow. We are not told where or why he had made this vow; and there is considerable difficulty in reconciling this act with the received customs of the Jews. [VOWS.] A passage in Josephus, if rightly understood (*B. J.* ii. 15, § 1), mentions a vow which included, besides a sacrifice, the cutting of the hair and the beginning of an abstinence from wine 30 days before the sacrifice. If St. Paul's was such a vow, he was going to offer up a sacrifice in the Temple at Jerusalem, and the "shearing of his head" was a preliminary to the sacrifice. The principle of the vow, whatever it was, must have been the same as that of the Nazarite vow, which St. Paul afterwards countenanced at Jerusalem. [NAZARITE, p. 2075 a.] There is therefore no difficulty in supposing him to have followed in this instance, for some reason not explained to us, a custom of his countrymen. — When he sailed from the Isthmus, Aquila and Priscilla went with him as far as Ephesus. Paul paid a visit to the synagogue at Ephesus, but would not stay. He was anxious to be at Jerusalem for the approaching feast, but he promised, God willing, to return to them again. Leaving Ephesus, he sailed to Cesarea, and from thence went up to Jerusalem, and "saluted the Church." It is argued (Wieseler, pp. 48-50), from considerations founded on the suspension of navigation during the winter months, that the festival was probably the Pentecost. From Jerusalem, almost immediately, the Apostle went down to An-

<sup>a</sup> Acts xviii. 18. The act may be that of Aquila, but the historian certainly seems to be speaking not of him, but of St. Paul.

tioc, thus returning to the same place from which he had started with Silas.

*Third Missionary Journey, including the stay at Ephesus* (Acts xviii. 23-xxi. 17). — Without inventing facts or discussions for which we have no authority, we may connect with this short visit of St. Paul to Jerusalem a very serious raising of the whole question, What was to be the relation of the new kingdom of Christ to the law and covenant of the Jews? Such a Church as that at Corinth, with its affiliated communities, composed chiefly of Gentile members, appeared likely to overshadow by its importance the Mother Church in Judæa. The jealousy of the more Judaical believers, not extinguished by the decision of the council at Jerusalem, began now to show itself everywhere in the form of an active and intriguing party-spirit. This disastrous movement could not indeed alienate the heart of St. Paul from the Law or the calling or the people of his fathers — his antagonism is never directed against these; but it drew him into the great conflict of the next period of his life, and must have been a sore trial to the intense loyalty of his nature. To vindicate the freedom, as regarded the Jewish Law, of believers in Christ; but to do this, for the very sake of maintaining the unity of the Church; — was to be the earnest labor of the Apostle for some years. In thus laboring he was carrying out completely the principles laid down by the elder Apostles at Jerusalem; and may we not believe that, in deep sorrow at appearing, even, to disparage the Law and the covenant, he was the more anxious to prove his fellowship in spirit with the Church in Judæa, by "remembering the poor," as "James, Cephas, and John" had desired that he would? (Gal. ii. 10). The prominence given, during the journeys upon which we are now entering, to the collection to be made amongst his churches for the benefit of the poor at Jerusalem, seems to indicate such an anxiety. The great epistles which belong to this period, those to the Galatians, Corinthians, and Romans, show how the "Judaizing" question exercised at this time the Apostle's mind.

St. Paul "spent some time" at Antioch, and during this stay, as we are inclined to believe, his collision with St. Peter (Gal. ii. 11-14), of which we have spoken above, took place. [See note b, vol. iii. p. 2372.] When he left Antioch, he "went over all the country of Galatia and Phrygia in order, strengthening all the disciples," and giving orders concerning the collection for the saints (1 Cor. xvi. 1). It is probable that the *Epistle to the Galatians* was written soon after this visit. [GALATIANS, EPISTLE TO THE.] When he was with them he had found the Christian communities infested by Judaizing teachers. He had "told them the truth" (Gal. iv. 16), he had warned them against the deadly tendencies of Jewish exclusiveness and had re-affirmed the simple Gospel, concerning Jesus Christ the Son of God, which he had preached to them on his first visit (*τὸ πρῶτον*, Gal. iv. 13). But after he left them the Judaizing doctrine raised its head again. The only course left to its advocates was to assail openly the authority of St. Paul; and this they did. They represented him as having derived his commission from the older Apostles, and as therefore acting disloyally if he opposed the views ascribed to Peter and James. The fickle minds of the Galatian Christians were influenced by these hardy assertions; and the Apostle heard, when he had come

lown to Ephesus, that his work in Gaatia was being undone, and his converts were being seduced from the true faith in Christ. He therefore writes the epistle to remonstrate with them — an epistle full of indignation, of warning, of direct and impassioned teaching. He recalls to their minds the Gospel which he had preached amongst them, and asserts in solemn and even awful language its absolute truth (i. 8, 9). He declares that he had received it *directly from Jesus Christ the Lord*, and that his position towards the other Apostles had always been that, not of a pupil, but of an independent fellow-laborer. He sets before them Jesus the Crucified, the Son of God, as the fulfillment of the promise made to the fathers, and as the pledge and giver of freedom to men. He declares that in Him, and by the power of the Spirit of sonship sent down through Him, men have inherited the rights of adult sons of God; that the condition represented by the Law was the inferior and preparatory stage of boyhood. He then, most earnestly and tenderly, impresses upon the Galatians the responsibilities of their fellowship with Christ the Crucified, urging them to fruitfulness in all the graces of their spiritual calling, and especially to brotherly consideration and unity.

This letter was, in all probability, sent from Ephesus. This was the goal of the Apostle's journeyings through Asia Minor. He came down upon Ephesus from the upper districts (*τὰ ἄνωρεια μέρη*) of Phrygia. What *Antioch* was for "the region of Syria and Cilicia," what *Corinth* was for Greece, what *Rome* was — we may add — for Italy and the West, that *Ephesus* was for the important province called Asia. Indeed, with reference to the spread of the Church Catholic, Ephesus occupied the central position of all. This was the meeting place of Jew, of Greek, of Roman, and of Oriental. Accordingly, the Apostle of the Gentiles was to stay a long time here, that he might found a strong Church, which should be a kind of mother-church to Christian communities in the neighboring cities of Asia.

A new element in the preparation of the world for the kingdom of Christ presents itself at the beginning of the Apostle's work at Ephesus. He finds there certain disciples (*τινας μαθητάς*) — about twelve in number, — of whom he is led to inquire, "Did ye receive the Holy Ghost when ye believed? They answered, No, we did not even hear of there being a Holy Ghost. Unto what then, asked Paul, were ye baptized? And they said, Unto John's baptism. Then said Paul, John baptized with the baptism of repentance, saying to the people that they should believe on him who was coming after him, that is, on Jesus. Hearing this, they were baptized into the name of the Lord Jesus, and when Paul had laid his hands upon them, the Holy Ghost came upon them, and they began to speak with tongues and to prophesy" (Acts, xix. 1-7). — It is obvious to compare this incident with the Apostolic act of Peter and John in Samaria, and to see in it an assertion of the full Apostolic dignity of Paul. But besides this bearing of it, we see in it indications which suggest more than they distinctly express, as to the spiritual movements of that age. These twelve disci-

ples are mentioned immediately after Apollos, who also had been at Ephesus just before St. Paul's arrival, and who had taught diligently concerning Jesus (*τὰ περὶ τοῦ Ἰησοῦ*), knowing only the baptism of John. But Apollos was of Alexandria, trained in the intelligent and inquiring study of the Hebrew Scriptures, which had been fostered by the Greek culture of that capital. We are led to suppose, therefore, that a knowledge of the baptism of John and of the ministry of Jesus had spread widely, and had been received with favor by some of those who knew the Scriptures most thoroughly, before the message concerning the exaltation of Jesus and the descent of the Holy Ghost had been received. What the exact belief of Apollos and these twelve "disciples" was concerning the character and work of Jesus, we have no means of knowing. But we gather that it was wanting in a recognition of the full lordship of Jesus and of the gift of the Holy Ghost. The Pentecostal faith was communicated to Apollos by Aquila and Priscilla, to the other disciples of the Baptist by St. Paul.

The Apostle now entered upon his usual work. He went into the synagogue, and for three months he spoke openly, disputing and persuading concerning "the kingdom of God." At the end of this time the obstinacy and opposition of some of the Jews led him to give up frequenting the synagogue, and he established the believers as a separate society, meeting "in the school of Tyrannus." This continued (though we may probably allow for an occasional absence of St. Paul) for two years. During this time many things occurred, of which the historian of the Acts chooses two examples, the triumph over magical arts, and the great disturbance raised by the silversmiths who made shrines for Artemis: and amongst which we are to note further the writing of the First Epistle to the Corinthians.

"God wrought special miracles," we are told (*δυνάμεις οὐ τὰς τυχοῦσας*), "by the hands of Paul." "It is evident that the arts of sorcery and magic — all those arts which betoken the belief in the presence of a spirit, but not of a Holy Spirit — were flourishing here in great luxuriance. Everything in the history of the Old or New Testament would suggest the thought that the exhibitions of *Divine* power took a more startling form where superstitions grounded mainly on the reverence for *diabolical* power were prevalent: that they were the proclamations of a beneficent and orderly government, which had been manifested to counteract and overcome one that was irregular and malevolent" (Maurice, *Unity of the New Testament*, p. 515). The powers of the new kingdom took a form more nearly resembling the wonders of the kingdom of darkness than was usually adopted, when handkerchiefs and aprons from the body of Paul (like the shadow of Peter, v. 15) were allowed to be used for the healing of the sick and the casting out of devils. But it was to be clearly seen that all was done by the healing power of the Lord Jesus Himself.<sup>a</sup> Certain Jews, and among them the seven sons of one Sceva (not unlike Simon Magus in Samaria), fancied that the effect was due to a magic formula, an *ἐπωδή*. They therefore attempted to exorcise, by saying, "We adjure you

<sup>a</sup> \* It was important, says Neander, that the *Divine* power which accompanied the Gospel should, in some striking manner, exhibit its superiority to the magic which prevailed so extensively at Ephesus, and which,

by its apparently great effects, deceived and captivated so many. It would have a tendency to rescue men from such arts of imposture, and prepare them for the reception of the truth. H

by Jesus whom Paul preacheth." But the evil spirit, having a voice given to it, cried out, "Jesus I know, and Paul I know, but who are ye?" And the man who was possessed fell furiously upon the exorcists and drove them forth. The result of this testimony was that fear fell upon all the inhabitants of Ephesus, and the name of the Lord Jesus was magnified. And the impression produced bore striking practical fruits. The city was well known for its Ἐφέσια γράμματα, forms of incantation, which were sold at a high price. Many of those who had these books brought them together and burned them before all men, and when the cost of them was computed it was found to be 50,000 drachmæ = £1770. "So mightily grew the word of the Lord, and prevailed."

Whilst St. Paul was at Ephesus his communications with the Church in Achaia were not altogether suspended. There is strong reason to believe that a personal visit to Corinth was made by him, and a letter sent, neither of which is mentioned in the Acts. The visit is inferred from several allusions in the 2d Epistle to the Corinthians. "Behold, the third time I am ready to come to you" (2 Cor. xii. 14). "This is the third time I am coming to you" (2 Cor. xiii. 1). The visit he is contemplating is plainly that mentioned in Acts xx. 2, which took place when he finally left Ephesus. If that was the *third*, he must have paid a *second* during the time of his residence at Ephesus. It seems far-fetched, with Paley (*Horæ Paulinæ*, 2 Cor. No. xi.), to conclude that St. Paul is only affirming a *third intention*, and that the *second intention* had not been carried out. The context, in both cases, seems to refer plainly to *visits*, and not to intentions. Again, "I determined this with myself, that I would not come *again* to you *in heaviness*" (πάλιν ἐν λύπῃ): 2 Cor. ii. 1. Here St. Paul is apparently speaking of a previous visit which he had paid in sorrow of heart. He expresses an apprehension (2 Cor. xii. 21) lest "again when I come, my God should humble me among you" (μὴ πάλιν ἐλθόντος μου ταπεινώσει με—the πάλιν appearing certainly to refer to ταπεινώσει as much as to ἐλθόντος). The words in 2 Cor. xiii. 2, προεἶρηκα καὶ προλέγω, ὡς παρὼν τὸ δεύτερον καὶ ἅπῃ νῦν, may be translated, either "as if present the second time," or "as when present the second time." In the latter case we have here a distinct confirmation of the supposed visit. The former rendering seems at first sight to exclude it: but if we remember that the thought of his special *admonition* is occupying the Apostle's mind, we should naturally understand it, "I forewarn you now in my absence, as if I were present a second time to do it in person;" so that he would be speaking of the supposed visit as a *first*, with reference to the purpose which he has in his mind. The *primâ facie* sense of these passages implies a short visit, which we should place in the first half of the stay at Ephesus. And there are no strong reasons why we should not accept that *primâ facie* sense. St. Paul, we may imagine, heard of disorders which prevailed in the Corinthian Church. Apollos had returned to Ephesus some time before the 1st Epistle was written (1 Cor. xvi. 12), and it may have been from him that St. Paul learnt the tidings which distressed him. He was moved to go himself to see them. He stayed but a short time,

but warned them solemnly against the licentiousness which he perceived to be creeping in amongst them. If he went directly by sea to Corinth and back, this journey would not occupy much time. It was very natural, again, that this visit should be followed up by a letter. Either the Apostle's own reflections after his return, or some subsequent tidings which reached him, drew from him, it appears, a written communication in which he gave them some practical advice. "I wrote unto you in the Epistle not to keep company with fornicators" (ἐγράψα ὑμῖν ἐν τῇ ἐπιστολῇ: 1 Cor. v. 9). Then, at some point not defined in the course of the stay at Ephesus, St. Paul announced to his friends a plan of going through Macedonia and Achaia, and afterwards visiting Jerusalem; adding, "After I have been there, I must also see Rome." But he put off for a while his own departure, and sent before him Timothy and Erastus to the churches in Macedonia and Achaia, "to bring them into remembrance of his ways which were in Christ" (1 Cor. iv. 17).

Whether the First Epistle to the Corinthians was written before or after the tumult excited by Demetrius cannot be positively asserted. He makes an allusion, in that epistle, to a "battle with wild beasts" fought at Ephesus (ἐθρημομάχησα ἐν Ἐφέσῳ: 1 Cor. xv. 32), which it is usual to understand figuratively, and which is by many connected with that tumult. But this connection is arbitrary, and without much reason.<sup>a</sup> And as it would seem from Acts xx. 1 that St. Paul departed immediately after the tumult, it is probable that the epistle was written before, though not long before, the raising of this disturbance. Here then, while the Apostle is so earnestly occupied with the teaching of believers and inquirers at Ephesus and from the neighboring parts of "Asia," we find him throwing all his heart and soul into the concerns of the church at Corinth. [CORINTHIANS, FIRST EPISTLE TO THE.]

There were two external inducements for writing this epistle. (1.) St. Paul had received information from members of Chloe's household (ἐπηλόθη μοι ὑπὸ τῶν Χλόης, i. 11) concerning the state of the church at Corinth. (2.) That church had written him a letter, of which the bearers were Stephanas and Fortunatus and Achaicus, to ask his judgment upon various points which were submitted to him (vii. 1, xvi. 17). He had learnt that there were divisions in the church; that parties had been formed which took the names of Paul, of Apollos, of Cephas, and of Christ (i. 11, 12); and also that moral and social irregularities had begun to prevail, of which the most conspicuous and scandalous example was that a believer had taken his father's wife, without being publicly condemned by the church (v. 1, vi. 7, xi. 17-22, xiv. 33-40). To these evils we must add one doctrinal error, of those who said "that there was no resurrection of the dead" (xv. 12). It is probable that the teaching of Apollos the Alexandrian, which had been characteristic and highly successful (Acts xviii. 27, 28), had been the first occasion of the "divisions" in the church. We may take it for granted that his adherents did not form themselves into a party until he had left Corinth, and therefore that he had been some time with St. Paul at Ephesus. But after he was gone,

<sup>a</sup> The manner of the allusion, εἰ ἐθρημομάχησα ἐν Ἐφέσῳ, may imply, as Ewald (*Sensschreiben*, p. 214)

suggests, that he had mentioned this conflict to the Corinthians in the previous non-extant letter.

the special *Alexandrian* features of his teaching were remembered by those who had delighted to hear him. Their Grecian intellect was captivated by his broader and more spiritual interpretation of the Jewish Scriptures. The connection which he taught them to perceive between the revelation made to Hebrew rulers and prophets and the wisdom by which other nations, and especially their own, had been enlightened, dwelt in their minds. That which especially occupied the Apollos school must have been a *philosophy of the Scriptures*. It was the tendency of this party which seemed to the Apostle particularly dangerous amongst the Greeks. He hardly seems to refer specially in his letter to the other parties, but we can scarcely doubt that in what he says about "the wisdom which the Greeks sought" (i. 22), he is referring not only to the general tendency of the Greek mind, but to that tendency as it had been caught and influenced by the teaching of Apollos. It gives him an occasion of delivering his most characteristic testimony. He recognizes wisdom, but it is the wisdom of God; and that wisdom was not only a *Σοφία* or a *Λόγος* through which God had always spoken to all men; it had been perfectly manifested in Jesus the crucified. Christ crucified was both the Power of God and the Wisdom of God. To receive Him required a spiritual discernment unlike the wisdom of the great men of the world; a discernment given by the Holy Spirit of God, and manifesting itself in sympathy with humiliation and in love.

For a detailed description of the epistles the reader is referred to the special articles upon each. But it belongs to the history of St. Paul to notice the personal characteristics which appear in them. We must not omit to observe therefore, in this epistle, how loyally the Apostle represents Jesus Christ the Crucified as the Lord of men, the Head of the body with many members, the Centre of Unity, the Bond of men to the Father. We should mark at the same time how invariably he connects the Power of the Spirit with the Name of the Lord Jesus. He meets all the evils of the Corinthian Church, the intellectual pride, the party spirit, the loose morality, the disregard of decency and order, the false belief about the Resurrection, by recalling their thoughts to the Person of Christ and to the Spirit of God as the breath of a common life to the whole body.

We observe also here, more than elsewhere, the *tact*, universally recognized and admired, with which the Apostle discusses the practical problems brought before him. The various questions relating to marriage (ch. vii.), the difficulty about meats offered to idols (cc. viii., x.), the behaviour proper for women (cc. xi., xiv.), the use of the gifts of prophesying and speaking with tongues (ch. xiv.), are made examples of a treatment which may be applied to all such questions. We see them all discussed with reference to first principles; the object, in every practical conclusion, being to guard and assert some permanent principle. We see St. Paul no less a lover of order and subordination than of freedom. We see him claiming for himself, and prescribing to others, great variety of conduct in varying circumstances, but under the strict obligation of being always true to Christ, and always seeking the highest good of men. Such a character, so steadfast in motive and aim, so versatile in action, it would be difficult indeed to find elsewhere in history.

What St. Paul here tells us of his own doings and movements refers chiefly to the nature of his preaching at Corinth (cc. i., ii.); to the hardships and dangers of the apostolic life (iv. 9-13); to his cherished custom of working for his own living (ch. ix.); to the direct revelations he had received (xi. 23, xv. 8); and to his present plans (ch. xvi.). He bids the Corinthians to raise a collection for the church at Jerusalem by laying by something on the first day of the week, as he had directed the churches in Galatia to do. He says that he shall tarry at Ephesus till Pentecost, and then set out on a journey towards Corinth through Macedonia, so as perhaps to spend the winter with them. He expresses his joy at the coming of Stephanas and his companions, and commends them to the respect of the church.

Having despatched this epistle he stayed on at Ephesus, where "a great door and effectual was opened to him, and there were many adversaries." The affairs of the church of Corinth continued to be an object of the gravest anxiety to him, and to give him occupation at Ephesus: but it may be most convenient to put off the further notice of these till we come to the time when the 2d Epistle was written. We have now no information as to the work of St. Paul at Ephesus, until that tumult occurred which is described in Acts xix. 24-41. The whole narrative may be read there. We learn that "this Paul" had been so successful, not only in Ephesus, but "almost throughout all Asia," in turning people from the worship of gods made with hands, that the craft of silversmiths, who made little shrines for Artemis, were alarmed for their manufacture. They raised a great tumult, and not being able, apparently, to find Paul, laid hands on two of his companions and dragged them into the theatre. Paul himself, not willing that his friends should suffer in his place, wished to go in amongst the people: but the disciples, supported by the urgent request of certain magistrates called Asiarchs, dissuaded him from his purpose. The account of the proceedings of the mob is highly graphic, and the address with which the town-clerk finally quiets the people is worthy of a discreet and experienced magistrate. His statement that "these men are neither robbers of churches, nor yet blasphemers of your goddess," is an incidental testimony to the temperance of the Apostle and his friends in their attacks on the popular idolatry. But St. Paul is only personally concerned in this tumult in so far as it proves the deep impression which his teaching had made at Ephesus, and the daily danger in which he lived.

He had been anxious to depart from Ephesus, and this interruption of the work which had kept him there determined him to stay no longer. He set out therefore for Macedonia, and proceeded first to Troas (2 Cor. ii. 12), where he might have preached the Gospel with good hope of success. But a restless anxiety to obtain tidings concerning the church at Corinth urged him on, and he advanced into Macedonia, where he met Titus, who brought him the news for which he was thirsting. The receipt of this intelligence drew from him a letter which reveals to us what manner of man St. Paul was when the fountains of his heart were stirred to their inmost depths. [CORINTHIANS, SECOND EPISTLE TO THE.] How the agitation which expresses itself in every sentence of this letter was excited, is one of the most interesting

questions we have to consider. Every reader may perceive that, on passing from the First Epistle to the Second, the scene is almost entirely changed. In the *First*, the faults and difficulties of the Corinthian Church are before us. The Apostle writes of these, with spirit indeed and emotion, as he always does, but without passion or disturbance. He calmly asserts his own authority over the church, and threatens to deal severely with offenders. In the *Second*, he writes as one whose personal relations with those whom he addresses have undergone a most painful shock. The acute pain given by former tidings, the comfort yielded by the account which Titus brought, the vexation of a sensitive mind at the necessity of self-assertion, contend together for utterance. What had occasioned this excitement?

We have seen that Timothy had been sent from Ephesus to Macedonia and Corinth. He had rejoined St. Paul when he wrote this Second Epistle, for he is associated with him in the salutation (2 Cor. i. 1). We have no account, either in the Acts or in the epistles, of this journey of Timothy, and some have thought it probable that he never reached Corinth. Let us suppose, however, that he arrived there soon after the First Epistle, conveyed by Stephanas and others, had been received by the Corinthian Church. He found that a movement had arisen in the heart of that Church which threw (let us suppose) the case of the incestuous person (1 Cor. v. 1-5) into the shade. This was a deliberate and sustained attack upon the Apostolic authority and personal integrity of the Apostle of the Gentiles. The party-spirit which, before the writing of the First Epistle, had been content with underrating the powers of Paul compared with those of Apollos, and with protesting against the laxity of his doctrine of freedom, had been fanned into a flame by the arrival of some person or persons who came from the Judean Church, armed with letters of commendation, and who openly questioned the commission of him whom they proclaimed to be a self-constituted Apostle (2 Cor. iii. 1, xi. 4, 12-15). As the spirit of opposition and detraction grew strong, the tongue of some member of the church (more probably a Corinthian than the stranger himself) was loosed. He scoffed at St. Paul's courage and constancy, pointing to his delay in coming to Corinth, and making light of his threats (i. 17, 23). He demanded proofs of his Apostleship (xii. 11, 12). He derided the weakness of his personal presence, and the simplicity of his speech (x. 10). He even threw out insinuations touching the personal honesty and self-devotion of St. Paul (i. 12, xii. 17, 18). When some such attack was made openly upon the Apostle, the church had not immediately called the offender to account; the better spirit of the believers being cowed, apparently, by the confidence and assumed authority of the assailants of St. Paul. A report of this melancholy state of things was brought to the Apostle by Timothy or by others; and we can imagine how it must have wounded his sensitive and most affectionate nature, and also how critical the juncture must have seemed to him for the whole Western Church. He immediately sent off Titus to Corinth, with a letter containing the sharpest rebukes, *using* the authority which had been denied, and threatening to enforce it speedily by his personal presence (ii. 1, 3, vii. 8). As soon as the letter was gone—how natural a trait!—he began to repent of

having written it. He must have hated the appearance of claiming homage to himself; his heart must have been sore at the requital of his love, he must have felt the deepest anxiety as to the issue of the struggle. We can well believe him therefore when he speaks of what he had suffered. "Out of much affliction and anguish of heart I wrote to you with many tears" (ii. 4); "I had no rest in my spirit (ii. 13); "Our flesh had no rest, but we were troubled on every side; without were fightings, within were fears" (vii. 5). It appears that he could not bring himself to hasten to Corinth so rapidly as he had intended (i. 15, 16): he would wait till he heard news which might make his visit a happy instead of a painful one (ii. 1). When he had reached Macedonia, Titus, as we have seen, met him with such reassuring tidings. The offender had been rebuked by the church, and had made submission (ii. 6, 7); the old spirit of love and reverence towards St. Paul had been awakened, and had poured itself forth in warm expressions of shame and grief and penitence. The cloud was now dispelled; fear and pain gave place to hope and tenderness and thankfulness. But even now the Apostle would not start at once for Corinth. He may have had important work to do in Macedonia. But another letter would smooth the way still more effectually for his personal visit; and he accordingly wrote the Second Epistle, and sent it by the hands of Titus and two other brethren to Corinth.

When the epistle is read in the light of the circumstances we have supposed, the symptoms it displays of a highly wrought personal sensitiveness, and of a kind of ebb and flow of emotion, are as intelligible as they are noble and beautiful. Nothing but a temporary interruption of mutual regard could have made the joy of sympathy so deep and fresh. If he had been the object of a personal attack, how natural for the Apostle to write as he does in ii. 5-10. In vii. 12, "he that suffered wrong" is Paul himself. All his protestations relating to his Apostolic work, and his solemn appeals to God and Christ, are in place; and we enter into his feelings as he asserts his own sincerity and the openness of the truth which he taught in the Gospel (cc. iii., iv.). We see what sustained him in his self-assertion; he knew that he did not preach himself, but Christ Jesus the Lord. His own weakness became an argument to him, which he can use to others also, of the power of God working in him. Knowing his own fellowship with Christ, and that this fellowship was the right of other men too, he would be persuasive or severe, as the cause of Christ and the good of men might require (cc. iv., v.). If he was appearing to set himself up against the churches in Judæa, he was the more anxious that the collection which he was making for the benefit of those churches should prove his sympathy with them by its largeness. Again he would recur to the maintenance of his own authority as an Apostle of Christ, against those who impeached it. He would make it understood that spiritual views, spiritual powers, were *real*; that if he knew no man after the flesh, and did not war after the flesh, he was not the less able for the building up of the church (ch. x.). He would ask them to excuse his anxious jealousy, his folly and excitement, whilst he gloried in the practical proofs of his Apostolic commission, and in the infirmities which made the power of God more manifest; and he would *plead*

with them earnestly that they would give him no occasion to find fault or to correct them (cc. xi., xii., xiii.).

The hypothesis upon which we have interpreted this epistle is not that which is most commonly received. According to the more common view, the offender is the incestuous person of 1 Cor. v., and the letter which proved so sharp but wholesome a medicine, the First Epistle. But this view does not account so satisfactorily for the whole tone of the epistle, and for the particular expressions relating to the offender; nor does it find places so consistently for the missions of Timothy and Titus. It does not seem likely that St. Paul would have treated the sin of the man who took his father's wife as an offense against himself, nor that he would have spoken of it by preference as a *wrong* (*ἀδικία*) done to another (supposed to be the father). The view we have adopted is said, in De Wette's *Exegetisches Handbuch*, to have been held, in whole or in part, by Bleek, Credner, Olshausen, and Neander. More recently it has been advocated with great force by Ewald, in his *Senf-schreiben des A. P.* pp. 223-232. The ordinary account is retained by Stanley, Alford, and Davidson, and with some hesitation by Conybeare and Howson.

The particular nature of this epistle, as an appeal to facts in favor of his own Apostolic authority, leads to the mention of many interesting features of St. Paul's life. His summary, in xi. 23-28, of the hardships and dangers through which he had gone, proves to us how little the history in the Acts is to be regarded as a complete account of what he did and suffered. Of the particular facts stated in the following words, "Of the Jews five times received I forty stripes save one; thrice was I beaten with rods, once was I stoned, thrice I suffered shipwreck, a night and a day I have been in the deep," — we know only of one, the beating by the magistrates at Philippi, from the Acts. The daily burden of "the care of all the churches" seems to imply a wide and constant range of communication, by visits, messengers, and letters, of which we have found it reasonable to assume examples in his intercourse with the Church of Corinth. The mention of "visions and revelations of the Lord," and of the "thorn (or rather *stake*) in the flesh," side by side, is peculiarly characteristic both of the mind and of the experiences of St. Paul. As an instance of the visions, he alludes to a trance which had befallen him fourteen years before, in which he had been caught up into paradise, and had heard unspeakable words. Whether this vision *may* be identified with any that is recorded in the Acts must depend on chronological considerations: but the very expressions of St. Paul in this place would rather lead us not to think of an occasion in which words that *could* be reported were spoken. We observe that he speaks with the deepest reverence of the privilege thus granted to him; but he distinctly declines to ground anything upon it as regards other men. Let them judge him, he says, not by any such pretensions, but by facts which were cognizable to them (xii. 1-6). And he would not, even inwardly with himself, glory in visions and revelations without remembering how the Lord had guarded him from being puffed up by them. A stake in the flesh (*σκόλοψ τῆ σαρκί*) was given him, a messenger of Satan to buffet him, lest he should be exalted above measure. The different interpretations which have prevailed

of this *σκόλοψ* have a certain historical significance. (1.) Roman Catholic divines have inclined to understand by it strong *sensual temptation* (2.) Luther and his followers take it to mean temptations to *unbelief*. But neither of these would be "infirmities" in which St. Paul could "glory." (3.) It is almost the unanimous opinion of modern divines — and the authority of the ancient fathers on the whole is in favor of it — that the *σκόλοψ* represents some vexatious *bodily infirmity* (see especially Stanley *in loco*). It is plainly what St. Paul refers to in Gal. iv. 14: "My temptation in my flesh ye despised not nor rejected." This infirmity distressed him so much that he besought the Lord thrice that it might depart from him. But the Lord answered, "My grace is sufficient for thee; for my strength is made perfect in weakness." We are to understand therefore the affliction as remaining; but Paul is more than resigned under it, he even glories in it as a means of displaying more purely the power of Christ in him. That we are to understand the Apostle, in accordance with this passage, as laboring under some degree of ill-health, is clear enough. But we must remember that his constitution was at least strong enough, as a matter of fact, to carry him through the hardships and anxieties and toils which he himself describes to us, and to sustain the pressure of the long imprisonment at Cæsarea and in Rome.

After writing this epistle, St. Paul travelled through Macedonia, perhaps to the borders of ILLYRICUM (Rom. xv. 19), and then carried out the intention of which he had spoken so often, and arrived himself at Corinth. The narrative in the Acts tells us that "when he had gone over those parts (Macedonia), and had given them much exhortation, he came into Greece, and there abode three months" (xx. 2, 3). There is only one incident which we can connect with this visit to Greece, but that is a very important one — the writing of another great epistle, addressed to the Church at Rome. [ROMANS, EPISTLE TO THE.] That this was written at this time from Corinth appears from passages in the epistle itself, and has never been doubted.

It would be unreasonable to suppose that St. Paul was insensible to the mighty associations which connected themselves with the name of Rome. The seat of the imperial government to which Jerusalem itself, with the rest of the world, was then subject, must have been a grand object to the thoughts of the Apostle from his infancy upwards. He was himself a citizen of Rome; he had come repeatedly under the jurisdiction of Roman magistrates; he had enjoyed the benefits of the equity of the Roman law, and the justice of Roman administration. And, besides its universal supremacy, Rome was the natural head of the Gentile world, as Jerusalem was the head of the Jewish world. In this august city Paul had many friends and brethren. Romans who had travelled into Greece and Asia, strangers from Greece and Asia who had gone to settle at Rome, had heard of Jesus Christ and the kingdom of Heaven from Paul himself or from other preachers of Christ, and had formed themselves into a community, of which a good report had gone forth throughout the Christian world. We are not surprised therefore to hear that the Apostle was very anxious to visit Rome. It was his fixed intention to go to Rome, and from Rome to extend his journey as far

as Spain (Rom. xv. 24, 28). He would thus bear his witness, both in the capital and to the extremities of the Western or Gentile world. For the present he could not go on from Corinth to Rome, because he was drawn by a special errand to Jerusalem — where indeed he was likely enough to meet with dangers and delays (xv. 25–32). But from Jerusalem he proposed to turn Romewards. In the mean while he would write them a letter from Corinth.

The letter is a substitute for the personal visit which he had longed "for many years" to pay; and, as he would have made the visit, so now he writes the letter, *because he is the Apostle of the Gentiles*. Of this office, to speak in common language, St. Paul was proud. All the labors and dangers of it he would willingly encounter; and he would also jealously maintain its dignity and its powers. He held it of Christ, and Christ's commission should not be dishonored. He represents himself grandly as a priest, appointed to offer up the faith of the Gentile world as a sacrifice to God (xv. 16). And he then proceeds to speak with pride of the extent and independence of his Apostolic labors. It is in harmony with this language that he should address the Roman Church as consisting mainly of Gentiles; but we find that he speaks to them as to persons deeply interested in Jewish questions (see Prof. Jowett's and Bp. Colenso's *Introductions to the Epistle*).

To the church thus composed, the Apostle of the Gentiles writes to declare and commend the Gospel which he everywhere preaches. That Gospel was invariably the announcement of Jesus Christ the Son of God, the Lord of men, who was made man, died, and was raised again, and whom his heralds present to the faith and obedience of mankind. Such a *κήρυγμα* might be variously commended to different hearers. In speaking to the Roman Church, St. Paul represents the chief value of it as consisting in the fact that, through it, the righteousness of God, as a righteousness not for God only, but also for men, was revealed. It is natural to ask what led him to choose and dwell upon this aspect of his proclamation of Jesus Christ. The following answers suggest themselves:—(1.) As he looked upon the condition of the Gentile world, with that *coup d'œil* which the writing of a letter to the Roman Church was likely to suggest, he was struck by the awful wickedness, the utter dissolution of moral ties, which has made that age infamous. His own terrible summary (i. 21–32) is well known to be confirmed by other contemporary evidence. The profligacy which we shudder to read of was constantly under St. Paul's eye. Along with the evil he saw also the beginnings of God's judgment upon it. He saw the miseries and disasters, begun and impending, which proved that God in heaven would not tolerate the unrighteousness of men. (2.) As he looked upon the condition of the Jewish people, he saw them claiming an exclusive righteousness, which, however, had manifestly no power to preserve them from being really unrighteous. (3.) Might not the thought also occur to him, as a Roman citizen, that the empire which was now falling to pieces through unrighteousness had been built up by righteousness, by that love of order and that acknowledgment of rights which were the great endowment of the Roman people? Whether we lay any stress upon this or not, it seems clear that to one contemplating the world from St.

Paul's point of view, no thought would be so naturally suggested as that of the need of the *true* Righteousness for the two divisions of mankind. How he expounds that God's own righteousness was shown, in Jesus Christ, to be a righteousness which men might trust in — sinners though they were, — and by trusting in it submit to it, and so receive it as to show forth the fruits of it in their own lives; how he declares the union of men with Christ as subsisting in the Divine idea and as realized by the power of the Spirit, — may be seen in the epistle itself. The remarkable exposition contained in ch. ix., x., xi., illustrates the personal character of St. Paul, by showing the intense love for his nation which he retained through all his struggles with unbelieving Jews and Judaizing Christians, and by what hopes he reconciled himself to the thought of their unbelief and their punishment. Having spoken of this subject, he goes on to exhibit in practical counsels the same love of Christian unity, moderation, and gentleness, the same respect for social order, the same tenderness for weak consciences, and the same expectation of the Lord's coming and confidence in the future, which appear more or less strongly in all his letters.

Before his departure from Corinth, St. Paul was joined again by St. Luke, as we infer from the change in the narrative from the third to the first person. We have seen already that he was bent on making a journey to Jerusalem, for a special purpose and within a limited time. With this view he was intending to go by sea to Syria. But he was made aware of some plot of the Jews for his destruction, to be carried out through this voyage; and he determined to evade their malice by changing his route. Several brethren were associated with him in this expedition, the bearers, no doubt, of the collections made in all the churches for the poor at Jerusalem. These were sent on by sea, and probably the money with them, to Troas, where they were to await St. Paul. He, accompanied by St. Luke, went northwards through Macedonia. The style of an eye-witness again becomes manifest. "From Philippi," says the writer, "we sailed away after the days of unleavened bread, and came unto them to Troas in five days, where we abode seven days." The marks of time throughout this journey have given occasion to much chronological and geographical discussion, which brings before the reader's mind the difficulties and uncertainties of travel in that age, and leaves the *precise* determination of the dates of this history a matter for reasonable conjecture rather than for positive statement. But no question is raised by the times mentioned which need detain us in the course of the narrative. During the stay at Troas there was a meeting on the first day of the week "to break bread," and Paul was discoursing earnestly and at length with the brethren. He was to depart the next morning, and midnight found them listening to his earnest speech, with many lights burning in the upper chamber in which they had met, and making the atmosphere oppressive. A youth named Eutychus was sitting in the window, and was gradually overpowered by sleep, so that at last he fell into the street or court from the third story, and was taken up dead. The meeting was interrupted by this accident, and Paul went down and fell upon him and embraced him, saying, "Be not disturbed, his life is in him." [ΕΥΤΥΧΟΥΣ, Amer. ed.] His

mends then appear to have taken charge of him, whilst Paul went up again, first presided at the breaking of bread, afterwards took a meal, and continued conversing until day-break, and so departed.

Whilst the vessel which conveyed the rest of the party sailed from Troas to Assos, Paul gained some time by making the journey by land. At Assos he went on board again.<sup>a</sup> Coasting along by Mitylene, Chios, Samos, and Trogyllium, they arrived at Miletus. The Apostle was thus passing by the chief church in Asia; but if he had gone to Ephesus he might have arrived at Jerusalem too late for the Pentecost, at which festival he had set his heart upon being present. At Miletus, however, there was time to send to Ephesus; and the elders of the Church were invited to come down to him there. This meeting is made the occasion for recording another characteristic and representative address of St. Paul (Acts xx. 18-35).<sup>b</sup> This spoken address to the elders of the Ephesian Church may be ranked with the epistles, and throws the same kind of light upon St. Paul's Apostolical relations to the churches. Like several of the epistles, it is in great part an appeal to their memories of him and of his work. He refers to his labors in "serving the Lord" amongst them, and to the dangers he incurred from the plots of the Jews, and asserts emphatically the *unreserve* with which he had taught them. He then mentions a fact which will come before us again presently, that he was receiving inspired warnings, as he advanced from city to city, of the bonds and afflictions awaiting him at Jerusalem. It is interesting to observe that the Apostle felt it to be his duty to press on in spite of these warnings. Having formed his plan on good grounds and in the sight of God, he did not see, in dangers which might even touch his life, however clearly set before him, reasons for changing it. Other arguments might move him from a fixed purpose — not dangers. His one guiding principle was, to discharge the ministry which he had received of the Lord Jesus, to testify the Gospel of the grace of God. Speaking to his present audience as to those whom he was seeing for the last time, he proceeds to exhort them with unusual earnestness and tenderness, and expresses in conclusion that anxiety as to practical industry and liberality which has been increasingly occupying his mind. In terms strongly resembling the language

of the epistles to the Thessalonians and Corinthians, he pleads his own example, and entreats them to follow it, in "laboring for the support of the weak." "And when he had thus spoken he kneeled down and prayed with them all: and they all wept sore, and fell on Paul's neck, and kissed him, sorrowing most of all for the words which he spake, that they should see his face no more. And they accompanied him to the ship." . . . This is the kind of narrative in which some learned men think they can detect the signs of a moderately clever fiction.

The course of the voyage from Miletus was by Coos and Rhodes to Patara, and from Patara in another vessel past Cyprus to Tyre. Here Paul and his company spent seven days; and there were disciples "who said to Paul through the Spirit, that he should not go up to Jerusalem." Again there was a sorrowful parting: "They all brought us on our way, with wives and children, till we were out of the city; and we kneeled down on the shore and prayed." From Tyre they sailed to Ptolemais, where they spent one day, and from Ptolemais proceeded, apparently by land, to Cæsarea. In this place was settled Philip the Evangelist, one of the seven, and he became the host of Paul and his friends. Philip had four unmarried daughters, who "prophesied," and who repeated, no doubt, the warnings already heard. Cæsarea was within an easy journey of Jerusalem, and Paul may have thought it prudent not to be too long in Jerusalem before the festival; otherwise it might seem strange that, after the former haste, they now "tarried many days" at Cæsarea. During this interval the prophet Agabus (Acts xi. 28) came down from Jerusalem, and crowned the previous intimations of danger with a prediction expressively delivered. It would seem as if the approaching imprisonment were intended to be conspicuous in the eyes of the Church, as an agency for the accomplishment of God's designs. At this stage a final effort was made to dissuade Paul from going up to Jerusalem, by the Christians of Cæsarea, and by his travelling companions. But "Paul answered, What mean ye to weep and to break mine heart? for I am ready not to be bound only, but also to die at Jerusalem for the name of the Lord Jesus. And when he would not be persuaded, we ceased, saying, The will of the Lord be done." So, after a while, they went up to Jerusalem, and were

a \* Assos, connected with Troas by a paved road, was about twenty miles distant. A Greek friend mentioned to me that he had travelled on foot between the places in five hours. The motive for Paul's foot-journey can only be conjectured. He may have wished to have the company of friends from Troas whom the crowded vessel could not accommodate, or to visit friends on the way, or (Howson) after the exciting scenes at Troas to gratify his desire for solitude and retirement. H.

b \* The memorable address at Miletus brings before us a characteristic of Paul, which enters essentially into a just conception of his personality, and is introduced in such a manner as to authenticate the speech. It will be noticed how strongly the Apostle asserts in this discourse his self-consciousness of entire rectitude in the eyes of men, and of his claim to be recognized as a true pattern of Christian fidelity. "It appears," says Dr. Tholuck (*Reden des Apostels Paulus: Studien u. Kritiken* for 1839, p. 305 ff.) "to belong to the peculiarities of this Apostle that he in particular appeals so often to his blameless manner of life. The occasion for this lies sometimes in the calumnies of his enemies, as when he says in 2 Cor.

i. 12: 'For our boasting (*καύχησις*) is this, the testimony of our conscience, that in simplicity and godly sincerity, not with fleshly wisdom, but by the grace of God, we have had our conversation in the world, and more especially among you.' Ch. xi. shows what adversaries he had in view in this self-justification. But often these appeals spring only from that just confidence with which he can call upon others to imitate him, as he himself imitates the Saviour. Thus in 1 Cor. xi. 1, he cries: 'Be ye followers of me, even as I also am of Christ;' and in Phil. iii. 17: 'Brethren, be followers together of me, and mark them who walk so as ye have us for an ensample.' Such personal testimonies are not found in the other epistles of the N. T., nor are they frequent in the writings of other pious men; and on that account we are authorized to consider their occurrence in this discourse (vv. 18-21) as a mark of its historical character." For examples of the linguistic affinity between this discourse and Paul's Epistles, see Lekebusch, *Composition der Apostelgeschichte*, p. 339. Dean Howson's remarks on this address (*Character of St. Paul*, p. 202 f.) are specially instructive. H

gladly received by the brethren. This is St. Paul's fifth and last visit to Jerusalem.

*St. Paul's Imprisonment: Jerusalem and Cæsarea.* — He who was thus conducted into Jerusalem by a company of anxious friends had become by this time a man of considerable fame amongst his countrymen. He was widely known as one who had taught with preëminent boldness that a way into God's favor was opened to the Gentiles, and that this way did not lie through the door of the Jewish Law. He had moreover actually founded numerous and important communities, composed of Jews and Gentiles together, which stood simply on the name of Jesus Christ, apart from circumcision and the observance of the Law. He had thus roused against himself the bitter enmity of that unfathomable Jewish pride which was almost as strong in some of those who had professed the faith of Jesus, as in their unconverted brethren. This enmity had for years been vexing both the body and the spirit of the Apostle. He had no rest from his persecutions; and his joy in proclaiming the free grace of God to the world was mixed with a constant sorrow that in so doing he was held to be disloyal to the calling of his fathers. He was now approaching a crisis in the long struggle, and the shadow of it had been made to rest upon his mind throughout his journey to Jerusalem. He came "ready to die for the name of the Lord Jesus," but he came expressly to prove himself a faithful Jew, and this purpose emerges at every point of the history.

St. Luke does not mention the contributions brought by Paul and his companions for the poor at Jerusalem.<sup>a</sup> But it is to be assumed that their first act was to deliver these funds into the proper hands. This might be done at the interview which took place on the following day with "James and all the elders." As on former occasions, the believers at Jerusalem could not but glorify God for what they heard; but they had been alarmed by the prevalent feeling concerning St. Paul. They said to him, "Thou seest, brother, how many thousands of Jews there are which believe; and they are all zealous of the Law; and they are informed of thee that thou teachest all the Jews which are among the Gentiles to forsake Moses, saying that they ought not to circumcise their children, neither to walk after the customs." This report, as James and the elders assume, was not a true one; it was a perversion of Paul's real teaching, which did not, in fact, differ from theirs. In order to dispel such rumors they ask him to do publicly an act of homage to the Law and its observances. They had four men who were under the Nazarite vow. The completion of this vow involved (Num. vi. 13-21) a considerable expense for the offerings to be presented in the Temple; and it was a meritorious act to provide these offerings for the poorer Nazarites. St. Paul was requested to put himself under the vow with those other four, and to supply the cost of their offerings. He at once accepted the proposal, and on the next day,

having performed some ceremony which implied the adoption of the vow, he went into the Temple, announcing that the due offerings for each Nazarite were about to be presented and the period of the vow terminated. It appears that the whole process undertaken by St. Paul required seven days to complete it. Towards the end of this time certain Jews from "Asia," who had come up for the Pentecostal feast, and who had a personal knowledge both of Paul himself and of his companion Trophimus, a Gentile from Ephesus, saw Paul in the Temple. They immediately set upon him, and stirred up the people against him, crying out, "Men of Israel, help: this is the man that teacheth all men everywhere against the people, and the Law, and this place; and further brought Greeks also into the Temple, and hath polluted this holy place." The latter charge had no more truth in it than the first: it was only suggested by their having seen Trophimus with him, not in the Temple, but in the city. They raised, however, a great commotion: Paul was dragged out of the Temple, of which the doors were immediately shut, and the people, having him in their hands, were proposing to kill him. But tidings were soon carried to the commander of the force which was serving as a garrison in Jerusalem, that "all Jerusalem was in an uproar;" and he, taking with him soldiers and centurions, hastened to the scene of the tumult. Paul was rescued from the violence of the multitude by the Roman officer, who made him his own prisoner, causing him to be chained to two soldiers, and then proceeded to inquire who he was and what he had done. The inquiry only elicited confused outcries, and the "chief captain" seems to have imagined that the Apostle might perhaps be a certain Egyptian pretender who had recently stirred up a considerable rising of the people. The account in the Acts (xxi. 34-40) tells us with graphic touches how St. Paul obtained leave and opportunity to address the people in a discourse which is related at length.

This discourse was spoken in Hebrew; that is, in the native dialect of the country, and was on that account listened to with the more attention. It is described by St. Paul himself, in his opening words, as his "defence," addressed to his brethren and fathers. It is in this light that it ought to be regarded. As we have seen, the desire which occupied the Apostle's mind at this time, was that of vindicating his message and work as those of a faithful Jew. The discourse spoken to the angry people at Jerusalem is his own justification of himself. He adopts the historical method, after which all the recorded appeals to Jewish audiences are framed. He is a servant of facts. He had been from the first a zealous Israelite like his hearers. He had changed his course because the God of his fathers had turned him from one path into another. It is thus that he is led into a narrative of his Conversion. We have already noticed the differences, in the statement of bare facts, between this narrative and that of the 9th chapter. The business of the

<sup>a</sup> \* This remark is not correct, if understood to mean that Luke is altogether silent as to the alms which Paul had collected abroad, and had brought with him to Jerusalem. Luke represents the Apostle as saying in his speech before Felix (Acts xxiv. 17) that he was at Jerusalem on this business when he was apprehended by the Jews. This incidental notice, however,

is, in fact, the only reference in the book of the Acts to these contributions which Paul had been taking up so extensively in the Gentile churches. (See Rom. xv. 25, 26; 1 Cor. xvi. 1-4; 2 Cor. viii. 1-4. The manner in which the epistles supply this omission of Luke's history, as Paley so justly argues, furnishes a conclusive proof of the credibility of these writings.

student, in this place, is to see how far the purpose of the Apostle will account for whatever is special to this address. That purpose explains the detailed reference to his rigorously Jewish education, and to his history before his conversion. It gives point to the announcement that it was by a direct operation from without upon his spirit, and not by the gradual influence of other minds upon his, that his course was changed. Incidentally, we may see a reason for the admission that his companions "heard not the voice of him that spake to me" in the fact that some of them, not believing in Jesus with their former leader, may have been living at Jerusalem, and possibly present amongst the audience. In this speech, the Apostle is glad to mention, what we were not told before, that the Ananias who interpreted the will of the Lord to him more fully at Damascus, was "a devout man according to the law, having a good report of all the Jews which dwelt there," and that he made his communication in the name of Jehovah, the God of Israel, saying, "The God of our fathers hath chosen thee, that thou shouldst know his will, and see the Righteous One, and hear a voice out of his mouth; for thou shalt be a witness for him unto all men of what thou hast seen and heard." Having thus claimed, according to his wont, the character of a simple instrument and witness, St. Paul goes on to describe another revelation of which we read nothing elsewhere. He had been accused of being an enemy to the Temple. He relates that after the visit to Damascus he went up again to Jerusalem, and was praying once in the Temple itself, till he fell into a trance. Then he saw the Lord, and was bidden to leave Jerusalem quickly, because the people there would not receive his testimony concerning Jesus. His own impulse was to stay at Jerusalem, and he pleaded with the Lord that there it was well known how he had persecuted those of whom he was now one, — implying, it would appear, that at Jerusalem his testimony was likely to be more impressive and irresistible than elsewhere; but the Lord answered with a simple command, "Depart: for I will send thee far hence unto the Gentiles."

Until this hated word, of a mission to the Gentiles, had been spoken, the Jews had listened to the speaker. They could bear the name of the Nazarene, though they despised it; but the thought of that free declaration of God's grace to the Gentiles, of which Paul was known to be the herald, stung them to fury. Jewish pride was in that generation becoming hardened and embittered to the utmost; and this was the enemy which St. Paul had come to encounter in its stronghold. "Away with such a fellow from the earth," the multitude now shouted: "it is not fit that he should live."<sup>a</sup> The Roman commander, seeing the tumult that arose, might well conclude that St. Paul had committed some heinous offense; and carrying him off, he gave orders that he should be forced by scourging to confess his crime. Again the Apostle took advantage of his Roman citizenship to protect himself from such an outrage. To the rights of that citizenship, he, a free-born Roman, had a better title than the chief captain himself; and if he had chosen to assert it before, he might have saved himself from the indignity of being manacled.

The Roman officer was bound to protect a citizen,

and to suppress tumult; but it was also a part of his policy to treat with deference the religion and the customs of the country. St. Paul's present history is the resultant of these two principles. The chief captain set him free from bonds, but on the next day called together the chief priests and the Sanhedrim, and brought Paul as a prisoner before them. We need not suppose that this was a regular legal proceeding: it was probably an experiment of policy and courtesy. If, on the one hand, the commandant of the garrison had no power to convoke the Sanhedrim; on the other hand he would not give up a Roman citizen to their judgment. As it was, the affair ended in confusion, and with no semblance of a judicial termination. The incidents selected by St. Luke from the history of this meeting form striking points in the biography of St. Paul, but they are not easy to understand. The difficulties arising here, not out of a comparison of two independent narratives, but out of a single narrative which must at least have appeared consistent and intelligible to the writer himself, are a warning to the student not to draw unfavorable inferences from all apparent discrepancies. St. Paul appears to have been put upon his defense, and with the peculiar habit, mentioned elsewhere also (Acts xiii. 9), of looking steadily when about to speak (*ἀνέστας*), he began to say, "Men and brethren, I have lived in all good conscience (or, to give the force of *πεπολιτευμαι*, I have lived a conscientiously loyal life) unto God, until this day." Here the high-priest Ananias commanded them that stood by him to smite him on the mouth. With a fearless indignation, Paul exclaimed: "God shall smite thee, thou whited wall; for sittest thou to judge me after the law, and commandest me to be smitten contrary to the law?" The bystanders said, "Revilest thou God's high-priest?" Paul answered, "I knew not, brethren, that he was the high-priest; for it is written, Thou shalt not speak evil of the ruler of thy people." The evidence furnished by this apology, of St. Paul's respect both for the Law and for the high-priesthood, was probably the reason for relating the outburst which it followed. Whether the writer thought that outburst culpable or not, does not appear. St. Jerome (*contra Pelag.* iii., quoted by Baur) draws an unfavorable contrast between the vehemence of the Apostle and the meekness of his master; and he is followed by many critics, as amongst others De Wette and Alford. But it is to be remembered that He who was led as a lamb to the slaughter, was the same who spoke of "whited sepulchres," and exclaimed, "Ye serpents, ye generation of vipers, how shall ye escape the damnation of hell?" It is by no means certain, therefore, that St. Paul would have been a truer follower of Jesus if he had held his tongue under Ananias's lawless outrage. But what does his answer mean? How was it possible for him not to know that he who spoke was the high-priest? Why should he have been less willing to rebuke an iniquitous high-priest than any other member of the Sanhedrim, "sitting to judge him after the Law?" These are difficult questions to answer. It is not likely that Ananias was personally unknown to St. Paul; still less so, that the high-priest was not distinguished by dress or place from

<sup>a</sup> The Greek is more energetic than this: "It was not fit (imperf *καθήκεν*) that he should live," i. e. he deserved to die long ago. (Lechler, *Der Apostel*

*Gesch.* p. 358, 3<sup>e</sup> Aufl.); or, as Meyer prefers (*in loc.*), "should have been left to die instead of being rescued as he was (Acts xxi. 81). IL

the other members of the Sanhedrim. The least objectionable solutions seem to be that for some reason or other — either because his sight was not good, or because he was looking another way, — he did not know whose voice it was that ordered him to be smitten; and that he wished to correct the impression which he saw was made upon some of the audience by his threatening protest, and therefore took advantage of the fact that he really did not know the speaker to be the high-priest, to explain the deference he felt to be due to the person holding that office." The next incident which St. Luke records seems to some, who cannot think of the Apostle as remaining still a Jew, to cast a shadow upon his rectitude. He perceived, we are told, that the council was divided into two parties, the Sadducees and Pharisees, and therefore he cried out, "Men and brethren, I am a Pharisee, the son of a Pharisee; concerning the hope and resurrection of the dead I am called in question." This declaration, whether so intended or not, had the effect of stirring up the party spirit of the assembly to such a degree that a fierce dissension arose, and some of the Pharisees actually took Paul's side, saying, "We find no evil in this man; suppose a spirit or an angel has spoken to him?" — Those who impugn the authenticity of the Acts point triumphantly to this scene as an utterly impossible one; others consider that the Apostle is to be blamed for using a disingenuous artifice. But it is not so clear that St. Paul was using an artifice at all, at least for his own interest, in identifying himself as he did with the professions of the Pharisees. He had not come to Jerusalem to escape out of the way of danger, nor was the course he took on this occasion the safest he could have chosen. Two objects, we must remember, were dearer to him than his life: (1) to testify of him whom God had raised from the dead, and (2) to prove that in so doing he was a faithful Israelite. He may well have thought that both these objects might be promoted by an appeal to the nobler professions of the Pharisees. The *creed* of the Pharisee, as distinguished from that of the Sadducee, was unquestionably the *creed* of St. Paul. His belief in Jesus seemed to him to supply the ground and fulfillment of that *creed*. He wished to lead his brother Pharisees into a deeper and more living apprehension of their own faith.

Whether such a result was in any degree attained, we do not know: the immediate consequence of the dissension which occurred in the assembly was that Paul was like to be torn in pieces, and was carried off by the Roman soldiers. In the night he had a vision, as at Corinth (xviii. 9, 10) and on the voyage to Rome (xxvii. 23, 24), of the Lord standing by him, and encouraging him. "Be of good cheer, Paul," said his Master; "for as thou

hast testified of me in Jerusalem, so must thou bear witness also at Rome." It was not safety that the Apostle longed for, but opportunity to bear witness of Christ.

Probably the factious support which Paul had gained by his manner of bearing witness in the council died away as soon as the meeting was dissolved. On the next day a conspiracy was formed, which the historian relates with a singular fullness of details. More than forty of the Jews bound themselves under a curse neither to eat nor to drink till they had killed Paul. Their plan was, to persuade the Roman commandant to send down Paul once more to the council, and then to set upon him by the way and kill him. This conspiracy became known in some way to a nephew of St. Paul's, his sister's son, who was allowed to see his uncle, and inform him of it, and by his desire was taken to the captain, who was thus put on his guard against the plot. This discovery baffled the conspirators; and it is to be feared that they obtained some dispensation from their vow. The consequence to St. Paul was that he was hurried away from Jerusalem. The chief captain, Claudius Lysias, determined to send him to Cæsarea, to Felix the governor, or procurator, of Judæa. He therefore put him in charge of a strong guard of soldiers, who took him by night as far as Antipatris. From thence a smaller detachment conveyed him to Cæsarea, where they delivered up their prisoner into the hands of the governor, together with a letter, in which Claudius Lysias had explained to Felix his reason for sending Paul, and had announced that his accusers would follow. Felix, St. Luke tells us with that particularity which marks this portion of his narrative, asked of what province the prisoner was: and being told that he was of Cilicia, he promised to give him a hearing when his accusers should come. In the mean-time he ordered him to be guarded, — chained, probably, to a soldier, — in the government house [or Prætorium], which had been the palace of Herod the Great.

*Imprisonment at Cæsarea.* — St. Paul was henceforth, to the end of the period embraced in the Acts, if not to the end of his life, in Roman custody. This custody was in fact a protection to him, without which he would have fallen a victim to the animosity of the Jews. He seems to have been treated throughout with humanity and consideration. His own attitude towards Roman magistrates was invariably that of a respectful but independent citizen; and whilst his franchise secured him from open injustice, his character and conduct could not fail to win him the good-will of those into whose hands he came. The governor before whom he was now to be tried, according to Tacitus and Josephus, was a mean and dissolute

\* It is a decisive objection to this construction, that he addresses his rebuke to the person who gave the order, whom he recognizes as a presiding judge. The interpretations of this difficult passage are various — some writers understanding it literally; others, ironically; others, as a grave denial that Ananias was, in the true meaning of the office, high-priest, and others, as an acknowledgment that he spoke impulsively, not considering that he was addressing the high-priest. "Paul admits that he had been thrown off his guard; the insult had touched him to the quick, and he had spoken rashly. But what can surpass the grace with which he recovered his self-possession, the frankness with which he acknowledged his

error? If his conduct in yielding to the momentary impulse was not that of Christ himself under a similar provocation (John xviii. 22, 23), certainly the manner in which he atoned for his fault was *Christlike*." (Mackett's *Commentary on the Acts*, 2d ed. p. 372.) This view, which is held by several eminent writers (Howson, Wordsworth, Lechler), as stated above, and which is really honorable to the Apostle, is criticized by Alexander as "the fashionable sentimental view." It is not wholly satisfactory, because the Apostle appears to have spoken in a strain of prophetic denunciation; but it strikes us as the least difficult and improbable of the several solutions proposed.

tyrant. [FELIX.] "Per omnem sævitiam ac libidinem jus regium servili ingenio exercit" (Tacitus, *Hist.* v. 9). But these characteristics, except perhaps the *servile ingenium*, do not appear in our history. The orator or counsel retained by the Jews and brought down by Ananias and the elders, when they arrived in the course of five days at Cæsarea, begins the proceedings of the trial professionally by complimenting the governor. The charge he goes on to set forth against Paul shows precisely the light in which he was regarded by the fanatical Jews. He is a pestilent fellow (*λοιμῶς*): he stirs up divisions amongst the Jews throughout the world; he is a ringleader of the sect (*αἰρέσεως*) of the Nazarenes. His last offense had been an attempt to profane the Temple. [TERTULLUS.] St. Paul met the charge in his usual manner. He was glad that his judge had been for some years governor of a Jewish province; "because it is in thy power to ascertain that, not more than twelve days since, I came up to Jerusalem to worship." The emphasis is upon his coming up to worship. He denied positively the charges of stirring up strife and of profaning the Temple. But he admitted that "after the way (*τῆν ὁδόν*) which they call a sect, or a heresy," — so he worshipped the God of his fathers, believing all things written in the Law and in the Prophets. Again he gave prominence to the hope of a resurrection, which he held, as he said, in common with his accusers. His loyalty to the faith of his fathers he had shown by coming up to Jerusalem expressly to bring alms for his nation and offerings, and by undertaking the ceremonies of purification in the Temple. What fault then could any Jew possibly find in him? — The Apostle's answer was straightforward and complete. He had *not* violated the law of his fathers; he was still a true and loyal Israelite. Felix, it appears, knew a good deal about "the way" (*τῆς ὁδοῦ*), as well as about the customs of the Jews, and was probably satisfied that St. Paul's account was a true one. He made an excuse for putting off the matter, and gave orders that the prisoner should be treated with indulgence, and that his friends should be allowed free access to him. After a while, Felix heard him again. His wife Drusilla was a Jewess, and they were both curious to hear the eminent preacher of the new faith in Christ. But St. Paul was not a man to entertain an idle curiosity. He began to reason concerning righteousness, temperance,<sup>a</sup> and the coming judgment, in a manner which alarmed Felix and caused him to put an end to the conference. He frequently saw him afterwards, however, and allowed him to understand that a bribe would procure his release. But St. Paul would not resort to this method of escape, and he remained in custody until Felix left the province. The unprincipled governor had good reason to seek to ingratiate himself with the Jews; and to please them, he handed over Paul, as an untried prisoner, to his successor Festus.

At this point, as we shall see hereafter, the history of St. Paul comes into its closest contact with external chronology. Festus, like Felix, has a place in secular history, and he bears a much better char-

acter. Upon his arrival in the province, he went up without delay from Cæsarea to Jerusalem, and the leading Jews seized the opportunity of asking that Paul might be brought up there for trial, intending to assassinate him by the way. But Festus would not comply with their request. He invited them to follow him on his speedy return to Cæsarea, and a trial took place there, closely resembling that before Felix. Festus saw clearly enough that Paul had committed no offense against the law, but he was anxious at the same time, if he could, to please the Jews. "They had certain questions against him," Festus says to Agrippa, "of their own superstition (or religion), and of one Jesus, who was dead, whom Paul affirmed to be alive. And being puzzled for my part as to such inquiries, I asked him whether he would go to Jerusalem to be tried there." This proposal, not a very likely one to be accepted, was the occasion of St. Paul's appeal to Cæsar. In dignified and independent language he claimed his rights as a Roman citizen. We can scarcely doubt that the prospect of being forwarded by this means to Rome, the goal of all his desires, presented itself to him and drew him onwards, as he virtually protested against the indecision and impotence of the provincial governor, and exclaimed, "I appeal unto Cæsar." Having heard this appeal, Festus consulted with his assessors, found that there was no impediment in the way of its prosecution, and then replied, "Hast thou appealed to Cæsar? To Cæsar thou shalt go."

Properly speaking, an appeal was made from the sentence of an inferior court to the jurisdiction of a higher. But in St. Paul's case no sentence had been pronounced. We must understand, therefore, by his appeal, a demand to be tried by the imperial court, and we must suppose that a Roman citizen had the right of electing whether he would be tried in the province or at Rome. [APPEAL.]

The appeal having been allowed, Festus reflected that he must send with the prisoner a report of "the crimes laid against him." And he found that it was no easy matter to put the complaints of the Jews in a form which would be intelligible at Rome. He therefore took advantage of an opportunity which offered itself in a few days to seek some help in the matter. The Jewish prince Agrippa arrived with his sister Bernice on a visit to the new governor. To him Festus communicated his perplexity, together with an account of what had occurred before him in the case. Agrippa, who must have known something of the sect of the Nazarenes, and had probably heard of Paul himself, expressed a desire to hear him speak. The Apostle therefore was now called upon to bear the name of his Master "before Gentiles, and kings." The audience which assembled to hear him was the most dignified which he had yet addressed, and the state and ceremony of the scene proved that he was regarded as no vulgar criminal. Festus, when Paul had been brought into the council-chamber, explained to Agrippa and the rest of the company the difficulty in which he found himself, and then expressly referred the matter to the better knowledge of the Jewish king. Paul therefore was to give an account of himself

<sup>a</sup> Strictly "self-control" (*ἐγκράτεια*), especially chastity, so grossly violated by those to whom Paul was speaking. We have here a striking example of the Apostle's courage and fidelity. At the side of Felix was sitting a victim of his libertinism, an adulterer,

as Paul discoursed of immorality and a judgment to come. The woman's resentment was to be feared as well as that of the man. It was the implacable Herodias and not Herod, who demanded the head of John the Baptist. H.

to Agrippa; and when he had received from him a courteous permission to begin, he stretched forth his hand and made his defense.

In this discourse (Acts xxvi.), we have the second explanation from St. Paul himself of the manner in which he had been led, through his conversion, to serve the Lord Jesus instead of persecuting his disciples; and the third narrative of the conversion itself. Speaking to Agrippa as to one thoroughly versed in the customs and questions prevailing amongst the Jews, Paul appeals to the well-known Jewish and even Pharisaical strictness of his youth and early manhood. He reminds the king of the great hope which sustained continually the worship of the Jewish nation, — the hope of a deliverer, promised by God Himself, who should be a conqueror of death. He had been led to see that this promise was fulfilled in Jesus of Nazareth; he proclaimed his resurrection to be the pledge of a new and immortal life. What was there in this of disloyalty to the traditions of his fathers? Did his countrymen disbelieve in this Jesus as the Messiah? So had he once disbelieved in Him; and had thought it his duty to be earnest in hostility against his name. But his eyes had been opened: he would tell how and when. The story of the conversion is modified in this address as we might fairly expect it to be. We have seen that there is no absolute contradiction between the statements of this and the other narratives. The main points, — the light, the prostration, the voice from heaven, the instructions from Jesus, — are found in all three. But in this account, the words, "I am Jesus whom thou persecutest," are followed by a fuller explanation, as if then spoken by the Lord, of what the work of the Apostle was to be. The other accounts defer this explanation to a subsequent occasion. But when we consider how fully the mysterious communication made at the moment of the conversion *included* what was afterwards conveyed, through Ananias and in other ways, to the mind of Paul; and how needless it was for Paul, in his present address, before Agrippa, to mark the stages by which the whole lesson was taught, it seems merely captious to base upon the method of this account a charge of disagreement between the different parts of this history. They bear, on the contrary, a striking mark of genuineness in the degree in which they approach contradiction without reaching it. It is most natural that a story told on different occasions should be told differently; and if in such a case we find no contradiction as to the facts, we gain all the firmer impression of the substantial truth of the story. The particulars added to the former accounts by the present narrative are, that the words of Jesus were spoken in Hebrew, and that the first question to Saul was followed by the saying, "it is hard for thee to kick against the goads." (This saying is omitted by the best authorities in chapter ix.) The language of the commission which St. Paul says he received from Jesus deserves close study, and will be found to bear a striking resemblance to a passage in Colossians (i. 12-14). The ideas of light, redemption, forgiveness, inheritance, and faith in Christ, belong characteristically to the

Gospel which Paul preached amongst the Gentiles. Not less striking is it to observe the older terms in which he describes to Agrippa his obedience to the heavenly vision. He had made it his business, he says, to proclaim to all men "that they should repent and turn to God, and do works meet for repentance." Words such as John the Baptist uttered, but not less truly Pauline. And he finally reiterates that the testimony on account of which the Jews sought to kill him was in exact agreement with Moses and the prophets. They had taught men to expect that the Christ should suffer, and that He should be the first that should rise from the dead, and should show light unto the people and to the Gentiles. Of such a Messiah: Saul was the servant and preacher.<sup>a</sup>

At this point Festus began to apprehend what seemed to him a manifest absurdity. He interrupted the Apostle discourteously, but with a compliment contained in his loud remonstrance. "Thou art mad, Paul; thy much learning is turning thee mad." The phrase τὰ πολλὰ γράμματα may possibly have been suggested by the allusion to Moses and the prophets; but it probably refers to the books with which St. Paul had been supplied, and which he was known to study, during his imprisonment. As a biographical hint, this phrase is not to be overlooked. "I am not mad," replied Paul, "most noble Festus: they are words of truth and soberness which I am uttering." Then, with an appeal of mingled dignity and solicitude, he turned to the king. He was sure the king understood him. "King Agrippa, believest thou the prophets? — I know that thou believest." The answer of Agrippa can hardly have been the serious and encouraging remark of our English version. Literally rendered, it appears to be, You are briefly persuading me to become a Christian; and it is generally supposed to have been spoken ironically. "I would to God," is Paul's earnest answer, "that whether by a brief process or by a long one, not only thou but all who hear me to-day might become such as I am, with the exception of these bonds." He was wearing a chain upon the hand he held up in addressing them. With this prayer, it appears, the conference ended. Festus and the king, and their companions, consulted together and came to the conclusion that the accused was guilty of nothing that deserved death or imprisonment. And Agrippa's final answer to the inquiry of Festus was, "This man might have been set at liberty, if he had not appealed unto Cæsar."

*The Voyage to Rome.* — No formal trial of St. Paul had yet taken place. It appears from Acts xxviii. 18, that he knew how favorable the judgment of the provincial governor was likely to be. But the vehement opposition of the Jews, together with his desire to be conveyed to Rome, might well induce him to claim a trial before the imperial court. After a while arrangements were made to carry "Paul and certain other prisoners," in the custody of a centurion named Julius, into Italy; and amongst the company, whether by favor or from any other reason, we find the historian of the Acts. The narrative of this voyage is accordingly minute and circumstantial in a degree which has

<sup>a</sup> "There never was any that understood the Old Testament so well as St. Paul, except John the Baptist, and John the Divine. . . . O, he dearly loved Moses and Isaiah for they, together with king David, were the chief prophets. The words and things of St.

Paul are taken out of Moses and the prophets" (Luther's *Table Talk*, cccxxviii., Engl. Trans.). Another striking remark of Luther's may be added here "Whoso reads Paul may, with a safe conscience, build upon his words" (*Table Talk*, xxiii.).

attracted much attention. The nautical and geographical details of St. Luke's account have been submitted to an apparently thorough investigation by several competent critics, especially by Mr. Smith of Jordanhill, in an important treatise devoted to this subject, and by Mr. Howson. The result of this investigation has been, that several errors in the received version have been corrected, that the course of the voyage has been laid down to a very minute degree with great certainty, and that the account in the Acts is shown to be written by an accurate eye-witness, not himself a professional seaman, but well acquainted with nautical matters. We shall hasten lightly over this voyage, referring the reader to the works above mentioned, and to the articles in this Dictionary on the names of places and the nautical terms which occur in the narrative.

The centurion and his prisoners, amongst whom Aristarchus (Col. iv. 10) is named, embarked at Cæsarea on board a ship of Adramyttium, and set sail for the coast of Asia. On the next day they touched at Sidon, and Julius began a course of kindly and respectful treatment by allowing Paul to go on shore to visit his friends. The westerly winds still usual at the time of year (late in the summer) compelled the vessel to run northwards under the lee of Cyprus. Off the coast of Cilicia and Pamphylia they would find northerly winds, which enabled them to reach Myra in Lycia. Here the voyagers were put on board another ship, which was come from Alexandria and was bound for Italy. In this vessel they worked slowly to windward, keeping near the coast of Asia Minor, till they came over against Cnidus. The wind being still contrary, the only course was now to run southwards, under the lee of Crete, passing the headland of Salmone. They then gained the advantage of a weather shore, and worked along the coast of Crete as far as Cape Matala, near which they took refuge in a harbor called Fair Havens, identified with one bearing the same name to this day.

It became now a serious question what course should be taken. It was late in the year for the navigation of those days. The fast of the day of expiation (Lev. xxiii. 27-29), answering to the autumnal equinox, was past, and St. Paul gave it as his advice that they should winter where they were. But the master and the owner of the ship were willing to run the risk of seeking a more commodious harbor, and the centurion followed their judgment. It was resolved, with the concurrence of the majority, to make for a harbor called Phoenix, sheltered from the S. W. winds, as well as from the N. W. (The phrase *βλέποντα κατὰ λίβα* is rendered either "looking down the S. W." [Smith and Alford], or "looking towards the S. W." when observed from the sea and towards the land including it [Howson].) [PHOENIX.] A change of wind occurred which favored the plan, and by the aid of a light breeze from the south they were sailing towards Phoenix (now Lutro), when a violent N. E. wind [EUROCLYDON] came

down from the land (*κατ' αὐτῆς*, scil. *Κρήτης*),<sup>a</sup> caught the vessel, and compelled her to let her drive before the wind. In this course they arrived under the lee of a small island called Claudia, about 20 miles from Crete, where they took advantage of comparatively smooth water to get the boat on board, and to undergird, or frap, the ship. There was a fear lest they should be driven upon the Syrtis on the coast of Africa, and they therefore "lowered the gear," or sent down upon deck the gear connected with the fair-weather sails, and stood out to sea "with storm-sails set" and on the starboard tack" (Smith). The bad weather continued, and the ship was lightened on the next day of her cargo, on the third of her loose furniture and tackling. For many days neither sun nor stars were visible to steer by, the storm was violent, and all began to despair of safety. The general discouragement was aggravated by the abstinence caused by the difficulty of preparing food, and the spoiling of it; and in order to raise the spirits of the whole company Paul stood forth one morning to relate a vision which had occurred to him in the night. An angel of the God "whose he was and whom he served" had appeared to him and said, "Fear not, Paul: thou must be brought before Cæsar; and behold, God hath given thee all them that sail with thee." At the same time he predicted that the vessel would be cast upon an island and be lost.

This shipwreck was to happen speedily. On the fourteenth night, as they were drifting through the sea [*Αδρια*], about midnight, the sailors perceived indications, probably the roar of breakers, that land was near. Their suspicion was confirmed by soundings. They therefore cast four anchors out of the stern, and waited anxiously for daylight. After a while the sailors lowered the boat with the professed purpose of laying out anchors from the bow, but intending to desert the ship, which was in imminent danger of being dashed to pieces. St. Paul, aware of their intention, informed the centurion and the soldiers of it, who took care, by cutting the ropes of the boat, to prevent its being carried out. He then addressed himself to the task of encouraging the whole company, assuring them that their lives would be preserved, and exhorting them to refresh themselves quietly after their long abstinence with a good meal. He set the example himself, taking bread, giving thanks to God, and beginning to eat in presence of them all. After a general meal, in which there were 276 persons to partake, they further lightened the ship by casting out what remained of the provisions on board (*τὸν σίτον* is commonly understood to be the "wheat" which formed the cargo, but the other interpretation seems more probable).<sup>b</sup> When the light of the dawn revealed the land, they did not recognize it, but they discovered a creek with a smooth beach, and determined to run the ship aground in it. So they cut away the anchors, unloosed the rudder-paddles, raised the foresail to the wind, and made for the beach. When they came close to it they

<sup>a</sup> \* On the question of the reference of *αὐτῆς*, see addition to CRETE (Amer. ed.). We think the pronoun refers to the vessel and not to the island. H.

<sup>b</sup> \* The objections to supposing the ship's provisions to be meant here are that "wheat" (*σίτος*) has not this specific sense elsewhere in the N. T.; that the provisions still left, after so long a voyage, would have little or no effect on the ship's draft; and that the

ship's cargo was undoubtedly wheat, since the vessel was a merchant-vessel bound from Alexandria to Italy. Prof. Blunt (*Coincidences*, p. 326 f., Amer. ed.) has drawn out a very striking confirmation of St. Luke's accuracy from the detached notices which reveal to us the nature of the ship's lading (comp. Acts xxvii. 6, 10, 28). See on this point Lecler's *Des Apostol. Geschieden* in Lange's *Bibelwerk*, p. 403 (3<sup>te</sup> Aufl. 1839). H

found a narrow channel between the land on one side, which proved to be an islet, and the shore; and at this point, where the "two seas met," they succeeded in driving the fore part of the vessel fast into the clayey beach. The stern began at once to go to pieces under the action of the breakers; but escape was now within reach. The soldiers suggested to their commander that the prisoners should be effectually prevented from gaining their liberty by being killed; but the centurion, desiring to save Paul, stopped this proposition, and gave orders that those who could swim should cast themselves first into the sea and get to land, and that the rest should follow with the aid of such spars as might be available. By this creditable combination of humanity and discipline the deliverance was made as complete as St. Paul's assurances had predicted it would be.

The land on which they had been cast was found to belong to Malta. [MELITA.] The very point of the stranding is made out with great probability by Mr. Smith. The inhabitants of the island received the wet and exhausted voyagers with no ordinary kindness, and immediately lighted a fire to warm them. This particular kindness is recorded on account of a curious incident connected with it. The Apostle was helping to make the fire, and had gathered a bundle of sticks and laid them on the fire, when a viper came out of the heat, and fastened on his hand. When the natives saw the creature hanging from his hand they believed him to be poisoned by the bite, and said amongst themselves, "No doubt this man is a murderer, whom, though he has escaped from the sea, yet Vengeance suffers not to live." But when they saw no harm came of it they changed their minds and said that he was a god. This circumstance, as well as the honor in which he was held by Julius, would account for St. Paul being invited with some others to stay at the house of the chief man of the island, whose name was Publius. By him they were courteously entertained for three days. The father of Publius happened to be ill of fever and dysentery, and was healed by St. Paul; and when this was known many other sick persons were brought to him and were healed. So there was a pleasant interchange of kindness and benefits. The people of the island showed the Apostle and his company much honor, and when they were about to leave loaded them with such things as they would want. The Roman soldiers would carry with them to Rome a deepened impression of the character and the powers of the kingdom of which Paul was the herald.

After a three months' stay in Malta the soldiers and their prisoners left in an Alexandrian ship for Italy. They touched at Syracuse, where they stayed three days, and at Rhegium, from which place they were carried with a fair wind to Puteoli, where they left their ship and the sea. At Puteoli they found "brethren," for it was an important place, and especially a chief port for the traffic between Alexandria and Rome; and by these brethren they were exhorted to stay awhile with them. Permission seems to have been granted by the centurion; and whilst they were spending seven days at Puteoli news of the Apostle's arrival was sent on to Rome.

<sup>a</sup> \* This was the usual course when prisoners were sent from the provinces to Rome, and may be supposed to have been taken in the case of Paul. The passage however in the common text, Acts xxviii. 16,

The Christians at Rome, on their part, sent forth some of their number, who met St. Paul at Appii Forum and Tres Tabernæ; and on this first introduction to the Church at Rome the Apostle felt that his long desire was fulfilled at last — "He thanked God and took courage."

*St. Paul at Rome.* — On their arrival at Rome the centurion delivered up his prisoners into the proper custody, that of the prætorian prefect.<sup>a</sup> Paul was at once treated with special consideration, and was allowed to dwell by himself with the soldier who guarded him. He was not released from this galling annoyance of being constantly chained to a keeper; but every indulgence compatible with this necessary restraint was readily allowed him. He was now therefore free "to preach the Gospel to them that were at Rome also;" and proceeded without delay to act upon his rule — "to the Jew first." He invited the chief persons amongst the Jews to come to him, and explained to them that though he was brought to Rome to answer charges made against him by the Jews in Palestine, he had really done nothing disloyal to his nation or the Law, nor desired to be considered as hostile to his fellow-countrymen. On the contrary, he was in custody for maintaining that "the hope of Israel" had been fulfilled. The Roman Jews replied that they had received no tidings to his prejudice. The sect of which he had implied he was a member they knew to be everywhere spoken against; but they were willing to hear what he had to say. It has been thought strange that such an attitude should be taken towards the faith of Christ by the Jews at Rome, where a flourishing branch of the Church had existed for some years; and an argument has been drawn from this representation against the authenticity of the Acts. But it may be accounted for without violence from what we know and may probably conjecture. (1.) The Church at Rome consisted mainly of Gentiles, though it must be supposed that they had been previously for the most part Jewish proselytes. (2.) The real Jews at Rome had been persecuted and sometimes entirely banished, and their unsettled state may have checked the contact and collision which would have been otherwise likely. (3.) St. Paul was possibly known by name to the Roman Jews, and curiosity may have persuaded them to listen to him. Even if he were not known to them, here, as in other places, his courteous bearing and strong expressions of adhesion to the faith of his fathers would win a hearing from them. A day was therefore appointed, on which a large number came expressly to hear him expound his belief; and from morning till evening he bore witness of the kingdom of God, persuading them concerning Jesus, both out of the Law of Moses and out of the prophets. So the Apostle of the Gentiles had not yet unlearned the original Apostolic method. The hope of Israel was still his subject. But, as of old, the reception of his message by the Jews was not favorable. They were slow of heart to believe, at Rome as at Písidian Antioch. The judgment pronounced by Isaiah was come, Paul testified, upon the people. They had made themselves blind and deaf and gross of heart. The Gospel must be proclaimed to the Gentiles, amongst whom it would

which states that this was done, cannot be relied on as certainly genuine. See note a, vol. i. p. 82 (Amer. ed.).

and a better welcome. He turned therefore again to the Gentiles, and for two years he dwelt in his own hired house, and received all who came to him, proclaiming the kingdom of God and teaching concerning the Lord Jesus Christ, with all confidence, no man forbidding him.

These are the last words of the Acts. This history of the planting of the kingdom of Christ in the world brings us down to the time when the Gospel was openly proclaimed by the great Apostle in the Gentile capital, and stops short of the mighty convulsion which was shortly to pronounce that kingdom established as the Divine commonwealth for all men. The work of St. Paul belonged to the preparatory period. He was not to live through the time when the Son of Man came in the destruction of the Holy City and Temple, and in the throes of the New Age. The most significant part of his work was accomplished when in the Imperial City he had declared his Gospel "to the Jew first, and also to the Gentile." But his career is not abruptly closed. Before he himself fades out of our sight in the twilight of ecclesiastical tradition, we have letters written by himself, which contribute some particulars to his external biography, and give us a far more precious insight into his convictions and sympathies.

*Period of the Later Epistles.* — We might naturally expect that St. Paul, tied down to one spot at Rome, and yet free to speak and write to whom he pleased, would pour out in letters his love and anxiety for distant churches. It seems entirely reasonable to suppose that the author of the extant epistles wrote very many which are not extant. To suppose this, aids us perhaps a little in the difficult endeavor to contemplate St. Paul's epistles as living letters. It is difficult enough to connect in our minds the *writing* of these epistles with the external conditions of a human life; to think of Paul, with his incessant chain and soldier, sitting down to write or dictate, and producing for the world an inspired epistle. But it is almost more difficult to imagine the Christian communities of those days, samples of the population of Macedonia or Asia Minor, receiving and reading such letters. But the letters were actually written; and they must of necessity be accepted as representing the kind of communications which marked the intercourse of the Apostle and his fellow-Christians. When he wrote he wrote out of the fullness of his heart; and the ideas on which he dwelt were those of his daily and hourly thoughts. To that imprisonment to which St. Luke has introduced us, — the imprisonment which lasted for such a tedious time, though tempered by much indulgence, — belongs the noble group of letters to Philemon, to the Colossians, to the Ephesians, and to the Philippians. The three former of these were written at one time and sent by the same messengers. Whether that to the Philippians was written before or after these, we cannot determine; but the tone of it seems to imply that a crisis was approaching, and therefore it is commonly regarded as the latest of the four.

St. Paul had not himself founded the Church at Colossæ. But during his imprisonment at Rome he had for an associate — he calls him a "fellow-prisoner" (Philemon 23) — a chief teacher of the Colossian church named Epaphras. He had thus become deeply interested in the condition of that church. It happened that at the same time a slave named Onesimus came within the reach of St.

Paul's teaching, and was converted into a zealous and useful Christian. This Onesimus had run away from his master; and his master was a Christian of Colossæ. St. Paul determined to send back Onesimus to his master; and with him he determined also to send his old companion Tychicus (Acts xx. 4) as a messenger to the church at Colossæ, and to neighboring churches. This was the occasion of the letter to Philemon, which commended Onesimus, in language of singular tenderness and delicacy, as a faithful and beloved brother, to his injured master; and also of the two letters to the Colossians and Ephesians. [PHILEMON, EPISTLE TO.] That to the Colossians, being drawn forth by the most special circumstances, may be reasonably supposed to have been written first. It was intended to guard the church at Colossæ from false teaching, which the Apostle knew to be infesting it. For the characteristics of this epistle, we must refer to the special article. [COLOSSIANS, EPISTLE TO THE.] The end of it (iv. 7-18) names several friends who were with St. Paul at Rome, as Aristarchus, Marcus (St. Mark), Epaphras, Luke, and Demas. For the writing of the Epistle to the Ephesians, there seems to have been no more special occasion, than that Tychicus was passing through Ephesus. [EPHESIANS, EPISTLE TO THE.] The highest characteristic which these two epistles, to the Colossians and Ephesians, have in common, is that of a presentation of the Lord Jesus Christ, fuller and clearer than we find in previous writings, as the Head of creation and of mankind. All things created through Christ, all things coherent in Him, all things reconciled to the Father by Him, the eternal purpose to restore and complete all things in Him, — such are the ideas which grew richer and more distinct in the mind of the Apostle as he meditated on the Gospel which he had been preaching, and the truths implied in it. In the Epistle to the Colossians this divine headship of Christ is maintained as the safeguard against the fancies which filled the heavens with secondary divinities, and which laid down rules for an artificial sanctity of men upon the earth. In the Epistle to the Ephesians the eternity and universality of God's redeeming purpose in Christ, and the gathering of men unto Him as his members, are set forth as gloriously revealed in the Gospel. In both, the application of the truth concerning Christ as the image of God and the Head of men to the common relations of human life is dwelt upon in detail.

The Epistle to the Philippians resembles the Second to the Corinthians in the effusion of personal feeling, but differs from it in the absence of all soreness. The Christians at Philippi had regarded the Apostle with love and reverence from the beginning, and had given him many proofs of their affection. They had now sent him a contribution towards his maintenance at Rome, such as we must suppose him to have received from time to time for the expenses of "his own hired house." The bearer of this contribution was Epaphroditus, an ardent friend and fellow-laborer of St. Paul, who had fallen sick on the journey, or at Rome (Phil. ii. 27). The epistle was written to be conveyed by Epaphroditus on his return, and to express the joy with which St. Paul had received the kindness of the Philippians. He dwells, therefore, upon their fellowship in the work of spreading the Gospel, a work in which he was even now laboring and scarcely with the less effect on account of his

bonds. His imprisonment had made him known, and had given him fruitful opportunities of declaring his Gospel amongst the Imperial guard (i. 13), and even in the household of the Caesar (iv. 22). He professes his undiminished sense of the glory of following Christ, and his expectation of an approaching time in which the Lord Jesus should be revealed from heaven as a deliverer. There is a gracious tone running through this epistle, expressive of humility, devotion, kindness, delight in all things fair and good, to which the favorable circumstances under which it was written gave a natural occasion, and which helps us to understand the kind of ripening which had taken place in the spirit of the writer. [PHILIPPIANS, EPISTLE TO TIMÉ.]

In this epistle St. Paul twice expresses a confident hope that before long he may be able to visit the Philippians in person (i. 25, *οἶδα κ. τ. λ.* ii. 24, *πέποιθα κ. τ. λ.*). Whether this hope was fulfilled or not, belongs to a question which now presents itself to us, and which has been the occasion of much controversy. According to the general opinion, the Apostle was liberated from his imprisonment and left Rome soon after the writing of the letter to the Philippians, spent some time in visits to Greece, Asia Minor, and Spain, returned again as a prisoner to Rome, and was put to death there. In opposition to this view it is maintained by some, that he was never liberated, but was put to death at Rome at an earlier period than is commonly supposed. The arguments adduced in favor of the common view are, (1) the hopes expressed by St. Paul of visiting Philippi (already named) and Colossæ (Philemon 22); (2) a number of allusions in the Pastoral Epistles, and their general character; and (3) the testimony of ecclesiastical tradition. The arguments in favor of the single imprisonment appear to be wholly negative, and to aim simply at showing that there is no proof of a liberation, or departure from Rome. It is contended that St. Paul's expectations were not always realized, and that the passages from Philemon and Philippians are effectually neutralized by Acts xx. 25, "I know that ye all (at Ephesus) shall see my face no more;" inasmuch as the supporters of the ordinary view hold that St. Paul went again to Ephesus. This is a fair answer. The argument from the Pastoral Epistles is met most simply by a denial of their genuineness. The tradition of ecclesiastical antiquity is affirmed to have no real weight.

The decision must turn mainly upon the view taken of the Pastoral Epistles. It is true that there are many critics, including Wieseler and Dr. Davidson, who admit the genuineness of these epistles, and yet by referring 1 Timothy and Titus to an earlier period, and by strained explanations of the allusions in 2 Timothy, get rid of the evidence they are generally understood to give in favor of a second imprisonment. The voyages required by the two former epistles, and the writing of them, are placed within the three years spent chiefly at Ephesus (Acts xx. 31). But the hypothesis of voyages during that period not recorded by St. Luke is just as arbitrary as that of a release from Rome, which is objected to expressly because it is arbitrary; and such a distribution of the Pas-

toral Epistles is shown by overwhelming evidence to be untenable. The whole question is discussed in a masterly and decisive manner by Alford in his Prolegomena to the Pastoral Epistles. If, however, these epistles are not accepted as genuine, the main ground for the belief in a second imprisonment is cut away. For a special consideration of the epistles, let the reader refer to the articles on TIMOTHY and TITUS.

The difficulties which have induced such critics as De Wette and Ewald to reject these epistles, are not inconsiderable, and will force themselves upon the attention of the careful student of St. Paul. But they are overpowered by the much greater difficulties attending any hypothesis which assumes these epistles to be spurious. We are obliged, therefore, to recognize the modifications of St. Paul's style, the developments in the history of the church, and the movements of various persons, which have appeared suspicious in the epistles to Timothy and Titus, as nevertheless historically true. And then without encroaching on the domain of conjecture, we draw the following conclusions: (1.) St. Paul must have left Rome, and visited Asia Minor and Greece; for he says to Timothy (1 Tim. i. 3.), "I besought thee to abide still at Ephesus, when I was setting out for Macedonia." After being once at Ephesus, he was purposing to go there again (1 Tim. iv. 13), and he spent a considerable time at Ephesus (2 Tim. i. 18). (2.) He paid a visit to Crete, and left Titus to organize churches there (Titus i. 5). He was intending to spend a winter at one of the places named NICOPOLIS (Tit. iii. 12). (3.) He travelled by Miletus (2 Tim. iv. 20), Troas (2 Tim. iv. 13), where he left a cloak or case,<sup>a</sup> and some books, and Corinth (2 Tim. iv. 20). (4.) He is a prisoner at Rome, "suffering unto bonds as an evil-doer" (2 Tim. ii. 9), and expecting to be soon condemned to death (2 Tim. iv. 6). At this time he felt deserted and solitary, having only Luke, of his old associates, to keep him company; and he was very anxious that Timothy should come to him without delay from Ephesus, and bring Mark with him (2 Tim. i. 15, iv. 16, 9-12.).

These facts may be amplified by probable additions from conjecture and tradition. There are strong reasons for placing the three epistles at as advanced a date as possible, and not far from one another. The peculiarities of style and diction by which these are distinguished from all his former epistles, the affectionate anxieties of an old man, and the glances frequently thrown back on earlier times and scenes, the disposition to be hortatory rather than speculative, the references to a more complete and settled organization of the Church, the signs of a condition tending to moral corruption, and resembling that described in the apocalyptic letters to the Seven Churches — would incline us to adopt the latest date which has been suggested for the death of St. Paul, so as to interpose as much time as possible between the Pastoral Epistles and the former group. Now the earliest authorities for the date of St. Paul's death are Eusebius and Jerome, who place it, the one (*Chron. Ann.* 2083) in the 13th, the other (*Cat. Script. Eccl.* "Paulus") in the 14th year of Nero. These dates would allow some four or five years between the

<sup>a</sup> The "case," as some think, in which the books or parchments were carried, since *φελόνης* (2 Tim. iv. 13) may signify "case" as well as "cloak" (A. V.).

There is no conclusive reason for adopting one sense more than the other. H

first imprisonment and the second. During these years, according to the general belief of the early church, St. Paul accomplished his old design (Rom. xv. 28) and visited Spain. Ewald, who denies the genuineness of the Pastoral Epistles, and with it the journeyings in Greece and Asia Minor, believes that St. Paul was liberated and paid this visit to Spain (*Geschichte*, vi. pp. 621, 631, 632); yielding upon this point to the testimony of tradition. The first writer quoted in support of the journey to Spain is one whose evidence would indeed be irresistible if the language in which it is expressed were less obscure. Clement of Rome, in a hortatory and rather rhetorical passage (*Ep. 1 ad Cor.* c. 5) refers to St. Paul as an example of patience, and mentions that he preached ἐν τε τῇ ἀνατολῇ καὶ ἐν τῇ δύσει, and that before his martyrdom he went ἐπὶ τὸ τέρμα τῆς δόσεως. It is probable, but can hardly be said to be certain, that by this expression, "the goal of the west," Clement was describing Spain, or some country yet more to the west. The next testimony labors under a somewhat similar difficulty from the imperfection of the text, but it at least names unambiguously a "profectionem Pauli ab urbe ad Spaniam proficiscentis." This is from Muratori's Fragment on the Canon (Routh, *Rel. Sac.* iv. p. 1-12). (See the passage quoted and discussed in Wieseler, *Chron. Apost. Zeit.* p. 536, &c. or Alford, iii. p. 93.) Afterwards Chrysostom says simply, Μετὰ τὸ γένεσθαι ἐν Ῥωμῇ, πάλιν εἰς τὴν Σπανίαν ἀπῆλθεν (on 2 Tim. iv. 20); and Jerome speaks of St. Paul as set free by Nero, that he might preach the Gospel of Christ "in Occidentis quoque partibus" (*Cat. Script. Eccl.* "Paulus"). Against these assertions nothing is produced, except the absence of allusions to a journey to Spain in passages from some of the fathers where such allusions might more or less be expected. Dr. Davidson (*Introd. New Test.* iii. 15, 84) gives a long list of critics who believe in St. Paul's release from the first imprisonment. Wieseler (p. 521) mentions some of these, with references, and adds some of the more eminent German critics who believe with him in but one imprisonment. These include Schrader, Hensen, Winer, and Baur. The only English name of any weight to be added to this list is that of Dr. Davidson.

We conclude then, that after a wearing imprisonment of two years or more at Rome, St. Paul was set free, and spent some years in various journeyings eastwards and westwards. Towards the close of this time he pours out the warnings of his less vigorous but still brave and faithful spirit in the letters to Timothy and Titus. The first to Timothy and that to Titus were evidently written at very nearly the same time. After these were written, he was apprehended again and sent to Rome. As an eminent Christian teacher St. Paul was now in a far more dangerous position than when he was first brought to Rome. The Christians had been exposed to popular odium by the false charge of being concerned in the great Neronian conflagration of the city, and had been subjected to a most cruel persecution. The Apostle appears now to have been treated, not as an honorable state-prisoner, but as a felon (2 Tim. ii. 9). But he was at least allowed to write this Second

Letter to his "dearly beloved son" Timothy; and though he expresses a confident expectation of his speedy death, he yet thought it sufficiently probable that it might be delayed for some time, to warrant him in urging Timothy to come to him from Ephesus. Meanwhile, though he felt his isolation, he was not in the least daunted by his danger. He was more than ready to die (iv. 6), and had a sustaining experience of not being deserted by his Lord. Once already, in this second imprisonment, he had appeared before the authorities; and "the Lord then stood by him and strengthened him," and gave him a favorable opportunity for the one thing always nearest to his heart, the public declaration of his Gospel.

This epistle, a surely no unworthy utterance at such an age and in such an hour even of a St. Paul, brings us, it may well be presumed, close to the end of his life. For what remains, we have the concurrent testimony of ecclesiastical antiquity, that he was beheaded at Rome, about the same time that St. Peter was crucified there. The earliest allusion to the death of St. Paul is in that sentence from Clemens Romanus, already quoted, ἐπὶ τὸ τέρμα τῆς δόσεως ἐλθὼν καὶ μαρτυρήσας ἐπὶ τῶν ἡγουμένων, οὕτως ἀπῆλλαγγὴ τοῦ κόσμου, which just fails of giving us any particulars upon which we can conclusively rely. The next authorities are those quoted by Eusebius in his *H. E.* i. 25. Dionysius, bishop of Corinth (A. D. 170), says that Peter and Paul went to Italy and taught there together, and suffered martyrdom about the same time. This, like most of the statements relating to the death of St. Paul, is mixed up with the tradition, with which we are not here immediately concerned, of the work of St. Peter at Rome. Caius of Rome, supposed to be writing within the 2d century, names the grave of St. Peter on the Vatican, and that of St. Paul on the Ostian way. Eusebius himself entirely adopts the tradition that St. Paul was beheaded under Nero at Rome. Amongst other early testimonies, we have that of Tertullian, who says (*De Præscr. Hæret.* 36) that at Rome "Petrus passioni Dominicæ adæquat, Paulus Johannis [the Baptist] exitu coronatur;" and that of Jerome (*Cat. Sc. Paulus*), "Hic ergo 14<sup>to</sup> Neronis anno (eodem die quo Petrus) Romæ pro Christo capite truncatus sepultusque est, in via Ostiensi." It would be useless to enumerate further testimonies of what is undisputed.

It would also be beyond the scope of this article to attempt to exhibit the traces of St. Paul's Apostolic work in the history of the Church. But there is one indication, so exceptional as to deserve special mention, which shows that the difficulty of understanding the Gospel of St. Paul and of reconciling it with a true Judaism was very early felt. This is in the Apocryphal work called the Clementines (τὰ Κλημέντια), supposed to be written before the end of the 2d century. These curious compositions contain direct assaults (for though the name is not given, the references are plain and undisguised) upon the authority and the character of St. Paul. St. Peter is represented as the true Apostle, of the Gentiles as well as of the Jews, and St. Paul as ὁ ἐχθρὸς ἄνθρωπος, who opposes St. Peter and St. James. The portions of the Clementines which illustrate the writer's view of St. Paul will be

<sup>a</sup> FOR THE EPISTLE TO THE HEBREWS, see the article under that head. The close observation of the life of St. Paul would lead, we think, to the conclusion, that

the thoughts and beliefs of that epistle, to whomsoever the composition of it be attributed, are by no means alien to the Apostle's habits of mind.

found in Stanley's *Corinthians* (Intro. to 2 Cor.); and an account of the whole work, with references to the treatises of Schliemann and Baur, in Gieseher, *Ecccl. Hist.* i. § 58.

*Chronology of St. Paul's Life.* — It is usual to distinguish between the internal or absolute, and the external or relative, chronology of St. Paul's life. The former is that which we have hitherto followed. It remains to mention the points at which the N. T. history of the Apostle comes into contact with the outer history of the world. There are two principal events which serve as fixed dates for determining the Pauline chronology—the death of Herod Agrippa, and the accession of Festus; and of these the latter is by far the more important. The time of this being ascertained, the particulars given in the Acts enable us to date a considerable portion of St. Paul's life. Now it has been proved almost to certainty that Felix was recalled from Judæa and succeeded by Festus in the year 60 (Wieseler, pp. 66, &c.; Conybeare and Howson, ii. note C). In the autumn, then, of A. D. 60 St. Paul left Cæsarea. In the spring of 61 he arrived at Rome. There he lived two years, that is, till the spring of 63, with much freedom in his own hired house. After this we depend upon conjecture; but the Pastoral Epistles give us reasons, as we have seen, for deferring the Apostle's death until 67, with Eusebius, or 68, with Jerome. Similarly we can go backwards from A. D. 60. St. Paul was two years at Cæsarea (Acts xxiv. 27); therefore he arrived at Jerusalem on his last visit by the Pentecost of 58. Before this he had wintered at Corinth (Acts xx. 2, 3), having gone from Ephesus to Greece. He left Ephesus, then, in the latter part of 57, and as he stayed 3 years at Ephesus (Acts xx. 31), he must have come thither in 54. Previously to this journey he had spent "some time" at Antioch (Acts xviii. 23), and our chronology becomes indeterminate. We can only add together the time of a hasty visit to Jerusalem, the travels of the great second missionary journey, which included 1½ year at Corinth, another indeterminate stay at Antioch, the important third visit to Jerusalem, another "long" residence at Antioch (Acts xiv. 28), the first missionary journey, again an indeterminate stay at Antioch (Acts xii. 25)—until we come to the second visit to Jerusalem, which nearly synchronized with the death of Herod Agrippa, in A. D. 44 (Wieseler, p. 130). Within this interval of some 10 years the most important date to fix is that of the third visit to Jerusalem; and there is a great concurrence of the best authorities in placing this visit in either 50 or 51. St. Paul himself (Gal. ii. 1) places this visit "14 years after" either his conversion or the first visit. In the former case we have 37 or 38 for the date of the conversion. The conversion was followed by 3 years (Gal. i. 18) spent in Arabia and Damascus, and ending with the first visit to Jerusalem; and the space between the first visit (40 or 41) and the second (44 or 45) is filled up by an indeterminate time, presumably 2 or 3 years, at Tarsus (Acts ix. 30), and 1 year at Antioch (Acts xi. 26). The date of the martyrdom of Stephen can only be conjectured, and is very variously placed between A. D. 30 and the year of St. Paul's conversion. In the account of the death of Stephen St. Paul is called "a young man" (Acts vii. 58). It is not improbable therefore that he was born between A. D. 0 and A. D. 5, so that he might be not 60 years of age when he calls himself "Paul

the aged" in Philimon 9. More detailed conjectures will be found in almost every writer on St. Paul. *Comparative* chronological tables (showing the opinions of 30 and 34 critics) are given by Wieseler and Davidson; tables of events only, by Conybeare and Howson, Alford, Jowett, and many others.

*Personal Appearance and Character of St. Paul.* — We have no very trustworthy sources of information as to the personal appearance of St. Paul. Those which we have are referred to and quoted in Conybeare and Howson (i. ch. 7, end). They are the early pictures and mosaics described by Mrs. Jameson, and passages from Malalas, Nicephorus, and the apocryphal *Acta Pauli et Thecle* (concerning which see also Conybeare and Howson, i. 197). They all agree in ascribing to the Apostle a short stature, a long face with high forehead, an aquiline nose, close and prominent eyebrows. Other characteristics mentioned are baldness, gray eyes, a clear complexion, and a winning expression. Of his temperament and character St. Paul is himself the best painter. His speeches and letters convey to us, as we read them, the truest impressions of those qualities which helped to make him The great Apostle. We perceive the warmth and ardor of his nature, his deeply affectionate disposition, the tenderness of his sense of honor, the courtesy and personal dignity of his bearing, his perfect fearlessness, his heroic endurance; we perceive the rare combination of subtlety, tenacity, and versatility in his intellect; we perceive also a practical wisdom which we should have associated with a cooler temperament, and a tolerance which is seldom united with such impetuous convictions. And the principle which harmonized all these endowments and directed them to a practical end was, beyond dispute, a knowledge of Jesus Christ in the Divine Spirit. Personal allegiance to Christ as to a living Master, with a growing insight into the relation of Christ to each man and to the world, carried the Apostle forwards on a straight course through every vicissitude of personal fortunes and amidst the various habits of thought which he had to encounter. The conviction that he had been entrusted with a Gospel concerning a Lord and Deliverer of men was what sustained and purified his love for his own people, whilst it created in him such a love for mankind that he only knew himself as the servant of others for Christ's sake.

A remarkable attempt has recently been made by Professor Jowett, in his Commentary on some of the epistles, to qualify what he considers to be the blind and indiscriminating admiration of St. Paul, by representing him as having been, with all his excellences, a man "whose appearance and discourse made an impression of feebleness," "out of harmony with life and nature," a confused thinker, uttering himself "in broken words and hesitating forms of speech, with no beauty or comeliness of style," and so undecided in his Christian belief that he was preaching, in the 14th year after his conversion, a Gospel concerning Christ which he himself, in four years more, confessed to have been carnal. In these paradoxical views, however, Professor Jowett stands almost alone: the result of the freest, as of the most reverent, of the numerous recent studies of St. Paul and his works (amongst which Professor Jowett's own Commentary is one of the most interesting) having been only to add an independent tribute to the ancient admiration

of Christendom. Those who judge St. Paul as they would judge any other remarkable man confess him unanimously to have been "one of the greatest spirits of all time;" whilst those who believe him to have been appointed by the Lord of mankind, and inspired by the Holy Ghost, to do a work in the world of almost unequalled importance, are lost in wonder as they study the gifts with which he was endowed for that work, and the sustained devotion with which he gave himself to it.

*Modern Authorities.*—It has not been thought necessary to load the pages of this article with references to the authors about to be mentioned, because in each of them it is easy for the student to turn at once to any part of St. Paul's life or writings with regard to which he may desire to consult them. A very long catalogue might be made of authors who have written on St. Paul; amongst whom the following may be recommended as of some independent value. In English, the work of Messrs. Conybeare and Howson, on the *Life and Epistles of St. Paul*, is at once the most comprehensive and the most popular. Amongst Commentaries, those of Professor Jowett on the Epistles to the Thessalonians, Galatians, and Romans, and of Professor Stanley on the Epistles to the Corinthians, are expressly designed to throw light on the Apostle's character and work. The general Commentaries of Dean Alford and Dr. Wordsworth include abundant matter upon everything relating to St. Paul. So does Dr. Davidson's *Introduction to the New Testament*, which gives also in great profusion the opinions of all former critics, English and foreign. Paley's well-known *Horæ Paulineæ*; Mr. Smith's work on the *Voyage and Shipwreck of St. Paul* [3d ed. 1866]; Mr. Tate's *Continuous History of St. Paul*; and Mr. Lewin's *St. Paul*, are exclusively devoted to Pauline subjects. Of the older works by commentators and others, which are thoroughly sifted by more recent writers, it may be sufficient to mention a book which had a great reputation in the last century, that of Lord Lyttelton on the *Conversion of St. Paul*. Amongst German critics and historians the following may be named: Ewald, in his *Geschichte des Volkes Israel*, vol. vi. and his *Sendschreiben des Apostels Paulus*; Wieseler, *Chronologie des Apostolischen Zeitalters*, which is universally accepted as the best work on the chronology of St. Paul's life and times; De Wette, in his *Einleitung* and his *Exegetisches Handbuch*; Neander, *Pflanzung und Leitung der Christl. Kirche*; works on *Paulus*, by Baur, Hensen, Schrader, Schneckenburger; and the Commentaries of Olshausen, Meyer, etc. In French, the work of Salvador on *Jésus Christ et sa Doctrine*, in the chapter "St. Paul et l'Église," gives the view of a modern Jew; and the *Discourses on St. Paul*, by M. de Pressensé, are able and eloquent. J. LL. D.

\* The literature under Acts (see especially Amer. ed.) pertains largely to the history of Paul. Luke's narrative in the Acts may be read with new interest in the later and more accurate translations (Bible Union, Noyes, Alford). Stier's *Reden der Apostel* is now translated by G. H. Venables, *The Words of the Apostles*, etc. (Edinb. 1869), one of the series of Clark's Foreign Theol. Library. For extended sketches of the life and teachings of Paul the reader may see Dr. Schaff's *History of the Apostolic Church*, ch. iii. pp. 226-348, Pressensé's *Histoire des trois premiers Siècles*, i. 425 ff. and ii. 1-104, and Dr. William Smith's *New Test. His-*

*tory*, pp. 340-536, Amer. ed. Among the recent treatises or works may be mentioned *Paulus der Apostel*, by J. P. Lange, in Herzog's *Real-Encykl.* xi. 238-248; *Paulus*, by H. Besser, author of *Die Bibelstunden*, in Zeller's *Bibl. Wörterb.* ii. 234-242; Lewin's *Fasti Sacri* (Lond. 1865), important for the chronology; Ch. J. Trip, *Paulus nach der Apostelgesch.* (Leiden, 1866), a prize essay; J. R. Oertel, *Paulus in der Apostelgesch.* etc. (Halle a. S. 1868), showing the historical character of the Pauline portions; Howson, *Hulsean Lectures for 1862 on The Character of St. Paul* (2d ed. Lond. 1864); *Scenes from the Life of St. Paul* (Bost. 1867); *The Metaphors of St. Paul* (Lond. 1868), reprinted in the *Theological Eclectic* vols. iv. & v.; *Die Apostelgeschichte in Bibelstunden* (i.-lxxxiii.) *ausgelegt von Karl Gerok*, 2 vols. (1868); Th. Binney, *Lectures on St. Paul: his Life and Ministry* (Lond. 1866), popular and practical; A. Hausrath, *Der Apostel Paulus* (Heidelb. 1865); F. Bungener, *Saint Paul, sa vie, son œuvre et ses épîtres* (Paris, 1865); Renan, *Saint Paul* (Paris, 1869); Paulus Cassel, *Die Inschrift des Altars zu Athen* (Berlin, 1867), able, but incorrectly assumes Paul's object to be anti-panththeistic not anti-polytheistic.

On the doctrine of St. Paul, see L. Usteri, *Entwickelung d. paulin. Lehrbegriffs* (Zürich, 1824, 6e Aufl. 1851); A. F. Dähne, *Entwickel. d. paulin. Lehrbegriffs* (Halle, 1835); J. F. Rübiger, *De Christologia Paulina, contra Baurium* (Vratisl. 1852); R. A. Lipsius, *Die paulinische Rechtfertigungslehre* (Leipz. 1853); Abp. Whately, *Essays on some of the Difficulties in the Writings of St. Paul, from the 8th London ed.*, Andover, 1865; and the biblio-theological works of Neander, Reuss, Lutterbeck, Baur, Messner, Lechler, C. F. Schmid, and Beyschlag, referred to under JOHN, GOSPEL OF, vol. ii. p. 1439 a.—For copious references to the literature relating to the Apostle, see particularly Reuss's *Gesch. der Heiligen Schriften N. T.* 4e Aufl. § 58 ff. H.

\* *Paul's peculiar Mission as an Apostle.*—Saint Paul is generally regarded as one of the apostolic college, perhaps, indeed, as *primus inter pares*, yet as distinguished from the others only by his late and abnormal admission into their ranks,—a distinction which in some quarters essentially impaired his authority and influence. In our apprehension, he was specifically and officially separated from the twelve, and was intrusted with a mission, to which no one of them was equally adequate, and for which his nativity, culture, and antecedent life had trained and qualified him.

The seeds of Christianity were planted at the outset in the decaying trunk of Judaism, as those of the mistletoe are lodged in the ancient oak. The earliest Christians not only were regarded, but regarded themselves, as a reformed sect of Jews. The original disciples were punctilious Hebrews, and held Christianity as a code supplementary to that of Moses. They were scandalized and horror-stricken at the thought of aljuring the ceremonial law. When, after the divine monition in the case of Cornelius, they reluctantly began to admit Gentile converts, they stretched the yoke of Judaism before the gate of the church, and sought to compel their proselytes to stoop under it, as the essential, or at least the most hopeful condition of Christian citizenship. This narrowness of vision was the necessary result of their humble origin, obscure condition, scanty culture, and provincial

associations, and it was among their special fitnesses for the apostleship. Had they been more catholic in their tolerance, and broader in their sympathies, they would have hopelessly alienated their fellow-countrymen, and would thus have been left without any point of support for propagandism among the Gentiles. It was their continued devotion to the law and ritual of their fathers, that won for them a not impatient hearing, even from the very Pharisees, that enabled them to preach Christ in the synagogues, and that obtained for the new religion in Gentile cities the liberty of profession, which, restricted as it was and nowhere inviolable, had cost Judaism several generations of untempered contumely and persecution. Thus was it ordained that the heavenly exotic should gain richness and strength, should reach forth boughs of ample shade and sufficing fruitfulness, before it should be severed from the parent trunk, and left without support to the winds and storms of a hostile world.

But the hour had arrived when the more vigorous vitality of the younger plant could no longer find nourishment in its parasitic condition; and Paul was the appointed agent for the essential and pre-determined separation. In his mind, and under his administration, Christianity was first required and treated as independent and sovereign. Under him grew up the organization, by which it was thenceforth to assume its unshared place, to discharge its undivided office, and to overshadow and supplant the growths of uncounted ages. This bold and delicate mission demanded not alone devotion and zeal, not alone intimate converse with the mind of Christ. He to whom it was intrusted needed a profound acquaintance with Judaism as it then was, its traditions and its philosophy, in order that the separation might be effected, on the one hand, without leaving the least radicle or fibre of the transplanted scion in the ancient stock, and on the other, without marring the venerable, though effete majesty of the tree which God had in the earlier ages planted for the healing of the nations, and whose "branches he had made strong for himself." For this work there was also requisite a thorough knowledge of those extra-Judaic religions and philosophies, which were to vanish with the growth of Christianity, but each of which, by the germs of truth which it embodied, might offer special vantage-ground for the tilth of the spiritual husbandman. It was fitting, too, that the chief agent in this divine enterprise should have become familiar with the customs, prejudices, needs, and susceptibilities of the so many and diverse nations that were to be sheltered and fed by the same "tree of life." Above all, there were required for this movement a weight of character and a cogency of influence which could command respect and constrain attention, a sanctity of life beyond the shadow of reproach, and dialectic and rhetorical faculties which needed not to shrink from the encounter with the subtlety of the schools or the eloquence of the popular assembly.

If, then, Paul has had no superior, hardly an equal among men, he was no more than level with his work. We cannot but regard him as the first man of his age, and we can name no man of any age who seems to us greater than he. Indeed, apart from the intrinsic character of Christianity and the internal evidence of its records, there seems to us no stronger proof of the authenticity of those records and the divine origin of their contents, than the simple fact that Paul—who

lived so near the birth-time of the religion, when imposture could have been laid bare and delusion rent away, and who of all men was the least likely to have been deceived by false shows or borne headlong by baseless enthusiasm—was a Christian.

*His training for his Work.*—Let us pass ir review his providential training for his great life-work; for God always "makes up his jewels," and those that are to glow with the purest lustre in his coronet are always ground, polished, and set by the special agencies of nature, experience, and association best adapted to develop in each the peculiar traits of the divine beauty and glory which it is designed to mirror to the world. At the Christian era there was not a spot on earth so well fitted as Tarsus, for the nurture of him to whom that once world-renowned city now owes the survival of its very name in the popular memory. Its site and surroundings must have taken an early and strong hold on a mind like his, and have helped to generate the fervor, the glow, the torrent-like rush of thought, the vivid imagination, the overcharged intensity of emotion manifested in his writings. The city lay on a richly variegated plain of unsurpassed fertility. In its rear rose the lofty, bold, snow-crowned cliffs of Mount Taurus, piled against the northern sky, summit against summit, crag upon crag, rolling up their mist-wreaths to meet the ascending sun, and arresting midway his declining path. From these cliffs, clear as crystal, made deathly cold even in midsummer by the melting snow, tumbled rather than flowed the Cydnus, over perpetual rapids, and frequent waterfalls of unsurpassed beauty and of grandeur hardly paralleled on the Eastern Continent, till only as it approached the city it became tractable to the oar, and navigable thence to the great sea. In full sight of the city lay the vast Mediterranean, the ocean of the Old World, whitened with the sails of a multitudinous commerce, now serene as a land-locked lake, and then lashed into commotion wild and grand as that with which the Atlantic breaks upon its shores. This discipline of valley, mountain, river, and sea, was well adapted to make the perceptive powers keen and vivid, to inspire gorgeous fancies, to stretch to their utmost capacity the extensor muscles of the inner man, to form habits of rapid thought and sightlike intuition.

Then, as regarded Paul's training for the cosmopolitan life for which he was destined, Tarsus was the metropolis of eastern travel and commerce. Nowhere else except in Rome was there so free a commingling of people from every quarter of the civilized world, or so favorable a position for acquiring an intimacy with a broad diversity of languages, habits, customs, and opinions. The city was a microcosm in its population. The native barbarian stock was depressed, yet little changed by immigration. The descendants of an early Greek colony held the foremost places of wealth and social influence, rivalled by a horde of officials and mercantile residents from Rome; while, separated from both by faith and ancestral customs, but mingling with them in all the departments of active life, were large numbers of the Hebrew race, whose migratory instincts were already fulfilling the ancient prophecy of their dispersion among all nations. Tarsus was also celebrated as a seat of learning, taking precedence, at that epoch, of Athens which was then losing and of Alexandria which had not yet attained the supremacy in

mental culture. [TARSUS.] That Paul had enjoyed a liberal culture under Grecian auspices is evident from the freedom and fluency of his style, from his repeated classical allusions and quotations, and from his dialectic acumen and skill.

From Tarsus Paul was probably removed at an early age to Jerusalem; and that on the Jewish side his education was thorough and perfect, his teacher's name alone is ample warrant. Gamaliel was the most learned Jew of his age, and was reckoned among the seven in the long series of Rabbis, who were honored with the title of *Rabban*, equivalent to "*Most Excellent Master*." It is a saying of the Talmud, that "the glory of the Law ceased" at his death. He was, of course, a Pharisee, and as such, not only held in reverence the entire canon of the Old Testament, but attached even greater importance to oral tradition, and to the (so-called) religious writings in the then vernacular dialect; so that through him Paul gained access to the distinctive opinions and mental habits of the sect with which he was afterwards brought into so frequent collision, and from whose members he knew how to gain a favorable hearing. Undoubtedly Paul may have learnt from Gamaliel the lessons that made him a persecutor of the infant church. The Rabbi's prudent counsel in the case of Peter does not show that he was tolerant of reputed error. That counsel savored as much of the fox as of the dove, and, taken by itself, it only indicates a deep insight into the springs of human action, and a shrewd perception of what would have been the surest way of exterminating Christianity, had it been indeed, as he supposed it, a base-born superstition. There is extant a prayer of Gamaliel against misbelievers, which shows that he relied implicitly on the divine vengeance for the work of destruction from which he dissuaded his fellow-countrymen. We attach no little importance to Paul's education and experience as a persecutor. It must have taught him tolerance, generosity, magnanimity toward his opponents. We accordingly find him using the language, not of harsh condemnation, but of conciliation, tenderness, pity toward the unconverted Jews, evidently maintaining a strong fellow-feeling with them, never forgetting that he had been honestly and fervently what they still were. Under the same influence we see him more than just towards rival Christian teachers, rejoicing in whatever good work they wrought for the common cause, and acknowledging the loyalty to their master, and the successful propagandism of those who "added affliction to his bonds" (Phiiip. i. 16).
